

# Dominguez-Escalante NCA Travel Management Plan Route Comment Report

## Route: 1

### Segment: 1491

#### Designation [?](#)

##### Current Designation

Foot/Horse

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- RIPARIAN Riparian 2 stream crossings
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class 1 moderate
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E
- SSPLANT Special Status Species sensitive species planes

#### Rationale

##### Designation Criteria

- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Foot/Horse

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Not Rehabbed)

**Alternative D:** Foot/Horse

## Public Comments on Route: 1

- No public comments for this Route

## Route: 10

### Segment: 2033

#### Designation [?](#)

##### Current Designation

Open (All modes of travel)

##### Mitigation Criteria

- Needs Data - Cultural

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Indirect impact
- DENSITY Route density highest in Alt A
- DENSITY Route density medium in Alt E

#### Rationale

##### Designation Criteria

- **Recreation:** Rec opportunities - specific, RMA objectives

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open, seek re-route or mitigation

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed, seek re-route or mitigation

## Public Comments on Route: 10

• The following high value recreational routes/roads are legal ROW's in the State of Colorado, Mesa County and the BLM does not have the jurisdiction to close them: 500, 472, 518, 521, 530, 39, 127, 572, 566, 66, 65, 148, 71, 74, 587, 595, 608, 622, 628, 635, 624, 609, 611, 706, 678, 700, 719, 726, 696, 26, 936, 847, 849, 919, 767, 824, 96, 822, 817, 950, 1021, 900, 2682, 1020, 1003, 1084, 1142, 1184, 1156, 1198, 1349, 1308, 1310, 1238, 1263, 1122, 1170, 1192, 974, 941, 1076, 1039, 1018, 1759, 1764, 1758, 1174, 1788, 1798, 1669, 1699, 1773, 1755, 1779, 1750, 1751, 1792, 1720, 1726, 1727, 1720, 1722, 1803, 1805, 1809, 1614, 1609, 1605, 1608, 1571, 1526, 1516, 1448, 755, 807, 900, 10, 48, 924, 950, 1005, 965, 8, 1115, 981, 984, 1135, 2678, 1249, 1171, 1150, 1249, 1320, 1235, 1236, 1228, 1227, 1409, 1456, 1349, 1308, 1513, 1221, 1550, 1567, 1641, 1612, 1740, 1688, 2597, 2598, 2601, 2440, 3160, 3162, 2089, 2166, 2170, 2596, 2171, 2003, 2122, 2126, 2189, 3145, 2182, 2179, 2178, 3143, 2181, 2121, 2122, 2168, 2126, 2180, 2095, 2173, 2174, 2620, 2129, 1686, 1692, 1667, 1647, 1631, 1613, 1596, 1549, 1541, 2647, 1633, 1605, 1608, 1571, 2645, 1507, 1448, 1496, 1516, 1504, 1510, 1508, 1509, 439, 431, 456, 461, 460, 391, 423, 415, 419, 407, 402, 367, 372, 339, 298, 338, 105, 368, 374, 393, 389, 390, 376, 377, 351, 350, 121, 345, 320, 301, 251, 234, 232, 205, 344, 107, 103, 152, 153, 161, 168, 3199, 188, 196, 255, 254, 236, 294, 242, 219, 201, 169, 162, 158, 160, 173. The following high value recreational routes/roads are legal ROW's in the State of Colorado, Delta County, and the BLM does not have the jurisdiction to close them: 3011, 2184, 2191, 3100, 2187, 2026, 2059, 2188, 2192, 3104, 2130, 3009, 2199, 2200, 2111, 2223, 2024, 3006, 2231, 3094, 2579, 2210, 2344, 2243, 2249, 2248, 3074, 2354, 2384, 2296, 2295, 2287, 2304, 2062, 2163, 3163, 2164, 2430, 4006, 3016, 2351, 3140, 2410, 4008, 2324, 2073, 2306, 2459, 3192, 3193, 2350, 2443, 2035, 2336, 2495, 2491, 2159, 3058, 2277, 2465, 2467, 3189, 2472, 2297, 2006, 2265, 2271, 2276, 2135, 2139, 3053, 2489, 3033, 3057, 2031, 2276, 2210, 2579, 2136, 2344, 3164, 2400, 2379, 3014, 2365, 3116, 2251, 2259, 2149, 2153, 2146, 2144, 2145, 2356, 2257, 2048, 2358, 3165, and 3166.

## Route: 100

### Segment: 2355

#### Designation

##### Current Designation

Open (All modes of travel)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- CULTURAL Cultural Indirect impact
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

#### Rationale

##### Designation Criteria

- No designation criteria for this route segment.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open (All modes of travel)

**Alternative C:** Admin/Permitted Use Only

**Alternative D:** Foot/Horse/Mechanized (but still open to motorized for admin/permitted access)

## Public Comments on Route: 100

- No public comments for this Route

## Route: 1001

### Segment: 1943

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

## Rationale

### Designation Criteria

- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close

### Rationale for Decision

- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments on Route: 1001

- No public comments for this Route

## Route: 1002

### Segment: 1942

## Designation

### Current Designation

Closed (Rehab)

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

## Rationale

### Designation Criteria

- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close

### Rationale for Decision

- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments on Route: 1002

- No public comments for this Route

## Route: 1003

### Segment: 1946

## Designation

### Current Designation

Open (All modes of travel)

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation access to dispersed campsite
- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- SMAs Gibbler Mountain ACEC
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E

## Rationale

## Designation Criteria

- No designation criteria for this route segment.

## Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open (All modes of travel)

- Near the intersection of 1003 and 15 there is a very large pile ash and trash. Pallets must have been burned here as the ash is heavily laden with nails.

Organization, commenter: Janice Shepherd

Comment ID: 000000106-88

- Page 111 Portable Toilets and Fire Pans I believe the text is missing the crucial word "solid" in front of "human waste" for Alternatives B E. I don't think it is reasonable to expect human urine to be hauled out. Also fire pans aren't usually set up for carrying the ash so the text should be adjusted to indicate that not only will fire pans be required but the ash must also be hauled out. The text also needs clarification that fire pans and ash removal should be used for campfires even when not part of an overnight camping experience (i.e. an early evening campfire where the recreationalists are not planning on spending the night). On a recent Gunnison River canoe trip with canoes rented from a commercial operator, we were advised "Urinate in the river (not in calm water nor on wet sand or soil nor on vegetation)." That should be listed here and posted at popular put-ins (Escalante and Bridgeport). Given the rule of the use of fire pans, there should be a management action that all rock fire rings within the listed areas should be removed and those campfire areas rehabilitated as part of other development work in those areas. I guess this applies equally to campfire areas that have no rings (such as the one near the intersection of routes 15 and 1003 where a thick pile from wood pallet fires exists.) With these changes I support Alternative E. I strongly support the text about fire pans and hauling ash away. It is unfortunate but campfire rings seem to be a magnet to all forms of trash. Also there is an unfortunate tendency of some to burn wooden pallets. People doing so might not even see the harm because they consider the pallets to be wood so ok to burn. They are not taking into consideration the nails and other hardware left behind.

• The following high value recreational routes/roads are legal RS 2477 ROW's in the State of Colorado, Mesa County and the BLM does not have the jurisdiction to close them: 500, 472, 518, 521, 530, 39, 127, 572, 566, 66, 65, 148, 71, 74, 587, 595, 608, 622, 628, 635, 624, 609, 611, 706, 678, 700, 719, 726, 696, 26, 936, 847, 849, 919, 767, 824, 96, 822, 817, 950, 1021, 900, 2682, 1020, 1003, 1084, 1142, 1184, 1156, 1198, 1349, 1308, 1310, 1238, 1263, 1122, 1170, 1192, 974, 941, 1076, 1039, 1018, 1759, 1764, 1758, 1174, 1788, 1798, 1669, 1699, 1773, 1755, 1779, 1750, 1751, 1792, 1720, 1726, 1727, 1720, 1722, 1803, 1805, 1809, 1614, 1609, 1605, 1608, 1571, 1526, 1516, 1448, 755, 807, 900, 10, 48, 924, 950, 1005, 965, 8, 1115, 981, 984, 1135, 2678, 1249, 1171, 1150, 1249, 1320, 1235, 1236, 1228, 1227, 1409, 1456, 1349, 1308, 1513, 1221, 1550, 1567, 1641, 1612, 1740, 1688, 2597, 2598, 2601, 2440, 3160, 3162, 2089, 2166, 2170, 2596, 2171, 2003, 2122, 2126, 2189, 3145, 2182, 2179, 2178, 3143, 2181, 2121, 2122, 2168, 2126, 2180, 2095, 2173, 2174, 2620, 2129, 1686, 1692, 1667, 1647, 1631, 1613, 1596, 1549, 1541, 2647, 1633, 1605, 1608, 1571, 2645, 1507, 1448, 1496, 1516, 1504, 1510, 1508, 1509, 439, 431, 456, 461, 460, 391, 423, 415, 419, 407, 402, 367, 372, 339, 298, 338, 105, 368, 374, 393, 389, 390, 376, 377, 351, 350, 121, 345, 320, 301, 251, 234, 232, 205, 344, 107, 103, 152, 153, 161, 168, 3199, 188, 196, 255, 254, 236, 294, 242, 219, 201, 169, 162, 158, 160, 173. The following high value recreational routes/roads are legal RS 2477 ROW's in the State of Colorado, Delta County, and the BLM does not have the jurisdiction to close them: 3011, 2184, 2191, 3100, 2187, 2026, 2059, 2188, 2192, 3104, 2130, 3009, 2199, 2200, 2111, 2223, 2024, 3006, 2231, 3094, 2579, 2210, 2344, 2243, 2249, 2248, 3074, 2354, 2384, 2296, 2295, 2287, 2304, 2062, 2163, 3163, 2164, 2430, 4006, 3016, 2351, 3140, 2410, 4008, 2324, 2073, 2306, 2459, 3192, 3193, 2350, 2443, 2035, 2336, 2495, 2491, 2159, 3058, 2277, 2465, 2467, 3189, 2472, 2297, 2006, 2265, 2271, 2276, 2135, 2139, 3053, 2489, 3033, 3057, 2031, 2276, 2210, 2579, 2136, 2344, 3164, 2400, 2379, 3014, 2365, 3116, 2251, 2259, 2149, 2153, 2146, 2144, 2145, 2356, 2257, 2048, 2358, 3165, and 3166.

## Route: 1005

### Segment: 1955

#### Designation

##### Current Designation

Vehicles under 50" wide

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- SMAs Gibbler Mountain ACEC
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

#### Rationale

##### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Vehicles under 50" wide

**Alternative C:** Closed (Rehab)

**Alternative D:** Vehicles under 50" wide

• o The Gibbler Mountain ACEC as shown on map 2-5E does not encompass the mountain itself but only its northern slopes. I would prefer to see a non-motorized/non-mechanized ACEC for the whole of Gibbler Mountain and its surrounding slopes, bounded by the routes: 1235-1236-1228-1409-1221-15-8-887-18-17-945-547-951-959-966-969-1005-1006-1021-1022-1023-1024-1047-1150-1249, with 1269 left open to motorized use as a motorized cherry-stemmed route into the area. This would keep this wonderful roadless area (though too small a space for the inventory) roadless into the future. The text on page 871 indicates the area has one of the "best known" populations of the rare plant Grand Junction milkvetch as well as a large collection of fragile dinosaur tracks. The Special Species map from the Open House needs to be updated with this GJ milkvetch population. This ACEC representing a hole in the SRMA would properly protect all three features: roadless-ness, dinosaur tracks, and GJ milkvetch, at the cost of less than 5000 acres. This protection is consistent with this being a National Conservation Area and not a National Recreation Area. This position also has support from the D-E NCA Advisory Council. I recently hiked up to the top of the northern portion of Gibbler Mountain with a friend. We were inspired by the challenging terrain for hiking and the awesome views (photo IMG\_9998). We both had a great feeling of accomplishment when we reached the top. There is plenty of evidence of big game animals using the Gibbler Mountain as a quiet sanctuary from the surrounding motorized areas. This proposed ACEC would benefit them.

Comment ID: 00000115-32

• Gibbler Mountain Area of Critical Environmental Concern: The QTG supports Gibbler Mtn ACEC from Alt D because protections are needed for the myriad of resources found here, especially if it is going to be located within an SRMA focused on motorized use. Further, we think the ACEC should be extended to include all of Gibbler Mountain. Surface-disturbance limitations and a rule of no motorized use should be included for the full ACEC, including this recommended expansion. With this expansion the full ACEC would be bounded by: Routes: 1235-1236-1228-1409-1221-15-8-887-18-17-945-547-951-954-959-962-966-969-1005-1006-1021-1022-1023-1024-1047-1150-1249-8, with 1269, and 1173-1174-1198-1200-1193 cherry-stemmed into the area. The reasons we support this designation are as follows: Roadless areas are an endangered resource in the high-desert west. Categorically, roadless areas especially within NCAs- should be protected as such. By making it a larger area not only does it protect this roadless area but also it better disguises the location of the dinosaur tracks and fossils which we see from page 872," are regionally significant and easily damaged". Per page 871, "This site also supports one of the best known occurrences (A-ranked) of Grand Junction milkvetch (*Astragalus linifolius*), a globally vulnerable plant (G3/S3) and a BLM sensitive plant species." Map 3-13 needs to be updated to show the presence of Grand Junction milkvetch and Colorado Hookless cactus as the text on page 871 indicates both are present in this area. A recent hike in this area shows prolific big game use in the area, we assume it is their refuge from surrounding motorized use. Recent hikes have confirmed the presence of Ponderosa Pine atop Gibbler Mtn. This designation would aid in increasing the number of healthy Ponderosa Pines within the NCA, an action which would be in accordance with the Alternative E management objective on page 52. o Map 3-3 needs to be updated to reference the presence of Ponderosa Pine in this area. The designation of this expanded ACEC in the final plan, would address the need for non-motorized trails in this portion of the NCA, an opportunity currently missing from the draft plan. And to reiterate, these protections are needed for the myriad of resources found here, especially because they are to be located within an SRMA focused on motorized use

- o The Gibbler Mountain ACEC as shown on map 2-5E does not encompass the mountain itself but only its northern slopes. I would prefer to see a non-motorized/non-mechanized ACEC for the whole of Gibbler Mountain and its surrounding slopes, bounded by the routes: 1235-1236-1228-1409-1221-15-8-887-18-17-945-547-951-959-966-969-1005-1006-1021-1022-1023-1024-1047-1150-1249, with 1269 left open to motorized use as a motorized cherry-stemmed route into the area. This would keep this wonderful roadless area (though too small a space for the inventory) roadless into the future. The text on page 871 indicates the area has one of the "best known" populations of the rare plant Grand Junction milkvetch as well as a large collection of fragile dinosaur tracks. The Special Species map from the Open House needs to be updated with this GJ milkvetch population. This ACEC representing a hole in the SRMA would properly protect all three features: roadless-ness, dinosaur tracks, and GJ milkvetch, at the cost of less than 5000 acres. This protection is consistent with this being a National Conservation Area and not a National Recreation Area. This position also has support from the D-E NCA Advisory Council. I recently hiked up to the top of the northern portion of Gibbler Mountain with a friend. We were inspired by the challenging terrain for hiking and the awesome views (photo IMG\_9998). We both had a great feeling of accomplishment when we reached the top. There is plenty of evidence of big game animals using the Gibbler Mountain as a quiet sanctuary from the surrounding motorized areas. This proposed ACEC would benefit them.

Comment ID: 000000115-32

- o Gibbler Mountain Area of Critical Environmental Concern: The QTG supports Gibbler Mtn ACEC from Alt D because protections are needed for the myriad of resources found here, especially if it is going to be located within an SRMA focused on motorized use. Further, we think the ACEC should be extended to include all of Gibbler Mountain. Surface-disturbance limitations and a rule of no motorized use should be included for the full ACEC, including this recommended expansion. With this expansion the full ACEC would be bounded by: Routes: 1235-1236-1228-1409-1221-15-8-887-18-17-945-547-951-954-959-962-966-969-1005-1006-1021-1022-1023-1024-1047-1150-1249-8, with 1269, and 1173-1174-1198-1200-1193 cherry-stemmed into the area. The reasons we support this designation are as follows: Roadless areas are an endangered resource in the high-desert west. Categorically, roadless areas especially within NCAs- should be protected as such. By making it a larger area not only does it protect this roadless area but also it better disguises the location of the dinosaur tracks and fossils which we see from page 872," are regionally significant and easily damaged". Per page 871, "This site also supports one of the best known occurrences (A-ranked) of Grand Junction milkvetch (Astragalus limifolius), a globally vulnerable plant (G3/S3) and a BLM sensitive plant species."o Map 3-13 needs to be updated to show the presence of Grand Junction milkvetch and Colorado Hookless cactus as the text on page 871 indicates both are present in this area. A recent hike in this area shows prolific big game use in the area, we assume it is their refuge from surrounding motorized use. Recent hikes have confirmed the presence of Ponderosa Pine atop Gibbler Mtn. This designation would aid in increasing the number of healthy Ponderosa Pines within the NCA, an action which would be in accordance with the Alternative E management objective on page 52. o Map 3-3 needs to be updated to reference the presence of Ponderosa Pine in this area. The designation of this expanded ACEC in the final plan, would address the need for non-motorized trails in this portion of the NCA, an opportunity currently missing from the draft plan. And to reiterate, these protections are needed for the myriad of resources found here, especially because they are to be located within an SRMA focused on motorized use

## Public Comments on Route: 1017

Organization, commenter: Western Slope ATV Association, Steve Chapel

Comment ID: 000000089-13

- The route with numbers 933, to 1105, to 1110, to 1017, to 998 had been an important route for ATV use. At the end of it a connection can be made without equipment to extend it over to route 52 and create a great loop. We know this because we have made the short walk between the two routes. This had been explained to BLM. The map shows it with a dotted line which indicates closed until mitigated. This is not acceptable nor necessary. It is also confusing because there is a bicycle emblem on the route.

Organization, commenter: Quiet Trails Group, Sherry Schenk

Comment ID: 000000115-79

- [Re: Cactus Park SRMA] The QTG believes the shape of the SRMA should be adjusted on the east corner to avoid any overlap with the Bighorn sheep productive area. From page 69 we see that Alt E has no new motorized routes being created in Bighorn Sheep Productive area. The purpose behind the Cactus Park SRMA is to manage the creation of new ATV routes. So overlapping the 2 areas does not make sense. This concern has been shared with the Advisory Council. The proposed action on page 69 to deal with fragmentation and un-fragmentation of Bighorn Sheep summer concentration areas is too complex and will likely not be satisfactory given the habit-forming tendencies of Bighorn Sheep. Instead, Cactus Park SRMA should be reduced to not include the portion that overlaps the Winter/Summer range of Bighorn Sheep. In addition to simplifying the management, this will also address the concern that motorized recreation should not take priority over other resources in that area, which are not limited to Bighorn Sheep. BLM could consider incorporating this area into the Ninemile Hill ERMA with the caveat that the Alt E motorized routes in the area 847-848-830, 998-1017-1110-1108-993-995-1123-1129-1170-1169-1192-941 would be left as designated in Alt E (some full motorized, some ATV). The QTG is quite concerned about the SRMA status for this landscape. While we hope that a network of quality ATV routes will diminish the number of new user-created routes developing per year, we are very concerned about the prioritization of recreation over the myriad of other resources which are present in a high-density within this sensitive landscape. We think that Congress - in the Omnibus Act that created the NCA - had envisioned a balanced approach to "long-term conservation and protection of unique and important values" where recreation was supposed to have the same priority as other values. We would like to see more explicit protections of resources.

- [ED: Following are the text (in quotes) and the D-E NCA Recreation Planner's interpretation of what the commenter wrote on the maps they submitted during public scoping for the Dominguez RMP. The Rec Planner also identified the route numbers highlighted on the maps]: Routes 741 and 848 "needs ATV connector. Cultural sites can easily be avoided by the 50 foot policy." Routes 26 and 1017 "needs ATV connector." Route 941 "must remain open." Route 1017 "should be ATV route." There should be an "ATV connect" between routes 1198 and 1263. The following text was highlighted in orange "Highlighted routes are routes used often by WSATVA and other ATVs." in addition to all the routes mentioned previously, the following routes were highlighted in orange: 743, 97, 96, 26, 813, 842, 15, 847, 1393, 1192, 1292. [ED: On a second map, the commenter highlighted additional routes]: The following are "routes used often by WSATVA": 1516, 1571, 1605, 1633, 15, 1641, 1221. "SC-5" connecting routes 1605 and 1633 " and "SC-6" connecting routes 1516 and 1605 "need to become new ATV routes connecting these deadends." [ED: A map of the Gibbler Mountain area had additional text and routes]. "Highlighted routes" which "are often used by WSATVA 3 seasons" are as follows: 1235, 1221, 1409, 1310, 1263, 1198, 15. Route 1235 [is or should be] "an ATV route."

## Route: 1018

### Segment: 1931

### Designation ?

#### Current Designation

Closed (Rehab)

#### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

#### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- WILDLIFE Big game production areas
- CULTURAL Cultural Class I low
- SMA's Lands with wilderness characteristics
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, Bighorn – SSR -- summer range, Bighorn - production area

### Rationale for Decision

- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range
- Route was designated to reduce the miles of motorized and mechanized routes in bighorn sheep habitat.

Organization, commenter: Janice Shepherd

Comment ID: 000000106-247

• For the Gunnison Slopes it is not sufficient to rely on topology to protect the area from user-created road intrusions. You can see that from the existence of routes 1039, 1018 and 1019. At the very least to protect Gunnison Slopes a locked gate and fencing should be added at the intersection of routes 941 and 1192. The protection of the bighorn sheep production area is paramount to the long-term health and well-being of the bighorn sheep herds.

Organization, commenter: COPMOBA, Scott Winans

Comment ID: 000000168-3

• Nine Mile Hill We [COPMOBA] recommend incorporating mountain bike use into the planned Quiet Use area along the rim of Nine Mile Hill. The popular Tabeguacbe Trail is in this area. Horse and foot travel have similar impacts in areas not adjacent to a population center so conflicts should be minimal. We recommend administrative road (#unknown but has spurs 1076, 1039, 1018 and 1051 ) bordering the most northern portion of the Wilderness be left open to mountain bikes. We feel allowing mountain bike use will cause minimal resource damage on an administrative road

• The following high value recreational routes/roads are legal RS 2477 ROW's in the State of Colorado, Mesa County and the BLM does not have the jurisdiction to close them: 500, 472, 518, 521, 530, 39, 127, 572, 566, 66, 65, 148, 71, 74, 587, 595, 608, 622, 628, 635, 624, 609, 611, 706, 678, 700, 719, 726, 696, 26, 936, 847, 849, 919, 767, 824, 96, 822, 817, 950, 1021, 900, 2682, 1020, 1003, 1084, 1142, 1184, 1156, 1198, 1349, 1308, 1310, 1238, 1263, 1122, 1170, 1192, 974, 941, 1076, 1039, 1018, 1759, 1764, 1758, 1174, 1788, 1798, 1669, 1699, 1773, 1755, 1779, 1750, 1751, 1792, 1720, 1726, 1727, 1720, 1722, 1803, 1805, 1809, 1614, 1609, 1605, 1608, 1571, 1526, 1516, 1448, 755, 807, 900, 10, 48, 924, 950, 1005, 965, 8, 1115, 981, 984, 1135, 2678, 1249, 1171, 1150, 1249, 1320, 1235, 1236, 1228, 1227, 1409, 1456, 1349, 1308, 1513, 1221, 1550, 1567, 1641, 1612, 1740, 1688, 2597, 2598, 2601, 2440, 3160, 3162, 2089, 2166, 2170, 2596, 2171, 2003, 2122, 2126, 2189, 3145, 2182, 2179, 2178, 3143, 2181, 2121, 2122, 2168, 2126, 2180, 2095, 2173, 2174, 2620, 2129, 1686, 1692, 1667, 1647, 1631, 1613, 1596, 1549, 1541, 2647, 1633, 1605, 1608, 1571, 2645, 1507, 1448, 1496, 1516, 1504, 1510, 1508, 1509, 439, 431, 456, 461, 460, 391, 423, 415, 419, 407, 402, 367, 372, 339, 298, 338, 105, 368, 374, 393, 389, 390, 376, 377, 351, 350, 121, 345, 320, 301, 251, 234, 232, 205, 344, 107, 103, 152, 153, 161, 168, 3199, 188, 196, 255, 254, 236, 294, 242, 219, 201, 169, 162, 158, 160, 173. The following high value recreational routes/roads are legal RS 2477 ROW's in the State of Colorado, Delta County, and the BLM does not have the jurisdiction to close them: 3011, 2184, 2191, 3100, 2187, 2026, 2059, 2188, 2192, 3104, 2130, 3009, 2199, 2200, 2111, 2223, 2024, 3006, 2231, 3094, 2579, 2210, 2344, 2243, 2249, 2248, 3074, 2354, 2384, 2296, 2295, 2287, 2304, 2062, 2163, 3163, 2164, 2430, 4006, 3016, 2351, 3140, 2410, 4008, 2324, 2073, 2306, 2459, 3192, 3193, 2350, 2443, 2035, 2336, 2495, 2491, 2159, 3058, 2277, 2465, 2467, 3189, 2472, 2297, 2006, 2265, 2271, 2276, 2135, 2139, 3053, 2489, 3033, 3057, 2031, 2276, 2210, 2579, 2136, 2344, 3164, 2400, 2379, 3014, 2365, 3116, 2251, 2259, 2149, 2153, 2146, 2144, 2145, 2356, 2257, 2048, 2358, 3165, and 3166.

