## Public Comments On Route: 2583

Organization, commenter: Escalante Ranch, Richard Miller

Comment ID: 000000171-7

• IV. TRANSPORTATION AND TRAVEL MANAGEMENT Mr. Miller's owns various parcels of private property and multiple water diversions in the area in question, and must access these lands via roads and trails which currently cross public land. In addition, Mr. Miller must necessarily access various roads and trails to in the course of managing his livestock operation. The EIS proposes closing various roads and trails to public motorized travel, to minimize resource damage caused by the public on both public and private lands. EIS at 157, 187. Mr. Miller supports the BLM's proposal to restrict public access to protect public and private property, but only so long as he is not restricted from using these roads as may be necessary to access his private lands and manage his livestock operation. Thus, to the extent that the BLM wishes to close roads to motorized public traffic, it should simultaneously grant Mr. Miller legal, administrative access. In addition, Mr. Miller notes that he would be entitled to a formal decision, subject to appeal, prior to the BLM restricting access to his private property and/or otherwise impacting his livestock operation. Mr. Miller notes that the BLM has mis-classified many routes. See EIS Map N -1 e. Specifically, many routes which have historically been used to access private land and water diversions, and/or are necessary to maintain livestock improvements or otherwise manage and operate Mr. Miller's livestock operation, have been incorrectly labeled as closed or otherwise restricted in their use. These routes should be classified as "administrative," to recognize these historic uses and to allow for continued uses consistent therewith. The Routes which have been incorrectly classified and which should be classified as "administrative" are as follows: Routes 460, 1220, 1243, 1245, 2003, 2053, 2073, 2086, 2089, 2121, 2122, 2126, 2156, 2166, 2168, 2171-2172, 2177, 2180, 2336, 2342, 2354, 2408, 2412, 2445, 2581, 2582, 2583, 2585, 2587, 2588, 2590, 2591, 2593, 2595, 2596, 2598, 2599, 2612, 2613, 2622, 2691, 3011, 3048, 3070, 3131, 3141, and 3158. See EIS Map N-1e. In addition, Route 2072 is not completely depicted on the map, in that it extends down the river, across BLM and private property, an additional 2-3 miles, and likewise Route 3048 extends an additional 0.75 miles and leads to private property. Id. Fina Uy, Map N-1e incorrectly labels Mr. Miller's privately owned bridge, which crosses the Gunnison River at the Bridgeport area, as "administrative." I d. Mr. Miller requests that the BLM correct these errors and mis-classifications.

## Public Comments On Route: 2593

Organization, commenter: Escalante Ranch, Richard Miller

Comment ID: 000000171-7

• IV. TRANSPORTATION AND TRAVEL MANAGEMENT Mr. Miller's owns various parcels of private property and multiple water diversions in the area in question, and must access these lands via roads and trails which currently cross public land. In addition, Mr. Miller must necessarily access various roads and trails to in the course of managing his livestock operation. The EIS proposes closing various roads and trails to public motorized travel, to minimize resource damage caused by the public on both public and private lands. EIS at 157, 187. Mr. Miller supports the BLM's proposal to restrict public access to protect public and private property, but only so long as he is not restricted from using these roads as may be necessary to access his private lands and manage his livestock operation. Thus, to the extent that the BLM wishes to close roads to motorized public traffic, it should simultaneously grant Mr. Miller legal, administrative access. In addition, Mr. Miller notes that he would be entitled to a formal decision, subject to appeal, prior to the BLM restricting access to his private property and/or otherwise impacting his livestock operation. Mr. Miller notes that the BLM has mis-classified many routes. See EIS Map N -1 e. Specifically, many routes which have historically been used to access private land and water diversions, and/or are necessary to maintain livestock improvements or otherwise manage and operate Mr. Miller's livestock operation, have been incorrectly labeled as closed or otherwise restricted in their use. These routes should be classified as "administrative," to recognize these historic uses and to allow for continued uses consistent therewith. The Routes which have been incorrectly classified and which should be classified as "administrative" are as follows: Routes 460, 1220, 1243, 1245, 2003, 2053, 2073, 2086, 2089, 2121, 2122, 2126, 2156, 2166, 2168, 2171-2172, 2177, 2180, 2336, 2342, 2354, 2408, 2412, 2445, 2581, 2582, 2583, 2585, 2587, 2588, 2590, 2591, 2593, 2595, 2596, 2598, 2599, 2612, 2613, 2622, 2691, 3011, 3048, 3070, 3131, 3141, and 3158. See EIS Map N-1e. In addition, Route 2072 is not completely depicted on the map, in that it extends down the river, across BLM and private property, an additional 2-3 miles, and likewise Route 3048 extends an additional 0.75 miles and leads to private property. In addition, Map N-1e incorrectly labels Mr. Miller's privately owned bridge, which crosses the Gunnison River at the Bridgeport area, as "administrative." I d. Mr. Miller requests that the BLM correct these errors and mis-classifications.

• Sowlbelly Ridge: This is an area which my family and I have hunted for decades. We are meat hunters, not sport hunters, and depend on the elk, deer and bear meat we get to supplement our food supply through the winter. It has become increasingly difficult to get to where the animals are because of roads which have already been closed. I would ask that roads numbered 2571, 2597, 2598, 2601, 3162, 2089, and 2166 remain open. We need roads to help in game retrieval. This area is usually still "t-shirt" weather in October when we hunt, which means very warm temperatures. If an animal is left for too long in that weather, it will spoil if it isn't skinned, gutted and transported as soon as possible to a meat locker. We typically get the meat out of the back country where it was killed and get it to camp to hang overnight and then immediately take it to GJ to a meat locker. We don't "road hunt"; we take our ATVs to the edge our hunting area and then start walking usually all day and for many miles. Even if we are lucky enough to get our game, none of us, even young, strong guys, can carry more than a quarter of an elk at a time very far, as has been suggested. This would mean 4 trips to carry an animal out and then it can't be done before the meat spoils. So which law should we break? The law that says you can't use an ATV on an existing road to retrieve game or the law that says you can't waste meat without facing a stiff fine? These roads are currently open and I ask that they remain open for game retrieval using ATVs: 2168, 2122, 2121, 2169 & 2170, 2596, 2171, 2003, 3145, 2182, 2179, 2178, 3143 and 2181.

Comment ID: 000000103-4

• Escalante Rd/Dry Mesa Rd, Sawmill Mesa Rd & 25 Mesa Rd areas: Due to hunting access use, and OHV recreation, I would like to see trail #'s 2166, 2168 & 2122, which are currently open to atv use, remain open to access as they currently are today. Other trails I'd like to see remain open as currently are, for same purposes, are #2169, 2596, 2171, 2003, 2122, 3145, 2182, 2179, 2178, 3143, 2181. These roads & trails are important to hunting access. Between Dry Mesa Rd & Sawmill Mesa Rd, I'd like for trails #'s 2243, 2244, 2248, 2249 and 2136 to remain open for atv use, as they currently are. These trails provide alternative route vs. having to travel on the main access roadways (Sawmill Mesa or Dry Mesa) and provide unique OHV recreation value for the activity I love to participate in. Alternative B & E designate these for horse and foot traffic and I'd like to see them remain open to atv activity as they currently are today. Trail # 2006, 2299, 2298, 2297 are slated for closure in Alt's B & E, but perhaps those would make a good horse/foot route vs. closure.

• Route 2169 along Palmer Gulch, west of Camp Ridge, duplicates 2596, 2171, 2003, and 2177 on Camp Ridge and should be closed especially since it is in a canyon drainage with good habitat value

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 000000135-14

• Camp RidgeHorse pack trail 2596, 2171 and 2177 should be nonmotorized and nonmechanized to avoid downgrading the existing "remote, open space recreation setting" of Camp Ridge, as directed in the Colorado BLM's 2007 Recreation and Visitor Services Guide. This document directs that such remote, primitive settings be retained

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 000000135-4

• we appreciate the route closures in the preferred alternative. However, as you will see in our attached 2011 route-specific comments, we are concerned about the routes left open in the draft TMP that we and others had recommended for closure, in particular: o The two ATV trails (Numbers 3162/2089/2166, and 2596/2171/2003) in the Dominguez Addition Unit that need to be closed a) to protect this unit and b) to prevent the likelihood of incursions into the Dominguez wilderness, due to remote, unmanageable and unenforceable terrain. o Palmer Gulch road #2169/2170, needs to be closed. o Road #2181 needs to be closed to OHVs. o 1778/1727 o 1782/1768/2602 in Sawmill Mesa and Wagon Park zones o 1756 should be closed at the junction with 1758, and include closure of roads 1593 and 1585

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 000000135-5

• Manage Gunnison Slopes Unit and Dominguez Addition Unit as Lands with Wilderness Characteristics ERMA status for Gunnison Slopes is a good start, but it needs the additional protection as a LWC as well. Dominguez Addition also needs to be included as a LWC, and the two ATV routes currently open in the preferred Alternative (roads 3162/2089/2166, and 2596/2171/2003) definitively closed to maintain this area's wild character

Organization, commenter: Backcountry Hunters and Anglers, Craig Grother

Comment ID: 000000156-18

• Comments on Travel Management Plan The following comments are based upon my review of the Map of Route by Route Designations for Alternative E (Map N-1E) in relationship to the resource management goals and objectives of the NCA. As previously stated, we are concerned that wilderness characteristics within the Dominguez Addition Unit would be highly impacted by the preferred alternative through the inclusion of two ATV trails within the Unit. Both of these ATV trails are currently low-standard two-track roads that extend into the Dominguez Wilderness. The preferred alternative would restrict the use of these roads to ATV's and the trails would theoretically dead end at the Wilderness boundary. Even if ATV riders did respect the Wilderness boundary, these motorized trails would degrade the wilderness values of the Dominguez Addition Unit. For this reason we are recommending that these two roads (roads 3162/2089/2166, and 2596/2171/2003) be converted to non-motorized trails to provide big game solitude, backcountry hunting, and quiet recreation use opportunities.

Organization, commenter: Backcountry Hunters and Anglers, Craig Grother

Comment ID: 000000156-4

• Two other units with wilderness characteristics occur within the D-E NCA that are not included within the preferred alternative. Wilderness characteristics within the Gunnison Slopes Unit appear to have been largely protected through management of this area as an ERMA that would emphasize equestrian and hiking trail activities and dispersed camping. This management strategy seems reasonable to provide camping opportunities along the Gunnison River to accommodate boating use on the river while maintaining an overall primitive setting. However, wilderness characteristics within the Dominguez Addition Unit would be highly impacted by the preferred alternative through the inclusion of two ATV trails within the Unit. Both of these ATV trails are currently low-standard two-track roads that extend into the Dominguez Wilderness. The preferred alternative would restrict the use of these roads to ATV's and the trails would theoretically dead end at the Wilderness boundary. Even if ATV riders did respect the Wilderness boundary, these motorized trails would degrade the wilderness values of the Dominguez Addition Unit. For this reason we are recommending that these two roads (roads 3162/2089/2166, and 2596/2171/2003) be converted to non-motorized trails to provide big game solitude, backcountry hunting, and quiet recreation use opportunities

• IV. TRANSPORTATION AND TRAVEL MANAGEMENT Mr. Miller's owns various parcels of private property and multiple water diversions in the area in question, and must access these lands via roads and trails which currently cross public land. In addition, Mr. Miller must necessarily access various roads and trails to in the course of managing his livestock operation. The EIS proposes closing various roads and trails to public motorized travel, to minimize resource damage caused by the public on both public and private lands. EIS at 157, 187. Mr. Miller supports the BLM's proposal to restrict public access to protect public and private property, but only so long as he is not restricted from using these roads as may be necessary to access his private lands and manage his livestock operation. Thus, to the extent that the BLM wishes to close roads to motorized public traffic, it should simultaneously grant Mr. Miller legal, administrative access. In addition, Mr. Miller notes that he would be entitled to a formal decision, subject to appeal, prior to the BLM restricting access to his private property and/or otherwise impacting his livestock operation. Mr. Miller notes that the BLM has mis-classified many routes. See EIS Map N -1 e. Specifically, many routes which have historically been used to access private land and water diversions, and/or are necessary to maintain livestock improvements or otherwise manage and operate Mr. Miller's livestock operation, have been incorrectly labeled as closed or otherwise restricted in their use. These routes should be classified as "administrative," to recognize these historic uses and to allow for continued uses consistent therewith. The Routes which have been incorrectly classified and which should be classified as "administrative" are as follows: Routes 460, 1220, 1243, 1245, 2003, 2053, 2073, 2086, 2089, 2121, 2122, 2126, 2156, 2166, 2168, 2171 - 2172, 2177, 2180, 2336, 2342, 2354, 2408, 2412, 2445, 2581, 2582, 2583, 2585, 2587, 2588, 2590, 2591, 2593, 2595, 2596, 2598, 2599, 2612, 2613, 2622, 2691, 3011, 3048, 3070, 3131, 3141, and 3158. See EIS Map N-1e. In addition, Route 2072 is not completely depicted on the map, in that it extends down the river, across BLM and private property, an additional 2-3 miles, and likewise Route 3048 extends an additional 0.75 miles and leads to private property. Id. Finally, Map N-1e incorrectly labels Mr. Miller's privately owned bridge, which crosses the Gunnison River at the Bridgeport area, as "administrative." I d. Mr. Miller requests that the BLM correct these errors and mis-classifications.

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

• Sowbelly Ridge: This is an area which my family and I have hunted for decades. We are meat hunters, not sport hunters, and depend on the elk, deer and bear meat we get to supplement our food supply through the winter. It has become increasingly difficult to get to where the animals are because of roads which have already been closed. I would ask that roads numbered 2571, 2597, 2598, 2601, 3162, 2089, and 2166 remain open. We need roads to help in game retrieval. This area is usually still "t-shirt" weather in October when we hunt, which means very warm temperatures. If an animal is left for too long in that weather, it will spoil if it isn't skinned, gutted and transported as soon as possible to a meat locker. We typically get the meat out of the back country where it was killed and get it to camp to hang overnight and then immediately take it to GJ to a meat locker. We don't "road hunt"; we take our ATVs to the edge our hunting area and then start walking usually all day and for many miles. Even if we are lucky enough to get our game, none of us, even young, strong guys, can carry more than a quarter of an elk at a time very far, as has been suggested. This would mean 4 trips to carry an animal out and it can't be done before the meat spoils. So which law should we break? The law that says you can't use an ATV on an existing road to retrieve game or the law that says you can't waste meat without facing a stiff fine? These roads are currently open and I ask that they remain open for game retrieval using ATVs: 2168, 2122, 2121, 2169 & 2170, 2596, 2171, 2003, 3145, 2182, 2179, 2178, 3143 and 2181.

• Comments on the route inventory for the Sawmill Mesa Unit of the Dominguez-Escalante NCA From Southwest to East The southern boundary of Dominguez Wilderness, 2597, has been a trail historically and the existing road only recently created. The road should be kept rough and vehicular traffic low

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 000000135-11

• Bennett's Basin Because there is so much wild country to the south, Roads 2597, 2541, crossing Bennett's Basin, and 2571 and 2601 should be considered for closure to expand the wilderness. At the very least, motorized use on these routes should be kept low by not maintaining them, rather by keeping them as rough, high clearance, full-sized vehicle 4WD roads, rather than as ATV routes, not marking them as ATV routes on maps, nor adding ATV amenities, nor advertizing them as ATV routes on widely publicized ATV and 4X4 websites, brochures, gazetteers, etc.

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and

needs to be returned to its previous condition by comprehensive route closures.All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

• Sowbelly Ridge: This is an area which my family and I have hunted for decades. We are meat hunters, not sport hunters, and depend on the elk, deer and bear meat we get to supplement our food supply through the winter. It has become increasingly difficult to get to where the animals are because of roads which have already been closed. I would ask that roads numbered 2571, 2597, 2598, 2601, 3162, 2089, and 2166 remain open. We need roads to help in game retrieval. This area is usually still "t-shirt" weather in October when we hunt, which means very warm temperatures. If an animal is left for too long in that weather, it will spoil if it isn't skinned, gutted and transported as soon as possible to a meat locker. We typically get the meat out of the back country where it was killed and get it to camp to hang overnight and then immediately take it to GJ to a meat locker. We don't "road hunt"; we take our ATVs to the edge of our hunting area and then start walking usually all day and for many miles. Even if we are lucky enough to get our game, none of us, even young, strong guys, can carry more than a quarter of an elk at a time very far, as has been suggested. This would mean 4 trips to carry an animal out and it can't be done before the meat spoils. So which law should we break? The law that says you can't use an ATV on an existing road to retrieve game or the law that says you can't waste meat without facing a stiff fine? These roads are currently open and I ask that they remain open for game retrieval using ATVs: 2168, 2122, 2121, 2169 & 2170, 2596, 2171, 2003, 3145, 2182, 2179, 2178, 3143 and 2181.

Comment ID: 000000171-7

• IV. TRANSPORTATION AND TRAVEL MANAGEMENT Mr. Miller's owns various parcels of private property and multiple water diversions in the area in question, and must access these lands via roads and trails which currently cross public land. In addition, Mr. Miller must necessarily access various roads and trails to in the course of managing his livestock operation. The EIS proposes closing various roads and trails to public motorized travel, to minimize resource damage caused by the public on both public and private lands. EIS at 157, 187. Mr. Miller supports the BLM's proposal to restrict public access to protect public and private property, but only so long as he is not restricted from using these roads as may be necessary to access his private lands and manage his livestock operation. Thus, to the extent that the BLM wishes to close roads to motorized public traffic, it should simultaneously grant Mr. Miller legal, administrative access. In addition, Mr. Miller notes that he would be entitled to a formal decision, subject to appeal, prior to the BLM restricting access to his private property and/or otherwise impacting his livestock operation. Mr. Miller notes that the BLM has mis-classified many routes. See EIS Map N -1 e. Specifically, many routes which have historically been used to access private land and water diversions, and/or are necessary to maintain livestock improvements or otherwise manage and operate Mr. Miller's livestock operation, have been incorrectly labeled as closed or otherwise restricted in their use. These routes should be classified as "administrative," to recognize these historic uses and to allow for continued uses consistent therewith. The Routes which have been incorrectly classified and which should be classified as "administrative" are as follows: Routes 60, 1220, 1243, 1245, 2003, 2053, 2073, 2086, 2089, 2121, 2122, 2126, 2156, 2166, 2168, 2171, 2172, 2177, 2180, 2336, 2342, 2354, 2408, 2412, 2445, 2581, 2582, 2583, 2585, 2587, 2588, 2590, 2591, 2593, 2595, 2596, 2598, 2599, 2612, 2613, 2622, 2691, 3011, 3048, 3070, 3131, 3141, and 3158. See EIS Map N-1e. In addition, Route 2072 is not completely depicted on the map, in that it extends down the river, across BLM and private property, an additional 2-3 miles, and likewise Route 3048 extends an additional 0.75 miles and leads to private property. Id. Finally, Map N-1e incorrectly labels Mr. Miller's privately owned bridge, which crosses the Gunnison River at the Bridgeport area, as "administrative." I d. Mr. Miller requests that the BLM correct these errors and mis-classifications.

## Public Comments On Route: 2599

Organization, commenter: Escalante Ranch, Richard Miller

Comment ID: 000000171-7

• IV. TRANSPORTATION AND TRAVEL MANAGEMENT Mr. Miller's owns various parcels of private property and multiple water diversions in the area in question, and must access these lands via roads and trails which currently cross public land. In addition, Mr. Miller must necessarily access various roads and trails to in the course of managing his livestock operation. The EIS proposes closing various roads and trails to public motorized travel, to minimize resource damage caused by the public on both public and private lands. EIS at 157, 187. Mr. Miller supports the BLM's proposal to restrict public access to protect public and private property, but only so long as he is not restricted from using these roads as may be necessary to access his private lands and manage his livestock operation. Thus, to the extent that the BLM wishes to close roads to motorized public traffic, it should simultaneously grant Mr. Miller legal, administrative access. In addition, Mr. Miller notes that he would be entitled to a formal decision, subject to appeal, prior to the BLM restricting access to his private property and/or otherwise impacting his livestock operation. Mr. Miller notes that the BLM has mis-classified many routes. See EIS Map N -1 e. Specifically, many routes which have historically been used to access private land and water diversions, and/or are necessary to maintain livestock improvements or otherwise manage and operate Mr. Miller's livestock operation, have been incorrectly labeled as closed or otherwise restricted in their use. These routes should be classified as "administrative," to recognize these historic uses and to allow for continued uses consistent therewith. The Routes which have been incorrectly classified and which should be classified as "administrative" are as follows: Routes 460, 1220, 1243, 1245, 2003, 2053, 2073, 2086, 2089, 2121, 2122, 2126, 2156, 2166, 2168, 2171 ~ 2172, 2177, 2180, 2336, 2342, 2354, 2408, 2412, 2445, 2581, 2582, 2583, 2585, 2587, 2588, 2590, 2591, 2593, 2595, 2596, 2598, 2599, 2612, 2613, 2622, 2691, 3011, 3048, 3070, 3131, 3141, and 3158. See EIS Map N-1e. In addition, Route 2072 is not completely depicted on the map, in that it extends down the river, across BLM and private property, an additional 2-3 miles, and likewise Route 3048 extends an additional 0.75 miles and leads to private property. Id. FinaUy, Map N-1e incorrectly labels Mr. Miller's privately owned bridge, which crosses the Gunnison River at the Bridgeport area, as "administrative." Id. Mr. Miller requests that the BLM correct these errors and mis-classifications.

Organization, commenter: Escalante Ranch, Kent Davis

Comment ID: 000000192-51

- Route numbers 2593, 2599, 2598. These need to be changed to admin routes for cattle emergencies.

## Route: 26

### Segment: 1991

#### Designation

##### Current Designation

Open (All modes of travel)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density medium in Alt A
- DENSITY Route density medium in Alt E
- VEGETATION Sagebrush patches >60 acres

#### Rationale

### Designation Criteria

- No designation criteria for this route segment.

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open (All modes of travel)

**Alternative C:** Open (All modes of travel)

- No Mitigation Criteria for this Route Segment

#### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density highest in Alt A
- DENSITY Route density medium in Alt E

### Rationale

#### Designation Criteria

- **No designation criteria for this route segment.**

#### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

### Previous Alternatives Analyzed

## Public Comments On Route: 26

Organization, commenter: Thunder Mountain Wheelers ATV Club, Walt Blackburn

Comment ID: 00000001-17

- Looking into the future, the main road that traverses the Nine mile hill area is a County Road and is part of the Tabeguache Trail corridor. Let us remind the ID team that there is a plan in the GJRMP to connect Bangs Canyon to the Nine mile hill route with a connector that will cross 141 at this juncture. This will create a unique opportunity for all forms of motorized travel allowing access to the Uncompahgre NF, Gateway area, and Glade Park. This will be a major conflict for the quiet use promoters. Access to this area will be difficult for horse trailers and anything other than high clearance vehicles. The terrain is very rugged with many canyons and will make it difficult for anyone except experienced and well fit hikers. The horse and hoof folks would be better served by allowing them to use the lower area that is along the river (Gunnison Slopes SRMA). Therefore we believe that Alternative (D) would be the best choice

- Nine mile Hill Recreation Management Area:Alternative (D) would be the best possible choice for this area: Based upon how the area is currently being used and also the need for future trail development to fulfill the growing motorized recreation needs, Alternative (D) would be the best choice. This area lends itself to development of some scenic and challenging single track motorized/mountain bike trails as well as the development of two track ATV trails. There are numerous canyons to experience and a real sense of being in a secluded setting. A negative consideration of alternative (E) is the conflict between quiet use and motorized recreation. There is a County Road that runs the full length of Nine mile hill and is used extensively by 4X4's and ATV's. This road is also part of the Tabeguache Trail and will connect a long motorized route from Bangs Canyon to the Uncompahgre NF. The Nine mile hill area should be allocated for motorized and non-motorized trail based recreation. A major advantage to this designation is that all forms of recreation can use these trails. In a shrinking "use" environment like the BLM is proposing, this would help alleviate over use in other areas.

- Keep mountain bike use into the planned Quiet Use area along the rim of Nine Mile Hill. The popular Tabeguache Trail is in this area

Organization, commenter: Jeffery Fleming

Comment ID: 000000105-6

- New trail construction on very top of NE ridge above Cactus Park. It would connect 738 to 998 crossing 26 midway and would also make a great hiking trail with amazing views in both directions

Organization, commenter: Janice Shepherd

Comment ID: 000000106-103

- What I'd really think would be great for the area is to combine Trailheads down on Hwy 141 with a nice network of hiking/horse trails on top. I think it could be a big draw for people away from the sometimes overused and overcrowded Devils' Canyon hiking area. Some rim trails along both Unaweep Canyon and overlooking the Gunnison would mean people could hike to see both in one outing. I've brought several groups of my friends out for just such an outing. We park down on Hwy 141, sometimes setting up a shuttle and sometimes planning to a grand loop. The hike up to the rim gets the heart pumping, so we feel that we've accomplished a fun feat. From there we head either cross-country or try to link up with some existing roads. Lunch finds us overlooking the Gunnison River, sometimes with great views of Mt Garfield. This outing would be better in for my friends and I if there were trails to follow. I almost never encounter any motorized use of the area, though I have encountered quite a few trash dump sites which people are clearly bringing to the area via motorized vehicles. I believe the motorized users must mostly be just passing through the area. So it seems appropriate to set aside the bulk of this area to non-motorized users, while still allowing motorized recreationalists to pass through the area on the county road and the rest of route 26. I have introduced several groups of friends to hiking in the area and all have enjoyed the interesting diversity of landscapes and vistas. Photo IMG\_10048 shows a view of the Gunnison River that made us want to return to the area for more exploration. We all thought that a trail following the rim where feasible would be a hike filled with many such grand views. I support the designation of this area as described in Alternative E, namely an area promoting equestrian, hiking and dispersed camping. The dispersed camping should be split between camping sites that are accessible by vehicle as well as camping sites that are accessible by non-motorized travel. Because of the short distances involved the area would make an excellent introduction to backpacking or horsepacking overnights (where people have confidence that a short hike/ride gets them back to their vehicle for safety reasons or for reducing the distance to haul water).

- Route 697 should be shown in the KML version as connecting to 26. I really enjoyed a hike along this route when combined with 700, 708, 720, 738 and 26. I was there with a group of 7 friends and the views and quiet were enjoyed by all. For many they had their first look at the entrance to Cactus Park as their low-clearance cars normally keep from accessing that area.

Organization, commenter: Quiet Trails Group, Sherry Schenk

Comment ID: 000000115-34

- Cactus Park TMP-Level Comments:Ninemile Hill26 (Ninemile Hill Road): With partners BLM should perform repairs and maintenance of the northern of mile of this route, so that a parking/staging area can be created with outhouse away from Hwy 141. Repairs are needed to make the road passable, when dry, to passenger cars. Many hikers drive passenger cars with low clearance and thus are severely limited by damage in the first mile of 26 from North.

Organization, commenter: Quiet Trails Group, Sherry Schenk

Comment ID: 000000115-35

- 508-517 (north end of Ninemile Hill area east of 26): The end of this motorized route would make a great designated camping spot, especially if target shooting is prohibited from designated camping spots.

Organization, commenter: Quiet Trails Group, Sherry Schenk

Comment ID: 000000115-36

- 136 (north end of Ninemile Hill area west of 26): This motorized route should be continued about 800 feet (as it currently continues on the ground) to a designated camping spot and turn-around, unless there is a conflict with other resources

Organization, commenter: Quiet Trails Group, Sherry Schenk

Comment ID: 000000115-37

- 687, 680 (near south end of Ninemile Hill area west of 26): This spur should be left open to motorized as a parking area until future parking/staging areas are developed nearby

Organization, commenter: Quiet Trails Group, Sherry Schenk

Comment ID: 000000115-38

- 739 (near south end of Ninemile Hill area north of 26): This connector to the proposed horse/foot trails should be left open to horse/foot so that horseback riders and hikers can proceed from 738 to 733, and proceeding north-ward on the proposed horse/foot trails until reaching 621 and then returning to the starting point via 26. This forms a nice loop, approximately 7 miles in length, with varied views and terrain. Such a connector would also allow other longer loops

Organization, commenter: Quiet Trails Group, Sherry Schenk

Comment ID: 000000115-39

- Cactus Park 15 (access from Hwy 141): We recommend that the BLM and the county work together to improve the access from Hwy 141 so that passenger cars can get as far as the staging area. Most of this road is quite useable and it is only the first 250 feet that are problematic. Near the staging area is the Gunnison Gravel interpretive area. Accessing this interesting interpretive area should not be limited to those driving high-clearance vehicles. We also envision quiet trail users driving as far as the intersection with Route 26 and accessing the Ninemile Hill ERMA via Route 26

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 000000135-38

- The following are comments on two hard copy maps I am sending today through the mail. Map 1 - Road Densities by watershed This map shows varying road densities with the DENCA. The watershed in section 1, circled on the map, has high road densities, 2.6 4 miles per square mile, that need to be reduced to restore the fragmented landscape. This is the Farmer Canyon, Gibbler Gulch area. The watershed found in section 2, circled on the map, has extremely high route densities, up to almost 7 miles per square mile. It is extremely important that the BLM reduce densities in this area, Cactus Park, which are affecting watershed health. The watershed found in section 3, circled on the map, is in the Hunting Ground unit and has moderate route densities, 1/7 2.6 miles per square mile, that likewise need to be reduced, closing duplicate and unnecessary routes, and adding no new routes. The water shed in section 4, circled on the map covers and Sawmill Mesa-Sowbelly Ridge unit of the NCA. It has the lowest route densities per square mile, which should be maintained. Map 2 - Overlapping Sensitive Species Habitat and CNHP Potential Conservation Areas This map shows areas of very high overlap, red, and high overlap, dark yellow. The red areas are located in the Wilderness and at the mouth of Big Dominguez Creek. The largest of the dark yellow areas (high concentrations of sensitive species) is in the Gibbler Gulch area of the Cactus Park unit, an area where my letter recommends multiple route closures to restore and protect the less motorized character of this landscape.  
List of photos taken in Cactus Park August 22, 2011 Photo-point explanation. Only the last two digits of the numbered photographs are marked on the map except for 0705 and 0707 at the end of the list. 2. Photos 60 77 were taken along Route 8 on the Cactus Park map (found on the DENCA website): 0660 User-created tracks, soil disturbance on Route 80661 User-created motorcycle tracks, area is remote and difficult to patrol 0662 Braided tracks, cryptogamic soil disturbance, rough road 0665 One of few less jolting sections of road 0672 View of Gibbler Mountain from the west. Gibbler Mountain is a 3000 acre unfragmented habitat area currently undisturbed by any roads or trails. It lends itself to designation as an untrailed, nonmotorized primitive area. 0674 View of Gibbler Mountain from the south 0675 View to the west from the same location on Route 8 0677 Closer view from the south 0682 Route narrows to ATV width here on Route 1235 where it branches off Route 8 south of Gibbler Mountain. 0684 Same 0689 View south from same spot into Gibbler Gulch and Dominguez Canyon on the far horizon. Gibbler Gulch forms another 3000 acre untrailed, unfragmented area which, if ATV route 1235 were closed, could be joined together with Gibbler Mountain, to create a 6000 acre non-motorized primitive area 0695 Same 0699 View of Route 8 0705 More braiding and soil damage on Route 80707 North end of Cactus Park accessed by the gravel quarry road

Comment ID: 000000143-2

- The Nine Mile Hill Preferred Alternative makes little sense if you look at how the surrounding areas have traditionally been used: The Tabeguache Trail which is multi use goes through this area and connects Bangs Canyon and Cactus Park. This area is frequently used by Jeep, ATV and Motorcycle. Alternative E, which designates this area as hoof and foot fails to consider the historical use of this area as well as unintended consequences of this alternative. Alternative D would be the best management practice

Organization, commenter: COPMOBA, Scott Winans

Comment ID: 000000168-4

- Cactus Park New trail construction on very top of NE ridge above Cactus Park. It would connect 738 to 998 crossing 26 midway and would also make a great hiking trail with amazing views in both directions. We [COPMOBA] agree with 1728 and 1725 as accessible for mountain bike due to the trail being managed as such after crossing National Forest land boundary

• 1. We have identified known potential issues and criteria to guide the planning process based on lands and resources in the planning area. Please provide comments on these issues and criteria, and/or identify other issues or criteria that you think should be considered (If your comment pertains to a specific is sure or criteria, please use the reference code, e.g. "PCI") 2. What areas within the Dominguez-Escalante National Conservation Area or Dominguez Canyon Wilderness do you value? Why? Area 1 Great views birdwatching, wildlife potogrpthing & some hicking Area 2 Viewing from bluffs from above Area 3 I use this area a good many times a year Area 4 I can't get to this area to use. Area 5 I use any road or ATV trail thats OPEN 3. Please provide any additional comments that you have regarding this project. Comments on attach sheet. Maps with GPS routes in red. Things that I want to comment on concerning Dominguez-Escalante NCA. 1. Cactus Park area is used by the motorized community, Mountain bikers, Hikers, and Etc. There are a lot of roads, jeep & ATV trails that need to be open for everyone to use. The area has been used for cattle grazing, Christmas tree cutting, fire wood, and many other uses. As the population grows in this area there needs to be public land open for their use. 2. As the motorized roads, double track and single track trails are closed; much less area is left for folks to use. Any Wilderness and Wilderness Study Area restricts firefighting, timber cutting (to help control pine and pinion beeHe and controlling ground cover which will stop the massive fuel for fires) and weed control. Colorado is having large fires now because of these large amounts of fuel. 3. The attached maps have GPS routes shown in red that I have GPS'ed at different times. Please note that I have used these routes at different times. All these routes are jeep accessible; many are used by 2 wheel drive pickups. I almost never see hikers when I'm out using these routes on my ATV or Pickup. [ED: The D-E NCA's Recreation Planner identified the route numbers for routes highlighted on the map mentioned in this comment: 621, 624, 676, 649, 641, 743, 676, 741, 97, 96, 744, 733, 15, 838, 18, 945, 26, 847, 848, 941, 1192, 1292, 1377] Organization, commenter: None

Comment ID: PUB\_SC-009

• [ED: Following are the text (in quotes) and the D-E NCA Recreation Planner's interpretation of what the commenter wrote on the maps they submitted during public scoping for the Dominguez RMP. The Rec Planner also identified the route numbers highlighted on the maps]: Routes 741 and 848 "needs ATV connector. Cultural sites can easily be avoided by the 50 foot policy." Routes 26 and 1017 "needs ATV connector." Route 941 "must remain open." Route 1017 "should be ATV route." There should be an "ATV connect" between routes 1198 and 1263. The following text was highlighted in orange "Highlighted routes are routes used often by WSATVA and other ATVs." in addition to all the routes mentioned previously, the following routes were highlighted in orange: 743, 97, 96, 26, 813, 842, 15, 847, 1393, 1192, 1292. [ED: On a second map, the commenter highlighted additional routes]: The following are "routes used often by WSATVA": 1516, 1571, 1605, 1633, 15, 1641, 1221. "SC-5" connecting routes 1605 and 1633 " and "SC-6" connecting routes 1516 and 1605 "need to become new ATV routes connecting these deadends." [ED: A map of the Gibbler Mountain area had additional text and routes]. "Highlighted routes" which "are often used by WSATVA 3 seasons" are as follows: 1235, 1221, 1409, 1310, 1263, 1198, 15. Route 1235 [is or should be] "an ATV route."

## Route: 260

### Segment: 2551

#### Designation ?

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- RIPARIAN Riparian 1 stream crossing
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I low
- DENSITY Route density highest in Alt A
- DENSITY Route density medium in Alt E

#### Rationale

##### Designation Criteria

- **Minimize Damage:** Fragile soils SSR, NHT – close routes for setting
- **Minimize Harassment:** PPSV- Minimize fragmentation

##### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to improve natural setting along the Old Spanish National Historic Trail.
- Route was designated to reduce fragmentation in Priority Vegetation types

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 260

- No public comments for this Route

## Route: 2600

### Segment: 436

#### Designation ?

##### Current Designation

Wilderness

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- CULTURAL Cultural Class I high
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E

#### Rationale

### Designation Criteria

- No designation criteria for this route segment.

### Rationale for Decision

- Non-system route inside the wilderness.

### Previous Alternatives Analyzed

**Alternative A:** Foot/Horse

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 2600

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 000000135-28

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 2601

### Segment: 3215

#### Designation

##### Current Designation

Open (All modes of travel)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I high
- DENSITY Route density medium in Alt A
- DENSITY Route density medium in Alt E
- VEGETATION Sagebrush patches <60 acres

#### Rationale

##### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open (All modes of travel)

**Alternative C:** Open (All modes of travel)

**Alternative D:** Open (All modes of travel)

## Segment: 570

#### Designation

##### Current Designation

Open (All modes of travel)

##### Mitigation Criteria

- Needs Data - Cultural

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk severe winter range

- CULTURAL Cultural Direct impact
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

## Rationale

### Designation Criteria

- **Recreation:** Rec opportunities – general

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

• Sowbelly Ridge: This is an area which my family and I have hunted for decades. We are meat hunters, not sport hunters, and depend on the elk, deer and bear meat we get to supplement our food supply through the winter. It has become increasingly difficult to get to where the animals are because of roads which have already been closed. I would ask that roads numbered 2571, 2597, 2598, 2601, 3162, 2089, and 2166 remain open. We need roads to help in game retrieval. This area is usually still "t-shirt" weather in October when we hunt, which means very warm temperatures. If an animal is left for too long in that weather, it will spoil if it isn't skinned, gutted and transported as soon as possible to a meat locker. We typically get the meat out of the back country where it was killed and get it to camp to hang overnight and then immediately take it to GJ to a meat locker. We don't "road hunt"; we take our ATVs to the edge our hunting area and then start walking usually all day and for many miles. Even if we are lucky enough to get our game, none of us, even young, strong guys, can carry more than a quarter of an elk at a time very far, as has been suggested. This would mean 4 trips to carry an animal out and it can't be done before the meat spoils. So which law should we break? The law that says you can't use an ATV on an existing road to retrieve game or the law that says you can't waste meat without facing a stiff fine? These roads are currently open and I ask that they remain open for game retrieval using ATVs: 2168, 2122, 2121, 2169 & 2170, 2596, 2171, 2003, 3145, 2182, 2179, 2178, 3143 and 2181.

• Bennett's Basin Because there is so much wild country to the south, Roads 2597, 2541, crossing Bennett's Basin, and 2571 and 2601 should be considered for closure to expand the wilderness. At the very least, motorized use on these routes should be kept low by not maintaining them, rather by keeping them as rough, high clearance, full-sized vehicle 4WD roads, rather than as ATV routes, nor marking them as ATV routes on maps, nor adding ATV amenities, nor advertizing them as ATV routes on widely publicized ATV and 4X4 websites, brochures, gazetteers, etc.

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 2602

### Segment: 874

#### Designation

##### Current Designation

Vehicles under 50" wide

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands

- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I high
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches >60 acres

## Rationale

### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

**Alternative D:** Open (All modes of travel)

## Public Comments On Route: 2602

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 000000135-4

- we appreciate the route closures in the preferred alternative. However, as you will see in our attached 2011 route-specific comments, we are concerned about the routes left open in the draft TMP that we and others had recommended for closure, in particular:
  - o The two ATV trails (Numbers 3162/2089/2166, and 2596/2171/2003) in the Dominguez Addition Unit that need to be closed a) to protect this unit and b) to prevent the likelihood of incursions into the Dominguez wilderness, due to remote, unmanageable and unenforceable terrain.
  - o Palmer Gulch road #2169/2170, needs to be closed.
  - o Road #2181 needs to be closed to OHVs.
  - o 1778/1727 o 1782/1768/2602 in Sawmill Mesa and Wagon Park zones
  - o 1756 should be closed at the junction with 1758, and include closure of roads 1593 and 1585

Organization, commenter: Backcountry Hunters and Anglers, Craig Grother

Comment ID: 000000156-21

- Within the Sawmill Mesa and Wagon Park mixed-use areas, we recommend the following modifications to the preferred alternative to improve big game habitat effectiveness and the quality of traditional big game hunting and non-motorized recreation opportunities within these areas. Close and obliterate spur roads 1782/1768/2602 located on the rim of the Big Dominguez Canyon. This road does not access any wilderness trailheads or serve any other purpose we know of. We also do not understand why road 1756 was left open half way down the ridge instead of just closing the entire length of the route. This road should be closed at the junction with 1758, and include closure of roads 1593 and 1585 as shown in the preferred alternative. We would also like to see road 1778/1727 down Wildhorse Draw closed to motorized vehicles and retained as a non-motorized trail. Closing this route to motorized vehicles would also enhance big game habitat effectiveness and provide a high quality backcountry hunting area.

## Public Comments On Route: 2610

Organization, commenter: Janice Shepherd

Comment ID: 000000106-64

• Page 99 Zone 1 in WildernessIn principle I support the position of limiting foot and horse travel to designated routes within Zone 1. However, I think some side trails need to be considered part of the designated route. - There are several cultural (some historic some prehistoric) that are worth getting a look that require a few steps away from the trail. For example the old coral and nearby structures are quite interesting and some of the rock art panels are on large boulders perpendicular to the trail. - The lower and upper waterfalls are nice places to sit and enjoy the sounds of the rushing water. Both spots are surrounded by exposed rock so make good sitting places. As part of a volunteer BLM work crew we cairned specific trails to the upper waterfall, so BLM is well aware of that trail.- Trail 2610 should be kept open to horse and foot and not closed. It should be extended in the inventory as it exists on the ground as a trail leading into Dry Fork canyon (a side canyon off Big D). The advantage of keeping this trail open is that it pulls some people away from the more heavily used Big D Canyon trail and it allows people to continue to enjoy this nice side canyon which is part of Zone 2. By directing some people away from the rest of Big D it works to protect the some of the cultural resources of Zone 1. I see from map 3-13 that special species exist at the bottom of Dry Fork canyon. Zone 1 could be continued an appropriate distance up this trail to ensure people stay on a designated trail. - I'm not quite sure what the BLM's expectations are for people seeking quick relief behind a bush. Will that be considered staying on the designated trail?- Consider the amazing adventure had by this blogger within Zone 1. Shouldn't other people continue to get to at least some of those nice water views? I think they should. <http://blog.bigskyconvection.com/2011/08/2011-april-6th-big-dominguez-creek.html>For years now everyone (or most everyone) has stayed on the East Side of the Creek in Little Dominguez Canyon for the mile of property occupied by Mr. Rambo. Once this restriction is no longer in place, it appears to me that there may be some opportunities for the creation of new side trails from Little Dominguez main trail, up to the mesa top to perhaps join with route 1493. How can people like me explore the viability of such possible new official trails if travel is limited to just 1457, 1486 and 1501 in the first part of Little Dominguez Canyon? I don't want to approach the BLM to build a trail unless I've hiked the area to satisfy myself that the hike is doable. Zone 1 should either end at the boundary where the current sign reads "Private Property Next 1 Mile..." or text should be added to indicate that "BLM, working with volunteers or partners, will examine the possibility of establishing side trails leading from Little Dominguez to the mesa to the west of Little Dominguez when Mr Rambo is not long maintaining his property lease."

• Page 101 Zone 2 trails and solitude support the objective for Zone 2 of "Wilderness Zone 2: Manage recreation to protect outstanding opportunities for solitude (defined as an average number of contacts per visit of 4 or fewer)." I believe a good way to achieve this objective is by having trails in Zone 2 that lead people away from the main Big Dominguez Canyon Trail. Therefore I don't think the management action on page 102 of "Construct new routes only when accompanied by a comparable number of route closures that improves opportunities for solitude." is the right approach. The majority of hikers stay on trails. Not only is this true because so many hikers have been trained to stay off cryptobiotic soil ("Don't bust the crust") but because most hikers are just more comfortable on a trail. They don't want to get lost, they believe the trail will take them to the interesting locations that they'd otherwise miss if they went cross country and many believe they are required to stay on trails. The majority of visitors to the Wilderness are going to access it from the Bridgeport Trail head. What better way to spread those visitors out then to provide multiple directions for them to go, which means multiple trails. The Dry Fork Canyon trail accessed from 2610 (or equivalent) would be one diversion. I know several people who enjoy hiking that canyon with their friends. A trail up the canyon to the north of the private bridge would be another diversion. That trail could join up to 1219, Triangle Mesa loop trail. I've hiked that canyon and then hiked the Triangle Mesa Loop and it was very interesting to see Big Dominguez Canyon from a fresh perspective. The BLM needs to work with the local landowner to have the "private property no trespassing signs" removed that are to the north of the private bridge (not the ones on the bridge, which is clearly private property), assuming that BLM can prove this is public land (see IMG\_5040). So I think the management action for Zone 2 should be to keep the trail density low but add trails in diverse directions to spread users away from other users and thus achieve the desired solitude. The current Alt E management action for trail construction in zone 2 is too inflexible.

Organization, commenter: Quiet Trails Group, Sherry Schenk

Comment ID: 000000115-50

• Dominguez Canyon Wilderness TMP-Level Comments:Zone 1Route 2610: Quiet Trails Group would like to see 2610 kept open and extended to the edge of the Zone 1 boundary, especially as Zone 1 limits horse and foot traffic to designated routes. This route goes over to a great side canyon (Dry Fork) that is fun to explore and diverts people away from the over-loved main canyon trail.

Organization, commenter: Quiet Trails Group, Sherry Schenk

Comment ID: 000000115-53

• [Dominguez Canyon Wilderness TMP-Level Comments]Zone 2]Routes 1756-5-1593-1585: Quiet Trails Group would also suggest keeping these routes open to horse and foot traffic, with a future possibility of connecting to route 2610. This would make a great trail system for horseback riders and long distance hikers. Route 1756 starts in the Wagon Park area.

Organization, commenter: Quiet Trails Group, Sherry Schenk

Comment ID: 000000115-59

• Wagon Park/Sawmill Mesa (North) TMP-Level Comments:Routes 1756-5-1593-1585: Quiet Trails Group would suggest keeping these routes open to horse and foot traffic, connecting to route 2610. This would make a great trail system for horseback riders and long distance hikers. This comment is predominantly related to Zone 2 of the Wilderness, however, as route 1756 starts in the Wagon Park area we have also included this comment here

## Public Comments On Route: 2612

Organization, commenter: Escalante Ranch, Richard Miller

Comment ID: 000000171-7

• IV. TRANSPORTATION AND TRAVEL MANAGEMENT Mr. Miller's owns various parcels of private property and multiple water diversions in the area in question, and must access these lands via roads and trails which currently cross public land. In addition, Mr. Miller must necessarily access various roads and trails to in the course of managing his livestock operation. The EIS proposes closing various roads and trails to public motorized travel, to minimize resource damage caused by the public on both public and private lands. EIS at 157, 187. Mr. Miller supports the BLM's proposal to restrict public access to protect public and private property, but only so long as he is not restricted from using these roads as may be necessary to access his private lands and manage his livestock operation. Thus, to the extent that the BLM wishes to close roads to motorized public traffic, it should simultaneously grant Mr. Miller legal, administrative access. In addition, Mr. Miller notes that he would be entitled to a formal decision, subject to appeal, prior to the BLM restricting access to his private property and/or otherwise impacting his livestock operation. Mr. Miller notes that the BLM has mis-classified many routes. See EIS Map N -1 e. Specifically, many routes which have historically been used to access private land and water diversions, and/or are necessary to maintain livestock improvements or otherwise manage and operate Mr. Miller's livestock operation, have been incorrectly labeled as closed or otherwise restricted in their use. These routes should be classified as "administrative," to recognize these historic uses and to allow for continued uses consistent therewith. The Routes which have been incorrectly classified and which should be classified as "administrative" are as follows: Routes 460, 1220, 1243, 1245, 2003, 2053, 2073, 2086, 2089, 2121, 2122, 2126, 2156, 2166, 2168, 2171~2172, 2177, 2180, 2336, 2342, 2354, 2408, 2412, 2445, 2581, 2582, 2583, 2585, 2587, 2588, 2590, 2591, 2593, 2595, 2596, 2598, 2599, 2612, 2613, 2622, 2691, 3011, 3048, 3070, 3131, 3141, and 3158. See EIS Map N-1e. In addition, Route 2072 is not completely depicted on the map, in that it extends down the river, across BLM and private property, an additional 2-3 miles, and likewise Route 3048 extends an additional 0.75 miles and leads to private property. Id. Fina Uy, Map N-1e incorrectly labels Mr. Miller's privately owned bridge, which crosses the Gunnison River at the Bridgeport area, as "administrative." Id. Mr. Miller requests that the BLM correct these errors and mis-classifications.

## Public Comments On Route: 2613

Organization, commenter: Escalante Ranch, Richard Miller

Comment ID: 000000171-7

• IV. TRANSPORTATION AND TRAVEL MANAGEMENT Mr. Miller's owns various parcels of private property and multiple water diversions in the area in question, and must access these lands via roads and trails which currently cross public land. In addition, Mr. Miller must necessarily access various roads and trails to in the course of managing his livestock operation. The EIS proposes closing various roads and trails to public motorized travel, to minimize resource damage caused by the public on both public and private lands. EIS at 157, 187. Mr. Miller supports the BLM's proposal to restrict public access to protect public and private property, but only so long as he is not restricted from using these roads as may be necessary to access his private lands and manage his livestock operation. Thus, to the extent that the BLM wishes to close roads to motorized public traffic, it should simultaneously grant Mr. Miller legal, administrative access. In addition, Mr. Miller notes that he would be entitled to a formal decision, subject to appeal, prior to the BLM restricting access to his private property and/or otherwise impacting his livestock operation. Mr. Miller notes that the BLM has mis-classified many routes. See EIS Map N -1 e. Specifically, many routes which have historically been used to access private land and water diversions, and/or are necessary to maintain livestock improvements or otherwise manage and operate Mr. Miller's livestock operation, have been incorrectly labeled as closed or otherwise restricted in their use. These routes should be classified as "administrative," to recognize these historic uses and to allow for continued uses consistent therewith. The Routes which have been incorrectly classified and which should be classified as "administrative" are as follows: Routes 460, 1220, 1243, 1245, 2003, 2053, 2073, 2086, 2089, 2121, 2122, 2126, 2156, 2166, 2168, 2171~2172, 2177, 2180, 2336, 2342, 2354, 2408, 2412, 2445, 2581, 2582, 2583, 2585, 2587, 2588, 2590, 2591, 2593, 2595, 2596, 2598, 2599, 2612, 2613, 2622, 2691, 3011, 3048, 3070, 3131, 3141, and 3158. ## Public Comments On Route: 2619

Organization, commenter: Escalante Ranch, Kent Davis

Comment ID: 00000192-45

- Route numbers 2092, 2619, 2167. These need to go to open as they are access to private.

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 00000135-28

- I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point,

Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

Comment ID: 000000106-212

- 208-195-186-182-243-257-262-253-240-221-198 I support the Quiet Trail Group's position of designating this loop for quiet trail users. The top segments 208-195-186-176 should be Mtn Bike, to connect with the Alt E proposed designation for 182-243. Note that 243 should not be designated Motorcycle as it is in Alt E as it is a short segment connecting two Mtn Bike routes. The rest of the loop should be Horse/foot as shown in Alt E. This approximately 4 mile loop makes a great short enjoyable hike. I've even done it with a group of friends on a July morning. The city high that day was 93. We finished the hike in the morning when the temperatures were still moderate. Afterwards we enjoyed lunch together at a restaurant on Orchard Mesa (local economic benefit). It is important to me to have easy access to such short quiet use loops within the NCA that are close to the city so that my friends and I can get some exercise together while enjoying each other's company even in summer months. On the height of land crossed by 240, there is a wonderful view back down the valley. The track blends in and the valley looks pristine and untouched by humans. It gives me a small sense of what it must have been like to be the first explorer here. I'd love to find other trails like this. Near 176, there is a pretty little dry fall. And the rock in the area is a conglomerate which is such an interesting contrast to vast amounts of sandstone. On foot it is fun to find such interesting anomalies. That is what is so great about hiking on 186-176-182, you have time to see the contrast and recognize the uniqueness of the area. There's time for my friends and me to admire the power of natural forces. We like this hike because of the sense of discovery of small and large details about the geology of the area.

Comment ID: 000000135-28

- I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point,

Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 2621

### Segment: 144

#### Designation [?](#)

##### Current Designation

Admin/Permitted Use Only

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- LANDS Access to non-federal lands
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk severe winter range
- RIPARIAN Riparian crossing perennial stream
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I high
- DENSITY Route density low in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- No designation criteria for this route segment.

##### Rationale for Decision

- Route was designated to ensure access to rights-of-way, private property, and livestock grazing facilities.

## Public Comments On Route: 2622

Organization, commenter: Escalante Ranch, Richard Miller

Comment ID: 000000171-7

• IV. TRANSPORTATION AND TRAVEL MANAGEMENT Mr. Miller's owns various parcels of private property and multiple water diversions in the area in question, and must access these lands via roads and trails which currently cross public land. In addition, Mr. Miller must necessarily access various roads and trails to in the course of managing his livestock operation. The EIS proposes closing various roads and trails to public motorized travel, to minimize resource damage caused by the public on both public and private lands. EIS at 157, 187. Mr. Miller supports the BLM's proposal to restrict public access to protect public and private property, but only so long as he is not restricted from using these roads as may be necessary to access his private lands and manage his livestock operation. Thus, to the extent that the BLM wishes to close roads to motorized public traffic, it should simultaneously grant Mr. Miller legal, administrative access. In addition, Mr. Miller notes that he would be entitled to a formal decision, subject to appeal, prior to the BLM restricting access to his private property and/or otherwise impacting his livestock operation. Mr. Miller notes that the BLM has mis-classified many routes. See EIS Map N -1 e. Specifically, many routes which have historically been used to access private land and water diversions, and/or are necessary to maintain livestock improvements or otherwise manage and operate Mr. Miller's livestock operation, have been incorrectly labeled as closed or otherwise restricted in their use. These routes should be classified as "administrative," to recognize these historic uses and to allow for continued uses consistent therewith. The Routes which have been incorrectly classified and which should be classified as "administrative" are as follows: Routes 460, 1220, 1243, 1245, 2003, 2053, 2073, 2086, 2089, 2121, 2122, 2126, 2156, 2166, 2168, 2171-2172, 2177, 2180, 2336, 2342, 2354, 2408, 2412, 2445, 2581, 2582, 2583, 2585, 2587, 2588, 2590, 2591, 2593, 2595, 2596, 2598, 2599, 2612, 2613, 2622, 2691, 3011, 3048, 3070, 3131, 3141, and 3158. See EIS Map N-1e. In addition, Route 2072 is not completely depicted on the map, in that it extends down the river, across BLM and private property, an additional 2-3 miles, and likewise Route 3048 extends an additional 0.75 miles and leads to private property. Id. FinaUy, Map N-1e incorrectly labels Mr. Miller's privately owned bridge, which crosses the Gunnison River at the Bridgeport area, as "administrative." I d. Mr. Miller requests that the BLM correct these errors and mis-classifications.

Organization, commenter: Escalante Ranch, Kent Davis

Comment ID: 000000192-48

- Route numbers 2590, 2622, 2588. These need to be changed to admin routes and not closed as the lead to ponds and also emergency cattle rescue.

## Route: 2624

### Segment: 1460

### Designation

#### Current Designation

Closed (Rehab)

#### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Indirect impact
- DENSITY Route density highest in Alt A
- DENSITY Route density low in Alt E

### Rationale

#### Designation Criteria

- **Minimize Damage:** Fragile soils SSR
- **Minimize Harassment:** PPSV- Minimize fragmentation, Bighorn – SSR -- summer range, GUSG –PSD in winter habitat

#### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to reduce the miles of motorized and mechanized routes in bighorn sheep habitat.
- Route was designated to minimize fragmentation of Gunnison sage-grouse habitat.

## Public Comments On Route: 2628

Organization, commenter: Janice Shepherd

Comment ID: 000000106-222

- Route 2628 should be closed. I can see leaving the routes that lead to and include 1388 open as Admin/Permittee, as 1388 leads to a stock pond (which had water in it on Aug 4th 2013 IMG\_9799). But the eastern end of 2628 is on top of a narrow berm that has only had cows walking across it. The western end leads to nothing of worth from an Admin/Permittee perspective. 2628 should be closed.

## Public Comments On Route: 263

Organization, commenter: Janice Shepherd

Comment ID: 000000106-199

- Page 905 Order of Trail workI don't support the position that work on SRMAs and the Wilderness should take priority over work in the ERMAs. I think the order of the work should be rotated equitably across the D-E NCA with adjustments for weather conditions and timing closures. I would suggest the following additions to list of 3 priority items - Routes that are slated to be closed because they lead to problematic "party-hard" areas with large trash and or graffiti. The road into the Rock Garden bouldering area off Hwy 141, for example needs closing as clean-up efforts are repeatedly undermined by the next round of partying. Routes 263, 271, 277, 286 (and their spurs) lead to another repeatedly trashed area that would benefit greatly from early closing. See photo IMG\_9696.- Routes that are currently leading to damage or threats to significant paleontological or geological resources.

Organization, commenter: Janice Shepherd

Comment ID: 000000106-213

- 263-271-264-278-279-281-286 I support the closing of these routes. There is a terrible "party" location near 271 that has been left as a mess on too many occasions. Closing these off and rehabbing the area will be a benefit to all who enjoy nice landscapes.

## Route: 2634

### Segment: 1382

#### Designation [?](#)

##### Current Designation

Vehicles under 50" wide

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density highest in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Vehicles under 50" wide

**Alternative C:** Foot/Horse

**Alternative D:** Vehicles under 50" wide

## Public Comments On Route: 2634

- No public comments for this Route

## Route: 2635

### Segment: 1381

#### Designation [?](#)

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Minimize Harassment:** PPSV- Minimize fragmentation, GUSG –PSD in winter habitat, Big game winter range – close

##### Rationale for Decision

- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to minimize fragmentation of Gunnison sage-grouse habitat.
- Route was designated to protect big game winter range

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 2635

## Route: 2636

### Segment: 2514

#### Designation [?](#)

##### Current Designation

Admin/Permitted Use Only

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- SOIL Soils Steep Slopes 40%
- WILDLIFE Mule deer severe winter range
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches <60 acres

#### Rationale

##### Designation Criteria

- **Minimize Harassment:** PPSV- Minimize fragmentation, Bighorn – SSR -- summer range, Big game winter range – close

##### Rationale for Decision

- Route was designated to ensure access to rights-of-way, private property, and livestock grazing facilities.

#### Previous Alternatives Analyzed

- Alternative A:** Open (All modes of travel)
- Alternative B:** Admin/Permitted Use Only
- Alternative C:** Admin/Permitted Use Only
- Alternative D:** Admin/Permitted Use Only

## Public Comments On Route: 2636

#### Designation [?](#)

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation access to dispersed campsite
- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E
- VEGETATION Sagebrush patches <60 acres

#### Rationale

##### Designation Criteria

- Minimize Damage:** Fragile soils SSR
- Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, Sage-Minimize fragmentation

##### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range
- Route was designated to reduce fragmentation of sagebrush patches

## Public Comments On Route: 264

Organization, commenter: Janice Shepherd

Comment ID: 00000106-213

- 263-271-264-278-279-281-286 I support the closing of these routes. There is a terrible "party" location near 271 that has been left as a mess on too many occasions. Closing these off and rehabbing the area will be a benefit to all who enjoy nice landscapes.

## Route: 2640

**Alternative D:** Open (All modes of travel)

## Public Comments On Route: 2646

- No public comments for this Route

## Route: 2647

### Segment: 1199

#### Designation ?

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Indirect impact
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Minimize Harassment:** Big game winter range – close, GUSG –PSD in winter habitat, PPSV- Minimize fragmentation

##### Rationale for Decision

- Route was designated to protect big game winter range
- Route was designated to minimize fragmentation of Gunnison sage-grouse habitat.
- Route was designated to reduce fragmentation in Priority Vegetation types

#### Previous Alternatives Analyzed

## Route: 2648

### Segment: 1196

#### Designation ?

##### Current Designation

Open (All modes of travel)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Indirect impact
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities - specific

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 2648

- No public comments for this Route

## Route: 2649

### Segment: 1235

## Designation

### Current Designation

Closed (Rehab)

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

## Rationale

### Designation Criteria

- **Minimize Damage:** Fragile soils SSR
- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, Sage-Minimize fragmentation, GUSG –PSD in winter habitat

### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range
- Route was designated to reduce fragmentation of sagebrush patches
- Route was designated to minimize fragmentation of Gunnison sage-grouse habitat.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

- No public comments for this Route

## Route: 265

### Segment: 2479

## Designation

### Current Designation

Open (All modes of travel)

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- CULTURAL Cultural Class I low
- DENSITY Route density highest in Alt A
- DENSITY Route density medium in Alt E

## Rationale

### Designation Criteria

- No designation criteria for this route segment.

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

## Public Comments On Route: 2651

Organization, commenter: Janice Shepherd

Comment ID: 000000106-219

- Route 2651 not only goes past the stock pond but it has a section that is parallel to 1502. This route should lead only to the stock pond and not past it and it should not have a section parallel to 1502. One or the other should be closed for that parallel portion.

#### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

#### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

## Rationale

#### Designation Criteria

- **Minimize Damage:** Fragile soils SSR
- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, GUSG –PSD in winter habitat

#### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range
- Route was designated to minimize fragmentation of Gunnison sage-grouse habitat.

## Public Comments On Route: 2663

Organization, commenter: Janice Shepherd

Comment ID: 00000106-220

- Route 2663 leads to a stock pond, but then the bulk of it parallels 15 and should be closed. Given that not all stock ponds in the NCA have roads leading to them, is it really necessary to keep these other stock pond roads open? For example the pond at 12 S 712030 4295897 has no documented road leading to it. Is that stock pond no longer needed?

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 00000135-35

Gibbler Gulch/Gibbler MountainThe following are route recommendations for Gibbler Gulch and Gibbler Mountain which together make a nice amount of relatively undisturbed open space and habitat. This area is less roaded and fragmented than other parts of Cactus Park NCA unit. It may be less impacted by grazing than other areas and harbors critical big game habitat. Hoping to send you maps next week showing these areas. In particular I recommend keeping recreational use out of all the creek drainages in the upper Gibbler Gulch area, and closing roads on the adjacent mesas. Putting a motorized or mountain bike route over Gibbler Mountain would irreversibly change the natural quality, silence and solitude of this remote landscape. Lands that are currently undeveloped should stay that way as so much land in the NCA is criss-crossed with routes and trails.For example there is potential for retaining the remote "open space" setting of Gibbler Mountain, as specified in the 2007 Colorado BLM Recreation and Visitor Strategy, by closing 1227(!) (especially), 1269, 1309, 2674, 2673, 1249, 1171, 981, 980, 1150, 1154, 977, 979, 1312, 1310, 1334, 1330, 1344, 1286, 1242, 1213, 1238, 1242, 1204, 1213, 1239, 1214, 1212, 1200, 1263, 1204, 1198, 1187, 1210. Limit motorized traffic to roads 15 and 8.Similarly, there is potential for a large unmotorized area extending west from road 15 and Gibbler Gulch on the east, to road 8 on the west. To create an undisturbed nonmotorized area I recommend closing routes 1526, 2666, 1571, 2665, 1608, 1570, 1605, 1561, 1516, 1606, 1561, 1609 1633, 2664, 2663, 1412, 1424, 1456 1434, 1513 , 1249, 1269.Many of these are duplicative, serve no purpose, or are dead ends, simply pioneered randomly, and should be closed.

Putting a motorized or mountain bike route over Gibbler Mountain would irreversibly change the natural quality, silence and solitude of this remote landscape. Lands that are currently undeveloped should stay that way as so much land in the NCA is criss-crossed with routes and trails.For example there is potential for retaining the remote "open space" setting of Gibbler Mountain, as specified in the 2007 Colorado BLM Recreation and Visitor Strategy, by closing 1227(!)

(especially), 1269, 1309, 2674, 2673, 1249, 1171, 981, 980, 1150, 1154, 977, 979, 1312, 1310, 1334, 1330, 1344, 1286, 1242, 1213, 1238, 1242, 1204, 1213, 1239, 1214, 1212, 1200, 1263, 1204, 1198, 1187, 1210. Limit motorized traffic to roads 15 and 8. Similarly, there is potential for a large unmotorized area extending west from road 15 and Gibbler Gulch on the east, to road 8 on the west. To create an undisturbed nonmotorized area I recommend closing routes 1526, 2666, 1571, 2665, 1608, 1570, 1605, 1561, 1516, 1606, 1561, 1609 1633, 2664, 2663, 1412, 1424, 1456 1434, 1513 , 1249, 1269. Many of these are duplicative, serve no purpose, or are dead ends, simply pioneered randomly, and should be closed.

## Route: 2674

### Segment: 1553

#### Designation [?](#)

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- SOIL Soils Fragile
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

#### Rationale

##### Designation Criteria

- Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close

##### Rationale for Decision

- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range

## Public Comments On Route: 2674

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 00000135-35

- Gibbler Gulch/Gibbler Mountain The following are route recommendations for Gibbler Gulch and Gibbler Mountain which together make a nice amount of relatively undisturbed open space and habitat. This area is less roaded and fragmented than other parts of Cactus Park NCA unit. It may be less impacted by grazing than other areas and harbors critical big game habitat. Hoping to send you maps next week showing these areas. In particular I recommend keeping recreational use out of all the creek drainages in the upper Gibbler Gulch area, and closing roads on the adjacent mesas. Putting a motorized or mountain bike route over Gibbler Mountain would irreversibly change the natural quality, silence and solitude of this remote landscape. Lands that are currently undeveloped should stay that way as so much land in the NCA is criss-crossed with routes and trails. For example there is potential for retaining the remote "open space" setting of Gibbler Mountain, as specified in the 2007 Colorado BLM Recreation and Visitor Strategy, by closing 1227(!) (especially), 1269, 1309, 2674, 2673, 1249, 1171, 981, 980, 1150, 1154, 977, 979, 1312, 1310, 1334, 1330, 1344, 1286, 1242, 1213, 1238, 1242, 1204, 1213, 1239, 1214, 1212, 1200, 1263, 1204, 1198, 1187, 1210. Limit motorized traffic to roads 15 and 8. Similarly, there is potential for a large unmotorized area extending west from road 15 and Gibbler Gulch on the east, to road 8 on the west. To create an undisturbed nonmotorized area I recommend closing routes 1526, 2666, 1571, 2665, 1608, 1570, 1605, 1561, 1516, 1606, 1561, 1609 1633, 2664, 2663, 1412, 1424, 1456 1434, 1513 , 1249, 1269. ## Route: 2679

### Segment: 2227

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range

- CULTURAL Cultural Class I moderate
- DENSITY Route density highest in Alt A
- DENSITY Route density medium in Alt E
- VEGETATION Sagebrush patches >60 acres

## Rationale

### Designation Criteria

- Minimize Damage:** Fragile soils SSR
- Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, GUSG –PSD in winter habitat

### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range
- Route was designated to minimize fragmentation of Gunnison sage-grouse habitat.

## Route: 2683

### Segment: 1009

### Designation

#### Current Designation

Closed (Rehab)

#### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

#### Planning Criteria

- RECREATION Recreation access to dispersed campsite
- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I high
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

## Rationale

### Designation Criteria

- **Minimize Damage:** Fragile soils SSR
- **Minimize Harassment:** PPSV- Minimize fragmentation, GUSG –PSD in winter habitat, Big game winter range – close

### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to minimize fragmentation of Gunnison sage-grouse habitat.
- Route was designated to protect big game winter range

### Previous Alternatives Analyzed

## Public Comments On Route: 2691

Organization, commenter: Escalante Ranch, Richard Miller

Comment ID: 000000171-7

• IV. TRANSPORTATION AND TRAVEL MANAGEMENT Mr. Miller's owns various parcels of private property and multiple water diversions in the area in question, and must access these lands via roads and trails which currently cross public land. In addition, Mr. Miller must necessarily access various roads and trails to in the course of managing his livestock operation. The EIS proposes closing various roads and trails to public motorized travel, to minimize resource damage caused by the public on both public and private lands. EIS at 157, 187. Mr. Miller supports the BLM's proposal to restrict public access to protect public and private property, but only so long as he is not restricted from using these roads as may be necessary to access his private lands and manage his livestock operation. Thus, to the extent that the BLM wishes to close roads to motorized public traffic, it should simultaneously grant Mr. Miller legal, administrative access. In addition, Mr. Miller notes that he would be entitled to a formal decision, subject to appeal, prior to the BLM restricting access to his private property and/or otherwise impacting his livestock operation. Mr. Miller notes that the BLM has mis-classified many routes. See EIS Map N -1 e. Specifically, many routes which have historically been used to access private land and water diversions, and/or are necessary to maintain livestock improvements or otherwise manage and operate Mr. Miller's livestock operation, have been incorrectly labeled as closed or otherwise restricted in their use. These routes should be classified as "administrative," to recognize these historic uses and to allow for continued uses consistent therewith. The Routes which have been incorrectly classified and which should be classified as "administrative" are as follows: Routes 460, 1220, 1243, 1245, 2003, 2053, 2073, 2086, 2089, 2121, 2122, 2126, 2156, 2166, 2168, 2171~2172, 2177, 2180, 2336, 2342, 2354, 2408, 2412, 2445, 2581, 2582, 2583, 2585, 2587, 2588, 2590, 2591, 2593, 2595, 2596, 2598, 2599, 2612, 2613, 2622, 2691, 3011, 3048, 3070, 3131, 3141, and 3158. See EIS Map N-1e. In addition, Route 2072 is not completely depicted on the map, in that it extends down the river, across BLM and private property, an additional 2-3 miles, and likewise Route 3048 extends an additional 0.75 miles and leads to private property. In addition, Map N-1e incorrectly labels Mr. Miller's privately owned bridge, which crosses the Gunnison River at the Bridgeport area, as "administrative." I d. Mr. Miller requests that the BLM correct these errors and mis-classifications.

Organization, commenter: Escalante Ranch, Kent Davis

## Public Comments On Route: 2698

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 000000135-28

- I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 2701

### Segment: 716

### Designation

#### Current Designation

Closed (Rehab)

#### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

#### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- SOIL Soils Fragile
- WILDLIFE Mule deer severe winter range
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I moderate
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- SSPLANT Special Status Species Colorado hookless cactus

### Rationale

#### Designation Criteria

- **Minimize Damage:** Cactus – reduce density within 200m, Fragile soils SSR
- **Minimize Harassment:** Bighorn – SSR -- summer range

#### Rationale for Decision

- Route was designated to reduce the density of routes within 200 meters of known Colorado hookless Cactus occurrences.
- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to reduce the miles of motorized and mechanized routes in bighorn sheep habitat.

## Public Comments On Route: 2701

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 000000135-28

- I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Public Comments On Route: 271

Organization, commenter: Janice Shepherd

Comment ID: 00000106-199

- Page 905 Order of Trail work I don't support the position that work on SRMAs and the Wilderness should take priority over work in the ERMAs. I think the order of the work should be rotated equitably across the D-E NCA with adjustments for weather conditions and timing closures. I would suggest the following additions to list of 3 priority items - Routes that are slated to be closed because they lead to problematic "party-hard" areas with large trash and or graffiti. The road into the Rock Garden bouldering area off Hwy 141, for example needs closing as clean-up efforts are repeatedly undermined by the next round of partying. Routes 263, 271, 277, 286 (and their spurs) lead to another repeatedly trashed area that would benefit greatly from early closing. See photo IMG\_9696.- Routes that are currently leading to damage or threats to significant paleontological or geological resources.

Organization, commenter: Janice Shepherd

Comment ID: 00000106-213

- 263-271-264-278-279-281-286 I support the closing of these routes. There is a terrible "party" location near 271 that has been left as a mess on too many occasions. Closing these off and rehabbing the area will be a benefit to all who enjoy nice landscapes.

Comment ID: 000000115-71

- Routes 239, 272, 280: These routes should be designated as ATV unless there is a resource issue with leaving these open. We anticipate that quiet trail users will use these routes to access 297, 311, etc from the parking at the end of Bean Ranch Road as it is more direct than going the longer way around via 293, 292, 288, 302, etc

- Routes 239, 272, 280: These routes should be designated as ATV unless there is a resource issue with leaving these open. We anticipate that quiet trail users will use these routes to access 297, 311, etc from the parking at the end of Bean Ranch Road as it is more direct than going the longer way around via 293, 292, 288, 302, etc

## Route: 289

### Segment: 2458

#### Designation [?](#)

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- CULTURAL Cultural Class I low
- DENSITY Route density highest in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Minimize Damage:** Cactus – reduce density within 200m, Fragile soils SSR
- **Minimize Harassment:** PPSV- Minimize fragmentation

##### Rationale for Decision

- Route was designated to reduce the density of routes within 200 meters of known Colorado hookless Cactus occurrences.
- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to reduce fragmentation in Priority Vegetation types

## Route: 295

### Segment: 2435

#### Designation ?

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

#### Rationale

##### Designation Criteria

- **Minimize Damage:** NHT – close routes for setting, Fragile soils SSR
- **Minimize Harassment:** PPSV- Minimize fragmentation

##### Rationale for Decision

- Route was designated to improve natural setting along the Old Spanish National Historic Trail.
- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to reduce fragmentation in Priority Vegetation types

## Public Comments On Route: 297

Organization, commenter: Quiet Trails Group, Sherry Schenk

Comment ID: 000000115-71

- Routes 239, 272, 280: These routes should be designated as ATV unless there is a resource issue with leaving these open. We anticipate that quiet trail users will use these routes to access 297, 311, etc from the parking at the end of Bean Ranch Road as it is more direct than going the longer way around via 293, 292, 288, 302, etc

## Route: 298

### Segment: 2455

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- RIPARIAN Riparian 1 stream crossing
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Direct impact

- DENSITY Route density medium in Alt A
- DENSITY Route density medium in Alt E

## Rationale

### Designation Criteria

- **Minimize Damage:** Cultural – SSR within 100m sites, NHT – close routes for setting
- **Minimize Harassment:** PPSV- Minimize fragmentation

### Rationale for Decision

- Route was designated to minimize impacts to cultural resources.
- Route was designated to improve natural setting along the Old Spanish National Historic Trail.
- Route was designated to reduce fragmentation in Priority Vegetation types

## Route: 299

### Segment: 2432

## Designation

### Current Designation

Closed (Rehab)

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

## Rationale

### Designation Criteria

- **Minimize Damage:** NHT – close routes for setting, Fragile soils SSR
- **Minimize Harassment:** PPSV- Minimize fragmentation

### Rationale for Decision

- Route was designated to improve natural setting along the Old Spanish National Historic Trail.
- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to reduce fragmentation in Priority Vegetation types

## Public Comments On Route: 3001

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 000000135-28

- I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Public Comments On Route: 3002

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 000000135-25

• Sawmill Mesa Moving south to the CDOW parcel, the BLM should work with the BLM to close numerous user-created routes in the Sawmill Mesa, Grade Gulch and Mud Springs area. The CDOW road leading north east to Cactus Park has numerous random, unplanned spurs and duplicative routes branching off, which need to be closed. Only the main, historically-used arteries should remain open to preserve these remote vistas and natural soundscapes. Routes to be closed and obliterated are: 2273=2139-2696; 2141, 3138, 3135, along with other spurs off the Peach Orchard Point Road 2270, including 3126, 2271, 2272. 2270 all of which should be closed to maintain silent open space quality of this point. Other routes needing closure off the CDOW road are: 2261, 2259, 3002, 3090, 2260, 2051, 2258, 2259, 3154, 2233, 2263, 2254, 3031, 3109, 2134, 2255, 2257, 2250,

- I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 3005

### Segment: 3047

#### Designation [?](#)

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- Needs Data - Paleo

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- SOIL Soils Steep Slopes 40%
- SOIL Soils Fragile
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk severe winter range
- WILDLIFE Big game winter concentration areas
- WILDLIFE Big game summer concentration areas
- CULTURAL Cultural Direct impact
- GEOPALEO Paleontological direct impact
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E

- SSPLANT Special Status Species Colorado hookless cactus

## Rationale

### Designation Criteria

- **Minimize Damage:** Cultural – SSR within 100m sites, Geo/paleo – SSR in key sites, Cactus – reduce density within 200m
- **Minimize Harassment:** PPSV- Minimize fragmentation

### Rationale for Decision

- Route was designated to minimize impacts to cultural resources.
- Route was designated to protect geologic and paleontologic resources.
- Route was designated to reduce the density of routes within 200 meters of known Colorado hookless Cactus occurrences.
- Route was designated to reduce fragmentation in Priority Vegetation types

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Admin/Permitted Use Only

**Alternative C:** Admin/Permitted Use Only

## Public Comments On Route: 3005

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 000000135-26

• Cottonwood Creek This creek is a rare example of an almost completely unroaded, untrailed stream corridor for most of its length until it reaches Roubideau Creek and the Gunnison River. Unplanned, damaging routes along Cottonwood Creek upstream near the Forest Service boundary should all be closed to create an undisturbed full stretch of riparian corridor. Randomly created routes needing closure are: 2152, 2149, 2147, 2148, 2439, 2153, 2154, 2156. Closing these routes would restore a relatively intact watershed. Routes needing closure at the northern end of Cottonwood Creek, for the same reason, are: 3087, 3088, 3082, 3083, 3080, 3015, 2370, 2089, 2100, 3079, 3047, 2396, 2013, 3128, 3169, 2014, 2162, 2160, 2493, 3005. Some of these routes spur off 25 Mesa Road and do not actually enter the Cottonwood Creek drainage, but most if not all are not purposely created, not planned, are randomly scarring the landscape, and are introducing difficult to enforce ORV use. Only a few, if any should be left open, that have an overriding need and purpose. All the user-created routes descending into Cottonwood Creek should be closed, including 2100, 2370, 2099, and the whole tangle of routes 3169, etc etc

## Public Comments On Route: 3006

Organization, commenter: Brandon Siegfried

Comment ID: 000000068-3

• The following high value recreational routes/roads are legal ROW's in the State of Colorado, Mesa County and the BLM does not have the jurisdiction to close them: 500, 472, 518, 521, 530, 39, 127, 572, 566, 66, 65, 148, 71, 74, 587, 595, 608, 622, 628, 635, 624, 609, 611, 706, 678, 700, 719, 726, 696, 26, 936, 847, 849, 919, 767, 824, 96, 822, 817, 950, 1021, 900, 2682, 1020, 1003, 1084, 1142, 1184, 1156, 1198, 1349, 1308, 1310, 1238, 1263, 1122, 1170, 1192, 974, 941, 1076, 1039, 1018, 1759, 1764, 1758, 1174, 1788, 1798, 1669, 1699, 1773, 1755, 1779, 1750, 1751, 1792, 1720, 1726, 1727, 1720, 1722, 1803, 1805, 1809, 1614, 1609, 1605, 1608, 1571, 1526, 1516, 1448, 755, 807, 900, 10, 48, 924, 950, 1005, 965, 8, 1115, 981, 984, 1135, 2678, 1249, 1171, 1150, 1249, 1320, 1235, 1236, 1228, 1227, 1409, 1456, 1349, 1308, 1513, 1221, 1550, 1567, 1641, 1612, 1740, 1688, 2597, 2598, 2601, 2440, 3160, 3162, 2089, 2166, 2170, 2596, 2171, 2003, 2122, 2126, 2189, 3145, 2182, 2179, 2178, 3143, 2181, 2121, 2122, 2168, 2126, 2180, 2095, 2173, 2174, 2620, 2129, 1686, 1692, 1667, 1647, 1631, 1613, 1596, 1549, 1541, 2647, 1633, 1605, 1608, 1571, 2645, 1507, 1448, 1496, 1516, 1504, 1510, 1508, 1509, 439, 431, 456, 461, 460, 391, 423, 415, 419, 407, 402, 367, 372, 339, 298, 338, 105, 368, 374, 393, 389, 390, 376, 377, 351, 350, 121, 345, 320, 301, 251, 234, 232, 205, 344, 107, 103, 152, 153, 161, 168, 3199, 188, 196, 255, 254, 236, 294, 242, 219, 201, 169, 162, 158, 160, 173. The following high value recreational routes/roads are legal ROW's in the State of Colorado, Delta County, and the BLM does not have the jurisdiction to close them: 3011, 2184, 2191, 3100, 2187, 2026, 2059, 2188, 2192, 3104, 2130, 3009, 2199, 2200, 2111, 2223, 2024, 3006, 2231, 3094, 2579, 2210, 2344, 2243, 2249, 2248, 3074, 2354, 2384, 2296, 2295, 2287, 2304, 2062, 2163, 3163, 2164, 2430, 4006, 3016, 2351, 3140, 2410, 4008, 2324, 2073, 2306, 2459, 3192, 3193, 2350, 2443, 2035, 2336, 2495, 2491, 2159, 3058, 2277, 2465, 2467, 3189, 2472, 2297, 2006, 2265, 2271, 2276, 2135, 2139, 3053, 2489, 3033, 3057, 2031, 2276, 2210, 2579, 2136, 2344, 3164, 2400, 2379, 3014, 2365, 3116, 2251, 2259, 2149, 2153, 2146, 2144, 2145, 2356, 2257, 2048, 2358, 3165, and 3166.

Organization, commenter: Quiet Trails Group, Sherry Schenk

Comment ID: 000000115-67

• [Wagon Park/Sawmill Mesa (South) TMP-Level Comments: Quiet Trails Group supports the management decisions shown in Alternative E for the southern Sawmill Mesa area with the following specific suggestions:] Route 2024: We support closing 2024 as it appears to be a duplicative route. The surrounding routes 2578-3006-2232-2231 and 2579-3108-2210-2344 connect to Forest Service trails. If there are cattle or other uses for this road not shown on the map, we would support an administrative designation. Otherwise we would like to see 2024 closed to reduce route density in the area because of the presence of big game. We also see that these routes stop at the Dry Fork LWC unit; we would urge the BLM to make sure there is a topographical or physical barrier to stop motorized access into the LWC. Please put signage back at the Forest Boundary that the routes dead-end ahead.

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 000000135-24

• Black Point Draw/Black Point Three routes between Dry Mesa and the CDOW road leading north east to Cactus Park are redundant and unnecessarily fragmenting. 2579-2210-2344 is recently pioneered and should be closed immediately, along with its spurs 2136, 2209, 2208 and 3094. These encroach on a relatively wild Escalante Creek canyon and have had no traditional or long-term use or purpose. 2024 and 3006 are parallel and duplicative, provide the same experience as each other, and should be reduced to one route. The BLM should decide which route is the least damaging, and disturbing to wildlife, and easiest to enforce, and close the other one

Organization, commenter: CMDA, Brandon Siegfried

Comment ID: 00000135-28

I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 3008

### Segment: 373

#### Designation

##### Current Designation

Open, seek re-route or mitigation

##### Mitigation Criteria

- Reroute
- Move road to prevent conflict with private property.

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- SOIL Soils Fragile
- WILDLIFE Mule deer severe winter range
- RIPARIAN Riparian crossing perennial stream
- CULTURAL Cultural Class I high
- SMA Escalante Canyon ACEC
- SMA Wild and Scenic River area
- DENSITY Route density low in Alt A
- DENSITY Route density low in Alt E
- SSPLANT Special Status Species Colorado hookless cactus

#### Rationale

##### Designation Criteria

- Recreation:** RMA objectives, Rec opportunities - specific

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Admin/Permitted Use Only

**Alternative C:** Admin/Permitted Use Only

**Alternative D:** Admin/Permitted Use Only

The following high value recreational routes/roads are legal RS 2477 ROW's in the State of Colorado, Delta County, and the BLM does not have the jurisdiction to close them: 3011, 2184, 2191, 3100, 2187, 2026, 2059, 2188, 2192, 3104, 2130, 3009, 2199, 2200, 2111, 2223, 2024, 3006, 2231, 3094, 2579, 2210, 2344, 2243, 2249, 2248, 3074, 2354, 2384, 2296, 2295, 2287, 2304, 2062, 2163, 3163, 2164, 2430, 4006, 3016, 2351, 3140, 2410, 4008, 2324, 2073, 2306, 2459, 3192, 3193, 2350, 2443, 2035, 2336, 2495, 2491, 2159, 3058, 2277, 2465, 2467, 3189, 2472, 2297, 2006, 2265, 2271, 2276, 2135, 2139, 3053, 2489, 3033, 3057, 2031, 2276, 2210, 2579, 2136, 2344, 3164, 2400, 2379, 3014, 2365, 3116, 2251, 2259, 2149, 2153, 2146, 2144, 2145, 2356, 2257, 2048, 2358, 3165, and 3166.

## Route: 3011

### Segment: 448

#### Designation

##### Current Designation

Closed (Not Rehabbed)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- SOIL Soils Fragile
- WILDLIFE Mule deer severe winter range
- RIPARIAN Riparian 1 stream crossing
- RIPARIAN Riparian crossing perinial stream
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I high

- SMAs Escalante Canyon ACEC
- SMAs Wild and Scenic River area
- DENSITY Route density low in Alt A
- DENSITY Route density low in Alt E
- SSPLANT Special Status Species Colorado hookless cactus

## Rationale

### Designation Criteria

- **Minimize Damage:** Cactus – reduce density within 200m, SS Veg Communities – SSR
- **Minimize Harassment:** PPSV- Minimize fragmentation
- **Wilderness / Natural Area:** ACEC- Escalante-SSR

### Rationale for Decision

- Route was designated to reduce the density of routes within 200 meters of known Colorado hookless Cactus occurrences.
- Route was designated to protect and enhance special status fish, wildlife, and plant populations.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect sensitive plant, fish, and wildlife resources in the Escalante Canyon ACEC

## Previous Alternatives Analyzed

**Alternative A:** Closed (Not Rehabbed)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

• Escalante Canyon: Roads numbered 3070, 3071 should remain open and 3011 should be reopened and all others should remain open for campsites. Road number 3158 is not even listed on Alt. E, but should remain open. I would also state that closing all the small campsites along the canyon road from the river and for the next 16 miles (not including private land) is not necessary or a good idea. I absolutely do not support any plan to make a paid camp ground in that area. Part of the beauty of going there is the various sites available for those of us wishing to escape next door neighbors

Organization, commenter: Escalante Ranch, Richard Miller

Comment ID: 000000171-7

• IV. TRANSPORTATION AND TRAVEL MANAGEMENT Mr. Miller's owns various parcels of private property and multiple water diversions in the area in question, and must access these lands via roads and trails which currently cross public land. In addition, Mr. Miller must necessarily access various roads and trails to in the course of managing his livestock operation. The EIS proposes closing various roads and trails to public motorized travel, to minimize resource damage caused by the public on both public and private lands. EIS at 157, 187. Mr. Miller supports the BLM's proposal to restrict public access to private property, but only so long as he is not restricted from using these roads as may be necessary to access his private lands and manage his livestock operation. Thus, to the extent that the BLM wishes to close roads to motorized public traffic, it should simultaneously grant Mr. Miller legal, administrative access. In addition, Mr. Miller notes that he would be entitled to a formal decision, subject to appeal, prior to the BLM restricting access to his private property and/or otherwise impacting his livestock operation. Mr. Miller notes that the BLM has mis-classified many routes. See EIS Map N -1 e. Specifically, many routes which have historically been used to access private land and water diversions, and/or are necessary to maintain livestock improvements or otherwise manage and operate Mr. Miller's livestock operation, have been incorrectly labeled as closed or otherwise restricted in their use. These routes should be classified as "administrative," to recognize these historic uses and to allow for continued uses consistent therewith. The Routes which have been incorrectly classified and which should be classified as "administrative" are as follows: Routes 460, 1220, 1243, 1245, 2003, 2053, 2073, 2086, 2089, 2121, 2122, 2126, 2156, 2166, 2168, 2171 - 2172, 2177, 2180, 2336, 2342, 2354, 2408, 2412, 2445, 2581, 2582, 2583, 2585, 2587, 2588, 2590, 2591, 2593, 2595, 2596, 2598, 2599, 2612, 2613, 2622, 2691, 3011, 3048, 3070, 3131, 3141, and 3158. See EIS Map N-1e. In addition, Route 2072 is not completely depicted on the map, in that it extends down the river, across BLM and private property, an additional 2-3 miles, and likewise Route 3048 extends an additional 0.75 miles and leads to private property. I'd. FinaUy, Map N-1e incorrectly labels Mr. Miller's privately owned bridge, which crosses the Gunnison River at the Bridgeport area, as "administrative." I'd. Mr. Miller requests that the BLM correct these errors and mis-classifications.

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and

needs to be returned to its previous condition by comprehensive route closures.All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 3013

### Segment: 240

#### Designation [?](#)

##### Current Designation

Open (All modes of travel)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- SOIL Soils Steep Slopes 40%
- SOIL Soils Fragile
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **No designation criteria for this route segment.**

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open (All modes of travel)

**Alternative C:** Closed (Rehab)

**Alternative D:** Open (All modes of travel)

### Segment: 3041

#### Designation [?](#)

##### Current Designation

Vehicles under 50" wide

##### Mitigation Criteria

- Reroute
- move to the edge of Sagebrush park

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- SOIL Soils Steep Slopes 40%
- SOIL Soils Fragile
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk severe winter range
- WILDLIFE Big game summer concentration areas
- RIPARIAN Riparian 1 stream crossing
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches <60 acres

## Rationale

### Designation Criteria

- **Recreation:** RMA objectives
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 3015

### Segment: 213

#### Designation ?

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- SOIL Soils Fragile
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk severe winter range
- CULTURAL Cultural none
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Minimize Harassment:** PPSV- Minimize fragmentation, Bighorn – SSR -- summer range

##### Rationale for Decision

- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to reduce the miles of motorized and mechanized routes in bighorn sheep habitat.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 3015

Comment ID: 00000135-26

• Cottonwood Creek This creek is a rare example of an almost completely unroaded, untrailed stream corridor for most of its length until it reaches Roubideau Creek and the Gunnison River. Unplanned, damaging routes along Cottonwood Creek upstream near the Forest Service boundary should all be closed to create an undisturbed full stretch of riparian corridor. Randomly created routes needing closure are: 2152, 2149, 2147, 2148, 2439, 2153, 2154, 2156. Closing these routes would restore a relatively intact watershed. Routes needing closure at the northern end of Cottonwood Creek, for the same reason, are: 3087, 3088, 3082, 3083, 3080, 3015, 2370, 2089, 2100, 3079, 3047, 2396, 2013, 3128, 3169, 2014, 2162, 2160, 2493, 3005. Some of these routes spur off 25 Mesa Road and do not actually enter the Cottonwood Creek drainage, but most if not all are not purposely created, are randomly scarring the landscape, and are introducing difficult to enforce ORV use. Only a few, if any should be left open, that have an overriding need and purpose. All the user-created routes descending into Cottonwood Creek should be closed, including 2100, 2370, 2099, and the whole tangle of routes 3169, etc etc

## Route: 3016

### Segment: 3010

#### Designation ?

## Current Designation

Foot/Horse

### Mitigation Criteria

- Reroute
- Needs Data - Cultural
- Interpretation
- Cultural

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- SOIL Soils Steep Slopes 40%
- SOIL Soils Fragile
- WILDLIFE Pronghorn antelope winter concentration areas
- RIPARIAN Riparian 2 stream crossings
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I low
- DENSITY Route density low in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- **Minimize Damage:** NHT – close routes for setting
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Foot/Horse/Mechanized/Motorcycle

**Alternative B:** Open, seek re-route or mitigation

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Segment: 3032

### Designation

#### Current Designation

Vehicles under 50" wide

#### Mitigation Criteria

- Needs Data - SSS Plants
- Cultural

#### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Indirect impact
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Public Comments On Route: 3016

Organization, commenter: COHVCO, James Solomon  
/Mechanized/Motorcycle

Comment ID: 000000065-19

• There is currently 12 miles of single track trail on the South end of the Hunting ground that starts at Escalante Canyon Road. This trail as depicted in Alternative (D) appears to be designated Bicycle. This trail should be designated motorized single track as well. It is used by riders from Montrose, Delta, and the Grand Valley. This area has great potential for further trail development because a motorcycle needs about 35-50 miles of trail, depending on the difficulty of the terrain. The terrain in this area is of a rolling moderated difficulty, therefore a need to add trail and tighten up the existing trail to slow the riders down.

• 4000-3016-3040-3043-2423 I support the Quiet Trail Group's position of designating this Mtn Bike, Horse and Foot only. It would be a component of the Mtn Bike long-distance trail from Whitewater to Delta. Part of it is also used for horseback riding events. There are great dramatic views looking down the cliffs at the Gunnison far below. Walking along this route gives me the time to contemplate the grandeur of the area, from the mighty power of water carving canyons over thousands of years, to the contrast of the snow-capped Mesa to the east. It is great to experience the winds of spring that mark the changing of the seasons in a quiet setting, so having this route be non-motorized is important to me.

• The following high value recreational routes/roads are legal RS 2477 ROW's in the State of Colorado, Mesa County and the BLM does not have the jurisdiction to close them: 500, 472, 518, 521, 530, 39, 127, 572, 566, 66, 65, 148, 71, 74, 587, 595, 608, 622, 628, 635, 624, 609, 611, 706, 678, 700, 719, 726, 696, 26, 936, 847, 849, 919, 767, 824, 96, 822, 817, 950, 1021, 900, 2682, 1020, 1003, 1084, 1142, 1184, 1156, 1198, 1349, 1308, 1310, 1238, 1263, 1122, 1170, 1192, 974, 941, 1076, 1039, 1018, 1759, 1764, 1758, 1174, 1788, 1798, 1669, 1699, 1773, 1755, 1779, 1750, 1751, 1792, 1720, 1726, 1727, 1720, 1722, 1803, 1805, 1809, 1614, 1609, 1605, 1608, 1571, 1526, 1516, 1448, 755, 807, 900, 10, 48, 924, 950, 1005, 965, 8, 1115, 981, 984, 1135, 2678, 1249, 1171, 1150, 1249, 1320, 1235, 1236, 1228, 1227, 1409, 1456, 1349, 1308, 1513, 1221, 1550, 1567, 1641, 1612, 1740, 1688, 2597, 2598, 2601, 2440, 3160, 3162, 2089, 2166, 2170, 2596, 2171, 2003, 2122, 2126, 2189, 3145, 2182, 2179, 2178, 3143, 2181, 2121, 2122, 2168, 2126, 2180, 2095, 2173, 2174, 2620, 2129, 1686, 1692, 1667, 1647, 1631, 1613, 1596, 1549, 1541, 2647, 1633, 1605, 1608, 1571, 2645, 1507, 1448, 1496, 1516, 1504, 1510, 1508, 1509, 439, 431, 456, 461, 460, 391, 423, 415, 419, 407, 402, 367, 372, 339, 298, 338, 105, 368, 374, 393, 389, 390, 376, 377, 351, 350, 121, 345, 320, 301, 251, 234, 232, 205, 344, 107, 103, 152, 153, 161, 168, 3199, 188, 196, 255, 254, 236, 294, 242, 219, 201, 169, 162, 158, 160, 173. The following high value recreational routes/roads are legal RS 2477ROW's in the State of Colorado, Delta County, and the BLM does not have the jurisdiction to close them: 3011, 2184, 2191, 3100, 2187, 2026, 2059, 2188, 2192, 3104, 2130, 3009, 2199, 2200, 2111, 2223, 2024, 3006, 2231, 3094, 2579, 2210, 2344, 2243, 2249, 2248, 3074, 2354, 2384, 2296, 2295, 2287, 2304, 2062, 2163, 3163, 2164, 2430, 4006, 3016, 2351, 3140, 2410, 4008, 2324, 2073, 2306, 2459, 3192, 3193, 2350, 2443, 2035, 2336, 2495, 2491, 2159, 3058, 2277, 2465, 2467, 3189, 2472, 2297, 2006, 2265, 2271, 2276, 2135, 2139, 3053, 2489, 3033, 3057, 2031, 2276, 2210, 2579, 2136, 2344, 3164, 2400, 2379, 3014, 2365, 3116, 2251, 2259, 2149, 2153, 2146, 2144, 2145, 2356, 2257, 2048, 2358, 3165, and 3166.

## Route: 3017

### Segment: 3214

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- Needs Data - SSS Plants

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- WILDLIFE Pronghorn antelope winter concentration areas

- RIPARIAN Riparian 2 stream crossings
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I low
- DENSITY Route density low in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- Minimize Damage:** Riparian—ephemeral streams SSR 30 m
- Minimize Harassment:** Pronghorn - Close and rehab - wincon, PPSV- Minimize fragmentation

### Rationale for Decision

- Route was designated to minimize travel routes in and crossing riparian and wetland areas.
- Route was designated to reduce fragmentation in Priority Vegetation types

## Previous Alternatives Analyzed

**Alternative A:** Foot/Horse/Mechanized/Motorcycle

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Not Rehabbed)

## Public Comments On Route: 3017

- No public comments for this Route

## Route: 3018

### Segment: 841

#### Designation

##### Current Designation

Open (All modes of travel)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- CULTURAL Cultural Direct impact
- SMAs Wild and Scenic River area
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- SSPLANT Special Status Species Colorado hookless cactus

## Rationale

### Designation Criteria

- Recreation:** RMA objectives, Rec opportunities – general

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Open, seek re-route or mitigation

**Alternative D:** Open, seek re-route or mitigation

## Public Comments On Route: 3019

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 00000135-28

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 302

### Segment: 2440

### Designation

#### Current Designation

Vehicles under 50" wide

#### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

#### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands

- RECREATION Recreation access for the Old Spanish National Historic Trail
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I low
- DENSITY Route density highest in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- Recreation:** RMA objectives, Rec opportunities – general
- Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

## Public Comments On Route: 302

Organization, commenter: Quiet Trails Group, Sherry Schenk

Comment ID: 000000115-71

- Routes 239, 272, 280: These routes should be designated as ATV unless there is a resource issue with leaving these open. We anticipate that quiet trail users will use these routes to access 297, 311, etc from the parking at the end of Bean Ranch Road as it is more direct than going the longer way around via 293, 292, 288, 302, etc

## Route: 3020

- I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 3026

### Segment: 583

### Designation

#### Current Designation

Open, seek re-route or mitigation

#### Mitigation Criteria

- Reroute
- Needs Data - Bighorn Sheep

#### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- SSPLANT Special Status Species Colorado hookless cactus

## Rationale

### Designation Criteria

- **No designation criteria for this route segment.**

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed, seek re-route or mitigation

## Route: 3027

### Segment: 569

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density medium in Alt A
- DENSITY Route density medium in Alt E
- SSPLANT Special Status Species Colorado hookless cactus

#### Rationale

##### Designation Criteria

- **Minimize Damage:** Cactus – reduce density within 200m
- **Minimize Harassment:** PPSV- Minimize fragmentation

##### Rationale for Decision

- Route was designated to reduce the density of routes within 200 meters of known Colorado hookless Cactus occurrences.
- Route was designated to reduce fragmentation in Priority Vegetation types

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 3031

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 000000135-25

• Sawmill Mesa Moving south to the CDOW parcel, the BLM should work with the BLM to close numerous user-created routes in the Sawmill Mesa, Grade Gulch and Mud Springs area. The CDOW road leading north east to Cactus Park has numerous random, unplanned spurs and duplicative routes branching off, which need to be closed. Only the main, historically-used arteries should remain open to preserve these remote vistas and natural soundscapes. Routes to be closed and obliterated are: 2273=2139-2696; 2141, 3138, 3135, along with other spurs off the Peach Orchard Point Road 2270, including 3126, 2271, 2272. 2270 all of which should be closed to maintain silent open space quality of this point. Other routes needing closure off the CDOW road are: 2261, 2259, 3002, 3090, 2260, 2051, 2258, 2259, 3154, 2233, 2263, 2254, 3031, 3109, 2134, 2255, 2257, 2250,

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and

proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 3035

### Segment: 677

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- Needs Data - SSS Plants

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- SMAs River Rims ACEC
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- Minimize Harassment:** PPSV- Minimize fragmentation, Bighorn – SSR -- summer range
- Wilderness / Natural Area:** ACEC-River Rims close within 200m cactus

##### Rationale for Decision

- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to reduce the miles of motorized and mechanized routes in bighorn sheep habitat.
- Route was designated to protect Colorado hookless cactus within the River Rims ACEC

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

### /Mechanized/Motorcycle

• There is currently 12 miles of single track trail on the South end of the Hunting ground that starts at Escalante Canyon Road. This trail as depicted in Alternative (D) appears to be designated Bicycle. This trail should be designated motorized single track as well. It is used by riders from Montrose, Delta, and the Grand Valley. This area has great potential for further trail development because a motorcycle needs about 35-50 miles of trail, depending on the difficulty of the terrain. The terrain in this area is of a rolling moderated difficulty, therefore a need to add trail and tighten up the existing trail to slow the riders down.

Organization, commenter: Janice Shepherd

Comment ID: 00000106-210

• 4000-3016-3040-3043-2423 I support the Quiet Trail Group's position of designating this Mtn Bike, Horse and Foot only. It would be a component of the Mtn Bike long-distance trail from Whitewater to Delta. Part of it is also used for horseback riding events. There are great dramatic views looking down the cliffs at the Gunnison far below. Walking along this route gives me the time to contemplate the grandeur of the area, from the mighty power of water carving canyons over thousands of years, to the contrast of the snow-capped Mesa to the east. It is great to experience the winds of spring that mark the changing of the seasons in a quiet setting, so having this route be non-motorized is important to me.

Comment ID: 000000115-77

• Routes 3040, 4000: We understand that BLM has flagged this trail for ATV use, and QTG would like to see this Route reverted back to its historic use as a single track route, and limited to horse, foot, and bike. We believe this would add to the experience of a possible long distance connector trail, because it gives people the opportunity to get away from the saltbrush along the Highway and instead gives the pleasant opportunity to travel along the rim

- Hunting GroundsIn the Hunting Grounds area, a longer distance trail similar to Kokopelli's, Tabeguache, and Paradox Trails, would be of interest to this user group[COPMOBA]. Starting at the Old Spanish Trail in Orchard Mesa and ending in Delta, this trail idea is currently feasible when using a mix of single track, ATV width trail, jeep road and even Highway 50 for a few short sections. With very little trail construction making some connections to existing trails, nearly all of this highway use can be avoided. The major attraction of this area is the views from the rim above the Gunnison River in both directions. The existing trail and any trail construction should be routed to take advantage of this valuable view resource.The following recommendations are in the spirit of developing this long distance trail.Starting from the Kannah Creek area we recommend leaving 152 open to mountain bike use for a possible future connection to the lower Kannah Creek road. Possibilities included deeded access across private land, or new construction from the existing small portion of BLM land which the road accesses. Continuing, use existing full size and ATV trail to the end of 440, or a portion of 431 ,to access small drainage and then construct new trail to access Bridgeport Road. Then use 438, 449 and 2163 to access 2426 and 2427 to Dominguez Road (or 3098 and 3163 and then a very short new connector to 3133 out to highway) From Dominguez Road use 4000 to 3043, then single track 4001,4005,4006,4007 and 3148 to reach Escalante Road. Very nice vi ews ex ist in this area from the trail. The trail would then cross Escalante road to 2073 with a connection being built to 2053. This short deviation from the Escalante road would provide a safer route for mountain bikes than the twisty road with blind comers and high speed full size vehicles. The trail would cross the river on main bridge and immediatel y turn left and follow 2313, 2461 and 2462 with a connection to Delta via 2352, 470 2476 and 2489. This area using borders of the northern most point of the Escalante Rim, south to the Rim

Road then using 2354 as the border on the west, the main county road on the east and then back down to the rim above river on the north would provide an excellent mountain bike emphasis area for the Delta community. Visitors and local users could ride from town or drive a very short distance. Quiet Use trails are rare in this area and this topography would allow for a rewarding experience for hiker, horse and mountain bike users. This scenario would provide an area similar to the Lunch Loops and Mack Ridge areas. With a long distance rail anchoring a Quiet Use stack loop system of trails which are extremely popular and very beneficial to users and the community at trail at large

## Route: 3044

### Segment: 1096

#### Designation [?](#)

##### Current Designation

Vehicles under 50" wide

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- CULTURAL Cultural Direct impact
- SMAs Wild and Scenic River area
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities - specific
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Public Comments On Route: 3047

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 00000135-26

• Cottonwood Creek This creek is a rare example of an almost completely unroaded, untrailed stream corridor for most of its length until it reaches Roubideau Creek and the Gunnison River. Unplanned, damaging routes along Cottonwood Creek upstream near the Forest Service boundary should all be closed to create an undisturbed full stretch of riparian corridor. Randomly created routes needing closure are: 2152, 2149, 2147, 2148, 2439, 2153, 2154, 2156. Closing these routes would restore a relatively intact watershed. Routes needing closure at the northern end of Cottonwood Creek, for the same reason, are: 3087, 3088, 3082, 3083, 3080, 3015, 2370, 2089, 2100, 3079, 3047, 2396, 2013, 3128, 3169, 2014, 2162, 2160, 2493, 3005. Some of these routes spur off 25 Mesa Road and do not actually enter the Cottonwood Creek drainage, but most if not all are not purposely created, not planned, are randomly scarring the landscape, and are introducing difficult to enforce ORV use. Only a few, if any should be left open, that have an overriding need and purpose. All the user-created routes descending into Cottonwood Creek should be closed, including 2100, 2370, 2099, and the whole tangle of routes 3169, etc etc

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 00000135-27

• Orchard Point, Stone Basin recommended closures Fragmenting, random routes needing closure north of Peach Orchard Point and Grade Gulch are 2261, 2260, 2251, 3117, 2114, 2365, 3116, 3114, 2362, 2048, 2238, 2236, 2237, 3113, , 2239, 2359, 2049, 2358, 2105, 3115, 2363, 2367, 2369, 2103, 3074, 3078, 2229, 2045, 3112, 3165, 3166, 2104, 2363, 2360, 2367, 2369, 3165, 2375, 2388, 3007, 2391, 2117, 2381, 2118, 3174, 2030, 3178, 2056, 3072, 2394, 3155, 3156, 2490, 3171, 2099, 3070, 3047, 2013, 3172, 2409. Recommended closures near the Narrows: 3047, 2396, 2013, 3128, 2014, 3169, 3005, 2162, 2160, 2493, 3005, 2099, 2370. Kelso Gulch needed closures are 3092, 3157, 2301, 3057, 2031, 3026, 3024, 3170, 3167, 3060, 3061, 2087, 3158, 2490, 3172, 3014

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 00000135-28

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 3048

### Segment: 921

#### Designation

##### Current Designation

Foot Only

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- RANGE Range access for general livestock management
- LANDS Right of Way
- SOIL Soils Fragile
- RIPARIAN Riparian 1 stream crossing
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Direct impact
- SMAs River Rims ACEC
- SMAs Wild and Scenic River area
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- SSPLANT Special Status Species Colorado hookless cactus

#### Rationale

##### Designation Criteria

- **Minimize Damage:** VRM – maintain quality, Cactus – reduce density within 200m
- **Minimize Harassment:** PPSV- Minimize fragmentation
- **Wilderness / Natural Area:** ACEC-Gunni Gravels-PSD
- **Recreation:** RMA objectives, Rec opportunities - specific
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Public Comments On Route: 3048

Organization, commenter: Escalante Ranch, Richard Miller

Comment ID: 00000171-7

• IV. TRANSPORTATION AND TRAVEL MANAGEMENT Mr. Miller's owns various parcels of private property and multiple water diversions in the area in question, and must access these lands via roads and trails which currently cross public land. In addition, Mr.

Miller must necessarily access various roads and trails to in the course of managing his livestock operation. The EIS proposes closing various roads and trails to public motorized travel, to minimize resource damage caused by the public on both public and private lands. EIS at 157, 187. Mr. Miller supports the BLM's proposal to restrict public access to protect public and private property, but only so long as he is not restricted from using these roads as may be necessary to access his private lands and manage his livestock operation. Thus, to the extent that the BLM wishes to close roads to motorized public traffic, it should simultaneously grant Mr. Miller legal, administrative access. In addition, Mr. Miller notes that he would be entitled to a formal decision, subject to appeal, prior to the BLM restricting access to his private property and/or otherwise impacting his livestock operation. Mr. Miller notes that the BLM has mis-classified many routes. See EIS Map N -1 e. Specifically, many routes which have historically been used to access private land and water diversions, and/or are necessary to maintain livestock improvements or otherwise manage and operate Mr. Miller's livestock operation, have been incorrectly labeled as closed or otherwise restricted in their use. These routes should be classified as "administrative," to recognize these historic uses and to allow for continued uses consistent therewith. The Routes which have been incorrectly classified and which should be classified as "administrative" are as follows: Routes 460, 1220, 1243, 1245, 2003, 2053, 2073, 2086, 2089, 2121, 2122, 2126, 2156, 2166, 2168, 2171~2172, 2177, 2180, 2336, 2342, 2354, 2408, 2412, 2445, 2581, 2582, 2583, 2585, 2587, 2588, 2590, 2591, 2593, 2595, 2596, 2598, 2599, 2612, 2613, 2622, 2691, 3011, 3048, 3070, 3131, 3141, and 3158. See EIS Map N-1e. In addition, Route 2072 is not completely depicted on the map, in that it extends down the river, across BLM and private property, an additional 2-3 miles, and likewise Route 3048 extends an additional 0.75 miles and leads to private property. Id. Fina Uy, Map N-1e incorrectly labels Mr. Miller's privately owned bridge, which crosses the Gunnison River at the Bridgeport area, as "administrative." Id. Mr. Miller requests that the BLM correct these errors and mis-classifications.

Organization, commenter: Escalante Ranch, Kent Davis

Comment ID: 00000192-35

- Route number 3048. These two little roads access private and corrals and need to be left open.

## Public Comments On Route: 3051

Organization, commenter: Katie Steele

Comment ID: 000000056-2

- On the Preferred Alternative E, I would like to make two suggestions on routes that have either been temporarily closed or access restricted. The first route is on the Hunting Grounds. It is the route that takes you to the dedication site for the NCA. It's an incredible overlook of the Gunnison River, the Loretta House and the Big Dominguez Canyon. The route numbers involved are: 2163, 2164, 3051, 461, 454 and 450. I understand this is proposed as a temporary closure for the preservation of cultural resources. But, instead of closing the routes until the resources can be protected, why not leave it open until funding, man power, etc. are obtained. Then only close the route for the short time it would take to actually do the work needed. This would eliminate the route being closed for an indefinite period of time.

Comment ID: 000000256-1

- Gunnison River, especially the Bridgeport area has special meaning for me. I love to just watch the river, then weather for the wildlife- The eagles if I am lucky, and the them the owls to hawks, always the hawks that occupy their own world and spaces, as I do, when I'm, there. Of course the old farming area is interring and lands its own peaceful charm, summer, spring and fall.2) It's a close to home ( I live in GJ) and yet is a far away place, a long ago place, a peacefully place to re-create the soul. It is good to take the trail along the river look down on it, and up the canyon, Escalante to Dominguez. I do not need to go to the canyon, I can see and imagine them, especially on the quiet stretches of trail

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 3054

### Segment: 653

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- SOIL Soils Fragile
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Minimize Harassment:** PPSV- Minimize fragmentation

##### Rationale for Decision

- Route was designated to reduce fragmentation in Priority Vegetation types

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Route: 3055

### Segment: 641

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- Needs Data - SSS Plants

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands

- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- SMAs River Rims ACEC
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- Minimize Harassment:** Bighorn – SSR -- summer range, PPSV- Minimize fragmentation

### Rationale for Decision

- Route was designated to reduce the miles of motorized and mechanized routes in bighorn sheep habitat.
- Route was designated to reduce fragmentation in Priority Vegetation types

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

Comment ID: 00000135-28

- I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 3058

### Segment: 560

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density low in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- Minimize Harassment:** PPSV- Minimize fragmentation, Bighorn – SSR -- summer range

##### Rationale for Decision

- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to reduce the miles of motorized and mechanized routes in bighorn sheep habitat.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 3059

### Segment: 546

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- WILDLIFE Mule deer severe winter range
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I moderate
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- SSPLANT Special Status Species Colorado hookless cactus

#### Rationale

##### Designation Criteria

- **Minimize Damage:** Soils - SSR slopes 25-40%
- **Minimize Harassment:** PPSV- Minimize fragmentation, Bighorn – SSR -- summer range

##### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to reduce the miles of motorized and mechanized routes in bighorn sheep habitat.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Admin/Permitted Use Only

However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 306

### Segment: 2438

#### Designation

##### Current Designation

Open, seek re-route or mitigation

#### Mitigation Criteria

- Cultural
- Riparian

#### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- RIPARIAN Riparian 1 stream crossing
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Direct impact
- DENSITY Route density medium in Alt A
- DENSITY Route density medium in Alt E

### Rationale

#### Designation Criteria

- **No designation criteria for this route segment.**

#### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open (All modes of travel)

**Alternative C:** Open (All modes of travel)

**Alternative D:** Admin/Permitted Use Only

### Public Comments On Route: 306

- No public comments for this Route

### Route: 3060

#### Segment: 535

#### Designation [?](#)

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density medium in Alt A
- DENSITY Route density medium in Alt E

### Rationale

#### Designation Criteria

- **Minimize Harassment:** PPSV- Minimize fragmentation

#### Rationale for Decision

- Route was designated to reduce fragmentation in Priority Vegetation types

### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

### Public Comments On Route: 3060

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 000000135-27

• Orchard Point, Stone Basin recommended closuresFragmenting, random routes needing closure north of Peach Orchard Point and Grade Gulch are 2261, 2260, 2251, 3117,2114, 2365,3116, 3114, 2362, 2048, 2238, 2236, 2237, 3113, , 2239, 2359, 2049, 2358, 2105, 3115, 2363, 2367, 2369, 2103, 3074, 3078, 2229, 2045, 3112, 3165, 3166, 2104, 2363, 2360, 2367, 2369, 3165, 2375, 2388, 3007, 2391, 2117 2381, 2118, 3174, 2030, 3178, 2056, 3072, 2394, 3155, 3156, 2490 3171, 2099, 3070 3047, 2013, 3172, 2409.Recommended closures near the Narrows: 3047, 2396, 2013, 3128, 2014, 3169, 3005, 2162, 2160, 2493, 3005, 2099, 2370.Kelso Gulch needed closures are 3092, 3157, 2301, 3057, 2031, 3026, 3024, 3170, 3167, 3060, 3061, 2087, 3158, 2490 3172, 3014

## Public Comments On Route: 3069

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 00000135-28

- I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 307

### Segment: 2425

### Designation [?](#)

#### Current Designation

Closed (Rehab)

#### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

#### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- **Minimize Damage:** NHT – close routes for setting
- **Minimize Harassment:** PPSV- Minimize fragmentation

### Rationale for Decision

- Route was designated to improve natural setting along the Old Spanish National Historic Trail.
- Route was designated to reduce fragmentation in Priority Vegetation types

## Public Comments On Route: 3070

Organization, commenter: Karen Green

Comment ID: 000000091-6

- Escalante Canyon: Roads numbered 3070, 3071 should remain open and 3011 should be reopened and all others should remain open for campsites. Road number 3158 is not even listed on Alt. E, but should remain open. I would also state that closing all the small campsites along the canyon road from the river and for the next 16 miles (not including private land) is not necessary or a good idea. I absolutely do not support any plan to make a paid camp ground in that area. Part of the beauty of going there is the various sites available for those of us wishing to escape next door neighbors

- IV. TRANSPORTATION AND TRAVEL MANAGEMENTMr. Miller's owns various parcels of private property and multiple water diversions in thearea in question, and must access these lands via roads and trails which currently cross publicland. In addition, Mr. Miller must necessarily access various roads and trails to in the course ofmanaging his livestock operation. The EIS proposes closing various roads and trails to publicmotorized travel, to minimize resource damage caused by the public on both public and privatelands. EIS at 157, 187. Mr. Miller supports the BLM's proposal to restrict public access toprotect public and private property, but only so long as he is not restricted from using these roads as may be necessary to access his private lands and manage his livestock operation. Thus, to the extent that the BLM wishes to close roads to motorized public traffic, it should simultaneously grant Mr. Miller legal, administrative access. In addition, Mr. Miller notes that he would be entitled to a formal decision, subject to appeal, prior to the BLM restricting access to his private property and/or otherwise impacting his livestock operation.Mr. Miller notes that the BLM has mis-classified many routes. See EIS Map N -1 e.Specifically, many routes which have historically been used to access private land and waterdiversions, and/or are necessary to maintain livestock improvements or otherwise manage andoperate Mr. Miller's livestock operation, have been incorrectly labeled as closed or otherwiserestricted in their use. These routes should be classified as "administrative," to recognize thesehistoric uses and to allow for continued uses consistent therewith. The Routes which have beenincorrectly classified and which should be classified as "administrative" are as follows:Routes460, 1220,1243,1245,2003,2053,2073,2086,2089,2121,2122,2126,2156,2166,2168,2171~2172,2177,2180,2336,2342,2354,2408,2412,2445,2581,2582,2583,2585,2587,2588,2590,2591,2593,2595,2596,2598,2599,2612,2613,2622,2691,3011,3048,3070,3131,3141,and3158.See EIS Map N-1e. In addition, Route 2072 is not completely depicted on the map, in that itextends down the river, across BLM and private property, an additional2-3 miles, and likewiseRoute 3048 extends an additional 0.75 miles and leads to private property. Id. FinaUy, Map N-1e incorrectly labels Mr. Miller's privately owned bridge, which crosses the Gunnison River atthe Bridgeport area, as "administrative." I d. Mr. Miller requests that the BLM correct theseerrors and mis-classifications.

- Route numbers 3070 and 3011. Needs to be left open or to administrative route for cattle emergencies.

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 3071

### Segment: 444

#### Designation [?](#)

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- SOIL Soils Steep Slopes 40%
- SOIL Soils Fragile
- WILDLIFE Mule deer severe winter range
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I moderate
- SMAs Escalante Canyon ACEC
- SMAs Wild and Scenic River area
- DENSITY Route density low in Alt A
- DENSITY Route density low in Alt E
- SSPLANT Special Status Species Colorado hookless cactus
- SSPLANT Special Status Species sensitive species planes

#### Rationale

##### Designation Criteria

- **Minimize Damage:** Cactus – reduce density within 200m, SS Veg Communities – SSR
- **Minimize Harassment:** PPSV- Minimize fragmentation
- **Wilderness / Natural Area:** ACEC- Escalante-SSR

##### Rationale for Decision

- Route was designated to reduce the density of routes within 200 meters of known Colorado hookless Cactus occurrences.
- Route was designated to protect and enhance special status fish, wildlife, and plant populations.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect sensitive plant, fish, and wildlife resources in the Escalante Canyon ACEC

## Public Comments On Route: 3071

Organization, commenter: Karen Green

Comment ID: 00000091-6

• Escalante Canyon: Roads numbered 3070, 3071 should remain open and 3011 should be reopened and all others should remain open for campsites. Road number 3158 is not even listed on Alt. E, but should remain open. I would also state that closing all the small campsites along the canyon road from the river and for the next 16 miles (not including private land) is not necessary or a good idea. I absolutely do not support any plan to make a paid camp ground in that area. Part of the beauty of going there is the various sites available for those of us wishing to escape next door neighbors

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

Comment ID: 000000135-26

- Cottonwood CreekThis creek is a rare example of an almost completely unroaded, untrailed stream corridor for most of its length until it reaches Roubideau Creek and the Gunnison River. Unplanned, damaging routes along Cottonwood Creek upstream near the Forest Service boundary should all be closed to create an undisturbed full stretch of riparian corridor. Randomly created routes needing closure are: 2152, 2149, 2147, 2148, 2439, 2153, 2154, 2156. Closing these routes would restore a relatively intact watershed.Routes needing closure at the northern end of Cottonwood Creek, for the same reason, are: 3087, 3088, 3082,3083,3080, 3015, 2370, 2089, 2100, 3079, 3047,2396, 2013, 3128,3169,2014,2162,2160,2493,3005.Some of these routes spur off 25 Mesa Road and do not actually enter the Cottonwood Creek drainage, but most if not all are not purposely created, not planned, are randomly scarring the landscape, and are introducing difficult to enforce ORV use. Only a few, if any should be left open, that have an overriding need and purpose.All the user-created routes descending into Cottonwood Creek should be closed, including 2100, 2370, 2099, and the whole tangle of routes 3169, etc etc

- DENSITY Route density medium in Alt A
- DENSITY Route density medium in Alt E
- VEGETATION Sagebrush patches <60 acres

### Rationale

### Designation Criteria

- **Minimize Damage:** Geo/paleo – SSR in key sites
- **Minimize Harassment:** Sage-Minimize fragmentation, Bighorn – SSR -- summer range, PPSV- Minimize fragmentation

### Rationale for Decision

- Route was designated to protect geologic and paleontologic resources.
- Route was designated to reduce fragmentation of sagebrush patches
- Route was designated to reduce the miles of motorized and mechanized routes in bighorn sheep habitat.
- Route was designated to reduce fragmentation in Priority Vegetation types

## Public Comments On Route: 3081

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 000000135-28

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 3082

## Public Comments On Route: 3082

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 000000135-26

• Cottonwood Creek This creek is a rare example of an almost completely unroaded, untrailed stream corridor for most of its length until it reaches Roubideau Creek and the Gunnison River. Unplanned, damaging routes along Cottonwood Creek upstream near the Forest Service boundary should all be closed to create an undisturbed full stretch of riparian corridor. Randomly created routes needing closure are: 2152, 2149, 2147, 2148, 2439, 2153, 2154, 2156. Closing these routes would restore a relatively intact watershed. Routes needing closure at the northern end of Cottonwood Creek, for the same reason, are: 3087, 3088, 3082, 3083, 3080, 3015, 2370, 2089, 2100, 3079, 3047, 2396, 2013, 3128, 3169, 2014, 2162, 2160, 2493, 3005. Some of these routes spur off 25 Mesa Road and do not actually enter the Cottonwood Creek drainage, but most if not all are not purposely created, not planned, are randomly scarring the landscape, and are introducing difficult to enforce ORV use. Only a few, if any should be left open, that have an overriding need and purpose. All the user-created routes descending into Cottonwood Creek should be closed, including 2100, 2370, 2099, and the whole tangle of routes 3169, etc etc

## Public Comments On Route: 3086

Organization, commenter: Janice Shepherd

Comment ID: 000000106-225

- 2004 and 3086 in the KML version don't connect with the county road at their intersection, guessing they do in reality.

