### **BLM Rock Springs resumes work on Resource Management Plan**

The Bureau of Land Management (BLM) Rock Springs Field Office (RSFO) has resumed work on the Rock Springs Resource Management Plan (RMP).

RSFO had suspended work on the RMP in February 2014 to allow for the analysis conducted as part of the Wyoming Greater Sage-Grouse Land Use Plan Amendment and Environmental Impact Statement (EIS) to be incorporated into the RMP, permit the incoming Rock Springs Field Manager to lead the development of the preferred alternative and provide time for the BLM Rock Springs staff and cooperators to work on additional travel route designations for inclusion in the RMP.

For more information about the Rock Springs RMP, please visit: <https://www.blm.gov/epl-front-office/eplanning/planAndProjectSite.do?methodName=renderDefaultPlanOrProjectSite&projectId=13853&dctmId=0b0003e8801809b2> or contact William West at 307-352-0259.

The BLM manages more than 245 million acres of public land, the most of any Federal agency. This land, known as the National System of Public Lands, is primarily located in 12 Western states, including Alaska. The BLM also administers 700 million acres of sub-surface mineral estate throughout the nation. The BLM's mission is to manage and conserve the public lands for the use and enjoyment of present and future generations under our mandate of multiple-use and sustained yield. In Fiscal Year 2013, the BLM generated \$4.7 billion in receipts from public lands.
