Appendix M

Project Impact Analyses Results by Segment

M. Project Impact Analyses Results by Segment

M.1 Introduction

Appendix M contains GIS analysis results at the segment-level, when available, to provide the Final EIS reader with the ability to produce an estimate of impacts on any combination of Final EIS segments for the resource analyses results that are provided. The data are contained in a Microsoft EXCEL file for accessibility and ease of use.

M.2 Limitations

This is not an exhaustive list of analyses results, nor is it expected to exactly replicate EIS results. The data is provided as a courtesy based on public comment, and should be used as an indicator of magnitude of potential Project effects. This appendix provides GIS analysis results at the segment-level detail as a "snapshot" of the process used to produce the alternative-level results provided in the Final EIS. Because this data is provided as a "snapshot" in time, and because it was extracted at a point prior to the completion of the analysis process, it may not always perfectly match the results provided in the Final EIS.

A case-in-point is the count of raptor nests within one mile of potential disturbance areas; because the Final EIS analysis considered complete alternatives that begin and end at the Regions, the results in the Final EIS avoid double-counting nests that may be located in the overlap that the intersection of segments creates (e.g., in the case of nests within one mile, it is a one-mile circle around the location that segments meet).

An example of data that could not be included at a segment-level is the results of the Lands with Wilderness Characteristics analysis. This analysis depended upon complete alternatives because individual segments can cross a portion and then end within an identified unit, but not completely split the unit. When considered as a complete alternative, this potential only occurs at three locations across the Project area (where the Project regions meet) instead of at numerous locations. Therefore, the Lands with Wilderness Characteristics analysis was not performed at the segment level.

Other steps in the analysis process that may cause a difference between this appendix and the Final EIS include the final data quality assurance and quality control checks of the document, rounding errors, and professional editing by the resource specialists.

M.3 Data Descriptions

M.3.1 Impact Type Definitions Used in Descriptions

- Construction Disturbance: estimated disturbed area during construction.
- Operation Disturbance: estimated disturbed area after the construction of Project.
- Spatial Intersection: area of individual resource identified within specific area, e.g., distance from alignment or within refined transmission corridor.
- Miles Crossed: length of alignment crossing resource.
- Count: number of individual resources within specific area.

M.3.2 Data Field Descriptions

- Resource Detail: defines details regarding the Subject.
- Results: provides the quantified result of the analysis.
- Result Type: defines what the result represents.
- Segment: indicates the segment ID number as depicted in the Final EIS.
- Subject: identifies the resource subject that is defined.
- Units: defines the units of the quantified result.

M.3.2.1 Resource Details Included in Data Fields by Subject

Aquatic/Special Status Aquatic Species

RIPARIAN (Construction & Operation Disturbance): National Hydrography Dataset (USGS)

- Waterbody -100 ft/300ft buffer–lakes and ponds buffered by 100 feet and 300 feet.
- Streams- 100ft/300ft buffer streams and rivers buffered by 100 feet and 300 feet.

Cultural Resources

NRHP (Spatial Intersection): National Register of Historic Places

- Eligible
- Listed
- Unevaluated

TCP (Spatial Intersection): Traditional Cultural Property

SITE DENSITY (Spatial Intersection): number of sites per 100 acres.

SVYPCT (Spatial Intersection): percent of segment previously surveyed for cultural resources.

Geology

PFYC (Spatial Intersection):- Potential Fossil Yield Class the potential of fossil occurrences within the geologic units. Class 1 has the lowest potential whereas Class 5 has the highest potential.

Health and Saftey

COMMUNICATION SITES (Spatial Intersection): Federal Communications Commission (FCC) data.

Land Use and Planning

OWNERSHIP (Spatial Intersection): surface jurisdiction

RNG – Range/Grazing allotments

- [Agency]#[Allotment Name]#[Allotment Number]#[Total Acres of Allotment], e.g., “BLM#DALEY RANCH#00605#26194.3177578851”

FM – Forest Management

- [Forest Name] –[Unit Name; Prescription], e.g., “Uinta-Wasatch-Cache National Forest - 10 UPPER SPANISH FORK CANYON; Rx:3.3”

Public Health and Safety

PUBLIC_SAFET-SENSREC – sensitive receptors such as schools or churches within 500 feet of alignment

STRUCTURES

- Within 200 feet of alignment, including information on the classification of structure use
- Within 500 feet of alignment, including information on the classification of structure use

Recreation

REC (Construction Disturbance, Operation Disturbance): Recreation area (other than SMAs)

[Recreation classification]#{name of location]

Soils/Water

SOILS (Construction Disturbance, Operation Disturbance): Soil limitation characteristics based on SSURGO or General Soils Mapping (NRCS):

- Compaction Prone
- Corrosion Concrete
- Corrosion Steel
- Hydric
- LRP (Limited Revegetation Potential)
- Prime Farmland
- Shallow Bedrock
- Shallow Excavations
- Shrink Swell
- Small Commercial Buildings
- Water Erosion - Severe
- Wind Erosion - Sever

Water Erosion by HUC (Construction Disturbance, Operation Disturbance): disturbance to soils severely prone to water erosion by HUC10 (Hydrologic Unit Code 10-digit)

Special Designation Areas

SMA (Spatial Intersection) Special Management Areas: Areas established by federal agencies that are managed for special designations.

