Sec. 33, NESW

My continued request and reasons for such are on the attached page 2.

I am writing to protest based upon my beliefs and concerns about proceeding with fracking and the consequences to our environment.

I do not reside near this location but enjoy all that is offered with our national forests and want to continue to enjoy it for all people to come. Causing these changes to our national parks, forests is irreparable and with permanent consequences. I feel fortunate to have found out in time for my voice to be heard. This sale is not a necessity yet preserving the land is. Please take this into consideration. Its impossible to see into the future the problems our nature suffers such as the case with the ash borers — to destroy valuable land for temporary gain is inexcusable and permanently affects generations to come in many ways we have yet to determine.

Continued on this page is the remaining parcels I am protesting. Sincerely

Donna [illegible]