## Route: 1019

### Segment: 1910

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- WILDLIFE Big game production areas
- CULTURAL Cultural Class I low
- SMAs Lands with wilderness characteristics
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, Bighorn – SSR – summer range, Bighorn - production area

##### Rationale for Decision

- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range
- Route was designated to reduce the miles of motorized and mechanized routes in bighorn sheep habitat.

#### Previous Alternatives Analyzed

**Alternative A:** Vehicles under 50" wide

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments on Route: 1019

Organization, commenter: Janice Shepherd

Comment ID: 000000106-247

- For the Gunnison Slopes it is not sufficient to rely on topology to protect the area from user-created road intrusions. You can see that from the existence of routes 1039, 1018 and 1019. At the very least to protect Gunnison Slopes a locked gate and fencing should be added at the intersection of routes 941 and 1192. The protection of the bighorn sheep production area is paramount to the long-term health and well-being of the bighorn sheep herds.

## Route: 102

### Segment: 2345

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- CULTURAL Cultural Indirect impact
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

#### Rationale

##### Designation Criteria

- **Minimize Damage:** NHT – close routes for setting
- **Minimize Harassment:** PPSV- Minimize fragmentation

##### Rationale for Decision

- Route was designated to improve natural setting along the Old Spanish National Historic Trail.
- Route was designated to reduce fragmentation in Priority Vegetation types

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments on Route: 102

Organization, commenter: Janice Shepherd

Comment ID: 000000106-209

- Alt E's closure of duplicate and braided routes: There are many short braided routes like 102, 112, 120, and 349 throughout the NCA. I support the closing and rehabbing of them if they don't lead to nice dispersed campsites. Hiking passed them makes me think that no one cares about proper planning (if I didn't know the history of their creation). Duplicated braided routes are just eating up the area, damaging vegetation in areas where it is such a struggle for vegetation to survive. Now that this is an NCA, I support the BLM's intent in Alt E to close and re-vegetate such braided routes. I believe it is important to show respect for the protection of the land and its beauty by minimizing routes to those that are useful and fun and eliminating such unnecessary braids.

## Route: 1020

### Segment: 1948

#### Designation

##### Current Designation

Admin/Permitted Use Only

##### Mitigation Criteria

- Needs Data - Cultural

##### Planning Criteria

- RECREATION Recreation access to dispersed campsite
- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Indirect impact
- SMAs Gibbler Mountain ACEC
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- SSPLANT Special Status Species sensitive species planes
- VEGETATION Sagebrush patches >60 acres

#### Rationale

##### Designation Criteria

- **Minimize Damage:** SS Plants-SSR within 100m
- **Minimize Harassment:** Big game winter range – close
- **Wilderness / Natural Area:** ACEC – Gibbler- PSD paleo

##### Rationale for Decision

- Route was designated to ensure access to rights-of-way, private property, and livestock grazing facilities.

#### Previous Alternatives Analyzed

- Alternative A:** Open (All modes of travel)
- Alternative B:** Admin/Permitted Use Only
- Alternative C:** Admin/Permitted Use Only

• Now that the mine has been sealed up (photo IMG\_9997) routes 1020-1029-1041-1064-1080-1113-979 should be closed. I recently hiked the road with a friend. The upper reaches are deteriorating (photos IMG\_9994, IMG\_9995).

o The Gibbler Mountain ACEC as shown on map 2-5E does not encompass the mountain itself but only its northern slopes. I would prefer to see a non-motorized/non-mechanized ACEC for the whole of Gibbler Mountain and its surrounding slopes, bounded by the routes: 1235-1236-1228-1409-1221-15-8-887-18-17-945-547-951-959-966-969-1005-1006-1021-1022-1023-1024-1047-1150-1249, with 1269 left open to motorized use as a motorized cherry-stemmed route into the area. This would keep this wonderful roadless area (though too small a space for the inventory) roadless into the future. The text on page 871 indicates the area has one of the "best known" populations of the rare plant Grand Junction milkvetch as well as a large collection of fragile dinosaur tracks. The Special Species map from the Open House needs to be updated with this GJ milkvetch population. This ACEC representing a hole in the SRMA would properly protect all three features: roadless-ness, dinosaur tracks, and GJ milkvetch, at the cost of less than 5000 acres. This protection is consistent with this being a National Conservation Area and not a National Recreation Area. This position also has support from the D-E NCA Advisory Council. I recently hiked up to the top of the northern portion of Gibbler Mountain with a friend. We were inspired by the challenging terrain for hiking and the awesome views (photo IMG\_9998). We both had a great feeling of accomplishment when we reached the top. There is plenty of evidence of big game animals using the Gibbler Mountain as a quiet sanctuary from the surrounding motorized areas. This proposed ACEC would benefit them.

Gibbler Mountain Area of Critical Environmental Concern: The QTG supports Gibbler Mtn ACEC from Alt D because protections are needed for the myriad of resources found here, especially if it is going to be located within an SRMA focused on motorized use. Further, we think the ACEC should be extended to include all of Gibbler Mountain. Surface-disturbance limitations and a rule of no motorized use should be included for the full ACEC, including this recommended expansion. With this expansion the full ACEC would be bounded by: Routes: 1235-1236-1228-1409-1221-15-8-887-18-17-945-947-951-954-959-962-966-969-1005-1006-1021-1022-1023-1024-1047-1150-1249-8, with 1269, and 1173-1174-1198-1200-1193 cherry-stemmed into the area. The reasons we support this designation are as follows: Roadless areas are an endangered resource in the high-desert west. Categorically, roadless areas especially within NCAs- should be protected as such. By making it a larger area not only does it protect this roadless area but also it better disguises the location of the dinosaur tracks and fossils which we see from page 872," are regionally significant and easily damaged". Per page 871, "This site also supports one of the best known occurrences (A-ranked) of Grand Junction milkvetch (Astragalus linifolius), a globally vulnerable plant (G3/S3) and a BLM sensitive plant species."o Map 3-13 needs to be updated to show the presence of Grand Junction milkvetch and Colorado Hookless cactus as the text on page 871 indicates both are present in this area. A recent hike in this area shows prolific big game use in the area, we assume it is their refuge from surrounding motorized use. Recent hikes have confirmed the presence of Ponderosa Pine atop Gibbler Mtn. This designation would aid in increasing the number of healthy Ponderosa Pines within the NCA, an action which would be in accordance with the Alternative E management objective on page 52. o Map 3-3 needs to be updated to reference the presence of Ponderosa Pine in this area. The designation of this expanded ACEC in the final plan, would address the need for non-motorized trails in this portion of the NCA, an opportunity currently missing from the draft plan. And to reiterate, these protections are needed for the myriad of resources found here, especially because they are to be located within an SRMA focused on motorized use

## Route: 1022

### Segment: 1923

#### Designation

##### Current Designation

Vehicles under 50" wide

##### Mitigation Criteria

- Steep slopes

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- SOIL Soils Steep Slopes 40%
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E
- VEGETATION Sagebrush patches <60 acres

#### Rationale

##### Designation Criteria

- Recreation:** RMA objectives, Rec opportunities – general
- Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed, seek re-route or mitigation

- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

### Rationale

#### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

#### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

- o The Gibbler Mountain ACEC as shown on map 2-5E does not encompass the mountain itself but only its northern slopes. I would prefer to see a non-motorized/non-mechanized ACEC for the whole of Gibbler Mountain and its surrounding slopes, bounded by the routes: 1235-1236-1228-1409-1221-15-8-887-18-17-945-547-951-959-966-969-1005-1006-1021-1022-1023-1024-1047-1150-1249-8, with 1269 left open to motorized use as a motorized cherry-stemmed route into the area. This would keep this wonderful roadless area (though too small a space for the inventory) roadless into the future. The text on page 871 indicates the area has one of the "best known" populations of the rare plant Grand Junction milkvetch as well as a large collection of fragile dinosaur tracks. The Special Species map from the Open House needs to be updated with this GJ milkvetch population. This ACEC representing a hole in the SRMA would properly protect all three features: roadless-ness, dinosaur tracks, and GJ milkvetch, at the cost of less than 5000 acres. This protection is consistent with this being a National Conservation Area and not a National Recreation Area. This position also has support from the D-E NCA Advisory Council. I recently hiked up to the top of the northern portion of Gibbler Mountain with a friend. We were inspired by the challenging terrain for hiking and the awesome views (photo IMG\_9998). We both had a great feeling of accomplishment when we reached the top. There is plenty of evidence of big game animals using the Gibbler Mountain as a quiet sanctuary from the surrounding motorized areas. This proposed ACEC would benefit them.

Comment ID: 00000115-32

- Gibbler Mountain Area of Critical Environmental Concern: The QTG supports Gibbler Mtn ACEC from Alt D because protections are needed for the myriad of resources found here, especially if it is going to be located within an SRMA focused on motorized use. Further, we think the ACEC should be extended to include all of Gibbler Mountain. Surface-disturbance limitations and a rule of no motorized use should be included for the full ACEC, including this recommended expansion. With this expansion the full ACEC would be bounded by: Routes: 1235-1236-1228-1409-1221-15-8-887-18-17-945-947-951-954-959-962-966-969-1005-1006-1021-1022-1023-1024-1047-1150-1249-8, with 1269, and 1173-1174-1198-1200-1193 cherry-stemmed into the area. The reasons we support this designation are as follows: Roadless areas are an endangered resource in the high-desert west. Categorically, roadless areas especially within NCAs- should be protected as such. By making it a larger area not only does it protect this roadless area but also it better disguises the location of the dinosaur tracks and fossils which we see from page 872," are regionally significant and easily damaged". Per page 871, "This site also supports one of the best known occurrences (A-ranked) of Grand Junction milkvetch (Astragalus linifolius), a globally vulnerable plant (G3/S3) and a BLM sensitive plant species."o Map 3-13 needs to be updated to show the presence of Grand Junction milkvetch and Colorado Hookless cactus as the text on page 871 indicates both are present in this area. A recent hike in this area shows prolific big game use in the area, we assume it is their refuge from surrounding motorized use. Recent hikes have confirmed the presence of Ponderosa Pine atop Gibbler Mtn. This designation would aid in increasing the number of healthy Ponderosa Pines within the NCA, an action which would be in accordance with the Alternative E management objective on page 52. o Map 3-3 needs to be updated to reference the presence of Ponderosa Pine in this area. The designation of this expanded ACEC in the final plan, would address the need for non-motorized trails in this portion of the NCA, an opportunity currently missing from the draft plan. And to reiterate, these protections are needed for the myriad of resources found here, especially because they are to be located within an SRMA focused on motorized use

## Route: 1025

### Segment: 1940

### Designation [?](#)

#### Current Designation

Closed (Rehab)

#### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

#### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- SMAs Gibbler Mountain ACEC
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- SSPLANT Special Status Species sensitive species planes
- VEGETATION Sagebrush patches >60 acres

## Rationale

### Designation Criteria

- **Minimize Damage:** SS Plants-SSR within 100m
- **Minimize Harassment:** Big game winter range – close, PPSV- Minimize fragmentation
- **Wilderness / Natural Area:** ACEC – Gibbler- PSD paleo

### Rationale for Decision

- Route was designated to protect and enhance special status fish, wildlife, and plant populations.
- Route was designated to protect big game winter range
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect important paleontological resources within the Gibbler Mountain ACEC

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Indirect impact
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches >60 acres

## Rationale

### Designation Criteria

- **Minimize Damage:** Cultural – SSR within 100m sites
- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, Sage-Minimize fragmentation, GUSG –PSD in winter habitat

### Rationale for Decision

- Route was designated to minimize impacts to cultural resources.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range
- Route was designated to reduce fragmentation of sagebrush patches
- Route was designated to minimize fragmentation of Gunnison sage-grouse habitat.

## Route: 1037

### Segment: 1891

#### Designation

##### Current Designation

Admin/Permitted Use Only

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation access to dispersed campsite
- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- SMAAs Lands with wilderness characteristics
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- Minimize Damage:** Fragile soils SSR
- Minimize Harassment:** Bighorn - production area, Big game winter range – close, Bighorn – SSR -- summer range, PPSV- Minimize fragmentation

##### Rationale for Decision

- Route was designated to ensure access to rights-of-way, private property, and livestock grazing facilities.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Admin/Permitted Use Only

**Alternative D:** Admin/Permitted Use Only

## Public Comments on Route: 1037

- No public comments for this Route

## Route: 1038

### Segment: 1909

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density medium in Alt A
- DENSITY Route density medium in Alt E

#### Rationale

##### Designation Criteria

- Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close

##### Rationale for Decision

- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range

#### Previous Alternatives Analyzed

**Alternative A:** Vehicles under 50" wide

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments on Route: 1038

- No public comments for this Route

## Route: 1039

### Segment: 1930

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- WILDLIFE Big game production areas
- CULTURAL Cultural Class I low
- SMA Lands with wilderness characteristics
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, Bighorn – SSR -- summer range, Bighorn - production area

##### Rationale for Decision

- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range
- Route was designated to reduce the miles of motorized and mechanized routes in bighorn sheep habitat.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments on Route: 1039

Organization, commenter: Brandon Siegfried

Comment ID: 000000068-3

The following high value recreational routes/roads are legal ROW's in the State of Colorado, Mesa County and the BLM does not have the jurisdiction to close them: 500, 472, 518, 521, 530, 39, 127, 572, 566, 66, 65, 148, 71, 74, 587, 595, 608, 622, 628, 635, 624, 609, 611, 706, 678, 700, 719, 726, 696, 26, 936, 847, 849, 919, 767, 824, 96, 822, 817, 950, 1021, 900, 2682, 1020, 1003, 1084, 1142, 1184, 1156, 1198, 1349, 1308, 1310, 1238, 1263, 1122, 1170, 1192, 974, 941, 1076, 1039, 1018, 1759, 1764, 1758, 1174, 1788, 1798, 1669, 1699, 1773, 1755, 1779, 1750, 1751, 1792, 1720, 1726, 1727, 1720, 1722, 1803, 1805, 1809, 1614, 1609, 1605, 1608, 1571, 1526, 1516, 1448, 755, 807, 900, 10, 48, 924, 950, 1005, 965, 8, 1115, 981, 984, 1135, 2678, 1249, 1171, 1150, 1249, 1320, 1235, 1236, 1228, 1227, 1409, 1456, 1349, 1308, 1513, 1221, 1550, 1567, 1641, 1612, 1740, 1688, 2597, 2598, 2601, 2440, 3160, 3162, 2089, 2166, 2170, 2596, 2171, 2003, 2122, 2126, 2189, 3145, 2182, 2179, 2178, 3143, 2181, 2121, 2122, 2168, 2126, 2180, 2095, 2173, 2174, 2620, 2129, 1686, 1692, 1667, 1647, 1631, 1613, 1596, 1549, 1541, 2647, 1633, 1605, 1608, 1571, 2645, 1507, 1448, 1496, 1516, 1504, 1510, 1508, 1509, 439, 431, 456, 461, 460, 391, 423, 415, 419, 407, 402, 367, 372, 339, 298, 338, 105, 368, 374, 393, 389, 390, 376, 377, 351, 350, 121, 345, 320, 301, 251, 234, 232, 205, 344, 107, 103, 152, 153, 161, 168, 3199, 188, 196, 255, 254, 236, 294, 242, 219, 201, 169, 162, 158, 160, 173. The following high value recreational routes/roads are legal ROW's in the State of Colorado, Delta County, and the BLM does not have the jurisdiction to close them: 3011, 2184, 2191, 3100, 2187, 2026, 2059, 2188, 2192, 3104, 2130, 3009, 2199, 2200, 2111, 2223, 2024, 3006, 2231, 3094, 2579, 2210, 2344, 2243, 2249, 2248, 3074, 2354, 2384, 2296, 2295, 2287, 2304, 2062, 2163, 3163, 2164, 2430, 4006, 3016, 2351, 3140, 2410, 4008, 2324, 2073, 2306, 2459, 3192, 3193, 2350, 2443, 2035, 2336, 2495, 2491, 2159, 3058, 2277, 2465, 2467, 3189, 2472, 2297, 2006, 2265, 2271, 2276, 2135, 2139, 3053, 2489, 3033, 3057, 2031, 2276, 2210, 2579, 2136, 2344, 3164, 2400, 2379, 3014, 2365, 3116, 2251, 2259, 2149, 2153, 2146, 2144, 2145, 2356, 2257, 2048, 2358, 3165, and 3166.

Organization, commenter: Janice Shepherd

Comment ID: 000000106-247

For the Gunnison Slopes it is not sufficient to rely on topology to protect the area from user-created road intrusions. You can see that from the existence of routes 1039, 1018 and 1019. At the very least to protect Gunnison Slopes a locked gate and fencing should be added at the intersection of routes 941 and 1192. The protection of the bighorn sheep production area is paramount to the long-term health and well-being of the bighorn sheep herds.

Organization, commenter: COPMOBA, Scott Winans

Comment ID: 000000168-3

Nine Mile HillWe [COPMOBA] recommend incorporating mountain bike use into the planned Quiet Use area along the rim of Nine Mile Hill. The popular Tabeguache Trail is in this area. Horse and foot travel have similar impacts in areas not adjacent to a populat center so conflicts should be minimal. We recommend administrative road (#unknown but has spurs 1076, 1039, 1018 and 1051 ) bordering the most northern portion of the Wilderness be left open to mountain bikes. We feel allowing mountain bike use will cause minimal resource damage on an administrati ve road

## Route: 104

### Segment: 2339

#### Designation

##### Current Designation

Open (All modes of travel)

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- CULTURAL Cultural Indirect impact
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

## Rationale

### Designation Criteria

- **No designation criteria for this route segment.**

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open (All modes of travel)

**Alternative C:** Admin/Permitted Use Only

**Alternative D:** Foot/Horse/Mechanized (but still open to motorized for admin/permitted access)

## Public Comments on Route: 104

## Route: 1040

### Segment: 1890

### Designation [?](#)

#### Current Designation

Closed (Rehab)

#### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

#### Planning Criteria

- RECREATION Recreation access to dispersed campsite
- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I low
- SMAs Gibbler Mountain ACEC
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- SSPLANT Special Status Species sensitive species planes
- VEGETATION Sagebrush patches >60 acres

## Rationale

### Designation Criteria

- **Minimize Damage:** SS Plants-SSR within 100m
- **Minimize Harassment:** Big game winter range – close, PPSV- Minimize fragmentation, Sage-Minimize fragmentation
- **Wilderness / Natural Area:** ACEC – Gibbler- PSD paleo

### Rationale for Decision

- Route was designated to protect and enhance special status fish, wildlife, and plant populations.
- Route was designated to protect big game winter range
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to reduce fragmentation of sagebrush patches
- Route was designated to protect important paleontological resources within the Gibbler Mountain ACEC

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Admin/Permitted Use Only

Comment ID: 00000106-217

- Now that the mine has been sealed up (photo IMG\_9997) routes 1020-1029-1041-1064-1080-1113-979 should be closed. I recently hiked the road with a friend. The upper reaches are deteriorating (photos IMG\_9994, IMG\_9995).

## Public Comments on Route: 1047

Organization, commenter: Janice Shepherd

Comment ID: 00000106-110

• o The Gibbler Mountain ACEC as shown on map 2-5E does not encompass the mountain itself but only its northern slopes. I would prefer to see a non-motorized/non-mechanized ACEC for the whole of Gibbler Mountain and its surrounding slopes, bounded by the routes: 1235-1236-1228-1409-1221-15-8-887-18-17-945-547-951-959-966-969-1005-1006-1021-1022-1023-1024-1047-1150-1249, with 1269 left open to motorized use as a motorized cherry-stemmed route into the area. This would keep this wonderful roadless area (though too small a space for the inventory) roadless into the future. The text on page 871 indicates the area has one of the "best known" populations of the rare plant Grand Junction milkvetch as well as a large collection of fragile dinosaur tracks. The Special Species map from the Open House needs to be updated with this GJ milkvetch population. This ACEC representing a hole in the SRMA would properly protect all three features: roadless-ness, dinosaur tracks, and GJ milkvetch, at the cost of less than 5000 acres. This protection is consistent with this being a National Conservation Area and not a National Recreation Area. This position also has support from the D-E NCA Advisory Council. I recently hiked up to the top of the northern portion of Gibbler Mountain with a friend. We were inspired by the challenging terrain for hiking and the awesome views (photo IMG\_9998). We both had a great feeling of accomplishment when we reached the top. There is plenty of evidence of big game animals using the Gibbler Mountain as a quiet sanctuary from the surrounding motorized areas. This proposed ACEC would benefit them.

Organization, commenter: Quiet Trails Group, Sherry Schenk

Comment ID: 00000115-32

• Gibbler Mountain Area of Critical Environmental Concern: The QTG supports Gibbler Mtn ACEC from Alt D because protections are needed for the myriad of resources found here, especially if it is going to be located within an SRMA focused on motorized use. Further, we think the ACEC should be extended to include all of Gibbler Mountain. Surface-disturbance limitations and a rule of no motorized use should be included for the full ACEC, including this recommended expansion. With this expansion the full ACEC would be bounded by: Routes: 1235-1236-1228-1409-1221-15-8-887-18-17-945-947-951-954-959-962-966-969-1005-1006-1021-1022-1023-1024-1047-1150-1249-8, with 1269, and 1173-1174-1198-1200-1193 cherry-stemmed into the area. The reasons we support this designation are as follows: Roadless areas are an endangered resource in the high-desert west. Categorically, roadless areas especially within NCAs- should be protected as such. By making it a larger area not only does it protect this roadless area but also it better disguises the location of the dinosaur tracks and fossils which we see from page 872," are regionally significant and easily damaged". Per page 871, "This site also supports one of the best known occurrences (A-ranked) of Grand Junction milkvetch (Astragalus linifolius), a globally vulnerable plant (G3/S3) and a BLM sensitive plant species."o Map 3-13 needs to be updated to show the presence of Grand Junction milkvetch and Colorado Hookless cactus as the text on page 871 indicates both are present in this area. A recent hike in this area shows prolific big game use in the area, we assume it is their refuge from surrounding motorized use. Recent hikes have confirmed the presence of Ponderosa Pine atop Gibbler Mtn. This designation would aid in increasing the number of healthy Ponderosa Pines within the NCA, an action which would be in accordance with the Alternative E management objective on page 52. o Map 3-3 needs to be updated to reference the presence of Ponderosa Pine in this area. The designation of this expanded ACEC in the final plan, would address the need for non-motorized trails in this portion of the NCA, an opportunity currently missing from the draft plan. And to reiterate, these protections are needed for the myriad of resources found here, especially because they are to be located within an SRMA focused on motorized use

## Route: 1048

### Segment: 1900

#### Designation [?](#)

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation access to dispersed campsite
- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density highest in Alt A

- DENSITY Route density medium in Alt E

## Rationale

### Designation Criteria

- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close

### Rationale for Decision

- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range

## Previous Alternatives Analyzed

**Alternative A:** Vehicles under 50" wide

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments on Route: 1048

- No public comments for this Route

## Route: 1049

### Segment: 1874

#### Designation

##### Current Designation

Open (All modes of travel)

##### Mitigation Criteria

- Needs Data - Cultural

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches >60 acres

## Rationale

### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities - specific

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open (All modes of travel)

**Alternative C:** Open (All modes of travel)

**Alternative D:** Closed (Rehab)

## Public Comments on Route: 1049

- No public comments for this Route

## Route: 105

### Segment: 2410

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- RIPARIAN Riparian 15 stream crossings
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

## Rationale

### Designation Criteria

- **Minimize Damage:** Riparian—ephemeral streams SSR 30 m, NHT – close routes for setting
- **Minimize Harassment:** PPSV- Minimize fragmentation

### Rationale for Decision

- Route was designated to minimize travel routes in and crossing riparian and wetland areas.
- Route was designated to improve natural setting along the Old Spanish National Historic Trail.
- Route was designated to reduce fragmentation in Priority Vegetation types

## Previous Alternatives Analyzed

**Alternative A:** Foot/Horse/Mechanized/Motorcycle

## Public Comments On Route: 1051

Organization, commenter: COPMOBA, Scott Winans

Comment ID: 000000168-3

- Nine Mile HillWe [COPMOBA]recommend incorporating mountain bike use into the planned Quiet Use area along the rim of Nine Mile Hill. The popular Tabeguache Trail is in this area. Horse and foot travel have similar impacts in areas not adjacent to a population center so conflicts should be minimal.We recommend administrative road (#unknown but has spurs 1076, 1039, 1018 and 1051 ) bordering the most northern portion of the Wilderness be left open to mountain bikes. We feel allowing mountain bike use will cause minimal resource damage on an administrative road

#### Rationale

##### Designation Criteria

- **Minimize Damage:** SS Plants-SSR within 100m
- **Minimize Harassment:** Big game winter range – close, PPSV- Minimize fragmentation
- **Wilderness / Natural Area:** ACEC – Gibbler- PSD paleo

##### Rationale for Decision

- Route was designated to protect and enhance special status fish, wildlife, and plant populations.
- Route was designated to protect big game winter range
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect important paleontological resources within the Gibbler Mountain ACEC

### Previous Alternatives Analyzed

**Alternative A:** Vehicles under 50" wide

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

### Public Comments on Route: 1058

- No public comments for this Route

### Route: 1059

#### Segment: 1863

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- SMAs Gibbler Mountain ACEC

- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- SSPLANT Special Status Species sensitive species planes

## Rationale

### Designation Criteria

- **Minimize Damage:** SS Plants-SSR within 100m
- **Minimize Harassment:** Big game winter range – close, PPSV- Minimize fragmentation
- **Wilderness / Natural Area:** ACEC – Gibbler- PSD paleo

### Rationale for Decision

- Route was designated to protect and enhance special status fish, wildlife, and plant populations.
- Route was designated to protect big game winter range
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect important paleontological resources within the Gibbler Mountain ACEC

**Alternative D:** Closed (Rehab)

## Public Comments on Route: 1059

- No public comments for this Route

## Route: 106

### Segment: 2347

## Designation

### Current Designation

Vehicles under 50" wide

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

## Rationale

### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Vehicles under 50" wide

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

- Now that the mine has been sealed up (photo IMG\_9997) routes 1020-1029-1041-1064-1080-1113-979 should be closed. I recently hiked the road with a friend. The upper reaches are deteriorating (photos IMG\_9994, IMG\_9995).

