Normally Pressured Lance Natural Gas Development Project
Mail or deliver to BLM Pinedale Field Office (no later than May 12, 2011)
All information provided on this form (including contact information) will become public record.

The oil + gas industry is a great and expanding industry. it is ever changing and is pointing in a good direction I believe the people that work for it want it to be safe + good for the ~~en~~ environmet because this is our home and we live in it. there is a good impact for this feild it helps support local people and buisnesses if everybody can do there part to the fullest potential it can be a great thing for the counties + country. I fully support the (NPL) project + hope it grows + thrives.
