Decision and Rationale on Action
I have decided to implement the proposed action, of geotechnical exploration in the National Petroleum Reserve in Alaska (NPR-A) on land managed by the Bureau of Land Management (BLM). The applicant will be provided with stipulations entitled "FF096795 Conoco Geotechnical Exploration Permit Stipulations."

In addition, I have reviewed the plan conformance statement and have determined that the proposed action is in conformance with the approved land use plans and that no further environmental analysis is required under the National Environmental Policy Act (as documented in the attached CX, NEPA Compliance).

The evaluation and finding done to comply with Section 810 of ANILCA found no significant restrictions to subsistence use.

The assessment of Archaeological and Historic Resources completed for this project found that the standard stipulation package would provide sufficient protection and that the action may proceed.