##### Planning Criteria

- RECREATION Recreation access to dispersed campsite
- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- SMA's Gibbler Mountain ACEC
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- SSPLANT Special Status Species sensitive species planes

#### Rationale

##### Designation Criteria

- Minimize Damage:** SS Plants-SSR within 100m
- Minimize Harassment:** Big game winter range – close, PPSV- Minimize fragmentation
- Wilderness / Natural Area:** ACEC – Gibbler- PSD paleo

##### Rationale for Decision

- Route was designated to protect and enhance special status fish, wildlife, and plant populations.
- Route was designated to protect big game winter range
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect important paleontological resources within the Gibbler Mountain ACEC

Organization, commenter: COPMOBA, Scott Winans

Comment ID: 000000168-3

Nine Mile Hill We [COPMOBA] recommend incorporating mountain bike use into the planned Quiet Use area along the rim of Nine Mile Hill. The popular Tabeguache Trail is in this area. Horse and foot travel have similar impacts in areas not adjacent to a population center so conflicts should be minimal. We recommend administrative road (#unknown but has spurs 1076, 1039, 1018 and 1051 ) bordering the most northern portion of the Wilderness be left open to mountain bikes. We feel allowing mountain bike use will cause minimal resource damage on an administrative road

## Public Comments On Route: 1080

Organization, commenter: Janice Shepherd

Comment ID: 000000106-217

- Now that the mine has been sealed up (photo IMG\_9997) routes 1020-1029-1041-1064-1080-1113-979 should be closed. I recently hiked the road with a friend. The upper reaches are deteriorating (photos IMG\_9994, IMG\_9995).

- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- SSPLANT Special Status Species sensitive species planes

#### Rationale

##### Designation Criteria

- **Minimize Damage:** SS Plants-SSR within 100m, Cultural – SSR within 100m sites
- **Minimize Harassment:** Big game winter range – close, PPSV- Minimize fragmentation
- **Wilderness / Natural Area:** ACEC – Gibbler- PSD paleo

##### Rationale for Decision

- Route was designated to protect and enhance special status fish, wildlife, and plant populations.
- Route was designated to minimize impacts to cultural resources.
- Route was designated to protect big game winter range
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect important paleontological resources within the Gibbler Mountain ACEC

### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

### Public Comments On Route: 1082

- No public comments for this Route

### Route: 1083

#### Segment: 1852

#### Designation

##### Current Designation

Open (All modes of travel)

##### Mitigation Criteria

- Needs Data - Cultural

##### Planning Criteria

- RECREATION Recreation access to dispersed campsite
- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low

- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches >60 acres

## Rationale

### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities - specific

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open (All modes of travel)

**Alternative C:** Open (All modes of travel)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 1083

- No public comments for this Route

## Route: 1084

### Segment: 1898

## Designation

### Current Designation

Closed (Rehab)

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches >60 acres

## Rationale

### Designation Criteria

- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, GUSG –PSD in winter habitat, Sage-Minimize fragmentation

### Rationale for Decision

- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range
- Route was designated to minimize fragmentation of Gunnison sage-grouse habitat.
- Route was designated to reduce fragmentation of sagebrush patches

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

## Route: 1085

### Segment: 1838

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

#### Rationale

##### Designation Criteria

- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close

##### Rationale for Decision

- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Route: 1098

### Segment: 1831

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- Cultural

##### Planning Criteria

- RECREATION Recreation access to dispersed campsite
- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Indirect impact
- SMAs Gibbler Mountain ACEC
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- SSPLANT Special Status Species sensitive species planes

#### Rationale

##### Designation Criteria

- **Minimize Damage:** SS Plants-SSR within 100m, Cultural – SSR within 100m sites
- **Minimize Harassment:** Big game winter range – close, PPSV- Minimize fragmentation
- **Wilderness / Natural Area:** ACEC – Gibbler- PSD paleo

##### Rationale for Decision

- Route was designated to protect and enhance special status fish, wildlife, and plant populations.
- Route was designated to minimize impacts to cultural resources.
- Route was designated to protect big game winter range
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect important paleontological resources within the Gibbler Mountain ACEC

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 1098

- No public comments for this Route

## Route: 1099

### Segment: 1822

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation access to dispersed campsite
- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Indirect impact
- SMAs Gibbler Mountain ACEC
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- SSPLANT Special Status Species sensitive species planes

#### Rationale

##### Designation Criteria

- **Minimize Damage:** SS Plants-SSR within 100m
- **Minimize Harassment:** Big game winter range – close, PPSV- Minimize fragmentation
- **Wilderness / Natural Area:** ACEC – Gibbler- PSD paleo

### Rationale for Decision

- Route was designated to protect and enhance special status fish, wildlife, and plant populations.
- Route was designated to protect big game winter range
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect important paleontological resources within the Gibbler Mountain ACEC

### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

### Public Comments On Route: 1099

- No public comments for this Route

### Route: 11

#### Segment: 2035

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- RIPARIAN Riparian 2 stream crossings
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Indirect impact
- SMAs Gibbler Mountain ACEC
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches >60 acres

#### Rationale

##### Designation Criteria

- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, GUSG –PSD in winter habitat
- **Wilderness / Natural Area:** ACEC – Gibbler- PSD paleo

##### Rationale for Decision

- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range
- Route was designated to minimize fragmentation of Gunnison sage-grouse habitat.
- Route was designated to protect important paleontological resources within the Gibbler Mountain ACEC

### Previous Alternatives Analyzed

**Alternative A:** Vehicles under 50" wide

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

### Public Comments On Route: 11

- No public comments for this Route

### Route: 110

#### Segment: 2332

#### Designation

##### Current Designation

Open (All modes of travel)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- CULTURAL Cultural Indirect impact

- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

## Rationale

### Designation Criteria

- No designation criteria for this route segment.

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open (All modes of travel)

**Alternative C:** Admin/Permitted Use Only

**Alternative D:** Foot/Horse/Mechanized (but still open to motorized for admin/permitted access)

## Public Comments On Route: 110

- No public comments for this Route

## Route: 1100

### Segment: 1840

## Designation

### Current Designation

Closed (Rehab)

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation access to dispersed campsite
- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- RIPARIAN Riparian 1 stream crossing
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

## Rationale

### Designation Criteria

- Minimize Damage:** Riparian—ephemeral streams SSR 30 m
- Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close

### Rationale for Decision

- Route was designated to minimize travel routes in and crossing riparian and wetland areas.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

## Public Comments On Route: 1105

Organization, commenter: Western Slope ATV Association, Steve Chapel

Comment ID: 000000089-13

- The route with numbers 933, to 1105, to 1110, to 1017, to 998 had been an important route for ATV use. At the end of it a connection can be made without equipment to extend it over to route 52 and create a great loop. We know this because we have made the short walk between the two routes. This had been explained to BLM. The map shows it with a dotted line which indicates closed until mitigated. This is not acceptable nor necessary. It is also confusing because there is a bicycle emblem on the route.

## Route: 1106

### Segment: 1815

#### Designation [?](#)

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

### Public Comments On Route: 1108

Organization, commenter: Quiet Trails Group, Sherry Schenk

Comment ID: 000000115-79

- [Re: Cactus Park SRMA] The QTG believes the shape of the SRMA should be adjusted on the east corner to avoid any overlap with the Bighorn sheep productive area. From page 69 we see that Alt E has no new motorized routes being created in Bighorn Sheep Productive area. The purpose behind the Cactus Park SRMA is to manage the creation of new ATV routes. So overlapping the 2 areas does not make sense. This concern has been shared with the Advisory Council. The proposed action on page 69 to deal with fragmentation and un-fragmentation of Bighorn Sheep summer concentration areas is too complex and will likely not be satisfactory given the habit-forming tendencies of Bighorn Sheep. Instead, Cactus Park SRMA should be reduced to not include the portion that overlaps the Winter/Summer range of Bighorn Sheep. In addition to simplifying the management, this will also address the concern that motorized recreation should not take priority over other resources in that area, which are not limited to Bighorn Sheep. BLM could consider incorporating this area into the Ninemile Hill ERMA with the caveat that the Alt E motorized routes in the area 847-848-830, 998-1017-1110-1108-993-995-1123-1129-1170-1169-1192-941 would be left as designated in Alt E (some full motorized, some ATV). The QTG is quite concerned about the SRMA status for this landscape. While we hope that a network of quality ATV routes will diminish the number of new user-created routes developing per year, we are very concerned about the prioritization of recreation over the myriad of other resources which are present in a high-density within this sensitive landscape. We think that Congress - in the Omnibus Act that created the NCA - had envisioned a balanced approach to "long-term conservation and protection of unique and important values" where recreation was supposed to have the same priority as other values. We would like to see more explicit protections of resources.

##### Mitigation Criteria

- Needs Data - Cultural

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- CULTURAL Cultural Indirect impact
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

## Rationale

### Designation Criteria

- **Minimize Damage:** Fragile soils SSR, NHT – close routes for setting
- **Minimize Harassment:** PPSV- Minimize fragmentation

### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to improve natural setting along the Old Spanish National Historic Trail.
- Route was designated to reduce fragmentation in Priority Vegetation types

## Previous Alternatives Analyzed

## Route: 1117

### Segment: 1820

## Designation

### Current Designation

Closed (Rehab)

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation access to dispersed campsite
- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- RIPARIAN Riparian 2 stream crossings
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

## Rationale

### Designation Criteria

- **Minimize Damage:** Riparian—ephemeral streams SSR 30 m

- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close

### Rationale for Decision

- Route was designated to minimize travel routes in and crossing riparian and wetland areas.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range

### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

### Public Comments On Route: 1117

- No public comments for this Route

### Route: 1118

#### Segment: 1789

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- SOIL Soils Fragile
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

#### Rationale

##### Designation Criteria

- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close

##### Rationale for Decision

- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range

### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

### Public Comments On Route: 1118

- No public comments for this Route

### Route: 1119

#### Segment: 1778

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Indirect impact
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

#### Rationale

##### Designation Criteria

- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, Bighorn – SSR -- summer range

##### Rationale for Decision

- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range
- Route was designated to reduce the miles of motorized and mechanized routes in bighorn sheep habitat.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 1119

- No public comments for this Route

## Route: 112

### Segment: 2324

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

#### Rationale

##### Designation Criteria

- **Minimize Damage:** NHT – close routes for setting, Fragile soils SSR
- **Minimize Harassment:** PPSV- Minimize fragmentation

##### Rationale for Decision

- Route was designated to improve natural setting along the Old Spanish National Historic Trail.
- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to reduce fragmentation in Priority Vegetation types

## Previous Alternatives Analyzed

## Public Comments On Route: 112

Organization, commenter: Janice Shepherd

Comment ID: 000000106-209

- Alt E's closure of duplicate and braided routes: There are many short braided routes like 102, 112, 120, and 349 throughout the NCA. I support the closing and rehabbing of them if they don't lead to nice dispersed campsites. Hiking passed them makes me think that no one cares about proper planning (if I didn't know the history of their creation). Duplicated braided routes are just eating up the area, damaging vegetation in areas where it is such a struggle for vegetation to survive. Now that this is an NCA, I support the BLM's intent in Alt E to close and re-vegetate such braided routes. I believe it is important to show respect for the protection of the land and its beauty by minimizing routes to those that are useful and fun and eliminating such unnecessary braids.

## Route: 1120

• The following high value recreational routes/roads are legal RS 2477 ROW's in the State of Colorado, Mesa County and the BLM does not have the jurisdiction to close them: 500, 472, 518, 521, 530, 39, 127, 572, 566, 66, 65, 148, 71, 74, 587, 595, 608, 622, 628, 635, 624, 609, 611, 706, 678, 700, 719, 726, 696, 26, 936, 847, 849, 919, 767, 824, 96, 822, 817, 950, 1021, 900, 2682, 1020, 1003, 1084, 1142, 1184, 1156, 1198, 1349, 1308, 1310, 1238, 1263, 1122, 1170, 1192, 974, 941, 1076, 1039, 1018, 1759, 1764, 1758, 1174, 1788, 1798, 1669, 1699, 1773, 1755, 1779, 1750, 1751, 1792, 1720, 1726, 1727, 1720, 1722, 1803, 1805, 1809, 1614, 1609, 1605, 1608, 1571, 1526, 1516, 1448, 755, 807, 900, 10, 48, 924, 950, 1005, 965, 8, 1115, 981, 984, 1135, 2678, 1249, 1171, 1150, 1249, 1320, 1235, 1236, 1228, 1227, 1409, 1456, 1349, 1308, 1513, 1221, 1550, 1567, 1641, 1612, 1740, 1688, 2597, 2598, 2601, 2440, 3160, 3162, 2089, 2166, 2170, 2596, 2171, 2003, 2122, 2126, 2189, 3145, 2182, 2179, 2178, 3143, 2181, 2121, 2122, 2168, 2126, 2180, 2095, 2173, 2174, 2620, 2129, 1686, 1692, 1667, 1647, 1631, 1613, 1596, 1549, 1541, 2647, 1633, 1605, 1608, 1571, 2645, 1507, 1448, 1496, 1516, 1504, 1510, 1508, 1509, 439, 431, 456, 461, 460, 391, 423, 415, 419, 407, 402, 367, 372, 339, 298, 338, 105, 368, 374, 393, 389, 390, 376, 377, 351, 350, 121, 345, 320, 301, 251, 234, 232, 205, 344, 107, 103, 152, 153, 161, 168, 3199, 188, 196, 255, 254, 236, 294, 242, 219, 201, 169, 162, 158, 160, 173. The following high value recreational routes/roads are legal RS 2477ROW's in the State of Colorado, Delta County, and the BLM does not have the jurisdiction to close them: 3011, 2184, 2191, 3100, 2187, 2026, 2059, 2188, 2192, 3104, 2130, 3009, 2199, 2200, 2111, 2223, 2024, 3006, 2231, 3094, 2579, 2210, 2344, 2243, 2249, 2248, 3074, 2354, 2384, 2296, 2295, 2287, 2304, 2062, 2163, 3163, 2164, 2430, 4006, 3016, 2351, 3140, 2410, 4008, 2324, 2073, 2306, 2459, 3192, 3193, 2350, 2443, 2035, 2336, 2495, 2491, 2159, 3058, 2277, 2465, 2467, 3189, 2472, 2297, 2006, 2265, 2271, 2276, 2135, 2139, 3053, 2489, 3033, 3057, 2031, 2276, 2210, 2579, 2136, 2344, 3164, 2400, 2379, 3014, 2365, 3116, 2251, 2259, 2149, 2153, 2146, 2144, 2145, 2356, 2257, 2048, 2358, 3165, and 3166.

## Route: 1123

### Segment: 1777

### Designation

#### Current Designation

Closed (Rehab)

#### Mitigation Criteria

- Cultural

#### Planning Criteria

- RECREATION Recreation access to dispersed campsite
- RECREATION Recreation opportunities for access to and across federal lands
- SOIL Soils Steep Slopes 40%
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Indirect impact
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

### Rationale

#### Designation Criteria

- **Minimize Damage:** Fragile soils SSR
- **Minimize Harassment:** Bighorn – SSR -- summer range, Big game winter range – close

#### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to reduce the miles of motorized and mechanized routes in bighorn sheep habitat.
- Route was designated to protect big game winter range

### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed, seek re-route or mitigation

## Public Comments On Route: 1123

Organization, commenter: Quiet Trails Group, Sherry Schenk

Comment ID: 000000115-79

- [Re: Cactus Park SRMA] The QTG believes the shape of the SRMA should be adjusted on the east corner to avoid any overlap with the Bighorn sheep productive area. From page 69 we see that Alt E has no new motorized routes being created in Bighorn Sheep Productive area. The purpose behind the Cactus Park SRMA is to manage the creation of new ATV routes. So overlapping the 2 areas does not make sense. This concern has been shared with the Advisory Council. The proposed action on page 69 to deal with fragmentation and un-fragmentation of Bighorn Sheep summer concentration areas is too complex and will likely not be satisfactory given the habit-forming tendencies of Bighorn Sheep. Instead, Cactus Park SRMA should be reduced to not include the portion that overlaps the Winter/Summer range of Bighorn Sheep. In addition to simplifying the management, this will also address the concern that motorized recreation should not take priority over other resources in that area, which are not limited to Bighorn Sheep. BLM could consider incorporating this area into the Ninemile Hill ERMA with the caveat that the Alt E motorized routes in the area 847-848-830, 998-1017-1110-1108-993-995-1123-1129-1170-1169-1192-941 would be left as designated in Alt E (some full motorized, some ATV). The QTG is quite concerned about the SRMA status for this landscape. While we hope that a network of quality ATV routes will diminish the number of new user-created routes developing per year, we are very concerned about the prioritization of recreation over the myriad of other resources which are present in a high-density within this sensitive landscape. We think that Congress - in the Omnibus Act that created the NCA - had envisioned a balanced approach to "long-term conservation and protection of unique and important values" where recreation was supposed to have the same priority as other values. We would like to see more explicit protections of resources.

## Route: 1124

### Segment: 1774

#### Designation [?](#)

##### Current Designation

Open (All modes of travel)

##### Mitigation Criteria

- Cultural

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Range access for general livestock management
- LANDS Access to non-federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Indirect impact
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

#### Rationale

##### Designation Criteria

- **Recreation:** Rec opportunities – general, RMA objectives

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Route: 1136

### Segment: 1759

#### Designation ?

**Current Designation**  
Veiches under 50" wide

#### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

#### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

#### Rationale

##### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed, seek re-route or mitigation

**Alternative D:** Closed, seek re-route or mitigation

#### Public Comments On Route: 1136

- No public comments for this Route

#### Route: 1137

##### Segment: 1748

#### Designation ?

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

#### Rationale

##### Designation Criteria

- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close

##### Rationale for Decision

- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

#### Public Comments On Route: 1137

- No public comments for this Route

#### Route: 1138

##### Segment: 1754

#### Designation ?

##### Current Designation

Open (All modes of travel)

##### Mitigation Criteria

- Needs Data - Cultural

##### Planning Criteria

- RECREATION Recreation access to dispersed campsite
- RECREATION Recreation opportunities for access to and across federal lands

- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities - specific

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open (All modes of travel)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 1138

- No public comments for this Route

## Route: 1139

### Segment: 1752

#### Designation

##### Current Designation

Open (All modes of travel)

##### Mitigation Criteria

- Needs Data - Cultural

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities - specific

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Closed (Not Rehabbed)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Not Rehabbed)

## Public Comments On Route: 1139

- No public comments for this Route

## Route: 114

### Segment: 2316

#### Designation

##### Current Designation

Vehicles under 50" wide

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

## Rationale

### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Vehicles under 50" wide

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

### Public Comments On Route: 114

- No public comments for this Route

### Route: 1140

#### Segment: 1753

### Designation ?

#### Current Designation

Open (All modes of travel)

#### Mitigation Criteria

- Needs Data - Cultural

#### Planning Criteria

- RECREATION Recreation access to dispersed campsite
- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Indirect impact
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E

### Rationale

#### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities - specific

#### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open (All modes of travel)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

### Public Comments On Route: 1140

- No public comments for this Route

### Route: 1141

#### Segment: 1741

### Designation ?

#### Current Designation

Open (All modes of travel)

#### Mitigation Criteria

- Needs Data - Cultural

#### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Indirect impact
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E

### Rationale

#### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities - specific

#### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open (All modes of travel)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 1141

- No public comments for this Route

## Route: 1142

### Segment: 1860

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Indirect impact
- SMAs Gibbler Mountain ACEC
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches >60 acres

#### Rationale

##### Designation Criteria

- **Minimize Damage:** Fragile soils SSR
- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, Sage-Minimize fragmentation, GUSG –PSD in winter habitat

##### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range
- Route was designated to reduce fragmentation of sagebrush patches
- Route was designated to minimize fragmentation of Gunnison sage-grouse habitat.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

• Map 3-4 appears to be missing a Cactus Park riparian area. There is a riparian vegetation area near route 1142 on map 3-3, but it does not appear on this map. Where there is riparian vegetation, I would think there is a riparian area. As many birds and wildlife rely on the nutrients and camouflage of riparian vegetation, further investigation is needed to address this inconsistency. Maps 3-8 and 3-9 also are missing the Cactus Park riparian area.

o The Gibbler Mountain ACEC as shown on map 2-5E does not encompass the mountain itself but only its northern slopes. I would prefer to see a non-motorized/non-mechanized ACEC for the whole of Gibbler Mountain and its surrounding slopes, bounded by the routes: 1235-1236-1228-1409-1221-15-8-887-18-17-945-547-951-959-966-969-1005-1006-1021-1022-1023-1024-1047-1150-1249, with 1269 left open to motorized use as a motorized cherry-stemmed route into the area. This would keep this wonderful roadless area (though too small a space for the inventory) roadless into the future. The text on page 871 indicates the area has one of the "best known" populations of the rare plant Grand Junction milkvetch as well as a large collection of fragile dinosaur tracks. The Special Species map from the Open House needs to be updated with this GJ milkvetch population. This ACEC representing a hole in the SRMA would properly protect all three features: roadless-ness, dinosaur tracks, and GJ milkvetch, at the cost of less than 5000 acres. This protection is consistent with this being a National Conservation Area and not a National Recreation Area. This position also has support from the D-E NCA Advisory Council. I recently hiked up to the top of the northern portion of Gibbler Mountain with a friend. We were inspired by the challenging terrain for hiking and the awesome views (photo IMG\_9998). We both had a great feeling of accomplishment when we reached the top. There is plenty of evidence of big game animals using the Gibbler Mountain as a quiet sanctuary from the surrounding motorized areas. This proposed ACEC would benefit them.