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 000000135-23

- Dry Mesa Road Dry Mesa Road similarly has numerous parallel and duplicative routes and loops that are severely and unnecessarily fragmenting what has been a relatively intact habitat area. This spiderweb of routes did not exist a few years ago and should not be legitimized, just because new mobile technologies have the ability to get into these areas. Needing closure and obliteration specifically are routes 3105, 3104 2199, 2200, 2004, 2206, 2109, 2112, 2110, 2111, 3086, 2203, 2058, 2204, 2023. Effective closure and obliteration of these purposeless, randomly-created routes is necessary to restore the integrity of what was until recently a wild and remote landscape

### Public Comments On Route: 3090

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 00000135-25

• Sawmill Mesa Moving south to the CDOW parcel, the BLM should work with the BLM to close numerous user-created routes in the Sawmill Mesa, Grade Gulch and Mud Springs area. The CDOW road leading north east to Cactus Park has numerous random, unplanned spurs and duplicative routes branching off, which need to be closed. Only the main, historically-used arteries should remain open to preserve these remote vistas and natural soundscapes. Routes to be closed and obliterated are: 2273=2139-2696; 2141, 3138, 3135, along with other spurs off the Peach Orchard Point Road 2270, including 3126, 2271, 2272. 2270 all of which should be closed to maintain silent open space quality of this point. Other routes needing closure off the CDOW road are: 2261, 2259, 3002, 3090, 2260, 2051, 2258, 2259, 3154, 2233, 2263, 2254, 3031, 3109, 2134, 2255, 2257, 2250,

Comment ID: 00000135-28

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the

kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 3091

### Segment: 594

#### Designation [?](#)

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- SSPLANT Special Status Species Colorado hookless cactus

#### Rationale

##### Designation Criteria

- Minimize Damage:** Cactus – reduce density within 200m
- Minimize Harassment:** PPSV- Minimize fragmentation

##### Rationale for Decision

- Route was designated to reduce the density of routes within 200 meters of known Colorado hookless Cactus occurrences.
- Route was designated to reduce fragmentation in Priority Vegetation types

Comment ID: 00000135-24

• Black Point Draw/Black Point Three routes between Dry Mesa and the CDOW road leading north east to Cactus Park are redundant and unnecessarily fragmenting. 2579-2210-2344 is recently pioneered and should be closed immediately, along with its spurs 2136, 2209, 2208 and 3094. These encroach on a relatively wild Escalante Creek canyon and have had no traditional or long-term use or purpose. 2024 and 3006 are parallel and duplicative, provide the same experience as each other, and should be reduced to one route. The BLM should decide which route is the least damaging, and disturbing to wildlife, and easiest to enforce, and close the other one

Comment ID: 00000135-28

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 3095

### Segment: 329

#### Designation

## Current Designation

Open (All modes of travel)

## Mitigation Criteria

- No Mitigation Criteria for this Route Segment

## Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Public Comments On Route: 3095

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 00000135-28

- I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 000000135-15

• Sowbelly RidgeRoute 2537, 3096, 2182 2179, 3143 along Sowbelly Ridge dead ends at the wilderness and should be closed to ATVs, but possibly kept open for 4WD hunting access and horse back use, to preserve nonmotorized hunting opportunities and its remote setting, in accordance with the guidance above

Organization, commenter: Backcountry Hunters and Anglers, Craig Grother

Comment ID: 000000156-20

• We also request that the BLM reconsider leaving road 2181 open to motorized vehicles. We feel that this road in Tatum Ridge should be converted to a non-motorized trail at the junction with road 3096 to provide additional opportunities for backcountry hunting. A trailhead could be designated here at the head of Ridge to accommodate a few vehicles.

## Public Comments On Route: 3098

Organization, commenter: Janice Shepherd

Comment ID: 000000106-226

• 2426, 2427 My husband and I hiked down this route. With the curves in the canyon, it makes it a fun hike as you wonder what will be around the corner. The reward for the hike was getting down to the river. I can see the mountain bikers would enjoy these routes too and they could be part of the long-distance mountain biking trail being considered between Whitewater and Delta. Route 3098 looked like a great place to come back to explore, another appealing twisty canyon.

Organization, commenter: COPMOBA, Scott Winans

Comment ID: 000000168-2

• Hunting Grounds In the Hunting Grounds area, a longer distance trail similar to Kokopelli's, Tabeguache, and Paradox Trails, would be of interest to this user group[COPMOBA]. Starting at the Old Spanish Trail in Orchard Mesa and ending in Delta, this trail idea is currently feasible when using a mix of single track, ATV width trail, jeep road and even Highway 50 for a few short sections. With very little trail construction making some connections to existing trails, nearly all of this highway use can be avoided. The major attraction of this area is the views from the rim above the Gunnison River in both directions. The existing trail and any trail construction should be routed to take advantage of this valuable view resource. The following recommendations are in the spirit of developing this long distance trail. Starting from the Kannah Creek area we recommend leaving 152 open to mountain bike use for a possible future connection to the lower Kannah Creek road. Possibilities included deeded access across private land, or new construction from the existing small portion of BLM land which the road accesses. Continuing, use existing full size and ATV trail to the end of 440, or a portion of 431, to access small drainage and then construct new trail to access Bridgeport Road. Then use 438, 449 and 2163 to access 2426 and 2427 to Dominguez Road (or 3098 and 3163 and then a very short new connector to 3133 out to highway) From Dominguez Road use 4000 to 3043, then single track 4001, 4005, 4006, 4007 and 3148 to reach Escalante Road. Very nice views exist in this area from the trail. The trail would then cross Escalante road to 2073 with a connection being built to 2053. This short deviation from the Escalante road would provide a safer route for mountain bikes than the twisty road with blind corners and high speed full size vehicles. The trail would cross the river on main bridge and immediately turn left and follow 2313, 2461 and 2462 with a connection to Delta via 2352, 470 2476 and 2489. This area using borders of the northern most point of the Escalante Rim, south to the Rim Road then using 2354 as the border on the west, the main county road on the east and then back down to the rim above river on the north would provide an excellent mountain bike emphasis area for the Delta community. Visitors and local users could ride from town or drive a very short distance. Quiet Use trails are rare in this area and this topography would allow for a rewarding experience for hiker, horse and mountain bike users. This scenario would provide an area similar to the Lunch Loops and Mack Ridge areas. With a long distance rail anchoring a Quiet Use stack loop system of trails which are extremely popular and very beneficial to users and the community at trail at large

## Public Comments On Route: 3099

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 000000135-22

• Little Mesa spursNumerous damaging and randomly created spurs and loops branch off from Little Mesa Road, 2026-2025-2187 and should be closed. These include 2059, 2188, 2190, 3100, 2191, 2192, 2197, 2198, 3104, 3099, 3104.If some of these would make a link between Little Mesa and Dry Mesa, there should be one route only and it should be a full size vehicle 4WD route rather than an ATV route. Full-size vehicles are the traditional use of this county, whereas ATVs introduce a new, noisy, "go-anywhere," unenforceable use that is incompatible with the traditional rugged, remote and solitary setting of this area

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 3101

### Segment: 122

#### Designation

##### Current Designation

Open (All modes of travel)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- SOIL Soils Fragile
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk winter concentration areas
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I high
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **No designation criteria for this route segment.**

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open (All modes of travel)

**Alternative C:** Open, seek re-route or mitigation

**Alternative D:** Open, seek re-route or mitigation

The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 3102

### Segment: 1702

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- SSPLANT Special Status Species Colorado hookless cactus

## Rationale

### Designation Criteria

- Minimize Damage:** Cactus – reduce density within 200m
- Minimize Harassment:** PPSV- Minimize fragmentation

### Rationale for Decision

- Route was designated to reduce the density of routes within 200 meters of known Colorado hookless Cactus occurrences.
- Route was designated to reduce fragmentation in Priority Vegetation types

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 3102

- No public comments for this Route

## Route: 3103

### Segment: 1352

## Designation

### Current Designation

Open (All modes of travel)

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- CULTURAL Cultural Class I low
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E
- SSPLANT Special Status Species Colorado hookless cactus

## Rationale

### Designation Criteria

- Recreation:** Rec opportunities – general

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open, seek re-route or mitigation

**Alternative C:** Closed, seek re-route or mitigation

**Alternative D:** Admin/Permitted Use Only

## Public Comments On Route: 3103

- No public comments for this Route

## Route: 3104

### Segment: 138

## Designation

### Current Designation

Closed (Rehab)

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

## Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- SOIL Soils Steep Slopes 40%
- SOIL Soils Fragile
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk winter concentration areas
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I high
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches >60 acres

## Rationale

### Designation Criteria

- **Minimize Harassment:** Sage-Minimize fragmentation

### Rationale for Decision

- Route was designated to reduce fragmentation of sagebrush patches

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Vehicles under 50" wide

**Alternative C:** Closed (Rehab)

**Alternative D:** Vehicles under 50" wide

• Little Mesa spurs Numerous damaging and randomly created spurs and loops branch off from Little Mesa Road, 2026-2025-2187 and should be closed. These include 2059, 2188, 2190, 3100, 2191, 2192, 2197, 2198, 3104, 3099, 3104. If some of these would make a link between Little Mesa and Dry Mesa, there should be one route only and it should be a full size vehicle 4WD route rather than an ATV route. Full-size vehicles are the traditional use of this county, whereas ATVs introduce a new, noisy, "go-anywhere," unenforceable use that is incompatible with the traditional rugged, remote and solitary setting of this area

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 00000135-23

• Dry Mesa Road Dry Mesa Road similarly has numerous parallel and duplicative routes and loops that are severely and unnecessarily fragmenting what has been a relatively intact habitat area. This spiderweb of routes did not exist a few years ago and should not be legitimized, just because new mobile technologies have the ability to get into these areas. Needing closure and obliteration specifically are routes 3105, 3104 2199, 2200, 2004, 2206, 2109, 2112, 2110, 2111, 3086, 2203, 2058, 2204, 2023. Effective closure and obliteration of these purposeless, randomly-created routes is necessary to restore the integrity of what was until recently a wild and remote landscape

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 3105

### Segment: 137

#### Designation ?

## Current Designation

Closed (Rehab)

## Mitigation Criteria

- No Mitigation Criteria for this Route Segment

## Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- SOIL Soils Steep Slopes 40%
- SOIL Soils Fragile
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk winter concentration areas
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches >60 acres

## Rationale

### Designation Criteria

- **Minimize Harassment:** Sage-Minimize fragmentation

### Rationale for Decision

- Route was designated to reduce fragmentation of sagebrush patches

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

## Public Comments On Route: 3105

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 00000135-23

• Dry Mesa RoadDry Mesa Road similarly has numerous parallel and duplicative routes and loops that are severely and unnecessarily fragmenting what has been a relatively intact habitat area. This spiderweb of routes did not exist a few years ago and should not be legitimized, just because new mobile technologies have the ability to get into these areas.Needing closure and obliteration specifically are routes 3105, 3104 2199, 2200, 2004, 2206, 2109, 2112, 2110, 2111, 3086, 2203, 2058, 2204, 2023. Effective closure and obliteration of these purposeless, randomly-created routes is necessary to restore the integrity of what was until recently a wild and remote landscape

## Public Comments On Route: 3108

Organization, commenter: Quiet Trails Group, Sherry Schenk

Comment ID: 000000115-67

- [Wagon Park/Sawmill Mesa (South) TMP-Level Comments:Quiet Trails Group supports the management decisions shown in Alternative E for the southern Sawmill Mesa area with the following specific suggestions:] Route 2024: We support closing 2024 as it appears to be a duplicative route. The surrounding routes 2578-3006-2232-2231 and 2579-3108-2210-2344 connect to Forest Service trails. If there are cattle or other uses for this road not shown on the map, we would support an administrative designation. Otherwise we would like to see 2024 closed to reduce route density in the area because of the presence of big game.We also see that these routes stop at the Dry Fork LWC unit; we would urge the BLM to make sure there is a topographical or physical barrier to stop motorized access into the LWC. Please put signage back at the Forest Boundary that the routes dead-end ahead.

## Public Comments On Route: 3109

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 000000135-25

• Sawmill Mesa Moving south to the CDOW parcel, the BLM should work with the BLM to close numerous user-created routes in the Sawmill Mesa, Grade Gulch and Mud Springs area. The CDOW road leading north east to Cactus Park has numerous random, unplanned spurs and duplicative routes branching off, which need to be closed. Only the main, historically-used arteries should remain open to preserve these remote vistas and natural soundscapes. Routes to be closed and obliterated are: 2273=2139-2696; 2141, 3138, 3135, along with other spurs off the Peach Orchard Point Road 2270, including 3126, 2271, 2272. 2270 all of which should be closed to maintain silent open space quality of this point. Other routes needing closure off the CDOW road are: 2261, 2259, 3002, 3090, 2260, 2051, 2258, 2259, 3154, 2233, 2263, 2254, 3031, 3109, 2134, 2255, 2257, 2250,

Comment ID: 000000115-71

• Routes 239, 272, 280: These routes should be designated as ATV unless there is a resource issue with leaving these open. We anticipate that quiet trail users will use these routes to access 297, 311, etc from the parking at the end of Bean Ranch Road as it is more direct than going the longer way around via 293, 292, 288, 302, etc

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness.Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources.As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use.The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles.What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures.All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 3113

### Segment: 217

#### Designation ?

##### Current Designation

Admin/Permitted Use Only

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- SOIL Soils Fragile
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk severe winter range
- RIPARIAN Riparian 1 stream crossing
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I moderate
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- Minimize Damage:** Cultural – SSR within 100m sites

##### Rationale for Decision

- Route was designated to ensure access to rights-of-way, private property, and livestock grazing facilities.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Not Rehabbed)

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness.Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources.As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use.The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles.What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures.All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

Comment ID: 000000135-25

• Sawmill Mesa Moving south to the CDOW parcel, the BLM should work with the BLM to close numerous user-created routes in the Sawmill Mesa, Grade Gulch and Mud Springs area. The CDOW road leading north east to Cactus Park has numerous random, unplanned spurs and duplicative routes branching off, which need to be closed. Only the main, historically-used arteries should remain open to preserve these remote vistas and natural soundscapes. Routes to be closed and obliterated are: 2273=2139-2696; 2141, 3138, 3135, along with other spurs off the Peach Orchard Point Road 2270, including 3126, 2271, 2272, 2270 all of which should be closed to maintain silent open space quality of this point. Other routes needing closure off the CDOW road are: 2261, 2259, 3002, 3090, 2260, 2051, 2258, 2259, 3154, 2233, 2263, 2254, 3031, 3109, 2134, 2255, 2257, 2250,

## Public Comments On Route: 3128

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 00000135-26

• Cottonwood Creek This creek is a rare example of an almost completely unroaded, untrailed stream corridor for most of its length until it reaches Roubideau Creek and the Gunnison River. Unplanned, damaging routes along Cottonwood Creek upstream near the Forest Service boundary should all be closed to create an undisturbed full stretch of riparian corridor. Randomly created routes needing closure are: 2152, 2149, 2147, 2148, 2439, 2153, 2154, 2156. Closing these routes would restore a relatively intact watershed. Routes needing closure at the northern end of Cottonwood Creek, for the same reason, are: 3087, 3088, 3082, 3083, 3080, 3015, 2370, 2089, 2100, 3079, 3047, 2396, 2013, 3128, 3169, 2014, 2162, 2160, 2493, 3005. Some of these routes spur off 25 Mesa Road and do not actually enter the Cottonwood Creek drainage, but most if not all are not purposely created, not planned, are randomly scarring the landscape, and are introducing difficulty to enforce ORV use. Only a few, if any should be left open, that have an overriding need and purpose. All the user-created routes descending into Cottonwood Creek should be closed, including 2100, 2370, 2099, and the whole tangle of routes 3169, etc etc

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Public Comments On Route: 3129

Organization, commenter: Janice Shepherd

Comment ID: 00000106-118

• Pages 144-145 Cottonwood Canyon / Dry Fork From studying the maps for Bighorn Sheep (map 3-11), the Special Status Plant Species Map and the Alt E designated Route Map, I see that if the Cottonwood Canyon portion of the Cottonwood Canyon / Dry Fork SRMA were expanded in the NE corner to be bounded by Sawmill Mesa Rd, the D-E NCA boundary and 25 Mesa Road, this would involve no changes in proposed motorized/mechanized route designations but would help protect a Bighorn Sheep Winter Concentration (map 3-11) and two more populations of Colorado Hookless Cactus (map 3-13). The proposed Admin routes would stay as Admin routes and only route 3129 would need to be cherry-stemmed to allow for a parking/staging area for horse/foot access. I support this small expansion of Cottonwood Canyon / Dry Fork SRMA. This would be a great contribution towards protecting two D-E NCA key species. As an added bonus it would protect some prairie dog habitat (map 3-14).

## Public Comments On Route: 3131

Organization, commenter: Escalante Ranch, Richard Miller

Comment ID: 00000171-7

- IV. TRANSPORTATION AND TRAVEL MANAGEMENT Mr. Miller's owns various parcels of private property and multiple water diversions in the area in question, and must access these lands via roads and trails which currently cross public land. In addition, Mr. Miller must necessarily access various roads and trails to in the course of managing his livestock operation. The EIS proposes closing various roads and trails to public motorized travel, to minimize resource damage caused by the public on both public and private lands. EIS at 157, 187. Mr. Miller supports the BLM's proposal to restrict public access to protect public and private property, but only so long as he is not restricted from using these roads as may be necessary to access his private lands and manage his livestock operation. Thus, to the extent that the BLM wishes to close roads to motorized public traffic, it should simultaneously grant Mr. Miller legal, administrative access. In addition, Mr. Miller notes that he would be entitled to a formal decision, subject to appeal, prior to the BLM restricting access to his private property and/or otherwise impacting his livestock operation. Mr. Miller notes that the BLM has mis-classified many routes. See EIS Map N -1 e. Specifically, many routes which have historically been used to access private land and water diversions, and/or are necessary to maintain livestock improvements or otherwise manage and operate Mr. Miller's livestock operation, have been incorrectly labeled as closed or otherwise restricted in their use. These routes should be classified as "administrative," to recognize these historic uses and to allow for continued uses consistent therewith. The Routes which have been incorrectly classified and which should be classified as "administrative" are as follows: Routes 460, 1220, 1243, 1245, 2003, 2053, 2073, 2086, 2089, 2121, 2122, 2126, 2156, 2166, 2168, 2171-2172, 2177, 2180, 2336, 2342, 2354, 2408, 2412, 2445, 2581, 2582, 2583, 2585, 2587, 2588, 2590, 2591, 2593, 2595, 2596, 2598, 2599, 2612, 2613, 2622, 2691, 3011, 3048, 3070, 3131, 3141, and 3158. See EIS Map N-1e. In addition, Route 2072 is not completely depicted on the map, in that it extends down the river, across BLM and private property, an additional 2-3 miles, and likewise Route 3048 extends an additional 0.75 miles and leads to private property. Id. FinaUy, Map N-1e incorrectly labels Mr. Miller's privately owned bridge, which crosses the Gunnison River at the Bridgeport area, as "administrative." I d. Mr. Miller requests that the BLM correct these errors and mis-classifications.

Organization, commenter: Escalante Ranch, Kent Davis

Comment ID: 00000192-49

- Route numbers 2691 and 2612, 2581, 2583, 2585, 3131, 2595, 2591, 2587. Needs to be changed to admin route for cattle purposes of emergency.

## Public Comments On Route: 3133

Organization, commenter: COPMOBA, Scott Winans

Comment ID: 00000168-2

• Hunting GroundsIn the Hunting Grounds area, a longer distance trail similar to Kokopelli's, Tabeguache, and Paradox Trails, would be of interest to this user group[COPMOBA]. Starting at the Old Spanish Trail in Orchard Mesa and ending in Delta, this trail idea is currently feasible when using a mix of single track, ATV width trail, jeep road and even Highway 50 for a few short sections. With very little trail construction making some connections to existing trails, nearly all of this highway use can be avoided. The major attraction of this area is the views from the rim above the Gunnison River in both directions. The existing trail and any trail construction should be routed to take advantage of this valuable view resource. The following recommendations are in the spirit of developing this long distance trail. Starting from the Kannah Creek area we recommend leaving 152 open to mountain bike use for a possible future connection to the lower Kannah Creek road. Possibilities included deeded access across private land, or new construction from the existing small portion of BLM land which the road accesses. Continuing, use existing full size and ATV trail to the end of 440, or a portion of 431, to access small drainage and then construct new trail to access Bridgeport Road. Then use 438, 449 and 2163 to access 2426 and 2427 to Dominguez Road (or 3098 and 3163 and then a very short new connector to 3133 out to highway) From Dominguez Road use 4000 to 3043, then single track 4001,4005,4006,4007 and 3148 to reach Escalante Road. Very nice views exist in this area from the trail. The trail would then cross Escalante road to 2073 with a connection being built to 2053. This short deviation from the Escalante road would provide a safer route for mountain bikes than the twisty road with blind comers and high speed full size vehicles. The trail would cross the river on main bridge and immediately turn left and follow 2313, 2461 and 2462 with a connection to Delta via 2352, 470 2476 and 2489. This area using borders of the northern most point of the Escalante Rim, south to the Rim Road then using 2354 as the border on the west, the main county road on the east and then back down to the rim above river on the north would provide an excellent mountain bike emphasis area for the Delta community. Visitors and local users could ride from town or drive a very short distance. Quiet Use trails are rare in this area and this topography would allow for a rewarding experience for hiker, horse and mountain bike users. This scenario would provide an area similar to the Lunch Loops and Mack Ridge areas. With a long distance rail anchoring a Quiet Use stack loop system of trails which are extremely popular and very beneficial to users and the community at trail at large

## Route: 3134

### Segment: 1360

#### Designation [?](#)

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- CULTURAL Cultural Indirect impact
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- SSPLANT Special Status Species Colorado hookless cactus

#### Rationale

##### Designation Criteria

- **Minimize Damage:** Cactus – reduce density within 200m
- **Minimize Harassment:** PPSV- Minimize fragmentation, Bighorn – SSR -- summer range

##### Rationale for Decision

- Route was designated to reduce the density of routes within 200 meters of known Colorado hookless Cactus occurrences.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to reduce the miles of motorized and mechanized routes in bighorn sheep habitat.

## Public Comments On Route: 3135

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 000000135-25

• Sawmill Mesa Moving south to the CDOW parcel, the BLM should work with the BLM to close numerous user-created routes in the Sawmill Mesa, Grade Gulch and Mud Springs area. The CDOW road leading north east to Cactus Park has numerous random, unplanned spurs and duplicative routes branching off, which need to be closed. Only the main, historically-used arteries should remain open to preserve these remote vistas and natural soundscapes. Routes to be closed and obliterated are: 2273=2139-2696; 2141, 3138, 3135, along with other spurs off the Peach Orchard Point Road 2270, including 3126, 2271, 2272. 2270 all of which should be closed to maintain silent open space quality of this point. Other routes needing closure off the CDOW road are: 2261, 2259, 3002, 3090, 2260, 2051, 2258, 2259, 3154, 2233, 2263, 2254, 3031, 3109, 2134, 2255, 2257, 2250,

However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 3139

### Segment: 1062

#### Designation [?](#)

##### Current Designation

Open (All modes of travel)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- WILDLIFE Pronghorn antelope winter concentration areas
- CULTURAL Cultural Class I low
- SMAs River Rims ACEC
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **No designation criteria for this route segment.**

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open, seek re-route or mitigation

**Alternative C:** Admin/Permitted Use Only

**Alternative D:** Open, seek re-route or mitigation

## Public Comments On Route: 3139

Organization, commenter: Janice Shepherd

Comment ID: 00000106-178

• Given that the pronghorn winter concentration (map 3-15) overlaps with soils areas that are "not meeting" land health standards, could it be that if the area around the current winter concentration was closed to motorized/mechanized travel during the winter months (Nov April) that the pronghorn might naturally gravitate to the surrounding healthier land (slightly healthier)? I believe it would be a worthwhile experiment. The result might be a stronger pronghorn population. Routes 3139, 2323 and 3140 appear to be right beside the winter area and it might be helpful to the pronghorn population to close them. The County might be willing to consider a winter closure of their road on the north side of the area, as it might have two benefits the economic draw of watchable wildlife from a larger pronghorn population and saving maintenance from mud damages to their road.

## Route: 314

### Segment: 2503

#### Designation [?](#)

##### Current Designation

Foot/Horse/Mechanized/Motorcycle

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands

- RECREATION Recreation access for the Old Spanish National Historic Trail
- RIPARIAN Riparian 11 stream crossings
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

## Rationale

### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

The following high value recreational routes/roads are legal RS 2477ROW's in the State of Colorado, Delta County, and the BLM does not have the jurisdiction to close them: 3011, 2184, 2191, 3100, 2187, 2026, 2059, 2188, 2192, 3104, 2130, 3009, 2199, 2200, 2111, 2223, 2024, 3006, 2231, 3094, 2579, 2210, 2344, 2243, 2249, 2248, 3074, 2354, 2384, 2296, 2295, 2287, 2304, 2062, 2163, 3163, 2164, 2430, 4006, 3016, 2351, 3140, 2410, 4008, 2324, 2073, 2306, 2459, 3192, 3193, 2350, 2443, 2035, 2336, 2495, 2491, 2159, 3058, 2277, 2465, 2467, 3189, 2472, 2297, 2006, 2265, 2271, 2276, 2135, 2139, 3053, 2489, 3033, 3057, 2031, 2276, 2210, 2579, 2136, 2344, 3164, 2400, 2379, 3014, 2365, 3116, 2251, 2259, 2149, 2153, 2146, 2144, 2145, 2356, 2257, 2048, 2358, 3165, and 3166.

## Route: 3141

### Segment: 983

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- Needs Data - Cultural

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- CULTURAL Cultural Indirect impact
- SMAs River Rims ACEC
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E
- SSPLANT Special Status Species Colorado hookless cactus

#### Rationale

##### Designation Criteria

- Minimize Damage:** Cactus – reduce density within 200m, Cultural – SSR within 100m sites
- Minimize Harassment:** PPSV- Minimize fragmentation
- Wilderness / Natural Area:** ACEC-River Rims close within 200m cactus

##### Rationale for Decision

- Route was designated to reduce the density of routes within 200 meters of known Colorado hookless Cactus occurrences.
- Route was designated to minimize impacts to cultural resources.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect Colorado hookless cactus within the River Rims ACEC

## Public Comments On Route: 3141

Organization, commenter: Escalante Ranch, Richard Miller

Comment ID: 000000171-7

• IV. TRANSPORTATION AND TRAVEL MANAGEMENT Mr. Miller's owns various parcels of private property and multiple water diversions in the area in question, and must access these lands via roads and trails which currently cross public land. In addition, Mr. Miller must necessarily access various roads and trails to in the course of managing his livestock operation. The EIS proposes closing various roads and trails to public motorized travel, to minimize resource damage caused by the public on both public and private lands. EIS at 157, 187. Mr. Miller supports the BLM's proposal to restrict public access to protect public and private property, but only so long as he is not restricted from using these roads as may be necessary to access his private lands and manage his livestock operation. Thus, to the extent that the BLM wishes to close roads to motorized public traffic, it should simultaneously grant Mr. Miller legal, administrative access. In addition, Mr. Miller notes that he would be entitled to a formal decision, subject to appeal, prior to the BLM restricting access to his private property and/or otherwise impacting his livestock operation. Mr. Miller notes that the BLM has mis-classified many routes. See EIS Map N -1 e. Specifically, many routes which have historically been used to access private land and water diversions, and/or are necessary to maintain livestock improvements or otherwise manage and operate Mr. Miller's livestock operation, have been incorrectly labeled as closed or otherwise restricted in their use. These routes should be classified as "administrative," to recognize these historic uses and to allow for continued uses consistent therewith. The routes which have been incorrectly classified and which should be classified as "administrative" are as follows: Routes 460, 1220, 1243, 1245, 2003, 2053, 2073, 2086, 2089, 2121, 2122, 2126, 2156, 2166, 2168, 2171 - 2172, 2177, 2180, 2336, 2342, 2354, 2408, 2412, 2445, 2581, 2582, 2583, 2585, 2587, 2588, 2590, 2591, 2593, 2595, 2596, 2598, 2599, 2612, 2613, 2622, 2691, 3011, 3048, 3070, 3131, 3141, and 3158. See EIS Map N-1e. In addition, Route 2072 is not completely depicted on the map, in that it extends down the river, across BLM and private property, an additional 2-3 miles, and likewise Route 3048 extends an additional 0.75 miles and leads to private property. Id. Fina Uy, Map N-1e incorrectly labels Mr. Miller's privately owned bridge, which crosses the Gunnison River at the Bridgeport area, as "administrative." I d. Mr. Miller requests that the BLM correct these errors and mis-classifications.

## Route: 3143

### Segment: 486

#### Designation

##### Current Designation

Admin/Permitted Use Only

## Mitigation Criteria

- No Mitigation Criteria for this Route Segment

## Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- SOIL Soils Fragile
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches <60 acres

## Rationale

### Designation Criteria

- **No designation criteria for this route segment.**

### Rationale for Decision

- Route was designated to ensure access to rights-of-way, private property, and livestock grazing facilities.

## Public Comments On Route: 3143

Organization, commenter: Widefield School District 3, Terry Kimber

Comment ID: 000000046-2

• Road 2166: (Bad Point Rd) The Wilderness area has cut off this road only mile from the end of the road. This is a law enforcement nightmare. Let's not do that again in the NCA. Road 2166 in option E is ATV only to that point but can be driven by vehicle down to the big rock hill safely and easily. This location is called Jerry's Hole. One of our favorite hunting spots when there is water or weather. I recommend making the trail ATV only from that point rather than from road 2089. Road 2089: This road is seldom used yes but is very necessary to retrieve downed game from the back of Jerry's Hole. I recommend that a downed game by ATV designation for this and many other of the trails and roads that are proposed to be closed in the areas where hunting is a significant factor from August to November. Road 3143: (Sowbelly Ridge) Should be designated Downed Game ATV to the border of the wilderness area.

• Sowbelly Ridge: This is an area which my family and I have hunted for decades. We are meat hunters, not sport hunters, and depend on the elk, deer and bear meat we get to supplement our food supply through the winter. It has become increasingly difficult to get to where the animals are because of roads which have already been closed. I would ask that roads numbered 2571, 2597, 2598, 2601, 3162, 2089, and 2166 remain open. We need roads to help in game retrieval. This area is usually still "t-shirt" weather in October when we hunt, which means very warm temperatures. If an animal is left for too long in that weather, it will spoil if it isn't skinned, gutted and transported as soon as possible to a meat locker. We typically get the meat out of the back country where it was killed and get it to camp to hang overnight and then immediately take it to GJ to a meat locker. We don't "road hunt"; we take our ATVs to the edge our hunting area and then start walking usually all day and for many miles. Even if we are lucky enough to get our game, none of us, even young, strong guys, can carry more than a quarter of an elk at a time very far, as has been suggested. This would mean 4 trips to carry an animal out and it can't be done before the meat spoils. So which law should we break? The law that says you can't use an ATV on an existing road to retrieve game or the law that says you can't waste meat without facing a stiff fine? These roads are currently open and I ask that they remain open for game retrieval using ATVs: 2168, 2122, 2121, 2169 & 2170, 2596, 2171, 2003, 3145, 2182, 2179, 2178, 3143 and 2181.

• Escalante Rd/Dry Mesa Rd, Sawmill Mesa Rd & 25 Mesa Rd areas: Due to hunting access use, and OHV recreation, I would like to see trail #'s 2166, 2168 & 2122, which are currently open to atv use, remain open to access as they currently are today. Other trails I'd like to see remain open as currently are, for same purposes, are #2169, 2596, 2171, 2003, 2122, 3145, 2182, 2179, 2178, 3143, 2181. These roads & trails are important to hunting access. Between Dry Mesa Rd & Sawmill Mesa Rd, I'd like for trails #'s 2243, 2244, 2248, 2249 and 2136 to remain open for atv use, as they currently are. These trails provide alternative route vs. having to travel on the main access roadways (Sawmill Mesa or Dry Mesa) and provide unique OHV recreation value for the activity I love to participate in. Alternative B & E designate these for horse and foot traffic and I'd like to see them remain open to atv activity as they currently are today. Trail # 2006, 2299, 2298, 2297 are slated for closure in Alt's B & E, but perhaps those would make a good horse/foot route vs. closure.

• Sowbelly Ridge Route 2537, 3096, 2182 2179, 3143 along Sowbelly Ridge dead ends at the wilderness and should be closed to ATVs, but possibly kept open for 4WD hunting access and horse back use, to preserve nonmotorized hunting opportunities and its remote setting, in accordance with the guidance above

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 3144

### Segment: 459

#### Designation

##### Current Designation

Open (All modes of travel)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches >60 acres

#### Rationale

##### Designation Criteria

- No designation criteria for this route segment.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open (All modes of travel)

**Alternative C:** Closed (Rehab)

**Alternative D:** Open, seek re-route or mitigation

• Sowlbelly Ridge: This is an area which my family and I have hunted for decades. We are meat hunters, not sport hunters, and depend on the elk, deer and bear meat we get to supplement our food supply through the winter. It has become increasingly difficult to get to where the animals are because of roads which have already been closed. I would ask that roads numbered 2571, 2597, 2598, 2601, 3162, 2089, and 2166 remain open. We need roads to help in game retrieval. This area is usually still "t-shirt" weather in October when we hunt, which means very warm temperatures. If an animal is left for too long in that weather, it will spoil if it isn't skinned, gutted and transported as soon as possible to a meat locker. We typically get the meat out of the back country where it was killed and get it to camp to hang overnight and then immediately take it to GJ to a meat locker. We don't "road hunt"; we take our ATVs to the edge our hunting area and then start walking usually all day and for many miles. Even if we are lucky enough to get our game, none of us, even young, strong guys, can carry more than a quarter of an elk at a time very far, as has been suggested. This would mean 4 trips to carry an animal out and it can't be done before the meat spoils. So which law should we break? The law that says you can't use an ATV on an existing road to retrieve game or the law that says you can't waste meat without facing a stiff fine? These roads are currently open and I ask that they remain open for game retrieval using ATVs: 2168, 2122, 2121, 2169 & 2170, 2596, 2171, 2003, 3145, 2182, 2179, 2178, 3143 and 2181.

• Escalante Rd/Dry Mesa Rd, Sawmill Mesa Rd & 25 Mesa Rd areas: Due to hunting access use, and OHV recreation, I would like to see trail #'s 2166, 2168 & 2122, which are currently open to atv use, remain open to access as they currently are today. Other trails I'd like to see remain open as currently are, for same purposes, are #2169, 2596, 2171, 2003, 2122, 3145, 2182, 2179, 2178, 3143, 2181. These roads & trails are important to hunting access. Between Dry Mesa Rd & Sawmill Mesa Rd, I'd like for trails #'s 2243, 2244, 2248, 2249 and 2136 to remain open for atv use, as they currently are. These trails provide alternative route vs. having to travel on the main access roadways (Sawmill Mesa or Dry Mesa) and provide unique OHV recreation value for the activity I love to participate in. Alternative B & E designate these for horse and foot traffic and I'd like to see them remain open to atv activity as they currently are today. Trail # 2006, 2299, 2298, 2297 are slated for closure in Alt's B & E, but perhaps those would make a good horse/foot route vs. closure.

• Loop 2178 and spur 3145 need to be closed and obliterated as duplicative, user-created and serving no purpose. Dense networks of ATV trails have already been designated in portions of the GJFO such as North Desert and Bangs Canyon where they are much better located near urban centers. Permanently designating ATVs routes in these remote areas will downgrade the quiet and solitude needed by wildlife and by quiet users fleeing an increasingly noisy and urbanized society

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowlbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez-Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 3146

### Segment: 1058

## Designation

### Current Designation

Open (All modes of travel)

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- WILDLIFE Pronghorn antelope winter concentration areas
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- **Recreation:** Rec opportunities - specific

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

## Public Comments On Route: 3148

Organization, commenter: COPMOBA, Scott Winans

Comment ID: 000000168-2

• Hunting GroundsIn the Hunting Grounds area, a longer distance trail similar to Kokopelli's, Tabeguache, and Paradox Trails, would be of interest to this user group[COPMOBA]. Starting at the Old Spanish Trail in Orchard Mesa and ending in Delta, this trail idea is currently feasible when using a mix of single track, ATV width trail, jeep road and even Highway 50 for a few short sections. With very little trail construction making some connections to existing trails, nearly all of this highway use can be avoided. The major attraction of this area is the views from the rim above the Gunnison River in both directions. The existing trail and any trail construction should be routed to take advantage of this valuable view resource. The following recommendations are in the spirit of developing this long distance trail. Starting from the Kannah Creek area we recommend leaving 152 open to mountain bike use for a possible future connection to the lower Kannah Creek road. Possibilities included deeded access across private land, or new construction from the existing small portion of BLM land which the road accesses. Continuing, use existing full size and ATV trail to the end of 440, or a portion of 431, to access small drainage and then construct new trail to access Bridgeport Road. Then use 438, 449 and 2163 to access 2426 and 2427 to Dominguez Road (or 3098 and 3163 and then a very short new connector to 3133 out to highway) From Dominguez Road use 4000 to 3043, then single track 4001,4005,4006,4007 and 3148 to reach Escalante Road. Very nice views exist in this area from the trail. The trail would then cross Escalante road to 2073 with a connection being built to 2053. This short deviation from the Escalante road would provide a safer route for mountain bikes than the twisty road with blind corners and high speed full size vehicles. The trail would cross the river on main bridge and immediately turn left and follow 2313, 2461 and 2462 with a connection to Delta via 2352, 470 2476 and 2489. This area using borders of the northern most point of the Escalante Rim, south to the Rim Road then using 2354 as the border on the west, the main county road on the east and then back down to the rim above river on the north would provide an excellent mountain bike emphasis area for the Delta community. Visitors and local users could ride from town or drive a very short distance. Quiet Use trails are rare in this area and this topography would allow for a rewarding experience for hiker, horse and mountain bike users. This scenario would provide an area similar to the Lunch Loops and Mack Ridge areas. With a long distance rail anchoring a Quiet Use stack loop system of trails which are extremely popular and very beneficial to users and the community at trail at large

## Route: 3149

### Segment: 756

### Designation

#### Current Designation

Closed (Rehab)

#### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

#### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- SSPLANT Special Status Species Colorado hookless cactus

## Rationale

### Designation Criteria

- **Minimize Damage:** Cactus – reduce density within 200m
- **Minimize Harassment:** PPSV- Minimize fragmentation, Bighorn – SSR -- summer range

### Rationale for Decision

- Route was designated to reduce the density of routes within 200 meters of known Colorado hookless Cactus occurrences.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to reduce the miles of motorized and mechanized routes in bighorn sheep habitat.

## Public Comments On Route: 3150

Organization, commenter: Desert Ecosystem Analysis and Restoration, Eric Rechel

Comment ID: 000000109-10

- Need to close roads that approach prairie dog colonies or make them administrative or have seasonal closures, i.e., in the spring. Examples are roads 2350 and 2349 in the Hunting ground and road 3140

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 000000135-28

- I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 3152

### Segment: 754

#### Designation

##### Current Designation

Open (All modes of travel)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density medium in Alt A
- DENSITY Route density medium in Alt E

#### Rationale

##### Designation Criteria

- No designation criteria for this route segment.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

### Previous Alternatives Analyzed

## Public Comments On Route: 3154

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 00000135-25

• Sawmill Mesa Moving south to the CDOW parcel, the BLM should work with the BLM to close numerous user-created routes in the Sawmill Mesa, Grade Gulch and Mud Springs area. The CDOW road leading north east to Cactus Park has numerous random, unplanned spurs and duplicative routes branching off, which need to be closed. Only the main, historically-used arteries should remain open to preserve these remote vistas and natural soundscapes. Routes to be closed and obliterated are: 2273=2139-2696; 2141, 3138, 3135, along with other spurs off the Peach Orchard Point Road 2270, including 3126, 2271, 2272. 2270 all of which should be closed to maintain silent open space quality of this point. Other routes needing closure off the CDOW road are: 2261, 2259, 3002, 3090, 2260, 2051, 2258, 2259, 3154, 2233, 2263, 2254, 3031, 3109, 2134, 2255, 2257, 2250,

## Public Comments On Route: 3158

Organization, commenter: Karen Green

Comment ID: 00000091-6

• Escalante Canyon: Roads numbered 3070, 3071 should remain open and 3011 should be reopened and all others should remain open for campsites. Road number 3158 is not even listed on Alt. E, but should remain open. I would also state that closing all the small campsites along the canyon road from the river and for the next 16 miles (not including private land) is not necessary or a good idea. I absolutely do not support any plan to make a paid camp ground in that area. Part of the beauty of going there is the various sites available for those of us wishing to escape next door neighbors

Organization, commenter: Escalante Ranch, Richard Miller

Comment ID: 000000171-7

IV. TRANSPORTATION AND TRAVEL MANAGEMENT Mr. Miller's owns various parcels of private property and multiple water diversions in the area in question, and must access these lands via roads and trails which currently cross public land. In addition, Mr. Miller must necessarily access various roads and trails to in the course of managing his livestock operation. The EIS proposes closing various roads and trails to public motorized travel, to minimize resource damage caused by the public on both public and private lands. EIS at 157, 187. Mr. Miller supports the BLM's proposal to restrict public access to protect public and private property, but only so long as he is not restricted from using these roads as may be necessary to access his private lands and manage his livestock operation. Thus, to the extent that the BLM wishes to close roads to motorized public traffic, it should simultaneously grant Mr. Miller legal, administrative access. In addition, Mr. Miller notes that he would be entitled to a formal decision, subject to appeal, prior to the BLM restricting access to his private property and/or otherwise impacting his livestock operation. Mr. Miller notes that the BLM has mis-classified many routes. See EIS Map N -1 e. Specifically, many routes which have historically been used to access private land and water diversions, and/or are necessary to maintain livestock improvements or otherwise manage and operate Mr. Miller's livestock operation, have been incorrectly labeled as closed or otherwise restricted in their use. These routes should be classified as "administrative," to recognize these historic uses and to allow for continued uses consistent therewith. The Routes which have been incorrectly classified and which should be classified as "administrative" are as follows: Routes 460, 1220, 1243, 1245, 2003, 2053, 2073, 2086, 2089, 2121, 2122, 2126, 2156, 2166, 2168, 2171 ~ 2172, 2177, 2180, 2336, 2342, 2354, 2408, 2412, 2445, 2581, 2582, 2583, 2585, 2587, 2588, 2590, 2591, 2593, 2595, 2596, 2598, 2599, 2612, 2613, 2622, 2691, 3011, 3048, 3070, 3131, 3141, and 3158. See EIS Map N-1e. In addition, Route 2072 is not completely depicted on the map, in that it extends down the river, across BLM and private property, an additional 2-3 miles, and likewise Route 3048 extends an additional 0.75 miles and leads to private property. Id. Fina Uy, Map N-1e incorrectly labels Mr. Miller's privately owned bridge, which crosses the Gunnison River at the Bridgeport area, as "administrative." Id. Mr. Miller requests that the BLM correct these errors and mis-classifications.

Organization, commenter: Escalante Ranch, Kent Davis

Comment ID: 00000192-43

- Route number 3158. Cannot be closed a citizen access to irrigation structures as well as the little closed road close to it without any number.

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 00000135-28

- I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 3159

### Segment: 586

#### Designation

##### Current Designation

Closed (Not Rehabbed)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk severe winter range
- RIPARIAN Riparian 1 stream crossing
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Indirect impact
- DENSITY Route density medium in Alt A
- DENSITY Route density medium in Alt E
- VEGETATION Sagebrush patches <60 acres

#### Rationale

##### Designation Criteria

- **Minimize Harassment:** PPSV- Minimize fragmentation, Sage-Minimize fragmentation

##### Rationale for Decision

- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to reduce fragmentation of sagebrush patches

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open (All modes of travel)

**Alternative C:** Closed (Rehab)

**Alternative D:** Open (All modes of travel)

## Route: 316

### Segment: 2426

#### Designation

## Current Designation

Closed (Rehab)

## Mitigation Criteria

- No Mitigation Criteria for this Route Segment

## Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

## Rationale

### Designation Criteria

- **Minimize Damage:** NHT – close routes for setting, Fragile soils SSR
- **Minimize Harassment:** PPSV- Minimize fragmentation

### Rationale for Decision

- Route was designated to improve natural setting along the Old Spanish National Historic Trail.
- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to reduce fragmentation in Priority Vegetation types

## Previous Alternatives Analyzed

• Sowlbelly Ridge: This is an area which my family and I have hunted for decades. We are meat hunters, not sport hunters, and depend on the elk, deer and bear meat we get to supplement our food supply through the winter. It has become increasingly difficult to get to where the animals are because of roads which have already been closed. I would ask that roads numbered 2571, 2597, 2598, 2601, 3162, 2089, and 2166 remain open. We need roads to help in game retrieval. This area is usually still "t-shirt" weather in October when we hunt, which means very warm temperatures. If an animal is left for too long in that weather, it will spoil if it isn't skinned, gutted and transported as soon as possible to a meat locker. We typically get the meat out of the back country where it was killed and get it to camp to hang overnight and then immediately take it to GJ to a meat locker. We don't "road hunt"; we take our ATVs to the edge our hunting area and then start walking usually all day and for many miles. Even if we are lucky enough to get our game, none of us, even young, strong guys, can carry more than a quarter of an elk at a time very far, as has been suggested. This would mean 4 trips to carry an animal out and it can't be done before the meat spoils. So which law should we break? The law that says you can't use an ATV on an existing road to retrieve game or the law that says you can't waste meat without facing a stiff fine? These roads are currently open and I ask that they remain open for game retrieval using ATVs: 2168, 2122, 2121, 2169 & 2170, 2596, 2171, 2003, 3145, 2182, 2179, 2178, 3143 and 2181.

• we appreciate the route closures in the preferred alternative. However, as you will see in our attached 2011 route-specific comments, we are concerned about the routes left open in the draft TMP that we and others had recommended for closure, in particular: o The two ATV trails (Numbers 3162/2089/2166, and 2596/2171/2003) in the Dominguez Addition Unit that need to be closed a) to protect this unit and b) to prevent the likelihood of incursions into the Dominguez wilderness, due to remote, unmanageable and unenforceable terrain. o Palmer Gulch road #2169/2170, needs to be closed. o Road #2181 needs to be closed to OHVs. o 1778/1727 o 1782/1768/2602 in Sawmill Mesa and Wagon Park zonos 1756 should be closed at the junction with 1758, and include closure of roads 1593 and 1585

• Manage Gunnison Slopes Unit and Dominguez Addition Unit as Lands with Wilderness Characteristics ERMA status for Gunnison Slopes is a good start, but it needs the additional protection as a LWC as well. Dominguez Addition also needs to be included as a LWC, and the two ATV routes currently open in the preferred Alternative (roads 3162/2089/2166, and 2596/2171/2003) definitively closed to maintain this area's wild character

• Comments on Travel Management Plan The following comments are based upon my review of the Map of Route by Route Designations for Alternative E (Map N-1E) in relationship to the resource management goals and objectives of the NCA. As previously stated, we are concerned that wilderness characteristics within the Dominguez Addition Unit would be highly impacted by the preferred alternative through the inclusion of two ATV trails within the Unit. Both of these ATV trails are currently low-standard two-track roads that extend into the Dominguez Wilderness. The preferred alternative would restrict the use of these roads to ATV's and the trails would theoretically dead end at the Wilderness boundary. Even if ATV riders did respect the Wilderness boundary, these motorized trails would degrade the wilderness values of the Dominguez Addition Unit. For this reason we are recommending that these two roads (roads 3162/2089/2166, and 2596/2171/2003) be converted to non-motorized trails to provide big game solitude, backcountry hunting, and quiet recreation use opportunities.

• Two other units with wilderness characteristics occur within the D-E NCA that are not included within the preferred alternative. Wilderness characteristics within the Gunnison Slopes Unit appear to have been largely protected through management of this area as an ERMA that would emphasize equestrian and hiking trail activities and dispersed camping. This management strategy seems reasonable to provide camping opportunities along the Gunnison River to accommodate boating use on the river while maintaining an overall primitive setting. However, wilderness characteristics within the Dominguez Addition Unit would be highly impacted by the preferred alternative through the inclusion of two ATV trails within the Unit. Both of these ATV trails are currently low-standard two-track roads that extend into the Dominguez Wilderness. The preferred alternative would restrict the use of these roads to ATV's and the trails would theoretically dead end at the Wilderness boundary. Even if ATV riders did respect the Wilderness boundary, these motorized trails would degrade the wilderness values of the Dominguez Addition Unit. For this reason we are recommending that these two roads (roads 3162/2089/2166, and 2596/2171/2003) be converted to non-motorized trails to provide big game solitude, backcountry hunting, and quiet recreation use opportunities

I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowlbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and

needs to be returned to its previous condition by comprehensive route closures.All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 3163

### Segment: 1469

#### Designation

##### Current Designation

Closed (Not Rehabbed)

##### Designation Following Mitigation

Vehicles under 50" wide

##### Mitigation Criteria

- Needs Data - SSS Plants
- Potential connection to 2062.

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- SOIL Soils 25% to 40% Slopes
- CULTURAL Cultural Indirect impact
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E
- SSPLANT Special Status Species Colorado hookless cactus

#### Rationale

##### Designation Criteria

- Recreation:** RMA objectives, Rec opportunities – general
- Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Vehicles under 50" wide

**Alternative B:** Foot/Horse

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed, seek re-route or mitigation

• Hunting Grounds In the Hunting Grounds area, a longer distance trail similar to Kokopelli's, Tabeguache, and Paradox Trails, would be of interest to this user group [COPMOBA]. Starting at the Old Spanish Trail in Orchard Mesa and ending in Delta, this trail idea is currently feasible when using a mix of single track, ATV width trail, jeep road and even Highway 50 for a few short sections. With very little trail construction making some connections to existing trails, nearly all of this highway use can be avoided. The major attraction of this area is the views from the rim above the Gunnison River in both directions. The existing trail and any trail construction should be routed to take advantage of this valuable view resource. The following recommendations are in the spirit of developing this long distance trail. Starting from the Kannah Creek area we recommend leaving 152 open to mountain bike use for a possible future connection to the lower Kannah Creek road. Possibilities included deeded access across private land, or new construction from the existing small portion of BLM land which the road accesses. Continuing, use existing full size and ATV trail to the end of 440, or a portion of 431, to access small drainage and then construct new trail to access Bridgeport Road. Then use 438, 449 and 2163 to access 2426 and 2427 to Dominguez Road (or 3098 and 3163 and then a very short new connector to 3133 out to highway) From Dominguez Road use 4000 to 3043, then single track 4001, 4005, 4006, 4007 and 3148 to reach Escalante Road. Very nice views exist in this area from the trail. The trail would then cross Escalante road to 2073 with a connection being built to 2053. This short deviation from the Escalante road would provide a safer route for mountain bikes than the twisty road with blind corners and high speed full size vehicles. The trail would cross the river on main bridge and immediately turn left and follow 2313, 2461 and 2462 with a connection to Delta via 2352, 470 2476 and 2489. This area using borders of the northern most point of the Escalante Rim, south to the Rim Road then using 2354 as the border on the west, the main county road on the east and then back down to the rim above river on the north would provide an excellent mountain bike emphasis area for the Delta community. Visitors and local users could ride from town or drive a very short distance. Quiet Use trails are rare in this area and this topography would allow for a rewarding experience for hiker, horse and mountain bike users. This scenario would provide an area similar to the Lunch Loops and Mack Ridge areas. With a long distance rail anchoring a Quiet Use stack loop system of trails which are extremely popular and very beneficial to users and the community at trail at large

The following high value recreational routes/roads are legal RS 2477 ROW's in the State of Colorado, Delta County, and the BLM does not have the jurisdiction to close them: 3011, 2184, 2191, 3100, 2187, 2026, 2059, 2188, 2192, 3104, 2130, 3009, 2199, 2200, 2111, 2223, 2024, 3006, 2231, 3094, 2579, 2210, 2344, 2243, 2249, 2248, 3074, 2354, 2384, 2296, 2295, 2287, 2304, 2062, 2163, 3163, 2164, 2430, 4006, 3016, 2351, 3140, 2410, 4008, 2324, 2073, 2306, 2459, 3192, 3193, 2350, 2443, 2035, 2336, 2495, 2491, 2159, 3058, 2277, 2465, 2467, 3189, 2472, 2297, 2006, 2265, 2271, 2276, 2135, 2139, 3053, 2489, 3033, 3057, 2031, 2276, 2210, 2579, 2136, 2344, 3164, 2400, 2379, 3014, 2365, 3116, 2251, 2259, 2149, 2153, 2146, 2144, 2145, 2356, 2257, 2048, 2358, 3165, and 3166.

## Route: 3164

### Segment: 461

#### Designation [?](#)

##### Current Designation

Foot/Horse/Mechanized/Motorcycle

##### Mitigation Criteria

- Reroute
- move to the edge of sagebrush park

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- SOIL Soils Steep Slopes 40%
- SOIL Soils Fragile
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk severe winter range
- RIPARIAN Riparian 1 stream crossing
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches <60 acres

#### Rationale

##### Designation Criteria

- **Recreation:** RMA objectives
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Foot/Horse/Mechanized/Motorcycle

**Alternative B:** Open, seek re-route or mitigation

**Alternative C:** Closed (Rehab)

**Alternative D:** Foot/Horse/Mechanized/Motorcycle

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 3165

## Segment: 301

### Designation ?

#### Current Designation

Open, seek re-route or mitigation

#### Mitigation Criteria

- Reroute
- move to the edge of Sagebrush park. Steep slopes issue; ensure a maintenance priority.

#### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- SOIL Soils Steep Slopes 40%
- SOIL Soils Fragile
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk severe winter range
- RIPARIAN Riparian 1 stream crossing
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I moderate
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches <60 acres

### Rationale

#### Designation Criteria

- No designation criteria for this route segment.

#### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open (All modes of travel)

**Alternative C:** Open, seek re-route or mitigation

**Alternative D:** Open (All modes of travel)

• The following high value recreational routes/roads are legal ROW's in the State of Colorado, Mesa County and the BLM does not have the jurisdiction to close them: 500, 472, 518, 521, 530, 39, 127, 572, 566, 66, 65, 148, 71, 74, 587, 595, 608, 622, 628, 635, 624, 609, 611, 706, 678, 700, 719, 726, 696, 26, 936, 847, 849, 919, 767, 824, 96, 822, 817, 950, 1021, 900, 2682, 1020, 1003, 1084, 1142, 1184, 1156, 1198, 1349, 1308, 1310, 1238, 1263, 1122, 1170, 1192, 974, 941, 1076, 1039, 1018, 1759, 1764, 1758, 1174, 1788, 1798, 1669, 1699, 1773, 1755, 1779, 1750, 1751, 1792, 1720, 1726, 1727, 1720, 1722, 1803, 1805, 1809, 1614, 1609, 1605, 1608, 1571, 1526, 1516, 1448, 755, 807, 900, 10, 48, 924, 950, 1005, 965, 8, 1115, 981, 984, 1135, 2678, 1249, 1171, 1150, 1249, 1320, 1235, 1236, 1228, 1227, 1409, 1456, 1349, 1308, 1513, 1221, 1550, 1567, 1641, 1612, 1740, 1688, 2597, 2598, 2601, 2440, 3160, 3162, 2089, 2166, 2170, 2596, 2171, 2003, 2122, 2126, 2189, 3145, 2182, 2179, 2178, 3143, 2181, 2121, 2122, 2168, 2126, 2180, 2095, 2173, 2174, 2620, 2129, 1686, 1692, 1667, 1647, 1631, 1613, 1596, 1549, 1541, 2647, 1633, 1605, 1608, 1571, 2645, 1507, 1448, 1496, 1516, 1504, 1510, 1508, 1509, 439, 431, 456, 461, 460, 391, 423, 415, 419, 407, 402, 367, 372, 339, 298, 338, 105, 368, 374, 393, 389, 390, 376, 377, 351, 350, 121, 345, 320, 301, 251, 234, 232, 205, 344, 107, 103, 152, 153, 161, 168, 3199, 188, 196, 255, 254, 236, 294, 242, 219, 201, 169, 162, 158, 160, 173. • I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness.Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can

be managed and enforced by the BLM within its limited resources.As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use.The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles.What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures.All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 3167

### Segment: 500

#### Designation [?](#)

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I low
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- Minimize Harassment:** PPSV- Minimize fragmentation, Bighorn – SSR -- summer range

##### Rationale for Decision

- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to reduce the miles of motorized and mechanized routes in bighorn sheep habitat.

#### Previous Alternatives Analyzed

#### Designation

##### Current Designation

Foot/Horse

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- SOIL Soils Steep Slopes 40%
- SOIL Soils Fragile
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk severe winter range
- WILDLIFE Big game winter concentration areas
- WILDLIFE Big game summer concentration areas
- CULTURAL Cultural Indirect impact
- GEOPALEO Paleontological direct impact
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Minimize Damage:** Geo/paleo – SSR in key sites, Cultural – SSR within 100m sites
- **Recreation:** Rec opportunities – general, RMA objectives
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

### Public Comments On Route: 3169

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 00000135-26

- Cottonwood Creek This creek is a rare example of an almost completely unroaded, untrailed stream corridor for most of its length until it reaches Roubideau Creek and the Gunnison River. Unplanned, damaging routes along Cottonwood Creek upstream near the Forest Service boundary should all be closed to create an undisturbed full stretch of riparian corridor. Randomly created routes needing closure are: 2152, 2149, 2147, 2148, 2439, 2153, 2154, 2156. Closing these routes would restore a relatively intact watershed. Routes needing closure at the northern end of Cottonwood Creek, for the same reason, are: 3087, 3088, 3082, 3083, 3080, 3015, 2370, 2089, 2100, 3079, 3047, 2396, 2013, 3128, 3169, 2014, 2162, 2160, 2493, 3005. Some of these routes spur off 25 Mesa Road and do not actually enter the Cottonwood Creek drainage, but most if not all are not purposely created, not planned, are randomly scarring the landscape, and are introducing difficult to enforce ORV use. Only a few, if any should be left open, that have an overriding need and purpose. All the user-created routes descending into Cottonwood Creek should be closed, including 2100, 2370, 2099, and the whole tangle of routes 3169, etc etc

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 317

### Segment: 2463

#### Designation ?

##### Current Designation

Vehicles under 50" wide

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- CULTURAL Cultural Indirect impact
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

#### Rationale

##### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Public Comments On Route: 317

Organization, commenter: Tracey Rohde

Comment ID: 000000103-1

• I've been involved in the "process" of this NCA since long before the D-E NCA designation. "The Hunting Grounds" area is very personal and dear to me, so I'd like to share a little of my background and how it ties into where we are today. I'd been coming to Grand Junction since 1992, to enjoy the BLM public land opportunities of OHV use, while living in the Denver area. Close to home, solitary, public land opportunities did not exist near Denver. After a couple visits per year to the valley throughout the 1990's, I thought Grand Junction would be a great place to live. I began looking for acreage in/around the valley. When the realtor showed me a 40 acre parcel for sale, accessed via Bean Ranch Road, I had already looked at several others, from Debeque to Glade Park. When I arrived at this said parcel for sale, I said "this is THE one!" In Feb. 2001, I purchased the 40 acre parcel of dry land, which was (and still is) bordered by BLM land on 3 sides. (Note, this mentioned BLM land is now within the D-E NCA Hunting Grounds area.) In Sept. 2002 I made the move to Grand Junction, and in March of 2003 my home was completed and I was able to move onto my 40 acres. The dream I'd so looked forward to achieving was made a reality, as my preferred outdoor recreation activity was (and still is) OHV use, although I enjoy many other types of outdoor recreation. I now had the ability to leave my driveway, on my OHV, and explore diverse trails and see beautiful scenery and wildlife. Let me also mention that being able to reside on this 40 acres wasn't an easy endeavor, however, it was a choice that meant financial and life altering sacrifices, to be able to enjoy the recreation opportunities this location had to offer. One major note supporting that is that there is no piped/city water beyond where you crest the top of the hill of Bean Ranch Rd. All the homes located on the back side of Bean Ranch Rd do not have piped/city drinking water, so those home owners have either drilled a well (minimal) or use cisterns and haul, or have delivered, potable water. Let me tell you, this takes planning & some conditional living. But those are things I was willing to deal with, to occupy a residence in this great area of BLM recreation opportunities that I so desired, and to achieve my personal dreams of living "out of the city" for mental well being. When I first discovered my passion for OHV use, I rode a dirt bike. After about 13 years of riding dirt bikes, I tried atv-ing and discovered I could pack my rack with supplies for a days' outing (or more), and be gone on the trail, enjoying what there was to be seen! Soon after moving to the valley, I joined the WSATVA and made several friends who were atv-ers, so that has been my main OHV method for the past 12 years. Although WSATVA did welcome me in the beginning, as a dirt biker! For years, I have been able to leave my Bean Ranch Rd property, on or in my OHV of choice, and explore the existing diverse roads and trails, within the area known as The Hunting Grounds. These roads & trails lead to spectacular viewing accesses of the Gunnison River, from the canyon edge. There are also railroad track & tunnel views, and the majestic sites of the Dominguez Canyon Wilderness area and Cactus Park across the river. I have taken many friends and family to see these splendorous sites, when they have visited. I'd also like to include that any specific trail #'s that I do not mention, that are not currently listed as potential closures on Alternatives B or E, I want to remain open. I do not mention trails which I did not find threatened for closure. My desire is for The Hunting Grounds area for the existing roads and trails to remain open and to remain as multi-use. I will also acknowledge the need for protecting precious resources within this area. While attending many meetings leading up to the DRMP being executed, I found it somewhat frustrating, and perhaps aggravating, to learn how many people didn't even know of The Hunting Grounds existence until the D-E NCA designation came and the RMP process that has followed. And I'm just amazed at how now those folks who have newly experienced it, want use specific trails with government rules and regulations to be put into place regarding the do's and don'ts. Then, to hear those folks' comments to recommend adding staging areas, with information kiosks, bathrooms, and improved parking areas is just jaw dropping to me. Prior to the past 4-5 years, very few Mesa County residents and mostly local residents of Bean Ranch Road & Whitewater area had knowledge about The Hunting Grounds zone, and its spectacular BLM recreation opportunities, which currently include multi-use activities on roads and trails. I've come to learn that it was not ok, for the residents who live in that area, who sought land for their homes to be built on, to have driveway access to enjoy activities they love, and not ok to be privy to this area without the rest of Mesa County and beyond knowing also. I guess that goes with "if you build it, they will come" motto. I also find the requests for use specific trails, vs. multi-use, for reason of user conflicts and desire for quiet use trails un-necessary, as if anyone has spent any time in The Hunting Grounds area, you will find this is not a highly used public area, and if you even see other users, it is a minimal and infrequent experience. I do know that the residents who live in that area, want all existing trails to remain open and to multi-use. As we all know, "Alternative A", no change", really isn't a real alternative for this future planning, right? Alternative A would be my first choice for the future of this area. Leave it as it is, because it IS NOT BROKEN! In attempting to navigate the D-E NCA DRMP website, I thought in public meetings, Katie Stevens had said you could click on a trail slated for closure and it would give the reason. I was not successful in finding this resourceful tool, so without that information, my comments continue based on what I see for closure on the maps.