[Special Designation Area Type]$[Name]$[subunit]$[Total Acres], Note: In many cases the subunit does not exist and will be presented as $$; e.g., " $Badger Wash ACEC$$1885.32598112883"

Special Designation Area Types

- ACEC: Area of Critical Environmental Concern
- CE: Conservation Easement
- CWMU: Cooperative Wildlife Management Unit
- DRUA: Dispersed Recreation Area
- HT: Historic Trail
- NCA: National Conservation Area
- NM: National Monument
- nonWSA WCR: Non Wilderness Study Area/ Wilderness Characteristics
- NRA: National Recreation Area
- NWR: National Wildlife Refuge
- Prop Wild: Proposed Wilderness
- RA: Recreation Area

IRA (Spatial Intersection): Inventoried Roadless Area

- [National Forest Name]- [IRA Name], e.g., “Ashley National Forest-0401010”

Vegetation/Special Status Plant Species

VEG (Construction Disturbance, Operation Disturbance): Vegetation classification groupings based on ReGAP data.

WETLAND (Construction Disturbance, Operation Disturbance): Wetland vegetation classification groupings based on ReGAP data.

SSPS (Construction Disturbance, Operation Disturbance

- Las Vegas Buckwheat Habitat Model

Visual Resources

Landscape Scenery (Spatial Intersection): A visual quality rating system; Low, Moderate, High.

BLM VRI Class Impacts: Visual Resource Inventory classifications.

BLM VRM Class Impacts: Visual Resource Management classifications.

Viewer Sensitivity Buffer:

- Moderate (Miles): Buffer distance based off of travel routes, recreation areas, hotels, museums, educational facilities, greenbelt, city/municipal parks.
- High (Miles): Buffer distance based off of Scenic Byways, National Historic Trails, Historic Roads, Residences, Roadless areas, Special Management areas, and water bodies.

Scenic Quality: A=scenic quality rating score of 19 or more; B= scenic quality rating score of 12-18 or less; C=scenic quality rating score of 11 or less; N=Not rated.

USFS SIO VQO Class Impacts: Scenic Integrity Objectives or Visual Quality Objective classifications.

Wild Horses

HMA (Construction Disturbance, Operation Disturbance, Spatial Intersection): Herd Management Area [HMA Name] ([HMA ID])

Wildlife/Special Status Wildlife Species/Migratory Birds

GSG-OCCUPIEDLEKS (count): Greater sage-grouse occupied leks within 4 miles

GSG HABITAT (Construction Disturbance, Operation Disturbance): Greater sage-grouse habitats.

- CO-PGH - Preliminary General Habitat in Colorado (CPW).
- CO-PPH - Preliminary Priority Habitat in Colorado (CPW).
- WY-Core - Governor’s Core Areas in Wyoming (WGF), also indicates name of core area.
- UT-occupied; UT-Winter; UT-brood-rearing - Occupied, Winter, and Brood-rearing habitats in Utah (UDWR)

GSG-PAC (Construction Disturbance; Operation Disturbance): Greater sage-grouse Priority Areas of Concern as defined by COT (2014) (USFWS)

BHCA (Construction Disturbance; Operation Disturbance): Bird Habitat Conservation Area

BIG GAME (Construction Disturbance; Operation Disturbance): Big game habitats as defined by respective states.

CRITICALHAB (Construction Disturbance; Operation Disturbance): USFWS-defined critical habitats for federally-listed species

DTORT (Construction Disturbance; Operation Disturbance): USFWS-defined critical habitat and USGS-defined habitat (value greater than 0.6) for Mojave Desert tortoise.

IBA (Construction Disturbance; Operation Disturbance): Important Bird Areas as defined by Audubon Society.

RAPTORS (Count): Number of raptor nests within one mile of potential disturbance areas.

WTPD (Construction Disturbance; Operation Disturbance): White-tailed prairie dog.

SSWS (Construction Disturbance; Operation Disturbance): Other federally-listed species.

- California condor
- Canada lynx
- Gray wolf
- SWFL Sothwestern willow flycatcher
- North American wolverine
- WYBC Western yellow-billed Cuckoo
- Yuma Clapper Rail