Comment ID: 00000115-32

o Gibbler Mountain Area of Critical Environmental Concern: The QTG supports Gibbler Mtn ACEC from Alt D because protections are needed for the myriad of resources found here, especially if it is going to be located within an SRMA focused on motorized use. Further, we think the ACEC should be extended to include all of Gibbler Mountain. Surface-disturbance limitations and a rule of no motorized use should be included for the full ACEC, including this recommended expansion. With this expansion the full ACEC would be bounded by: Routes: 1235-1236-1228-1409-1221-15-8-887-18-17-945-947-951-954-959-962-966-969-1005-1006-1021-1022-1023-1024-1047-1150-1249-8, with 1269, and 1173-1174-1198-1200-1193 cherry-stemmed into the area. The reasons we support this designation are as follows: Roadless areas are an endangered resource in the high-desert west. Categorically, roadless areas especially within NCAs- should be protected as such. By making it a larger area not only does it protect this roadless area but also it better disguises the location of the dinosaur tracks and fossils which we see from page 872," are regionally significant and easily damaged". Per page 871, "This site also supports one of the best known occurrences (A-ranked) of Grand Junction milkvetch (Astragalus linifolius), a globally vulnerable plant (G3/S3) and a BLM sensitive plant species."o Map 3-13 needs to be updated to show the presence of Grand Junction milkvetch and Colorado Hookless cactus as the text on page 871 indicates both are present in this area. A recent hike in this area shows prolific big game use in the area, we assume it is their refuge from surrounding motorized use. Recent hikes have confirmed the presence of Ponderosa Pine atop Gibbler Mtn. This designation would aid in increasing the number of healthy Ponderosa Pines within the NCA, an action which would be in accordance with the Alternative E management objective on page 52. o Map 3-3 needs to be updated to reference the presence of Ponderosa Pine in this area. The designation of this expanded ACEC in the final plan, would address the need for non-motorized trails in this portion of the NCA, an opportunity currently missing from the draft plan. And to reiterate, these protections are needed for the myriad of resources found here, especially because they are to be located within an SRMA focused on motorized use

Comment ID: 00000135-35

o Gibbler Gulch/Gibbler MountainThe following are route recommendations for Gibbler Gulch and Gibbler Mountain which together make a nice amount of relatively undisturbed open space and habitat. This area is less roaded and fragmented than other parts of Cactus Park NCA unit. It may be less impacted by grazing than other areas and harbors critical big game habitat. Hoping to send you maps next week showing these areas. In particular I recommend keeping recreational use out of all the creek drainages in the upper Gibbler Gulch area, and closing roads on the adjacent mesas. Putting a motorized or mountain bike route over Gibbler Mountain would irreversibly change the natural quality, silence and solitude of this remote landscape. Lands that are currently undeveloped should stay that way as so much land in the NCA is criss-crossed with routes and trails.For example there is potential for retaining the remote "open space" setting of Gibbler Mountain, as specified in the 2007 Colorado BLM Recreation and Visitor Strategy, by closing 1227(!) (especially), 1269, 1309, 2674, 2673, 1249, 1171, 981, 980, 1150, 1154, 977, 979, 1312, 1310, 1334, 1330, 1344, 1286, 1242, 1213, 1238, 1242, 1204, 1213, 1239, 1214, 1212, 1200, 1263, 1204, 1198, 1187, 1210. Limit motorized traffic to roads 15 and 8. Similarly, there is potential for a large unmotorized area extending west from road 15 and Gibbler Gulch on the east, to road 8 on the west. To create an undisturbed nonmotorized area I recommend closing routes 1526, 2666, 1571, 2665, 1608, 1570, 1605, 1561, 1516, 1606, 1561, 1609 1633, 2664, 2663, 1412, 1424, 1456 1434, 1513 , 1249, 1269.Many of these are duplicative, serve no purpose, or are dead ends, simply pioneered randomly, and should be closed.

o The following high value recreational routes/roads are legal RS 2477 ROW's in the State of Colorado, Mesa County and the BLM does not have the jurisdiction to close them: 500, 472, 518, 521, 530, 39, 127, 572, 566, 66, 65, 148, 71, 74, 587, 595, 608, 622, 628, 635, 624, 609, 611, 706, 678, 700, 719, 726, 696, 26, 936, 847, 849, 919, 767, 824, 96, 822, 817, 950, 1021, 900, 2682, 1020, 1003, 1084, 1142, 1184, 1156, 1198, 1349, 1308, 1310, 1238, 1263, 1122, 1170, 1192, 974, 941, 1076, 1039, 1018, 1759, 1764, 1758, 1174, 1788, 1798, 1669, 1699, 1773, 1755, 1779, 1750, 1751, 1792, 1720, 1726, 1727, 1720, 1722, 1803, 1805, 1809, 1614, 1609, 1605, 1608, 1571, 1526, 1516, 1448, 755, 807, 900, 10, 48, 924, 950, 1005, 965, 8, 1115, 981, 984, 1135, 2678, 1249, 1171, 1150, 1249, 1320, 1235, 1236, 1228, 1227, 1409, 1456, 1349, 1308, 1513, 1221, 1550, 1567, 1641, 1612, 1740, 1688, 2597, 2598, 2601, 2440, 3160, 3162, 2089, 2166, 2170, 2596, 2171, 2003, 2122, 2126, 2189, 3145, 2182, 2179, 2178, 3143, 2181, 2121, 2122, 2168, 2126, 2180, 2095, 2173, 2174, 2620, 2129, 1686, 1692, 1667, 1647, 1631, 1613, 1596, 1549, 1541, 2647, 1633, 1605, 1608, 1571, 2645, 1507, 1448, 1496, 1516, 1504, 1510, 1508, 1509, 439, 431, 456, 461, 460, 391, 423, 415, 419, 407, 402, 367, 372, 339, 298, 338, 105, 368, 374, 393, 389, 390, 376, 377, 351, 350, 121, 345, 320, 301, 251, 234, 232, 205, 344, 107, 103, 152, 153, 161, 168, 3199, 188, 196, 255, 254, 236, 294, 242, 219, 201, 169, 162, 158, 160, 173. The following high value recreational routes/roads are legal RS 2477ROW's in the State of Colorado, Delta County, and the BLM does not have the jurisdiction to close them: 3011, 2184, 2191, 3100, 2187, 2026, 2059, 2188, 2192, 3104, 2130, 3009, 2199, 2200, 2111, 2223, 2024, 3006, 2231, 3094, 2579, 2210, 2344, 2243, 2249, 2248, 3074, 2354, 2384, 2296, 2295, 2287, 2304, 2062, 2163, 3163, 2164, 2430, 4006, 3016, 2351, 3140, 2410, 4008, 2324, 2073, 2306, 2459, 3192, 3193, 2350, 2443, 2035, 2336, 2495, 2491, 2159, 3058, 2277, 2465, 2467, 3189, 2472, 2297, 2006, 2265, 2271, 2276, 2135, 2139, 3053, 2489, 3033, 3057, 2031, 2276, 2210, 2579, 2136, 2344, 3164, 2400, 2379, 3014, 2365, 3116, 2251, 2259, 2149, 2153, 2146, 2144, 2145, 2356, 2257, 2048, 2358, 3165, and 3166.

## Route: 1152

### Segment: 1749

#### Designation

##### Current Designation

Open (All modes of travel)

##### Mitigation Criteria

- Needs Data - Cultural

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- Recreation:** RMA objectives, Rec opportunities - specific

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Closed (Not Rehabbed)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Not Rehabbed)

## Public Comments On Route: 1152

- No public comments for this Route

## Route: 1153

### Segment: 1737

#### Designation [?](#)

##### Current Designation

Closed, seek re-route or mitigation

##### Designation Following Mitigation

Open (All modes of travel)

##### Mitigation Criteria

- Reroute
- Needs Data - Cultural

##### Planning Criteria

- RECREATION Recreation access to dispersed campsite
- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Indirect impact
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

#### Rationale

##### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities - specific

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 1153

- No public comments for this Route

## Route: 1154

### Segment: 1796

#### Designation [?](#)

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- SMAs Gibbler Mountain ACEC
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Minimize Damage:** SS Plants-SSR within 100m
- **Minimize Harassment:** Big game winter range – close, PPSV- Minimize fragmentation
- **Wilderness / Natural Area:** ACEC – Gibbler- PSD paleo

##### Rationale for Decision

- Route was designated to protect and enhance special status fish, wildlife, and plant populations.
- Route was designated to protect big game winter range
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect important paleontological resources within the Gibbler Mountain ACEC

#### Previous Alternatives Analyzed

**Alternative A:** Vehicles under 50" wide

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 1154

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 000000135-35

• Gibbler Gulch/Gibbler MountainThe following are route recommendations for Gibbler Gulch and Gibbler Mountain which together make a nice amount of relatively undisturbed open space and habitat. This area is less roaded and fragmented than other parts of Cactus Park NCA unit. It may be less impacted by grazing than other areas and harbors critical big game habitat. Hoping to send you maps next week showing these areas. In particular I recommend keeping recreational use out of all the creek drainages in the upper Gibbler Gulch area, and closing roads on the adjacent mesas. Putting a motorized or mountain bike route over Gibbler Mountain would irreversibly change the natural quality, silence and solitude of this remote landscape. Lands that are currently undeveloped should stay that way as so much land in the NCA is criss-crossed with routes and trails.For example there is potential for retaining the remote "open space" setting of Gibbler Mountain, as specified in the 2007 Colorado BLM Recreation and Visitor Strategy, by closing 1227(!) (especially), 1269, 1309, 2674, 2673, 1249, 1171, 981, 980, 1150, 1154, 977, 979, 1312, 1310, 1334, 1330, 1344, 1286, 1242, 1213, 1238, 1242, 1204, 1213, 1239, 1214, 1212, 1200, 1263, 1204, 1198, 1187, 1210. Limit motorized traffic to roads 15 and 8.Similarly, there is potential for a large unmotorized area extending west from road 15 and Gibbler Gulch on the east, to road 8 on the west. To create an undisturbed nonmotorized area I recommend closing routes 1526, 2666, 1571, 2665, 1608, 1570, 1605, 1561, 1516, 1606, 1561, 1609 1633, 2664, 2663, 1412, 1424, 1456 1434, 1513 , 1249, 1269.Many of these are duplicative, serve no purpose, or are dead ends, simply pioneered randomly, and should be closed.

## Route: 1155

### Segment: 1742

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Indirect impact
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, GUSG –PSD in winter habitat

##### Rationale for Decision

- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range
- Route was designated to minimize fragmentation of Gunnison sage-grouse habitat.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Not Rehabbed)

## Public Comments On Route: 1155

- No public comments for this Route

## Route: 1156

### Segment: 1744

#### Designation

##### Current Designation

Open (All modes of travel)

##### Mitigation Criteria

- Needs Data - Cultural

##### Planning Criteria

- RECREATION Recreation access to dispersed campsite
- RECREATION Recreation opportunities for access to and across federal lands
- SOIL Soils Steep Slopes 40%
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Indirect impact
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches >60 acres

#### Rationale

##### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities - specific

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

### Previous Alternatives Analyzed

### Rationale

#### Designation Criteria

- **Minimize Damage:** Fragile soils SSR
- **Minimize Harassment:** Sage-Minimize fragmentation, GUSG –PSD in winter habitat, PPSV- Minimize fragmentation, Big game winter range – close

#### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to reduce fragmentation of sagebrush patches
- Route was designated to minimize fragmentation of Gunnison sage-grouse habitat.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range

## Public Comments On Route: 1169

Organization, commenter: Quiet Trails Group, Sherry Schenk

Comment ID: 00000115-79

- [Re: Cactus Park SRMA] The QTG believes the shape of the SRMA should be adjusted on the east corner to avoid any overlap with the Bighorn sheep productive area. From page 69 we see that Alt E has no new motorized routes being created in Bighorn Sheep Productive area. The purpose behind the Cactus Park SRMA is to manage the creation of new ATV routes. So overlapping the 2 areas does not make sense. This concern has been shared with the Advisory Council. The proposed action on page 69 to deal with fragmentation and un-fragmentation of Bighorn Sheep summer concentration areas is too complex and will likely not be satisfactory given the habit-forming tendencies of Bighorn Sheep. Instead, Cactus Park SRMA should be reduced to not include the portion that overlaps the Winter/Summer range of Bighorn Sheep. In addition to simplifying the management, this will also address the concern that motorized recreation should not take priority over other resources in that area, which are not limited to Bighorn Sheep. BLM could consider incorporating this area into the Ninemile Hill ERMA with the caveat that the Alt E motorized routes in the area 847-848-830, 998-1017-1110-1108-993-995-1123-1129-1170-1169-1192-941 would be left as designated in Alt E (some full motorized, some ATV). The QTG is quite concerned about the SRMA status for this landscape. While we hope that a network of quality ATV routes will diminish the number of new user-created routes developing per year, we are very concerned about the prioritization of recreation over the myriad of other resources which are present in a high-density within this sensitive landscape. We think that Congress - in the Omnibus Act that created the NCA - had envisioned a balanced approach to "long-term conservation and protection of unique and important values" where recreation was supposed to have the same priority as other values. We would like to see more explicit protections of resources.

The following high value recreational routes/roads are legal RS 2477 ROW's in the State of Colorado, Mesa County and the BLM does not have the jurisdiction to close them: 500, 472, 518, 521, 530, 39, 127, 572, 566, 66, 65, 148, 71, 74, 587, 595, 608, 622, 628, 635, 624, 609, 611, 706, 678, 700, 719, 726, 696, 26, 936, 847, 849, 919, 767, 824, 96, 822, 817, 950, 1021, 900, 2682, 1020, 1003, 1084, 1142, 1184, 1156, 1198, 1349, 1308, 1310, 1238, 1263, 1122, 1170, 1192, 974, 941, 1076, 1039, 1018, 1759, 1764, 1758, 1174, 1788, 1798, 1669, 1699, 1773, 1755, 1779, 1750, 1751, 1792, 1720, 1726, 1727, 1720, 1722, 1803, 1805, 1809, 1614, 1609, 1605, 1608, 1571, 1526, 1516, 1448, 755, 807, 900, 10, 48, 924, 950, 1005, 965, 8, 1115, 981, 984, 1135, 2678, 1249, 1171, 1150, 1249, 1320, 1235, 1236, 1228, 1227, 1409, 1456, 1349, 1308, 1513, 1221, 1550, 1567, 1641, 1612, 1740, 1688, 2597, 2598, 2601, 2440, 3160, 3162, 2089, 2166, 2170, 2596, 2171, 2003, 2122, 2126, 2189, 3145, 2182, 2179, 2178, 3143, 2181, 2121, 2122, 2168, 2126, 2180, 2095, 2173, 2174, 2620, 2129, 1686, 1692, 1667, 1647, 1631, 1613, 1596, 1549, 1541, 2647, 1633, 1605, 1608, 1571, 2645, 1507, 1448, 1496, 1516, 1504, 1510, 1508, 1509, 439, 431, 456, 461, 460, 391, 423, 415, 419, 407, 402, 367, 372, 339, 298, 338, 105, 368, 374, 393, 389, 390, 376, 377, 351, 350, 121, 345, 320, 301, 251, 234, 232, 205, 344, 107, 103, 152, 153, 161, 168, 3199, 188, 196, 255, 254, 236, 294, 242, 219, 201, 169, 162, 158, 160, 173. The following high value recreational routes/roads are legal RS 2477ROW's in the State of Colorado, Delta County, and the BLM does not have the jurisdiction to close them: 3011, 2184, 2191, 3100, 2187, 2026, 2059, 2188, 2192, 3104, 2130, 3009, 2199, 2200, 2111, 2223, 2024, 3006, 2231, 3094, 2579, 2210, 2344, 2243, 2249, 2248, 3074, 2354, 2384, 2296, 2295, 2287, 2304, 2062, 2163, 3163, 2164, 2430, 4006, 3016, 2351, 3140, 2410, 4008, 2324, 2073, 2306, 2459, 3192, 3193, 2350, 2443, 2035, 2336, 2495, 2491, 2159, 3058, 2277, 2465, 2467, 3189, 2472, 2297, 2006, 2265, 2271, 2276, 2135, 2139, 3053, 2489, 3033, 3057, 2031, 2276, 2210, 2579, 2136, 2344, 3164, 2400, 2379, 3014, 2365, 3116, 2251, 2259, 2149, 2153, 2146, 2144, 2145, 2356, 2257, 2048, 2358, 3165, and 3166.

### Route: 1171

#### Segment: 1726

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I moderate

- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close

### Rationale for Decision

- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range

## Previous Alternatives Analyzed

**Alternative A:** Vehicles under 50" wide

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 1171

Comment ID: 000000135-35

• Gibbler Gulch/Gibbler Mountain The following are route recommendations for Gibbler Gulch and Gibbler Mountain which together make a nice amount of relatively undisturbed open space and habitat. This area is less roaded and fragmented than other parts of Cactus Park NCA unit. It may be less impacted by grazing than other areas and harbors critical big game habitat. Hoping to send you maps next week showing these areas. In particular I recommend keeping recreational use out of all the creek drainages in the upper Gibbler Gulch area, and closing roads on the adjacent mesas. Putting a motorized or mountain bike route over Gibbler Mountain would irreversibly change the natural quality, silence and solitude of this remote landscape. Lands that are currently undeveloped should stay that way as so much land in the NCA is criss-crossed with routes and trails. For example there is potential for retaining the remote "open space" setting of Gibbler Mountain, as specified in the 2007 Colorado BLM Recreation and Visitor Strategy, by closing 1227(!) (especially), 1269, 1309, 2674, 2673, 1249, 1171, 981, 980, 1150, 1154, 977, 979, 1312, 1310, 1334, 1330, 1344, 1286, 1242, 1213, 1238, 1242, 1204, 1213, 1239, 1214, 1212, 1200, 1263, 1204, 1198, 1187, 1210. Limit motorized traffic to roads 15 and 8. Similarly, there is potential for a large unmotorized area extending west from road 15 and Gibbler Gulch on the east, to road 8 on the west. To create an undisturbed nonmotorized area I recommend closing routes 1526, 2666, 1571, 2665, 1608, 1570, 1605, 1561, 1516, 1606, 1561, 1609, 1633, 2664, 2663, 1412, 1424, 1456, 1434, 1513, 1249, 1269. Many of these are duplicative, serve no purpose, or are dead ends, simply pioneered randomly, and should be closed.

## Route: 1172

### Segment: 1755

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- SOIL Soils Steep Slopes 40%
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

## Rationale

### Designation Criteria

- **Minimize Damage:** Soils -PSD slopes >40%, Fragile soils SSR
- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, Bighorn – SSR -- summer range

### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.

- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range
- Route was designated to reduce the miles of motorized and mechanized routes in bighorn sheep habitat.

## Public Comments On Route: 1173

Organization, commenter: Quiet Trails Group, Sherry Schenk

Comment ID: 000000115-32

• Gibbler Mountain Area of Critical Environmental Concern: The QTG supports Gibbler Mtn ACEC from Alt D because protections are needed for the myriad of resources found here, especially if it is going to be located within an SRMA focused on motorized use. Further, we think the ACEC should be extended to include all of Gibbler Mountain. Surface-disturbance limitations and a rule of no motorized use should be included for the full ACEC, including this recommended expansion. With this expansion the full ACEC would be bounded by: Routes: 1235-1236-1228-1409-1221-15-8-887-18-17-945-947-951-954-959-962-966-969-1005-1006-1021-1022-1023-1024-1047-1150-1249-8, with 1269, and 1173-1174-1198-1200-1193 cherry-stemmed into the area. The reasons we support this designation are as follows: Roadless areas are an endangered resource in the high-desert west. Categorically, roadless areas especially within NCAs- should be protected as such. By making it a larger area not only does it protect this roadless area but also it better disguises the location of the dinosaur tracks and fossils which we see from page 872," are regionally significant and easily damaged". Per page 871, "This site also supports one of the best known occurrences (A-ranked) of Grand Junction milkvetch (Astragalus linifolius), a globally vulnerable plant (G3/S3) and a BLM sensitive plant species." o Map 3-13 needs to be updated to show the presence of Grand Junction milkvetch and Colorado Hookless cactus as the text on page 871 indicates both are present in this area. A recent hike in this area shows prolific big game use in the area, we assume it is their refuge from surrounding motorized use. Recent hikes have confirmed the presence of Ponderosa Pine atop Gibbler Mtn. This designation would aid in increasing the number of healthy Ponderosa Pines within the NCA, an action which would be in accordance with the Alternative E management objective on page 52. o Map 3-3 needs to be updated to reference the presence of Ponderosa Pine in this area. The designation of this expanded ACEC in the final plan, would address the need for non-motorized trails in this portion of the NCA, an opportunity currently missing from the draft plan. And to reiterate, these protections are needed for the myriad of resources found here, especially because they are to be located within an SRMA focused on motorized use

## Route: 1174

### Segment: 1704

#### Designation [?](#)

##### Current Designation

Open (All modes of travel)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range

- CULTURAL Cultural Class I low
- SMAs Gibbler Mountain ACEC
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- No designation criteria for this route segment.

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open (All modes of travel)

**Alternative C:** Closed (Rehab)

**Alternative D:** Open (All modes of travel)

• The following high value recreational routes/roads are legal ROW's in the State of Colorado, Mesa County and the BLM does not have the jurisdiction to close them: 500, 472, 518, 521, 530, 39, 127, 572, 566, 66, 65, 148, 71, 74, 587, 595, 608, 622, 628, 635, 624, 609, 611, 706, 678, 700, 719, 726, 696, 26, 936, 847, 849, 919, 767, 824, 96, 822, 817, 950, 1021, 900, 2682, 1020, 1003, 1084, 1142, 1184, 1156, 1198, 1349, 1308, 1310, 1238, 1263, 1122, 1170, 1192, 974, 941, 1076, 1039, 1018, 1759, 1764, 1758, 1174, 1788, 1798, 1669, 1699, 1773, 1755, 1779, 1750, 1751, 1792, 1720, 1726, 1727, 1720, 1722, 1803, 1805, 1809, 1614, 1609, 1605, 1608, 1571, 1526, 1516, 1448, 755, 807, 900, 10, 48, 924, 950, 1005, 965, 8, 1115, 981, 984, 1135, 2678, 1249, 1171, 1150, 1249, 1320, 1235, 1236, 1228, 1227, 1409, 1456, 1349, 1308, 1513, 1221, 1550, 1567, 1641, 1612, 1740, 1688, 2597, 2598, 2601, 2440, 3160, 3162, 2089, 2166, 2170, 2596, 2171, 2003, 2122, 2126, 2189, 3145, 2182, 2179, 2178, 3143, 2181, 2121, 2122, 2168, 2126, 2180, 2095, 2173, 2174, 2620, 2129, 1686, 1692, 1667, 1647, 1631, 1613, 1596, 1549, 1541, 2647, 1633, 1605, 1608, 1571, 2645, 1507, 1448, 1496, 1516, 1504, 1510, 1508, 1509, 439, 431, 456, 461, 460, 391, 423, 415, 419, 407, 402, 367, 372, 339, 298, 338, 105, 368, 374, 393, 389, 390, 376, 377, 351, 350, 121, 345, 320, 301, 251, 234, 232, 205, 344, 107, 103, 152, 153, 161, 168, 3199, 188, 196, 255, 254, 236, 294, 242, 219, 201, 169, 162, 158, 160, 173. The following high value recreational routes/roads are legal ROW's in the State of Colorado, Delta County, and the BLM does not have the jurisdiction to close them: 3011, 2184, 2191, 3100, 2187, 2026, 2059, 2188, 2192, 3104, 2130, 3009, 2199, 2200, 2111, 2223, 2024, 3006, 2231, 3094, 2579, 2210, 2344, 2243, 2249, 2248, 3074, 2354, 2384, 2296, 2295, 2287, 2304, 2062, 2163, 3163, 2164, 2430, 4006, 3016, 2351, 3140, 2410, 4008, 2324, 2073, 2306, 2459, 3192, 3193, 2350, 2443, 2035, 2336, 2495, 2491, 2159, 3058, 2277, 2465, 2467, 3189, 2472, 2297, 2006, 2265, 2271, 2276, 2135, 2139, 3053, 2489, 3033, 3057, 2031, 2276, 2210, 2579, 2136, 2344, 3164, 2400, 2379, 3014, 2365, 3116, 2251, 2259, 2149, 2153, 2146, 2144, 2145, 2356, 2257, 2048, 2358, 3165, and 3166.

Organization, commenter: Quiet Trails Group, Sherry Schenk

Comment ID: 000000115-32

• Gibbler Mountain Area of Critical Environmental Concern: The QTG supports Gibbler Mtn ACEC from Alt D because protections are needed for the myriad of resources found here, especially if it is going to be located within an SRMA focused on motorized use. Further, we think the ACEC should be extended to include all of Gibbler Mountain. Surface-disturbance limitations and a rule of no motorized use should be included for the full ACEC, including this recommended expansion. With this expansion the full ACEC would be bounded by: Routes: 1235-1236-1228-1409-1221-15-8-887-18-17-945-947-951-954-959-962-966-969-1005-1006-1021-1022-1023-1024-1047-1150-1249-8, with 1269, and 1173-1174-1198-1200-1193 cherry-stemmed into the area. The reasons we support this designation are as follows: Roadless areas are an endangered resource in the high-desert west. Categorically, roadless areas especially within NCAs- should be protected as such. By making it a larger area not only does it protect this roadless area but also it better disguises the location of the dinosaur tracks and fossils which we see from page 872," are regionally significant and easily damaged". Per page 871, "This site also supports one of the best known occurrences (A-ranked) of Grand Junction milkvetch (Astragalus linifolius), a globally vulnerable plant (G3/S3) and a BLM sensitive plant species."o Map 3-13 needs to be updated to show the presence of Grand Junction milkvetch and Colorado Hookless cactus as the text on page 871 indicates both are present in this area. A recent hike in this area shows prolific big game use in the area, we assume it is their refuge from surrounding motorized use. Recent hikes have confirmed the presence of Pondersa Pine atop Gibbler Mtn. This designation would aid in increasing the number of healthy Pondersa Pines within the NCA, an action which would be in accordance with the Alternative E management objective on page 52. o Map 3-3 needs to be updated to reference the presence of Pondersa Pine in this area. The designation of this expanded ACEC in the final plan, would address the need for non-motorized trails in this portion of the NCA, an opportunity currently missing from the draft plan. And to reiterate, these protections are needed for the myriad of resources found here, especially because they are to be located within an SRMA focused on motorized use

## Route: 1176

### Segment: 1703

## Designation

### Current Designation

Closed (Rehab)

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I moderate
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

**Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, GUSG –PSD in winter habitat

### Rationale for Decision

- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range
- Route was designated to minimize fragmentation of Gunnison sage-grouse habitat.

### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

- No public comments for this Route

### Route: 1177

#### Segment: 1705

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- SOIL Soils Steep Slopes 40%
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

#### Rationale

##### Designation Criteria

- **Minimize Damage:** Soils -PSD slopes >40%, Fragile soils SSR
- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, Bighorn – SSR -- summer range

##### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range
- Route was designated to reduce the miles of motorized and mechanized routes in bighorn sheep habitat.

## Route: 1186

### Segment: 1697

#### Designation ?

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- RIPARIAN Riparian 1 stream crossing
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I moderate
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches >60 acres

### Rationale

#### Designation Criteria

- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, GUSG –PSD in winter habitat

#### Rationale for Decision

- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range
- Route was designated to minimize fragmentation of Gunnison sage-grouse habitat.