**Recommended: Open (All modes of travel)**

• The Hunting Ground roads and trails are used mostly by families, couples and casual sight-seers out for a day enjoying the great outdoors and moseying along the canyon rim. Jeeps and ATVs provide 95% of the conveyance. The Hunting Ground roads and trails generally do not have the length or technical challenge for a good group run by the clubs in the area. With that said, I'd like to see more of the roads along the canyon rim open to jeeps as well as ATVs. The Hunting Ground is a multi-use ERMA and there is no reason to close most of the rim trails to full-size vehicles. I belong to the Jeep Club and the ATV Club and I see no benefit to ATVs by shutting Jeeps out of so many of the rim trails. Most, but not all, the rim trails were put in by full-size and do not have erosion or wear-and-

tear issues.Roads 317 and 326:With that as background, I recommend that roads 317 and 326 remain open to full-size as they connect between full-size roads 254 and 331

## Route: 3170

### Segment: 517

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I low
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E
- SSPLANT Special Status Species

#### Rationale

##### Designation Criteria

- Minimize Damage:** SS Veg Communities – SSR
- Minimize Harassment:** PPSV- Minimize fragmentation, Bighorn – SSR -- summer range

##### Rationale for Decision

- Route was designated to protect and enhance special status fish, wildlife, and plant populations.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to reduce the miles of motorized and mechanized routes in bighorn sheep habitat.

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness.Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources.As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use.The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles.What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures.All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 3175

### Segment: 671

#### Designation [?](#)

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- SMAs River Rims ACEC
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Minimize Harassment:** Bighorn – SSR -- summer range
- **Wilderness / Natural Area:** ACEC-River Rims close within 200m cactus

##### Rationale for Decision

- Route was designated to reduce the miles of motorized and mechanized routes in bighorn sheep habitat.
- Route was designated to protect Colorado hookless cactus within the River Rims ACEC

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

## Public Comments On Route: 3175

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 00000135-28

- I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 3176

### Segment: 617

### Designation [?](#)

#### Current Designation

Closed (Rehab)

#### Mitigation Criteria

- Needs Data - SSS Plants

#### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

### Rationale

#### Designation Criteria

- **Minimize Harassment:** Bighorn – SSR -- summer range, PPSV- Minimize fragmentation

### Rationale for Decision

- Route was designated to reduce the miles of motorized and mechanized routes in bighorn sheep habitat.
- Route was designated to reduce fragmentation in Priority Vegetation types

### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

## Route: 3179

### Segment: 348

#### Designation

##### Current Designation

Open, seek re-route or mitigation

##### Mitigation Criteria

- Reroute
- Reroute to the edge of the Sagebrush field

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- SOIL Soils Steep Slopes 40%
- SOIL Soils Fragile
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk winter concentration areas
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Indirect impact
- SMAs Lands with wilderness characteristics
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches <60 acres

## Rationale

### Designation Criteria

- **No designation criteria for this route segment.**

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

## Route: 318

### Segment: 2423

## Designation ?

### Current Designation

Vehicles under 50" wide

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 318

- No public comments for this Route

## Route: 3180

### Segment: 383

#### Designation [?](#)

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- SOIL Soils Steep Slopes 40%
- SOIL Soils Fragile
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk winter concentration areas
- WILDLIFE Elk severe winter range
- RIPARIAN Riparian 1 stream crossing
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Direct impact
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches <60 acres

#### Rationale

##### Designation Criteria

- **Minimize Damage:** Fragile soils SSR
- **Minimize Harassment:** Sage-Minimize fragmentation

##### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to reduce fragmentation of sagebrush patches

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Admin/Permitted Use Only

**Alternative C:** Admin/Permitted Use Only

## Public Comments On Route: 3181

Organization, commenter: Quiet Trails Group, Sherry Schenk

Comment ID: 000000115-68

- [Wagon Park/Sawmill Mesa (South) TMP-Level Comments:Quiet Trails Group supports the management decisions shown in Alternative E for the southern Sawmill Mesa area with the following specific suggestions:]Routes 3181-2399-2398-2354-2029-2376-2377-2378-2383-2382-2380: We would like to see these routes open to mechanical use (mountain biking) as it would create a bike loop system connecting Escalante Rim Rd to Sawmill Mesa Rd down to the northeast boundary of the NCA. We believe this area has the potential to provide a dynamic bicycling experience with trails of a variety of lengths and difficulties that lead to beautiful views and are easily accessible from Delta.

The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 3187

### Segment: 778

## Designation

### Current Designation

Closed (Rehab)

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I moderate
- SMAs River Rims ACEC
- SMAs Wild and Scenic River area
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- **Minimize Harassment:** Bighorn – SSR -- summer range, PPSV- Minimize fragmentation, Raptor Potential Habitat
- **Wilderness / Natural Area:** ACEC-River Rims close within 200m cactus

### Rationale for Decision

- Route was designated to reduce the miles of motorized and mechanized routes in bighorn sheep habitat.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect potential raptor habitat
- Route was designated to protect Colorado hookless cactus within the River Rims ACEC

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 3187

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 00000135-28

- I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 3191

### Segment: 3012

#### Designation

##### Current Designation

Foot/Horse

##### Mitigation Criteria

- Foot and horse (but still open to motorized for admin/permitted access)

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- SOIL Soils Steep Slopes 40%
- SOIL Soils Fragile
- WILDLIFE Mule deer severe winter range
- RIPARIAN Riparian 12 stream crossings
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Indirect impact
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches <60 acres

#### Rationale

##### Designation Criteria

- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

### Previous Alternatives Analyzed

**Alternative A:** Vehicles under 50" wide

**Alternative B:** Admin/Permitted Use Only

- I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 3192

## Segment: 3021

### Designation

#### Current Designation

Open, seek re-route or mitigation

#### Mitigation Criteria

- Special Species Plant
- Riparian

#### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Range access for general livestock management
- LANDS Right of Way
- LANDS DMEA access route
- SOIL Soils Fragile
- WILDLIFE Mule deer severe winter range
- RIPARIAN Riparian crossing perennial stream
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I moderate
- SMAs Wild and Scenic River area
- DENSITY Route density highest in Alt A
- DENSITY Route density low in Alt E
- SSPLANT Special Status Species Colorado hookless cactus

### Rationale

#### Designation Criteria

- No designation criteria for this route segment.

#### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open, seek re-route or mitigation

**Alternative C:** Admin/Permitted Use Only

**Alternative D:** Open (All modes of travel)

## Segment: 3217

### Designation

#### Current Designation

Open, seek re-route or mitigation

#### Mitigation Criteria

- Special Species Plant

Comment ID: 000000193-10

• 5. Since the BLM's route designations will become Implementation Decisions in the D-E NCA Comprehensive Travel and Transportation Management Plan (DRMP, page 22) it is critical that all of DMEA's access routes be accurately shown, and designated as 'Open' or 'Administrative Use Only' under all alternatives. This includes, but is not limited to, portions of the following numbered travel routes, as identified on the DENCA Draft RMP Route by Route Designation Figures (Figures N-1b\_Alt\_B\_CTMP; N-1c\_Alt\_C\_CTMP; N-1d\_Alt\_D\_CTMP; and N-1e\_Alt\_E\_CTMP): 2495, 2496, 2459, 2313, 2461, 2462, 2352, 2470, 2476, 3192, 2035, 2336, 2342.6. Designation of DMEA's access routes as 'Open' or 'Administrative Use Only' is consistent with the BLM's guidelines for the Dominguez-Escalante National Conservation Area Draft Resource Management Plan and Environmental Impact Statement, April 2013 Appendix N Comprehensive Travel and Transportation Management Plan Route-by-Route Designation, which states: "Through the process of route-by-route designation, the interdisciplinary team established some guidelines that were applied across all four action alternatives (Alternatives B, C, D, and E) ... 5. Routes that are associated with, or provide primary access to, established right-of-ways were either designated as open or as limited to administrative use only." (pages 899 and 900).

Organization, commenter: Delta-Montrose Electric Association (DMEA)

Comment ID: 000000193-2

• Route Specific Comments. 1. Among the RMP alternatives, the No Action Alternative is preferred by DMEA since it allows for the continued use of existing access routes for the maintenance, repair and replacement of existing distribution lines and poles. DMEA does not believe there would be any significant impact to the maintenance, repair or replacement of the existing distribution system and access routes, under the No Action Alternative. 2. Alternative B would result in significant impacts to DMEA's ability to maintain, repair, replace or upgrade portions of the existing distribution lines within the NCA planning area. Under this alternative a number of DMEA access routes would be closed (e.g. 2496, 2035) or limited to ATV use only (e.g. 2336). Access restrictions would severely harm DMEA's ability to operate and maintain existing electrical distribution facilities as required by federal laws governing electric cooperatives/suppliers, and in accordance with our established standards. For access and maintenance of facilities, in all cases DMEA is requesting the use of existing roads and when roads are not available, the use of right-of-way for access. 3. Alternative C would result in the majority of existing DMEA access routes being designated as 'Administrative Use Only' (e.g. 2496, 2495, 2462, 2461, 2459, 2313, 3192). Based on the assumption that as a BLM right-of-way grant holder DMEA would have 'Administrative Use' and be allowed continued access to our distribution lines, no significant impacts would occur with this designation. Significant impacts would occur, however, where access is denied due to 'Closed' travel routes (e.g. 2336). 4. Alternative D would result in the majority of DMEA's access routes being designated as 'Open' north of the Gunnison River (e.g. 2496, 2495), while the majority of DMEA's access routes south of the river would be designated as 'Bicycle' (e.g. 2461, 2462, 2459, and 2313). In addition, this alternative would also designate several of DMEA's access routes as either 'Closed' or 'Administration Use Only'. Significant negative impacts to DMEA and our customers served off these lines would occur when DMEA's access is unreasonably limited or denied. No significant impacts would be expected where access routes are designated as 'Open' or 'Administrative Use Only'. 5. Alternative E would result in significant impacts to DMEA's ability to maintain, repair and replace portions of the existing distribution lines within the NCA planning area. Under this alternative a number of DMEA access routes would be 'Closed' (e.g. 2496, 2463) or limited to 'ATV' use (e.g. 2461, 2462, 2459). Again, these limitations on access would not permit DMEA to continue operating and maintaining the existing electrical facilities in this area in accordance with federal regulations and DMEA's established standards. Significant and serious impacts would occur where access routes to DMEA's distribution lines are designated as 'Closed', or 'ATV'.

The following high value recreational routes/roads are legal RS 2477 ROW's in the State of Colorado, Delta County, and the BLM does not have the jurisdiction to close them: 3011, 2184, 2191, 3100, 2187, 2026, 2059, 2188, 2192, 3104, 2130, 3009, 2199, 2200, 2111, 2223, 2024, 3006, 2231, 3094, 2579, 2210, 2344, 2243, 2249, 2248, 3074, 2354, 2384, 2296, 2295, 2287, 2304, 2062, 2163, 3163, 2164, 2430, 4006, 3016, 2351, 3140, 2410, 4008, 2324, 2073, 2306, 2459, 3192, 3193, 2350, 2443, 2035, 2336, 2495, 2491, 2159, 3058, 2277, 2465, 2467, 3189, 2472, 2297, 2006, 2265, 2271, 2276, 2135, 2139, 3053, 2489, 3033, 3057, 2031, 2276, 2210, 2579, 2136, 2344, 3164, 2400, 2379, 3014, 2365, 3116, 2251, 2259, 2149, 2153, 2146, 2144, 2145, 2356, 2257, 2048, 2358, 3165, and 3166.

## Route: 3193

### Segment: 3179

#### Designation

##### Current Designation

Vehicles under 50" wide

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- SOIL Soils Fragile
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- SMAs Wild and Scenic River area
- DENSITY Route density highest in Alt A
- DENSITY Route density low in Alt E
- SSPLANT Special Status Species Colorado hookless cactus

#### Rationale

##### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

Alternative A: Open (All modes of travel)

- Alternative B:** Closed (Not Rehabbed)
- Alternative C:** Admin/Permitted Use Only
- Alternative D:** Open, seek re-route or mitigation

## Segment: 2993

### Designation

**Current Designation**  
Closed (Rehab)

#### Mitigation Criteria

- Needs Data - SSS Plants

#### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- SOIL Soils Fragile
- WILDLIFE Mule deer severe winter range
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I moderate
- SMA Wild and Scenic River area
- DENSITY Route density highest in Alt A
- DENSITY Route density low in Alt E
- SSPLANT Special Status Species Colorado hookless cactus

### Rationale

#### Designation Criteria

- Minimize Harassment:** PPSV- Minimize fragmentation

#### Rationale for Decision

- Route was designated to reduce fragmentation in Priority Vegetation types

### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

• The following high value recreational routes/roads are legal RS 2477 ROW's in the State of Colorado, Mesa County and the BLM does not have the jurisdiction to close them: 500, 472, 518, 521, 530, 39, 127, 572, 566, 66, 65, 148, 71, 74, 587, 595, 608, 622, 628, 635, 624, 609, 611, 706, 678, 700, 719, 726, 696, 26, 936, 847, 849, 919, 767, 824, 96, 822, 817, 950, 1021, 900, 2682, 1020, 1003, 1084, 1142, 1184, 1156, 1198, 1349, 1308, 1310, 1238, 1263, 1122, 1170, 1192, 974, 941, 1076, 1039, 1018, 1759, 1764, 1758, 1174, 1788, 1798, 1669, 1699, 1773, 1755, 1779, 1750, 1751, 1792, 1720, 1726, 1727, 1720, 1722, 1803, 1805, 1809, 1614, 1609, 1605, 1608, 1571, 1526, 1516, 1448, 755, 807, 900, 10, 48, 924, 950, 1005, 965, 8, 1115, 981, 984, 1135, 2678, 1249, 1171, 1150, 1249, 1320, 1235, 1236, 1228, 1227, 1409, 1456, 1349, 1308, 1513, 1221, 1550, 1567, 1641, 1612, 1740, 1688, 2597, 2598, 2601, 2440, 3160, 3162, 2089, 2166, 2170, 2596, 2171, 2003, 2122, 2126, 2189, 3145, 2182, 2179, 2178, 3143, 2181, 2121, 2122, 2168, 2126, 2180, 2095, 2173, 2174, 2620, 2129, 1686, 1692, 1667, 1647, 1631, 1613, 1596, 1549, 1541, 2647, 1633, 1605, 1608, 1571, 2645, 1507, 1448, 1496, 1516, 1504, 1510, 1508, 1509, 439, 431, 456, 461, 460, 391, 423, 415, 419, 407, 402, 367, 372, 339, 298, 338, 105, 368, 374, 393, 389, 390, 376, 377, 351, 350, 121, 345, 320, 301, 251, 234, 232, 205, 344, 107, 103, 152, 153, 161, 168, 3199, 188, 196, 255, 254, 236, 294, 242, 219, 201, 169, 162, 158, 160, 173. The following high value recreational routes/roads are legal RS 2477ROW's in the State of Colorado, Delta County, and the BLM does not have the jurisdiction to close them: 3011, 2184, 2191, 3100, 2187, 2026, 2059, 2188, 2192, 3104, 2130, 3009, 2199, 2200, 2111, 2223, 2024, 3006, 2231, 3094, 2579, 2210, 2344, 2243, 2249, 2248, 3074, 2354, 2384, 2296, 2295, 2287, 2304, 2062, 2163, 3163, 2164, 2430, 4006, 3016, 2351, 3140, 2410, 4008, 2324, 2073, 2306, 2459, 3192, 3193, 2350, 2443, 2035, 2336, 2495, 2491, 2159, 3058, 2277, 2465, 2467, 3189, 2472, 2297, 2006, 2265, 2271, 2276, 2135, 2139, 3053, 2489, 3033, 3057, 2031, 2276, 2210, 2579, 2136, 2344, 2400, 2379, 3014, 2365, 3116, 2251, 2259, 2149, 2153, 2146, 2144, 2145, 2356, 2257, 2048, 2358, 3165, and 3166.

## Route: 3194

### Segment: 2991

#### Designation

**Current Designation**  
Closed (Rehab)

#### Mitigation Criteria

- Needs Data - SSS Plants

#### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands

- RECREATION Recreation access for the Old Spanish National Historic Trail
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I moderate
- SMAs Wild and Scenic River area
- DENSITY Route density highest in Alt A
- DENSITY Route density low in Alt E
- SSPLANT Special Status Species Colorado hookless cactus

## Rationale

### Designation Criteria

- **Minimize Harassment:** PPSV- Minimize fragmentation

### Rationale for Decision

- Route was designated to reduce fragmentation in Priority Vegetation types

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 3194

- No public comments for this Route

## Route: 3195

### Segment: 2992

## Designation

### Current Designation

Vehicles under 50" wide

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- RANGE Range access for general livestock management
- SOIL Soils Fragile
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- SMAs Wild and Scenic River area
- DENSITY Route density highest in Alt A
- DENSITY Route density low in Alt E
- SSPLANT Special Status Species Colorado hookless cactus

## Rationale

### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Admin/Permitted Use Only

**Alternative D:** Open, seek re-route or mitigation

### Segment: 3178

## Designation

### Current Designation

Admin/Permitted Use Only

### Mitigation Criteria

- Special Species Plant

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Range access for general livestock management
- LANDS DMEA access route

- SOIL Soils Fragile
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- SMAs Wild and Scenic River area
- DENSITY Route density highest in Alt A
- DENSITY Route density low in Alt E
- SSPLANT Special Status Species Colorado hookless cactus

## Rationale

### Designation Criteria

- Minimize Damage:** Cactus – reduce density within 200m
- Minimize Harassment:** PPSV- Minimize fragmentation

### Rationale for Decision

- Route was designated to ensure access to rights-of-way, private property, and livestock grazing facilities.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open, seek re-route or mitigation

**Alternative C:** Admin/Permitted Use Only

**Alternative D:** Open (All modes of travel)

## Public Comments On Route: 3195

- No public comments for this Route

## Route: 3197

### Segment: 3022

## Designation [?](#)

### Current Designation

Closed (Rehab)

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- RIPARIAN Riparian crossing perennial stream
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I moderate
- SMAs River Rims ACEC
- SMAs Wild and Scenic River area
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- SSPLANT Special Status Species Colorado hookless cactus

## Rationale

### Designation Criteria

- Minimize Damage:** Cactus – reduce density within 200m, Riparian - perennial streams SSR 100 m
- Minimize Harassment:** PPSV- Minimize fragmentation, Bighorn – SSR -- summer range
- Wilderness / Natural Area:** ACEC-River Rims close within 200m cactus

### Rationale for Decision

- Route was designated to reduce the density of routes within 200 meters of known Colorado hookless Cactus occurrences.
- Route was designated to minimize travel routes in and crossing riparian and wetland areas.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to reduce the miles of motorized and mechanized routes in bighorn sheep habitat.
- Route was designated to protect Colorado hookless cactus within the River Rims ACEC

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 3197

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 000000135-28

- I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the

kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 3198

### Segment: 3023

## Route: 32

### Segment: 2817

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Direct impact
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

### Rationale

#### Designation Criteria

- **Minimize Damage:** Cultural – SSR within 100m sites
- **Minimize Harassment:** PPSV- Minimize fragmentation, Bighorn – SSR -- summer range, Big game winter range – close, Raptor Potential Habitat

#### Rationale for Decision

- Route was designated to minimize impacts to cultural resources.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to reduce the miles of motorized and mechanized routes in bighorn sheep habitat.
- Route was designated to protect big game winter range
- Route was designated to protect potential raptor habitat

### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 32

- No public comments for this Route

## Route: 320

### Segment: 2424

#### Designation

##### Current Designation

Open (All modes of travel)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

#### Rationale

##### Designation Criteria

- No designation criteria for this route segment.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open (All modes of travel)

**Alternative C:** Admin/Permitted Use Only

**Alternative D:** Foot/Horse

• I've been involved in the "process" of this NCA since long before the D-E NCA designation. "The Hunting Grounds" area is very personal and dear to me, so I'd like to share a little of my background and how it ties into where we are today. I'd been coming to Grand Junction since 1992, to enjoy the BLM public land opportunities of OHV use, while living in the Denver area. Close to home, solitary, public land opportunities did not exist near Denver. After a couple visits per year to the valley throughout the 1990's, I thought Grand Junction would be a great place to live. I began looking for acreage in/around the valley. When the realtor showed me a 40 acre parcel for sale, accessed via Bean Ranch Road, I had already looked at several others, from Debeque to Glade Park. When I arrived at this said parcel for sale, I said "this is THE one!" In Feb. 2001, I purchased the 40 acre parcel of dry land, which was (and still is) bordered by BLM land on 3 sides. (Note, this mentioned BLM land is now within the D-E NCA Hunting Grounds area.) In Sept. 2002 I made the move to Grand Junction, and in March of 2003 my home was completed and I was able to move onto my 40 acres. The dream I'd so looked forward to achieving was made a reality, as my preferred outdoor recreation activity was (and still is) OHV use, although I enjoy many other types of outdoor recreation. I now had the ability to leave my driveway, on my OHV, and explore diverse trails and see beautiful scenery and wildlife. Let me also mention that being able to reside on this 40 acres wasn't an easy endeavor, however, it was a choice that meant financial and life altering sacrifices, to be able to enjoy the recreation opportunities this location had to offer. One major note supporting that is that there is no piped/city water beyond where you crest the top of the hill of Bean Ranch Rd. All the homes located on the back side of Bean Ranch Rd do not have piped/city drinking water, so those home owners have either drilled a well (minimal) or use cisterns and haul, or have delivered, potable water. Let me tell you, this takes planning & some conditional living. But those are things I was willing to deal with, to occupy a residence in this great area of BLM recreation opportunities that I so desired, and to achieve my personal dreams of living "out of the city" for mental well being. When I first discovered my passion for OHV use, I rode a dirt bike. After about 13 years of riding dirt bikes, I tried atv-ing and discovered I could pack my rack with supplies for a days' outing (or more), and be gone on the trail, enjoying what there was to be seen! Soon after moving to the valley, I joined the WSATVA and made several friends who were atv-ers, so that has been my main OHV method for the past 12 years. Although WSATVA did welcome me in the beginning, as a dirt biker! For years, I have been able to leave my Bean Ranch Rd property, on or in my OHV of choice, and explore the existing diverse roads and trails, within the area known as The Hunting Grounds. These roads & trails lead to spectacular viewing accesses of the Gunnison River, from the canyon edge. There are also railroad track & tunnel views, and the majestic sites of the Dominguez Canyon Wilderness area and Cactus Park across the river. I have taken many friends and family to see these splendorous sites, when they have visited. I'd also like to include that any specific trail #'s that I do not mention, that are not currently listed as potential closures on Alternatives B or E, I want to remain open. I do not mention trails which I did not find threatened for closure. My desire is for The Hunting Grounds area for the existing roads and trails to remain open and to remain as multi-use. I will also acknowledge the need for protecting precious resources within this area. While attending many meetings leading up to the DRMP being executed, I found it somewhat frustrating, and perhaps aggravating, to learn how many people didn't even know of The Hunting Grounds existence until the D-E NCA designation came and the RMP process that has followed. And I'm just amazed at how now those folks who have newly experienced it, want use specific trails with government rules and regulations to be put into place regarding the do's and don'ts. Then, to hear those folks' comments to recommend adding staging areas, with information kiosks, bathrooms, and improved parking areas is just jaw dropping to me. Prior to the past 4-5 years, very few Mesa County residents and mostly local residents of Bean Ranch Road & Whitewater area had knowledge about The Hunting Grounds zone, and its spectacular BLM recreation opportunities, which currently include multi-use activities on roads and trails. I've come to learn that it was not ok, for the residents who live in that area, who sought land for their homes to be built on, to have driveway access to enjoy activities they love, and not ok to be privy to this area without the rest of Mesa County and beyond knowing also. I guess that goes with "if you build it, they will come" motto. I also find the requests for use specific trails, vs. multi-use, for reason of user conflicts and desire for quiet use trails un-necessary, as if anyone has spent any time in The Hunting Grounds area, you will find this is not a highly used public area, and if you even see other users, it is a minimal and infrequent experience. I do know that the residents who live in that area, want all existing trails to remain open and to multi-use. As we all know, "Alternative A", no change", really isn't a real alternative for this future planning, right? Alternative A would be my first choice for the future of this area. Leave it as it is, because it IS NOT BROKEN! In attempting to navigate the D-E NCA DRMP website, I thought in public meetings, Katie Stevens had said you could click on a trail slated for closure and it would give the reason. I was not successful in finding this resourceful tool, so without that information, my comments continue based on what I see for closure on the maps.

## Route: 321

### Segment: 2393

#### Designation [?](#)

##### Current Designation

Open (All modes of travel)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

#### Rationale

##### Designation Criteria

- No designation criteria for this route segment.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open (All modes of travel)

**Alternative C:** Admin/Permitted Use Only

**Alternative D:** Admin/Permitted Use Only

## Public Comments On Route: 321

- No public comments for this Route

## Route: 322

### Segment: 2387

#### Designation [?](#)

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

#### Rationale

##### Designation Criteria

- Minimize Damage:** NHT – close routes for setting
- Minimize Harassment:** PPSV- Minimize fragmentation

##### Rationale for Decision

- Route was designated to improve natural setting along the Old Spanish National Historic Trail.
- Route was designated to reduce fragmentation in Priority Vegetation types

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

Alternative D: Closed (Rehab)

## Public Comments On Route: 322

Organization, commenter: Janice Shepherd

Comment ID: 000000106-215

- 345 There is some severe erosion on this route near 12 S 725899 4307199 (IMG\_055) which result in vehicle creating by-pass roads to get around the problem. Including route 322, which I believe goes farther than indicated in the inventory

## Route: 323

### Segment: 2382

#### Designation

##### Current Designation

Open (All modes of travel)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

## Public Comments On Route: 326

Organization, commenter: Bob Janowski

Comment ID: 000000151-1

- The Hunting Ground roads and trails are used mostly by families, couples and casual sight-seers out for a day enjoying the great outdoors and moseying along the canyon rim. Jeeps and ATVs provide 95% of the conveyance. The Hunting Ground roads and trails generally do not have the length or technical challenge for a good group run by the clubs in the area. With that said, I'd like to see more of the roads along the canyon rim open to jeeps as well as ATVs. The Hunting Ground is a multi-use ERMA and there is no reason

to close most of the rim trails to full-size vehicles. I belong to the Jeep Club and the ATV Club and I see no benefit to ATVs by shutting Jeeps out of so many of the rim trails. Most, but not all, the rim trails were put in by full-size and do not have erosion or wear-and-tear issues. Roads 317 and 326: With that as background, I recommend that roads 317 and 326 remain open to full-size as they connect between full-size roads 254 and 331

## Route: 327

### Segment: 2365

#### Designation

##### Current Designation

Vehicles under 50" wide

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

#### Rationale

##### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

## Route: 33

## Segment: 2805

### Designation

#### Current Designation

Closed (Rehab)

#### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

#### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Direct impact
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

### Rationale

#### Designation Criteria

- **Minimize Damage:** Cultural – SSR within 100m sites
- **Minimize Harassment:** PPSV- Minimize fragmentation, Bighorn – SSR -- summer range, Big game winter range – close, Raptor Potential Habitat

#### Rationale for Decision

- Route was designated to minimize impacts to cultural resources.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to reduce the miles of motorized and mechanized routes in bighorn sheep habitat.
- Route was designated to protect big game winter range
- Route was designated to protect potential raptor habitat

### Previous Alternatives Analyzed

## Route: 339

### Segment: 2409

## Designation

### Current Designation

Vehicles under 50" wide

### Mitigation Criteria

- Confirm route is on public land

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- RIPARIAN Riparian 4 stream crossings
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I low
- DENSITY Route density medium in Alt A
- DENSITY Route density medium in Alt E

## Rationale

### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

- Alternative A:** Open (All modes of travel)
- Alternative B:** Admin/Permitted Use Only
- Alternative C:** Closed (Rehab)
- Alternative D:** Admin/Permitted Use Only

• Routes 367 and 339 connect via private property. Since it is the BLM's position to not encourage trespass these routes need to be rerouted to avoid the private property.

• The following high value recreational routes/roads are legal RS 2477 ROW's in the State of Colorado, Mesa County and the BLM does not have the jurisdiction to close them: 500, 472, 518, 521, 530, 39, 127, 572, 566, 66, 65, 148, 71, 74, 587, 595, 608, 622, 628, 635, 624, 609, 611, 706, 678, 700, 719, 726, 696, 26, 936, 847, 849, 919, 767, 824, 96, 822, 817, 950, 1021, 900, 2682, 1020, 1003, 1084, 1142, 1184, 1156, 1198, 1349, 1308, 1310, 1238, 1263, 1122, 1170, 1192, 974, 941, 1076, 1039, 1018, 1759, 1764, 1758, 1174, 1788, 1798, 1669, 1699, 1773, 1755, 1779, 1750, 1751, 1792, 1720, 1726, 1727, 1720, 1722, 1803, 1805, 1809, 1614, 1609, 1605, 1608, 1571, 1526, 1516, 1448, 755, 807, 900, 10, 48, 924, 950, 1005, 965, 8, 1115, 981, 984, 1135, 2678, 1249, 1171, 1150, 1249, 1320, 1235, 1236, 1228, 1227, 1409, 1456, 1349, 1308, 1513, 1221, 1550, 1567, 1641, 1612, 1740, 1688, 2597, 2598, 2601, 2440, 3160, 3162, 2089, 2166, 2170, 2596, 2171, 2003, 2122, 2126, 2189, 3145, 2182, 2179, 2178, 3143, 2181, 2121, 2122, 2168, 2126, 2180, 2095, 2173, 2174, 2620, 2129, 1686, 1692, 1667, 1647, 1631, 1613, 1596, 1549, 1541, 2647, 1633, 1605, 1608, 1571, 2645, 1507, 1448, 1496, 1516, 1504, 1510, 1508, 1509, 439, 431, 456, 461, 460, 391, 423, 415, 419, 407, 402, 367, 372, 339, 298, 338, 105, 368, 374, 393, 389, 390, 376, 377, 351, 350, 121, 345, 320, 301, 251, 234, 232, 205, 344, 107, 103, 152, 153, 161, 168, 3199, 188, 196, 255, 254, 236, 294, 242, 219, 201, 169, 162, 158, 160, 173. The following high value recreational routes/roads are legal RS 2477 ROW's in the State of Colorado, Delta County, and the BLM does not have the jurisdiction to close them: 3011, 2184, 2191, 3100, 2187, 2026, 2059, 2188, 2192, 3104, 2130, 3009, 2199, 2200, 2111, 2223, 2024, 3006, 2231, 3094, 2579, 2210, 2344, 2243, 2249, 2248, 3074, 2354, 2384, 2296, 2295, 2287, 2304, 2062, 2163, 3163, 2164, 2430, 4006, 3016, 2351, 3140, 2410, 4008, 2324, 2073, 2306, 2459, 3192, 3193, 2350, 2443, 2035, 2336, 2495, 2491, 2159, 3058, 2277, 2465, 2467, 3189, 2472, 2297, 2006, 2265, 2271, 2276, 2135, 2139, 3053, 2489, 3033, 3057, 2031, 2276, 2210, 2579, 2136, 2344, 3164, 2400, 2379, 3014, 2365, 3116, 2251, 2259, 2149, 2153, 2146, 2144, 2145, 2356, 2257, 2048, 2358, 3165, and 3166.

**Route: 34**

**Segment: 2804**

**Designation**

**Current Designation**  
Closed (Rehab)

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Direct impact
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- **Minimize Damage:** Cultural – SSR within 100m sites
- **Minimize Harassment:** PPSV- Minimize fragmentation, Bighorn – SSR -- summer range, Big game winter range – close, Raptor Potential Habitat

### Rationale for Decision

- Route was designated to minimize impacts to cultural resources.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to reduce the miles of motorized and mechanized routes in bighorn sheep habitat.
- Route was designated to protect big game winter range
- Route was designated to protect potential raptor habitat

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 34

- No public comments for this Route

## Route: 340

### Segment: 2457

### Designation

#### Current Designation

Vehicles under 50" wide

#### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

#### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

## Rationale

### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Vehicles under 50" wide

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Route: 344

### Segment: 2419

## Designation

### Current Designation

Closed (Rehab)

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- RIPARIAN Riparian 2 stream crossings
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I low
- DENSITY Route density highest in Alt A
- DENSITY Route density medium in Alt E

## Rationale

### Designation Criteria

- **Minimize Damage:** NHT – close routes for setting
- **Minimize Harassment:** PPSV- Minimize fragmentation

### Rationale for Decision

- Route was designated to improve natural setting along the Old Spanish National Historic Trail.
- Route was designated to reduce fragmentation in Priority Vegetation types

## Route: 345

### Segment: 2386

#### Designation ?

##### Current Designation

Open (All modes of travel)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

#### Rationale

##### Designation Criteria

- No designation criteria for this route segment.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open (All modes of travel)

**Alternative C:** Admin/Permitted Use Only

345 There is some severe erosion on this route near 12 S 725899 4307199 (IMG\_055) which result in vehicle creating by-pass roads to get around the problem. Including route 322, which I believe goes farther than indicated in the inventory

## Route: 346

### Segment: 2346

#### Designation ?

##### Current Designation

Open (All modes of travel)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

### Rationale

#### Designation Criteria

- No designation criteria for this route segment.

#### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open (All modes of travel)

**Alternative C:** Admin/Permitted Use Only

**Alternative D:** Foot/Horse

## Public Comments On Route: 346

- No public comments for this Route

## Route: 347

### Segment: 2343

#### Designation

##### Current Designation

Open (All modes of travel)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

### Rationale

#### Designation Criteria

- No designation criteria for this route segment.

#### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open (All modes of travel)

**Alternative C:** Admin/Permitted Use Only

**Alternative D:** Foot/Horse

## Public Comments On Route: 347

- No public comments for this Route

## Route: 348

### Segment: 2290

#### Designation

##### Current Designation

Vehicles under 50" wide

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands

- RECREATION Recreation access for the Old Spanish National Historic Trail
- CULTURAL Cultural Indirect impact
- DENSITY Route density highest in Alt A
- DENSITY Route density medium in Alt E

## Rationale

### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Vehicles under 50" wide

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 348

- No public comments for this Route

## Route: 349

### Segment: 2293

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- CULTURAL Cultural Indirect impact
- DENSITY Route density highest in Alt A
- DENSITY Route density medium in Alt E

## Rationale

### Designation Criteria

- **Minimize Damage:** NHT – close routes for setting, Fragile soils SSR
- **Minimize Harassment:** PPSV- Minimize fragmentation

### Rationale for Decision

- Route was designated to improve natural setting along the Old Spanish National Historic Trail.
- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to reduce fragmentation in Priority Vegetation types

## Previous Alternatives Analyzed

**Alternative A:** Foot/Horse/Mechanized/Motorcycle

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 349

Organization, commenter: Janice Shepherd

Comment ID: 000000106-209

- Alt E's closure of duplicate and braided routes: There are many short braided routes like 102, 112, 120, and 349 throughout the NCA. I support the closing and rehabbing of them if they don't lead to nice dispersed campsites. Hiking passed them makes me think that no one cares about proper planning (if I didn't know the history of their creation). Duplicated braided routes are just eating up the area, damaging vegetation in areas where it is such a struggle for vegetation to survive. Now that this is an NCA, I support the BLM's intent in Alt E to close and re-vegetate such braided routes. I believe it is important to show respect for the protection of the land and its beauty by minimizing routes to those that are useful and fun and eliminating such unnecessary braids.

## Route: 350

### Segment: 2304

#### Designation

##### Current Designation

Open (All modes of travel)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

## Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- CULTURAL Cultural Class I low
- DENSITY Route density highest in Alt A
- DENSITY Route density medium in Alt E

## Rationale

### Designation Criteria

- **No designation criteria for this route segment.**

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open (All modes of travel)

**Alternative C:** Admin/Permitted Use Only

**Alternative D:** Foot/Horse/Mechanized (but still open to motorized for admin/permitted access)

• The following high value recreational routes/roads are legal RS 2477 ROW's in the State of Colorado, Mesa County and the BLM does not have the jurisdiction to close them: 500, 472, 518, 521, 530, 39, 127, 572, 566, 66, 65, 148, 71, 74, 587, 595, 608, 622, 628, 635, 624, 609, 611, 706, 678, 700, 719, 726, 696, 26, 936, 847, 849, 919, 767, 824, 96, 822, 817, 950, 1021, 900, 2682, 1020, 1003, 1084, 1142, 1184, 1156, 1198, 1349, 1308, 1310, 1238, 1263, 1122, 1170, 1192, 974, 941, 1076, 1039, 1018, 1759, 1764, 1758, 1174, 1788, 1798, 1669, 1699, 1773, 1755, 1779, 1750, 1792, 1720, 1726, 1727, 1720, 1722, 1803, 1805, 1809, 1614, 1609, 1605, 1608, 1571, 1526, 1516, 1448, 755, 807, 900, 10, 48, 924, 950, 1005, 965, 8, 1115, 981, 984, 1135, 2678, 1249, 1171, 1150, 1249, 1320, 1235, 1236, 1228, 1227, 1409, 1456, 1349, 1308, 1513, 1221, 1550, 1567, 1641, 1612, 1740, 1688, 2597, 2598, 2601, 2440, 3160, 3162, 2089, 2166, 2170, 2596, 2171, 2003, 2122, 2126, 2189, 3145, 2182, 2179, 2178, 3143, 2181, 2121, 2122, 2168, 2126, 2180, 2095, 2173, 2174, 2620, 2129, 1686, 1692, 1667, 1647, 1631, 1613, 1596, 1549, 1541, 2647, 1633, 1605, 1608, 1571, 2645, 1507, 1448, 1496, 1516, 1504, 1510, 1508, 1509, 439, 431, 456, 461, 460, 391, 423, 415, 419, 407, 402, 367, 372, 339, 298, 338, 105, 368, 374, 393, 389, 390, 376, 377, 351, 350, 121, 345, 320, 301, 251, 234, 232, 205, 344, 107, 103, 152, 153, 161, 168, 3199, 188, 196, 255, 254, 236, 294, 242, 219, 201, 169, 162, 158, 160, 173. The following high value recreational routes/roads are legal RS 2477ROW's in the State of Colorado, Delta County, and the BLM does not have the jurisdiction to close them: 3011, 2184, 2191, 3100, 2187, 2026, 2059, 2188, 2192, 3104, 2130, 3009, 2199, 2200, 2111, 2223, 2024, 3006, 2231, 3094, 2579, 2210, 2344, 2243, 2249, 2248, 3074, 2354, 2384, 2296, 2295, 2287, 2304, 2062, 2163, 3163, 2164, 2430, 4006, 3016, 2351, 3140, 2410, 4008, 2324, 2073, 2306, 2459, 3192, 3193, 2350, 2443, 2035, 2336, 2495, 2491, 2159, 3058, 2277, 2465, 2467, 3189, 2472, 2297, 2006, 2265, 2271, 2276, 2135, 2139, 3053, 2489, 3033, 3057, 2031, 2276, 2210, 2579, 2136, 2344, 3164, 2400, 2379, 3014, 2365, 3116, 2251, 2259, 2149, 2153, 2146, 2144, 2145, 2356, 2257, 2048, 2358, 3165, and 3166.

## Route: 351

### Segment: 2298

## Designation

### Current Designation

Vehicles under 50" wide

### Mitigation Criteria

- Needs Data - Cultural

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- CULTURAL Cultural Indirect impact
- DENSITY Route density highest in Alt A
- DENSITY Route density medium in Alt E

## Rationale

### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general, Rec opportunities - specific
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open, seek re-route or mitigation

**Alternative C:** Closed (Rehab)

**Alternative D:** Foot/Horse

## Route: 352

### Segment: 2288

#### Designation

##### Current Designation

Open (All modes of travel)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- CULTURAL Cultural Class I low
- DENSITY Route density highest in Alt A
- DENSITY Route density medium in Alt E

#### Rationale

##### Designation Criteria

- No designation criteria for this route segment.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open (All modes of travel)

**Alternative C:** Admin/Permitted Use Only

**Alternative D:** Foot/Horse

## Public Comments On Route: 352

- No public comments for this Route

## Route: 353

### Segment: 2289

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- CULTURAL Cultural Class I low
- DENSITY Route density highest in Alt A
- DENSITY Route density medium in Alt E

## Rationale

### Designation Criteria

- **Minimize Damage:** NHT – close routes for setting
- **Minimize Harassment:** PPSV- Minimize fragmentation

### Rationale for Decision

- Route was designated to improve natural setting along the Old Spanish National Historic Trail.
- Route was designated to reduce fragmentation in Priority Vegetation types

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 353

- No public comments for this Route

## Route: 354

### Segment: 2272

## Designation

### Current Designation

Open (All modes of travel)

### Mitigation Criteria

- CULTURAL Cultural Class I low
- DENSITY Route density highest in Alt A
- DENSITY Route density medium in Alt E

## Rationale

### Designation Criteria

- **Minimize Damage:** NHT – close routes for setting, Fragile soils SSR
- **Minimize Harassment:** PPSV- Minimize fragmentation

### Rationale for Decision

- Route was designated to improve natural setting along the Old Spanish National Historic Trail.
- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to reduce fragmentation in Priority Vegetation types

## Previous Alternatives Analyzed

## Public Comments On Route: 364

Organization, commenter: Tracey Rohde

Comment ID: 000000103-1

• I've been involved in the "process" of this NCA since long before the D-E NCA designation. "The Hunting Grounds" area is very personal and dear to me, so I'd like to share a little of my background and how it ties into where we are today. I'd been coming to Grand Junction since 1992, to enjoy the BLM public land opportunities of OHV use, while living in the Denver area. Close to home, solitary, public land opportunities did not exist near Denver. After a couple visits per year to the valley throughout the 1990's, I thought Grand Junction would be a great place to live. I began looking for acreage in/around the valley. When the realtor showed me a 40 acre parcel for sale, accessed via Bean Ranch Road, I had already looked at several others, from Debeque to Glade Park. When I arrived at this said parcel for sale, I said "this is THE one!" In Feb. 2001, I purchased the 40 acre parcel of dry land, which was (and still is) bordered by BLM land on 3 sides. (Note, this mentioned BLM land is now within the D-E NCA Hunting Grounds area.) In Sept. 2002 I made the move to Grand Junction, and in March of 2003 my home was completed and I was able to move onto my 40 acres. The dream I'd so looked forward to achieving was made a reality, as my preferred outdoor recreation activity was (and still is) OHV use, although I enjoy many other types of outdoor recreation. I now had the ability to leave my driveway, on my OHV, and explore diverse trails and see beautiful scenery and wildlife. Let me also mention that being able to reside on this 40 acres wasn't an easy endeavor, however, it was a choice that meant financial and life altering sacrifices, to be able to enjoy the recreation opportunities this location had to offer. One major note supporting that is that there is no piped/city water beyond where you crest the top of the hill of Bean Ranch Rd. All the homes located on the back side of Bean Ranch Rd do not have piped/city drinking water, so those home owners have either drilled a well (minimal) or use cisterns and haul, or have delivered, potable water. Let me tell you, this takes planning & some conditional living. But those are things I was willing to deal with, to occupy a residence in this great area of BLM recreation opportunities that I so desired, and to achieve my personal dreams of living "out of the city" for mental well being. When I first discovered my passion for OHV use, I rode a dirt bike. After about 13 years of riding dirt bikes, I tried atv-ing and discovered I could pack my rack with supplies for a days' outing (or more), and be gone on the trail, enjoying what there was to be seen! Soon after moving to the valley, I joined the WSATVA and made several friends who were atv-ers, so that has been my main OHV method for the past 12 years. Although WSATVA did welcome me in the beginning, as a dirt biker! For years, I have been able to leave my Bean Ranch Rd property, on or in my OHV of choice, and explore the existing diverse roads and trails, within the area known as The Hunting Grounds. These roads & trails lead to spectacular viewing accesses of the Gunnison River, from the canyon edge. There are also railroad track & tunnel views, and the majestic sites of the Dominguez Canyon Wilderness area and Cactus Park across the river. I have taken many friends and family to see these splendorous sites, when they have visited. I'd also like to include that any specific trail #'s that I do not mention, that are not currently listed as potential closures on Alternatives B or E, I want to remain open. I do not mention trails which I did not find threatened for closure. My desire is for The Hunting Grounds area for the existing roads and trails to remain open and to remain as multi-use. I will also acknowledge the need for protecting precious resources within this area. While attending many meetings leading up to the DRMP being executed, I found it somewhat frustrating, and perhaps aggravating, to learn how many people didn't even know of The Hunting Grounds existence until the D-E NCA designation came and the RMP process that has followed. And I'm just amazed at how now those folks who have newly experienced it, want use specific trails with government rules and regulations to be put into place regarding the do's and don'ts. Then, to hear those folks' comments to recommend adding staging areas, with information kiosks, bathrooms, and improved parking areas is just jaw dropping to me. Prior to the past 4-5 years, very few Mesa County residents and mostly local residents of Bean Ranch Road & Whitewater area had knowledge about The Hunting Grounds zone, and its spectacular BLM recreation opportunities, which currently include multi-use activities on roads and trails. I've come to learn that it was not ok, for the residents who live in that area, who sought land for their homes to be built on, to have driveway access to enjoy activities they love, and not ok to be privy to this area without the rest of Mesa County and beyond knowing also. I guess that goes with "if you build it, they will come" motto. I also find the requests for use specific trails, vs. multi-use, for reason of user conflicts and desire for quiet use trails un-necessary, as if anyone has spent any time in The Hunting Grounds area, you will find this is not a highly used public area, and if you even see other users, it is a minimal and infrequent experience. I do know that the residents who live in that area, want all existing trails to remain open and to multi-use. As we all know, "Alternative A", no change", really isn't a real alternative for this future planning, right? Alternative A would be my first choice for the future of this area. Leave it as it is, because it IS NOT BROKEN! In attempting to navigate the D-E NCA DRMP website, I thought in public meetings, Katie Stevens had said you could click on a trail slated for closure and it would give the reason. I was not successful in finding this resourceful tool, so without that information, my comments continue based on what I see for closure on the maps.

## Route: 369

## Segment: 2262

### Designation

#### Current Designation

Open (All modes of travel)

#### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

#### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- CULTURAL Cultural Class I low
- DENSITY Route density highest in Alt A
- DENSITY Route density medium in Alt E

### Rationale

#### Designation Criteria

- No designation criteria for this route segment.

#### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open (All modes of travel)

**Alternative C:** Admin/Permitted Use Only

**Alternative D:** Foot/Horse

## Public Comments On Route: 369

- No public comments for this Route

## Route: 37

## Segment: 2806

### Designation

#### Current Designation

Foot/Horse

#### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

#### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Indirect impact
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

### Rationale

#### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

#### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open (All modes of travel)

**Alternative C:** Foot/Horse

**Alternative D:** Foot/Horse/Mechanized/Motorcycle

## Public Comments On Route: 37

- No public comments for this Route

## Route: 370

## Segment: 2242

### Designation

## Current Designation

Closed (Rehab)

## Mitigation Criteria

- No Mitigation Criteria for this Route Segment

## Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- **Minimize Damage:** NHT – close routes for setting
- **Minimize Harassment:** PPSV- Minimize fragmentation

### Rationale for Decision

- Route was designated to improve natural setting along the Old Spanish National Historic Trail.
- Route was designated to reduce fragmentation in Priority Vegetation types

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

The following high value recreational routes/roads are legal RS 2477 ROW's in the State of Colorado, Mesa County and the BLM does not have the jurisdiction to close them: 500, 472, 518, 521, 530, 39, 127, 572, 566, 66, 65, 148, 71, 74, 587, 595, 608, 622, 628, 635, 624, 609, 611, 706, 678, 700, 719, 726, 696, 26, 936, 847, 849, 919, 767, 824, 96, 822, 817, 950, 1021, 900, 2682, 1020, 1003, 1084, 1142, 1184, 1156, 1198, 1349, 1308, 1310, 1238, 1263, 1122, 1170, 1192, 974, 941, 1076, 1039, 1018, 1759, 1764, 1758, 1174, 1788, 1798, 1669, 1699, 1773, 1755, 1779, 1750, 1751, 1792, 1720, 1726, 1727, 1720, 1722, 1803, 1805, 1809, 1614, 1609, 1605, 1608, 1571, 1526, 1516, 1448, 755, 807, 900, 10, 48, 924, 950, 1005, 965, 8, 1115, 981, 984, 1135, 2678, 1249, 1171, 1150, 1249, 1320, 1235, 1236, 1228, 1227, 1409, 1456, 1349, 1308, 1513, 1221, 1550, 1567, 1641, 1612, 1740, 1688, 2597, 2598, 2601, 2440, 3160, 3162, 2089, 2166, 2170, 2596, 2171, 2003, 2122, 2126, 2189, 3145, 2182, 2179, 2178, 3143, 2181, 2121, 2122, 2168, 2126, 2180, 2095, 2173, 2174, 2620, 2129, 1686, 1692, 1667, 1647, 1631, 1613, 1596, 1549, 1541, 2647, 1633, 1605, 1608, 1571, 2645, 1507, 1448, 1496, 1516, 1504, 1510, 1508, 1509, 439, 431, 456, 461, 460, 391, 423, 415, 419, 407, 402, 367, 372, 339, 298, 338, 105, 368, 374, 393, 389, 390, 376, 377, 351, 350, 121, 345, 320, 301, 251, 234, 232, 205, 344, 107, 103, 152, 153, 161, 168, 3199, 188, 196, 255, 254, 236, 294, 242, 219, 201, 169, 162, 158, 160, 173. The following high value recreational routes/roads are legal RS 2477 ROW's in the State of Colorado, Delta County, and the BLM does not have the jurisdiction to close them: 3011, 2184, 2191, 3100, 2187, 2026, 2059, 2188, 2192, 3104, 2130, 3009, 2199, 2200, 2111, 2223, 2024, 3006, 2231, 3094, 2579, 2210, 2344, 2243, 2249, 2248, 3074, 2354, 2384, 2296, 2295, 2287, 2304, 2062, 2163, 3163, 2164, 2430, 4006, 3016, 2351, 3140, 2410, 4008, 2324, 2073, 2306, 2459, 3192, 3193, 2350, 2443, 2035, 2336, 2495, 2491, 2159, 3058, 2277, 2465, 2467, 3189, 2472, 2297, 2006, 2265, 2271, 2276, 2135, 2139, 3053, 2489, 3033, 3057, 2031, 2276, 2210, 2579, 2136, 2344, 3164, 2400, 2379, 3014, 2365, 3116, 2251, 2259, 2149, 2153, 2146, 2144, 2145, 2356, 2257, 2048, 2358, 3165, and 3166.

## Route: 373

### Segment: 2238

### Designation

#### Current Designation

Open (All modes of travel)

#### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

#### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

## Rationale

### Designation Criteria

- No designation criteria for this route segment.**

### Rationale for Decision

Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

The following high value recreational routes/roads are legal RS 2477ROW's in the State of Colorado, Delta County, and the BLM does not have the jurisdiction to close them: 3011, 2184, 2191, 3100, 2187, 2026, 2059, 2188, 2192, 3104, 2130, 3009, 2199, 2200, 2111, 2223, 2024, 3006, 2231, 3094, 2579, 2210, 2344, 2243, 2249, 2248, 3074, 2354, 2384, 2296, 2295, 2287, 2304, 2062, 2163, 3163, 2164, 2430, 4006, 3016, 2351, 3140, 2410, 4008, 2324, 2073, 2306, 2459, 3192, 3193, 2350, 2443, 2035, 2336, 2495, 2491, 2159, 3058, 2277, 2465, 2467, 3189, 2472, 2297, 2006, 2265, 2271, 2276, 2135, 2139, 3053, 2489, 3033, 3057, 2031, 2276, 2210, 2579, 2136, 2344, 3164, 2400, 2379, 3014, 2365, 3116, 2251, 2259, 2149, 2153, 2146, 2144, 2145, 2356, 2257, 2048, 2358, 3165, and 3166.

## Route: 375

### Segment: 2226

#### Designation

## Current Designation

Open (All modes of travel)

## Mitigation Criteria

- No Mitigation Criteria for this Route Segment

## Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

## Rationale

### Designation Criteria

- **No designation criteria for this route segment.**

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open (All modes of travel)

**Alternative C:** Admin/Permitted Use Only

**Alternative D:** Foot/Horse

## Public Comments On Route: 375

- No public comments for this Route

## Route: 376

### Segment: 2225

## Designation

### Current Designation

Closed (Rehab)

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

## Rationale

### Designation Criteria

- **Minimize Damage:** NHT – close routes for setting
- **Minimize Harassment:** PPSV- Minimize fragmentation

### Rationale for Decision

- Route was designated to improve natural setting along the Old Spanish National Historic Trail.
- Route was designated to reduce fragmentation in Priority Vegetation types

## Route: 377

### Segment: 2234

#### Designation

##### Current Designation

Vehicles under 50" wide

##### Mitigation Criteria

- Needs Data - Cultural

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- CULTURAL Cultural Class I low
- DENSITY Route density highest in Alt A
- DENSITY Route density medium in Alt E

#### Rationale

##### Designation Criteria

- Recreation:** RMA objectives, Rec opportunities – general, Rec opportunities - specific
- Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open, seek re-route or mitigation

**Alternative C:** Closed (Rehab)

**Alternative D:** Foot/Horse

• The following high value recreational routes/roads are legal RS 2477 ROW's in the State of Colorado, Mesa County and the BLM does not have the jurisdiction to close them: 500, 472, 518, 521, 530, 39, 127, 572, 566, 66, 65, 148, 71, 74, 587, 595, 608, 622, 628, 635, 624, 609, 611, 706, 678, 700, 719, 726, 696, 26, 936, 847, 849, 919, 767, 824, 96, 822, 817, 950, 1021, 900, 2682, 1020, 1003, 1084, 1142, 1184, 1156, 1198, 1349, 1308, 1310, 1238, 1263, 1122, 1170, 1192, 974, 941, 1076, 1039, 1018, 1759, 1764, 1758, 1174, 1788, 1798, 1669, 1699, 1773, 1755, 1779, 1750, 1751, 1792, 1720, 1726, 1727, 1720, 1722, 1803, 1805, 1809, 1614, 1609, 1605, 1608, 1571, 1526, 1516, 1448, 755, 807, 900, 10, 48, 924, 950, 1005, 965, 8, 1115, 981, 984, 1135, 2678, 1249, 1171, 1150, 1249, 1320, 1235, 1236, 1228, 1227, 1409, 1456, 1349, 1308, 1513, 1221, 1550, 1567, 1641, 1612, 1740, 1688, 2597, 2598, 2601, 2440, 3160, 3162, 2089, 2166, 2170, 2596, 2171, 2003, 2122, 2126, 2189, 3145, 2182, 2179, 2178, 3143, 2181, 2121, 2122, 2168, 2126, 2180, 2095, 2173, 2174, 2620, 2129, 1686, 1692, 1667, 1647, 1631, 1613, 1596, 1549, 1541, 2647, 1633, 1605, 1608, 1571, 2645, 1507, 1448, 1496, 1516, 1504, 1510, 1508, 1509, 439, 431, 456, 461, 460, 391, 423, 415, 419, 407, 402, 367, 372, 339, 298, 338, 105, 368, 374, 393, 389, 390, 376, 377, 351, 350, 121, 345, 320, 301, 251, 234, 232, 205, 344, 107, 103, 152, 153, 161, 168, 3199, 188, 196, 255, 254, 236, 294, 242, 219, 201, 169, 162, 158, 160, 173. The following high value recreational routes/roads are legal RS 2477ROW's in the State of Colorado, Delta County, and the BLM does not have the jurisdiction to close them: 3011, 2184, 2191, 3100, 2187, 2026, 2059, 2188, 2192, 3104, 2130, 3009, 2199, 2200, 2111, 2223, 2024, 3006, 2231, 3094, 2579, 2210, 2344, 2243, 2249, 2248, 3074, 2354, 2384, 2296, 2295, 2287, 2304, 2062, 2163, 3163, 2164, 2430, 4006, 3016, 2351, 3140, 2410, 4008, 2324, 2073, 2306, 2459, 3192, 3193, 2350, 2443, 2035, 2336, 2495, 2491, 2159, 3058, 2277, 2465, 2467, 3189, 2472, 2297, 2006, 2265, 2271, 2276, 2135, 2139, 3053, 2489, 3033, 3057, 2031, 2276, 2210, 2579, 2136, 2344, 3164, 2400, 2379, 3014, 2365, 3116, 2251, 2259, 2149, 2153, 2146, 2144, 2145, 2356, 2257, 2048, 2358, 3165, and 3166.

## Route: 378

### Segment: 2218

#### Designation

##### Current Designation

Vehicles under 50" wide

#### Mitigation Criteria

- Needs Data - Cultural

#### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

### Rationale

#### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general, Rec opportunities - specific
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

#### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open, seek re-route or mitigation

**Alternative C:** Closed (Rehab)

**Alternative D:** Foot/Horse

### Public Comments On Route: 378

- No public comments for this Route

### Route: 379

#### Segment: 2248

#### Designation [?](#)

##### Current Designation

Vehicles under 50" wide

##### Mitigation Criteria

- Needs Data - Cultural

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- CULTURAL Cultural Class I low
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E

### Rationale

#### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general, Rec opportunities - specific
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

#### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open, seek re-route or mitigation

**Alternative C:** Closed (Rehab)

**Alternative D:** Foot/Horse

### Public Comments On Route: 379

- No public comments for this Route

### Route: 38

#### Segment: 2802

#### Designation [?](#)

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

### Rationale

#### Designation Criteria

- **Minimize Harassment:** PPSV- Minimize fragmentation, Bighorn – SSR -- summer range, Big game winter range – close

#### Rationale for Decision

- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to reduce the miles of motorized and mechanized routes in bighorn sheep habitat.
- Route was designated to protect big game winter range

### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 38

- No public comments for this Route

## Route: 380

### Segment: 2205

#### Designation

##### Current Designation

Vehicles under 50" wide

##### Mitigation Criteria

- Needs Data - Cultural

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- CULTURAL Cultural Class I low
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E

### Rationale

#### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general, Rec opportunities - specific
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

#### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open, seek re-route or mitigation

**Alternative C:** Closed (Rehab)

**Alternative D:** Foot/Horse

## Public Comments On Route: 380

- No public comments for this Route

## Route: 381

### Segment: 2209

#### Designation

##### Current Designation

Open (All modes of travel)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail

- RANGE Access to range improvement
- RANGE Range access for general livestock management
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

## Rationale

### Designation Criteria

- No designation criteria for this route segment.

