Comments (use back if needed):

Coal is essential to ~~[illegible]~~ the economy. In places like price Utah, the whole economy is centered around coal. When you see all the highschools and all of the sports that the kids can participate in, they have all of that because of coal. If they didn't have all of the sports then they would be bored to death. Without sports and things coal gives to kids, teens like me would turn to drugs. We need coal!