### Previous Alternatives Analyzed

**Alternative A:** Vehicles under 50" wide

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 1186

- No public comments for this Route

## Route: 1187

### Segment: 1701

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation access to dispersed campsite
- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- RIPARIAN Riparian 1 stream crossing
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I moderate
- SMAs Gibbler Mountain ACEC
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches >60 acres

#### Rationale

##### Designation Criteria

- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, GUSG –PSD in winter habitat, Sage-Minimize fragmentation

##### Rationale for Decision

- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range
- Route was designated to minimize fragmentation of Gunnison sage-grouse habitat.
- Route was designated to reduce fragmentation of sagebrush patches

## Public Comments On Route: 1187

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 00000135-35

• Gibbler Gulch/Gibbler MountainThe following are route recommendations for Gibbler Gulch and Gibbler Mountain which together make a nice amount of relatively undisturbed open space and habitat. This area is less roaded and fragmented than other parts of Cactus Park NCA unit. It may be less impacted by grazing than other areas and harbors critical big game habitat. Hoping to send you maps next week showing these areas. In particular I recommend keeping recreational use out of all the creek drainages in the upper Gibbler Gulch area, and closing roads on the adjacent mesas. Putting a motorized or mountain bike route over Gibbler Mountain would irreversibly change the natural quality, silence and solitude of this remote landscape. Lands that are currently undeveloped should stay that way as so much land in the NCA is criss-crossed with routes and trails.For example there is potential for retaining the remote "open space" setting of Gibbler Mountain, as specified in the 2007 Colorado BLM Recreation and Visitor Strategy, by closing 1227(!) (especially), 1269, 1309, 2674, 2673, 1249, 1171, 981, 980, 1150, 1154, 977, 979, 1312, 1310, 1334, 1330, 1344, 1286, 1242, 1213, 1238, 1242, 1204, 1213, 1239, 1214, 1212, 1200, 1263, 1204, 1198, 1187, 1210. Limit motorized traffic to roads 15 and 8.Similarly, there is potential for a large unmotorized area extending west from road 15 and Gibbler Gulch on the east, to road 8 on the west. To create an undisturbed nonmotorized area I recommend closing routes 1526, 2666, 1571, 2665, 1608, 1570, 1605, 1561, 1516, 1606, 1561, 1609 1633, 2664, 2663, 1412, 1424, 1456 1434, 1513 , 1249, 1269.Many of these are duplicative, serve no purpose, or are dead ends, simply pioneered randomly, and should be closed.

## Route: 1188

### Segment: 1683

#### Designation

• For the Gunnison Slopes it is not sufficient to rely on topology to protect the area from user-created road intrusions. You can see that from the existence of routes 1039, 1018 and 1019. At the very least to protect Gunnison Slopes a locked gate and fencing should be added at the intersection of routes 941 and 1192. The protection of the bighorn sheep production area is paramount to the long-term health and well-being of the bighorn sheep herds.

Organization, commenter: Janice Shepherd

Comment ID: 000000106-7

• I believe The Cactus Park ATV SRMA should not include Gibbler Mountain nor the roadless area surrounding Gibbler Mountain (see more comments later about Gibbler Mtn). Also I believe The Cactus Park ATV RMA should not include the roadless area bounded by 941 and 1192. While recreation was part of the Omnibus act that created the NCA, it should be included in a balanced way. Protecting roadless spaces in an area viewable by people enjoying ATVing seems to me like a great balance. "Look at that great view!" should be included in their enjoyment of the NCA.

• 1292, 1315, 1331, 1340 (Easternnob' flanked to the south by Triangle Mesa and to the north by the Ninemile Hill ERMA): A recommendation for these routes be left open for hike and horse was included in the QTG's scoping comments. In the draft's preferred alternative they are slated for closure. The QTG again states our interest in this being left open for quiet users, but we expand that list to include mountain bikers. We envision this route being extended to continue around the rim, eventually crossing 1192, before continuing along the rim northward as part of a long rim quiet trail within Ninemile Hill. Once reaching the Ninemile Hill ERMA, after crossing route 830, the rim route would change to just horse and foot to be consistent with the objectives of the ERMA. This is consistent with our recommendation of eliminating overlap between the ATV SRMA and the Bighorn Sheep Production, Winter and Summer Areas

Organization, commenter: Quiet Trails Group, Sherry Schenk

Comment ID: 000000115-79

• [Re: Cactus Park SRMA] The QTG believes the shape of the SRMA should be adjusted on the east corner to avoid any overlap with the Bighorn sheep productive area. From page 69 we see that Alt E has no new motorized routes being created in Bighorn Sheep Productive area. The purpose behind the Cactus Park SRMA is to manage the creation of new ATV routes. So overlapping the 2 areas does not make sense. This concern has been shared with the Advisory Council. The proposed action on page 69 to deal with fragmentation and un-fragmentation of Bighorn Sheep summer concentration areas is too complex and will likely not be satisfactory given the habit-forming tendencies of Bighorn Sheep. Instead, Cactus Park SRMA should be reduced to not include the portion that overlaps the Winter/Summer range of Bighorn Sheep. In addition to simplifying the management, this will also address the concern that motorized recreation should not take priority over other resources in that area, which are not limited to Bighorn Sheep. BLM could consider incorporating this area into the Ninemile Hill ERMA with the caveat that the Alt E motorized routes in the area 847-848-830, 998-1017-1110-1108-993-995-1123-1129-1170-1169-1192-941 would be left as designated in Alt E (some full motorized, some ATV). The QTG is quite concerned about the SRMA status for this landscape. While we hope that a network of quality ATV routes will diminish the number of new user-created routes developing per year, we are very concerned about the prioritization of recreation over the myriad of other resources which are present in a high-density within this sensitive landscape. We think that Congress - in the Omnibus Act that created the NCA - had envisioned a balanced approach to "long-term conservation and protection of unique and important values" where recreation was supposed to have the same priority as other values. We would like to see more explicit protections of resources.

• Gunnison Slopes Recommendation: Gunnison Slopes should be classified as Lands Managed for Wilderness Characteristics, and close the road to Dad's Flat (the extension of 1192?) except for administrative use. Rationale: My strongest objection to the preferred alternative is in Lands Managed for Wilderness Characteristics, Map 2-11E. The Gunnison Slopes section, between the Tabeguache Trail and the Gunnison River, from the Dominguez Wilderness almost to Whitewater, was selected as Lands Managed for Wilderness Characteristics in Alternative B. It really should have that designation in the final RMP as well. In the lead-up to the original creation of the NCA, I advocated vigorously that this section be added to what would become the Dominguez Wilderness. I have explored this area several times on foot and floating the river, and there is no question of its wilderness characteristics. It is a gem!! Because of the cliff band along the top of the area, there is no vehicular access into the area below the cliffs for something like 9 miles. There are even very few places for access by foot, and those few are well hidden, and scarcely ever used. The preferred alternative calls for closure of the road from near Cactus Park to Dad's Flat, except for administrative use, which I heartily endorse. With the closure of that road, public vehicular access will be prohibited for nearly twenty miles along the river, and the wilderness value of the Gunnison Slopes will increase dramatically. Below that cliff is one of the wildest places I have experienced anywhere in the entire region. Aside from the railroad line along the river, there is almost no sign of human activity for miles. Walk around and on the ground there is some evidence of livestock grazing and occasional evidence for the keen-eyed of ancient tool-making, but almost sign of no human activity in modern times. The views are spectacular and plentiful, with almost no permanent sign of human presence. The quiet and isolation, whether experienced on foot or by river float, are profound. The difficulty of access at the cliff band (actually not that difficult if one finds the right location and makes the effort), rewards the user with solitude, naturalness, primitive unconfined recreation (since the vegetative and geologic factors allow foot travel almost anywhere), and a truly unique experience. Recommendation 2: the area above the cliff band be managed to preserve the solitude, isolation and naturalness of the area below the cliff band. That would mean no motorized vehicular traffic anywhere within 100 feet of the cliffs, and in most places, no motorized vehicles between the Tabeguache Trail and the cliffs. The only vehicular access would be at currently well-established and designated access points, which should end with clearly marked signage well back from the rim (see Travel Management below). Visitors would appreciate the views all the more if they have to walk a few feet to see them

Organization, commenter: James Riddell

Comment ID: 000000123-5

• Travel Management Recommendation 1: no motorized vehicles within 100 feet of the rim above the Gunnison Slopes, and access to motorized vehicles to approach the cliffs should only be on two currently well-established roads that end well back from the rim, specifically routes 848 and 1192 in the preferred Alternative E. Rationale: preserve the naturalness, solitude and isolation of the area below the cliffs.

• 1. We have identified known potential issues and criteria to guide the planning process based on lands and resources in the planning area. Please provide comments on these issues and criteria, and/or identify other issues or criteria that you think should be considered (If your comment pertains to a specific issue or criteria, please use the reference code, e.g. "PCI") 2. What areas within the Dominguez-Escalante National Conservation Area or Dominguez Canyon Wilderness do you value? Why? Area 1 Great views birdwatching, wildlife photography & some hiking Area 2 Viewing from bluffs from above Area 3 I use this area a good many times a year Area 4 I can't get to this area to use. Area 5 I use any road or ATV trail that's OPEN 3. Please provide any additional comments that you have regarding this project. Comments on attach sheet. Maps with GPS routes in red. Things that I want to comment on concerning Dominguez-Escalante NCA. 1. Cactus Park area is used by the motorized community, Mountain bikers, Hikers, and Etc. There are a lot of roads, jeep & ATV trails that need to be open for everyone to use. The area has been used for cattle grazing, Christmas tree cutting, fire wood, and many other uses. As the population grows in this area there needs to be public land open for their use. 2. As the motorized roads, double track and single track trails are closed; much less area is left for folks to use. Any Wilderness and Wilderness Study Area restricts firefighting, timber cutting (to help control pine and piñon beetle) and controlling ground cover which will stop the massive fuel for fires) and weed control. Colorado is having large fires now because of these large amounts of fuel. 3. The attached maps have GPS routes shown in red that I have GPS'ed at different times. Please note that I have used these routes at different times. All these routes are jeep accessible; many are used by 2 wheel drive pickups. I almost never see hikers when I'm out using these routes on my ATV or Pickup. [ED: The D-E NCA's Recreation Planner identified the route numbers for routes highlighted on the map mentioned in this comment: 621, 624, 676, 649, 641, 743, 676, 741, 97, 96, 744, 733, 15, 838, 18, 945, 26, 847, 848, 941, 1192, 1292, 1377]

• [ED: Following are the text (in quotes) and the D-E NCA Recreation Planner's interpretation of what the commenter wrote on the maps they submitted during public scoping for the Dominguez RMP. The Rec Planner also identified the route numbers highlighted on the maps]: Routes 741 and 848 "needs ATV connector. Cultural sites can easily be avoided by the 50 foot policy." Routes 26 and 1017 "needs ATV connector." Route 941 "must remain open." Route 1017 "should be ATV route." There should be an "ATV connect" between routes 1198 and 1263. The following text was highlighted in orange "Highlighted routes are routes used often by WSATVA and other ATVs." in addition to all the routes mentioned previously, the following routes were highlighted in orange: 743, 97, 96, 26, 813, 842, 15, 847, 1393, 1192, 1292. [ED: On a second map, the commenter highlighted additional routes]: The following are "routes used often by WSATVA": 1516, 1571, 1605, 1633, 15, 1641, 1221. "SC-5" connecting routes 1605 and 1633 " and "SC-6" connecting routes 1516 and 1605 "need to become new ATV routes connecting these deadends." [ED: A map of the Gibbler Mountain area had additional text and routes]. "Highlighted routes" which "are often used by WSATVA 3 seasons" are as follows: 1235, 1221, 1409, 1310, 1263, 1198, 15. Route 1235 [is or should be] "an ATV route."

## Route: 1193

### Segment: 1681

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation access to dispersed campsite
- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- SMAs Gibbler Mountain ACEC
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, GUSG –PSD in winter habitat
- **Wilderness / Natural Area:** ACEC – Gibbler- PSD paleo

##### Rationale for Decision

- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range
- Route was designated to minimize fragmentation of Gunnison sage-grouse habitat.
- Route was designated to protect important paleontological resources within the Gibbler Mountain ACEC

#### Previous Alternatives Analyzed

## Public Comments On Route: 1193

Organization, commenter: Quiet Trails Group, Sherry Schenk

Comment ID: 000000115-32

• Gibbler Mountain Area of Critical Environmental Concern: The QTG supports Gibbler Mtn ACEC from Alt D because protections are needed for the myriad of resources found here, especially if it is going to be located within an SRMA focused on motorized use. Further, we think the ACEC should be extended to include all of Gibbler Mountain. Surface-disturbance limitations and a rule of no motorized use should be included for the full ACEC, including this recommended expansion. With this expansion the full ACEC would be bounded by: Routes: 1235-1236-1228-1409-1221-15-8-887-18-17-945-947-951-954-959-962-966-969-1005-1006-1021-1022-1023-1024-1047-1150-1249-8, with 1269, and 1173-1174-1198-1200-1193 cherry-stemmed into the area. The reasons we support this designation are as follows: Roadless areas are an endangered resource in the high-desert west. Categorically, roadless areas especially within NCAs- should be protected as such. By making it a larger area not only does it protect this roadless area but also it better disguises the location of the dinosaur tracks and fossils which we see from page 872," are regionally significant and easily damaged". Per page 871, "This site also supports one of the best known occurrences (A-ranked) of Grand Junction milkvetch (Astragalus limifolius), a globally vulnerable plant (G3/S3) and a BLM sensitive plant species."o Map 3-13 needs to be updated to show the presence of Grand Junction milkvetch and Colorado Hookless cactus as the text on page 871 indicates both are present in this area. A recent hike in this area shows prolific big game use in the area, we assume it is their refuge from surrounding motorized use. Recent hikes have confirmed the presence of Ponderosa Pine atop Gibbler Mtn. This designation would aid in increasing the number of healthy Ponderosa Pines within the NCA, an action which would be in accordance with the Alternative E management objective on page 52. o Map 3-3 needs to be updated to reference the presence of Ponderosa Pine in this area. The designation of this expanded ACEC in the final plan, would address the need for non-motorized trails in this portion of the NCA, an opportunity currently missing from the draft plan. And to reiterate, these protections are needed for the myriad of resources found here, especially because they are to be located within an SRMA focused on motorized use

## Route: 1196

• Gibbler Mountain Area of Critical Environmental Concern: The QTG supports Gibbler Mtn ACEC from Alt D because protections are needed for the myriad of resources found here, especially if it is going to be located within an SRMA focused on motorized use. Further, we think the ACEC should be extended to include all of Gibbler Mountain. Surface-disturbance limitations and a rule of no motorized use should be included for the full ACEC, including this recommended expansion. With this expansion the full ACEC would be bounded by: Routes: 1235-1236-1228-1409-1221-15-8-887-18-17-945-947-951-954-959-962-966-969-1005-1006-1021-1022-1023-1024-1047-1150-1249-8, with 1269, and 1173-1174-1198-1200-1193 cherry-stemmed into the area. The reasons we support this designation are as follows: Roadless areas are an endangered resource in the high-desert west. Categorically, roadless areas especially within NCAs- should be protected as such. By making it a larger area not only does it protect this roadless area but also it better disguises the location of the dinosaur tracks and fossils which we see from page 872," are regionally significant and easily damaged". Per page 871, "This site also supports one of the best known occurrences (A-ranked) of Grand Junction milkvetch (Astragalus linifolius), a globally vulnerable plant (G3/S3) and a BLM sensitive plant species."o Map 3-13 needs to be updated to show the presence of Grand Junction milkvetch and Colorado Hookless cactus as the text on page 871 indicates both are present in this area. A recent hike in this area shows prolific big game use in the area, we assume it is their refuge from surrounding motorized use. Recent hikes have confirmed the presence of Ponderosa Pine atop Gibbler Mtn. This designation would aid in increasing the number of healthy Ponderosa Pines within the NCA, an action which would be in accordance with the Alternative E management objective on page 52. o Map 3-3 needs to be updated to reference the presence of Ponderosa Pine in this area. The designation of this expanded ACEC in the final plan, would address the need for non-motorized trails in this portion of the NCA, an opportunity currently missing from the draft plan. And to reiterate, these protections are needed for the myriad of resources found here, especially because they are to be located within an SRMA focused on motorized use

• Gibbler Gulch/Gibbler MountainThe following are route recommendations for Gibbler Gulch and Gibbler Mountain which together make a nice amount of relatively undisturbed open space and habitat. This area is less roaded and fragmented than other parts of Cactus Park NCA unit. It may be less impacted by grazing than other areas and harbors critical big game habitat. Hoping to send you maps next week showing these areas. In particular I recommend keeping recreational use out of all the creek drainages in the upper Gibbler Gulch area, and closing roads on the adjacent mesas. Putting a motorized or mountain bike route over Gibbler Mountain would irreversibly change the natural quality, silence and solitude of this remote landscape. Lands that are currently undeveloped should stay that way as so much land in the NCA is criss-crossed with routes and trails.For example there is potential for retaining the remote "open space" setting of Gibbler Mountain, as specified in the 2007 Colorado BLM Recreation and Visitor Strategy, by closing 1227(!) (especially), 1269, 1309, 2674, 2673, 1249, 1171, 981, 980, 1150, 1154, 977, 979, 1312, 1310, 1334, 1330, 1344, 1286, 1242, 1213, 1238, 1242, 1204, 1213, 1239, 1214, 1212, 1200, 1263, 1204, 1198, 1187, 1210. Limit motorized traffic to roads 15 and 8. Similarly, there is potential for a large unmotorized area extending west from road 15 and Gibbler Gulch on the east, to road 8 on the west. To create an undisturbed nonmotorized area I recommend closing routes 1526, 2666, 1571, 2665, 1608, 1570, 1605, 1561, 1516, 1606, 1561, 1609 1633, 2664, 2663, 1412, 1424, 1456 1434, 1513 , 1249, 1260. Many of these are duplicative, serve no purpose, or are dead ends, simply pioneered randomly, and should be closed.

• [ED: Following are the text (in quotes) and the D-E NCA Recreation Planner's interpretation of what the commenter wrote on the maps they submitted during public scoping for the Dominguez RMP. The Rec Planner also identified the route numbers highlighted on the maps]: Routes 741 and 848 "needs ATV connector. Cultural sites can easily be avoided by the 50 foot policy." Routes 26 and 1017 "needs ATV connector." Route 941 "must remain open." Route 1017 "should be ATV route." There should be an "ATV connect" between routes 1198 and 1263. The following text was highlighted in orange "Highlighted routes are routes used often by WSATVA and other ATVs." in addition to all the routes mentioned previously, the following routes were highlighted in orange: 743, 97, 96, 26, 813, 842, 15, 847, 1393, 1192, 1292. [ED: On a second map, the commenter highlighted additional routes]: The following are "routes used often by WSATVA": 1516, 1571, 1605, 1633, 15, 1641, 1221. "SC-5" connecting routes 1605 and 1633 " and "SC-6" connecting routes 1516 and 1605 "need to be added new ATV routes connecting these deadends." [ED: A map of the Gibbler Mountain area had additional text and routes]. "Highlighted routes" which "are often used by WSATVA 3 seasons" are as follows: 1235, 1221, 1409, 1310, 1263, 1198, 15. Route 1235 [is or should be] "an ATV route."

## Route: 1199

### Segment: 1674

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- SOIL Soils Steep Slopes 40%
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

#### Rationale

##### Designation Criteria

- **Minimize Damage:** Soils -PSD slopes >40%, Fragile soils SSR
- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, Bighorn – SSR -- summer range

##### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range

Route was designated to reduce the miles of motorized and mechanized routes in bighorn sheep habitat.

## Public Comments On Route: 120

Organization, commenter: Janice Shepherd

Comment ID: 00000106-209

- Alt E's closure of duplicate and braided routes: There are many short braided routes like 102, 112, 120, and 349 throughout the NCA. I support the closing and rehabbing of them if they don't lead to nice dispersed campsites. Hiking passed them makes me think that no one cares about proper planning (if I didn't know the history of their creation). Duplicated braided routes are just eating up the area, damaging vegetation in areas where it is such a struggle for vegetation to survive. Now that this is an NCA, I support the BLM's intent in Alt E to close and re-vegetate such braided routes. I believe it is important to show respect for the protection of the land and its beauty by minimizing routes to those that are useful and fun and eliminating such unnecessary braids.

## Route: 1200

Putting a motorized or mountain bike route over Gibbler Mountain would irreversibly change the natural quality, silence and solitude of this remote landscape. Lands that are currently undeveloped should stay that way as so much land in the NCA is criss-crossed with routes and trails.For example there is potential for retaining the remote "open space" setting of Gibbler Mountain, as specified in the 2007 Colorado BLM Recreation and Visitor Strategy, by closing 1227(!) (especially), 1269, 1309, 2674, 2673, 1249, 1171, 981, 980, 1150, 1154, 977, 979, 1312, 1310, 1334, 1330, 1344, 1286, 1242, 1213, 1238, 1242, 1204, 1213, 1239, 1214, 1212, 1200, 1263, 1204, 1198, 1187, 1210. Limit motorized traffic to roads 15 and 8.Similarly, there is potential for a large unmotorized area extending west from road 15 and Gibbler Gulch on the east, to road 8 on the west. To create an undisturbed nonmotorized area I recommend closing routes 1526, 2666, 1571, 2665, 1608, 1570, 1605, 1561, 1516, 1606, 1561, 1609 1633, 2664, 2663, 1412, 1424, 1456 1434, 1513 , 1249, 1269.Many of these are duplicative, serve no purpose, or are dead ends, simply pioneered randomly, and should be closed.

## Route: 1201

### Segment: 1669

#### Designation [?](#)

## Current Designation

Closed (Rehab)

## Mitigation Criteria

- No Mitigation Criteria for this Route Segment

## Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- SOIL Soils Steep Slopes 40%
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

## Rationale

### Designation Criteria

- **Minimize Damage:** Soils -PSD slopes >40%, Fragile soils SSR
- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, Bighorn – SSR -- summer range

### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range
- Route was designated to reduce the miles of motorized and mechanized routes in bighorn sheep habitat.

## Public Comments On Route: 1204

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 000000135-35

- Gibbler Gulch/Gibbler MountainThe following are route recommendations for Gibbler Gulch and Gibbler Mountain which together make a nice amount of relatively undisturbed open space and habitat. This area is less roaded and fragmented than other parts of Cactus Park NCA unit. It may be less impacted by grazing than other areas and harbors critical big game habitat. Hoping to send you maps next week showing these areas. In particular I recommend keeping recreational use out of all the creek drainages in the upper Gibbler Gulch area, and closing roads on the adjacent mesas. Putting a motorized or mountain bike route over Gibbler Mountain would irreversibly change the natural quality, silence and solitude of this remote landscape. Lands that are currently undeveloped should stay that way as so much land in the NCA is criss-crossed with routes and trails.For example there is potential for retaining the remote "open space" setting of Gibbler Mountain, as specified in the 2007 Colorado BLM Recreation and Visitor Strategy, by closing 1227(!)

(especially), 1269, 1309, 2674, 2673, 1249, 1171, 981, 980, 1150, 1154, 977, 979, 1312, 1310, 1334, 1330, 1344, 1286, 1242, 1213, 1238, 1242, 1204, 1213, 1239, 1214, 1212, 1200, 1263, 1204, 1198, 1187, 1210. Limit motorized traffic to roads 15 and 8. Similarly, there is potential for a large unmotorized area extending west from road 15 and Gibbler Gulch on the east, to road 8 on the west. To create an undisturbed nonmotorized area I recommend closing routes 1526, 2666, 1571, 2665, 1608, 1570, 1605, 1561, 1516, 1606, 1561, 1609 1633, 2664, 2663, 1412, 1424, 1456 1434, 1513 , 1249, 1269. Many of these are duplicative, serve no purpose, or are dead ends, simply pioneered randomly, and should be closed.

## Public Comments On Route: 1210

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 000000135-35

• Gibbler Gulch/Gibbler MountainThe following are route recommendations for Gibbler Gulch and Gibbler Mountain which together make a nice amount of relatively undisturbed open space and habitat. This area is less roaded and fragmented than other parts of Cactus Park NCA unit. It may be less impacted by grazing than other areas and harbors critical big game habitat. Hoping to send you maps next week showing these areas. In particular I recommend keeping recreational use out of all the creek drainages in the upper Gibbler Gulch area, and closing roads on the adjacent mesas. Putting a motorized or mountain bike route over Gibbler Mountain would irreversibly change the natural quality, silence and solitude of this remote landscape. Lands that are currently undeveloped should stay that way as so much land in the NCA is criss-crossed with routes and trails.For example there is potential for retaining the remote "open space" setting of Gibbler Mountain, as specified in the 2007 Colorado BLM Recreation and Visitor Strategy, by closing 1227(!) (especially), 1269, 1309, 2674, 2673, 1249, 1171, 981, 980, 1150, 1154, 977, 979, 1312, 1310, 1334, 1330, 1344, 1286, 1242, 1213, 1238, 1242, 1204, 1213, 1239, 1214, 1212, 1200, 1263, 1204, 1198, 1187, 1210. Limit motorized traffic to roads 15 and 8.Similarly, there is potential for a large unmotorized area extending west from road 15 and Gibbler Gulch on the east, to road 8 on the west. To create an undisturbed nonmotorized area I recommend closing routes 1526, 2666, 1571, 2665, 1608, 1570, 1605, 1561, 1516, 1606, 1561, 1609, 1633, 2664, 2663, 1412, 1424, 1456, 1434, 1513, 1249, 1269.Many of these are duplicative, serve no purpose, or are dead ends, simply pioneered randomly, and should be closed.

## Public Comments On Route: 1219

Organization, commenter: Janice Shepherd

Comment ID: 00000106-221

- Triangle Mesa route should be left open to horse and foot: 1416, 1406, 1219. I've hiked the loop part and it has some great views down into canyons of the wilderness that are breath-taking in wonder and beauty. I love seeing familiar places (in this case Big Dominguez Canyon) from a different perspective (above) as it brings a fresh view of familiar ground. This route is also listed in the popular book "Grand Junction Trails and Camping Guide" by Nattana Johnson.