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open (All modes of travel)

**Alternative C:** Admin/Permitted Use Only

**Alternative D:** Foot/Horse

## Public Comments On Route: 381

- No public comments for this Route

## Route: 382

### Segment: 2217

## Designation

### Current Designation

Closed (Rehab)

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- CULTURAL Cultural Class I low
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- **Minimize Damage:** NHT – close routes for setting
- **Minimize Harassment:** PPSV- Minimize fragmentation

### Rationale for Decision

- Route was designated to improve natural setting along the Old Spanish National Historic Trail.
- Route was designated to reduce fragmentation in Priority Vegetation types

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 382

- No public comments for this Route

## Route: 383

### Segment: 2206

## Designation

### Current Designation

Closed (Rehab)

### Mitigation Criteria

- Needs Data - Cultural

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A

DENSITY Route density medium in Alt E

## Rationale

### Designation Criteria

- **Minimize Damage:** Fragile soils SSR, NHT – close routes for setting
- **Minimize Harassment:** PPSV- Minimize fragmentation

### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to improve natural setting along the Old Spanish National Historic Trail.
- Route was designated to reduce fragmentation in Priority Vegetation types

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Not Rehabbed)

## Public Comments On Route: 383

- No public comments for this Route

## Route: 384

### Segment: 2243

#### Designation

##### Current Designation

Vehicles under 50" wide

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- CULTURAL Cultural Class I low
- DENSITY Route density highest in Alt A
- DENSITY Route density medium in Alt E

## Rationale

### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Vehicles under 50" wide

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 384

- No public comments for this Route

## Route: 385

### Segment: 2219

#### Designation

##### Current Designation

Open (All modes of travel)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A

DENSITY Route density medium in Alt E

## Rationale

### Designation Criteria

- No designation criteria for this route segment.

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open (All modes of travel)

**Alternative C:** Open (All modes of travel)

**Alternative D:** Admin/Permitted Use Only

## Public Comments On Route: 385

- No public comments for this Route

## Route: 386

### Segment: 2202

## Designation

### Current Designation

Closed (Rehab)

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

## Rationale

### Designation Criteria

- **Minimize Damage:** NHT – close routes for setting

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 386

- No public comments for this Route

## Route: 387

### Segment: 2204

## Designation

### Current Designation

Closed (Rehab)

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- **Minimize Damage:** NHT – close routes for setting
- **Minimize Harassment:** Raptor Potential Habitat, PPSV- Minimize fragmentation

#### Rationale for Decision

- Route was designated to improve natural setting along the Old Spanish National Historic Trail.
- Route was designated to protect potential raptor habitat
- Route was designated to reduce fragmentation in Priority Vegetation types

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

#### Public Comments On Route: 387

- No public comments for this Route

#### Route: 388

##### Segment: 2200

#### Designation [?](#)

##### Current Designation

Vehicles under 50" wide

• I've been involved in the "process" of this NCA since long before the D-E NCA designation. "The Hunting Grounds" area is very personal and dear to me, so I'd like to share a little of my background and how it ties into where we are today. I'd been coming to Grand Junction since 1992, to enjoy the BLM public land opportunities of OHV use, while living in the Denver area. Close to home, solitary, public land opportunities did not exist near Denver. After a couple visits per year to the valley throughout the 1990's, I thought Grand Junction would be a great place to live. I began looking for acreage in/around the valley. When the realtor showed me a 40 acre parcel for sale, accessed via Bean Ranch Road, I had already looked at several others, from Debeque to Glade Park. When I arrived at this said parcel for sale, I said "this is THE one!" In Feb. 2001, I purchased the 40 acre parcel of dry land, which was (and still is) bordered by BLM land on 3 sides. (Note, this mentioned BLM land is now within the D-E NCA Hunting Grounds area.) In Sept. 2002 I made the move to Grand Junction, and in March of 2003 my home was completed and I was able to move onto my 40 acres. The dream I'd so looked forward to achieving was made a reality, as my preferred outdoor recreation activity was (and still is) OHV use, although I enjoy many other types of outdoor recreation. I now had the ability to leave my driveway, on my OHV, and explore diverse trails and see beautiful scenery and wildlife. Let me also mention that being able to reside on this 40 acres wasn't an easy endeavor, however, it was a choice that meant financial and life altering sacrifices, to be able to enjoy the recreation opportunities this location had to offer. One major note supporting that is that there is no piped/city water beyond where you crest the top of the hill of Bean Ranch Rd. All the homes located on the back side of Bean Ranch Rd do not have piped/city drinking water, so those home owners have either drilled a well (minimal) or use cisterns and haul, or have delivered, potable water. Let me tell you, this takes planning & some conditional living. But those are things I was willing to deal with, to occupy a residence in this great area of BLM recreation opportunities that I so desired, and to achieve my personal dreams of living "out of the city" for mental well being. When I first discovered my passion for OHV use, I rode a dirt bike. After about 13 years of riding dirt bikes, I tried atv-ing and discovered I could pack my rack with supplies for a days' outing (or more), and be gone on the trail, enjoying what there was to be seen! Soon after moving to the valley, I joined the WSATVA and made several friends who were atv-ers, so that has been my main OHV method for the past 12 years. Although WSATVA did welcome me in the beginning, as a dirt biker! For years, I have been able to leave my Bean Ranch Rd property, on or in my OHV of choice, and explore the existing diverse roads and trails, within the area known as The Hunting Grounds. These roads & trails lead to spectacular viewing accesses of the Gunnison River, from the canyon edge. There are also railroad track & tunnel views, and the

major sites of the Dominguez Canyon Wilderness area and Cactus Park across the river. I have taken many friends and family to see these splendorous sites, when they have visited. I'd also like to include that any specific trail #'s that I do not mention, that are not currently listed as potential closures on Alternatives B or E, I want to remain open. I do not mention trails which I did not find threatened for closure. My desire is for The Hunting Grounds area for the existing roads and trails to remain open and to remain as multi-use. I will also acknowledge the need for protecting precious resources within this area. While attending many meetings leading up to the DRMP being executed, I found it somewhat frustrating, and perhaps aggravating, to learn how many people didn't even know of The Hunting Grounds existence until the D-E NCA designation came and the RMP process that has followed. And I'm just amazed at how now those folks who have newly experienced it, want use specific trails with government rules and regulations to be put into place regarding the do's and don'ts. Then, to hear those folks' comments to recommend adding staging areas, with information kiosks, bathrooms, and improved parking areas is just jaw dropping to me. Prior to the past 4-5 years, very few Mesa County residents and mostly local residents of Bean Ranch Road & Whitewater area had knowledge about The Hunting Grounds zone, and its spectacular BLM recreation opportunities, which currently include multi-use activities on roads and trails. I've come to learn that it was not ok, for the residents who live in that area, who sought land for their homes to be built on, to have driveway access to enjoy activities they love, and not ok to be privy to this area without the rest of Mesa County and beyond knowing also. I guess that goes with "if you build it, they will come" motto. I also find the requests for use specific trails, vs. multi-use, for reason of user conflicts and desire for quiet use trails un-necessary, as if anyone has spent any time in The Hunting Grounds area, you will find this is not a highly used public area, and if you even see other users, it is a minimal and infrequent experience. I do know that the residents who live in that area, want all existing trails to remain open and to multi-use. As we all know, "Alternative A", no change", really isn't a real alternative for this future planning, right? Alternative A would be my first choice for the future of this area. Leave it as it is, because it IS NOT BROKEN! In attempting to navigate the D-E NCA DRMP website, I thought in public meetings, Katie Stevens had said you could click on a trail slated for closure and it would give the reason. I was not successful in finding this resourceful tool, so without that information, my comments continue based on what I see for closure on the maps.

## Route: 391

### Segment: 2228

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Minimize Damage:** NHT – close routes for setting
- **Minimize Harassment:** PPSV- Minimize fragmentation

##### Rationale for Decision

- Route was designated to improve natural setting along the Old Spanish National Historic Trail.
- Route was designated to reduce fragmentation in Priority Vegetation types

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

• As a choice second to Alternative A (only because we know that isn't a real alternative), for the most part, I could agree with the Advisory Councils Alternative E trail designation proposals, with exceptions as follows: Trail 419 is slated for closure, but provides closer access to the canyons' edge, with canyon and river views. I would like to see that trail remain open for OHV use. I would like to see trails 391, 416 & 431 remain open, and connector trails to create loops between them be added, near the private property boundaries. Each of these trails provides unique & diverse OHV riding opportunities. Loops would be a better alternative than closure.

## Route: 392

### Segment: 2241

#### Designation [?](#)

##### Current Designation

Vehicles under 50" wide

##### Mitigation Criteria

- Confirm route is on public land

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- Recreation:** RMA objectives, Rec opportunities – general
- Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Admin/Permitted Use Only

**Alternative C:** Closed (Rehab)

**Alternative D:** Admin/Permitted Use Only

## Public Comments On Route: 392

- No public comments for this Route

## Route: 394

### Segment: 2164

#### Designation

##### Current Designation

Vehicles under 50" wide

##### Mitigation Criteria

- Confirm route is on public land

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

#### Rationale

##### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Vehicles under 50" wide

**Alternative C:** Admin/Permitted Use Only

## Designation

### Current Designation

Vehicles under 50" wide

### Mitigation Criteria

- Needs Data - SSS Plants
- Possible reroute out of the ACEC.

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- RIPARIAN Riparian 3 stream crossings
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I low
- SMAs River Rims ACEC
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E
- SSPLANT Special Status Species Colorado hookless cactus

## Rationale

### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Vehicles under 50" wide

**Alternative B:** Closed, seek re-route or mitigation

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed, seek re-route or mitigation

## Public Comments On Route: 4000

Comment ID: 000000106-210

• 4000-3016-3040-3043-2423 I support the Quiet Trail Group's position of designating this Mtn Bike, Horse and Foot only. It would be a component of the Mtn Bike long-distance trail from Whitewater to Delta. Part of it is also used for horseback riding events. There are great dramatic views looking down the cliffs at the Gunnison far below. Walking along this route gives me the time to contemplate the grandeur of the area, from the mighty power of water carving canyons over thousands of years, to the contrast of the snow-capped Mesa to the east. It is great to experience the winds of spring that mark the changing of the seasons in a quiet setting, so having this route be non-motorized is important to me.

Organization, commenter: Quiet Trails Group, Sherry Schenk

Comment ID: 000000115-77

• Routes 3040, 4000: We understand that BLM has flagged this trail for ATV use, and QTG would like to see this Route reverted back to its historic use as a single track route, and limited to horse, foot, and bike. We believe this would add to the experience of a possible long distance connector trail, because it gives people the opportunity to get away from the saltbrush along the Highway and instead gives the pleasant opportunity to travel along the rim

Organization, commenter: Grand Valley Motorized Recreation Coalition, James Solomon

Comment ID: 000000143-9

• Contiguous Motorized Route traversing the Hunting Ground: Proposed Route (4000) which starts at Dominguez Escalante Road near Hwy 50 seems to make sense for a portion of a trail that would traverse the Hunting Ground area and connect with Delta. The same holds true for (2164). We favor the implementation of a contiguous trail the length of the Hunting Ground and would connect to Delta

Organization, commenter: COPMOBA, Scott Winans

Comment ID: 000000168-2

• Hunting Grounds In the Hunting Grounds area, a longer distance trail similar to Kokopelli's, Tabeguache, and Paradox Trails, would be of interest to this user group[COPMOBA]. Starting at the Old Spanish Trail in Orchard Mesa and ending in Delta, this trail idea is

currently feasible when using a mix of single track, ATV width trail, jeep road and even Highway 50 for a few short sections. With very little trail construction making some connections to existing trails, nearly all of this highway use can be avoided. The major attraction of this area is the views from the rim above the Gunnison River in both directions. The existing trail and any trail construction should be routed to take advantage of this valuable view resource. The following recommendations are in the spirit of developing this long distance trail. Starting from the Kannah Creek area we recommend leaving 152 open to mountain bike use for a possible future connection to the lower Kannah Creek road. Possibilities included deeded access across private land, or new construction from the existing small portion of BLM land which the road accesses. Continuing, use existing full size and ATV trail to the end of 440, or a portion of 431, to access small drainage and then construct new trail to access Bridgeport Road. Then use 438, 449 and 2163 to access 2426 and 2427 to Dominguez Road (or 3098 and 3163 and then a very short new connector to 3133 out to highway) From Dominguez Road use 4000 to 3043, then single track 4001,4005,4006,4007 and 3148 to reach Escalante Road. Very nice views exist in this area from the trail. The trail would then cross Escalante road to 2073 with a connection being built to 2053. This short deviation from the Escalante road would provide a safer route for mountain bikes than the twisty road with blind corners and high speed full size vehicles. The trail would cross the river on main bridge and immediately turn left and follow 2313, 2461 and 2462 with a connection to Delta via 2352, 470 2476 and 2489. This area using borders of the northern most point of the Escalante Rim, south to the Rim Road then using 2354 as the border on the west, the main county road on the east and then back down to the rim above river on the north would provide an excellent mountain bike emphasis area for the Delta community. Visitors and local users could ride from town or drive a very short distance. Quiet Use trails are rare in this area and this topography would allow for a rewarding experience for hiker, horse and mountain bike users. This scenario would provide an area similar to the Lunch Loops and Mack Ridge areas. With a long distance rail anchoring a Quiet Use stack loop system of trails which are extremely popular and very beneficial to users and the community at trail at large

• The following high value recreational routes/roads are legal RS 2477 ROW's in the State of Colorado, Mesa County and the BLM does not have the jurisdiction to close them: 500, 472, 518, 521, 530, 39, 127, 572, 566, 66, 65, 148, 71, 74, 587, 595, 608, 622, 628, 635, 624, 609, 611, 706, 678, 700, 719, 726, 696, 26, 936, 847, 849, 919, 767, 824, 96, 822, 817, 950, 1021, 900, 2682, 1020, 1003, 1084, 1142, 1184, 1156, 1198, 1349, 1308, 1238, 1263, 1122, 1170, 1192, 974, 941, 1076, 1039, 1018, 1759, 1764, 1758, 1174, 1788, 1798, 1669, 1699, 1773, 1755, 1779, 1750, 1751, 1792, 1720, 1726, 1727, 1720, 1722, 1803, 1805, 1809, 1614, 1609, 1605, 1608, 1571, 1526, 1516, 1448, 755, 807, 900, 10, 48, 924, 950, 1005, 965, 8, 1115, 981, 984, 1135, 2678, 1249, 1171, 1150, 1249, 1320, 1235, 1236, 1228, 1227, 1409, 1456, 1349, 1308, 1513, 1221, 1550, 1567, 1641, 1612, 1740, 1688, 2597, 2598, 2601, 2440, 3160, 3162, 2089, 2166, 2170, 2596, 2171, 2003, 2122, 2126, 2189, 3145, 2182, 2179, 2178, 3143, 2181, 2121, 2122, 2168, 2126, 2180, 2095, 2173, 2174, 2620, 2129, 1686, 1692, 1667, 1647, 1631, 1613, 1596, 1549, 1541, 2647, 1633, 1605, 1608, 1571, 2645, 1507, 1448, 1496, 1516, 1504, 1510, 1508, 1509, 439, 431, 456, 461, 460, 391, 423, 415, 419, 407, 402, 367, 372, 339, 298, 338, 105, 368, 374, 393, 389, 390, 376, 377, 351, 350, 121, 345, 320, 301, 251, 234, 232, 205, 344, 107, 103, 152, 153, 161, 168, 3199, 188, 196, 255, 254, 236, 294, 242, 219, 201, 169, 162, 158, 160, 173. The following high value recreational routes/roads are legal RS 2477ROW's in the State of Colorado, Delta County, and the BLM does not have the jurisdiction to close them: 3011, 2184, 2191, 3100, 2187, 2026, 2059, 2188, 2192, 3104, 2130, 3009, 2199, 2200, 2111, 2223, 2024, 3006, 2231, 3094, 2579, 2210, 2344, 2243, 2249, 2248, 3074, 2354, 2384, 2296, 2295, 2287, 2304, 2062, 2163, 3163, 2164, 2430, 4006, 3016, 2351, 3140, 2410, 4008, 2324, 2073, 2306, 2459, 3192, 3193, 2350, 2443, 2035, 2336, 2495, 2491, 2159, 3058, 2277, 2465, 2467, 3189, 2472, 2297, 2006, 2265, 2271, 2276, 2135, 2139, 3053, 2489, 3033, 3057, 2031, 2276, 2210, 2579, 2136, 2344, 3164, 2400, 2379, 3014, 2365, 3116, 2251, 2259, 2149, 2153, 2146, 2144, 2145, 2356, 2257, 2048, 2358, 3165, and 3166.

## Route: 4007

### Segment: 3060

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- WILDLIFE Pronghorn antelope winter concentration areas
- CULTURAL Cultural Direct impact
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Minimize Harassment:** Pronghorn - Close and rehab - wincon, PPSV- Minimize fragmentation

##### Rationale for Decision

- Route was designated to reduce fragmentation in Priority Vegetation types

#### Previous Alternatives Analyzed

**Alternative A:** Foot/Horse/Mechanized/Motorcycle

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 4007

Organization, commenter: COPMOBA, Scott Winans

Comment ID: 00000168-2

• Hunting GroundsIn the Hunting Grounds area, a longer distance trail similar to Kokopelli's, Tabeguache, and Paradox Trails, would be of interest to this user group[COPMOBA]. Starting at the Old Spanish Trail in Orchard Mesa and ending in Delta, this trail idea is currently feasible when using a mix of single track, ATV width trail, jeep road and even Highway 50 for a few short sections. With very little trail construction making some connections to existing trails, nearly all of this highway use can be avoided. The major attraction of this area is the views from the rim above the Gunnison River in both directions. The existing trail and any trail construction should be routed to take advantage of this valuable view resource.The following recommendations are in the spirit of developing this long distance trail.Starting from the Kannah Creek area we recommend leaving 152 open to mountain bike use for a possible future connection to the lower Kannah Creek road. Possibilities included deeded access across private land, or new construction from the existing small portion of BLM land which the road accesses. Continuing, use existing full size and ATV trail to the end of 440, or a portion of 431 ,to access small drainage and then construct new trail to access Bridgeport Road. Then use 438, 449 and 2163 to access 2426 and 2427 to Dominguez Road (or 3098 and 3163 and then a very short new connector to 3133 out to highway) From Dominguez Road use 4000 to 3043, then single track 4001,4005,4006,4007 and 3148 to reach Escalante Road. Very nice vi ews ex ist in this area from the trail. The trail would then cross Escalante road to 2073 with a connection being built to 2053. This short deviation from the Escalante road would provide a safer route for mountain bikes than the twisty road with blind comers and high speed full size vehicles. The trail would cross the river on main bridge and immediatel y turn left and follow 2313, 2461 and 2462 with a connection to Delta via 2352, 470 2476 and 2489. This area using borders of the northern most point of the Escalante Rim, south to the Rim Road then using 2354 as the border on the west, the main county road on the east and then back down to the rim above river on the north would provide an xcellent mountain bike emphasis area for the Delta community. Visitors and local users could ride from town or drive a very short distance. Quiet Use trails are rare in this area and this topography would allow for a rewarding experience for hiker, horse and mountain bike users. This scenario would provide an area similar to the Lunch Loops and Mack Ridge areas. With a long distance rail anchoring a Quiet Use stack loop system of trails which are extremely popular and very beneficial to users and the community at trail at large

## Route: 4008

## Segment: 3063

### Designation

#### Current Designation

Closed (Not Rehabbed)

#### Designation Following Mitigation

Foot/Horse

#### Mitigation Criteria

- Reroute
- Needs Data - SSS Plants
- Cultural
- Special Species Plant

#### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- WILDLIFE Pronghorn antelope winter concentration areas
- CULTURAL Cultural Indirect impact
- SMAs River Rims ACEC
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- SSPLANT Special Status Species Colorado hookless cactus

### Rationale

#### Designation Criteria

- **Minimize Damage:** Cactus – reduce density within 200m, Cultural – SSR within 100m sites
- **Minimize Harassment:** PPSV- Minimize fragmentation
- **Wilderness / Natural Area:** ACEC-River Rims close within 200m cactus
- **Recreation:** RMA objectives, Rec opportunities - specific, Rec opportunities – general
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

#### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

### Previous Alternatives Analyzed

**Alternative A:** Foot/Horse/Mechanized/Motorcycle

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed, seek re-route or mitigation

## Segment: 3213

Organization, commenter: Quiet Trails Group, Sherry Schenk

Comment ID: 000000115-75

• Routes 2328, 2327, 2076, 4008, 2074: As long as there is not a conflicting resource use, QTG recommends leaving these routes open to horse and foot as it offers nice views into the canyon. Specifically, we are concerned about disturbance to any prairie dog town in the vicinity and would support re-routing any of these or any other trails that could hurt prairie dog habitat and colonies in the southern portion of this unit.

The following high value recreational routes/roads are legal RS 2477ROW's in the State of Colorado, Delta County, and the BLM does not have the jurisdiction to close them: 3011, 2184, 2191, 3100, 2187, 2026, 2059, 2188, 2192, 3104, 2130, 3009, 2199, 2200, 2111, 2223, 2024, 3006, 2231, 3094, 2579, 2210, 2344, 2243, 2249, 2248, 3074, 2354, 2384, 2296, 2295, 2287, 2304, 2062, 2163, 3163, 2164, 2430, 4006, 3016, 2351, 3140, 2410, 4008, 2324, 2073, 2306, 2459, 3192, 3193, 2350, 2443, 2035, 2336, 2495, 2491, 2159, 3058, 2277, 2465, 2467, 3189, 2472, 2297, 2006, 2265, 2271, 2276, 2135, 2139, 3053, 2489, 3033, 3057, 2031, 2276, 2210, 2579, 2136, 2344, 3164, 2400, 2379, 3014, 2365, 3116, 2251, 2259, 2149, 2153, 2146, 2144, 2145, 2356, 2257, 2048, 2358, 3165, and 3166.

## Route: 4009

### Segment: 3088

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- Needs Data - Cultural

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- WILDLIFE Pronghorn antelope winter concentration areas
- CULTURAL Cultural Class I low
- SMAs River Rims ACEC
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- SSPLANT Special Status Species Colorado hookless cactus

### Rationale

#### Designation Criteria

- **Minimize Damage:** Cactus – reduce density within 200m, Cultural – SSR within 100m sites
- **Minimize Harassment:** PPSV- Minimize fragmentation
- **Wilderness / Natural Area:** ACEC-River Rims close within 200m cactus

#### Rationale for Decision

- Route was designated to reduce the density of routes within 200 meters of known Colorado hookless Cactus occurrences.
- Route was designated to minimize impacts to cultural resources.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect Colorado hookless cactus within the River Rims ACEC

### Previous Alternatives Analyzed

## Public Comments On Route: 4009

- No public comments for this Route

## Route: 401

### Segment: 2162

#### Designation

##### Current Designation

Vehicles under 50" wide

##### Mitigation Criteria

- Confirm route is on public land

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

#### Rationale

##### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Vehicles under 50" wide

**Alternative C:** Admin/Permitted Use Only

**Alternative D:** Foot/Horse

## Public Comments On Route: 4010

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 00000135-28

- I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 4011

### Segment: 3198

#### Designation

##### Current Designation

Closed (Not Rehabbed)

##### Designation Following Mitigation

Foot/Horse

##### Mitigation Criteria

- Reroute
- Needs Data - SSS Plants
- Cultural
- Special Species Plant

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- WILDLIFE Pronghorn antelope winter concentration areas
- CULTURAL Cultural Class I low
- SMAs River Rims ACEC
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- SSPLANT Special Status Species Colorado hookless cactus

#### Rationale

##### Designation Criteria

- Minimize Damage:** Cactus – reduce density within 200m, Cultural – SSR within 100m sites
- Minimize Harassment:** PPSV- Minimize fragmentation
- Wilderness / Natural Area:** ACEC-River Rims close within 200m cactus
- Recreation:** RMA objectives, Rec opportunities - specific, Rec opportunities – general
- Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

#### Designation

##### Current Designation

Closed (Rehab)

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Direct impact
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- **Minimize Damage:** Cultural – SSR within 100m sites
- **Minimize Harassment:** PPSV- Minimize fragmentation, Bighorn – SSR -- summer range, Big game winter range – close

### Rationale for Decision

- Route was designated to minimize impacts to cultural resources.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to reduce the miles of motorized and mechanized routes in bighorn sheep habitat.
- Route was designated to protect big game winter range

• The following high value recreational routes/roads are legal RS 2477 ROW's in the State of Colorado, Mesa County and the BLM does not have the jurisdiction to close them: 500, 472, 518, 521, 530, 39, 127, 572, 566, 66, 65, 148, 71, 74, 587, 595, 608, 622, 628, 635, 624, 609, 611, 706, 678, 700, 719, 726, 696, 26, 936, 847, 849, 919, 767, 824, 96, 822, 817, 950, 1021, 900, 2682, 1020, 1003, 1084, 1142, 1184, 1156, 1198, 1349, 1308, 1310, 1238, 1263, 1122, 1170, 1192, 974, 941, 1076, 1039, 1018, 1759, 1764, 1758, 1174, 1788, 1798, 1669, 1699, 1773, 1755, 1779, 1750, 1751, 1792, 1720, 1726, 1727, 1720, 1722, 1803, 1805, 1809, 1614, 1609, 1605, 1608, 1571, 1526, 1516, 1448, 755, 807, 900, 10, 48, 924, 950, 1005, 965, 8, 1115, 981, 984, 1135, 2678, 1249, 1171, 1150, 1249, 1320, 1235, 1236, 1228, 1227, 1409, 1456, 1349, 1308, 1513, 1221, 1550, 1567, 1641, 1612, 1740, 1688, 2597, 2598, 2601, 2440, 3160, 3162, 2089, 2166, 2170, 2596, 2171, 2003, 2122, 2126, 2189, 3145, 2182, 2179, 2178, 3143, 2181, 2121, 2122, 2168, 2126, 2180, 2095, 2173, 2174, 2620, 2129, 1686, 1692, 1667, 1647, 1631, 1613, 1596, 1549, 1541, 2647, 1633, 1605, 1608, 1571, 2645, 1507, 1448, 1496, 1516, 1504, 1510, 1508, 1509, 439, 431, 456, 461, 460, 391, 423, 415, 419, 407, 402, 367, 372, 339, 298, 338, 105, 368, 374, 393, 389, 390, 376, 377, 351, 350, 121, 345, 320, 301, 251, 234, 232, 205, 344, 107, 103, 152, 153, 161, 168, 3199, 188, 196, 255, 254, 236, 294, 242, 219, 201, 169, 162, 158, 160, 173. The following high value recreational routes/roads are legal RS 2477 ROW's in the State of Colorado, Delta County, and the BLM does not have the jurisdiction to close them: 3011, 2184, 2191, 3100, 2187, 2026, 2059, 2188, 2192, 3104, 2130, 3009, 2199, 2200, 2111, 2223, 2024, 3006, 2231, 3094, 2579, 2210, 2344, 2243, 2249, 2248, 3074, 2354, 2384, 2296, 2295, 2287, 2304, 2062, 2163, 3163, 2164, 2430, 4006, 3016, 2351, 3140, 2410, 4008, 2324, 2073, 2306, 2459, 3192, 3193, 2350, 2443, 2035, 2336, 2495, 2491, 2159, 3058, 2277, 2465, 2467, 3189, 2472, 2297, 2006, 2265, 2271, 2276, 2135, 2139, 3053, 2489, 3033, 3057, 2031, 2276, 2210, 2579, 2136, 2344, 3164, 2400, 2379, 3014, 2365, 3116, 2251, 2259, 2149, 2153, 2146, 2144, 2145, 2356, 2257, 2048, 2358, 3165, and 3166.

## Route: 4020

### Segment: 3278

#### Designation

##### Current Designation

Admin/Permitted Use Only

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- LANDS DMEA access route
- SOIL Soils Fragile
- WILDLIFE Mule deer severe winter range
- RIPARIAN Riparian crossing perennial stream
- CULTURAL Cultural Class I moderate

- SMAs River Rims ACEC
- SMAs Wild and Scenic River area
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- SSPLANT Special Status Species Colorado hookless cactus

## Rationale

### Designation Criteria

- **Minimize Damage:** Cactus – reduce density within 200m
- **Wilderness / Natural Area:** ACEC-River Rims close within 200m cactus

### Rationale for Decision

- Route was designated to ensure access to rights-of-way, private property, and livestock grazing facilities.

## Previous Alternatives Analyzed

## Public Comments On Route: 4022

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 00000135-28

- I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Public Comments On Route: 4035

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 000000135-28

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Public Comments On Route: 4036

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 00000135-28

- I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 408

### Segment: 2094

## Designation

### Current Designation

Closed (Rehab)

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- **Minimize Damage:** Fragile soils SSR, NHT – close routes for setting
- **Minimize Harassment:** PPSV- Minimize fragmentation

### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to improve natural setting along the Old Spanish National Historic Trail.
- Route was designated to reduce fragmentation in Priority Vegetation types

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 408

- No public comments for this Route

## Route: 409

### Segment: 2096

#### Designation [?](#)

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- CULTURAL Cultural Indirect impact
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- Minimize Damage:** Fragile soils SSR, NHT – close routes for setting
- Minimize Harassment:** PPSV- Minimize fragmentation

##### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to improve natural setting along the Old Spanish National Historic Trail.
- Route was designated to reduce fragmentation in Priority Vegetation types

## Route: 41

### Segment: 2772

#### Designation [?](#)

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density highest in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- Minimize Harassment:** Bighorn – SSR -- summer range, PPSV- Minimize fragmentation, Big game winter range – close

##### Rationale for Decision

- Route was designated to reduce the miles of motorized and mechanized routes in bighorn sheep habitat.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

## Public Comments On Route: 414

- No public comments for this Route

## Route: 415

### Segment: 2100

### Designation

#### Current Designation

Vehicles under 50" wide

### Mitigation Criteria

- Reroute
- Cultural

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- CULTURAL Cultural Indirect impact
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general, Rec opportunities - specific
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Admin/Permitted Use Only

**Alternative C:** Admin/Permitted Use Only

**Alternative D:** Foot/Horse/Mechanized (but still open to motorized for admin/permitted access)

• The following high value recreational routes/roads are legal RS 2477 ROW's in the State of Colorado, Mesa County and the BLM does not have the jurisdiction to close them: 500, 472, 518, 521, 530, 39, 127, 572, 566, 66, 65, 148, 71, 74, 587, 595, 608, 622, 628, 635, 624, 609, 611, 706, 678, 700, 719, 726, 696, 26, 936, 847, 849, 919, 767, 824, 96, 822, 817, 950, 1021, 900, 2682, 1020, 1003, 1084, 1142, 1184, 1156, 1198, 1349, 1308, 1310, 1238, 1263, 1122, 1170, 1192, 974, 941, 1076, 1039, 1018, 1759, 1764, 1758, 1174, 1788, 1798, 1669, 1699, 1773, 1755, 1779, 1750, 1751, 1792, 1720, 1726, 1727, 1720, 1722, 1803, 1805, 1809, 1614, 1609, 1605, 1608, 1571, 1526, 1516, 1448, 755, 807, 900, 10, 48, 924, 950, 1005, 965, 8, 1115, 981, 984, 1135, 2678, 1249, 1171, 1150, 1249, 1320, 1235, 1236, 1228, 1227, 1409, 1456, 1349, 1308, 1513, 1221, 1550, 1567, 1641, 1612, 1740, 1688, 2597, 2598, 2601, 2440, 3160, 3162, 2089, 2166, 2170, 2596, 2171, 2003, 2122, 2126, 2189, 3145, 2182, 2179, 2178, 3143, 2181, 2121, 2122, 2168, 2126, 2180, 2095, 2173, 2174, 2620, 2129, 1686, 1692, 1667, 1647, 1631, 1613, 1596, 1549, 1541, 2647, 1633, 1605, 1608, 1571, 2645, 1507, 1448, 1496, 1516, 1504, 1510, 1508, 1509, 439, 431, 456, 461, 460, 391, 423, 415, 419, 407, 402, 367, 372, 339, 298, 338, 105, 368, 374, 393, 389, 390, 376, 377, 351, 350, 121, 345, 320, 301, 251, 234, 232, 205, 344, 107, 103, 152, 153, 161, 168, 3199, 188, 196, 255, 254, 236, 294, 242, 219, 201, 169, 162, 158, 160, 173. The following high value recreational routes/roads are legal RS 2477ROW's in the State of Colorado, Delta County, and the BLM does not have the jurisdiction to close them: 3011, 2184, 2191, 3100, 2187, 2026, 2059, 2188, 2192, 3104, 2130, 3009, 2199, 2200, 2111, 2223, 2024, 3006, 2231, 3094, 2579, 2210, 2344, 2243, 2249, 2248, 3074, 2354, 2384, 2296, 2295, 2287, 2304, 2062, 2163, 3163, 2164, 2430, 4006, 3016, 2351, 3140, 2410, 4008, 2324, 2073, 2306, 2459, 3192, 3193, 2350, 2443, 2035, 2336, 2495, 2491, 2159, 3058, 2277, 2465, 2467, 3189, 2472, 2297, 2006, 2265, 2271, 2276, 2135, 2139, 3053, 2489, 3033, 3057, 2031, 2276, 2210, 2579, 2136, 2344, 3164, 2400, 2379, 3014, 2365, 3116, 2251, 2259, 2149, 2153, 2146, 2144, 2145, 2356, 2257, 2048, 2358, 3165, and 3166.

## Route: 416

### Segment: 2190

### Designation

#### Current Designation

Closed (Rehab)

#### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

#### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Indirect impact
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- **Minimize Damage:** NHT – close routes for setting
- **Minimize Harassment:** PPSV- Minimize fragmentation

### Rationale for Decision

- Route was designated to improve natural setting along the Old Spanish National Historic Trail.
- Route was designated to reduce fragmentation in Priority Vegetation types

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 416

Organization, commenter: Tracey Rohde

Comment ID: 000000103-2

- As a choice second to Alternative A (only because we know that isn't a real alternative), for the most part, I could agree with the Advisory Councils Alternative E trail designation proposals, with exceptions as follows: Trail 419 is slated for closure, but provides closer access to the canyons' edge, with canyon and river views. I would like to see that trail remain open for OHV use. I would like to see trails 391, 416 & 431 remain open, and connector trails to create loops between them be added, near the private property boundaries. Each of these trails provides unique & diverse OHV riding opportunities. Loops would be a better alternative than closure.

## Route: 417

### Segment: 1999

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- CULTURAL Cultural Indirect impact
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- Minimize Damage:** NHT – close routes for setting
- Minimize Harassment:** PPSV- Minimize fragmentation

##### Rationale for Decision

- Route was designated to improve natural setting along the Old Spanish National Historic Trail.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 417

- No public comments for this Route

## Route: 418

### Segment: 2003

#### Designation

##### Current Designation

Closed (Not Rehabbed)

##### Designation Following Mitigation

Vehicles under 50" wide

##### Mitigation Criteria

- Cultural

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- CULTURAL Cultural Indirect impact
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

#### Rationale

### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities - specific
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

### Public Comments On Route: 418

Organization, commenter: Quiet Trails Group, Sherry Schenk

Comment ID: 000000115-70

- Routes 418, 420, 421: Unless there is a conflicting resource issue, the QTG supports leaving these routes open for ATV use because it is a nice route that leads to an overlook

### Route: 419

#### Segment: 2061

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- CULTURAL Cultural Indirect impact
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Minimize Damage:** Fragile soils SSR, NHT – close routes for setting
- **Minimize Harassment:** PPSV- Minimize fragmentation

##### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to improve natural setting along the Old Spanish National Historic Trail.
- Route was designated to reduce fragmentation in Priority Vegetation types

### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

## Route: 42

### Segment: 2768

#### Designation [?](#)

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- Minimize Harassment:** Bighorn – SSR -- summer range, PPSV- Minimize fragmentation, Big game winter range – close

##### Rationale for Decision

- Route was designated to reduce the miles of motorized and mechanized routes in bighorn sheep habitat.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

##### Designation Following Mitigation

Vehicles under 50" wide

##### Mitigation Criteria

- Cultural

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- CULTURAL Cultural Direct impact
- SMAs Wild and Scenic River area
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities - specific
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 421

Organization, commenter: Quiet Trails Group, Sherry Schenk

Comment ID: 000000115-70

- Routes 418, 420, 421: Unless there is a conflicting resource issue, the QTG supports leaving these routes open for ATV use because it is a nice route that leads to an overlook

## Route: 422

### Segment: 1994

#### Designation [?](#)

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- CULTURAL Cultural Indirect impact
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Minimize Damage:** NHT – close routes for setting
- **Minimize Harassment:** PPSV- Minimize fragmentation

##### Rationale for Decision

- Route was designated to improve natural setting along the Old Spanish National Historic Trail.
- Route was designated to reduce fragmentation in Priority Vegetation types

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 422

- No public comments for this Route

## Route: 423

### Segment: 2004

#### Designation ?

##### Current Designation

Vehicles under 50" wide

##### Mitigation Criteria

- Reroute

## Route: 424

### Segment: 1966

#### Designation ?

## Current Designation

Vehicles under 50" wide

## Mitigation Criteria

- Reroute
- Cultural

## Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- CULTURAL Cultural Direct impact
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general, Rec opportunities - specific
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open, seek re-route or mitigation

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed, seek re-route or mitigation

## Public Comments On Route: 424

- No public comments for this Route

## Route: 425

### Segment: 1959

## Designation

### Current Designation

Closed (Rehab)

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- CULTURAL Cultural Indirect impact
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- **Minimize Damage:** Fragile soils SSR, Cultural – SSR within 100m sites, NHT – close routes for setting
- **Minimize Harassment:** PPSV- Minimize fragmentation

### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to minimize impacts to cultural resources.
- Route was designated to improve natural setting along the Old Spanish National Historic Trail.
- Route was designated to reduce fragmentation in Priority Vegetation types

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

• As a choice second to Alternative A (only because we know that isn't a real alternative), for the most part, I could agree with the Advisory Councils Alternative E trail designation proposals, with exceptions as follows: Trail 419 is slated for closure, but provides closer access to the canyons' edge, with canyon and river views. I would like to see that trail remain open for OHV use. I would like to see trails 391, 416 & 431 remain open, and connector trails to create loops between them be added, near the private property boundaries. Each of these trails provides unique & diverse OHV riding opportunities. Loops would be a better alternative than closure.

Comment ID: 000000115-13

• The Hunting Ground TMP-Level Comments: We think the route decisions presented in Alt E show a balanced approach to recreational uses and understand and support the idea of some motorized and some quiet-use trails within this unit. However, we do have some specific suggestions: Planned Long-Distance Trail: The QTG would advocate that the majority of the planned long-distance trail from Whitewater to Delta be managed for mountain bike, horse and foot traffic, with sections open to motorized use (ATVs in places and full vehicles in others). We believe that mountain bikers are most likely to take advantage of the full distances as they can more readily set up a car shuttle than ATV folks who need trailers at both ends. To work towards creating this long-distance quiet use trail opportunity, we support a single track trail for bike, horse and foot use be added to route 440 or 441 to join Bridgeport road where feasible. This type of trail would provide a great long-distance quiet trail experience along the rim that would be much more interesting than a trail that joins onto some eastern part of route 431. Quiet Trail users love this area for the ability to see pronghorn, as well as the amazing opportunity to look down into the canyon and river, as well as being high enough on the rim to see Grand Mesa, Garfield and the whole Grand Valley.

• Hunting Grounds In the Hunting Grounds area, a longer distance trail similar to Kokopelli's, Tabeguache, and Paradox Trails, would be of interest to this user group [COPMOBA]. Starting at the Old Spanish Trail in Orchard Mesa and ending in Delta, this trail idea is currently feasible when using a mix of single track, ATV width trail, jeep road and even Highway 50 for a few short sections. With very little trail construction making some connections to existing trails, nearly all of this highway use can be avoided. The major attraction of this area is the views from the rim above the Gunnison River in both directions. The existing trail and any trail construction should be routed to take advantage of this valuable view resource. The following recommendations are in the spirit of developing this long distance trail. Starting from the Kannah Creek area we recommend leaving 152 open to mountain bike use for a possible future connection to the lower Kannah Creek road. Possibilities included deeded access across private land, or new construction from the existing small portion of BLM land which the road accesses. Continuing, use existing full size and ATV trail to the end of 440, or a portion of 431, to access small drainage and then construct new trail to access Bridgeport Road. Then use 438, 449 and 2163 to access 2426 and 2427 to Dominguez Road (or 3098 and 3163 and then a very short new connector to 3133 out to highway) From Dominguez Road use 4000 to 3043, then single track 4001, 4005, 4006, 4007 and 3148 to reach Escalante Road. Very nice views exist in this area from the trail. The trail would then cross Escalante road to 2073 with a connection being built to 2053. This short deviation from the Escalante road would provide a safer route for mountain bikes than the twisty road with blind corners and high speed full size vehicles. The trail would cross the river on main bridge and immediately turn left and follow 2313, 2461 and 2462 with a connection to Delta via 2352, 470, 2476 and 2489. This area using borders of the northern most point of the Escalante Rim, south to the Rim Road then using 2354 as the border on the west, the main county road on the east and then back down to the rim above river on the north would provide an excellent mountain bike emphasis area for the Delta community. Visitors and local users could ride from town or drive a very short distance. Quiet Use trails are rare in this area and this topography would allow for a rewarding experience for hiker, horse and mountain bike users. This scenario would provide an area similar to the Lunch Loops and Mack Ridge areas. With a long distance rail anchoring a Quiet Use stack loop system of trails which are extremely popular and very beneficial to users and the community at trail at large

• Hunting Grounds Recreation Management Area Page 117: The preferred alternative identifies a "mixed-use connective trail between Whitewater and Delta." Mesa County is in the process of adopting the Grand Valley Trails Master Plan (GVTMP), which includes the

Whitewater area. The draft GVTMP includes the following note: "Future trail connections to Delta County and the Dominguez-Escalante NCA are considered part of future trails expansion plans that are not reflected in the GVTMP maps. These trails would generally follow the Gunnison River." The note is intended to support the mixed-use connective trail identified in the RMP. The GVTMP also emphasizes partnerships for the creation of trails. Mesa County would like to work with the BLM to identify the route of the proposed multi-use connective trail. The Hunting Grounds area is widely used by local residents, especially in the winter when other areas are not open. It is important to maintain and improve public access to the Hunting Grounds. Access is proposed to be limited to Bean Ranch Road. Additionally, the Travel Management map shows several gaps between routes running along the east side of the Gunnison River. Mesa County would like to work with the BLM to identify possible access points, trail connections and trail heads that might be built, both inside and outside the NCA, which would provide public access from County roads to the Hunting Grounds as well as close gaps in the route system. Specific areas of interest are the Siminoe Road area (Route 152) and around Bridgeport Road (Route 431)

## Route: 432

### Segment: 1950

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- CULTURAL Cultural Direct impact
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Minimize Damage:** Fragile soils SSR, Cultural – SSR within 100m sites, NHT – close routes for setting
- **Minimize Harassment:** PPSV- Minimize fragmentation

##### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to minimize impacts to cultural resources.
- Route was designated to improve natural setting along the Old Spanish National Historic Trail.
- Route was designated to reduce fragmentation in Priority Vegetation types

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

Comment ID: 000000106-242

- Route 438 and 456. I've hiked along this route and quite enjoyed the views of the Grand Mesa when contrasted with the awesome Gunnison River view (IMG\_0439) looking down at the old farm home. Granted that there is some nasty erosion on 438 near its intersection with 437, but we'd parked the vehicle before we got there.

Starting at the Old Spanish Trail in Orchard Mesa and ending in Delta, this trail idea is currently feasible when using a mix of single track, ATV width trail, jeep road and even Highway 50 for a few short sections. With very little trail construction making some connections to existing trails, nearly all of this highway use can be avoided. The major attraction of this area is the views from the rim above the Gunnison River in both directions. The existing trail and any trail construction should be routed to take advantage of this valuable view resource. The following recommendations are in the spirit of developing this long distance trail. Starting from the Kannah Creek area we recommend leaving 152 open to mountain bike use for a possible future connection to the lower Kannah Creek road. Possibilities included deeded access across private land, or new construction from the existing small portion of BLM land which the road accesses. Continuing, use existing full size and ATV trail to the end of 440, or a portion of 431, to access small drainage and then construct new trail to access Bridgeport Road. Then use 438, 449 and 2163 to access 2426 and 2427 to Dominguez Road (or 3098 and 3163 and then a very short new connector to 3133 out to highway) From Dominguez Road use 4000 to 3043, then single track 4001, 4005, 4006, 4007 and 3148 to reach Escalante Road. Very nice views exist in this area from the trail. The trail would then cross Escalante road to 2073 with a connection being built to 2053. This short deviation from the Escalante road would provide a safer route for mountain bikes than the twisty road with blind corners and high speed full size vehicles. The trail would cross the river on main bridge and immediately turn left and follow 2313, 2461 and 2462 with a connection to Delta via 2352, 470 2476 and 2489. This area using borders of the northern most point of the Escalante Rim, south to the Rim Road then using 2354 as the border on the west, the main county road on the east and then back down to the rim above river on the north would provide an excellent mountain bike emphasis area for the Delta community. Visitors and local users could ride from town or drive a very short distance. Quiet Use trails are rare in this area and this topography would allow for a rewarding experience for hiker, horse and mountain bike users. This scenario would provide an area similar to the Lunch Loops and Mack Ridge areas. With a long distance rail anchoring a Quiet Use stack loop system of trails which are extremely popular and very beneficial to users and the community at trail at large

## Route: 439

### Segment: 1929

#### Designation

##### Current Designation

Admin/Permitted Use Only

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- RIPARIAN Riparian 6 stream crossings
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Indirect impact
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E
- SSPLANT Special Status Species Colorado hookless cactus

#### Rationale

##### Designation Criteria

- **Minimize Damage:** Cactus – reduce density within 200m, Cultural – SSR within 100m sites, NHT – close routes for setting
- **Minimize Harassment:** PPSV- Minimize fragmentation

##### Rationale for Decision

- Route was designated to ensure access to rights-of-way, private property, and livestock grazing facilities.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 439

Organization, commenter: Brandon Siegfried

Comment ID: 000000068-3

• The following high value recreational routes/roads are legal ROW's in the State of Colorado, Mesa County and the BLM does not have the jurisdiction to close them: 500, 472, 518, 521, 530, 39, 127, 572, 566, 66, 65, 148, 71, 74, 587, 595, 608, 622, 628, 635, 624, 609, 611, 706, 678, 700, 719, 726, 696, 26, 936, 847, 849, 919, 767, 824, 96, 822, 817, 950, 1021, 900, 2682, 1020, 1003, 1084, 1142, 1184, 1156, 1198, 1349, 1308, 1310, 1238, 1263, 1122, 1170, 1192, 974, 941, 1076, 1039, 1018, 1759, 1764, 1758, 1174, 1788, 1798, 1669, 1699, 1773, 1755, 1779, 1750, 1751, 1792, 1720, 1726, 1727, 1720, 1722, 1803, 1805, 1809, 1614, 1609, 1605, 1608, 1571, 1526, 1516, 1448, 755, 807, 900, 10, 48, 924, 950, 1005, 965, 8, 1115, 981, 984, 1135, 2678, 1249, 1171, 1150, 1249, 1320, 1235, 1236, 1228, 1227, 1409, 1456, 1349, 1308, 1513, 1221, 1550, 1567, 1641, 1612, 1740, 1688, 2597, 2598, 2601, 2440, 3160, 3162, 2089, 2166, 2170, 2596, 2171, 2003, 2122, 2126, 2189, 3145, 2182, 2179, 2178, 3143, 2181, 2121, 2122, 2168, 2126, 2180, 2095, 2173, 2174, 2620, 2129, 1686, 1692, 1667, 1647, 1631, 1613, 1596, 1549, 1541, 2647, 1633, 1605, 1608, 1571, 2645, 1507, 1448, 1496, 1516, 1504, 1510, 1508, 1509, 439, 431, 456, 461, 460, 391, 423, 415, 419, 407, 402, 367, 372, 339, 298, 338, 105, 368, 374, 393, 389, 390, 376, 377, 351, 350, 121, 345, 320, 301, 251, 234, 232, 205, 344, 107, 103, 152, 153, 161, 168, 3199, 188, 196, 255, 254, 236, 294, 242, 219, 201, 169, 162, 158, 160, 173. The following high value recreational routes/roads are legal ROW's in the State of Colorado, Delta County, and the BLM does not have the jurisdiction to close them: 3011, 2184, 2191, 3100, 2187, 2026, 2059, 2188, 2192, 3104, 2130, 3009, 2199, 2200, 2111, 2223, 2024, 3006, 2231, 3094, 2579, 2210, 2344, 2243, 2249, 2248, 3074, 2354, 2384, 2296, 2295, 2287, 2304, 2062, 2163, 3163, 2164, 2430, 4006, 3016, 2351, 3140, 2410, 4008, 2324, 2073, 2306, 2459, 3192, 3193, 2350, 2443, 2035, 2336, 2495, 2491, 2159, 3058, 2277, 2465, 2467, 3189, 2472, 2297, 2006, 2265, 2271, 2276, 2135, 2139, 3053, 2489, 3033, 3057, 2031, 2276, 2210, 2579, 2136, 2344, 3164, 2400, 2379, 3014, 2365, 3116, 2251, 2259, 2149, 2153, 2146, 2144, 2145, 2356, 2257, 2048, 2358, 3165, and 3166.

Organization, commenter: Quiet Trails Group, Sherry Schenk

Comment ID: 000000115-73

• Routes 456, 439: QTG recommends that these be open to horse and foot use as it would make a nice loop with 438 and 443, though it would require a staging area for vehicle and trailer parking

## Public Comments On Route: 440

Organization, commenter: Quiet Trails Group, Sherry Schenk

Comment ID: 00000115-13

• The Hunting Ground TMP-Level Comments:We think the route decisions presented in Alt E show a balanced approach to recreational uses and understand and support the idea of some motorized and some quiet-use trails within this unit. However, we do have some specific suggestions:Planned Long-Distance Trail: The QTG would advocate that the majority of the planned long-distance trail from Whitewater to Delta be managed for mountain bike, horse and foot traffic, with sections open to motorized use (ATVs in places and full vehicles in others). We believe that mountain bikers are most likely to take advantage of the full distances as they can more readily set up a car shuttle than ATV folks who need trailers at both ends. To work towards creating this long-distance quiet use trail opportunity, we support a single track trail for bike, horse and foot use be added to route 440 or 441 to join Bridgeport road where feasible. This type of trail would provide a great long-distance quiet trail experience along the rim that would be much more interesting than a trail that joins onto some eastern part of route 431. Quiet Trail users love this area for the ability to see pronghorn, as well as the amazing opportunity to look down into the canyon and river, as well as being high enough on the rim to see Grand Mesa, Garfield and the whole Grand Valley.

Organization, commenter: COPMOBA, Scott Winans

Comment ID: 00000168-2

• Hunting GroundsIn the Hunting Grounds area, a longer distance trail similar to Kokopelli's, Tabeguache, and Paradox Trails, would be of interest to this user group[COPMOBA]. Starting at the Old Spanish Trail in Orchard Mesa and ending in Delta, this trail idea is currently feasible when using a mix of single track, ATV width trail, jeep road and even Highway 50 for a few short sections. With very little trail construction making some connections to existing trails, nearly all of this highway use can be avoided. The major attraction of this area is the views from the rim above the Gunnison River in both directions. The existing trail and any trail construction should be routed to take advantage of this valuable view resource.The following recommendations are in the spirit of developing this long distance trail.Starting from the Kannah Creek area we recommend leaving 152 open to mountain bike use for a possible future connection to the lower Kannah Creek road. Possibilities included deeded access across private land, or new construction from the existing small portion of BLM land which the road accesses. Continuing, use existing full size and ATV trail to the end of 440, or a portion of 431 ,to access small drainage and then construct new trail to access Bridgeport Road. Then use 438, 449 and 2163 to access 2426 and 2427 to Dominguez Road (or 3098 and 3163 and then a very short new connector to 3133 out to highway) From Dominguez Road use 4000 to 3043, then single track 4001,4005,4006,4007 and 3148 to reach Escalante Road. Very nice views exist in this area from the trail. The trail would then cross Escalante road to 2073 with a connection being built to 2053. This short deviation from the Escalante road would provide a safer route for mountain bikes than the twisty road with blind comers and high speed full size vehicles. The trail would cross the river on main bridge and immediatel y turn left and follow 2313, 2461 and 2462 with a connection to Delta via 2352, 470 2476 and 2489. This area using borders of the northern most point of the Escalante Rim, south to the Rim Road then using 2354 as the border on the west, the main county road on the east and then back down to the rim above river on the north would provide an xcellent mountain bike emphasis area for the Delta community. Visitors and local users could ride from town or drive a very short distance. Quiet Use trails are rare in this area and this topography would allow for a rewarding experience for hiker, horse and mountain bike users. This scenario would provide an area similar to the Lunch Loops and Mack Ridge areas. With a long distance rail anchoring a Quiet Use stack loop system of trails which are extremely popular and very beneficial to users and the community at trail at large

## Public Comments On Route: 449

Organization, commenter: COPMOBA, Scott Winans

Comment ID: 000000168-2

- Hunting GroundsIn the Hunting Grounds area, a longer distance trail similar to Kokopelli's, Tabeguache, and Paradox Trails, would be of interest to this user group[COPMOBA]. Starting at the Old Spanish Trail in Orchard Mesa and ending in Delta, this trail idea is currently feasible when using a mix of single track, ATV width trail, jeep road and even Highway 50 for a few short sections. With very little trail construction making some connections to existing trails, nearly all of this highway use can be avoided. The major attraction of this area is the views from the rim above the Gunnison River in both directions. The existing trail and any trail construction should be routed to take advantage of this valuable view resource.The following recommendations are in the spirit of developing this long distance trail.Starting from the Kannah Creek area we recommend leaving 152 open to mountain bike use for a possible future connection to the lower Kannah Creek road. Possibilities included deeded access across private land, or new construction from the existing small portion of BLM land which the road accesses. Continuing, use existing full size and ATV trail to the end of 440, or a portion of 431 ,to access small drainage and then construct new trail to access Bridgeport Road. Then use 438, 449 and 2163 to access 2426 and 2427 to Dominguez Road (or 3098 and 3163 and then a very short new connector to 3133 out to highway) From Dominguez Road use 4000 to 3043, then single track 4001,4005,4006,4007 and 3148 to reach Escalante Road. Very nice vi ews ex ist in this area from the trail. The trail would then cross Escalante road to 2073 with a connection being built to 2053. This short deviation from the Escalante road would provide a safer route for mountain bikes than the twisty road with blind comers and high speed full size vehicles. The trail would cross the river on main bridge and immediatel y turn left and follow 2313, 2461 and 2462 with a connection to Delta via 2352, 470 2476 and 2489. This area using borders of the northern most point of the Escalante Rim, south to the Rim Road then using 2354 as the border on the west, the main county road on the east and then back down to the rim above river on the north would provide an xcellent mountain bike emphasis area for the Delta community. Visitors and local users could ride from town or drive a very short distance. Quiet Use trails are rare in this area and this topography would allow for a rewarding experience for hiker, horse and mountain bike users. This scenario would provide an area similar to the Lunch Loops and Mack Ridge areas. With a long distance rail anchoring a Quiet Use stack loop system of trails which are extremely popular and very beneficial to users and the community at trail at large

## Route: 45

### Segment: 2027

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Indirect impact
- DENSITY Route density highest in Alt A
- DENSITY Route density medium in Alt E

#### Rationale

##### Designation Criteria

- Minimize Harassment:** Big game winter range – close, PPSV- Minimize fragmentation, PPSV- Minimize fragmentation, Big game winter range – close
- Recreation:** RMA objectives, RMA objectives

##### Rationale for Decision

- Route was designated to protect big game winter range
- Route was designated to reduce fragmentation in Priority Vegetation types

Organization, commenter: Katie Steele

Comment ID: 000000056-2

- On the Preferred Alternative E, I would like to make two suggestions on routes that have either been temporarily closed or access restricted. The first route is on the Hunting Grounds. It is the route that takes you to the dedication site for the NCA. It's an incredible overlook of the Gunnison River, the Loretta House and the Big Dominguez Canyon. The route numbers involved are: 2163, 2164, 3051, 461, 454 and 450. I understand this is proposed as a temporary closure for the preservation of cultural resources. But, instead of closing the routes until the resources can be protected, why not leave it open until funding, man power, etc. are obtained. Then only close the route for the short time it would take to actually do the work needed. This would eliminate the route being closed for an indefinite period of time.

- Also the BLM should post a sign at the Bridgeport parking lot showing other trails and trailheads in the area, with a comment like "If the parking lot here looks pretty full, and you're looking for solitude you might consider these other options:" This will work better as more quiet-use routes are designated and developed on the east side of the river in the vicinity of Bridgeport road. For example putting a parking area at 12 S 730136 4303782 with a quiet-use trail leading up to 456 and onto to 454 will lead some people to a great view of the Gunnison with only short segments of their hike shared with motorized users. A handy option if you've already driven down to Bridgeport trailhead.

• Route 438 and 456. I've hiked along this route and quite enjoyed the views of the Grand Mesa when contrasted with the awesome Gunnison River view (IMG\_0439) looking down at the old farm home. Granted that there is some nasty erosion on 438 near its intersection with 437, but we'd parked the vehicle before we got there.

• The following high value recreational routes/roads are legal ROW's in the State of Colorado, Mesa County and the BLM does not have the jurisdiction to close them: 500, 472, 518, 521, 530, 39, 127, 572, 566, 66, 65, 148, 71, 74, 587, 595, 608, 622, 628, 635, 624, 609, 611, 706, 678, 700, 719, 726, 696, 26, 936, 847, 849, 919, 767, 824, 96, 822, 817, 950, 1021, 900, 2682, 1020, 1003, 1084, 1142, 1184, 1156, 1198, 1349, 1308, 1310, 1238, 1263, 1122, 1170, 1192, 974, 941, 1076, 1039, 1018, 1759, 1764, 1758, 1174, 1788, 1798, 1669, 1699, 1773, 1755, 1779, 1750, 1751, 1792, 1720, 1726, 1727, 1720, 1722, 1803, 1805, 1809, 1614, 1609, 1605, 1608, 1571, 1526, 1516, 1448, 755, 807, 900, 10, 48, 924, 950, 1005, 965, 8, 1115, 981, 984, 1135, 2678, 1249, 1171, 1150, 1249, 1320, 1235, 1236, 1228, 1227, 1409, 1456, 1349, 1308, 1513, 1221, 1550, 1567, 1641, 1612, 1740, 1688, 2597, 2598, 2601, 2440, 3160, 3162, 2089, 2166, 2170, 2596, 2171, 2003, 2122, 2126, 2189, 3145, 2182, 2179, 2178, 3143, 2181, 2121, 2122, 2168, 2126, 2180, 2095, 2173, 2174, 2620, 2129, 1686, 1692, 1667, 1647, 1631, 1613, 1596, 1549, 1541, 2647, 1633, 1605, 1608, 1571, 2645, 1507, 1448, 1496, 1516, 1504, 1510, 1508, 1509, 439, 431, 456, 461, 460, 391, 423, 415, 419, 407, 402, 367, 372, 339, 298, 338, 105, 368, 374, 393, 389, 390, 376, 377, 351, 350, 121, 345, 320, 301, 251, 234, 232, 205, 344, 107, 103, 152, 153, 161, 168, 3199, 188, 196, 255, 254, 236, 294, 242, 219, 201, 169, 162, 158, 160, 173. The following high value recreational routes/roads are legal ROW's in the State of Colorado, Delta County, and the BLM does not have the jurisdiction to close them: 3011, 2184, 2191, 3100, 2187, 2026, 2059, 2188, 2192, 3104, 2130, 3009, 2199, 2200, 2111, 2223, 2024, 3006, 2231, 3094, 2579, 2210, 2344, 2249, 2248, 3074, 2354, 2384, 2296, 2295, 2287, 2304, 2062, 2163, 3163, 2164, 2430, 4006, 3016, 2351, 3140, 2410, 4008, 2324, 2073, 2306, 2459, 3192, 3193, 2350, 2443, 2035, 2336, 2495, 2491, 2159, 3058, 2277, 2465, 2467, 3189, 2472, 2297, 2006, 2265, 2271, 2276, 2135, 2139, 3053, 2489, 3033, 3057, 2031, 2276, 2210, 2579, 2136, 2344, 3164, 2400, 2379, 3014, 2365, 3116, 2251, 2259, 2149, 2153, 2146, 2144, 2145, 2356, 2257, 2048, 2358, 3165, and 3166.

