SAMPLE COMMENT FORM

PUBLIC COMMENT FORM
Las Vegas RMP Revision/EIS

This comment form can be submitted to the BLM, e-mailed to the BLM (SND0.RMP.Revision@blm.gov) or mailed to:
Las Vegas Field Offices, Bureau of Land Management
4701 N. Torrey Pines Dr.
Las Vegas, NV 89130
Attn: Carolyn Ronning, RMP Project Lead

To learn more about the resource management plan process, visit www.blm.gov/nv/st/en/fo/lvfo.html. Comments, including names and street addresses of respondents will be available for public review after the comment period at the Las Vegas Field Office during regular business hours (7:30 a.m. to 4:30 p.m.) Monday through Friday, except holidays. Individual respondents may request confidentiality. **If you wish to withhold your name or address from public review or from disclosure under the Freedom of Information Act, you must check the box below.** Such requests will be honored to the extent allowed by law. All submissions from organizations or businesses will be made available for public inspection in their entirety.

☐ Please withhold my personal information from public review or disclosure under the Freedom of Information Act.

Las Vegas Field Office, Bureau of Land Management
Overview and Summary

Background Information
- The need for the Resource Management Plan (RMP) Revision is to address emerging issues that have surfaced since approval of the existing RMP such as increasing interest in renewable energy, increasing demand for limited resources, appropriate protection of sensitive resources, and increasing conflict between competing resource values and land uses.
- The scope of the RMP Revision is limited to land-use plan-level decisions for the Las Vegas and Pahrump Field Offices, which include approximately 3.1 million acres of public land and 1 million acres of split-estate lands in Clark County and southern Nye County, Nevada.
- This planning effort involves preparation of an Environmental Impact Statement (EIS). Upon completion, the revised RMP will replace the existing Las Vegas RMP.

Types of Decisions to be Made in the RMP

The decisions addressed by the RMP Revision fall into three categories:
- Desired outcomes that are written as goals and objectives,
- Identification of uses/allocations that are allowable, restricted, or prohibited, and
- Identification of actions, including prescriptive measures or criteria, anticipated to achieve desired outcomes, including actions to maintain, restore, or improve land health.

The purpose of the scoping process is to determine relevant issues that will influence the scope of the environmental analysis, including alternatives, and guide the planning process. Preliminary issues for the RMP revision have been identified by BLM personnel, State and Federal agencies, and other stakeholders. These preliminary issues will be refined during the public scoping process and will be presented in the Scoping Report. These issues include:
- Changes to disposal areas for communities
- Visual resource management categories
- Final minerals management regulations to protect sensitive resources
- Special-status species management
- Evaluation of new special designation proposals
- Clarification of off-highway vehicle (OHV) management
- Consideration of new Special Recreation Management Areas (SRMAs)
- Management of site-type rights-of-way
- Reclamation standards for disturbances
- Renewable energy development for geothermal, wind, and solar power
- Management of split-estate lands.