Organization, commenter: Janice Shepherd

Comment ID: 00000106-66

- Page 101 Zone 2 trails and solitude support the objective for Zone 2 of "Wilderness Zone 2: Manage recreation to protect outstanding opportunities for solitude (defined as an average number of contacts per visit of 4 or fewer)." I believe a good way to achieve this objective is by having trails in Zone 2 that lead people away from the main Big Dominguez Canyon Trail. Therefore I don't think the management action on page 102 of "Construct new routes only when accompanied by a comparable number of route closures that improves opportunities for solitude." is the right approach. The majority of hikers stay on trails. Not only is this true because so many hikers have been trained to stay off cryptobiotic soil ("Don't bust the crust") but because most hikers are just more comfortable on a trail. They don't want to get lost, they believe the trail will take them to the interesting locations that they'd otherwise miss if they went cross country and many believe they are required to stay on trails. The majority of visitors to the Wilderness are going to access it from the Bridgeport Trail head. What better way to spread those visitors out then to provide multiple directions for them to go, which means multiple trails. The Dry Fork Canyon trail accessed from 2610 (or equivalent) would be one diversion. I know several people who enjoy hiking that canyon with their friends. A trail up the canyon to the north of the private bridge would be another diversion. That trail could join up to 1219, Triangle Mesa loop trail. I've hiked that canyon and then hiked the Triangle Mesa Loop and it was very interesting to see Big Dominguez Canyon from a fresh perspective. The BLM needs to work with the local landowner to have the "private property no trespassing signs" removed that are to the north of the private bridge (not the ones on the bridge, which is clearly private property), assuming that BLM can prove this is public land (see IMG\_5040). So I think the management action for Zone 2 should be to keep the trail density low but add trails in diverse directions to spread users away from other users and thus achieve the desired solitude. The current Alt E management action for trail construction in zone 2 is too inflexible.

Organization, commenter: Quiet Trails Group, Sherry Schenk

Comment ID: 00000115-52

- [Dominguez Canyon Wilderness TMP-Level Comments]Zone 2Triangle Mesa: Quiet Trails Group would like to see the Triangle Mesa trail kept open in the Wilderness as a hiking and horse trail assuming that we can protect the special resources in the area. Routes 1416-1406-1219 should be left open to horse and foot with their connection to 1417 (horse and foot in Alt E).

## Route: 122

### Segment: 2309

## Designation [?](#)

### Current Designation

Closed (Rehab)

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E
- SSPLANT Special Status Species Colorado hookless cactus

## Rationale

### Designation Criteria

- **Minimize Damage:** Cactus – reduce density within 200m, NHT – close routes for setting
- **Minimize Harassment:** PPSV- Minimize fragmentation

### Rationale for Decision

- Route was designated to reduce the density of routes within 200 meters of known Colorado hookless Cactus occurrences.
- Route was designated to improve natural setting along the Old Spanish National Historic Trail.
- Route was designated to reduce fragmentation in Priority Vegetation types

## Public Comments On Route: 1220

Organization, commenter: Centennial Canoe Outfitters, Inc., Marty Genereux

Comment ID: 00000059-2

• Theme of My Comments: To return the Gunnison River corridor to the backcountry experience it once was years ago. Dominguez Canyon and the surrounding areas represent a recreational jewel that is slowly being "loved to death." However, I'm confident that with teamwork and foresight it can rebound. I'm ready and willing to help in the RMP process wherever needed. Permitting:Problem - Currently, there is no limit to the number of people accessing Dominguez Canyon. Reaching the canyon by boat and the sense of accomplishment it provided has given way to driving a car and crossing a footbridge.Solution Why reinvent the wheel? The Ruby-Horsethief section of Colorado River (CR) serves as a model of success when dealing with overcrowding. Granted, using the CR as a model would not be comparing apples to apples, mainly because the CR offers more camping and hiking options than the Gunnison River---all the more reason to regulate access. I don't believe private and commercial boaters should have an exclusive right to any area along the river. However, restricting the number of people would help return the Gunnison to a backcountry experience instead of the carnival atmosphere it is today. I would vote yes to see a paid-permit system based on historic use in place on the Gunnison River, primarily in Dominguez Canyon. Further, close the mouth of Dominguez Canyon for non-boating overnight camping from May 1 to October 1. Editorial:I feel a relative comparison to Dominguez Canyon is Black Rocks and Westwater Canyon, on the Colorado River. Neither, location has a roadway or footbridge accessing it. A huge calamity would result from private and commercial boaters alike if the Amtrak train stopped at Black Rocks so passengers could walk across a footbridge to hike Knowles Canyon. Why is Dominguez Canyon any different? I favor venturing to a special place like Dominguez Canyon by boat versus car. Moratorium:Problem - Overcrowding. Solution Why exacerbate an existing problem? I would vote yes on a moratorium for new commercial permits. Competitive Events:I feel large racing or competitive events would be better held in metropolitan areas equipped to deal with crowds, i.e. traffic, noise, trash, etc.Motorized Activities: Keep motorized activities separate from non-motorized by designating specific areas as not to conflict with each other. No motorized craft on the Gunnison River. Stewardship:Continue requiring groovers, firepans, ground tarps and "Leave No Trace" protocols. Escalante Canyon Rd. Put-in & Whitewater Take-out: Problem Both of these locations are in need of improvement. The put-in ramp is too small for the amount of traffic it receives and the Whitewater takeout is too small and restricted by the train tracks. It is very common for both ramps to be overwhelmed with boaters on busy launch and take-out days, i.e. Friday, Saturday, Sunday.Solution Realizing that the railroad restricts progress in both of these locations, I'm at a loss for a solution other than to relocate both of them. BLM land can be found and possibly utilized upstream of the Escalante Bridge, river right. Years ago, Andy Windsor and I explored this area and it had potential. My only (long shot) suggestion for the Whitewater take-out would be to approach the private land owner on river-left in Whitewater. This location is directly across from the existing Whitewater, BLM take-out. I spoke to this landowner years ago and he was not receptive to the idea. Plus, the dirt road to access this take-out is not in ideal condition. Hunting:I'm in favor of allowing hunting during hunting seasons. Horses:I'm in favor of horseback riding. Outfitter Group Size:I favor 25 heartbeats "plus" guides.

Organization, commenter: Escalante Ranch, Richard Miller

Comment ID: 000000171-7

• IV. TRANSPORTATION AND TRAVEL MANAGEMENTMr. Miller's owns various parcels of private property and multiple water diversions in the area in question, and must access these lands via roads and trails which currently cross publicland. In addition, Mr. Miller must necessarily access various roads and trails to in the course of managing his livestock operation. The EIS proposes closing various roads and trails to publicmotorized travel, to minimize resource damage caused by the public on both public and privatelands. EIS at 157, 187. Mr. Miller supports the BLM's proposal to restrict public access to protect public and private property, but only so long as he is not restricted from using these roads as may be necessary to access his private lands and manage his livestock operation. Thus, to the extent that the BLM wishes to close roads to motorized public traffic, it should simultaneously grant Mr. Miller legal, administrative access. In addition, Mr. Miller notes that he would be entitled to a formal decision, subject to appeal, prior to the BLM restricting access to his private property and/or otherwise impacting his livestock operation.Mr. Miller notes that the BLM has mis-classified many routes. See EIS Map N -1 e. Specifically, many routes which have historically been used to access private land and waterdivisions, and/or are necessary to maintain livestock improvements or otherwise manage and operate Mr. Miller's livestock operation, have been incorrectly labeled as closed or otherwise restricted in their use. These routes should be classified as "administrative," to recognize these historic uses and to allow for continued uses consistent therewith. The Routes which have been incorrectly classified and which should be classified as "administrative" are as follows: Routes 460, 1220, 1243, 1245, 2003, 2053, 2073, 2086, 2089, 2121, 2122, 2126, 2156, 2166, 2168, 2171~2172, 2177, 2180, 2336, 2342, 2354, 2408, 2412, 2445, 2581, 2582, 2583, 2585, 2587, 2588, 2590, 2591, 2593, 2595, 2596, 2598, 2599, 2612, 2613, 2622, 2691, 3011, 3048, 3070, 3131, 3141, and 3158. See EIS Map N-1e. In addition, Route 2072 is not completely depicted on the map, in that it extends down the river, across BLM and private property, an additional 2-3 miles, and likewise Route 3048 extends an additional 0.75 miles and leads to private property. Id. FinaUy, Map N-1e incorrectly labels Mr. Miller's privately owned bridge, which crosses the Gunnison River at the Bridgeport area, as "administrative." I d. Mr. Miller requests that the BLM correct these errors and mis-classifications.

## Current Designation

Closed (Rehab)

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- RIPARIAN Riparian 1 stream crossing
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Direct impact
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- **Minimize Damage:** Riparian—ephemeral streams SSR 30 m, Fragile soils SSR
- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close

### Rationale for Decision

- Route was designated to minimize travel routes in and crossing riparian and wetland areas.
- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

Organization, commenter: Western Slope ATV Association, Steve Chapel

Comment ID: 000000089-10

• Routes such as the Gibler Gulch route, Farmer Canyon routes and the main routes in Wagon Park should remain open in December and January. A more prudent closure, if even needed, would be during "mud season" in the area. I would propose this to be from Mid February to April. BLM should tell Parks & Wildlife that this approach would make much more sense and accomplish the same thing as a five month closure.

Organization, commenter: Western Slope ATV Association, Steve Chapel

Comment ID: 000000089-9

• The RMP suggests that routes such as the small road up Gibler Gulch be closed until certain areas are repaired or rerouted. Adopting that kind of policy is not acceptable. It should remain open and if there are any places of critical concern for repair, then local motorized groups should be consulted for input and help to mitigate the concern. Trail work can be done to fix anything while the trail remains open.

Organization, commenter: Janice Shepherd

Comment ID: 00000106-110

• o The Gibbler Mountain ACEC as shown on map 2-5E does not encompass the mountain itself but only its northern slopes. I would prefer to see a non-motorized/non-mechanized ACEC for the whole of Gibbler Mountain and its surrounding slopes, bounded by the routes: 1235-1236-1228-1409-1221-15-8-887-18-17-945-547-951-959-966-969-1005-1006-1021-1022-1023-1024-1047-1150-1249, with 1269 left open to motorized use as a motorized cherry-stemmed route into the area. This would keep this wonderful roadless area (though too small a space for the inventory) roadless into the future. The text on page 871 indicates the area has one of the "best known" populations of the rare plant Grand Junction milkvetch as well as a large collection of fragile dinosaur tracks. The Special Species map from the Open House needs to be updated with this GJ milkvetch population. This ACEC representing a hole in the SRMA would properly protect all three features: roadless-ness, dinosaur tracks, and GJ milkvetch, at the cost of less than 5000 acres. This protection is consistent with this being a National Conservation Area and not a National Recreation Area. This position also has support from the D-E NCA Advisory Council. I recently hiked up to the top of the northern portion of Gibbler Mountain with a friend. We were inspired by the challenging terrain for hiking and the awesome views (photo IMG\_9998). We both had a great feeling of accomplishment when we reached the top. There is plenty of evidence of big game animals using the Gibbler Mountain as a quiet sanctuary from the surrounding motorized areas. This proposed ACEC would benefit them.

Organization, commenter: Quiet Trails Group, Sherry Schenk

Comment ID: 00000115-32

• Gibbler Mountain Area of Critical Environmental Concern: The QTG supports Gibbler Mtn ACEC from Alt D because protections are needed for the myriad of resources found here, especially if it is going to be located within an SRMA focused on motorized use. Further, we think the ACEC should be extended to include all of Gibbler Mountain. Surface-disturbance limitations and a rule of no motorized use should be included for the full ACEC, including this recommended expansion. With this expansion the full ACEC would be bounded by: Routes: 1235-1236-1228-1409-1221-15-8-887-18-17-945-947-951-954-959-962-966-969-1005-1006-1021-1022-1023-1024-1047-1150-1249-8, with 1269, and 1173-1174-1198-1200-1193 cherry-stemmed into the area. The reasons we support this designation are as follows: Roadless areas are an endangered resource in the high-desert west. Categorically, roadless areas especially within NCAs- should be protected as such. By making it a larger area not only does it protect this roadless area but also it better disguises the location of the dinosaur tracks and fossils which we see from page 872," are regionally significant and easily damaged". Per page 871, "This site also supports one of the best known occurrences (A-ranked) of Grand Junction milkvetch (Astragalus linifolius), a globally vulnerable plant (G3/S3) and a BLM sensitive plant species."o Map 3-13 needs to be updated to show the presence of Grand Junction milkvetch and Colorado Hookless cactus as the text on page 871 indicates both are present in this area. A recent hike in this area shows prolific big game use in the area, we assume it is their refuge from surrounding motorized use. Recent hikes have confirmed the presence of Ponderosa Pine atop Gibbler Mtn. This designation would aid in increasing the number of healthy Ponderosa Pines within the NCA, an action which would be in accordance with the Alternative E management objective on page 52. o Map 3-3 needs to be updated to reference the presence of Ponderosa Pine in this area. The designation of this expanded ACEC in the final plan, would address the need for non-motorized trails in this portion of the NCA, an opportunity currently missing from the draft plan. And to reiterate, these protections are needed for the myriad of resources found here, especially because they are to be located within an SRMA focused on motorized use

Comment ID: 00000135-38

• The following are comments on two hard copy maps I am sending today through the mail. Map 1 - Road Densities by watershed This map shows varying road densities with the DENCA. The watershed in section 1, circled on the map, has high road densities, 2.6 4 miles per square mile, that need to be reduced to restore the fragmented landscape. This is the Farmer Canyon, Gibbler Gulch area. The watershed found in section 2, circled on the map, has extremely high route densities, up to almost 7 miles per square mile. It is extremely important that the BLM reduce densities in this area, Cactus Park, which are affecting watershed health. The watershed found in section 3, circled on the map, is in the Hunting Ground unit and has moderate route densities, 1/7 2.6 miles per square mile, that likewise need to be reduced, closing duplicate and unnecessary routes, and adding no new routes. The water shed in section 4, circled on the map covers and Sawmill Mesa-Sowbello Ridge unit of the NCA. It has the lowest route densities per square mile, which should be maintained. Map 2 - Overlapping Sensitive Species Habitat and CNHP Potential Conservation Areas This map shows areas of very high overlap, red, and high overlap, dark yellow. The red areas are located in the Wilderness and at the mouth of Big Dominguez Creek. The largest of the dark yellow areas (high concentrations of sensitive species) is in the Gibbler Gulch area of the Cactus Park unit, an area where my letter recommends multiple route closures to restore and protect the less motorized character of this landscape. List of photos taken in Cactus Park August 22, 2011 Photo-point explanation1. Only the last two digits of the numbered photographs are marked on the map except for 0705 and 0707 at the end of the list. 2. Photos 60 77 were taken along Route 8 on the Cactus Park map (found on the DENCA website). Route 8 is shown in purple and starts south of Cactus Park Road, #15.3. Photos 82 - 95 were taken on Route 1235 branching east off Route 8 south of Gibbler Mt. Route 1235 is found on both the Cactus Park map and Farmers Canyon/Wagon Park map on the DENCA website. 4. On the Farmers Canyon map, Route 1235 joins routes 1236, 1228 and 1409 until it connects with 1221. 5. The route numbers used here are from the web maps and may not correspond with the route numbers on Lee's paper maps. 6. Photo 0707 was taken along Route 26, near the northeast corner of the Gunnison Bluffs Citizen Proposed wilderness List of Photo-points drawn on the Cactus Park and Farmers Canyon/Wagon Park maps (found on the DENCA website): 0660 User-created tracks, soil disturbance on Route 8 0661 User-created motorcycle tracks, area is remote and difficult to patrol 0662 Braided tracks, cryptogamic soil disturbance, rough road 0665 One of few less jolting sections of road 0672 View of Gibbler Mountain from the west. Gibbler Mountain is a 3000 acre unfragmented habitat area currently undisturbed by any roads or trails. It lends itself to designation as an untrailed, nonmotorized primitive area. 0674 View of Gibbler Mountain from the south 0675 View to the west from the same location on Route 8 0677 Closer view from the south 0682 Route narrows to ATV width here on Route 1235 where it branches off Route 8 south of Gibbler Mountain. 0684 Same 0689 View south from same spot into Gibbler Gulch and Dominguez Canyon on the far horizon. Gibbler Gulch forms another 3000 acre untrailed, unfragmented area which, if ATV route 1235 were closed, could be joined together with Gibbler Mountain, to create a 6000 acre non-motorized primitive area 0695 Same 0699 View of Route 8 0705 More braiding and soil damage on Route 8 0707 North end of Cactus Park accessed by the gravel quarry road

• [ED: Following are the text (in quotes) and the D-E NCA Recreation Planner's interpretation of what the commenter wrote on the maps they submitted during public scoping for the Dominguez RMP. The Rec Planner also identified the route numbers highlighted on the maps]: Routes 741 and 848 "needs ATV connector. Cultural sites can easily be avoided by the 50 foot policy." Routes 26 and 1017 "needs ATV connector." Route 941 "must remain open." Route 1017 "should be ATV route." There should be an "ATV connect" between routes 1198 and 1263. The following text was highlighted in orange "Highlighted routes are routes used often by WSATVA and other ATVs." in addition to all the routes mentioned previously, the following routes were highlighted in orange: 743, 97, 96, 26, 813, 842, 15, 847, 1393, 1192, 1292. [ED: On a second map, the commenter highlighted additional routes]: The following are "routes used often by WSATVA": 1516, 1571, 1605, 1633, 15, 1641, 1221. "SC-5" connecting routes 1605 and 1633 " and "SC-6" connecting routes 1516 and 1605 "need to become new ATV routes connecting these deadends." [ED: A map of the Gibbler Mountain area had additional text and routes]. "Highlighted routes" which "are often used by WSATVA 3 seasons" are as follows: 1235, 1221, 1409, 1310, 1263, 1198, 15. Route 1235 [is or should be] "an ATV route."

## Route: 1222

### Segment: 1430

#### Designation

##### Current Designation

Vehicles under 50" wide

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk severe winter range
- RIPARIAN Riparian 1 stream crossing
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I moderate
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Vehicles under 50" wide

**Alternative C:** Foot/Horse

**Alternative D:** Vehicles under 50" wide

## Public Comments On Route: 1222

- No public comments for this Route

## Route: 1224

### Segment: 1419

#### Designation

##### Current Designation

Vehicles under 50" wide

##### Mitigation Criteria

- Drainage Crossing
- Cultural

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- LANDS Access to non-federal lands
- LANDS Right of Way
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Indirect impact
- DENSITY Route density medium in Alt A

- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open, seek re-route or mitigation

**Alternative C:** Open, seek re-route or mitigation

**Alternative D:** Admin/Permitted Use Only

## Public Comments On Route: 1224

## Route: 1225

### Segment: 1412

## Designation

### Current Designation

Closed (Rehab)

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- **Minimize Damage:** Fragile soils SSR
- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, GUSG –PSD in winter habitat

### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range
- Route was designated to minimize fragmentation of Gunnison sage-grouse habitat.

## Previous Alternatives Analyzed

Comment ID: 000000135-35

• Gibbler Gulch/Gibbler MountainThe following are route recommendations for Gibbler Gulch and Gibbler Mountain which together make a nice amount of relatively undisturbed open space and habitat. This area is less roaded and fragmented than other parts of Cactus Park NCA unit. It may be less impacted by grazing than other areas and harbors critical big game habitat. Hoping to send you maps next week showing these areas. In particular I recommend keeping recreational use out of all the creek drainages in the upper Gibbler Gulch area, and closing roads on the adjacent mesas. Putting a motorized or mountain bike route over Gibbler Mountain would irreversibly change the natural quality, silence and solitude of this remote landscape. Lands that are currently undeveloped should stay that way as so much land in the NCA is criss-crossed with routes and trails.For example there is potential for retaining the remote "open space" setting of Gibbler Mountain, as specified in the 2007 Colorado BLM Recreation and Visitor Strategy, by closing 1227(!) (especially), 1269, 1309, 2674, 2673, 1249, 1171, 981, 980, 1150, 1154, 977, 979, 1312, 1310, 1334, 1330, 1344, 1286, 1242, 1213, 1238, 1242, 1204, 1213, 1239, 1214, 1212, 1200, 1263, 1204, 1198, 1187, 1210. Limit motorized traffic to roads 15 and 8.Similarly, there is potential for a large unmotorized area extending west from road 15 and Gibbler Gulch on the east, to road 8 on the west. To create an undisturbed nonmotorized area I recommend closing routes 1526, 2666, 1571, 2665, 1608, 1570, 1605, 1561, 1516, 1606, 1561, 1609 1633, 2664, 2663, 1412, 1424, 1456 1434, 1513, 1249, 1269.Many of these are duplicative, serve no purpose, or are dead ends, simply pioneered randomly, and should be closed.

• The following high value recreational routes/roads are legal RS 2477 ROW's in the State of Colorado, Mesa County and the BLM does not have the jurisdiction to close them: 500, 472, 518, 521, 530, 39, 127, 572, 566, 66, 65, 148, 71, 74, 587, 595, 608, 622, 628, 635, 624, 609, 611, 706, 678, 700, 719, 726, 696, 26, 936, 847, 849, 919, 767, 824, 96, 822, 817, 950, 1021, 900, 2682, 1020, 1003, 1084, 1142, 1184, 1156, 1198, 1349, 1308, 1310, 1238, 1263, 1122, 1170, 1192, 974, 941, 1076, 1039, 1018, 1759, 1764, 1758, 1174, 1788, 1798, 1669, 1699, 1773, 1755, 1779, 1750, 1751, 1792, 1720, 1726, 1727, 1720, 1722, 1803, 1805, 1809, 1614, 1609, 1605, 1608, 1571, 1526, 1516, 1448, 755, 807, 900, 10, 48, 924, 950, 1005, 965, 8, 1115, 981, 984, 1135, 2678, 1249, 1171, 1150, 1249, 1320, 1235, 1236, 1228, 1227, 1409, 1456, 1349, 1308, 1513, 1221, 1550, 1567, 1641, 1612, 1740, 1688, 2597, 2598, 2601, 2440, 3160, 3162, 2089, 2166, 2170, 2596, 2171, 2003, 2122, 2126, 2189, 3145, 2182, 2179, 2178, 3143, 2181, 2121, 2122, 2168, 2126, 2180, 2095, 2173, 2174, 2620, 2129, 1686, 1692, 1667, 1647, 1631, 1613, 1596, 1549, 1541, 2647, 1633, 1605, 1608, 1571, 2645, 1507, 1448, 1496, 1516, 1504, 1510, 1508, 1509, 439, 431, 456, 461, 460, 391, 423, 415, 419, 407, 402, 367, 372, 339, 298, 338, 105, 368, 374, 393, 389, 390, 376, 377, 351, 350, 121, 345, 320, 301, 251, 234, 232, 205, 344, 107, 103, 152, 153, 161, 168, 3199, 188, 196, 255, 254, 236, 294, 242, 219, 201, 169, 162, 158, 160, 173. The following high value recreational routes/roads are legal RS 2477ROW's in the State of Colorado, Delta County, and the BLM does not have the jurisdiction to close them: 3011, 2184, 2191, 3100, 2187, 2026, 2059, 2188, 2192, 3104, 2130, 3009, 2199, 2200, 2111, 2223, 2024, 3006, 2231, 3094, 2579, 2210, 2344, 2243, 2249, 2248, 3074, 2354, 2384, 2296, 2295, 2287, 2304, 2062, 2163, 3163, 2164, 2430, 4006, 3016, 2351, 3140, 2410, 4008, 2324, 2073, 2306, 2459, 3192, 3193, 2350, 2443, 2035, 2336, 2495, 2491, 2159, 3058, 2277, 2465, 2467, 3189, 2472, 2297, 2006, 2265, 2271, 2276, 2135, 2139, 3053, 2489, 3033, 3057, 2031, 2276, 2210, 2579, 2136, 2344, 3164, 2400, 2379, 3014, 2365, 3116, 2251, 2259, 2149, 2153, 2146, 2144, 2145, 2356, 2257, 2048, 2358, 3165, and 3166.

## Route: 1228

### Segment: 1427

#### Designation ?

##### Current Designation

Vehicles under 50" wide

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation access to dispersed campsite
- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- SOIL Soils Steep Slopes 40%
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities - specific
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Admin/Permitted Use Only

**Alternative C:** Admin/Permitted Use Only

**Alternative D:** Admin/Permitted Use Only

• o The Gibbler Mountain ACEC as shown on map 2-5E does not encompass the mountain itself but only its northern slopes. I would prefer to see a non-motorized/non-mechanized ACEC for the whole of Gibbler Mountain and its surrounding slopes, bounded by the

routes: 1235-1236-1228-1409-1221-15-8-887-18-17-945-547-951-959-966-969-1005-1006-1021-1022-1023-1024-1047-1150-1249, with 1269 left open to motorized use as a motorized cherry-stemmed route into the area. This would keep this wonderful roadless area (though too small a space for the inventory) roadless into the future. The text on page 871 indicates the area has one of the "best known" populations of the rare plant Grand Junction milkvetch as well as a large collection of fragile dinosaur tracks. The Special Species map from the Open House needs to be updated with this GJ milkvetch population. This ACEC representing a hole in the SRMA would properly protect all three features: roadless-ness, dinosaur tracks, and GJ milkvetch, at the cost of less than 5000 acres. This protection is consistent with this being a National Conservation Area and not a National Recreation Area. This position also has support from the D-E NCA Advisory Council. I recently hiked up to the top of the northern portion of Gibbler Mountain with a friend. We were inspired by the challenging terrain for hiking and the awesome views (photo IMG\_9998). We both had a great feeling of accomplishment when we reached the top. There is plenty of evidence of big game animals using the Gibbler Mountain as a quiet sanctuary from the surrounding motorized areas. This proposed ACEC would benefit them.