Organization, commenter: Escalante Ranch, Richard Miller

Comment ID: 000000171-7

• IV. TRANSPORTATION AND TRAVEL MANAGEMENT Mr. Miller's owns various parcels of private property and multiple water diversions in the area in question, and must access these lands via roads and trails which currently cross public land. In addition, Mr. Miller must necessarily access various roads and trails to in the course of managing his livestock operation. The EIS proposes closing various roads and trails to public motorized travel, to minimize resource damage caused by the public on both public and private lands. EIS at 157, 187. Mr. Miller supports the BLM's proposal to restrict public access to public and private property, but only so long as he is not restricted from using these roads as may be necessary to access his private lands and manage his livestock operation. Thus, to the extent that the BLM wishes to close roads to motorized public traffic, it should simultaneously grant Mr. Miller legal, administrative access. In addition, Mr. Miller notes that he would be entitled to a formal decision, subject to appeal, prior to the BLM restricting access to his private property and/or otherwise impacting his livestock operation. Mr. Miller notes that the BLM has mis-classified many routes. See EIS Map N - 1.e. Specifically, many routes which have historically been used to access private land and water diversions, and/or are necessary to maintain livestock improvements or otherwise manage and operate Mr. Miller's livestock operation, have been incorrectly labeled as closed or otherwise restricted in their use. These routes should be classified as "administrative," to recognize these historic uses and to allow for continued uses consistent therewith. The Routes which have been incorrectly classified and which should be classified as "administrative" are as follows: Routes 460, 1220, 1243, 1245, 2003, 2053, 2073, 2086, 2089, 2121, 2122, 2126, 2156, 2166, 2168, 2171, 2172, 2177, 2180, 2336, 2342, 2354, 2408, 2412, 2445, 2581, 2582, 2583, 2585, 2587, 2588, 2590, 2591, 2593, 2595, 2596, 2598, 2599, 2612, 2613, 2622, 2691, 3011, 3048, 3070, 3131, 3141, and 3158. See EIS Map N-1e. In addition, Route 2072 is not completely depicted on the map, in that it extends down the river, across BLM and private property, an additional 2-3 miles, and likewise Route 3048 extends an additional 0.75 miles and leads to private property. I'd. FinA Uy, Map N-1e incorrectly labels Mr. Miller's privately owned bridge, which crosses the Gunnison River at the Bridgeport area, as "administrative." I'd. Mr. Miller requests that the BLM correct these errors and mis-classifications.

## Public Comments On Route: 461

Organization, commenter: Katie Steele

Comment ID: 000000056-2

• On the Preferred Alternative E, I would like to make two suggestions on routes that have either been temporarily closed or access restricted. The first route is on the Hunting Grounds. It is the route that takes you to the dedication site for the NCA. It's an incredible overlook of the Gunnison River, the Loretta House and the Big Dominguez Canyon. The route numbers involved are: 2163, 2164, 3051, 461, 454 and 450. I understand this is proposed as a temporary closure for the preservation of cultural resources. But, instead of closing the routes until the resources can be protected, why not leave it open until funding, man power, etc. are obtained. Then only close the route for the short time it would take to actually do the work needed. This would eliminate the route being closed for an indefinite period of time.

## Route: 463

### Segment: 2911

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- SMAs Wild and Scenic River area
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, Bighorn – SSR -- summer range
- **Recreation:** RMA objectives

##### Rationale for Decision

- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range
- Route was designated to reduce the miles of motorized and mechanized routes in bighorn sheep habitat.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 470

Organization, commenter: COPMOBA, Scott Winans

Comment ID: 000000168-2

• Hunting GroundsIn the Hunting Grounds area, a longer distance trail similar to Kokopelli's, Tabeguache, and Paradox Trails, would be of interest to this user group[COPMOBA]. Starting at the Old Spanish Trail in Orchard Mesa and ending in Delta, this trail idea is currently feasible when using a mix of single track, ATV width trail, jeep road and even Highway 50 for a few short sections. With very little trail construction making some connections to existing trails, nearly all of this highway use can be avoided. The major attraction of this area is the views from the rim above the Gunnison River in both directions. The existing trail and any trail construction should be routed to take advantage of this valuable view resource.The following recommendations are in the spirit of developing this long distance trail.Starting from the Kannah Creek area we recommend leaving 152 open to mountain bike use for a possible future connection to the lower Kannah Creek road. Possibilities included deeded access across private land, or new construction from the existing small portion of BLM land which the road accesses. Continuing, use existing full size and ATV trail to the end of 440, or a portion of 431 ,to access small drainage and then construct new trail to access Bridgeport Road. Then use 438, 449 and 2163 to access 2426 and 2427 to Dominguez Road (or 3098 and 3163 and then a very short new connector to 3133 out to highway) From Dominguez Road use 4000 to 3043, then single track 4001,4005,4006,4007 and 3148 to reach Escalante Road. Very nice vi ews ex ist in this area from the trail. The trail would then cross Escalante road to 2073 with a connection being built to 2053. This short deviation from the Escalante road would provide a safer route for mountain bikes than the twisty road with blind comers and high speed full size vehicles. The trail would cross the river on main bridge and immediatel y turn left and follow 2313, 2461 and 2462 with a connection to Delta via 2352, 470 2476 and 2489. This area using borders of the northern most point of the Escalante Rim, south to the Rim Road then using 2354 as the border on the west, the main county road on the east and then back down to the rim above river on the north would provide an xcellent mountain bike emphasis area for the Delta community. Visitors and local users could ride from town or drive a very short distance. Quiet Use trails are rare in this area and this topography would allow for a rewarding experience for hiker, horse and mountain bike users. This scenario would provide an area similar to the Lunch Loops and Mack Ridge areas. With a long distance rail anchoring a Quiet Use stack loop system of trails which are extremely popular and very beneficial to users and the community at trail at large

## Route: 473

### Segment: 2902

#### Designation

##### Current Designation

Open (All modes of travel)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Indirect impact
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Recreation:** Rec opportunities – general, Rec opportunities - specific

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 473

- No public comments for this Route

## Route: 474

### Segment: 2896

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Indirect impact
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, Bighorn – SSR -- summer range
- **Recreation:** RMA objectives

##### Rationale for Decision

- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range

- Route was designated to reduce the miles of motorized and mechanized routes in bighorn sheep habitat.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

### Segment: 2031

#### Designation ?

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Indirect impact
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Minimize Damage:** Fragile soils SSR
- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close

##### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range

#### Previous Alternatives Analyzed

**Alternative A:** Vehicles under 50' wide

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

• The following high value recreational routes/roads are legal RS 2477 ROW's in the State of Colorado, Mesa County and the BLM does not have the jurisdiction to close them: 500, 472, 518, 521, 530, 39, 127, 572, 566, 66, 65, 148, 71, 74, 587, 595, 608, 622, 628, 635, 624, 609, 611, 706, 678, 700, 719, 726, 696, 26, 936, 847, 849, 919, 767, 824, 96, 822, 817, 950, 1021, 900, 2682, 1020, 1003, 1084, 1142, 1184, 1156, 1198, 1349, 1308, 1310, 1238, 1263, 1122, 1170, 1192, 974, 941, 1076, 1039, 1018, 1759, 1764, 1758, 1174, 1788, 1798, 1669, 1699, 1773, 1755, 1779, 1750, 1751, 1792, 1720, 1726, 1727, 1720, 1722, 1803, 1805, 1809, 1614, 1609, 1605, 1608, 1571, 1526, 1516, 1448, 755, 807, 900, 10, 48, 924, 950, 1005, 965, 8, 1115, 981, 984, 1135, 2678, 1249, 1171, 1150, 1249, 1320, 1235, 1236, 1228, 1227, 1409, 1456, 1349, 1308, 1513, 1221, 1550, 1567, 1641, 1612, 1740, 1688, 2597, 2598, 2601, 2440, 3160, 3162, 2089, 2166, 2170, 2596, 2171, 2003, 2122, 2126, 2189, 3145, 2182, 2179, 2178, 3143, 2181, 2121, 2122, 2168, 2126, 2180, 2095, 2173, 2174, 2620, 2129, 1686, 1692, 1667, 1647, 1631, 1613, 1596, 1549, 1541, 2647, 1633, 1605, 1608, 1571, 2645, 1507, 1448, 1496, 1516, 1504, 1510, 1508, 1509, 439, 431, 456, 461, 460, 391, 423, 415, 419, 407, 402, 367, 372, 339, 298, 338, 105, 368, 374, 393, 389, 390, 376, 377, 351, 350, 121, 345, 320, 301, 251, 234, 232, 205, 344, 107, 103, 152, 153, 161, 168, 3199, 188, 196, 255, 254, 236, 294, 242, 219, 201, 169, 162, 158, 160, 173. The following high value recreational routes/roads are legal RS 2477 ROW's in the State of Colorado, Delta County, and the BLM does not have the jurisdiction to close them: 3011, 2184, 2191, 3100, 2187, 2026, 2059, 2188, 2192, 3104, 2130, 3009, 2199, 2200, 2111, 2223, 2024, 3006, 2231, 3094, 2579, 2210, 2344, 2243, 2249, 2248, 3074, 2354, 2384, 2296, 2295, 2287, 2304, 2062, 2163, 3163, 2164, 2430, 4006, 3016, 2351, 3140, 2410, 4008, 2324, 2073, 2306, 2459, 3192, 3193, 2350, 2443, 2035, 2336, 2495, 2491, 2159, 3058, 2277, 2465, 2467, 3189, 2472, 2297, 2006, 2265, 2271, 2276, 2135, 2139, 3053, 2489, 3033, 3057, 2031, 2276, 2210, 2579, 2136, 2344, 3164, 2400, 2379, 3014, 2365, 3116, 2251, 2259, 2149, 2153, 2146, 2144, 2145, 2356, 2257, 2048, 2358, 3165, and 3166.

## Route: 480

### Segment: 2893

#### Designation ?

##### Current Designation

Open (All modes of travel)

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Indirect impact
- DENSITY Route density highest in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- **Recreation:** Rec opportunities – general, Rec opportunities - specific

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 480

- No public comments for this Route

## Route: 481

### Segment: 2900

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation access to dispersed campsite
- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Indirect impact
- DENSITY Route density highest in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, Bighorn – SSR -- summer range
- **Recreation:** RMA objectives

### Rationale for Decision

- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range
- Route was designated to reduce the miles of motorized and mechanized routes in bighorn sheep habitat.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 481

## Public Comments On Route: 5

Organization, commenter: Quiet Trails Group, Sherry Schenk

Comment ID: 000000115-53

- [Dominguez Canyon Wilderness TMP-Level Comments]Zone 2]Routes 1756-5-1593-1585: Quiet Trails Group would also suggest keeping these routes open to horse and foot traffic, with a future possibility of connecting to route 2610. This would make a great trail system for horseback riders and long distance hikers. Route 1756 starts in the Wagon Park area.

Organization, commenter: Quiet Trails Group, Sherry Schenk

Comment ID: 000000115-59

- Wagon Park/Sawmill Mesa (North) TMP-Level Comments:Routes 1756-5-1593-1585: Quiet Trails Group would suggest keeping these routes open to horse and foot traffic, connecting to route 2610. This would make a great trail system for horseback riders and long distance hikers. This comment is predominantly related to Zone 2 of the Wilderness, however, as route 1756 starts in the Wagon Park area we have also included this comment here

## Route: 50

### Segment: 2020

## Designation [?](#)

### Current Designation

Closed (Rehab)

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- SOIL Soils Steep Slopes 40%
- SOIL Soils 25% to 40% Slopes
- WILDLIFE Mule deer severe winter range
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I low
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches >60 acres

## Rationale

### Designation Criteria

- **Minimize Damage:** Fragile soils SSR
- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, Sage-Minimize fragmentation, GUSG –PSD in winter habitat

### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range
- Route was designated to reduce fragmentation of sagebrush patches
- Route was designated to minimize fragmentation of Gunnison sage-grouse habitat.

## Route: 501

### Segment: 2873

## Designation

### Current Designation

Open (All modes of travel)

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density highest in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- Recreation:** Rec opportunities - specific, Rec opportunities – general

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open (All modes of travel)

## Route: 51

### Segment: 2051

#### Designation

##### Current Designation

Foot/Horse/Mechanized/Motorcycle

##### Mitigation Criteria

- Needs Data - Cultural
- Cultural
- Possible cultural mitigation

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- SOIL Soils Steep Slopes 40%
- SOIL Soils 25% to 40% Slopes
- WILDLIFE Mule deer severe winter range
- RIPARIAN Riparian 4 stream crossings
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I moderate
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches >60 acres

#### Rationale

##### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Public Comments On Route: 517

Organization, commenter: Janice Shepherd

Comment ID: 000000106-214

- 517 I would like to see Route 517 listed as leading to a designated campsite if the rule is adopted that there should be no target shooting at designated campsites. There has been repeated target shooting in the area that has totally trashed the place. After the area is cleaned up it would make a nice designated camp site

Organization, commenter: Quiet Trails Group, Sherry Schenk

Comment ID: 000000115-35

- 508-517 (north end of Ninemile Hill area east of 26): The end of this motorized route would make a great designated camping spot, especially if target shooting is prohibited from designated camping spots.

## Route: 518

## Route: 519

### Segment: 2852

#### Designation

##### Current Designation

Foot/Horse

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Indirect impact
- SMAs Wild and Scenic River area
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Foot/Horse/Mechanized/Motorcycle

## Public Comments On Route: 519

- No public comments for this Route

## Route: 52

### Segment: 2024

#### Designation

##### Current Designation

Open (All modes of travel)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation access to dispersed campsite
- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

## Rationale

### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities - specific

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open (All modes of travel)

**Alternative C:** Open (All modes of travel)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 52

Organization, commenter: Western Slope ATV Association, Steve Chapel

Comment ID: 00000089-13

- The route with numbers 933, to 1105, to 1110, to 1017, to 998 had been an important route for ATV use. At the end of it a connection can be made without equipment to extend it over to route 52 and create a great loop. We know this because we have made the short walk between the two routes. This had been explained to BLM. The map shows it with a dotted line which indicates closed until mitigated. This is not acceptable nor necessary. It is also confusing because there is a bicycle emblem on the route.

## Route: 520

### Segment: 2849

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- SMAs Wild and Scenic River area
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- **Minimize Harassment:** PPSV- Minimize fragmentation, Bighorn – SSR -- summer range, Big game winter range – close
- **Recreation:** RMA objectives

### Rationale for Decision

- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to reduce the miles of motorized and mechanized routes in bighorn sheep habitat.
- Route was designated to protect big game winter range

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 520

- No public comments for this Route

## Route: 521

### Segment: 2851

#### Designation

##### Current Designation

Foot/Horse

##### Mitigation Criteria

No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- SMAs Wild and Scenic River area
- DENSITY Route density highest in Alt A
- DENSITY Route density low in Alt E

### Rationale

#### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

#### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Foot/Horse/Mechanized/Motorcycle

- The following high value recreational routes/roads are legal RS 2477 ROW's in the State of Colorado, Mesa County and the BLM does not have the jurisdiction to close them: 500, 472, 518, 521, 530, 39, 127, 572, 566, 66, 65, 148, 71, 74, 587, 595, 608, 622, 628, 635, 624, 609, 611, 706, 678, 700, 719, 726, 696, 26, 936, 847, 849, 919, 767, 824, 96, 822, 817, 950, 1021, 900, 2682, 1020, 1003, 1084, 1142, 1184, 1156, 1198, 1349, 1308, 1310, 1238, 1263, 1122, 1170, 1192, 974, 941, 1076, 1039, 1018, 1759, 1764, 1758, 1174, 1788, 1798, 1669, 1699, 1773, 1755, 1779, 1750, 1751, 1792, 1720, 1726, 1727, 1720, 1722, 1803, 1805, 1809, 1614, 1609, 1605, 1608, 1571, 1526, 1516, 1448, 755, 807, 900, 10, 48, 924, 950, 1005, 965, 8, 1115, 981, 984, 1135, 2678, 1249, 1171, 1150, 1249, 1320, 1235, 1236, 1228, 1227, 1409, 1456, 1349, 1308, 1513, 1221, 1550, 1567, 1641, 1612, 1740, 1688, 2597, 2598, 2601, 2440, 3160, 3162, 2089, 2166, 2170, 2596, 2171, 2003, 2122, 2126, 2189, 3145, 2182, 2179, 2178, 3143, 2181, 2121, 2122, 2168, 2126, 2180, 2095, 2173, 2174, 2620, 2129, 1686, 1692, 1667, 1647, 1631, 1613, 1596, 1549, 1541, 2647, 1633, 1605, 1608, 1571, 2645, 1507, 1448, 1496, 1516, 1504, 1510, 1508, 1509, 439, 431, 456, 461, 460, 391, 423, 415, 419, 407, 402, 367, 372, 339, 298, 338, 105, 368, 374, 393, 389, 390, 376, 377, 351, 350, 121, 345, 320, 301, 251, 234, 232, 205, 344, 107, 103, 152, 153, 161, 168, 3199, 188, 196, 255, 254, 236, 294, 242, 219, 201, 169, 162, 158, 160, 173. The following high value recreational routes/roads are legal RS 2477ROW's in the State of Colorado, Delta County, and the BLM does not have the jurisdiction to close them: 3011, 2184, 2191, 3100, 2187, 2026, 2059, 2188, 2192, 3104, 2130, 3009, 2199, 2200, 2111, 2223, 2024, 3006, 2231, 3094, 2579, 2210, 2344, 2243, 2249, 2248, 3074, 2354, 2384, 2296, 2295, 2287, 2304, 2062, 2163, 3163, 2164, 2430, 4006, 3016, 2351, 3140, 2410, 4008, 2324, 2073, 2306, 2459, 3192, 3193, 2350, 2443, 2035, 2336, 2495, 2491, 2159, 3058, 2277, 2465, 2467, 3189, 2472, 2297, 2006, 2265, 2271, 2276, 2135, 2139, 3053, 2489, 3033, 3057, 2031, 2276, 2210, 2579, 2136, 2344, 3164, 2400, 2379, 3014, 2365, 3116, 2251, 2259, 2149, 2153, 2146, 2144, 2145, 2356, 2257, 2048, 2358, 3165, and 3166.

## Route: 522

### Segment: 2858

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density highest in Alt A
- DENSITY Route density low in Alt E

### Rationale

#### Designation Criteria

- **Minimize Harassment:** PPSV- Minimize fragmentation, Bighorn – SSR -- summer range, Big game winter range – close
- **Recreation:** RMA objectives

#### Rationale for Decision

- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to reduce the miles of motorized and mechanized routes in bighorn sheep habitat.
- Route was designated to protect big game winter range

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 522

- No public comments for this Route

## Route: 523

### Segment: 2846

#### Designation [?](#)

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- SMAs River Rims ACEC
- SMAs Wild and Scenic River area
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Minimize Harassment:** PPSV- Minimize fragmentation, Bighorn – SSR -- summer range, Big game winter range – close
- **Recreation:** RMA objectives

##### Rationale for Decision

- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to reduce the miles of motorized and mechanized routes in bighorn sheep habitat.
- Route was designated to protect big game winter range

• The following high value recreational routes/roads are legal RS 2477 ROW's in the State of Colorado, Mesa County and the BLM does not have the jurisdiction to close them: 500, 472, 518, 521, 530, 39, 127, 572, 566, 66, 65, 148, 71, 74, 587, 595, 608, 622, 628, 635, 624, 609, 611, 706, 678, 700, 719, 726, 696, 26, 936, 847, 849, 919, 767, 824, 96, 822, 817, 950, 1021, 900, 2682, 1020, 1003, 1084, 1142, 1184, 1156, 1198, 1349, 1308, 1310, 1238, 1263, 1122, 1170, 1192, 974, 941, 1076, 1039, 1018, 1759, 1764, 1758, 1174, 1788, 1798, 1669, 1699, 1773, 1755, 1779, 1750, 1751, 1792, 1720, 1726, 1727, 1720, 1722, 1803, 1805, 1809, 1614, 1609, 1605, 1608, 1571, 1526, 1516, 1448, 755, 807, 900, 10, 48, 924, 950, 1005, 965, 8, 1115, 981, 984, 1135, 2678, 1249, 1171, 1150, 1249, 1320, 1235, 1236, 1228, 1227, 1409, 1456, 1349, 1308, 1513, 1221, 1550, 1567, 1641, 1612, 1740, 1688, 2597, 2598, 2601, 2440, 3160, 3162, 2089, 2166, 2170, 2596, 2171, 2003, 2122, 2126, 2189, 3145, 2182, 2179, 2178, 3143, 2181, 2121, 2122, 2168, 2126, 2180, 2095, 2173, 2174, 2620, 2129, 1686, 1692, 1667, 1647, 1631, 1613, 1596, 1549, 1541, 2647, 1633, 1605, 1608, 1571, 2645, 1507, 1448, 1496, 1516, 1504, 1510, 1508, 1509, 439, 431, 456, 461, 460, 391, 423, 415, 419, 407, 402, 367, 372, 339, 298, 338, 105, 368, 374, 393, 389, 390, 376, 377, 351, 350, 121, 345, 320, 301, 251, 234, 232, 205, 344, 107, 103, 152, 153, 161, 168, 3199, 188, 196, 255, 254, 236, 294, 242, 219, 201, 169, 162, 158, 160, 173. The following high value recreational routes/roads are legal RS 2477ROW's in the State of Colorado, Delta County, and the BLM does not have the jurisdiction to close them: 3011, 2184, 2191, 3100, 2187, 2026, 2059, 2188, 2192, 3104, 2130, 3009, 2199, 2200, 2111, 2223, 2024, 3006, 2231, 3094, 2579, 2210, 2344, 2243, 2249, 2248, 3074, 2354, 2384, 2296, 2295, 2287, 2304, 2062, 2163, 3163, 2164, 2430, 4006, 3016, 2351, 3140, 2410, 4008, 2324, 2073, 2306, 2459, 3192, 3193, 2350, 2443, 2035, 2336, 2495, 2491, 2159, 3058, 2277, 2465, 2467, 3189, 2472, 2297, 2006, 2265, 2271, 2276, 2135, 2139, 3053, 2489, 3033, 3057, 2031, 2276, 2210, 2579, 2136, 2344, 3164, 2400, 2379, 3014, 2365, 3116, 2251, 2259, 2149, 2153, 2146, 2144, 2145, 2356, 2257, 2048, 2358, 3165, and 3166.

## Route: 533

### Segment: 2838

#### Designation

**Current Designation**  
Open (All modes of travel)

#### Mitigation Criteria

- Needs Data - SSS Plants

#### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- Recreation:** RMA objectives, Rec opportunities - specific

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Closed (Not Rehabbed)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 533

- No public comments for this Route

## Route: 534

### Segment: 2837

#### Designation

**Current Designation**  
Foot/Horse

#### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

#### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- Recreation:** RMA objectives, Rec opportunities – general
- Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open (All modes of travel)

**Alternative C:** Foot/Horse

**Alternative D:** Foot/Horse/Mechanized/Motorcycle

## Public Comments On Route: 534

- No public comments for this Route

## Route: 535

### Segment: 2831

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Minimize Harassment:** PPSV- Minimize fragmentation, Bighorn – SSR -- summer range, Big game winter range – close

##### Rationale for Decision

- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to reduce the miles of motorized and mechanized routes in bighorn sheep habitat.
- Route was designated to protect big game winter range

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 535

- No public comments for this Route

## Public Comments On Route: 547

Organization, commenter: Janice Shepherd

Comment ID: 000000106-110

- o The Gibbler Mountain ACEC as shown on map 2-5E does not encompass the mountain itself but only its northern slopes. I would prefer to see a non-motorized/non-mechanized ACEC for the whole of Gibbler Mountain and its surrounding slopes, bounded by the routes: 1235-1236-1228-1409-1221-15-8-887-18-17-945-547-951-959-966-969-1005-1006-1021-1022-1023-1024-1047-1150-1249, with 1269 left open to motorized use as a motorized cherry-stemmed route into the area. This would keep this wonderful roadless area (though too small a space for the inventory) roadless into the future. The text on page 871 indicates the area has one of the "best known" populations of the rare plant Grand Junction milkvetch as well as a large collection of fragile dinosaur tracks. The Special Species

map from the Open House needs to be updated with this GJ milkvetch population. This ACEC representing a hole in the SRMA would properly protect all three features: roadless-ness, dinosaur tracks, and GJ milkvetch, at the cost of less than 5000 acres. This protection is consistent with this being a National Conservation Area and not a National Recreation Area. This position also has support from the D-E NCA Advisory Council. I recently hiked up to the top of the northern portion of Gibbler Mountain with a friend. We were inspired by the challenging terrain for hiking and the awesome views (photo IMG\_9998). We both had a great feeling of accomplishment when we reached the top. There is plenty of evidence of big game animals using the Gibbler Mountain as a quiet sanctuary from the surrounding motorized areas. This proposed ACEC would benefit them.

- CULTURAL Cultural Class I low
- DENSITY Route density highest in Alt A
- DENSITY Route density low in Alt E

### Rationale

#### Designation Criteria

- **Minimize Harassment:** PPSV- Minimize fragmentation, Bighorn – SSR -- summer range, Big game winter range – close

#### Rationale for Decision

- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to reduce the miles of motorized and mechanized routes in bighorn sheep habitat.
- Route was designated to protect big game winter range

## Route: 567

### Segment: 2750

#### Designation [?](#)

##### Current Designation

Foot/Horse

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density highest in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches <60 acres

#### Rationale

##### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Route: 568

### Segment: 2748

#### Designation [?](#)

##### Current Designation

Foot/Horse

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density highest in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Vehicles under 50" wide

## Route: 573

### Segment: 2741

#### Designation ?

##### Current Designation

Foot/Horse

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- WILDLIFE Big game summer concentration areas
- CULTURAL Cultural Class I low
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Vehicles under 50" wide

**Alternative C:** Closed (Rehab)

**Alternative D:** Foot/Horse/Mechanized/Motorcycle

## Public Comments On Route: 573

## Route: 584

### Segment: 2707

### Designation

#### Current Designation

Closed (Rehab)

#### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

#### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

### Rationale

#### Designation Criteria

- **Minimize Harassment:** PPSV- Minimize fragmentation, Bighorn – SSR -- summer range, Big game winter range – close

#### Rationale for Decision

- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to reduce the miles of motorized and mechanized routes in bighorn sheep habitat.
- Route was designated to protect big game winter range

### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 584

## Route: 589

### Segment: 2708

## Designation

### Current Designation

Closed (Rehab)

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- **Minimize Harassment:** PPSV- Minimize fragmentation, Bighorn – SSR -- summer range, Big game winter range – close

### Rationale for Decision

- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to reduce the miles of motorized and mechanized routes in bighorn sheep habitat.
- Route was designated to protect big game winter range

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 589

## Route: 596

## Segment: 2695

Designation [?](#)

## Current Designation

Foot/Horse

## Mitigation Criteria

- No Mitigation Criteria for this Route Segment

## Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

## Rationale

## Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

## Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

Alternative A: Open (All modes of travel)

Alternative B: Vehicles under 50" wide

Alternative C: Foot/Horse

Alternative D: Foot/Horse/Mechanized/Motorcycle

## Public Comments On Route: 596

- No public comments for this Route

## Route: 597

## Segment: 2693

Designation [?](#)

## Current Designation

Closed (Rehab)

## Mitigation Criteria

- No Mitigation Criteria for this Route Segment

## Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Indirect impact

- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- **Minimize Harassment:** PPSV- Minimize fragmentation, Bighorn – SSR -- summer range, Big game winter range – close

### Rationale for Decision

- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to reduce the miles of motorized and mechanized routes in bighorn sheep habitat.
- Route was designated to protect big game winter range

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Route: 609

### Segment: 2696

#### Designation

**Current Designation**  
Foot/Horse

#### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

#### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Indirect impact
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches <60 acres

#### Rationale

##### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

- Alternative A:** Open (All modes of travel)
- Alternative B:** Closed (Not Rehabbed)
- Alternative C:** Closed (Rehab)
- Alternative D:** Closed (Rehab)

• The following high value recreational routes/roads are legal RS 2477 ROW's in the State of Colorado, Mesa County and the BLM does not have the jurisdiction to close them: 500, 472, 518, 521, 530, 39, 127, 572, 566, 66, 65, 148, 71, 74, 587, 595, 608, 622, 628, 635, 624, 609, 611, 706, 678, 700, 719, 726, 696, 26, 936, 847, 849, 919, 767, 824, 96, 822, 817, 950, 1021, 900, 2682, 1020, 1003, 1084, 1142, 1184, 1156, 1198, 1349, 1308, 1310, 1238, 1263, 1122, 1170, 1192, 974, 941, 1076, 1039, 1018, 1759, 1764, 1758, 1174, 1788, 1798, 1669, 1699, 1773, 1755, 1779, 1750, 1751, 1792, 1720, 1726, 1727, 1720, 1722, 1803, 1805, 1809, 1614, 1609, 1605, 1608, 1571, 1526, 1516, 1448, 755, 807, 900, 10, 48, 924, 950, 1005, 965, 8, 1115, 981, 984, 1135, 2678, 1249, 1171, 1150, 1249, 1320, 1235, 1236, 1228, 1227, 1409, 1456, 1349, 1308, 1513, 1221, 1550, 1567, 1641, 1612, 1740, 1688, 2597, 2598, 2601, 2440, 3160, 3162, 2089, 2166, 2170, 2596, 2171, 2003, 2122, 2126, 2189, 3145, 2182, 2179, 2178, 3143, 2181, 2121, 2122, 2168, 2126, 2180, 2095, 2173, 2174, 2620, 2129, 1686, 1692, 1667, 1647, 1631, 1613, 1596, 1549, 1541, 2647, 1633, 1605, 1608, 1571, 2645, 1507, 1448, 1496, 1516, 1504, 1510, 1508, 1509, 439, 431, 456, 461, 460, 391, 423, 415, 419, 407, 402, 367, 372, 339, 298, 338, 105, 368, 374, 393, 389, 390, 376, 377, 351, 350, 121, 345, 320, 301, 251, 234, 232, 205, 344, 107, 103, 152, 153, 161, 168, 3199, 188, 196, 255, 254, 236, 294, 242, 219, 201, 169, 162, 158, 160, 173. The following high value recreational routes/roads are legal RS 2477ROW's in the State of Colorado, Delta County, and the BLM does not have the jurisdiction to close them: 3011, 2184, 2191, 3100, 2187, 2026, 2059, 2188, 2192, 3104, 2130, 3009, 2199, 2200, 2111, 2223, 2024, 3006, 2231, 3094, 2579, 2210, 2344, 2243, 2249, 2248, 3074, 2354, 2384, 2296, 2295, 2287, 2304, 2062, 2163, 3163, 2164, 2430, 4006, 3016, 2351, 3140, 2410, 4008, 2324, 2073, 2306, 2459, 3192, 3193, 2350, 2443, 2035, 2336, 2495, 2491, 2159, 3058, 2277, 2465, 2467, 3189, 2472, 2297, 2006, 2265, 2271, 2276, 2135, 2139, 3053, 2489, 3033, 3057, 2031, 2276, 2210, 2579, 2136, 2344, 3164, 2400, 2379, 3014, 2365, 3116, 2251, 2259, 2149, 2153, 2146, 2144, 2145, 2356, 2257, 2048, 2358, 3165, and 3166.

## Route: 61

### Segment: 2732

#### Designation ?

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- Minimize Harassment:** PPSV- Minimize fragmentation, Bighorn – SSR -- summer range, Big game winter range – close

##### Rationale for Decision

- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to reduce the miles of motorized and mechanized routes in bighorn sheep habitat.
- Route was designated to protect big game winter range

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 61

- No public comments for this Route

## Route: 610

### Segment: 2682

#### Designation ?

##### Current Designation

Open (All modes of travel)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- Recreation:** RMA objectives, Rec opportunities - specific

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

- Alternative A:** Open (All modes of travel)
- Alternative B:** Closed (Not Rehabbed)
- Alternative C:** Closed (Rehab)
- Alternative D:** Closed (Rehab)

## Public Comments On Route: 610

- No public comments for this Route

## Route: 611

### Segment: 2681

#### Designation ?

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

## Route: 612

### Segment: 2677

#### Designation ?

##### Current Designation

Closed (Rehab)

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, Bighorn – SSR -- summer range

### Rationale for Decision

- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range
- Route was designated to reduce the miles of motorized and mechanized routes in bighorn sheep habitat.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- **Recreation:** Rec opportunities - specific

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open (All modes of travel)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 620

- No public comments for this Route

## Route: 621

### Segment: 2668

#### Designation

##### Current Designation

Foot/Horse

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation access to dispersed campsite
- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Vehicles under 50" wide

**Alternative C:** Foot/Horse

**Alternative D:** Foot/Horse/Mechanized/Motorcycle

## Public Comments On Route: 621

Organization, commenter: Quiet Trails Group, Sherry Schenk

Comment ID: 00000115-38

• 739 (near south end of Ninemile Hill area north of 26): This connector to the proposed horse/foot trails should be left open to horse/foot so that horseback riders and hikers can proceed from 738 to 733, and proceeding north-ward on the proposed horse/foot trails until reaching 621 and then returning to the starting point via 26. This forms a nice loop, approximately 7 miles in length, with varied views and terrain. Such a connector would also allow other longer loops

Organization, commenter: None

• 1. We have identified known potential issues and criteria to guide the planning process based on lands and resources in the planning area. Please provide comments on these issues and criteria, and/or identify other issues or criteria that you think should be considered (If your comment pertains to a specific issue or criteria, please use the reference code, e.g. "PCI") 2. What areas within the Dominguez-Escalante National Conservation Area or Dominguez Canyon Wilderness do you value? Why? Area 1 Great views birdwatching, wildlife potogrpthing & some hicking Area 2 Viewing from bluffs from above Area 3 I use this area a good many times a year Area 4 I can't get to this area to use. Area 5 I use any road or ATV trail thats OPEN 3. Please provide any additional comments that you have regarding this project. Comments on attach sheet. Maps with GPS routes in red. Things that I want to comment on concerning Dominguez-Escalante NCA. 1. Cactus Park area is used by the motorized community, Mountain bikers, Hikers, and Etc. There are a lot of roads, jeep & ATV trails that need to be open for everyone to use. The area has been used for cattle grazing, Christmas tree cutting, fire wood, and many other uses. As the population grows in this area there needs to be public land open for their use. 2. As the motorized roads, double track and single track trails are closed; much less area is left for folks to use. Any Wilderness and Wilderness Study Area restricts firefighting, timber cutting (to help control pine and pinion beeHe and controlling ground cover which will stop the massive fuel for fires) and weed control. Colorado is having large fires now because of these large amounts of fuel. 3. The attached maps have GPS routes shown in red that I have GPS'ed at different times. Please note that I have used these routes at different times. All these routes are jeep accessible; many are used by 2 wheel drive pickups. I almost never see hikers when I'm out using these routes on my ATV or Pickup. [ED: The D-E NCA's Recreation Planner identified the route numbers for routes highlighted on the map mentioned in this comment: 621, 624, 676, 649, 641, 743, 676, 741, 97, 96, 744, 733, 15, 838, 18, 945, 26, 847, 848, 941, 1192, 1292, 1377]

## Route: 622

### Segment: 2669

### Designation

#### Current Designation

Closed (Rehab)

#### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

#### Planning Criteria

- RECREATION Recreation access to dispersed campsite
- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches <60 acres

## Rationale

### Designation Criteria

- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, Bighorn – SSR -- summer range

### Rationale for Decision

- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range
- Route was designated to reduce the miles of motorized and mechanized routes in bighorn sheep habitat.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

• 1. We have identified known potential issues and criteria to guide the planning process based on lands and resources in the planning area. Please provide comments on these issues and criteria, and/or identify other issues or criteria that you think should be considered (If your comment pertains to a specific is sure or criteria, please use the reference code, e.g. "PCI") 2. What areas within the Dominguez-Escalante National Conservation Area or Dominguez Canyon Wilderness do you value? Why? Area 1 Great views birdwatching, wildlife potogrpning & some hicking Area 2 Viewing from bluffs from above Area 3 I use this area a good many times a year Area 4 I can't get to this area to use. Area 5 I use any road or ATV trail thats OPEN 3. Please provide any additional comments that you have regarding this project. Comments on attach sheet. Maps with GPS routes in red. Things that I want to comment on concerning Dominguez-Escalante NCA. 1. Cactus Park area is used by the motorized community, Mountain bikers, Hikers, and Etc. There are a lot of roads, jeep & ATV trails that need to be open for everyone to use. The area has been used for cattle grazing, Christmas tree cutting, fire wood, and many other uses. As the population grows in this area there needs to be public land open for their use. 2. As the motorized roads, double track and single track trails are closed; much less area is left for folks to use. Any Wilderness and Wilderness Study Area restricts firefighting, timber cutting (to help control pine and pinion beeHe and controlling ground cover which will stop the massive fuel for fires) and weed control. Colorado is having large fires now because of these large amounts of fuel. 3. The attached maps have GPS routes shown in red that I have GPS'ed at different times. Please note that I have used these routes at different times. All these routes are jeep accessible; many are used by 2 wheel drive pickups. I almost never see hikers when I'm out using these routes on my ATV or Pickup. [ED: The D-E NCA's Recreation Planner identified the route numbers for routes highlighted on the map mentioned in this comment: 621, 624, 676, 649, 641, 743, 676, 741, 97, 96, 744, 733, 15, 838, 18, 945, 26, 847, 848, 941, 1192, 1292, 1377]

## Route: 625

### Segment: 2653

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, Bighorn – SSR -- summer range

### Rationale for Decision

- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range
- Route was designated to reduce the miles of motorized and mechanized routes in bighorn sheep habitat.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 625

- No public comments for this Route

## Route: 626

### Segment: 2654

#### Designation [?](#)

##### Current Designation

Foot/Horse

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 626

- No public comments for this Route

## Route: 627

### Segment: 2656

#### Designation [?](#)

##### Current Designation

Closed (Rehab)

## Route: 629

### Segment: 2645

#### Designation

##### Current Designation

Foot/Horse

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

RECREATION Recreation opportunities for access to and across federal lands

- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches <60 acres

## Rationale

### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Vehicles under 50" wide

**Alternative C:** Foot/Horse

**Alternative D:** Foot/Horse/Mechanized/Motorcycle

## Public Comments On Route: 629

- No public comments for this Route

## Route: 63

### Segment: 2731

## Designation

### Current Designation

Closed (Rehab)

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density highest in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- **Minimize Harassment:** Bighorn – SSR -- summer range, PPSV- Minimize fragmentation, Big game winter range – close

### Rationale for Decision

- Route was designated to reduce the miles of motorized and mechanized routes in bighorn sheep habitat.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range

## Previous Alternatives Analyzed

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 63

- No public comments for this Route

## Route: 631

### Segment: 2635

## Designation

### Current Designation

Open (All modes of travel)

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range

- CULTURAL Cultural Indirect impact
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- No designation criteria for this route segment.

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open (All modes of travel)

**Alternative C:** Open (All modes of travel)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 631

- No public comments for this Route

## Route: 632

### Segment: 2641

## Designation

### Current Designation

Open (All modes of travel)

### Mitigation Criteria

- Needs Data - Cultural
- Cultural

### Planning Criteria

- RECREATION Recreation access to dispersed campsite
- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Direct impact
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- No designation criteria for this route segment.

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open (All modes of travel)

**Alternative C:** Open (All modes of travel)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 632

- No public comments for this Route

## Route: 633

### Segment: 2633

## Designation

### Current Designation

Open (All modes of travel)

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Indirect impact
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- No designation criteria for this route segment.

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

## Public Comments On Route: 633

- No public comments for this Route

## Route: 635

### Segment: 2646

## Designation

### Current Designation

Foot/Horse

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- RIPARIAN Riparian 1 stream crossing
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Vehicles under 50" wide

**Alternative C:** Foot/Horse

## Route: 638

### Segment: 2615

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Indirect impact
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Minimize Damage:** Cultural – SSR within 100m sites
- **Minimize Harassment:** PPSV- Minimize fragmentation, Bighorn – SSR -- summer range, Big game winter range – close

##### Rationale for Decision

- Route was designated to minimize impacts to cultural resources.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to reduce the miles of motorized and mechanized routes in bighorn sheep habitat.
- Route was designated to protect big game winter range

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 638

## Public Comments On Route: 641

Organization, commenter: None

Comment ID: PUB\_SC-014

1. We have identified known potential issues and criteria to guide the planning process based on lands and resources in the planning area. Please provide comments on these issues and criteria, and/or identify other issues or criteria that you think should be considered (If your comment pertains to a specific issue or criteria, please use the reference code, e.g. "PC1")
2. What areas within the Dominguez-Escalante National Conservation Area or Dominguez Canyon Wilderness do you value? Why? Area 1 Great views birdwatching, wildlife potogrpthing & some hicking Area 2 Viewing from bluffs from above Area 3 I use this area a good many times a year Area 4 I can't get to this area to use. Area 5 I use any road or ATV trail thats OPEN
3. Please provide any additional comments

that you have regarding this project. Comments on attach sheet. Maps with GPS routes in red. Things that I want to comment on concerning Dominguez-Escalante NCA. 1. Cactus Park area is used by the motorized community, Mountain bikers, Hikers, and Etc. There are a lot of roads, jeep & ATV trails that need to be open for everyone to use. The area has been used for cattle grazing, Christmas tree cutting, fire wood, and many other uses. As the population grows in this area there needs to be public land open for their use. 2. As the motorized roads, double track and single track trails are closed; much less area is left for folks to use. Any Wilderness and Wilderness Study Area restricts firefighting, timber cutting (to help control pine and pinion beeHe and controlling ground cover which will stop the massive fuel for fires) and weed control. Colorado is having large fires now because of these large amounts of fuel. 3. The attached maps have GPS routes shown in red that I have GPS'ed at different times. Please note that I have used these routes at different times. All these routes are jeep accessible; many are used by 2 wheel drive pickups. I almost never see hikers when I'm out using these routes on my ATV or Pickup. [ED: The D-E NCA's Recreation Planner identified the route numbers for routes highlighted on the map mentioned in this comment: 621, 624, 676, 649, 641, 743, 676, 741, 97, 96, 744, 733, 15, 838, 18, 945, 26, 847, 848, 941, 1192, 1292, 1377]

##### Current Designation

Foot/Horse

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Vehicles under 50" wide

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed, seek re-route or mitigation

## Public Comments On Route: 649

Organization, commenter: None

Comment ID: PUB\_SC-014

- 1. We have identified known potential issues and criteria to guide the planning process based on lands and resources in the planning area. Please provide comments on these issues and criteria, and/or identify other issues or criteria that you think should be considered (If your comment pertains to a specific issue or criteria, please use the reference code, e.g. "PC1") 2. What areas within the Dominguez-Escalante National Conservation Area or Dominguez Canyon Wilderness do you value? Why? Area 1 Great views birdwatching, wildlife potoghrping & some hicking Area 2 Viewing from bluffs from above Area 3 I use this area a good many times a year Area 4 I can't get to this area to use. Area 5 I use any road or ATV trail thats OPEN 3. Please provide any additional comments

that you have regarding this project. Comments on attach sheet. Maps with GPS routes in red. Things that I want to comment on concerning Dominguez-Escalante NCA. 1. Cactus Park area is used by the motorized community, Mountain bikers, Hikers, and Etc. There are a lot of roads, jeep & ATV trails that need to be open for everyone to use. The area has been used for cattle grazing, Christmas tree cutting, fire wood, and many other uses. As the population grows in this area there needs to be public land open for their use. 2. As the motorized roads, double track and single track trails are closed; much less area is left for folks to use. Any Wilderness and Wilderness Study Area restricts firefighting, timber cutting (to help control pine and piñon) and controlling ground cover which will stop the massive fuel for fires) and weed control. Colorado is having large fires now because of these large amounts of fuel. 3. The attached maps have GPS routes shown in red that I have GPS'ed at different times. Please note that I have used these routes at different times. All these routes are jeep accessible; many are used by 2 wheel drive pickups. I almost never see hikers when I'm out using these routes on my ATV or Pickup. [ED: The D-E NCA's Recreation Planner identified the route numbers for routes highlighted on the map mentioned in this comment: 621, 624, 676, 649, 641, 743, 676, 741, 97, 96, 744, 733, 15, 838, 18, 945, 26, 847, 848, 941, 1192, 1292, 1377]

## Route: 65

### Segment: 2740

#### Designation

##### Current Designation

Foot/Horse

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- WILDLIFE Big game summer concentration areas
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- Recreation:** RMA objectives, Rec opportunities – general
- Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Route: 650

### Segment: 2588

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

RECREATION Recreation opportunities for access to and across federal lands

- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- **Minimize Harassment:** PPSV- Minimize fragmentation, Bighorn – SSR -- summer range, Big game winter range – close

### Rationale for Decision

- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to reduce the miles of motorized and mechanized routes in bighorn sheep habitat.
- Route was designated to protect big game winter range

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 650

- No public comments for this Route

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range

- RIPARIAN Riparian 1 stream crossing
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Direct impact
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- Minimize Damage:** Cultural – SSR within 100m sites
- Minimize Harassment:** PPSV- Minimize fragmentation, Bighorn – SSR -- summer range, Big game winter range – close

### Rationale for Decision

- Route was designated to minimize impacts to cultural resources.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to reduce the miles of motorized and mechanized routes in bighorn sheep habitat.
- Route was designated to protect big game winter range

## Previous Alternatives Analyzed

## Route: 660

### Segment: 2557

## Designation

### Current Designation

Closed (Rehab)

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- Minimize Harassment:** PPSV- Minimize fragmentation, Bighorn – SSR -- summer range, Big game winter range – close

### Rationale for Decision

- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to reduce the miles of motorized and mechanized routes in bighorn sheep habitat.
- Route was designated to protect big game winter range

## Previous Alternatives Analyzed

**Alternative A:** Vehicles under 50" wide

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

Alternative D: Closed (Rehab)

## Segment: 2581

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- Recreation:** RMA objectives, Rec opportunities – general
- Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Vehicles under 50" wide

**Alternative C:** Foot/Horse

**Alternative D:** Foot/Horse/Mechanized/Motorcycle

**Alternative D:** Foot/Horse/Mechanized/Motorcycle

### Public Comments On Route: 676

Organization, commenter: None

Comment ID: PUB\_SC-014

- 1. We have identified known potential issues and criteria to guide the planning process based on lands and resources in the planning area. Please provide comments on these issues and criteria, and/or identify other issues or criteria that you think should be considered (If your comment pertains to a specific issue or criteria, please use the reference code, e.g. "PCI") 2. What areas within the Dominguez-Escalante National Conservation Area or Dominguez Canyon Wilderness do you value? Why? Area 1 Great views birdwatching, wildlife photography & some hiking Area 2 Viewing from bluffs from above Area 3 I use this area a good many times a year Area 4 I can't get to this area to use. Area 5 I use any road or ATV trail that's OPEN 3. Please provide any additional comments that you have regarding this project. Comments on attach sheet. Maps with GPS routes in red. Things that I want to comment on concerning Dominguez-Escalante NCA. 1. Cactus Park area is used by the motorized community, Mountain bikers, Hikers, and Etc. There are a lot of roads, jeep & ATV trails that need to be open for everyone to use. The area has been used for cattle grazing, Christmas tree cutting, fire wood, and many other uses. As the population grows in this area there needs to be public land open for their use. 2. As the motorized roads, double track and single track trails are closed; much less area is left for folks to use. Any Wilderness and Wilderness Study Area restricts firefighting, timber cutting (to help control pine and pinion beetle and controlling ground cover which will stop the massive fuel for fires) and weed control. Colorado is having large fires now because of these large amounts of fuel. 3. The attached maps have GPS routes shown in red that I have GPS'ed at different times. Please note that I have used these routes at different times. All these routes are jeep accessible; many are used by 2 wheel drive pickups. I almost never see hikers when I'm out using these routes on my ATV or Pickup. [ED: The D-E NCA's Recreation Planner identified the route numbers for routes highlighted on the map mentioned in this comment: 621, 624, 676, 649, 641, 743, 676, 741, 97, 96, 744, 733, 15, 838, 18, 945, 26, 847, 848, 941, 1192, 1292, 1377]

### Route: 677

#### Segment: 2522

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation access to dispersed campsite
- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Minimize Harassment:** PPSV- Minimize fragmentation, Bighorn – SSR -- summer range, Big game winter range – close

##### Rationale for Decision

- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to reduce the miles of motorized and mechanized routes in bighorn sheep habitat.
- Route was designated to protect big game winter range

#### Previous Alternatives Analyzed

## Route: 68

### Segment: 2724

## Designation

### Current Designation

Closed (Rehab)

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- **Minimize Harassment:** Bighorn – SSR -- summer range, PPSV- Minimize fragmentation, Big game winter range – close

### Rationale for Decision

- Route was designated to reduce the miles of motorized and mechanized routes in bighorn sheep habitat.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

## Rationale

### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 690

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

## Rationale

### Designation Criteria

- **Minimize Harassment:** PPSV- Minimize fragmentation, Bighorn – SSR -- summer range, Big game winter range – close

### Rationale for Decision

- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to reduce the miles of motorized and mechanized routes in bighorn sheep habitat.
- Route was designated to protect big game winter range

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

## Route: 697

### Segment: 2443

#### Designation

##### Current Designation

Foot/Horse

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

#### Rationale

##### Designation Criteria

- Recreation:** RMA objectives, Rec opportunities – general
- Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open (All modes of travel)

**Alternative C:** Closed (Rehab)

**Alternative D:** Foot/Horse/Mechanized/Motorcycle

## Public Comments On Route: 697

Organization, commenter: Janice Shepherd

Comment ID: 00000106-241

- Route 697 should be shown in the KML version as connecting to 26. I really enjoyed a hike along this route when combined with 700, 708, 720, 738 and 26. I was there with a group of 7 friends and the views and quiet were enjoyed by all. For many they had their first look at the entrance to Cactus Park as their low-clearance cars normally keep from accessing that area.

Organization, commenter: Quiet Trails Group, Sherry Schenk

Comment ID: 000000115-27

- Signage Need: During a recent hike into this area we noticed that on-site Tabeguache Trail signs led us to believe that this historic mountain biking trail travels along Routes 697, 700, 708, 720, 738, 739 and 744. This is not consistent with TMP maps included in this plan. We recommend that BLM ensure that on-the-ground, and on-the-map signage is consistent. Whether or not the aforementioned routes are in fact the Tabeguache Trail, we would be happy to see them remain open to Mountain bike, horse and foot' travel in the final plan

## Route: 698

### Segment: 2421

#### Designation

##### Current Designation

Foot/Horse

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

#### Rationale

##### Designation Criteria

- Recreation:** RMA objectives, Rec opportunities – general
- Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

### Public Comments On Route: 698

- No public comments for this Route

### Route: 699

#### Segment: 2422

#### Designation [?](#)

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation access to dispersed campsite
- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

#### Rationale

##### Designation Criteria

- Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, Bighorn – SSR -- summer range

##### Rationale for Decision

- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range
- Route was designated to reduce the miles of motorized and mechanized routes in bighorn sheep habitat.

### Previous Alternatives Analyzed

• Route 697 should be shown in the KML version as connecting to 26. I really enjoyed a hike along this route when combined with 700, 708, 720, 738 and 26. I was there with a group of 7 friends and the views and quiet were enjoyed by all. For many they had their first look at the entrance to Cactus Park as their low-clearance cars normally keep from accessing that area.

Comment ID: 00000115-27

• Signage Need: During a recent hike into this area we noticed that on-site Tabeguache Trail signs led us to believe that this historic mountain biking trail travels along Routes 697, 700, 708, 720, 738, 739 and 744. This is not consistent with TMP maps included in this plan. We recommend that BLM ensure that on-the-ground, and on-the-map signage is consistent. Whether or not the aforementioned routes are in fact the Tabeguache Trail, we would be happy to see them remain open to Mountain bike, horse and foot' travel in the final plan

## Route: 701

### Segment: 2406

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation access to dispersed campsite
- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

#### Rationale

##### Designation Criteria

- Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, Bighorn – SSR -- summer range

##### Rationale for Decision

- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range
- Route was designated to reduce the miles of motorized and mechanized routes in bighorn sheep habitat.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open (All modes of travel)

## Route: 708

### Segment: 2407

#### Designation ?

##### Current Designation

Foot/Horse

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

#### Rationale

##### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open (All modes of travel)

**Alternative C:** Closed (Rehab)

**Alternative D:** Foot/Horse/Mechanized/Motorcycle

## Public Comments On Route: 708

Comment ID: 00000106-241

• Route 697 should be shown in the KML version as connecting to 26. I really enjoyed a hike along this route when combined with 700, 708, 720, 738 and 26. I was there with a group of 7 friends and the views and quiet were enjoyed by all. For many they had their first look at the entrance to Cactus Park as their low-clearance cars normally keep from accessing that area.

Organization, commenter: Quiet Trails Group, Sherry Schenk

Comment ID: 00000115-27

• Signage Need: During a recent hike into this area we noticed that on-site Tabeguache Trail signs led us to believe that this historic mountain biking trail travels along Routes 697, 700, 708, 720, 738, 739 and 744. This is not consistent with TMP maps included in this plan. We recommend that BLM ensure that on-the-ground, and on-the-map signage is consistent. Whether or not the aforementioned routes are in fact the Tabeguache Trail, we would be happy to see them remain open to Mountain bike, horse and foot' travel in the final plan

## Route: 709

### Segment: 2398

#### Designation ?

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands

- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

## Rationale

### Designation Criteria

- Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, Bighorn – SSR -- summer range

### Rationale for Decision

- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range
- Route was designated to reduce the miles of motorized and mechanized routes in bighorn sheep habitat.

## Route: 711

### Segment: 2395

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density highest in Alt A
- DENSITY Route density medium in Alt E

#### Rationale

##### Designation Criteria

- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, Bighorn – SSR -- summer range

##### Rationale for Decision

- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range
- Route was designated to reduce the miles of motorized and mechanized routes in bighorn sheep habitat.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 711

- No public comments for this Route

## Route: 712

### Segment: 2391

#### Designation

##### Current Designation

Foot/Horse

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density low in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Vehicles under 50" wide

**Alternative B:** Open, seek re-route or mitigation

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed, seek re-route or mitigation

## Public Comments On Route: 712

- No public comments for this Route

## Route: 713

### Segment: 2388

#### Designation [?](#)

##### Current Designation

Foot/Horse

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density low in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Vehicles under 50" wide

## Route: 716

### Segment: 2397

#### Designation

##### Current Designation

Foot/Horse

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

#### Rationale

##### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Admin/Permitted Use Only

**Alternative C:** Foot/Horse/Mechanized (but still open to motorized for admin/permitted access)

**Alternative D:** Admin/Permitted Use Only

## Public Comments On Route: 716

- No public comments for this Route

## Route: 717

## Public Comments On Route: 720

Organization, commenter: Janice Shepherd

Comment ID: 000000106-104

- The Tabeguache Trail is a well-known attraction for mountain bikers to the Grand Junction area. This trail passes through Ninemile Hill. On a recent hike to the south section of Ninemile Hill it appears that the BLM's Alternative E is proposing to convert some of the currently signed Tabeguache Trail to be horse and foot only. This doesn't make sense. Routes 720, 739 and 744 have signage for the Tabeguache Trail, so these sections of existing routes should remain open to mountain bike as well as horse and foot. Converting some of that to single track would be appealing to Tabegauche bicycle riders. (Mountain bike riders seem to prefer single track over 2 tracks, while I find hikers are happy hiking on non-motorized two tracks).

Organization, commenter: Janice Shepherd

Comment ID: 000000106-241

- Route 697 should be shown in the KML version as connecting to 26. I really enjoyed a hike along this route when combined with 700, 708, 720, 738 and 26. I was there with a group of 7 friends and the views and quiet were enjoyed by all. For many they had their first look at the entrance to Cactus Park as their low-clearance cars normally keep from accessing that area.

Organization, commenter: Quiet Trails Group, Sherry Schenk

Comment ID: 000000115-27

- Signage Need: During a recent hike into this area we noticed that on-site Tabeguache Trail signs led us to believe that this historic mountain biking trail travels along Routes 697, 700, 708, 720, 738, 739 and 744. This is not consistent with TMP maps included in this plan. We recommend that BLM ensure that on-the-ground, and on-the-map signage is consistent. Whether or not the aforementioned routes are in fact the Tabeguache Trail, we would be happy to see them remain open to Mountain bike, horse and foot' travel in the final plan

## Route: 721

### Segment: 2375

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range

## Route: 728

### Segment: 2372

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

## Rationale

### Designation Criteria

- Minimize Harassment:** Bighorn – SSR -- summer range, PPSV- Minimize fragmentation, Big game winter range – close

### Rationale for Decision

- Route was designated to reduce the miles of motorized and mechanized routes in bighorn sheep habitat.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range

## Public Comments On Route: 733

Organization, commenter: Quiet Trails Group, Sherry Schenk

Comment ID: 00000115-38

- 739 (near south end of Ninemile Hill area north of 26): This connector to the proposed horse/foot trails should be left open to horse/foot so that horseback riders and hikers can proceed from 738 to 733, and proceeding north-ward on the proposed horse/foot trails until reaching 621 and then returning to the starting point via 26. This forms a nice loop, approximately 7 miles in length, with varied views and terrain. Such a connector would also allow other longer loops

• 1. We have identified known potential issues and criteria to guide the planning process based on lands and resources in the planning area. Please provide comments on these issues and criteria, and/or identify other issues or criteria that you think should be considered (If your comment pertains to a specific is sure or criteria, please use the reference code, e.g. "PC1") 2. What areas within the Dominguez-Escalante National Conservation Area or Dominguez Canyon Wilderness do you value? Why? Area 1 Great views birdwatching, wildlife potogrpthing & some hicking Area 2 Viewing from bluffs from above Area 3 I use this area a good many times a year Area 4 I can't get to this area to use. Area 5 I use any road or ATV trail thats OPEN 3. Please provide any additional comments that you have regarding this project. Comments on attach sheet. Maps with GPS routes in red. Things that I want to comment on concerning Dominguez-Escalante NCA. 1. Cactus Park area is used by the motorized community, Mountain bikers, Hikers, and Etc. There are a lot of roads, jeep & ATV trails that need to be open for everyone to use. The area has been used for cattle grazing, Christmas tree cutting, fire wood, and many other uses. As the population grows in this area there needs to be public land open for their use. 2. As the motorized roads, double track and single track trails are closed; much less area is left for folks to use. Any Wilderness and Wilderness Study Area restricts firefighting, timber cutting (to help control pine and piñon beeHe and controlling ground cover which will stop the massive fuel for fires) and weed control. Colorado is having large fires now because of these large amounts of fuel. 3. The attached maps have GPS routes shown in red that I have GPS'ed at different times. Please note that I have used these routes at different times. All these routes are jeep accessible; many are used by 2 wheel drive pickups. I almost never see hikers when I'm out using these routes on my ATV or Pickup. [ED: The D-E NCA's Recreation Planner identified the route numbers for routes highlighted on the map mentioned in this comment: 621, 624, 676, 649, 641, 743, 676, 741, 97, 96, 744, 733, 15, 838, 18, 945, 26, 847, 848, 941, 1192, 1292, 1377]

## Route: 735

### Segment: 2338

#### Designation [?](#)

##### Current Designation

Open (All modes of travel)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

#### Rationale

##### Designation Criteria

- **No designation criteria for this route segment.**

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Public Comments On Route: 738

Organization, commenter: Jeffery Fleming

Comment ID: 000000105-6

- New trail construction on very top of NE ridge above Cactus Park. It would connect 738 to 998 crossing 26 midway and would also make a great hiking trail with amazing views in both directions

Organization, commenter: Janice Shepherd

Comment ID: 000000106-241

- Route 697 should be shown in the KML version as connecting to 26. I really enjoyed a hike along this route when combined with 700, 708, 720, 738 and 26. I was there with a group of 7 friends and the views and quiet were enjoyed by all. For many they had their first look at the entrance to Cactus Park as their low-clearance cars normally keep from accessing that area.

Organization, commenter: Quiet Trails Group, Sherry Schenk

Comment ID: 000000115-27

- Signage Need: During a recent hike into this area we noticed that on-site Tabeguache Trail signs led us to believe that this historic mountain biking trail travels along Routes 697, 700, 708, 720, 738, 739 and 744. This is not consistent with TMP maps included in this plan. We recommend that BLM ensure that on-the-ground, and on-the-map signage is consistent. Whether or not the aforementioned routes are in fact the Tabeguache Trail, we would be happy to see them remain open to Mountain bike, horse and foot travel in the final plan

Organization, commenter: Quiet Trails Group, Sherry Schenk

Comment ID: 000000115-38

- 739 (near south end of Ninemile Hill area north of 26): This connector to the proposed horse/foot trails should be left open to horse/foot so that horseback riders and hikers can proceed from 738 to 733, and proceeding north-ward on the proposed horse/foot trails until reaching 621 and then returning to the starting point via 26. This forms a nice loop, approximately 7 miles in length, with varied views and terrain. Such a connector would also allow other longer loops

Organization, commenter: COPMOBA, Scott Winans

Comment ID: 000000168-4

- Cactus Park New trail construction on very top of NE ridge above Cactus Park. It would connect 738 to 998 crossing 26 midway and would also make a great hiking trail with amazing views in both directions. We [COPMOBA] agree with 1728 and 1725 as accessible for mountain bike due to the trail being managed as such after crossing National Forest land boundary

## Route: 739

### Segment: 2341

#### Designation

##### Current Designation

Foot/Horse

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E
- VEGETATION Sagebrush patches <60 acres

#### Rationale

##### Designation Criteria

- Recreation:** RMA objectives, Rec opportunities – general
- Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Public Comments On Route: 739

Organization, commenter: Janice Shepherd

Comment ID: 000000106-104

- The Tabeguache Trail is a well-known attraction for mountain bikers to the Grand Junction area. This trail passes through Ninemile Hill. On a recent hike to the south section of Ninemile Hill it appears that the BLM's Alternative E is proposing to convert some of the currently signed Tabeguache Trail to be horse and foot only. This doesn't make sense. Routes 720, 739 and 744 have signage for the Tabeguache Trail, so these sections of existing routes should remain open to mountain bike as well as horse and foot. Converting some of that to single track would be appealing to Tabeguache bicycle riders. (Mountain bike riders seem to prefer single track over 2 tracks, while I find hikers are happy hiking on non-motorized two tracks).

