Notices

A	Historic roads or trails eligible for listing on the National Register of Historic Places are or may be present. Mitigation of impacts could require substantial buffers to protect the viewshed of the trail.
B	Historic Structures or remains of structures eligible for listing on the National Register of Historic Places are or may be present. Mitigation of impacts could require substantial buffers to protect viewsheds around buildings or communities.
C	Remains of historic railroads eligible for listing on the National Register of Historic Places are or may be present. Mitigation of impacts could require substantial buffers to protect the viewshed of the railroad.
D	Although all surface use authorizations would be subject to review, and mitigative measures may be required for cultural resources in any parcel, the Elko District Office advises potential lessees that these parcels are in areas with high potential for containing important cultural resources. Implementing measures to mitigate impacts to cultural resources may delay timeliness of permit approvals and restrict surface occupancy.
F	The proposed parcel intersects the 100 year floodplain. Special restrictions may apply to protect floodplain function.
G	High priority stream habitat (Elko RMP) or stream habitat (Wells RMP) exists within the proposed parcel. Special restrictions may apply to protect habitat
H	The proposed parcel intersects a water resource for which water quality standards apply. Special restrictions may apply to protect water quality.
K	Mule Deer Migration Area
O	Mule Deer Transitional Habitat
P	Parcels are located in the I-80 Low Visibility Corridor. The Low Visibility Corridor is a 3 mile wide (where possible) passage on which existing utility transmission or transportation facilities are located for which a future need may be accomodated if the facility is not evident in the characteristic landscape. The objective for visual resources within this area is for management actions not to be evident in the characteristic landscape.