• Gibbler Mountain Area of Critical Environmental Concern: The QTG supports Gibbler Mtn ACEC from Alt D because protections are needed for the myriad of resources found here, especially if it is going to be located within an SRMA focused on motorized use. Further, we think the ACEC should be extended to include all of Gibbler Mountain. Surface-disturbance limitations and a rule of no motorized use should be included for the full ACEC, including this recommended expansion. With this expansion the full ACEC would be bounded by: Routes: 1235-1236-1228-1409-1221-15-8-887-18-17-945-947-951-954-959-962-966-969-1005-1006-1021-1022-1023-1024-1047-1150-1249-8, with 1269, and 1173-1174-1198-1200-1193 cherry-stemmed into the area. The reasons we support this designation are as follows: Roadless areas are an endangered resource in the high-desert west. Categorically, roadless areas especially within NCAs- should be protected as such. By making it a larger area not only does it protect this roadless area but also it better disguises the location of the dinosaur tracks and fossils which we see from page 872," are regionally significant and easily damaged". Per page 871, "This site also supports one of the best known occurrences (A-ranked) of Grand Junction milkvetch (Astragalus linifolius), a globally vulnerable plant (G3/S3) and a BLM sensitive plant species."o Map 3-13 needs to be updated to show the presence of Grand Junction milkvetch and Colorado Hookless cactus as the text on page 871 indicates both are present in this area. A recent hike in this area shows prolific big game use in the area, we assume it is their refuge from surrounding motorized use. Recent hikes have confirmed the presence of Ponderosa Pine atop Gibbler Mtn. This designation would aid in increasing the number of healthy Ponderosa Pines within the NCA, an action which would be in accordance with the Alternative E management objective on page 52. o Map 3-3 needs to be updated to reference the presence of Ponderosa Pine in this area. The designation of this expanded ACEC in the final plan, would address the need for non-motorized trails in this portion of the NCA, an opportunity currently missing from the draft plan. And to reiterate, these protections are needed for the myriad of resources found here, especially because they are to be located within an SRMA focused on motorized use

• The following are comments on two hard copy maps I am sending today through the mail. Map 1 - Road Densities by watershed This map shows varying road densities with the DENCA. The watershed in section 1, circled on the map, has high road densities, 2.6 4 miles per square mile, that need to be reduced to restore the fragmented landscape. This is the Farmer Canyon, Gibbler Gulch area. The watershed found in section 2, circled on the map, has extremely high route densities, up to almost 7 miles per square mile. It is extremely important that the BLM reduce densities in this area, Cactus Park, which are affecting watershed health. The watershed found in section 3, circled on the map, is in the Hunting Ground unit and has moderate route densities, 1/7 2.6 miles per square mile, that likewise need to be reduced, closing duplicate and unnecessary routes, and adding no new routes. The water shed in section 4, circled on the map covers and Sawmill Mesa-Sowbelly Ridge unit of the NCA. It has the lowest route densities per square mile, which should be maintained. Map 2 - Overlapping Sensitive Species Habitat and CNHP Potential Conservation Areas This map shows areas of very high overlap, red, and high overlap, dark yellow. The red areas are located in the Wilderness and at the mouth of Big Dominguez Creek. The largest of the dark yellow areas (high concentrations of sensitive species) is in the Gibbler Gulch area of the Cactus Park unit, an area where my letter recommends multiple route closures to restore and protect the less motorized character of this landscape.

List of photos taken in Cactus Park August 22, 2011 Photo-point explanation. Only the last two digits of the numbered photographs are marked on the map except for 0705 and 0707 at the end of the list. 2. Photos 60 77 were taken along Route 8 on the Cactus Park map (found on the DENCA website). Route 8 is shown in purple and starts south of Cactus Park Road, #15. 3. Photos 82 - 95 were taken on Route 1235 branching east off Route 8 south of Gibbler Mt. Route 1235 is found on both the Cactus Park map and Farmers Canyon/Wagon Park map on the DENCA website. 4. On the Farmers Canyon map, Route 1235 joins routes 1236, 1228 and 1409 until it connects with 1221. 5. The route numbers used here are from the web maps and may not correspond with the route numbers on Lee's paper maps. 6. Photo 0707 was taken along Route 26, near the northeast corner of the Gunnison Bluffs Citizen Proposed wilderness List of Photo-points drawn on the Cactus Park and Farmers Canyon/Wagon Park maps (found on the DENCA website): 0660 User-created tracks, soil disturbance on Route 80661 User-created motorcycle tracks, area is remote and difficult to patrol 0662 Braided tracks, cryptogamic soil disturbance, rough road 0665 One of few less jolting sections of road 0672 View of Gibbler Mountain from the west. Gibbler Mountain is a 3000 acre unfragmented habitat area currently undisturbed by any roads or trails. It lends itself to designation as an untraced, nonmotorized primitive area. 0674 View of Gibbler Mountain from the south 0675 View to the west from the same location on Route 8 0677 Closer view from the south 0682 Route narrows to ATV width here on Route 1235 where it branches off Route 8 south of Gibbler Mountain. 0684 Same 0689 View south from same spot into Gibbler Gulch and Dominguez Canyon on the far horizon. Gibbler Gulch forms another 3000 acre untraced, unfragmented area which, if ATV route 1235 were closed, could be joined together with Gibbler Mountain, to create a 6000 acre non-motorized primitive area 0695 Same 0699 View of Route 8 0705 More braiding and soil damage on Route 80707 North end of Cactus Park accessed by the gravel quarry road

## Route: 1229

### Segment: 1424

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Minimize Damage:** Fragile soils SSR
- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, GUSG –PSD in winter habitat

##### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range
- Route was designated to minimize fragmentation of Gunnison sage-grouse habitat.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 1229

- The second routes are 1377, 1233 and 1415 in Cactus Park. By closing these routes, it makes accessing the Wilderness a lot more difficult for a larger number of users. I would suggest keeping these routes open to motorized users and adding a parking lot to enable users access the Dominguez Canyon at that point. Otherwise, if you come into the NCA from the north and wish to access the Wilderness, the users will access from the Bridgeport Road and the mouth of Big Dominguez Canyon. This will only increase the usage by hikers, rafters, equestrian users, etc. As the usage increases, I can see numerous user conflicts by compressing the majority of the access through one location.

Comment ID: 000000089-10

• Routes such as the Gibler Gulch route, Farmer Canyon routes and the main routes in Wagon Park should remain open in December and January. A more prudent closure, if even needed, would be during "mud season" in the area. I would propose this to be from Mid February to April. BLM should tell Parks & Wildlife that this approach would make much more sense and accomplish the same thing as a five month closure.

Organization, commenter: Janice Shepherd

Comment ID: 000000106-110

o The Gibbler Mountain ACEC as shown on map 2-5E does not encompass the mountain itself but only its northern slopes. I would prefer to see a non-motorized/non-mechanized ACEC for the whole of Gibbler Mountain and its surrounding slopes, bounded by the routes: 1235-1236-1228-1409-1221-15-8-887-18-17-945-547-951-959-966-969-1005-1006-1021-1022-1023-1024-1047-1150-1249, with 1269 left open to motorized use as a motorized cherry-stemmed route into the area. This would keep this wonderful roadless area (though too small a space for the inventory) roadless into the future. The text on page 871 indicates the area has one of the "best known" populations of the rare plant Grand Junction milkvetch as well as a large collection of fragile dinosaur tracks. The Special Species map from the Open House needs to be updated with this GJ milkvetch population. This ACEC representing a hole in the SRMA would properly protect all three features: roadless-ness, dinosaur tracks, and GJ milkvetch, at the cost of less than 5000 acres. This protection is consistent with this being a National Conservation Area and not a National Recreation Area. This position also has support from the D-E NCA Advisory Council. I recently hiked up to the top of the northern portion of Gibbler Mountain with a friend. We were inspired by the challenging terrain for hiking and the awesome views (photo IMG\_9998). We both had a great feeling of accomplishment when we reached the top. There is plenty of evidence of big game animals using the Gibbler Mountain as a quiet sanctuary from the surrounding motorized areas. This proposed ACEC would benefit them.

Organization, commenter: Quiet Trails Group, Sherry Schenk

Comment ID: 000000115-32

• Gibbler Mountain Area of Critical Environmental Concern: The QTG supports Gibbler Mtn ACEC from Alt D because protections are needed for the myriad of resources found here, especially if it is going to be located within an SRMA focused on motorized use. Further, we think the ACEC should be extended to include all of Gibbler Mountain. Surface-disturbance limitations and a rule of no motorized use should be included for the full ACEC, including this recommended expansion. With this expansion the full ACEC would be bounded by: Routes: 1235-1236-1228-1409-1221-15-8-887-18-17-945-947-951-954-959-962-966-969-1005-1006-1021-1022-1023-1024-1047-1150-1249-8, with 1269, and 1173-1174-1198-1200-1193 cherry-stemmed into the area. The reasons we support this designation are as follows: Roadless areas are an endangered resource in the high-desert west. Categorically, roadless areas especially within NCAs- should be protected as such. By making it a larger area not only does it protect this roadless area but also it better disguises the location of the dinosaur tracks and fossils which we see from page 872," are regionally significant and easily damaged". Per page 871, "This site also supports one of the best known occurrences (A-ranked) of Grand Junction milkvetch (*Astragalus linifolius*), a globally vulnerable plant (G3/S3) and a BLM sensitive plant species." o Map 3-13 needs to be updated to show the presence of Grand Junction milkvetch and Colorado Hookless cactus as the text on page 871 indicates both are present in this area. A recent hike in this area shows prolific big game use in the area, we assume it is their refuge from surrounding motorized use. Recent hikes have confirmed the presence of Ponderosa Pine atop Gibbler Mtn. This designation would aid in increasing the number of healthy Ponderosa Pines within the NCA, an action which would be in accordance with the Alternative E management objective on page 52. o Map 3-3 needs to be updated to reference the presence of Ponderosa Pine in this area. The designation of this expanded ACEC in the final plan, would address the need for non-motorized trails in this portion of the NCA, an opportunity currently missing from the draft plan. And to reiterate, these protections are needed for the myriad of resources found here, especially because they are to be located within an SRMA focused on motorized use

Comment ID: 000000135-38

• The following are comments on two hard copy maps I am sending today through the mail. Map 1 - Road Densities by watershed This map shows varying road densities with the DENCA. The watershed in section 1, circled on the map, has high road densities, 2.6 4 miles per square mile, that need to be reduced to restore the fragmented landscape. This is the Farmer Canyon, Gibbler Gulch area. The watershed found in section 2, circled on the map, has extremely high route densities, up to almost 7 miles per square mile. It is extremely important that the BLM reduce densities in this area, Cactus Park, which are affecting watershed health. The watershed found in section 3, circled on the map, is in the Hunting Ground unit and has moderate route densities, 1/7 2.6 miles per square mile, that likewise need to be reduced, closing duplicate and unnecessary routes, and adding no new routes. The watershed in section 4, circled on the map covers and Sawmill Mesa-Sowbelly Ridge unit of the NCA. It has the lowest route densities per square mile, which should be maintained. Map 2 - Overlapping Sensitive Species Habitat and CNHP Potential Conservation Areas This map shows areas of very high overlap, red, and high overlap, dark yellow. The red areas are located in the Wilderness and at the mouth of Big Dominguez Creek. The largest of the dark yellow areas (high concentrations of sensitive species) is in the Gibbler Gulch area of the Cactus Park unit, an area where my letter recommends multiple route closures to restore and protect the less motorized character of this landscape. List of photos taken in Cactus Park August 22, 2011 Photo-point explanation. Only the last two digits of the numbered photographs are marked on the map except for 0705 and 0707 at the end of the list. 2. Photos 60 77 were taken along Route 8 on the Cactus Park map (found on the DENCA website). Route 8 is shown in purple and starts south of Cactus Park Road, #15. 3. Photos 82 - 95 were taken on Route 1235 branching east off Route 8 south of Gibbler Mt. Route 1235 is found on both the Cactus Park map and Farmers Canyon/Wagon Park map on the DENCA website. 4. On the Farmers Canyon map, Route 1235 joins routes 1236, 1228 and 1409 until it connects with 1221. 5. The route numbers used here are from the web maps and may not correspond with the route numbers on Lee's paper maps. 6. Photo 0707 was taken along Route 26, near the northeast corner of the Gunnison Bluffs Citizen Proposed wilderness List of Photo-points drawn on the Cactus Park and Farmers Canyon/Wagon Park maps (found on the DENCA website): 0660 User-created tracks, soil disturbance on Route 80661 User-created motorcycle tracks, area is remote and difficult to patrol 0662 Braided tracks, cryptogamic soil disturbance, rough road 0665 One of few less jolting sections of road 0672 View of Gibbler Mountain from the west. Gibbler Mountain is a 3000 acre unfragmented habitat area currently undisturbed by any roads or trails. It lends itself to designation as an untrailed, nonmotorized primitive area. 0674 View of Gibbler Mountain from the south 0675 View to the west from the same location on Route 8 0677 Closer view from the south 0682 Route narrows to ATV width here on Route 1235 where it branches off Route 8 south of Gibbler Mountain. 0684 Same 0689 View south from same spot into Gibbler Gulch and Dominguez Canyon on the far horizon. Gibbler Gulch forms another 3000 acre untrailed, unfragmented area which, if ATV route 1235 were closed, could be joined together with Gibbler Mountain, to create a 6000 acre non-motorized primitive area 0695 Same 0699 View of Route 8 0705 More braiding and soil damage on Route 8 0707 North end of Cactus Park accessed by the gravel quarry road

• [ED: Following are the text (in quotes) and the D-E NCA Recreation Planner's interpretation of what the commenter wrote on the maps they submitted during public scoping for the Dominguez RMP. The Rec Planner also identified the route numbers highlighted on the maps]: Routes 741 and 848 "needs ATV connector. Cultural sites can easily be avoided by the 50 foot policy." Routes 26 and 1017 "needs ATV connector." Route 941 "must remain open." Route 1017 "should be ATV route." There should be an "ATV connect" between routes 1198 and 1263. The following text was highlighted in orange "Highlighted routes are routes used often by WSATVA and other ATVs." in addition to all the routes mentioned previously, the following routes were highlighted in orange: 743, 97, 96, 26, 813, 842, 15, 847, 1393, 1192, 1292. [ED: On a second map, the commenter highlighted additional routes]: The following are "routes used often by WSATVA": 1516, 1571, 1605, 1633, 15, 1641, 1221. "SC-5" connecting routes 1605 and 1633 "and "SC-6" connecting routes 1516 and 1605 "need to become new ATV routes connecting these deadends." [ED: A map of the Gibbler Mountain area had additional text and notes]. "Highlighted routes" which "are often used by WSATVA 3 seasons" are as follows: 1235, 1221, 1409, 1310, 1263, 1198, 15. Route 1235 [is or should be] "an ATV route."

## Route: 1236

### Segment: 1426

#### Designation

**Current Designation**  
Vehicles under 50" wide

#### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

#### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- SOIL Soils Steep Slopes 40%
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- RIPARIAN Riparian 2 stream crossings
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I moderate
- DENSITY Route density high in Alt A

## Rationale

### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities - specific
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Admin/Permitted Use Only

**Alternative C:** Admin/Permitted Use Only

**Alternative D:** Admin/Permitted Use Only

## Public Comments On Route: 1236

• o The Gibbler Mountain ACEC as shown on map 2-5E does not encompass the mountain itself but only its northern slopes. I would prefer to see a non-motorized/non-mechanized ACEC for the whole of Gibbler Mountain and its surrounding slopes, bounded by the routes: 1235-1236-1228-1409-1221-15-8-887-18-17-945-547-951-959-966-969-1005-1006-1021-1022-1023-1024-1047-1150-1249, with 1269 left open to motorized use as a motorized cherry-stemmed route into the area. This would keep this wonderful roadless area (though too small a space for the inventory) roadless into the future. The text on page 871 indicates the area has one of the "best known" populations of the rare plant Grand Junction milkvetch as well as a large collection of fragile dinosaur tracks. The Special Species map from the Open House needs to be updated with this GJ milkvetch population. This ACEC representing a hole in the SRMA would properly protect all three features: roadless-ness, dinosaur tracks, and GJ milkvetch, at the cost of less than 5000 acres. This protection is consistent with this being a National Conservation Area and not a National Recreation Area. This position also has support from the D-E NCA Advisory Council. I recently hiked up to the top of the northern portion of Gibbler Mountain with a friend. We were inspired by the challenging terrain for hiking and the awesome views (photo IMG\_9998). We both had a great feeling of accomplishment when we reached the top. There is plenty of evidence of big game animals using the Gibbler Mountain as a quiet sanctuary from the surrounding motorized areas. This proposed ACEC would benefit them.

Comment ID: 00000115-32

• Gibbler Mountain Area of Critical Environmental Concern: The QTG supports Gibbler Mtn ACEC from Alt D because protections are needed for the myriad of resources found here, especially if it is going to be located within an SRMA focused on motorized use. Further, we think the ACEC should be extended to include all of Gibbler Mountain. Surface-disturbance limitations and a rule of no motorized use should be included for the full ACEC, including this recommended expansion. With this expansion the full ACEC would be bounded by: Routes: 1235-1236-1228-1409-1221-15-8-887-18-17-945-547-951-959-962-966-969-1005-1006-1021-1022-1023-1024-1047-1150-1249-8, with 1269, and 1173-1174-1198-1200-1193 cherry-stemmed into the area. The reasons we support this designation are as follows: Roadless areas are an endangered resource in the high-desert west. Categorically, roadless areas especially within NCAs- should be protected as such. By making it a larger area not only does it protect this roadless area but also it better disguises the location of the dinosaur tracks and fossils which we see from page 872," are regionally significant and easily damaged". Per page 871, "This site also supports one of the best known occurrences (A-ranked) of Grand Junction milkvetch (Astragalus limifolius), a globally vulnerable plant (G3/S3) and a BLM sensitive plant species."o Map 3-13 needs to be updated to show the presence of Grand Junction milkvetch and Colorado Hookless cactus as the text on page 871 indicates both are present in this area. A recent hike in this area shows prolific big game use in the area, we assume it is their refuge from surrounding motorized use. Recent hikes have confirmed the presence of Ponderosa Pine atop Gibbler Mtn. This designation would aid in increasing the number of healthy Ponderosa Pines within the NCA, an action which would be in accordance with the Alternative E management objective on page 52. o Map 3-3 needs to be updated to reference the presence of Ponderosa Pine in this area. The designation of this expanded ACEC in the final plan, would address the need for non-motorized trails in this portion of the NCA, an opportunity currently missing from the draft plan. And to reiterate, these protections are needed for the myriad of resources found here, especially because they are to be located within an SRMA focused on motorized use

• The following are comments on two hard copy maps I am sending today through the mail. Map 1 - Road Densities by watershed This map shows varying road densities with the DENCA. The watershed in section 1, circled on the map, has high road densities, 2.6 4 miles per square mile, that need to be reduced to restore the fragmented landscape. This is the Farmer Canyon, Gibbler Gulch area. The watershed found in section 2, circled on the map, has extremely high route densities, up to almost 7 miles per square mile. It is extremely important that the BLM reduce densities in this area, Cactus Park, which are affecting watershed health. The watershed found in section 3, circled on the map, is in the Hunting Ground unit and has moderate route densities, 1/7 2.6 miles per square mile, that likewise need to be reduced, reducing duplicate and unnecessary routes, and adding no new routes. The water shed in section 4, circled on the map covers and Sawmill Mesa-Sowbelly Ridge unit of the NCA. It has the lowest route densities per square mile, which should be maintained. Map 2 - Overlapping Sensitive Species Habitat and CNHP Potential Conservation Areas This map shows areas of very high overlap, red, and high overlap, dark yellow. The red areas are located in the Wilderness and at the mouth of Big Dominguez Creek. The largest of the dark yellow areas (high concentrations of sensitive species) is in the Gibbler Gulch area of the Cactus Park unit, an area where my letter recommends multiple route closures to restore and protect the less motorized character of this landscape. List of photos taken in Cactus Park August 22, 2011 Photo-point explanation 1. Only the last two digits of the numbered photographs are marked on the map except for 0705 and 0707 at the end of the list. 2. Photos 60 77 were taken along Route 8 on the Cactus Park map (found on the DENCA website). Route 8 is shown in purple and starts south of Cactus Park Road, #15.3. Photos 82 - 95 were taken on Route 1235 branching east off Route 8 south of Gibbler Mt. Route 1235 is found on both the Cactus Park map and Farmers Canyon/Wagon Park map on the DENCA website. 4. On the Farmers Canyon map, Route 1235 joins routes 1236, 1228 and 1409 until it connects with 1221. 5. The route numbers used here are from the web maps and may not correspond with the route numbers on Lee's paper maps. 6. Photo 0707 was taken along Route 26, near the northeast corner of the Gunnison Bluffs Citizen Proposed wilderness List of Photo-points drawn on the Cactus Park and Farmers Canyon/Wagon Park maps (found on the DENCA website): o660 User-created tracks, soil disturbance on Route 80661 User-created motorcycle tracks, area is remote and difficult to patrol o662 Braided tracks, cryptogamic soil disturbance, rough road o665 One of few less jolting sections of road o672 View of Gibbler Mountain from the west. Gibbler Mountain is a 3000 acre unfragmented habitat area currently undisturbed by any roads or trails. It lends itself to designation as an untrailed, nonmotorized primitive area. o674 View of Gibbler Mountain from the south o675 View to the west from the same location on Route 8 o677 Closer view from the south o682 Route narrows to ATV width here on Route 1235 where it branches off Route 8 south of Gibbler Mountain. o684 Same o689 View south from same spot into Gibbler Gulch and Dominguez Canyon on the far horizon. Gibbler Gulch forms another 3000 acre untrailed, unfragmented area which, if ATV route 1235 were closed, could be joined together with Gibbler Mountain, to create a 6000 acre non-motorized primitive area o695 Same o699 View of Route 8 o705 More braiding and soil damage on Route 80707 North end of Cactus Park accessed by the gravel quarry road

• The following high value recreational routes/roads are legal RS 2477 ROW's in the State of Colorado, Mesa County and the BLM does not have the jurisdiction to close them: 500, 472, 518, 521, 530, 39, 127, 572, 566, 66, 65, 148, 71, 74, 587, 595, 608, 622, 628, 635, 624, 609, 611, 706, 678, 700, 719, 726, 696, 26, 936, 847, 849, 919, 767, 824, 96, 822, 817, 950, 1021, 900, 2682, 1020, 1003, 1084, 1142, 1184, 1156, 1198, 1349, 1308, 1310, 1238, 1263, 1122, 1170, 1192, 974, 941, 1076, 1039, 1018, 1759, 1764, 1758, 1174, 1788, 1798, 1669, 1699, 1773, 1755, 1779, 1750, 1751, 1792, 1720, 1726, 1727, 1720, 1722, 1803, 1805, 1809, 1614, 1609, 1605, 1608, 1571, 1526, 1516, 1448, 755, 807, 900, 10, 48, 924, 950, 1005, 965, 8, 1115, 981, 984, 1135, 2678, 1249, 1171, 1150, 1249, 1320, 1235, 1236, 1228, 1227, 1409, 1456, 1349, 1308, 1513, 1221, 1550, 1567, 1641, 1612, 1740, 1688, 2597, 2598, 2601, 2440, 3160, 3162, 2089, 2166, 2170, 2596, 2171, 2003, 2122, 2126, 2189, 3145, 2182, 2179, 2178, 3143, 2181, 2121, 2122, 2168, 2126, 2180, 2095, 2173, 2174, 2620, 2129, 1686, 1692, 1667, 1647, 1631, 1613, 1596, 1549, 1541, 2647, 1633, 1605, 1608, 1571, 2645, 1507, 1448, 1496, 1516, 1504, 1510, 1508, 1509, 439, 431, 456, 461, 460, 391, 423, 415, 419, 407, 402, 367, 372, 339, 298, 338, 105, 368, 374, 393, 389, 390, 376, 377, 351, 350, 121, 345, 320, 301, 251, 234, 232, 205, 344, 107, 103, 152, 153, 161, 168, 3199, 188, 196, 255, 254, 236, 294, 242, 219, 201, 169, 162, 158, 160, 173. The following high value recreational routes/roads are legal RS 2477 ROW's in the State of Colorado, Delta County, and the BLM does not have the jurisdiction to close them: 3011, 2184, 2191, 3100, 2187, 2026, 2059, 2188, 2192, 3104, 2130, 3009, 2199, 2200, 2111, 2223, 2024, 3006, 2231, 3094, 2579, 2210, 2344, 2243, 2249, 2248, 3074, 2354, 2384, 2296, 2295, 2287, 2304, 2062, 2163, 3163,

2164, 2430, 4006, 3016, 2351, 3140, 2410, 4008, 2324, 2073, 2306, 2459, 3192, 3193, 2350, 2443, 2035, 2336, 2495, 2491, 2159, 3058, 2277, 2465, 2467, 3189, 2472, 2297, 2006, 2265, 2271, 2276, 2135, 2139, 3053, 2489, 3033, 3057, 2031, 2276, 2210, 2579, 2136, 2344, 3164, 2400, 2379, 3014, 2365, 3116, 2251, 2259, 2149, 2153, 2146, 2144, 2145, 2356, 2257, 2048, 2358, 3165, and 3166.