Organization, commenter: Quiet Trails Group, Sherry Schenk

Comment ID: 000000115-27

- Signage Need: During a recent hike into this area we noticed that on-site Tabeguache Trail signs led us to believe that this historic mountain biking trail travels along Routes 697, 700, 708, 720, 738, 739 and 744. This is not consistent with TMP maps included in this plan. We recommend that BLM ensure that on-the-ground, and on-the-map signage is consistent. Whether or not the aforementioned routes are in fact the Tabeguache Trail, we would be happy to see them remain open to Mountain bike, horse and foot travel in the final plan

## Public Comments On Route: 741

Organization, commenter: None

Comment ID: PUB\_SC-014

- 1. We have identified known potential issues and criteria to guide the planning process based on lands and resources in the planning area. Please provide comments on these issues and criteria, and/or identify other issues or criteria that you think should be considered (If your comment pertains to a specific issue or criteria, please use the reference code, e.g. "PCI") 2. What areas within the Dominguez-Escalante National Conservation Area or Dominguez Canyon Wilderness do you value? Why? Area 1 Great views birdwatching, wildlife potogrpthing & some hicking Area 2 Viewing from bluffs from above Area 3 I use this area a good many times a year Area 4 I can't get to this area to use. Area 5 I use any road or ATV trail thats OPEN 3. Please provide any additional comments that you have regarding this project. Comments on attach sheet. Maps with GPS routes in red. Things that I want to comment on concerning Dominguez-Escalante NCA. 1. Cactus Park area is used by the motorized community, Mountain bikers, Hikers, and Etc. There are a lot of roads, jeep & ATV trails that need to be open for everyone to use. The area has been used for cattle grazing, Christmas tree cutting, fire wood, and many other uses. As the population grows in this area there needs to be public land open for their use. 2. As the motorized roads, double track and single track trails are closed; much less area is left for folks to use. Any Wilderness and Wilderness Study Area restricts firefighting, timber cutting (to help control pine and pinion beeHe and controlling ground cover which will stop the massive fuel for fires) and weed control. Colorado is having large fires now because of these large amounts of fuel. 3. The attached maps have GPS routes shown in red that I have GPS'ed at different times. Please note that I have used these routes at different times. All these routes are jeep accessible; many are used by 2 wheel drive pickups. I almost never see hikers when I'm out using these routes on my ATV or Pickup. [ED: The D-E NCA's Recreation Planner identified the route numbers for routes highlighted on the map mentioned in this comment: 621, 624, 676, 649, 641, 743, 676, 741, 97, 96, 744, 733, 15, 838, 18, 945, 26, 847, 848, 941, 1192, 1292, 1377]

Organization, commenter: None

Comment ID: PUB\_SC-009

- [ED: Following are the text (in quotes) and the D-E NCA Recreation Planner's interpretation of what the commenter wrote on the maps they submitted during public scoping for the Dominguez RMP. The Rec Planner also identified the route numbers highlighted on the maps]: Routes 741 and 848 "needs ATV connector. Cultural sites can easily be avoided by the 50 foot policy." Routes 26 and 1017 "needs ATV connector." Route 941 "must remain open." Route 1017 "should be ATV route." There should be an "ATV connect" between routes 1198 and 1263. The following text was highlighted in orange "Highlighted routes are routes used often by WSATVA and other ATVs." in addition to all the routes mentioned previously, the following routes were highlighted in orange: 743, 97, 96, 26, 813, 842, 15, 847, 1393, 1192, 1292. [ED: On a second map, the commenter highlighted additional routes]: The following are "routes used often by WSATVA": 1516, 1571, 1605, 1633, 15, 1641, 1221. "SC-5" connecting routes 1605 and 1633 " and "SC-6" connecting routes 1516 and 1605 "need to become new ATV routes connecting these deadends." [ED: A map of the Gibbler Mountain area had additional text and routes]. "Highlighted routes" which "are often used by WSATVA 3 seasons" are as follows: 1235, 1221, 1409, 1310, 1263, 1198, 15. Route 1235 [is or should be] "an ATV route."

## Route: 742

### Segment: 2329

## Designation

### Current Designation

Closed (Rehab)

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

## Rationale

### Designation Criteria

- Minimize Harassment:** PPSV- Minimize fragmentation, Bighorn – SSR -- summer range, Big game winter range – close

### Rationale for Decision

- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to reduce the miles of motorized and mechanized routes in bighorn sheep habitat.
- Route was designated to protect big game winter range

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

## Public Comments On Route: 743

Organization, commenter: None

Comment ID: PUB\_SC-014

• 1. We have identified known potential issues and criteria to guide the planning process based on lands and resources in the planning area. Please provide comments on these issues and criteria, and/or identify other issues or criteria that you think should be considered (If your comment pertains to a specific is sure or criteria, please use the reference code, e.g. "PCI") 2. What areas within the Dominguez-Escalante National Conservation Area or Dominguez Canyon Wilderness do you value? Why? Area 1 Great views birdwatching, wildlife potoghrphing & some hicking Area 2 Viewing from bluffs from above Area 3 I use this area a good many times a year Area 4 I can't get to this area to use. Area 5 I use any road or ATV trail thats OPEN 3. Please provide any additional comments that you have regarding this project. Comments on attach sheet. Maps with GPS routes in red. Things that I want to comment on concerning Dominguez-Escalante NCA. 1. Cactus Park area is used by the motorized community, Mountain bikers, Hikers, and Etc. There are a lot of roads, jeep & ATV trails that need to be open for everyone to use. The area has been used for cattle grazing, Christmas tree cutting, fire wood, and many other uses. As the population grows in this area there needs to be public land open for their use. 2. As the motorized roads, double track and single track trails are closed; much less area is left for folks to use. Any Wilderness and Wilderness Study Area restricts firefighting, timber cutting (to help control pine and piñon beeHe and controlling ground cover which will stop the massive fuel for fires) and weed control. Colorado is having large fires now because of these large amounts of fuel. 3. The attached maps have GPS routes shown in red that I have GPS'ed at different times. Please note that I have used these routes at different times. All these routes are jeep accessible; many are used by 2 wheel drive pickups. I almost never see hikers when I'm out using these routes on my ATV or Pickup. [ED: The D-E NCA's Recreation Planner identified the route numbers for routes highlighted on the map mentioned in this comment: 621, 624, 676, 649, 641, 743, 676, 741, 97, 96, 744, 733, 15, 838, 18, 945, 26, 847, 848, 941, 1192, 1292, 1377]

Organization, commenter: None

Comment ID: PUB\_SC-009

• [ED: Following are the text (in quotes) and the D-E NCA Recreation Planner's interpretation of what the commenter wrote on the maps they submitted during public scoping for the Dominguez RMP. The Rec Planner also identified the route numbers highlighted on the maps]: Routes 741 and 848 "needs ATV connector. Cultural sites can easily be avoided by the 50 foot policy." Routes 26 and 1017 "needs ATV connector." Route 941 "must remain open." Route 1017 "should be ATV route." There should be an "ATV connect" between routes 1198 and 1263. The following text was highlighted in orange "Highlighted routes are routes used often by WSATVA and other ATVs." in addition to all the routes mentioned previously, the following routes were highlighted in orange: 743, 97, 96, 26, 813, 842, 15, 847, 1393, 1192, 1292. [ED: On a second map, the commenter highlighted additional routes]: The following are "routes used often by WSATVA": 1516, 1571, 1605, 1633, 15, 1641, 1221. "SC-5" connecting routes 1605 and 1633 " and "SC-6" connecting routes 1516 and 1605 "need to become new ATV routes connecting these deadends." [ED: A map of the Gibbler Mountain area had additional text and routes]. "Highlighted routes" which "are often used by WSATVA 3 seasons" are as follows: 1235, 1221, 1409, 1310, 1263, 1198, 15. Route 1235 [is or should be] "an ATV route."

## Route: 744

### Segment: 2340

**Alternative D:** Admin/Permitted Use Only

### Public Comments On Route: 744

Organization, commenter: Janice Shepherd

Comment ID: 000000106-104

- The Tabeguache Trail is a well-known attraction for mountain bikers to the Grand Junction area. This trail passes through Ninemile Hill. On a recent hike to the south section of Ninemile Hill it appears that the BLM's Alternative E is proposing to convert some of the currently signed Tabeguache Trail to be horse and foot only. This doesn't make sense. Routes 720, 739 and 744 have signage for the Tabeguache Trail, so these sections of existing routes should remain open to mountain bike as well as horse and foot. Converting some of that to single track would be appealing to Tabeguache bicycle riders. (Mountain bike riders seem to prefer single track over 2 tracks, while I find hikers are happy hiking on non-motorized two tracks).

Organization, commenter: Quiet Trails Group, Sherry Schenk

Comment ID: 000000115-27

- Signage Need: During a recent hike into this area we noticed that on-site Tabeguache Trail signs led us to believe that this historic mountain biking trail travels along Routes 697, 700, 708, 720, 738, 739 and 744. This is not consistent with TMP maps included in this plan. We recommend that BLM ensure that on-the-ground, and on-the-map signage is consistent. Whether or not the aforementioned routes are in fact the Tabeguache Trail, we would be happy to see them remain open to Mountain bike, horse and foot' travel in the final plan

## Route: 757

### Segment: 2295

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation access to dispersed campsite
- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- RIPARIAN Riparian 3 stream crossings
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Direct impact
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E
- VEGETATION Sagebrush patches >60 acres

## Rationale

### Designation Criteria

- **Minimize Damage:** Fragile soils SSR, Riparian—ephemeral streams SSR 30 m, Cactus – reduce density within 200m
- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close

### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to minimize travel routes in and crossing riparian and wetland areas.
- Route was designated to reduce the density of routes within 200 meters of known Colorado hookless Cactus occurrences.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range

## Previous Alternatives Analyzed

**Alternative A:** Vehicles under 50" wide

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 757

- No public comments for this Route

## Route: 76

### Segment: 2307

## Designation ?

### Current Designation

Closed (Rehab)

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- RIPARIAN Riparian 1 stream crossing
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Indirect impact
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- **Minimize Damage:** Fragile soils SSR, Riparian—ephemeral streams SSR 30 m
- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close

### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to minimize travel routes in and crossing riparian and wetland areas.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 76

- No public comments for this Route

## Route: 761

### Segment: 2252

## Designation ?

### Current Designation

Closed (Rehab)

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands

- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density highest in Alt A
- DENSITY Route density medium in Alt E

## Rationale

### Designation Criteria

- **Minimize Damage:** Fragile soils SSR
- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, GUSG –PSD in winter habitat

### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range
- Route was designated to minimize fragmentation of Gunnison sage-grouse habitat.

## Previous Alternatives Analyzed

## Route: 769

### Segment: 2284

## Designation

### Current Designation

Closed (Rehab)

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation access to dispersed campsite
- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Indirect impact
- DENSITY Route density highest in Alt A
- DENSITY Route density medium in Alt E
- VEGETATION Sagebrush patches >60 acres

## Rationale

### Designation Criteria

- **Minimize Damage:** Fragile soils SSR, Cactus – reduce density within 200m
- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, GUSG –PSD in winter habitat

### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to reduce the density of routes within 200 meters of known Colorado hookless Cactus occurrences.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range
- Route was designated to minimize fragmentation of Gunnison sage-grouse habitat.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 769

## Public Comments On Route: 786

Organization, commenter: Janice Shepherd

Comment ID: 000000106-229

- Routes 786, 787: Despite some strong efforts by the BLM to install a barrier, on a recent hike (9/9/2013) we observed fresh ATV tracks on 786 and 787.

Organization, commenter: Quiet Trails Group, Sherry Schenk

Comment ID: 000000115-4

- Route Density Reductions: Maintaining a rural, western setting is critical to all recreational experiences within the NCA and to the legacy of this landscape. As such, we strongly support the elimination of redundant routes proposed in the preferred alternative.d. Non-Motorized Trail Network: We would like to see a network of non-motorized trails located throughout the NCA and are pleased that for the most part this desire is accommodated in BLM's preferred alternative whether it is through language indicating the future development of non-motorized routes or the designation of some existing routes as non-motorized in the draft Travel Plan. We fully recognize that this NCA is multiple-use in nature and so acknowledge that in many instances recreationists will need to collectively share routes, however the quality of our experience is greatly enhanced by having some routes located in quiet-settings. oTo elaborate, we envision that this system will include some routes which are shared with motorized users and which provide connectivity to segments located within entirely quiet settings or to segments in semi-quiet areas in which motorized routes may run in parallel. Further, we envision that this network will provide opportunities for non-motorized single-day excursions in addition to non-motorized multi-day excursions!o As a quick example, we are very pleased with the Ninemile Hill ERMA which is included in the preferred alternative. Targeted activities include horseback riding, hiking and dispersed camping. Future trail development will be non-motorized and we are very excited about the quiet, day-use opportunities to be found here (not to mention theintro-to backpacking/horsepacking' which the ERMA can provide, assuming of course that some of the designated campsites are only accessible from non-motorized

routes!). However we also recognize and respect the need for, and management of, some continued motorized access in this region and we are happy to accommodate motorized use on those routes suggested in the preferred alternative. On the other hand, we are concerned about the lack of designated and future non-motorized routes within the Cactus Park SRMA as it represents about 13% of the NCA and only includes two short non-motorized routes in Alternative E. (Route 786 near Gunnison Gravels - is about .15 miles long and Route 1734 (near High Park) is about .21 miles long - for a total of about 1/3 of a mile of non-motorized routes.) See pages 9 and 10 for some proposals to address this deficiency.

## Route: 787

### Segment: 2221

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Indirect impact
- SMAs Gunnison Gravels ACEC
- DENSITY Route density highest in Alt A
- DENSITY Route density medium in Alt E
- VEGETATION Sagebrush patches >60 acres

#### Rationale

##### Designation Criteria

- **Minimize Damage:** Fragile soils SSR
- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, GUSG –PSD in winter habitat, Sage-Minimize fragmentation
- **Wilderness / Natural Area:** ACEC-Gunni Gravels-PSD

##### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range
- Route was designated to minimize fragmentation of Gunnison sage-grouse habitat.
- Route was designated to reduce fragmentation of sagebrush patches
- Route was designated to protect unique and sensitive geological resources in the Gunnison Gravels ACEC

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 787

Organization, commenter: Janice Shepherd

Comment ID: 000000106-17

- I have a concern about dropping the Gunnison Gravels ACEC status. The BLM has indicated at an Advisory Council meeting that adequate fencing exists to protect the site. While I don't think that the fencing needs to be extended to the size of area depicted in either Alt A or Alt D, I believe the size of the area protected by current fencing is too small and that it needs to be expanded to include the slope within the gravels area. For example from repeated and ongoing use, erosion is happening on the gravels in the area of NW segment of route 787 (despite efforts to fence off access from the parking lot). A new route is forming on the SE side of the parking lot fence. Unless other less visibly intrusive means of blocking motorized use of routes 787, 795 and 805 can be found, I would support expanding the fenced in area to include all of 787, 795 and 805 and other traversable slopes around the gravels.

Organization, commenter: Janice Shepherd

Comment ID: 000000106-229

- Routes 786, 787: Despite some strong efforts by the BLM to install a barrier, on a recent hike (9/9/2013) we observed fresh ATV tracks on 786 and 787.

## Route: 79

### Segment: 2314

#### Designation

##### Current Designation

Foot/Horse

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E
- VEGETATION Sagebrush patches <60 acres

#### Rationale

##### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

#### **Rationale for Decision**

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Segment: 1287

### Designation [?](#)

#### Current Designation

Open (All modes of travel)

#### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk severe winter range
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I high
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

### Rationale

#### Designation Criteria

- No designation criteria for this route segment.

#### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Admin/Permitted Use Only

**Alternative C:** Admin/Permitted Use Only

**Alternative D:** Admin/Permitted Use Only

## Segment: 1339

### Designation

#### Current Designation

Open (All modes of travel)

#### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

#### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk severe winter range
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I moderate
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches >60 acres

### Rationale

#### Designation Criteria

- No designation criteria for this route segment.

#### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

Routes such as the Gibler Gulch route, Farmer Canyon routes and the main routes in Wagon Park should remain open in December and January. A more prudent closure, if even needed, would be during "mud season" in the area. I would propose this to be from Mid February to April. BLM should tell Parks & Wildlife that this approach would make much more sense and accomplish the same thing as a five month closure.

The Gibbler Mountain ACEC as shown on map 2-5E does not encompass the mountain itself but only its northern slopes. I would prefer to see a non-motorized/non-mechanized ACEC for the whole of Gibbler Mountain and its surrounding slopes, bounded by the routes: 1235-1236-1228-1409-1221-15-8-887-18-17-945-547-951-959-966-969-1005-1006-1021-1022-1023-1024-1047-1150-1249, with 1269 left open to motorized use as a motorized cherry-stemmed route into the area. This would keep this wonderful roadless area (though too small a space for the inventory) roadless into the future. The text on page 871 indicates the area has one of the "best known" populations of the rare plant Grand Junction milkvetch as well as a large collection of fragile dinosaur tracks. The Special Species map from the Open House needs to be updated with this GJ milkvetch population. This ACEC representing a hole in the SRMA would properly protect all three features: roadless-ness, dinosaur tracks, and GJ milkvetch, at the cost of less than 5000 acres. This protection is consistent with this being a National Conservation Area and not a National Recreation Area. This position also has support from the D-E NCA Advisory Council. I recently hiked up to the top of the northern portion of Gibbler Mountain with a friend. We were inspired by the challenging terrain for hiking and the awesome views (photo IMG\_9998). We both had a great feeling of accomplishment when we reached the top. There is plenty of evidence of big game animals using the Gibbler Mountain as a quiet sanctuary from the surrounding motorized areas. This proposed ACEC would benefit them.

Gibbler Mountain Area of Critical Environmental Concern: The QTG supports Gibbler Mtn ACEC from Alt D because protections are needed for the myriad of resources found here, especially if it is going to be located within an SRMA focused on motorized use. Further, we think the ACEC should be extended to include all of Gibbler Mountain. Surface-disturbance limitations and a rule of no motorized use should be included for the full ACEC, including this recommended expansion. With this expansion the full ACEC would be bounded by: Routes: 1235-1236-1228-1409-1221-15-8-887-18-17-945-547-951-954-959-962-966-969-1005-1006-1021-1022-1023-1024-1047-1150-1249-8, with 1269, and 1173-1174-1198-1200-1193 cherry-stemmed into the area. The reasons we support this designation are as follows: Roadless areas are an endangered resource in the high-desert west. Categorically, roadless areas especially within NCAs- should be protected as such. By making it a larger area not only does it protect this roadless area but also it better disguises the location of the dinosaur tracks and fossils which we see from page 872," are regionally significant and easily damaged". Per page 871, "This site also supports one of the best known occurrences (A-ranked) of Grand Junction milkvetch (Astragalus linifolius), a globally vulnerable plant (G3/S3) and a BLM sensitive plant species."o Map 3-13 needs to be updated to show the presence of Grand Junction milkvetch and Colorado Hookless cactus as the text on page 871 indicates both are present in this area. A recent hike in this area shows prolific big game use in the area, we assume it is their refuge from surrounding motorized use. Recent hikes have confirmed the presence of Ponderosa Pine atop Gibbler Mtn. This designation would aid in increasing the number of healthy

Pondersa Pines within the NCA, an action which would be in accordance with the Alternative E management objective on page 52. o Map 3-3 needs to be updated to reference the presence of Pondersa Pine in this area. The designation of this expanded ACEC in the final plan, would address the need for non-motorized trails in this portion of the NCA, an opportunity currently missing from the draft plan. And to reiterate, these protections are needed for the myriad of resources found here, especially because they are to be located within an SRMA focused on motorized use

• Gibbler Gulch/Gibbler MountainThe following are route recommendations for Gibbler Gulch and Gibbler Mountain which together make a nice amount of relatively undisturbed open space and habitat. This area is less roaded and fragmented than other parts of Cactus Park NCA unit. It may be less impacted by grazing than other areas and harbors critical big game habitat. Hoping to send you maps next week showing these areas. In particular I recommend keeping recreational use out of all the creek drainages in the upper Gibbler Gulch area, and closing roads on the adjacent mesas. Putting a motorized or mountain bike route over Gibbler Mountain would irreversibly change the natural quality, silence and solitude of this remote landscape. Lands that are currently undeveloped should stay that way as so much land in the NCA is criss-crossed with routes and trails.For example there is potential for retaining the remote "open space" setting of Gibbler Mountain, as specified in the 2007 Colorado BLM Recreation and Visitor Strategy, by closing 1227(!) (especially), 1269, 1309, 2674, 2673, 1249, 1171, 981, 980, 1150, 1154, 977, 979, 1312, 1310, 1334, 1330, 1344, 1286, 1242, 1213, 1238, 1242, 1204, 1213, 1239, 1214, 1212, 1200, 1263, 1204, 1198, 1187, 1210. Limit motorized traffic to roads 15 and 8. Similarly, there is potential for a large unmotorized area extending west from road 15 and Gibbler Gulch on the east, to road 8 on the west. To create an undisturbed nonmotorized area I recommend closing routes 1526, 2666, 1571, 2665, 1608, 1570, 1605, 1561, 1516, 1606, 1561, 1609 1633, 2664, 2663, 1412, 1424, 1456 1434, 1513, 1249, 1269.Many of these are duplicative, serve no purpose, or are dead ends, simply pioneered randomly, and should be closed.

• The following are comments on two hard copy maps I am sending today through the mail.Map 1 - Road Densities by watershedThis map shows varying road densities with the DENCA.The watershed in section 1, circled on the map, has high road densities, 2.6 4 miles per square mile, that need to be reduced to restore the fragmented landscape. This is the Farmer Canyon, Gibbler Gulch area.The watershed found in section 2, circled on the map, has extremely high route densities, up to almost 7 miles per square mile. It is extremely important that the BLM reduce densities in this area, Cactus Park, which are affecting watershed health.The watershed found in section 3, circled on the map, is in the Hunting Ground unit and has moderate route densities, 1/7 2.6 miles per square mile, that likewise need to be reduced, closing duplicate and unnecessary routes, and adding no new routes.The water shed in section 4, circled on the map covers and Sawmill Mesa-Sowbelly Ridge unit of the NCA. It has the lowest route densities per square mile, which should be maintained.Map 2 - Overlapping Sensitive Species Habitat and CNHP Potential Conservation AreasThis map shows areas of very high overlap, red, and high overlap, dark yellow. The red areas are located in the Wilderness and at the mouth of Big Dominguez Creek. The largest of the dark yellow areas (high concentrations of sensitive species) is in the Gibbler Gulch area of the Cactus Park unit, an area where my letter recommends multiple route closures to restore and protect the less motorized character of this landscape.

List of photos taken in Cactus Park August 22, 2011Photo-point explanation1. Only the last two digits of the numbered photographs are marked on the map except for 0705 and 0707 at the end of the list.2. Photos 60 77 were taken along Route 8 on the Cactus Park map (found on the DENCA website). Route 8 is shown in purple and starts south of Cactus Park Road, #15.3. Photos 82 - 95 were taken on Route 1235 branching east off Route 8 south of Gibbler Mt. Route 1235 is found on both the Cactus Park map and Farmers Canyon/Wagon Park map on the DENCA website. 4. On the Farmers Canyon map, Route 1235 joins routes 1236, 1228 and 1409 until it connects with 1221. 5. The route numbers used here are from the web maps and may not correspond with the route numbers on Lee's paper maps.6. Photo 0707 was taken along Route 26, near the northeast corner of the Gunnison Bluffs Citizen Proposed wildernessList of Photo-points drawn on the Cactus Park and Farmers Canyon/Wagon Park maps (found on the DENCA website):0660 User-created tracks, soil disturbance on Route 80661 User-created motorcycle tracks, area is remote and difficult to patrol0662 Braided tracks, cryptogammic soil disturbance, rough road 0665 One of few less jolting sections of road 0672 View of Gibbler Mountain from the west. Gibbler Mountain is a 3000 acre unfragmented habitat area currently undisturbed by any roads or trails. It lends itself to designation as an untrailed, nonmotorized primitive area. 0674 View of Gibbler Mountain from the south 0675 View to the west from the same location on Route 8 0677 Closer view from the south 0682 Route narrows to ATV width here on Route 1235 where it branches off Route 8 south of Gibbler Mountain. 0684 Same 0689 View south from same spot into Gibbler Gulch and Dominguez Canyon on the far horizon. Gibbler Gulch forms another 3000 acre untrailed, unfragmented area which, if ATV route 1235 were closed, could be joined together with Gibbler Mountain, to create a 6000 acre non-motorized primitive area 0695 Same0699 View of Route 8 0705 More braiding and soil damage on Route 80707 North end of Cactus Park accessed by the gravel quarry road

## Route: 80

### Segment: 2296

#### Designation ?

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Indirect impact
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

#### Rationale

##### Designation Criteria

- **Minimize Damage:** Fragile soils SSR
- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close

##### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range

#### Previous Alternatives Analyzed

## Route: 803

### Segment: 2179

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density highest in Alt A
- DENSITY Route density medium in Alt E
- VEGETATION Sagebrush patches >60 acres

#### Rationale

##### Designation Criteria

- Minimize Damage:** Fragile soils SSR
- Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, GUSG –PSD in winter habitat

##### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range
- Route was designated to minimize fragmentation of Gunnison sage-grouse habitat.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 803

## Route: 804

### Segment: 2212

#### Designation [?](#)

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density highest in Alt A
- DENSITY Route density medium in Alt E
- VEGETATION Sagebrush patches >60 acres

#### Rationale

##### Designation Criteria

- **Minimize Damage:** Fragile soils SSR, Riparian—ephemeral streams SSR 30 m
- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, GUSG –PSD in winter habitat, Sage-Minimize fragmentation

##### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to minimize travel routes in and crossing riparian and wetland areas.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range
- Route was designated to minimize fragmentation of Gunnison sage-grouse habitat.
- Route was designated to reduce fragmentation of sagebrush patches

## Route: 805

### Segment: 2199

#### Designation [?](#)

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I moderate
- SMAs Gunnison Gravels ACEC
- DENSITY Route density highest in Alt A
- DENSITY Route density medium in Alt E
- VEGETATION Sagebrush patches >60 acres

#### Rationale

##### Designation Criteria

- **Minimize Damage:** Fragile soils SSR
- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, GUSG –PSD in winter habitat, Sage-Minimize fragmentation
- **Wilderness / Natural Area:** ACEC-Gunni Gravels-PSD

##### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range
- Route was designated to minimize fragmentation of Gunnison sage-grouse habitat.
- Route was designated to reduce fragmentation of sagebrush patches
- Route was designated to protect unique and sensitive geological resources in the Gunnison Gravels ACEC

### Previous Alternatives Analyzed

- Alternative A:** Open (All modes of travel)
- Alternative B:** Closed (Not Rehabbed)
- Alternative C:** Closed (Rehab)
- Alternative D:** Closed (Rehab)

### Public Comments On Route: 805

Organization, commenter: Janice Shepherd

Comment ID: 000000106-17

- I have a concern about dropping the Gunnison Gravels ACEC status. The BLM has indicated at an Advisory Council meeting that adequate fencing exists to protect the site. While I don't think that the fencing needs to be extended to the size of area depicted in either Alt A or Alt D, I believe the size of the area protected by current fencing is too small and that it needs to be expanded to include the slope within the gravels area. For example from repeated and ongoing use, erosion is happening on the gravels in the area of NW segment of route 787 (despite efforts to fence off access from the parking lot). A new route is forming on the SE side of the parking lot fence. Unless other less visibly intrusive means of blocking motorized use of routes 787, 795 and 805 can be found, I would support expanding the fenced in area to include all of 787, 795 and 805 and other traversable slopes around the gravels.

### Route: 806

#### Segment: 2176

#### Designation [?](#)

**Current Designation**  
Open (All modes of travel)

#### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

#### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

#### Rationale

##### Designation Criteria

- **No designation criteria for this route segment.**

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

### Previous Alternatives Analyzed

## Route: 808

### Segment: 2174

## Designation

### Current Designation

Closed (Rehab)

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation access to dispersed campsite
- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Indirect impact
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E
- VEGETATION Sagebrush patches >60 acres

## Rationale

### Designation Criteria

- **Minimize Damage:** Cultural – SSR within 100m sites, Fragile soils SSR
- **Minimize Harassment:** Big game winter range – close, GUSG –PSD in winter habitat, PPSV- Minimize fragmentation

### Rationale for Decision

- Route was designated to minimize impacts to cultural resources.
- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to protect big game winter range
- Route was designated to minimize fragmentation of Gunnison sage-grouse habitat.
- Route was designated to reduce fragmentation in Priority Vegetation types

## Public Comments On Route: 813

Organization, commenter: None

Comment ID: PUB\_SC-009

- [ED: Following are the text (in quotes) and the D-E NCA Recreation Planner's interpretation of what the commenter wrote on the maps they submitted during public scoping for the Dominguez RMP. The Rec Planner also identified the route numbers highlighted on the maps]: Routes 741 and 848 "needs ATV connector. Cultural sites can easily be avoided by the 50 foot policy." Routes 26 and 1017 "needs ATV connector." Route 941 "must remain open." Route 1017 "should be ATV route." There should be an "ATV connect" between routes 1198 and 1263. The following text was highlighted in orange "Highlighted routes are routes used often by WSATVA and other ATVs." in addition to all the routes mentioned previously, the following routes were highlighted in orange: 743, 97, 96, 26, 813, 842, 15, 847, 1393, 1192, 1292. [ED: On a second map, the commenter highlighted additional routes]: The following are "routes used often by WSATVA": 1516, 1571, 1605, 1633, 15, 1641, 1221. "SC-5" connecting routes 1605 and 1633 " and "SC-6" connecting routes 1516 and 1605 "need to become new ATV routes connecting these deadends." [ED: A map of the Gibbler Mountain area had additional text and routes]. "Highlighted routes" which "are often used by WSATVA 3 seasons" are as follows: 1235, 1221, 1409, 1310, 1263, 1198, 15. Route 1235 [is or should be] "an ATV route."

## Route: 815

### Segment: 2167

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Indirect impact
- DENSITY Route density highest in Alt A
- DENSITY Route density medium in Alt E

### Rationale

#### Designation Criteria

- **Minimize Damage:** Fragile soils SSR
- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, GUSG –PSD in winter habitat

#### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range
- Route was designated to minimize fragmentation of Gunnison sage-grouse habitat.

### Previous Alternatives Analyzed

**Alternative A:** Vehicles under 50" wide

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 815

- No public comments for this Route

## Route: 816

### Segment: 2166

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I low
- DENSITY Route density highest in Alt A
- DENSITY Route density medium in Alt E
- VEGETATION Sagebrush patches >60 acres

### Rationale

#### Designation Criteria

- **Minimize Damage:** Fragile soils SSR
- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, GUSG –PSD in winter habitat

#### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range
- Route was designated to minimize fragmentation of Gunnison sage-grouse habitat.

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

### Public Comments On Route: 816

- No public comments for this Route

### Route: 817

#### Segment: 2170

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Indirect impact
- DENSITY Route density highest in Alt A
- DENSITY Route density medium in Alt E
- VEGETATION Sagebrush patches >60 acres

### Rationale

#### Designation Criteria

- **Minimize Damage:** Fragile soils SSR, Riparian—ephemeral streams SSR 30 m
- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, GUSG –PSD in winter habitat

#### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to minimize travel routes in and crossing riparian and wetland areas.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range
- Route was designated to minimize fragmentation of Gunnison sage-grouse habitat.

## Route: 818

### Segment: 2155

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density highest in Alt A
- DENSITY Route density medium in Alt E
- VEGETATION Sagebrush patches >60 acres

#### Rationale

##### Designation Criteria

- **Minimize Damage:** Fragile soils SSR, Riparian—ephemeral streams SSR 30 m
- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, GUSG –PSD in winter habitat, Sage-Minimize fragmentation

##### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to minimize travel routes in and crossing riparian and wetland areas.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range
- Route was designated to minimize fragmentation of Gunnison sage-grouse habitat.
- Route was designated to reduce fragmentation of sagebrush patches

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 818

- No public comments for this Route

## Route: 820

### Segment: 2168

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- **Minimize Damage:** Fragile soils SSR
- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close

### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range

## Public Comments On Route: 820

Organization, commenter: Janice Shepherd

Comment ID: 000000106-238

- Route 820 continues to the property line. I support closing this route as I don't think private property owners should have their own private access to BLM land. I have concerns that this user created road is inflicting damage on NCA resources including biological and cultural.

## Route: 822

### Segment: 2153

## Designation

### Current Designation

Closed (Rehab)

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I low
- DENSITY Route density highest in Alt A
- DENSITY Route density medium in Alt E
- VEGETATION Sagebrush patches >60 acres

## Rationale

### Designation Criteria

- **Minimize Damage:** Fragile soils SSR, Riparian—ephemeral streams SSR 30 m
- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, GUSG –PSD in winter habitat

### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to minimize travel routes in and crossing riparian and wetland areas.
- Route was designated to reduce fragmentation in Priority Vegetation types

## Route: 823

### Segment: 2149

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

#### Rationale

##### Designation Criteria

- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, Bighorn – SSR -- summer range

##### Rationale for Decision

- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range
- Route was designated to reduce the miles of motorized and mechanized routes in bighorn sheep habitat.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 823

- No public comments for this Route

## Route: 824

### Segment: 2173

#### Designation

##### Current Designation

Open (All modes of travel)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E
- VEGETATION Sagebrush patches <60 acres

#### Rationale

##### Designation Criteria

- **No designation criteria for this route segment.**

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open (All modes of travel)

**Alternative C:** Open (All modes of travel)

**Alternative D:** Closed (Rehab)

• The following high value recreational routes/roads are legal RS 2477 ROW's in the State of Colorado, Mesa County and the BLM does not have the jurisdiction to close them: 500, 472, 518, 521, 530, 39, 127, 572, 566, 66, 65, 148, 71, 74, 587, 595, 608, 622, 628, 635, 624, 609, 611, 706, 678, 700, 719, 726, 696, 26, 936, 847, 849, 919, 767, 824, 96, 822, 817, 950, 1021, 900, 2682, 1020, 1003, 1084, 1142, 1184, 1156, 1198, 1349, 1308, 1310, 1238, 1263, 1122, 1170, 1192, 974, 941, 1076, 1039, 1018, 1759, 1764, 1758, 1174, 1788, 1798, 1669, 1699, 1773, 1755, 1779, 1750, 1751, 1792, 1720, 1726, 1727, 1720, 1722, 1803, 1805, 1809, 1614, 1609, 1605, 1608, 1571, 1526, 1516, 1448, 755, 807, 900, 10, 48, 924, 950, 1005, 965, 8, 1115, 981, 984, 1135, 2678, 1249, 1171, 1150, 1249, 1320, 1235, 1236, 1228, 1227, 1409, 1456, 1349, 1308, 1513, 1221, 1550, 1567, 1641, 1612, 1740, 1688, 2597, 2598, 2601, 2440, 3160, 3162, 2089, 2166, 2170, 2596, 2171, 2003, 2122, 2126, 2189, 3145, 2182, 2179, 2178, 3143, 2181, 2121, 2122, 2168, 2126, 2180, 2095, 2173, 2174, 2620, 2129, 1686, 1692, 1667, 1647, 1631, 1613, 1596, 1549, 1541, 2647, 1633, 1605, 1608, 1571, 2645, 1507, 1448, 1496, 1516, 1504, 1510, 1508, 1509, 439, 431, 456, 461, 460, 391, 423, 415, 419, 407, 402, 367, 372, 339, 298, 338, 105, 368, 374, 393, 389, 390, 376, 377, 351, 350, 121, 345, 320, 301, 251, 234, 232, 205, 344, 107, 103, 152, 153, 161, 168, 3199, 188, 196, 255, 254, 236, 294, 242, 219, 201, 169, 162, 158, 160, 173. The following high value recreational routes/roads are legal RS 2477ROW's in the State of Colorado, Delta County, and the BLM does not have the jurisdiction to close them: 3011, 2184, 2191, 3100, 2187, 2026, 2059, 2188, 2192, 3104, 2130, 3009, 2199, 2200, 2111, 2223, 2024, 3006, 2231, 3094, 2579, 2210, 2344, 2243, 2249, 2248, 3074, 2354, 2384, 2296, 2295, 2287, 2304, 2062, 2163, 3163, 2164, 2430, 4006, 3016, 2351, 3140, 2410, 4008, 2324, 2073, 2306, 2459, 3192, 3193, 2350, 2443, 2035, 2336, 2495, 2491, 2159, 3058, 2277, 2465, 2467, 3189, 2472, 2297, 2006, 2265, 2271, 2276, 2135, 2139, 3053, 2489, 3033, 3057, 2031, 2276, 2210, 2579, 2136, 2344, 3164, 2400, 2379, 3014, 2365, 3116, 2251, 2259, 2149, 2153, 2146, 2144, 2145, 2356, 2257, 2048, 2358, 3165, and 3166.

## Route: 825

### Segment: 2159

#### Designation ?

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- RIPARIAN Riparian 1 stream crossing
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Direct impact
- DENSITY Route density highest in Alt A
- DENSITY Route density medium in Alt E
- VEGETATION Sagebrush patches >60 acres

#### Rationale

##### Designation Criteria

- **Minimize Damage:** Fragile soils SSR, Riparian—ephemeral streams SSR 30 m
- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, GUSG –PSD in winter habitat, Sage-Minimize fragmentation

##### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to minimize travel routes in and crossing riparian and wetland areas.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range
- Route was designated to minimize fragmentation of Gunnison sage-grouse habitat.
- Route was designated to reduce fragmentation of sagebrush patches

#### Previous Alternatives Analyzed

**Alternative A:** Vehicles under 50" wide

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 825

- No public comments for this Route

## Route: 829

### Segment: 2139

#### Designation ?

## Current Designation

Open (All modes of travel)

## Mitigation Criteria

- No Mitigation Criteria for this Route Segment

## Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E
- VEGETATION Sagebrush patches <60 acres

## Rationale

### Designation Criteria

- **No designation criteria for this route segment.**

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open (All modes of travel)

**Alternative C:** Open (All modes of travel)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 829

- No public comments for this Route

## Route: 830

### Segment: 2183

## Designation

### Current Designation

Vehicles under 50" wide

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general, Rec opportunities - specific
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Public Comments On Route: 830

Organization, commenter: Quiet Trails Group, Sherry Schenk

Comment ID: 000000115-44

• 1292, 1315, 1331, 1340 (Easternmob' flanked to the south by Triangle Mesa and to the north by the Ninemile Hill ERMA): A recommendation for these routes be left open for hike and horse was included in the QTG's scoping comments. In the draft's preferred alternative they are slated for closure. The QTG again states our interest in this being left open for quiet users, but we expand that list to include mountain bikers. We envision this route being extended to continue around the rim, eventually crossing 1192, before continuing along the rim northward as part of a long rim quiet trail within Ninemile Hill. Once reaching the Ninemile Hill ERMA, after crossing route 830, the rim route would change to just horse and foot to be consistent with the objectives of the ERMA. This is consistent with our recommendation of eliminating overlap between the ATV SRMA and the Bighorn Sheep Production, Winter and Summer Areas

Organization, commenter: Quiet Trails Group, Sherry Schenk

Comment ID: 000000115-79

• [Re: Cactus Park SRMA] The QTG believes the shape of the SRMA should be adjusted on the east corner to avoid any overlap with the Bighorn sheep productive area. From page 69 we see that Alt E has no new motorized routes being created in Bighorn Sheep Productive area. The purpose behind the Cactus Park SRMA is to manage the creation of new ATV routes. So overlapping the 2 areas does not make sense. This concern has been shared with the Advisory Council. The proposed action on page 69 to deal with fragmentation and un-fragmentation of Bighorn Sheep summer concentration areas is too complex and will likely not be satisfactory given the habit-forming tendencies of Bighorn Sheep. Instead, Cactus Park SRMA should be reduced to not include the portion that

overlaps the Winter/Summer range of Bighorn Sheep. In addition to simplifying the management, this will also address the concern that motorized recreation should not take priority over other resources in that area, which are not limited to Bighorn Sheep. BLM could consider incorporating this area into the Ninemile Hill ERMA with the caveat that the Alt E motorized routes in the area 847-848-830, 998-1017-1110-1108-993-995-1123-1129-1170-1169-1192-941 would be left as designated in Alt E (some full motorized, some ATV).The QTG is quite concerned about the SRMA status for this landscape. While we hope that a network of quality ATV routes will diminish the number of new user-created routes developing per year, we are very concerned about the prioritization of recreation over the myriad of other resources which are present in a high-density within this sensitive landscape. We think that Congress - in the Omnibus Act that created the NCA - had envisioned a balanced approach to "long-term conservation and protection of unique and important values" where recreation was supposed to have the same priority as other values. We would like to see more explicit protections of resources.

Organization, commenter: James Riddell

Comment ID: 00000123-4

- **Gunnison Slopes Recommendation:** Gunnison Slopes should be classified as Lands Managed for Wilderness Characteristics, and close the road to Dad's Flat (the extension of 1192?) except for administrative use. **Rationale:** My strongest objection to the preferred alternative is in Lands Managed for Wilderness Characteristics, Map 2-11E. The Gunnison Slopes section, between the Tabeguache Trail and the Gunnison River, from the Dominguez Wilderness almost to Whitewater, was selected as Lands Managed for Wilderness Characteristics in Alternative B. It really should have that designation in the final RMP as well. In the lead-up to the original creation of the NCA, I advocated vigorously that this section be added to what would become the Dominguez Wilderness. I have explored this area several times on foot and floating the river, and there is no question of its wilderness characteristics. It is a gem!! Because of the cliff band along the top of the area, there is no vehicular access into the area below the cliffs for something like 9 miles. There are even very few places for access by foot, and those few are well hidden, and scarcely ever used. The preferred alternative calls for closure of the road from near Cactus Park to Dad's Flat, except for administrative use, which I heartily endorse. With the closure of that road, public vehicular access will be prohibited for nearly twenty miles along the river, and the wilderness value of the Gunnison Slopes will increase dramatically. Below that cliff is one of the wildest places I have experienced anywhere in the entire region. Aside from the railroad line along the river, there is almost no sign of human activity for miles. Walk around and on the ground there is some evidence of livestock grazing and occasional evidence for the keen-eyed of ancient tool-making, but almost sign of no human activity in modern times. The views are spectacular and plentiful, with almost no permanent sign of human presence. The quiet and isolation, whether experienced on foot or by river float, are profound. The difficulty of access at the cliff band (actually not that difficult if one finds the right location and makes the effort), rewards the user with solitude, naturalness, primitive unconfined recreation (since the vegetative and geologic factors allow foot travel almost anywhere), and a truly unique experience. **Recommendation 2:** the area above the cliff band be managed to preserve the solitude, isolation and naturalness of the area below the cliff band. That would mean no motorized vehicular traffic anywhere within 100 feet of the cliffs, and in most places, no motorized vehicles between the Tabeguache Trail and the cliffs. The only vehicular access would be at currently well-established and designated access points, which should end with clearly marked signage well back from the rim (see Travel Management below). Visitors would appreciate the views all the more if they have to walk a few feet to see them

### Public Comments On Route: 838

Organization, commenter: None

Comment ID: PUB\_SC-014

- 1. We have identified known potential issues and criteria to guide the planning process based on lands and resources in the planning area. Please provide comments on these issues and criteria, and/or identify other issues or criteria that you think should be considered (If your comment pertains to a specific issue or criteria, please use the reference code, e.g. "PCI") 2. What areas within the Dominguez-Escalante National Conservation Area or Dominguez Canyon Wilderness do you value? Why? Area 1 Great views birdwatching, wildlife potoghrping & some hicking Area 2 Viewing from bluffs from above Area 3 I use this area a good many times a year Area 4 I can't get to this area to use. Area 5 I use any road or ATV trail thats OPEN 3. Please provide any additional comments that you have regarding this project. Comments on attach sheet. Maps with GPS routes in red. Things that I want to comment on concerning Dominguez-Escalante NCA. 1. Cactus Park area is used by the motorized community, Mountain bikers, Hikers, and Etc. There are a lot of roads, jeep & ATV trails that need to be open for everyone to use. The area has been used for cattle grazing, Christmas tree cutting, fire wood, and many other uses. As the population grows in this area there needs to be public land open for their use. 2. As the motorized roads, double track and single track trails are closed; much less area is left for folks to use. Any Wilderness and Wilderness Study Area restricts firefighting, timber cutting (to help control pine and pinion beeHe and controlling ground cover which will stop the massive fuel for fires) and weed control. Colorado is having large fires now because of these large amounts of fuel. 3. The attached maps have GPS routes shown in red that I have GPS'ed at different times. Please note that I have used these routes at different times. All these routes are jeep accessible; many are used by 2 wheel drive pickups. I almost never see hikers when I'm out using these routes on my ATV or Pickup. [ED: The D-E NCA's Recreation Planner identified the route numbers for routes highlighted on the map mentioned in this comment: 621, 624, 676, 649, 641, 743, 676, 741, 97, 96, 744, 733, 15, 838, 18, 945, 26, 847, 848, 941, 1192, 1292, 1377]

## Public Comments On Route: 842

Organization, commenter: None

Comment ID: PUB\_SC-009

- [ED: Following are the text (in quotes) and the D-E NCA Recreation Planner's interpretation of what the commenter wrote on the maps they submitted during public scoping for the Dominguez RMP. The Rec Planner also identified the route numbers highlighted on the maps]: Routes 741 and 848 "needs ATV connector. Cultural sites can easily be avoided by the 50 foot policy." Routes 26 and 1017 "needs ATV connector." Route 941 "must remain open." Route 1017 "should be ATV route." There should be an "ATV connect" between routes 1198 and 1263. The following text was highlighted in orange "Highlighted routes are routes used often by WSATVA and other ATVs." in addition to all the routes mentioned previously, the following routes were highlighted in orange: 743, 97, 96, 26, 813, 842, 15, 847, 1393, 1192, 1292. [ED: On a second map, the commenter highlighted additional routes]: The following are "routes used often by WSATVA": 1516, 1571, 1605, 1633, 15, 1641, 1221. "SC-5" connecting routes 1605 and 1633 " and "SC-6" connecting routes 1516 and 1605 "need to become new ATV routes connecting these deadends." [ED: A map of the Gibbler Mountain area had additional text and routes]. "Highlighted routes" which "are often used by WSATVA 3 seasons" are as follows: 1235, 1221, 1409, 1310, 1263, 1198, 15. Route 1235 [is or should be] "an ATV route."

## Route: 845

### Segment: 2152

## Designation

### Current Designation

Admin/Permitted Use Only

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Indirect impact
- DENSITY Route density highest in Alt A
- DENSITY Route density medium in Alt E
- VEGETATION Sagebrush patches >60 acres

## Rationale

### Designation Criteria

- **Minimize Damage:** Fragile soils SSR
- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, GUSG –PSD in winter habitat

### Rationale for Decision

- Route was designated to ensure access to rights-of-way, private property, and livestock grazing facilities.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Admin/Permitted Use Only

**Alternative C:** Admin/Permitted Use Only

**Alternative D:** Admin/Permitted Use Only

## Public Comments On Route: 845

- No public comments for this Route

## Route: 847

### Segment: 2158

## Designation

### Current Designation

Vehicles under 50" wide

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation access to dispersed campsite
- RECREATION Recreation opportunities for access to and across federal lands
- SOIL Soils Fragile
- WILDLIFE Mule deer severe winter range
- RIPARIAN Riparian 2 stream crossings
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I moderate
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

## Rationale

### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general, Rec opportunities - specific
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open, seek re-route or mitigation

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed, seek re-route or mitigation

• [Re: Cactus Park SRMA] The QTG believes the shape of the SRMA should be adjusted on the east corner to avoid any overlap with the Bighorn sheep productive area. From page 69 we see that Alt E has no new motorized routes being created in Bighorn Sheep Productive area. The purpose behind the Cactus Park SRMA is to manage the creation of new ATV routes. So overlapping the 2 areas does not make sense. This concern has been shared with the Advisory Council. The proposed action on page 69 to deal with fragmentation and un-fragmentation of Bighorn Sheep summer concentration areas is too complex and will likely not be satisfactory given the habit-forming tendencies of Bighorn Sheep. Instead, Cactus Park SRMA should be reduced to not include the portion that overlaps the Winter/Summer range of Bighorn Sheep. In addition to simplifying the management, this will also address the concern that motorized recreation should not take priority over other resources in that area, which are not limited to Bighorn Sheep. BLM could consider incorporating this area into the Ninemile Hill ERMA with the caveat that the Alt E motorized routes in the area 847-848-830, 998-1017-1110-1108-993-995-1123-1129-1170-1169-1192-941 would be left as designated in Alt E (some full motorized, some ATV). The QTG is quite concerned about the SRMA status for this landscape. While we hope that a network of quality ATV routes will diminish the number of new user-created routes developing per year, we are very concerned about the prioritization of recreation over the myriad of other resources which are present in a high-density within this sensitive landscape. We think that Congress - in the Omnibus Act that created the NCA - had envisioned a balanced approach to "long-term conservation and protection of unique and important values" where recreation was supposed to have the same priority as other values. We would like to see more explicit protections of resources.

• Gunnison Slopes Recommendation: Gunnison Slopes should be classified as Lands Managed for Wilderness Characteristics, and close the road to Dad's Flat (the extension of 1192?) except for administrative use. Rationale: My strongest objection to the preferred alternative is in Lands Managed for Wilderness Characteristics, Map 2-11E. The Gunnison Slopes section, between the Tabeguache Trail and the Gunnison River, from the Dominguez Wilderness almost to Whitewater, was selected as Lands Managed for Wilderness Characteristics in Alternative B. It really should have that designation in the final RMP as well. In the lead-up to the original creation of the NCA, I advocated vigorously that this section be added to what would become the Dominguez Wilderness. I have explored this area several times on foot and floating the river, and there is no question of its wilderness characteristics. It is a gem!! Because of the cliff band along the top of the area, there is no vehicular access into the area below the cliffs for something like 9 miles. There are even very few places for access by foot, and those few are well hidden, and scarcely ever used. The preferred alternative calls for closure of the road from near Cactus Park to Dad's Flat, except for administrative use, which I heartily endorse. With the closure of that road, public vehicular access will be prohibited for nearly twenty miles along the river, and the wilderness value of the Gunnison Slopes will increase dramatically. Below that cliff is one of the wildest places I have experienced anywhere in the entire region. Aside from the railroad line along the river, there is almost no sign of human activity for miles. Walk around and on the ground there is some evidence of livestock grazing and occasional evidence for the keen-eyed of ancient tool-making, but almost sign of no human activity in modern times. The views are spectacular and plentiful, with almost no permanent sign of human presence. The quiet and isolation, whether experienced on foot or by river float, are profound. The difficulty of access at the cliff band (actually not that difficult if one finds the right location and makes the effort), rewards the user with solitude, naturalness, primitive unconfined recreation (since the vegetative and geologic factors allow foot travel almost anywhere), and a truly unique experience. Recommendation 2: the area above the cliff band be managed to preserve the solitude, isolation and naturalness of the area below the cliff band. That would mean no motorized vehicular traffic anywhere within 100 feet of the cliffs, and in most places, no motorized vehicles between the Tabeguache Trail and the cliffs. The only vehicular access would be at currently well-established and designated access points, which should end with clearly marked signage well back from the rim (see Travel Management below). Visitors would appreciate the views all the more if they have to walk a few feet to see them

• 1. We have identified known potential issues and criteria to guide the planning process based on lands and resources in the planning area. Please provide comments on these issues and criteria, and/or identify other issues or criteria that you think should be considered (if your comment pertains to a specific issue or criteria, please use the reference code, e.g. "PCI") 2. What areas within the Dominguez-Escalante National Conservation Area or Dominguez Canyon Wilderness do you value? Why? Area 1 Great views birdwatching, wildlife potogrpghing & some hicking Area 2 Viewing from bluffs from above Area 3 I use this area a good many times a year Area 4 I can't get to this area to use. Area 5 I use any road or ATV trail that's OPEN 3. Please provide any additional comments that you have regarding this project. Comments on attach sheet. Maps with GPS routes in red. Things that I want to comment on concerning Dominguez-Escalante NCA. 1. Cactus Park area is used by the motorized community, Mountain bikers, Hikers, and Etc. There are a lot of roads, jeep & ATV trails that need to be open for everyone to use. The area has been used for cattle grazing, Christmas tree cutting, fire wood, and many other uses. As the population grows in this area there needs to be public land open for their use. 2. As the motorized roads, double track and single track trails are closed; much less area is left for folks to use. Any Wilderness and Wilderness Study Area restricts firefighting, timber cutting (to help control pine and pinion beeHe and controlling ground cover which will stop the massive fuel for fires) and weed control. Colorado is having large fires now because of these large amounts of fuel. 3. The attached maps have GPS routes shown in red that I have GPS'ed at different times. Please note that I have used these routes at different times. All these routes are jeep accessible; many are used by 2 wheel drive pickups. I almost never see hikers when I'm out using these routes on my ATV or Pickup. [ED: The D-E NCA's Recreation Planner identified the route numbers for routes highlighted on the map mentioned in this comment: 621, 624, 676, 649, 641, 743, 676, 741, 97, 96, 744, 733, 15, 838, 18, 945, 26, 847, 848, 941, 1192, 1292, 1377]

• [ED: Following are the text (in quotes) and the D-E NCA Recreation Planner's interpretation of what the commenter wrote on the maps they submitted during public scoping for the Dominguez RMP. The Rec Planner also identified the route numbers highlighted on the maps]: Routes 741 and 848 "needs ATV connector. Cultural sites can easily be avoided by the 50 foot policy." Routes 26 and 1017 "needs ATV connector." Route 941 "must remain open." Route 1017 "should be ATV route." There should be an "ATV connect" between routes 1198 and 1263. The following text was highlighted in orange "Highlighted routes are routes used often by WSATVA and other ATVs." in addition to all the routes mentioned previously, the following routes were highlighted in orange: 743, 97, 96, 26, 813, 842, 15, 847, 1393, 1192, 1292. [ED: On a second map, the commenter highlighted additional routes]: The following are "routes used often by WSATVA": 1516, 1571, 1605, 1633, 15, 1641, 1221. "SC-5" connecting routes 1605 and 1633 "and "SC-6" connecting routes 1516 and 1605 "need to become new ATV routes connecting these deadends." [ED: A map of the Gibbler Mountain area had additional text and routes]. "Highlighted routes" which "are often used by WSATVA 3 seasons" are as follows: 1235, 1221, 1409, 1310, 1263, 1198, 15. Route 1235 [is or should be] "an ATV route."

## Route: 848

### Segment: 2134

#### Designation

**Current Designation**  
Vehicles under 50" wide

#### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

#### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- RIPARIAN Riparian 1 stream crossing

- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I low
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general, Rec opportunities - specific
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open, seek re-route or mitigation

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed, seek re-route or mitigation

• [Re: Cactus Park SRMA] The QTG believes the shape of the SRMA should be adjusted on the east corner to avoid any overlap with the Bighorn sheep productive area. From page 69 we see that Alt E has no new motorized routes being created in Bighorn Sheep Productive area. The purpose behind the Cactus Park SRMA is to manage the creation of new ATV routes. So overlapping the 2 areas does not make sense. This concern has been shared with the Advisory Council. The proposed action on page 69 to deal with fragmentation and un-fragmentation of Bighorn Sheep summer concentration areas is too complex and will likely not be satisfactory given the habit-forming tendencies of Bighorn Sheep. Instead, Cactus Park SRMA should be reduced to not include the portion that overlaps the Winter/Summer range of Bighorn Sheep. In addition to simplifying the management, this will also address the concern that motorized recreation should not take priority over other resources in that area, which are not limited to Bighorn Sheep. BLM could consider incorporating this area into the Ninemile Hill ERMA with the caveat that the Alt E motorized routes in the area 847-848-830, 998-1017-1110-1108-993-995-1123-1129-1170-1169-1192-941 would be left as designated in Alt E (some full motorized, some ATV). The QTG is quite concerned about the SRMA status for this landscape. While we hope that a network of quality ATV routes will diminish the number of new user-created routes developing per year, we are very concerned about the prioritization of recreation over the myriad of other resources which are present in a high-density within this sensitive landscape. We think that Congress - in the Omnibus Act that created the NCA - had envisioned a balanced approach to "long-term conservation and protection of unique and important values" where recreation was supposed to have the same priority as other values. We would like to see more explicit protections of resources.

• Gunnison Slopes Recommendation: Gunnison Slopes should be classified as Lands Managed for Wilderness Characteristics, and close the road to Dad's Flat (the extension of 1192?) except for administrative use. Rationale: My strongest objection to the preferred alternative is in Lands Managed for Wilderness Characteristics, Map 2-11E. The Gunnison Slopes section, between the Tabeguache Trail and the Gunnison River, from the Dominguez Wilderness almost to Whitewater, was selected as Lands Managed for Wilderness Characteristics in Alternative B. It really should have that designation in the final RMP as well. In the lead-up to the original creation of the NCA, I advocated vigorously that this section be added to what would become the Dominguez Wilderness. I have explored this area several times on foot and floating the river, and there is no question of its wilderness characteristics. It is a gem!! Because of the cliff band along the top of the area, there is no vehicular access into the area below the cliffs for something like 9 miles. There are even very few places for access by foot, and those few are well hidden, and scarcely ever used. The preferred alternative calls for closure of the road from near Cactus Park to Dad's Flat, except for administrative use, which I heartily endorse. With the closure of that road, public vehicular access will be prohibited for nearly twenty miles along the river, and the wilderness value of the Gunnison Slopes will increase dramatically. Below that cliff is one of the wildest places I have experienced anywhere in the entire region. Aside from the railroad line along the river, there is almost no sign of human activity for miles. Walk around and on the ground there is some evidence of livestock grazing and occasional evidence for the keen-eyed of ancient tool-making, but almost sign of no human activity in modern times. The views are spectacular and plentiful, with almost no permanent sign of human presence. The quiet and isolation, whether experienced on foot or by river float, are profound. The difficulty of access at the cliff band (actually not that difficult if one finds the right location and makes the effort), rewards the user with solitude, naturalness, primitive unconfined recreation (since the vegetative and geologic factors allow foot travel almost anywhere), and a truly unique experience. Recommendation 2: the area above the cliff band be managed to preserve the solitude, isolation and naturalness of the area below the cliff band. That would mean no motorized vehicular traffic anywhere within 100 feet of the cliffs, and in most places, no motorized vehicles between the Tabeguache Trail and the cliffs. The only vehicular access would be at currently well-established and designated access points, which should end with clearly marked signage well back from the rim (see Travel Management below). Visitors would appreciate the views all the more if they have to walk a few feet to see them

Organization, commenter: James Riddell

Comment ID: 00000123-5

• Travel Management Recommendation 1: no motorized vehicles within 100 feet of the rim above the Gunnison Slopes, and access to motorized vehicles to approach the cliffs should only be on two currently well-established roads that end well back from the rim, specifically routes 848 and 1192 in the preferred Alternative E. Rationale: preserve the naturalness, solitude and isolation of the area below the cliffs.

• 1. We have identified known potential issues and criteria to guide the planning process based on lands and resources in the planning area. Please provide comments on these issues and criteria, and/or identify other issues or criteria that you think should be considered (If your comment pertains to a specific is sure or criteria, please use the reference code, e.g. "PC1") 2. What areas within the Dominguez-Escalante National Conservation Area or Dominguez Canyon Wilderness do you value? Why? Area 1 Great views birdwatching, wildlife potpoghrphing & some hicking Area 2 Viewing from bluffs from above Area 3 I use this area a good many times a year Area 4 I can't get to this area to use. Area 5 I use any road or ATV trail that's OPEN 3. Please provide any additional comments that you have regarding this project. Comments on attach sheet. Maps with GPS routes in red. Things that I want to comment on concerning Dominguez-Escalante NCA. 1. Cactus Park area is used by the motorized community, Mountain bikers, Hikers, and Etc. There are a lot of roads, jeep & ATV trails that need to be open for everyone to use. The area has been used for cattle grazing, Christmas tree cutting, fire wood, and many other uses. As the population grows in this area there needs to be public land open for their use. 2. As the motorized roads, double track and single track trails are closed; much less area is left for folks to use. Any Wilderness and Wilderness Study Area restricts firefighting, timber cutting (to help control pine and piñon bee) and controlling ground cover which will stop the massive fuel for fires) and weed control. Colorado is having large fires now because of these large amounts of fuel. 3. The attached maps have GPS routes shown in red that I have GPS'ed at different times. Please note that I have used these routes at different times. All these routes are jeep accessible; many are used by 2 wheel drive pickups. I almost never see hikers when I'm out using these routes on my ATV or Pickup. [ED: The D-E NCA's Recreation Planner identified the route numbers for routes highlighted on the map mentioned in this comment: 621, 624, 676, 649, 641, 743, 676, 741, 97, 96, 744, 733, 15, 838, 18, 945, 26, 847, 848, 941, 1192, 1292, 1377]

Organization, commenter: None

Comment ID: PUB\_SC-009

• [ED: Following are the text (in quotes) and the D-E NCA Recreation Planner's interpretation of what the commenter wrote on the maps they submitted during public scoping for the Dominguez RMP. The Rec Planner also identified the route numbers highlighted on the maps]: Routes 741 and 848 "needs ATV connector. Cultural sites can easily be avoided by the 50 foot policy." Routes 26 and 1017 "needs ATV connector." Route 941 "must remain open." Route 1017 "should be ATV route." There should be an "ATV connect" between routes 1198 and 1263. The following text was highlighted in orange "Highlighted routes are routes used often by WSATVA and other ATVs." in addition to all the routes mentioned previously, the following routes were highlighted in orange: 743, 97, 96, 26, 813, 842, 15, 847, 1393, 1192, 1292. [ED: On a second map, the commenter highlighted additional routes]: The following are "routes used often by WSATVA": 1516, 1571, 1605, 1633, 15, 1641, 1221. "SC-5" connecting routes 1605 and 1633 " and "SC-6" connecting routes 1516 and 1605 "need to become new ATV routes connecting these deadends." [ED: A map of the Gibbler Mountain area had additional text and routes]. "Highlighted routes" which "are often used by WSATVA 3 seasons" are as follows: 1235, 1221, 1409, 1310, 1263, 1198, 15. Route 1235 [is or should be] "an ATV route."

