Comments (use back if needed):

We support the Coal Industry as it not only provides the reliable low cost power to Colorado but also supports industry that supplies the Mines. We need something besides Pot sales and Tourism to keep Colorado's economy strong. Having been a part of this industry for the past 40+ years it is

very disturbing to me to see the intense regulations and obstruction on the part of government agencies that hamper the effective and cost production of this valueable resource. The current administration seems to want to bankrupt America. We need new leadership to save this nation.