## Route: 849

### Segment: 2122

#### Designation

##### Current Designation

Vehicles under 50" wide

#### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

#### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Indirect impact
- DENSITY Route density highest in Alt A
- DENSITY Route density low in Alt E

### Rationale

#### Designation Criteria

- Recreation:** RMA objectives, Rec opportunities – general
- Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

#### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Route: 85

### Segment: 2285

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation access to dispersed campsite
- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

### Rationale

#### Designation Criteria

- Minimize Damage:** Fragile soils SSR
- Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, Bighorn – SSR – summer range

#### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to reduce fragmentation in Priority Vegetation types

- Route was designated to protect big game winter range
- Route was designated to reduce the miles of motorized and mechanized routes in bighorn sheep habitat.

#### Rationale

##### Designation Criteria

- Recreation:** RMA objectives, Rec opportunities – general
- Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

- Alternative A:** Open (All modes of travel)
- Alternative B:** Closed (Not Rehabbed)
- Alternative C:** Closed (Rehab)
- Alternative D:** Closed (Rehab)

## Public Comments On Route: 859

- No public comments for this Route

## Route: 86

### Segment: 2279

#### Designation [?](#)

**Current Designation**  
Closed (Rehab)

#### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

#### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density highest in Alt A
- DENSITY Route density medium in Alt E

#### Rationale

##### Designation Criteria

- Minimize Damage:** Fragile soils SSR
- Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, Bighorn – SSR -- summer range

##### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range
- Route was designated to reduce the miles of motorized and mechanized routes in bighorn sheep habitat.

## Previous Alternatives Analyzed

- Alternative A:** Vehicles under 50' wide

## Public Comments On Route: 887

Organization, commenter: Janice Shepherd

Comment ID: 000000106-110

- o The Gibbler Mountain ACEC as shown on map 2-5E does not encompass the mountain itself but only its northern slopes. I would prefer to see a non-motorized/non-mechanized ACEC for the whole of Gibbler Mountain and its surrounding slopes, bounded by the routes: 1235-1236-1228-1409-1221-15-8-887-18-17-945-547-951-959-966-969-1005-1006-1021-1022-1023-1024-1047-1150-1249, with 1269 left open to motorized use as a motorized cherry-stemmed route into the area. This would keep this wonderful roadless area (though too small a space for the inventory) roadless into the future. The text on page 871 indicates the area has one of the "best known" populations of the rare plant Grand Junction milkvetch as well as a large collection of fragile dinosaur tracks. The Special Species map from the Open House needs to be updated with this GJ milkvetch population. This ACEC representing a hole in the SRMA would properly protect all three features: roadless-ness, dinosaur tracks, and GJ milkvetch, at the cost of less than 5000 acres. This protection is consistent with this being a National Conservation Area and not a National Recreation Area. This position also has support from the D-E NCA Advisory Council. I recently hiked up to the top of the northern portion of Gibbler Mountain with a friend. We were inspired by the challenging terrain for hiking and the awesome views (photo IMG\_9998). We both had a great feeling of accomplishment when we reached the top. There is plenty of evidence of big game animals using the Gibbler Mountain as a quiet sanctuary from the surrounding motorized areas. This proposed ACEC would benefit them.

Organization, commenter: Quiet Trails Group, Sherry Schenk

Comment ID: 000000115-32

- o Gibbler Mountain Area of Critical Environmental Concern: The QTG supports Gibbler Mtn ACEC from Alt D because protections are needed for the myriad of resources found here, especially if it is going to be located within an SRMA focused on motorized use. Further, we think the ACEC should be extended to include all of Gibbler Mountain. Surface-disturbance limitations and a rule of no motorized use should be included for the full ACEC, including this recommended expansion. With this expansion the full ACEC would be bounded by: Routes: 1235-1236-1228-1409-1221-15-8-887-18-17-945-947-951-954-959-962-966-969-1005-1006-1021-1022-1023-1024-1047-1150-1249-8, with 1269, and 1173-1174-1198-1200-1193 cherry-stemmed into the area. The reasons we support this designation are as follows: Roadless areas are an endangered resource in the high-desert west. Categorically, roadless areas especially within NCAs- should be protected as such. By making it a larger area not only does it protect this roadless area but also it better disguises the location of the dinosaur tracks and fossils which we see from page 872." are regionally significant and easily damaged". Per page 871, "This site also supports one of the best known occurrences (A-ranked) of Grand Junction milkvetch (Astragalus linifolius), a globally vulnerable plant (G3/S3) and a BLM sensitive plant species."o Map 3-13 needs to be updated to show the presence of Grand Junction milkvetch and Colorado Hookless cactus as the text on page 871 indicates both are present in this area. A recent

hike in this area shows prolific big game use in the area, we assume it is their refuge from surrounding motorized use. Recent hikes have confirmed the presence of Ponderosa Pine atop Gibbler Mtn. This designation would aid in increasing the number of healthy Ponderosa Pines within the NCA, an action which would be in accordance with the Alternative E management objective on page 52. o Map 3-3 needs to be updated to reference the presence of Ponderosa Pine in this area. The designation of this expanded ACEC in the final plan, would address the need for non-motorized trails in this portion of the NCA, an opportunity currently missing from the draft plan. And to reiterate, these protections are needed for the myriad of resources found here, especially because they are to be located within an SRMA focused on motorized use

## Public Comments On Route: 889

- No public comments for this Route

## Route: 89

### Segment: 2281

#### Designation [?](#)

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density highest in Alt A
- DENSITY Route density high in Alt E

#### Rationale

##### Designation Criteria

- **Minimize Harassment:** PPSV- Minimize fragmentation, Bighorn – SSR -- summer range, Big game winter range – close

##### Rationale for Decision

- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to reduce the miles of motorized and mechanized routes in bighorn sheep habitat.
- Route was designated to protect big game winter range

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 89

- No public comments for this Route

## Route: 890

### Segment: 2143

#### Designation [?](#)

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- Needs Data - Cultural

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- WILDLIFE Mule deer severe winter range
- RIPARIAN Riparian 4 stream crossings
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Indirect impact
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E
- VEGETATION Sagebrush patches >60 acres

#### Rationale

##### Designation Criteria

- **Minimize Damage:** Riparian—ephemeral streams SSR 30 m, Fragile soils SSR
- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, GUSG –PSD in winter habitat

##### Rationale for Decision

- Route was designated to minimize travel routes in and crossing riparian and wetland areas.
- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range
- Route was designated to minimize fragmentation of Gunnison sage-grouse habitat.

#### Previous Alternatives Analyzed

**Alternative A:** Vehicles under 50" wide

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Route: 901

### Segment: 2067

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density highest in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close
- **Recreation:** RMA objectives

##### Rationale for Decision

- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 905

- No public comments for this Route

## Route: 906

### Segment: 2053

#### Designation

##### Current Designation

Open (All modes of travel)

##### Mitigation Criteria

- Needs Data - Cultural

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands

- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Direct impact
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- Recreation:** Rec opportunities - specific, RMA objectives

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open, seek re-route or mitigation

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed, seek re-route or mitigation

## Public Comments On Route: 906

- No public comments for this Route

## Route: 907

### Segment: 2081

#### Designation

##### Current Designation

Vehicles under 50" wide

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density highest in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- Recreation:** RMA objectives, Rec opportunities – general
- Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Route: 921

### Segment: 2041

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

#### Rationale

##### Designation Criteria

- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, Bighorn – SSR -- summer range

##### Rationale for Decision

- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range
- Route was designated to reduce the miles of motorized and mechanized routes in bighorn sheep habitat.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 921

- No public comments for this Route

## Route: 923

## Segment: 2092

### Designation

#### Current Designation

Closed (Rehab)

#### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

#### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Indirect impact
- DENSITY Route density highest in Alt A
- DENSITY Route density low in Alt E

### Rationale

#### Designation Criteria

- Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close
- Recreation:** RMA objectives

#### Rationale for Decision

- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range

## Route: 925

### Segment: 2039

#### Designation ?

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density highest in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Minimize Harassment:** Big game winter range – close, PPSV- Minimize fragmentation
- **Recreation:** RMA objectives

##### Rationale for Decision

- Route was designated to protect big game winter range
- Route was designated to reduce fragmentation in Priority Vegetation types

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

## Public Comments On Route: 93

Organization, commenter: Janice Shepherd

Comment ID: 00000106-212

- 208-195-186-182-243-257-262-253-240-221-198 I support the Quiet Trail Group's position of designating this loop for quiet trail users. The top segments 208-195-186-176 should be Mtn Bike, to connect with the Alt E proposed designation for 182-243. Note that 243 should not be designated Motorcycle as it is in Alt E as it is a short segment connecting two Mtn Bike routes. The rest of the loop should be Horse/foot as shown in Alt E. This approximately 4 mile loop makes a great short enjoyable hike. I've even done it with a group of friends on a July morning. The city high that day was 93. We finished the hike in the morning when the temperatures were still moderate. Afterwards we enjoyed lunch together at a restaurant on Orchard Mesa (local economic benefit). It is important to me to have easy access to such short quiet use loops within the NCA that are close to the city so that my friends and I can get some exercise together while enjoying each other's company even in summer months. On the height of land crossed by 240, there is a wonderful view back down the valley. The track blends in and the valley looks pristine and untouched by humans. It gives me a small sense of what it must have been like to be the first explorer here. I'd love to find other trails like this. Near 176, there is a pretty little dry fall. And the rock in the area is a conglomerate which is such an interesting contrast to vast amounts of sandstone. On foot it is fun to find such interesting anomalies. That is what is so great about hiking on 186-176-182, you have time to see the contrast and recognize the uniqueness of the area. There's time for my friends and me to admire the power of natural forces. We like this hike because of the sense of discovery of small and large details about the geology of the area.

## Public Comments On Route: 933

Organization, commenter: Western Slope ATV Association, Steve Chapel

Comment ID: 00000089-13

- The route with numbers 933, to 1105, to 1110, to 1017, to 998 had been an important route for ATV use. At the end of it a connection can be made without equipment to extend it over to route 52 and create a great loop. We know this because we have made the short walk between the two routes. This had been explained to BLM. The map shows it with a dotted line which indicates closed until mitigated. This is not acceptable nor necessary. It is also confusing because there is a bicycle emblem on the route.

## Route: 937

### Segment: 1992

#### Designation ?

##### Current Designation

Open (All modes of travel)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density medium in Alt A
- DENSITY Route density medium in Alt E

### Rationale

#### Designation Criteria

- No designation criteria for this route segment.

#### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open (All modes of travel)

**Alternative C:** Closed (Rehab)

**Alternative D:** Open (All modes of travel)

## Public Comments On Route: 937

- No public comments for this Route

## Route: 938

### Segment: 1990

#### Designation ?

##### Current Designation

Open (All modes of travel)

#### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

#### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density medium in Alt A
- DENSITY Route density medium in Alt E

### Rationale

#### Designation Criteria

- **No designation criteria for this route segment.**

#### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open (All modes of travel)

**Alternative C:** Closed (Rehab)

**Alternative D:** Open (All modes of travel)

### Public Comments On Route: 938

- No public comments for this Route

### Route: 939

#### Segment: 2010

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- SMAs Gibbler Mountain ACEC
- DENSITY Route density highest in Alt A
- DENSITY Route density low in Alt E

### Rationale

#### Designation Criteria

- **Minimize Harassment:** Big game winter range – close, PPSV- Minimize fragmentation
- **Recreation:** RMA objectives

#### Rationale for Decision

- Route was designated to protect big game winter range
- Route was designated to reduce fragmentation in Priority Vegetation types

### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

### Public Comments On Route: 939

- No public comments for this Route

### Route: 940

#### Segment: 1987

#### Designation

##### Current Designation

Open (All modes of travel)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation access to dispersed campsite
- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density medium in Alt A
- DENSITY Route density medium in Alt E

### Rationale

#### Designation Criteria

- No designation criteria for this route segment.

#### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open (All modes of travel)

**Alternative C:** Closed (Rehab)

**Alternative D:** Open (All modes of travel)

### Public Comments On Route: 940

- No public comments for this Route

### Route: 941

#### Segment: 1721

#### Designation

##### Current Designation

Vehicles under 50" wide

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- SOIL Soils Steep Slopes 40%
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E
- VEGETATION Sagebrush patches >60 acres

### Rationale

#### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

#### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Admin/Permitted Use Only

**Alternative C:** Admin/Permitted Use Only

**Alternative D:** Admin/Permitted Use Only

#### Segment: 1725

#### Designation

##### Current Designation

Vehicles under 50" wide

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- SOIL Soils Steep Slopes 40%

- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E
- VEGETATION Sagebrush patches >60 acres

## Rationale

### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

• I would like to see trail #'s 941 & #974 remain open to atv use. This is a great ride down to the rivers' edge, on a slightly challenging trail.

Organization, commenter: Janice Shepherd

Comment ID: 00000106-247

• For the Gunnison Slopes it is not sufficient to rely on topology to protect the area from user-created road intrusions. You can see that from the existence of routes 1039, 1018 and 1019. At the very least to protect Gunnison Slopes a locked gate and fencing should be added at the intersection of routes 941 and 1192. The protection of the bighorn sheep production area is paramount to the long-term health and well-being of the bighorn sheep herds.

Comment ID: 00000106-7

• I believe The Cactus Park ATV SRMA should not include Gibbler Mountain nor the roadless area surrounding Gibbler Mountain (see more comments later about Gibbler Mtn). Also I believe The Cactus Park ATV RMA should not include the roadless area bounded by 941 and 1192. While recreation was part of the Omnibus act that created the NCA, it should be included in a balanced way. Protecting roadless spaces in an area viewable by people enjoying ATVing seems to me like a great balance. "Look at that great view!" should be included in their enjoyment of the NCA.

Comment ID: 00000115-79

• [Re: Cactus Park SRMA] The QTG believes the shape of the SRMA should be adjusted on the east corner to avoid any overlap with the Bighorn sheep productive area. From page 69 we see that Alt E has no new motorized routes being created in Bighorn Sheep Productive area. The purpose behind the Cactus Park SRMA is to manage the creation of new ATV routes. So overlapping the 2 areas does not make sense. This concern has been shared with the Advisory Council. The proposed action on page 69 to deal with fragmentation and un-fragmentation of Bighorn Sheep summer concentration areas is too complex and will likely not be satisfactory given the habit-forming tendencies of Bighorn Sheep. Instead, Cactus Park SRMA should be reduced to not include the portion that overlaps the Winter/Summer range of Bighorn Sheep. In addition to simplifying the management, this will also address the concern that motorized recreation should not take priority over other resources in that area, which are not limited to Bighorn Sheep. BLM could consider incorporating this area into the Ninemile Hill ERMA with the caveat that the Alt E motorized routes in the area 847-848-830, 998-1017-1110-1108-993-995-1123-1129-1170-1169-1192-941 would be left as designated in Alt E (some full motorized, some ATV). The QTG is quite concerned about the SRMA status for this landscape. While we hope that a network of quality ATV routes will diminish the number of new user-created routes developing per year, we are very concerned about the prioritization of recreation over the myriad of other resources which are present in a high-density within this sensitive landscape. We think that Congress - in the Omnibus Act that created the NCA - had envisioned a balanced approach to "long-term conservation and protection of unique and important values" where recreation was supposed to have the same priority as other values. We would like to see more explicit protections of resources.

• 1. We have identified known potential issues and criteria to guide the planning process based on lands and resources in the planning area. Please provide comments on these issues and criteria, and/or identify other issues or criteria that you think should be considered (If your comment pertains to a specific issue or criteria, please use the reference code, e.g. "PCI") 2. What areas within the Dominguez-Escalante National Conservation Area or Dominguez Canyon Wilderness do you value? Why? Area 1 Great views birdwatching, wildlife potogrpahing & some hickling Area 2 Viewing from bluffs from above Area 3 I use this area a good many times a year Area 4 I can't get to this area to use. Area 5 I use any road or ATV trail that's OPEN 3. Please provide any additional comments that you have regarding this project. Comments on attach sheet. Maps with GPS routes in red. Things that I want to comment on concerning Dominguez-Escalante NCA. 1. Cactus Park area is used by the motorized community, Mountain bikers, Hikers, and Etc. There are a lot of roads, jeep & ATV trails that need to be open for everyone to use. The area has been used for cattle grazing, Christmas tree cutting, fire wood, and many other uses. As the population grows in this area there needs to be public land open for their use. 2. As the motorized roads, double track and single track trails are closed; much less area is left for folks to use. Any Wilderness and Wilderness Study Area restricts firefighting, timber cutting (to help control pine and pinion bee) and controlling ground cover which will stop the massive fuel for fires) and weed control. Colorado is having large fires now because of these large amounts of fuel. 3. The attached maps have GPS routes shown in red that I have GPS'ed at different times. Please note that I have used these routes at different times. All these routes are jeep accessible; many are used by 2 wheel drive pickups. I almost never see hikers when I'm out using these routes on my ATV or Pickup. [ED: The D-E NCA's Recreation Planner identified the route numbers for routes highlighted on the map mentioned in this comment: 621, 624, 676, 649, 641, 743, 676, 741, 97, 96, 744, 733, 15, 838, 18, 945, 26, 847, 848, 941, 1192, 1292, 1377]

• [ED: Following are the text (in quotes) and the D-E NCA Recreation Planner's interpretation of what the commenter wrote on the maps they submitted during public scoping for the Dominguez RMP. The Rec Planner also identified the route numbers highlighted on the maps]: Routes 741 and 848 "needs ATV connector. Cultural sites can easily be avoided by the 50 foot policy." Routes 26 and 1017 "needs ATV connector." Route 941 "must remain open." Route 1017 "should be ATV route." There should be an "ATV connect" between routes 1198 and 1263. The following text was highlighted in orange "Highlighted routes are routes used often by WSATVA and other ATVs." in addition to all the routes mentioned previously, the following routes were highlighted in orange: 743, 97, 96, 26, 813, 842, 15, 847, 1393, 1192, 1292. [ED: On a second map, the commenter highlighted additional routes]: The following are "routes used often by WSATVA": 1516, 1571, 1605, 1633, 15, 1641, 1221. "SC-5" connecting routes 1605 and 1633 " and "SC-6" connecting routes 1516 and 1605 "need to become new ATV routes connecting these deadends." [ED: A map of the Gibbler Mountain area had additional text and routes]. "Highlighted routes" which "are often used by WSATVA 3 seasons" are as follows: 1235, 1221, 1409, 1310, 1263, 1198, 15. Route 1235 [is or should be] an "ATV route."

Comment ID: 00000168-3

**/Mechanized (but still open to motorized for admin/permitted access)**

• Nine Mile HillWe [COPMOBA]recommend incorporating mountain bike use into the planned Quiet Use area along the rim of Nine Mile Hill. The popular Tabeguacbe Trail is in this area. Horse and foot travel have similar impacts in areas not adjacent to a population center so conflicts should be minimal. We recommend administrative road (#unknown but has spurs 1076, 1039, 1018 and 1051 ) bordering the most northern portion of the Wilderness be left open to mountain bikes. We feel allowing mountain bike use will cause minimal resource damage on an administrative road

## Route: 945

### Segment: 2009

#### Designation [?](#)

##### Current Designation

Vehicles under 50" wide

##### Mitigation Criteria

- Needs Data - Cultural
- Cultural

##### Planning Criteria

- RECREATION Recreation access to dispersed campsite
- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Indirect impact
- SMAs Gibbler Mountain ACEC
- DENSITY Route density highest in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open, seek re-route or mitigation

**Alternative C:** Closed (Rehab)

**Alternative D:** Open, seek re-route or mitigation

## Public Comments On Route: 945

Organization, commenter: Janice Shepherd

Comment ID: 00000106-110

• o The Gibbler Mountain ACEC as shown on map 2-5E does not encompass the mountain itself but only its northern slopes. I would prefer to see a non-motorized/non-mechanized ACEC for the whole of Gibbler Mountain and its surrounding slopes, bounded by the routes: 1235-1236-1228-1409-1221-15-8-887-18-17-945-547-951-959-966-969-1005-1006-1021-1022-1023-1024-1047-1150-1249, with 1269 left open to motorized use as a motorized cherry-stemmed route into the area. This would keep this wonderful roadless area (though too small a space for the inventory) roadless into the future. The text on page 871 indicates the area has one of the "best known" populations of the rare plant Grand Junction milkvetch as well as a large collection of fragile dinosaur tracks. The Special Species map from the Open House needs to be updated with this GJ milkvetch population. This ACEC representing a hole in the SRMA would properly protect all three features: roadless-ness, dinosaur tracks, and GJ milkvetch, at the cost of less than 5000 acres. This protection is consistent with this being a National Conservation Area and not a National Recreation Area. This position also has support from the D-E NCA Advisory Council. I recently hiked up to the top of the northern portion of Gibbler Mountain with a friend. We were inspired by the challenging terrain for hiking and the awesome views (photo IMG\_9998). We both had a great feeling of accomplishment when we reached the top. There is plenty of evidence of big game animals using the Gibbler Mountain as a quiet sanctuary from the surrounding motorized areas. This proposed ACEC would benefit them.

Organization, commenter: Quiet Trails Group, Sherry Schenk

Comment ID: 00000115-32

• Gibbler Mountain Area of Critical Environmental Concern: The QTG supports Gibbler Mtn ACEC from Alt D because protections are needed for the myriad of resources found here, especially if it is going to be located within an SRMA focused on motorized use. Further, we think the ACEC should be extended to include all of Gibbler Mountain. Surface-disturbance limitations and a rule of no motorized use should be included for the full ACEC, including this recommended expansion. With this expansion the full ACEC would be bounded by: Routes: 1235-1236-1228-1409-1221-15-8-887-18-17-945-947-951-954-959-962-966-969-1005-1006-1021-1022-1023-1024-1047-1150-1249-8, with 1269, and 1173-1174-1198-1200-1193 cherry-stemmed into the area. The reasons we support this designation are as follows: Roadless areas are an endangered resource in the high-desert west. Categorically, roadless areas especially within NCAs- should be protected as such. By making it a larger area not only does it protect this roadless area but also it better disguises the location of the dinosaur tracks and fossils which we see from page 872," are regionally significant and easily damaged". Per page 871, "This site also supports one of the best known occurrences (A-ranked) of Grand Junction milkvetch (Astragalus linifolius), a globally vulnerable plant (G3/S3) and a BLM sensitive plant species."o Map 3-13 needs to be updated to show the presence of Grand Junction milkvetch and Colorado Hookless cactus as the text on page 871 indicates both are present in this area. A recent hike in this area shows prolific big game use in the area, we assume it is their refuge from surrounding motorized use. Recent hikes have confirmed the presence of Ponderosa Pine atop Gibbler Mtn. This designation would aid in increasing the number of healthy Ponderosa Pines within the NCA, an action which would be in accordance with the Alternative E management objective on page 52. o Map 3-3 needs to be updated to reference the presence of Ponderosa Pine in this area. The designation of this expanded ACEC in the final plan, would address the need for non-motorized trails in this portion of the NCA, an opportunity currently missing from the draft plan. And to reiterate, these protections are needed for the myriad of resources found here, especially because they are to be located within an SRMA focused on motorized use

Things that I want to comment on concerning Dominguez-Escalante NCA. 1. Cactus Park area is used by the motorized community, Mountain bikers, Hikers, and Etc. There are a lot of roads, jeep & ATV trails that need to be open for everyone to use. The area has been used for cattle grazing, Christmas tree cutting, fire wood, and many other uses. As the population grows in this area there needs to be public land open for their use. 2. As the motorized roads, double track and single track trails are closed; much less area is left for folks to use. Any Wilderness and Wilderness Study Area restricts firefighting, timber cutting (to help control pine and piñon beeHe and controlling ground cover which will stop the massive fuel for fires) and weed control. Colorado is having large fires now because of these large amounts of fuel. 3. The attached maps have GPS routes shown in red that I have GPS'ed at different times. Please note that I have used these routes at different times. All these routes are jeep accessible; many are used by 2 wheel drive pickups. I almost never see hikers when I'm out using these routes on my ATV or Pickup. [ED: The D-E NCA's Recreation Planner identified the route numbers for routes highlighted on the map mentioned in this comment: 621, 624, 676, 649, 641, 743, 676, 741, 97, 96, 744, 733, 15, 838, 18, 945, 26, 847, 848, 941, 1192, 1292, 1377]

## Route: 946

### Segment: 2026

#### Designation [?](#)

## Current Designation

Vehicles under 50" wide

## Mitigation Criteria

- No Mitigation Criteria for this Route Segment

## Planning Criteria

- RECREATION Recreation access to dispersed campsite
- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Indirect impact
- SMAs Gibbler Mountain ACEC
- DENSITY Route density highest in Alt A
- DENSITY Route density medium in Alt E
- VEGETATION Sagebrush patches <60 acres

## Rationale

### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

Organization, commenter: Quiet Trails Group, Sherry Schenk

Comment ID: 00000115-32

- Gibbler Mountain Area of Critical Environmental Concern: The QTG supports Gibbler Mtn ACEC from Alt D because protections are needed for the myriad of resources found here, especially if it is going to be located within an SRMA focused on motorized use. Further, we think the ACEC should be extended to include all of Gibbler Mountain. Surface-disturbance limitations and a rule of no motorized use should be included for the full ACEC, including this recommended expansion. With this expansion the full ACEC would be bounded by: Routes: 1235-1236-1228-1409-1221-15-8-887-18-17-945-947-951-954-959-962-966-969-1005-1006-1021-1022-1023-1024-1047-1150-1249-8, with 1269, and 1173-1174-1198-1200-1193 cherry-stemmed into the area. The reasons we support this designation are as follows: Roadless areas are an endangered resource in the high-desert west. Categorically, roadless areas especially within NCAs- should be protected as such. By making it a larger area not only does it protect this roadless area but also it better disguises the location of the dinosaur tracks and fossils which we see from page 872." are regionally significant and easily damaged". Per page 871, "This site also supports one of the best known occurrences (A-ranked) of Grand Junction milkvetch (Astragalus linifolius), a globally vulnerable plant (G3/S3) and a BLM sensitive plant species."o Map 3-13 needs to be updated to show the presence of Grand Junction milkvetch and Colorado Hookless cactus as the text on page 871 indicates both are present in this area. A recent

hike in this area shows prolific big game use in the area, we assume it is their refuge from surrounding motorized use. Recent hikes have confirmed the presence of Ponderosa Pine atop Gibbler Mtn. This designation would aid in increasing the number of healthy Ponderosa Pines within the NCA, an action which would be in accordance with the Alternative E management objective on page 52. o Map 3-3 needs to be updated to reference the presence of Ponderosa Pine in this area. The designation of this expanded ACEC in the final plan, would address the need for non-motorized trails in this portion of the NCA, an opportunity currently missing from the draft plan. And to reiterate, these protections are needed for the myriad of resources found here, especially because they are to be located within an SRMA focused on motorized use

• o The Gibbler Mountain ACEC as shown on map 2-5E does not encompass the mountain itself but only its northern slopes. I would prefer to see a non-motorized/non-mechanized ACEC for the whole of Gibbler Mountain and its surrounding slopes, bounded by the routes: 1235-1236-1228-1409-1221-15-8-887-18-17-945-547-951-959-966-969-1005-1006-1021-1022-1023-1024-1047-1150-1249, with 1269 left open to motorized use as a motorized cherry-stemmed route into the area. This would keep this wonderful roadless area (though too small a space for the inventory) roadless into the future. The text on page 871 indicates the area has one of the "best known" populations of the rare plant Grand Junction milkvetch as well as a large collection of fragile dinosaur tracks. The Special Species map from the Open House needs to be updated with this GJ milkvetch population. This ACEC representing a hole in the SRMA would properly protect all three features: roadless-ness, dinosaur tracks, and GJ milkvetch, at the cost of less than 5000 acres. This protection is consistent with this being a National Conservation Area and not a National Recreation Area. This position also has support from the D-E NCA Advisory Council. I recently hiked up to the top of the northern portion of Gibbler Mountain with a friend. We were inspired by the challenging terrain for hiking and the awesome views (photo IMG\_9998). We both had a great feeling of accomplishment when we reached the top. There is plenty of evidence of big game animals using the Gibbler Mountain as a quiet sanctuary from the surrounding motorized areas. This proposed ACEC would benefit them.

## Public Comments On Route: 954

Organization, commenter: Quiet Trails Group, Sherry Schenk

Comment ID: 000000115-32

• Gibbler Mountain Area of Critical Environmental Concern: The QTG supports Gibbler Mtn ACEC from Alt D because protections are needed for the myriad of resources found here, especially if it is going to be located within an SRMA focused on motorized use. Further, we think the ACEC should be extended to include all of Gibbler Mountain. Surface-disturbance limitations and a rule of no motorized use should be included for the full ACEC, including this recommended expansion. With this expansion the full ACEC would be bounded by: Routes: 1235-1236-1228-1409-1221-15-8-887-18-17-945-947-951-954-959-962-966-969-1005-1006-1021-1022-1023-1024-1047-1150-1249-8, with 1269, and 1173-1174-1198-1200-1193 cherry-stemmed into the area. The reasons we support this designation are as follows: Roadless areas are an endangered resource in the high-desert west. Categorically, roadless areas especially within NCAs- should be protected as such. By making it a larger area not only does it protect this roadless area but also it better disguises the location of the dinosaur tracks and fossils which we see from page 872," are regionally significant and easily damaged". Per page 871, "This site also supports one of the best known occurrences (A-ranked) of Grand Junction milkvetch (Astragalus linifolius), a globally vulnerable plant (G3/S3) and a BLM sensitive plant species."o Map 3-13 needs to be updated to show the presence of Grand Junction milkvetch and Colorado Hookless cactus as the text on page 871 indicates both are present in this area. A recent hike in this area shows prolific big game use in the area, we assume it is their refuge from surrounding motorized use. Recent hikes have confirmed the presence of Pondersa Pine atop Gibbler Mtn. This designation would aid in increasing the number of healthy Pondersa Pines within the NCA, an action which would be in accordance with the Alternative E management objective on page 52. o Map 3-3 needs to be updated to reference the presence of Pondersa Pine in this area. The designation of this expanded ACEC in the final plan, would address the need for non-motorized trails in this portion of the NCA, an opportunity currently missing from the draft plan. And to reiterate, these protections are needed for the myriad of resources found here, especially because they are to be located within an SRMA focused on motorized use

## Public Comments On Route: 959

Organization, commenter: Janice Shepherd

Comment ID: 000000106-110

o The Gibbler Mountain ACEC as shown on map 2-5E does not encompass the mountain itself but only its northern slopes. I would prefer to see a non-motorized/non-mechanized ACEC for the whole of Gibbler Mountain and its surrounding slopes, bounded by the routes: 1235-1236-1228-1409-1221-15-8-887-18-17-945-547-951-959-966-969-1005-1006-1021-1022-1023-1024-1047-1150-1249, with 1269 left open to motorized use as a motorized cherry-stemmed route into the area. This would keep this wonderful roadless area (though too small a space for the inventory) roadless into the future. The text on page 871 indicates the area has one of the "best known" populations of the rare plant Grand Junction milkvetch as well as a large collection of fragile dinosaur tracks. The Special Species map from the Open House needs to be updated with this GJ milkvetch population. This ACEC representing a hole in the SRMA would properly protect all three features: roadless-ness, dinosaur tracks, and GJ milkvetch, at the cost of less than 5000 acres. This protection is consistent with this being a National Conservation Area and not a National Recreation Area. This position also has support from the D-E NCA Advisory Council. I recently hiked up to the top of the northern portion of Gibbler Mountain with a friend. We were inspired by the challenging terrain for hiking and the awesome views (photo IMG\_9998). We both had a great feeling of accomplishment when we reached the top. There is plenty of evidence of big game animals using the Gibbler Mountain as a quiet sanctuary from the surrounding motorized areas. This proposed ACEC would benefit them.

• 1. We have identified known potential issues and criteria to guide the planning process based on lands and resources in the planning area. Please provide comments on these issues and criteria, and/or identify other issues or criteria that you think should be considered (If your comment pertains to a specific is sure or criteria, please use the reference code, e.g. "PCI") 2. What areas within the Dominguez-Escalante National Conservation Area or Dominguez Canyon Wilderness do you value? Why? Area 1 Great views birdwatching, wildlife photography & some hicking Area 2 Viewing from bluffs from above Area 3 I use this area a good many times a year Area 4 I can't get to this area to use. Area 5 I use any road or ATV trail thats OPEN 3. Please provide any additional comments that you have regarding this project. Comments on attach sheet. Maps with GPS routes in red. Things that I want to comment on concerning Dominguez-Escalante NCA. 1. Cactus Park area is used by the motorized community, Mountain bikers, Hikers, and Etc. There are a lot of roads, jeep & ATV trails that need to be open for everyone to use. The area has been used for cattle grazing, Christmas tree cutting, fire wood, and many other uses. As the population grows in this area there needs to be public land open for their use. 2. As the motorized roads, double track and single track trails are closed; much less area is left for folks to use. Any Wilderness and Wilderness Study Area restricts firefighting, timber cutting (to help control pine and pinion beeHe and controlling ground cover which will stop the massive fuel for fires) and weed control. Colorado is having large fires now because of these large amounts of fuel. 3. The attached maps have GPS routes shown in red that I have GPS'ed at different times. Please note that I have used these routes at different times. All these routes are jeep accessible; many are used by 2 wheel drive pickups. I almost never see hikers when I'm out using these routes on my ATV or Pickup. [ED: The D-E NCA's Recreation Planner identified the route numbers for routes highlighted on the map mentioned in this comment: 621, 624, 676, 649, 641, 743, 676, 741, 97, 96, 744, 733, 15, 838, 18, 945, 26, 847, 848, 941, 1192, 1292, 1377]

Organization, commenter: None

Comment ID: PUB\_SC-009

• [ED: Following are the text (in quotes) and the D-E NCA Recreation Planner's interpretation of what the commenter wrote on the maps they submitted during public scoping for the Dominguez RMP. The Rec Planner also identified the route numbers highlighted on the maps]: Routes 741 and 848 "needs ATV connector. Cultural sites can easily be avoided by the 50 foot policy." Routes 26 and 1017 "needs ATV connector." Route 941 "must remain open." Route 1017 "should be ATV route." There should be an "ATV connect" between routes 1198 and 1263. The following text was highlighted in orange "Highlighted routes are routes used often by WSATVA and other ATVs." in addition to all the routes mentioned previously, the following routes were highlighted in orange: 743, 97, 96, 26, 813, 842, 15, 847, 1393, 1192, 1292. [ED: On a second map, the commenter highlighted additional routes]: The following are "routes used often by WSATVA": 1516, 1571, 1605, 1633, 15, 1641, 1221. "SC-5" connecting routes 1605 and 1633 " and "SC-6" connecting routes 1516 and 1605 "need to become new ATV routes connecting these deadends." [ED: A map of the Gibbler Mountain area had additional text and routes]. "Highlighted routes" which "are often used by WSATVA 3 seasons" are as follows: 1235, 1221, 1409, 1310, 1263, 1198, 15. Route 1235 [is or should be] "an ATV route."

## Route: 960

### Segment: 1968

#### Designation ?

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- SMAs Gibbler Mountain ACEC
- DENSITY Route density highest in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Minimize Harassment:** Big game winter range – close, PPSV- Minimize fragmentation, PPSV- Minimize fragmentation, Big game winter range – close
- **Recreation:** RMA objectives, RMA objectives

##### Rationale for Decision

- Route was designated to protect big game winter range
- Route was designated to reduce fragmentation in Priority Vegetation types

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 960

## Public Comments On Route: 962

Organization, commenter: Quiet Trails Group, Sherry Schenk

Comment ID: 000000115-32

- Gibbler Mountain Area of Critical Environmental Concern: The QTG supports Gibbler Mtn ACEC from Alt D because protections are needed for the myriad of resources found here, especially if it is going to be located within an SRMA focused on motorized use. Further, we think the ACEC should be extended to include all of Gibbler Mountain. Surface-disturbance limitations and a rule of no motorized use should be included for the full ACEC, including this recommended expansion. With this expansion the full ACEC would be bounded by: Routes: 1235-1236-1228-1409-1221-15-8-887-18-17-945-947-951-954-959-962-966-969-1005-1006-1021-1022-1023-1024-1047-1150-1249-8, with 1269, and 1173-1174-1198-1200-1193 cherry-stemmed into the area. The reasons we support this designation are as follows: Roadless areas are an endangered resource in the high-desert west. Categorically, roadless areas especially within NCAs- should be protected as such. By making it a larger area not only does it protect this roadless area but also it better disguises the location of the dinosaur tracks and fossils which we see from page 872," are regionally significant and easily damaged". Per page 871, "This site also supports one of the best known occurrences (A-ranked) of Grand Junction milkvetch (Astragalus linifolius), a globally vulnerable plant (G3/S3) and a BLM sensitive plant species."o Map 3-13 needs to be updated to show the presence of Grand Junction milkvetch and Colorado Hookless cactus as the text on page 871 indicates both are present in this area. A recent

hike in this area shows prolific big game use in the area, we assume it is their refuge from surrounding motorized use. Recent hikes have confirmed the presence of Ponderosa Pine atop Gibbler Mtn. This designation would aid in increasing the number of healthy Ponderosa Pines within the NCA, an action which would be in accordance with the Alternative E management objective on page 52. o Map 3-3 needs to be updated to reference the presence of Ponderosa Pine in this area. The designation of this expanded ACEC in the final plan, would address the need for non-motorized trails in this portion of the NCA, an opportunity currently missing from the draft plan. And to reiterate, these protections are needed for the myriad of resources found here, especially because they are to be located within an SRMA focused on motorized use

## Public Comments On Route: 966

Organization, commenter: Janice Shepherd

Comment ID: 00000106-110

• o The Gibbler Mountain ACEC as shown on map 2-5E does not encompass the mountain itself but only its northern slopes. I would prefer to see a non-motorized/non-mechanized ACEC for the whole of Gibbler Mountain and its surrounding slopes, bounded by the routes: 1235-1236-1228-1409-1221-15-8-887-18-17-945-547-951-959-966-969-1005-1006-1021-1022-1023-1024-1047-1150-1249, with 1269 left open to motorized use as a motorized cherry-stemmed route into the area. This would keep this wonderful roadless area (though too small a space for the inventory) roadless into the future. The text on page 871 indicates the area has one of the "best known" populations of the rare plant Grand Junction milkvetch as well as a large collection of fragile dinosaur tracks. The Special Species map from the Open House needs to be updated with this GJ milkvetch population. This ACEC representing a hole in the SRMA would properly protect all three features: roadless-ness, dinosaur tracks, and GJ milkvetch, at the cost of less than 5000 acres. This protection is consistent with this being a National Conservation Area and not a National Recreation Area. This position also has support from the D-E NCA Advisory Council. I recently hiked up to the top of the northern portion of Gibbler Mountain with a friend. We were inspired by the challenging terrain for hiking and the awesome views (photo IMG\_9998). We both had a great feeling of accomplishment when we reached the top. There is plenty of evidence of big game animals using the Gibbler Mountain as a quiet sanctuary from the surrounding motorized areas. This proposed ACEC would benefit them.

• Gibbler Mountain Area of Critical Environmental Concern: The QTG supports Gibbler Mtn ACEC from Alt D because protections are needed for the myriad of resources found here, especially if it is going to be located within an SRMA focused on motorized use. Further, we think the ACEC should be extended to include all of Gibbler Mountain. Surface-disturbance limitations and a rule of no motorized use should be included for the full ACEC, including this recommended expansion. With this expansion the full ACEC would be bounded by: Routes: 1235-1236-1228-1409-1221-15-8-887-18-17-945-947-951-954-959-962-966-969-1005-1006-1021-1022-1023-1024-1047-1150-1249-8, with 1269, and 1173-1174-1198-1200-1193 cherry-stemmed into the area. The reasons we support this designation are as follows: Roadless areas are an endangered resource in the high-desert west. Categorically, roadless areas especially within NCAs- should be protected as such. By making it a larger area not only does it protect this roadless area but also it better disguises the location of the dinosaur tracks and fossils which we see from page 872," are regionally significant and easily damaged". Per page 871, "This site also supports one of the best known occurrences (A-ranked) of Grand Junction milkvetch (Astragalus linifolius), a globally vulnerable plant (G3/S3) and a BLM sensitive plant species."o Map 3-13 needs to be updated to show the presence of Grand Junction milkvetch and Colorado Hookless cactus as the text on page 871 indicates both are present in this area. A recent hike in this area shows prolific big game use in the area, we assume it is their refuge from surrounding motorized use. Recent hikes have confirmed the presence of Ponderosa Pine atop Gibbler Mtn. This designation would aid in increasing the number of healthy Ponderosa Pines within the NCA, an action which would be in accordance with the Alternative E management objective on page 52. o Map 3-3 needs to be updated to reference the presence of Ponderosa Pine in this area. The designation of this expanded ACEC in the final plan, would address the need for non-motorized trails in this portion of the NCA, an opportunity currently missing from the draft plan. And to reiterate, these protections are needed for the myriad of resources found here, especially because they are to be located within an SRMA focused on motorized use

## Route: 967

### Segment: 1961

## Designation

### Current Designation

Closed (Rehab)

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- SMAs Gibbler Mountain ACEC
- DENSITY Route density highest in Alt A
- DENSITY Route density medium in Alt E

## Rationale

### Designation Criteria

- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close

### Rationale for Decision

- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range

## Public Comments On Route: 969

Organization, commenter: Janice Shepherd

Comment ID: 00000106-110

• o The Gibbler Mountain ACEC as shown on map 2-5E does not encompass the mountain itself but only its northern slopes. I would prefer to see a non-motorized/non-mechanized ACEC for the whole of Gibbler Mountain and its surrounding slopes, bounded by the routes: 1235-1236-1228-1409-1221-15-8-887-18-17-945-547-951-959-966-969-1005-1006-1021-1022-1023-1024-1047-1150-1249, with 1269 left open to motorized use as a motorized cherry-stemmed route into the area. This would keep this wonderful roadless area (though too small a space for the inventory) roadless into the future. The text on page 871 indicates the area has one of the "best known" populations of the rare plant Grand Junction milkvetch as well as a large collection of fragile dinosaur tracks. The Special Species map from the Open House needs to be updated with this GJ milkvetch population. This ACEC representing a hole in the SRMA would properly protect all three features: roadless-ness, dinosaur tracks, and GJ milkvetch, at the cost of less than 5000 acres. This protection is consistent with this being a National Conservation Area and not a National Recreation Area. This position also has support from the D-E NCA Advisory Council. I recently hiked up to the top of the northern portion of Gibbler Mountain with a friend. We were inspired by the challenging terrain for hiking and the awesome views (photo IMG\_9998). We both had a great feeling of accomplishment when we reached the top. There is plenty of evidence of big game animals using the Gibbler Mountain as a quiet sanctuary from the surrounding motorized areas. This proposed ACEC would benefit them.

Organization, commenter: Quiet Trails Group, Sherry Schenk

Comment ID: 00000115-32

• Gibbler Mountain Area of Critical Environmental Concern: The QTG supports Gibbler Mtn ACEC from Alt D because protections are needed for the myriad of resources found here, especially if it is going to be located within an SRMA focused on motorized use. Further, we think the ACEC should be extended to include all of Gibbler Mountain. Surface-disturbance limitations and a rule of no motorized use should be included for the full ACEC, including this recommended expansion. With this expansion the full ACEC would be bounded by: Routes: 1235-1236-1228-1409-1221-15-8-887-18-17-945-947-951-954-959-962-966-969-1005-1006-1021-1022-1023-1024-1047-1150-1249-8, with 1269, and 1173-1174-1198-1200-1193 cherry-stemmed into the area. The reasons we support this designation are as follows: Roadless areas are an endangered resource in the high-desert west. Categorically, roadless areas especially within NCAs- should be protected as such. By making it a larger area not only does it protect this roadless area but also it better disguises the location of the dinosaur tracks and fossils which we see from page 872," are regionally significant and easily damaged". Per page 871, "This site also supports one of the best known occurrences (A-ranked) of Grand Junction milkvetch (Astragalus limifolius), a globally vulnerable plant (G3/S3) and a BLM sensitive plant species."o Map 3-13 needs to be updated to show the presence of Grand Junction milkvetch and Colorado Hookless cactus as the text on page 871 indicates both are present in this area. A recent hike in this area shows prolific big game use in the area, we assume it is their refuge from surrounding motorized use. Recent hikes have confirmed the presence of Ponderosa Pine atop Gibbler Mtn. This designation would aid in increasing the number of healthy Ponderosa Pines within the NCA, an action which would be in accordance with the Alternative E management objective on page 52. o Map 3-3 needs to be updated to reference the presence of Ponderosa Pine in this area. ## Public Comments On Route: 97

Organization, commenter: None

Comment ID: PUB\_SC-014

• 1. We have identified known potential issues and criteria to guide the planning process based on lands and resources in the planning area. Please provide comments on these issues and criteria, and/or identify other issues or criteria that you think should be considered (If your comment pertains to a specific is sure or criteria, please use the reference code, e.g. "PCI") 2. What areas within the Dominguez-Escalante National Conservation Area or Dominguez Canyon Wilderness do you value? Why? Area 1 Great views birdwatching, wildlife potogrpthing & some hicking Area 2 Viewing from bluffs from above Area 3 I use this area a good many times a year Area 4 I can't get to this area to use. Area 5 I use any road or ATV trail thats OPEN 3. Please provide any additional comments that you have regarding this project. Comments on attach sheet. Maps with GPS routes in red. Things that I want to comment on concerning Dominguez-Escalante NCA. 1. Cactus Park area is used by the motorized community, Mountain bikers, Hikers, and Etc. There are a lot of roads, jeep & ATV trails that need to be open for everyone to use. The area has been used for cattle grazing, Christmas tree cutting, fire wood, and many other uses. As the population grows in this area there needs to be public land open for their use. 2. As the motorized roads, double track and single track trails are closed; much less area is left for folks to use. Any Wilderness and Wilderness Study Area restricts firefighting, timber cutting (to help control pine and piñon beeHe and controlling ground cover which will stop the massive fuel for fires) and weed control. Colorado is having large fires now because of these large amounts of fuel. 3. The attached maps have GPS routes shown in red that I have GPS'ed at different times. Please note that I have used these routes at different times. All these routes are jeep accessible; many are used by 2 wheel drive pickups. I almost never see hikers when I'm out using these routes on my ATV or Pickup. [ED: The D-E NCA's Recreation Planner identified the route numbers for routes highlighted on the map mentioned in this comment: 621, 624, 676, 649, 641, 743, 676, 741, 97, 96, 744, 733, 15, 838, 18, 945, 26, 847, 848, 941, 1192, 1292, 1377]

Organization, commenter: None

Comment ID: PUB\_SC-009

• [ED: Following are the text (in quotes) and the D-E NCA Recreation Planner's interpretation of what the commenter wrote on the maps they submitted during public scoping for the Dominguez RMP. The Rec Planner also identified the route numbers highlighted on the maps]: Routes 741 and 848 "needs ATV connector. Cultural sites can easily be avoided by the 50 foot policy." Routes 26 and 1017 "needs ATV connector." Route 941 "must remain open." Route 1017 "should be ATV route." There should be an "ATV connect" between routes 1198 and 1263. The following text was highlighted in orange "Highlighted routes are routes used often by WSATVA and other ATVs." in addition to all the routes mentioned previously, the following routes were highlighted in orange: 743, 97, 96, 26, 813, 842, 15, 847, 1393, 1192, 1292. [ED: On a second map, the commenter highlighted additional routes]: The following are "routes used often by WSATVA": 1516, 1571, 1605, 1633, 15, 1641, 1221. "SC-5" connecting routes 1605 and 1633 " and "SC-6" connecting

routes 1516 and 1605 "need to become new ATV routes connecting these deadends." [ED: A map of the Gibbler Mountain area had additional text and routes]. "Highlighted routes" which "are often used by WSATVA 3 seasons" are as follows: 1235, 1221, 1409, 1310, 1263, 1198, 15. Route 1235 [is or should be] "an ATV route."

## Public Comments On Route: 974

Organization, commenter: Brandon Siegfried

Comment ID: 000000068-3

The following high value recreational routes/roads are legal ROW's in the State of Colorado, Mesa County and the BLM does not have the jurisdiction to close them: 500, 472, 518, 521, 530, 39, 127, 572, 566, 66, 65, 148, 71, 74, 587, 595, 608, 622, 628, 635, 624, 609, 611, 706, 678, 700, 719, 726, 696, 26, 936, 847, 849, 919, 767, 824, 96, 822, 817, 950, 1021, 900, 2682, 1020, 1003, 1084, 1142, 1184, 1156, 1198, 1349, 1308, 1310, 1238, 1263, 1122, 1170, 1192, 974, 941, 1076, 1039, 1018, 1759, 1764, 1758, 1174, 1788, 1798, 1669, 1699, 1773, 1755, 1779, 1750, 1751, 1792, 1720, 1726, 1727, 1720, 1722, 1803, 1805, 1809, 1614, 1609, 1605, 1608, 1571, 1526, 1516, 1448, 755, 807, 900, 10, 48, 924, 950, 1005, 965, 8, 1115, 981, 984, 1135, 2678, 1249, 1171, 1150, 1249, 1320, 1235, 1236, 1228, 1227, 1409, 1456, 1349, 1308, 1513, 1221, 1550, 1567, 1641, 1612, 1740, 1688, 2597, 2598, 2601, 2440, 3160, 3162, 2089, 2166, 2170, 2596, 2171, 2003, 2122, 2126, 2189, 3145, 2182, 2179, 2178, 3143, 2181, 2121, 2122, 2168, 2126, 2180, 2095, 2173, 2174, 2620, 2129, 1686, 1692, 1667, 1647, 1631, 1613, 1596, 1549, 1541, 2647, 1633, 1605, 1608, 1571, 2645, 1507, 1448, 1496, 1516, 1504, 1510, 1508, 1509, 439, 431, 456, 461, 460, 391, 423, 415, 419, 407, 402, 367, 372, 339, 298, 338, 105, 368, 374, 393, 389, 390, 376, 377, 351, 350, 121, 345, 320, 301, 251, 234, 232, 205, 344, 107, 103, 152, 153, 161, 168, 3199, 188, 196, 255, 254, 236, 294, 242, 219, 201, 169, 162, 158, 160, 173. ## Route: 976

### Segment: 1818

#### Designation ?

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- RIPARIAN Riparian 4 stream crossings
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Indirect impact
- SMAs Gibbler Mountain ACEC
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- SSPLANT Special Status Species sensitive species planes

### Rationale

#### Designation Criteria

- **Minimize Damage:** SS Plants-SSR within 100m
- **Minimize Harassment:** Big game winter range – close, PPSV- Minimize fragmentation
- **Wilderness / Natural Area:** ACEC – Gibbler- PSD paleo

#### Rationale for Decision

- Route was designated to protect and enhance special status fish, wildlife, and plant populations.
- Route was designated to protect big game winter range
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect important paleontological resources within the Gibbler Mountain ACEC

### Previous Alternatives Analyzed

**Alternative A:** Vehicles under 50" wide

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

### Public Comments On Route: 976

- No public comments for this Route

### Route: 977

#### Segment: 1810

### Designation

#### Current Designation

Closed (Rehab)

#### Mitigation Criteria

### Public Comments On Route: 977

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 000000135-35

Gibbler Gulch/Gibbler MountainThe following are route recommendations for Gibbler Gulch and Gibbler Mountain which together make a nice amount of relatively undisturbed open space and habitat. This area is less roaded and fragmented than other parts of Cactus Park NCA unit. It may be less impacted by grazing than other areas and harbors critical big game habitat. Hoping to send you maps next week showing these areas. In particular I recommend keeping recreational use out of all the creek drainages in the upper Gibbler Gulch area, and closing roads on the adjacent mesas. Putting a motorized or mountain bike route over Gibbler Mountain would irreversibly change the natural quality, silence and solitude of this remote landscape. Lands that are currently undeveloped should stay that way as so much land in the NCA is criss-crossed with routes and trails.For example there is potential for retaining the remote "open space" setting of Gibbler Mountain, as specified in the 2007 Colorado BLM Recreation and Visitor Strategy, by closing 1227(!) (especially), 1269, 1309, 2674, 2673, 1249, 1171, 981, 980, 1150, 1154, 977, 979, 1312, 1310, 1334, 1330, 1344, 1286, 1242, 1213, 1238, 1242, 1204, 1213, 1239, 1214, 1212, 1200, 1263, 1204, 1198, 1187, 1210. Limit motorized traffic to roads 15 and 8.Similarly, there is potential for a large unmotorized area extending west from road 15 and Gibbler Gulch on the east, to road 8 on the west. To create an undisturbed nonmotorized area I recommend closing routes 1526, 2666, 1571, 2665, 1608, 1570, 1605, 1561, 1516, 1606, 1561, 1609 1633, 2664, 2663, 1412, 1424, 1456 1434, 1513 , 1249, 1269.Many of these are duplicative, serve no purpose, or are dead ends, simply pioneered randomly, and should be closed.

## Route: 979

### Segment: 1811

#### Designation ?

##### Current Designation

Admin/Permitted Use Only

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- SMA's Gibbler Mountain ACEC
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- SSPLANT Special Status Species sensitive species planes

#### Rationale

##### Designation Criteria

- Minimize Damage:** SS Plants-SSR within 100m
- Minimize Harassment:** Big game winter range – close
- Wilderness / Natural Area:** ACEC – Gibbler- PSD paleo

##### Rationale for Decision

- Route was designated to ensure access to rights-of-way, private property, and livestock grazing facilities.

- Now that the mine has been sealed up (photo IMG\_9997) routes 1020-1029-1041-1064-1080-1113-979 should be closed. I recently hiked the road with a friend. The upper reaches are deteriorating (photos IMG\_9994, IMG\_9995).

## Route: 98

### Segment: 2344

#### Designation ?

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

#### Rationale

### Designation Criteria

- **Minimize Damage:** NHT – close routes for setting
- **Minimize Harassment:** PPSV- Minimize fragmentation

### Rationale for Decision

- Route was designated to improve natural setting along the Old Spanish National Historic Trail.
- Route was designated to reduce fragmentation in Priority Vegetation types

### Previous Alternatives Analyzed

**Alternative A:** Vehicles under 50" wide

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

### Public Comments On Route: 98

Lands that are currently undeveloped should stay that way as so much land in the NCA is criss-crossed with routes and trails. For example there is potential for retaining the remote "open space" setting of Gibbler Mountain, as specified in the 2007 Colorado BLM Recreation and Visitor Strategy, by closing 1227(!) (especially), 1269, 1309, 2674, 2673, 1249, 1171, 981, 980, 1150, 1154, 977, 979, 1312, 1310, 1334, 1330, 1344, 1286, 1242, 1213, 1238, 1242, 1204, 1213, 1239, 1214, 1212, 1200, 1263, 1204, 1198, 1187, 1210. Limit motorized traffic to roads 15 and 8. Similarly, there is potential for a large unmotorized area extending west from road 15 and Gibbler Gulch on the east, to road 8 on the west. To create an undisturbed nonmotorized area I recommend closing routes 1526, 2666, 1571, 2665, 1608, 1570, 1605, 1561, 1516, 1606, 1561, 1609, 1633, 2664, 2663, 1412, 1424, 1456, 1434, 1513, 1249, 1269. Many of these are duplicative, serve no purpose, or are dead ends, simply pioneered randomly, and should be closed.

Organization, commenter: CMDA, Brandon Siegfried

## Route: 986

## Segment: 1790

### Designation

#### Current Designation

Closed (Rehab)

#### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

#### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- SOIL Soils Fragile
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

### Rationale

#### Designation Criteria

- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close

#### Rationale for Decision

- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range

### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 986

- No public comments for this Route

## Route: 987

### Segment: 1794

### Designation

#### Current Designation

Open (All modes of travel)

#### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

#### Planning Criteria

- RECREATION Recreation access to dispersed campsite
- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Indirect impact
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

### Rationale

#### Designation Criteria

- **No designation criteria for this route segment.**

#### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open (All modes of travel)

**Alternative C:** Closed (Rehab)

**Alternative D:** Open (All modes of travel)

## Public Comments On Route: 987

- No public comments for this Route

## Route: 988

### Segment: 1792

### Designation

### Current Designation

Open (All modes of travel)

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Range access for general livestock management
- LANDS Access to non-federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E
- VEGETATION Sagebrush patches >60 acres

## Rationale

### Designation Criteria

- **No designation criteria for this route segment.**

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open (All modes of travel)

**Alternative C:** Admin/Permitted Use Only

**Alternative D:** Open (All modes of travel)

## Public Comments On Route: 988

- No public comments for this Route

## Route: 99

### Segment: 2356

## Designation [?](#)

### Current Designation

Closed (Rehab)

### Mitigation Criteria

- Needs Data - Cultural

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- CULTURAL Cultural Indirect impact
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

## Rationale

### Designation Criteria

- **Minimize Damage:** Fragile soils SSR, NHT – close routes for setting
- **Minimize Harassment:** PPSV- Minimize fragmentation

### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to improve natural setting along the Old Spanish National Historic Trail.
- Route was designated to reduce fragmentation in Priority Vegetation types

## Previous Alternatives Analyzed

**Alternative A:** Vehicles under 50" wide

## Public Comments On Route: 993

Organization, commenter: Quiet Trails Group, Sherry Schenk

Comment ID: 000000115-79

- [Re: Cactus Park SRMA] The QTG believes the shape of the SRMA should be adjusted on the east corner to avoid any overlap with the Bighorn sheep productive area. From page 69 we see that Alt E has no new motorized routes being created in Bighorn Sheep Productive area. The purpose behind the Cactus Park SRMA is to manage the creation of new ATV routes. So overlapping the 2 areas does not make sense. This concern has been shared with the Advisory Council. The proposed action on page 69 to deal with fragmentation and un-fragmentation of Bighorn Sheep summer concentration areas is too complex and will likely not be satisfactory given the habit-forming tendencies of Bighorn Sheep. Instead, Cactus Park SRMA should be reduced to not include the portion that overlaps the Winter/Summer range of Bighorn Sheep. In addition to simplifying the management, this will also address the concern that motorized recreation should not take priority over other resources in that area, which are not limited to Bighorn Sheep. BLM could consider incorporating this area into the Ninemile Hill ERMA with the caveat that the Alt E motorized routes in the area 847-848-830, 998-1017-1110-1108-993-995-1123-1129-1170-1169-1192-941 would be left as designated in Alt E (some full motorized, some ATV). The QTG is quite concerned about the SRMA status for this landscape. While we hope that a network of quality ATV routes will diminish the number of new user-created routes developing per year, we are very concerned about the prioritization of recreation over the myriad of other resources which are present in a high-density within this sensitive landscape. We think that Congress - in the Omnibus Act that created the NCA - had envisioned a balanced approach to "long-term conservation and protection of unique and important values" where recreation was supposed to have the same priority as other values. We would like to see more explicit protections of resources.

## Public Comments On Route: 998

Organization, commenter: Western Slope ATV Association, Steve Chapel

Comment ID: 000000089-13

- The route with numbers 933, to 1105, to 1110, to 1017, to 998 had been an important route for ATV use. At the end of it a connection can be made without equipment to extend it over to route 52 and create a great loop. We know this because we have made the short walk between the two routes. This had been explained to BLM. The map shows it with a dotted line which indicates closed until mitigated. This is not acceptable nor necessary. It is also confusing because there is a bicycle emblem on the route.

Organization, commenter: Jeffery Fleming

Comment ID: 000000105-6

- New trail construction on very top of NE ridge above Cactus Park. It would connect 738 to 998 crossing 26 midway and would also make a great hiking trail with amazing views in both directions

- Cactus Park New trail construction on very top of NE ridge above Cactus Park. It would connect 738 to 998 crossing 26 midway and would also make a great hiking trail with amazing views in both directions. We [COPMOBA] agree with 1728 and 1725 as accessible for mountain bike due to the trail being managed as such after crossing National Forest land boundary

## Public Comments on Route: 4045

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 000000135-28

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area