## Route: 1237

### Segment: 1405

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Indirect impact
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Minimize Damage:** Fragile soils SSR
- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, GUSG –PSD in winter habitat

##### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range
- Route was designated to minimize fragmentation of Gunnison sage-grouse habitat.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 1237

- No public comments for this Route

## Route: 1238

### Segment: 1688

#### Designation

##### Current Designation

Foot/Horse/Mechanized/Motoreycle

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- RIPARIAN Riparian 9 stream crossings
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I moderate
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches >60 acres

#### Rationale

##### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Vehicles under 50" wide

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

Comment ID: 00000135-35

• Gibbler Gulch/Gibbler MountainThe following are route recommendations for Gibbler Gulch and Gibbler Mountain which together make a nice amount of relatively undisturbed open space and habitat. This area is less roaded and fragmented than other parts of Cactus Park NCA unit. It may be less impacted by grazing than other areas and harbors critical big game habitat. Hoping to send you maps next week showing these areas. In particular I recommend keeping recreational use out of all the creek drainages in the upper Gibbler Gulch area, and closing roads on the adjacent mesas. Putting a motorized or mountain bike route over Gibbler Mountain would irreversibly change the natural quality, silence and solitude of this remote landscape. Lands that are currently undeveloped should stay that way as so much land in the NCA is criss-crossed with routes and trails. For example there is potential for retaining the remote "open space" setting of Gibbler Mountain, as specified in the 2007 Colorado BLM Recreation and Visitor Strategy, by closing 1227(!) (especially), 1269, 1309, 2674, 2673, 1249, 1171, 981, 980, 1150, 1154, 977, 979, 1312, 1310, 1334, 1330, 1344, 1286, 1242, 1213, 1238, 1242, 1204, 1213, 1239, 1214, 1212, 1200, 1263, 1204, 1198, 1187, 1210. Limit motorized traffic to roads 15 and 8. Similarly, there is potential for a large unmotorized area extending west from road 15 and Gibbler Gulch on the east, to road 8 on the west. To create an undisturbed nonmotorized area I recommend closing routes 1526, 2666, 1571, 2665, 1608, 1570, 1605, 1561, 1516, 1606, 1561, 1609, 1633, 2664, 2663, 1412, 1424, 1456, 1434, 1513, 1249, 1269. Many of these are duplicative, serve no purpose, or are dead ends, simply pioneered randomly, and should be closed.

(especially), 1269, 1309, 2674, 2673, 1249, 1171, 981, 980, 1150, 1154, 977, 979, 1312, 1310, 1334, 1330, 1344, 1286, 1242, 1213, 1238, 1242, 1204, 1213, 1239, 1214, 1212, 1200, 1263, 1204, 1198, 1187, 1210. Limit motorized traffic to roads 15 and 8. Similarly, there is potential for a large unmotorized area extending west from road 15 and Gibbler Gulch on the east, to road 8 on the west. To create an undisturbed nonmotorized area I recommend closing routes 1526, 2666, 1571, 2665, 1608, 1570, 1605, 1561, 1516, 1606, 1561, 1609 1633, 2664, 2663, 1412, 1424, 1456 1434, 1513 , 1249, 1269. Many of these are duplicative, serve no purpose, or are dead ends, simply pioneered randomly, and should be closed.

## Route: 124

### Segment: 2302

#### Designation

##### Current Designation

Vehicles under 50" wide

##### Mitigation Criteria

- Needs Data - Cultural

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- CULTURAL Cultural Direct impact
- DENSITY Route density highest in Alt A
- DENSITY Route density medium in Alt E

#### Rationale

##### Designation Criteria

- Recreation:** RMA objectives, Rec opportunities – general
- Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Vehicles under 50" wide

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 1242

- Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 000000135-35

• Gibbler Gulch/Gibbler MountainThe following are route recommendations for Gibbler Gulch and Gibbler Mountain which together make a nice amount of relatively undisturbed open space and habitat. This area is less roaded and fragmented than other parts of Cactus Park NCA unit. It may be less impacted by grazing than other areas and harbors critical big game habitat. Hoping to send you maps next week showing these areas. In particular I recommend keeping recreational use out of all the creek drainages in the upper Gibbler Gulch area, and closing roads on the adjacent mesas. Putting a motorized or mountain bike route over Gibbler Mountain would irreversibly change the natural quality, silence and solitude of this remote landscape. Lands that are currently undeveloped should stay that way as so much land in the NCA is criss-crossed with routes and trails.For example there is potential for retaining the remote "open space" setting of Gibbler Mountain, as specified in the 2007 Colorado BLM Recreation and Visitor Strategy, by closing 1227(!) (especially), 1269, 1309, 2674, 2673, 1249, 1171, 981, 980, 1150, 1154, 977, 979, 1312, 1310, 1334, 1330, 1344, 1286, 1242, 1213, 1238, 1242, 1204, 1213, 1239, 1214, 1212, 1200, 1263, 1204, 1198, 1187, 1210. Limit motorized traffic to roads 15 and 8.Similarly, there is potential for a large unmotorized area extending west from road 15 and Gibbler Gulch on the east, to road 8 on the west. To create an undisturbed nonmotorized area I recommend closing routes 1526, 2666, 1571, 2665, 1608, 1570, 1605, 1561, 1516, 1606, 1561, 1609 1633, 2664, 2663, 1412, 1424, 1456 1434, 1513 , 1249, 1269.Many of these are duplicative, serve no purpose, or are dead ends, simply pioneered randomly, and should be closed.

## Route: 1243

### Segment: 1750

#### Designation

##### Current Designation

Admin/Permitted Use Only

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- LANDS Access to non-federal lands
- LANDS Right of Way
- WILDLIFE Mule deer severe winter range
- RIPARIAN Riparian crossing perennial stream
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Direct impact
- SMAs Wild and Scenic River area
- DENSITY Route density low in Alt A
- DENSITY Route density low in Alt E
- SSPLANT Special Status Species Colorado hookless cactus

#### Rationale

##### Designation Criteria

- **Minimize Damage:** Cultural – SSR within 100m sites

##### Rationale for Decision

- Route was designated to ensure access to rights-of-way, private property, and livestock grazing facilities.

#### Previous Alternatives Analyzed

**Alternative A:** Admin/Permitted Use Only

**Alternative B:** Admin/Permitted Use Only

## Public Comments On Route: 1243

Organization, commenter: Escalante Ranch, Richard Miller

Comment ID: 000000171-7

• IV. TRANSPORTATION AND TRAVEL MANAGEMENTMr. Miller's owns various parcels of private property and multiple water diversions in the area in question, and must access these lands via roads and trails which currently cross public land. In addition, Mr. Miller must necessarily access various roads and trails to in the course of managing his livestock operation. The EIS proposes closing various roads and trails to public motorized travel, to minimize resource damage caused by the public on both public and private lands. EIS at 157, 187. Mr. Miller supports the BLM's proposal to restrict public access to protect public and private property, but only so long as he is not restricted from using these roads as may be necessary to access his private lands and manage his livestock operation. Thus, to the extent that the BLM wishes to close roads to motorized public traffic, it should simultaneously grant Mr. Miller legal, administrative access. In addition, Mr. Miller notes that he would be entitled to a formal decision, subject to appeal, prior to the BLM restricting access to his private property and/or otherwise impacting his livestock operation. Mr. Miller notes that the BLM has mis-classified many routes. See EIS Map N -1 e. Specifically, many routes which have historically been used to access private land and water diversions, and/or are necessary to maintain livestock improvements or otherwise manage and operate Mr. Miller's livestock operation, have been incorrectly labeled as closed or otherwise restricted in their use. These routes should be classified as "administrative," to recognize these historic uses and to allow for continued uses consistent therewith. The Routes which have been incorrectly classified and which should be classified as "administrative" are as follows: Routes 460, 1220, 1243, 1245, 2003, 2053, 2073, 2086, 2089, 2121, 2122, 2126, 2156, 2166, 2168, 2171 ~ 2172, 2177, 2180, 2336, 2342, 2354, 2408, 2412, 2445, 2581, 2582, 2583, 2585, 2587, 2588, 2590, 2591, 2593, 2595, 2596, 2598, 2599, 2612, 2613, 2622, 2691, 3011, 3048, 3070, 3131, 3141, and 3158. See EIS Map N-1e. In addition, Route 2072 is not completely depicted on the map, in that it extends down the river, across BLM and private property, an additional 2-3 miles, and likewise Route 3048 extends an additional 0.75 miles and leads to private property. Id. Finally, Map N-1e incorrectly labels Mr. Miller's privately owned bridge, which crosses the Gunnison River at the Bridgeport area, as "administrative." I d. Mr. Miller requests that the BLM correct these errors and mis-classifications.

Organization, commenter: Escalante Ranch, Kent Davis

Comment ID: 000000192-29

- Route number 1243. If this is the old bridge, the bridge is private owned and not open for discussion.

## Route: 1244

### Segment: 1654

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

### Rationale

#### Designation Criteria

- **Minimize Damage:** Fragile soils SSR
- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close

#### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range

• Routes such as the Gibler Gulch route, Farmer Canyon routes and the main routes in Wagon Park should remain open in December and January. A more prudent closure, if even needed, would be during "mud season" in the area. I would propose this to be from Mid February to April. BLM should tell Parks & Wildlife that this approach would make much more sense and accomplish the same thing as a five month closure.

• o The Gibbler Mountain ACEC as shown on map 2-5E does not encompass the mountain itself but only its northern slopes. I would prefer to see a non-motorized/non-mechanized ACEC for the whole of Gibbler Mountain and its surrounding slopes, bounded by the routes: 1235-1236-1228-1409-1221-15-8-887-18-17-945-547-951-959-966-969-1005-1006-1021-1022-1023-1024-1047-1150-1249, with 1269 left open to motorized use as a motorized cherry-stemmed route into the area. This would keep this wonderful roadless area (though too small a space for the inventory) roadless into the future. The text on page 871 indicates the area has one of the "best known" populations of the rare plant Grand Junction milkvetch as well as a large collection of fragile dinosaur tracks. The Special Species map from the Open House needs to be updated with this GJ milkvetch population. This ACEC representing a hole in the SRMA would properly protect all three features: roadless-ness, dinosaur tracks, and GJ milkvetch, at the cost of less than 5000 acres. This protection is consistent with this being a National Conservation Area and not a National Recreation Area. This position also has support from the D-E NCA Advisory Council. I recently hiked up to the top of the northern portion of Gibbler Mountain with a friend. We were inspired by the challenging terrain for hiking and the awesome views (photo IMG\_9998). We both had a great feeling of accomplishment when we reached the top. There is plenty of evidence of big game animals using the Gibbler Mountain as a quiet sanctuary from the surrounding motorized areas. This proposed ACEC would benefit them.

• Gibbler Mountain Area of Critical Environmental Concern: The QTG supports Gibbler Mtn ACEC from Alt D because protections are needed for the myriad of resources found here, especially if it is going to be located within an SRMA focused on motorized use. Further, we think the ACEC should be extended to include all of Gibbler Mountain. Surface-disturbance limitations and a rule of no motorized use should be included for the full ACEC, including this recommended expansion. With this expansion the full ACEC would be bounded by: Routes: 1235-1236-1228-1409-1221-15-8-887-18-17-945-947-951-954-959-962-966-969-1005-1006-1021-1022-1023-1024-1047-1150-1249-8, with 1269, and 1173-1174-1198-1200-1193 cherry-stemmed into the area. The reasons we support this designation are as follows: Roadless areas are an endangered resource in the high-desert west. Categorically, roadless areas especially within NCAs- should be protected as such. By making it a larger area not only does it protect this roadless area but also it better disguises the location of the dinosaur tracks and fossils which we see from page 872." are regionally significant and easily damaged". Per page 871, "This site also supports one of the best known occurrences (A-ranked) of Grand Junction milkvetch (*Astragalus linifolius*), a globally vulnerable plant (G3/S3) and a BLM sensitive plant species." o Map 3-13 needs to be updated to show the presence of Grand Junction milkvetch and Colorado Hookless cactus as the text on page 871 indicates both are present in this area. A recent hike in this area shows prolific big game use in the area, we assume it is their refuge from surrounding motorized use. Recent hikes have confirmed the presence of Ponderosa Pine atop Gibbler Mtn. This designation would aid in increasing the number of healthy Ponderosa Pines within the NCA, an action which would be in accordance with the Alternative E management objective on page 52. o Map 3-3 needs to be updated to reference the presence of Ponderosa Pine in this area. The designation of this expanded ACEC in the final plan, would address the need for non-motorized trails in this portion of the NCA, an opportunity currently missing from the draft plan. And to reiterate, these protections are needed for the myriad of resources found here, especially because they are to be located within an SRMA focused on motorized use

• Gibbler Gulch/Gibbler Mountain The following are route recommendations for Gibbler Gulch and Gibbler Mountain which together make a nice amount of relatively undisturbed open space and habitat. This area is less roaded and fragmented than other parts of Cactus Park NCA unit. It may be less impacted by grazing than other areas and harbors critical big game habitat. Hoping to send you maps next week showing these areas. In particular I recommend keeping recreational use out of all the creek drainages in the upper Gibbler Gulch area, and closing roads on the adjacent mesas. Putting a motorized or mountain bike route over Gibbler Mountain would irreversibly change the natural quality, silence and solitude of this remote landscape. Lands that are currently undeveloped should stay that way as so much land in the NCA is criss-crossed with routes and trails. For example there is potential for retaining the remote "open space" setting of Gibbler Mountain, as specified in the 2007 Colorado BLM Recreation and Visitor Strategy, by closing 1227(!) (especially), 1269, 1309, 2674, 2673, 1249, 1171, 981, 980, 1150, 1154, 977, 979, 1312, 1310, 1334, 1330, 1344, 1286, 1242, 1213, 1238, 1242, 1204, 1213, 1239, 1214, 1212, 1200, 1263, 1204, 1198, 1187, 1210. Limit motorized traffic to roads 15 and 8. Similarly, there is potential for a large unmotorized area extending west from road 15 and Gibbler Gulch on the east, to road 8 on the west. To create an undisturbed nonmotorized area I recommend closing routes 1526, 2666, 1571, 2665, 1608, 1570, 1605, 1561, 1516, 1606, 1561, 1609, 1633, 2664, 2663, 1412, 1424, 1456, 1434, 1513, 1249, 1269. Many of these are duplicative, serve no purpose, or are dead ends, simply pioneered randomly, and should be closed.

##### Planning Criteria

- RECREATION Recreation access to dispersed campsite
- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density highest in Alt A
- DENSITY Route density high in Alt E

#### Rationale

### Designation Criteria

- No designation criteria for this route segment.

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

### Previous Alternatives Analyzed

• The following high value recreational routes/roads are legal ROW's in the State of Colorado, Mesa County and the BLM does not have the jurisdiction to close them: 500, 472, 518, 521, 530, 39, 127, 572, 566, 66, 65, 148, 71, 74, 587, 595, 608, 622, 628, 635, 624, 609, 611, 706, 678, 700, 719, 726, 696, 26, 936, 847, 849, 919, 767, 824, 96, 822, 817, 950, 1021, 900, 2682, 1020, 1003, 1084, 1142, 1184, 1156, 1198, 1349, 1308, 1310, 1238, 1263, 1122, 1170, 1192, 974, 941, 1076, 1039, 1018, 1759, 1764, 1758, 1174, 1788, 1798, 1669, 1699, 1773, 1755, 1779, 1750, 1751, 1792, 1720, 1726, 1727, 1720, 1722, 1803, 1805, 1809, 1614, 1609, 1605, 1608, 1571, 1526, 1516, 1448, 755, 807, 900, 10, 48, 924, 950, 1005, 965, 8, 1115, 981, 984, 1135, 2678, 1249, 1171, 1150, 1249, 1320, 1235, 1236, 1228, 1227, 1409, 1456, 1349, 1308, 1513, 1221, 1550, 1567, 1641, 1612, 1740, 1688, 2597, 2598, 2601, 2440, 3160, 3162, 2089, 2166, 2170, 2596, 2171, 2003, 2122, 2126, 2189, 3145, 2182, 2179, 2178, 3143, 2181, 2121, 2122, 2168, 2126, 2180, 2095, 2173, 2174, 2620, 2129, 1686, 1692, 1667, 1647, 1631, 1613, 1596, 1549, 1541, 2647, 1633, 1605, 1608, 1571, 2645, 1507, 1448, 1496, 1516, 1504, 1510, 1508, 1509, 439, 431, 456, 461, 460, 391, 423, 415, 419, 407, 402, 367, 372, 339, 298, 338, 105, 368, 374, 393, 389, 390, 376, 377, 351, 350, 121, 345, 320, 301, 251, 234, 232, 205, 344, 107, 103, 152, 153, 161, 168, 3199, 188, 196, 255, 254, 236, 294, 242, 219, 201, 169, 162, 158, 160, 173. The following high value recreational routes/roads are legal ROW's in the State of Colorado, Delta County, and the BLM does not have the jurisdiction to close them: 3011, 2184, 2191, 3100, 2187, 2026, 2059, 2188, 2192, 3104, 2130, 3009, 2199, 2200, 2111, 2223, 2024, 3006, 2231, 3094, 2579, 2210, 2344, 2243, 2249, 2248, 3074, 2354, 2384, 2296, 2295, 2287, 2304, 2062, 2163, 3163, 2164, 2430, 4006, 3016, 2351, 3140, 2410, 4008, 2324, 2073, 2306, 2459, 3192, 3193, 2350, 2443, 2035, 2336, 2495, 2491, 2159, 3058, 2277, 2465, 2467, 3189, 2472, 2297, 2006, 2265, 2271, 2276, 2135, 2139, 3053, 2489, 3033, 3057, 2031, 2276, 2210, 2579, 2136, 2344, 3164, 2400, 2379, 3014, 2365, 3116, 2251, 2259, 2149, 2153, 2146, 2144, 2145, 2356, 2257, 2048, 2358, 3165, and 3166.

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 000000135-35

• Gibbler Gulch/Gibbler Mountain The following are route recommendations for Gibbler Gulch and Gibbler Mountain which together make a nice amount of relatively undisturbed open space and habitat. This area is less roaded and fragmented than other parts of Cactus Park NCA unit. It may be less impacted by grazing than other areas and harbors critical big game habitat. Hoping to send you maps next week showing these areas. In particular I recommend keeping recreational use out of all the creek drainages in the upper Gibbler Gulch area, and closing roads on the adjacent mesas. Putting a motorized or mountain bike route over Gibbler Mountain would irreversibly change the natural quality, silence and solitude of this remote landscape. Lands that are currently undeveloped should stay that way as so much land in the NCA is criss-crossed with routes and trails. For example there is potential for retaining the remote "open space" setting of Gibbler Mountain, as specified in the 2007 Colorado BLM Recreation and Visitor Strategy, by closing 1227(!) (especially), 1269, 1309, 2674, 2673, 1249, 1171, 981, 980, 1150, 1154, 977, 979, 1312, 1310, 1334, 1330, 1344, 1286, 1242, 1213, 1238, 1242, 1204, 1213, 1239, 1214, 1212, 1200, 1263, 1204, 1198, 1187, 1210. Limit motorized traffic to roads 15 and 8. Similarly, there is potential for a large unmotorized area extending west from road 15 and Gibbler Gulch on the east, to road 8 on the west. To create an undisturbed nonmotorized area I recommend closing routes 1526, 2666, 1571, 2665, 1608, 1570, 1605, 1561, 1516, 1606, 1561, 1609, 1633, 2664, 2663, 1412, 1424, 1456, 1434, 1513, 1249, 1269. Many of these are duplicative, serve no purpose, or are dead ends, simply pioneered randomly, and should be closed.

Organization, commenter: None

Comment ID: PUB\_SC-009

- [ED: Following are the text (in quotes) and the D-E NCA Recreation Planner's interpretation of what the commenter wrote on the maps they submitted during public scoping for the Dominguez RMP. The Rec Planner also identified the route numbers highlighted on the maps]: Routes 741 and 848 "needs ATV connector. Cultural sites can easily be avoided by the 50 foot policy." Routes 26 and 1017 "needs ATV connector." Route 941 "must remain open." Route 1017 "should be ATV route." There should be an "ATV connect" between routes 1198 and 1263. The following text was highlighted in orange "Highlighted routes are routes used often by WSATVA and other ATVs." in addition to all the routes mentioned previously, the following routes were highlighted in orange: 743, 97, 96, 26, 813, 842, 15, 847, 1393, 1192, 1292. [ED: On a second map, the commenter highlighted additional routes]: The following are "routes used often by WSATVA": 1516, 1571, 1605, 1633, 15, 1641, 1221. "SC-5" connecting routes 1605 and 1633 "and "SC-6" connecting routes 1516 and 1605 "need to become new ATV routes connecting these deadends." [ED: A map of the Gibbler Mountain area had additional text and routes]. "Highlighted routes" which "are often used by WSATVA 3 seasons" are as follows: 1235, 1221, 1409, 1310, 1263, 1198, 15. Route 1235 [is or should be] "an ATV route."

## Route: 1264

### Segment: 1623

#### Designation [?](#)

##### Current Designation

Open (All modes of travel)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density highest in Alt A
- DENSITY Route density high in Alt E

#### Rationale

##### Designation Criteria

- No designation criteria for this route segment.**

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

##### Planning Criteria

- RECREATION Recreation access to dispersed campsite
- RECREATION Recreation opportunities for access to and across federal lands
- SOIL Soils Steep Slopes 40%
- SOIL Soils Fragile
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E
- VEGETATION Sagebrush patches <60 acres

#### Rationale

##### Designation Criteria

- **No designation criteria for this route segment.**

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Public Comments On Route: 1269

Organization, commenter: Janice Shepherd

Comment ID: 000000106-110

o The Gibbler Mountain ACEC as shown on map 2-5E does not encompass the mountain itself but only its northern slopes. I would prefer to see a non-motorized/non-mechanized ACEC for the whole of Gibbler Mountain and its surrounding slopes, bounded by the routes: 1235-1236-1228-1409-1221-15-8-887-18-17-945-547-951-959-966-969-1005-1006-1021-1022-1023-1024-1047-1150-1249, with 1269 left open to motorized use as a motorized cherry-stemmed route into the area. This would keep this wonderful roadless area (though too small a space for the inventory) roadless into the future. The text on page 871 indicates the area has one of the "best known" populations of the rare plant Grand Junction milkvetch as well as a large collection of fragile dinosaur tracks. The Special Species map from the Open House needs to be updated with this GJ milkvetch population. This ACEC representing a hole in the SRMA would properly protect all three features: roadless-ness, dinosaur tracks, and GJ milkvetch, at the cost of less than 5000 acres. This protection is consistent with this being a National Conservation Area and not a National Recreation Area. This position also has support from the D-E NCA Advisory Council. I recently hiked up to the top of the northern portion of Gibbler Mountain with a friend. We were inspired by the challenging terrain for hiking and the awesome views (photo IMG\_9998). We both had a great feeling of accomplishment when we reached the top. There is plenty of evidence of big game animals using the Gibbler Mountain as a quiet sanctuary from the surrounding motorized areas. This proposed ACEC would benefit them.

• Gibbler Mountain Area of Critical Environmental Concern: The QTG supports Gibbler Mtn ACEC from Alt D because protections are needed for the myriad of resources found here, especially if it is going to be located within an SRMA focused on motorized use. Further, we think the ACEC should be extended to include all of Gibbler Mountain. Surface-disturbance limitations and a rule of no motorized use should be included for the full ACEC, including this recommended expansion. With this expansion the full ACEC would be bounded by: Routes: 1235-1236-1228-1409-1221-15-8-887-18-17-945-547-951-954-959-962-966-969-1005-1006-1021-1022-1023-1024-1047-1150-1249-8, with 1269, and 1173-1174-1198-1200-1193 cherry-stemmed into the area. The reasons we support this designation are as follows: Roadless areas are an endangered resource in the high-desert west. Categorically, roadless areas especially within NCAs- should be protected as such. By making it a larger area not only does it protect this roadless area but also it better disguises the location of the dinosaur tracks and fossils which we see from page 872, "are regionally significant and easily damaged". Per page 871, "This site also supports one of the best known occurrences (A-ranked) of Grand Junction milkvetch (Astragalus limifolius), a globally vulnerable plant (G3/S3) and a BLM sensitive plant species."o Map 3-13 needs to be updated to show the presence of Grand Junction milkvetch and Colorado Hookless cactus as the text on page 871 indicates both are present in this area. A recent hike in this area shows prolific big game use in the area, we assume it is their refuge from surrounding motorized use. Recent hikes have confirmed the presence of Ponderosa Pine atop Gibbler Mtn. This designation would aid in increasing the number of healthy Ponderosa Pines within the NCA, an action which would be in accordance with the Alternative E management objective on page 52. o Map 3-3 needs to be updated to reference the presence of Ponderosa Pine in this area. The designation of this expanded ACEC in the final plan, would address the need for non-motorized trails in this portion of the NCA, an opportunity currently missing from the draft plan. And to reiterate, these protections are needed for the myriad of resources found here, especially because they are to be located within an SRMA focused on motorized use

Comment ID: 000000135-35

• Gibbler Gulch/Gibbler MountainThe following are route recommendations for Gibbler Gulch and Gibbler Mountain which together make a nice amount of relatively undisturbed open space and habitat. This area is less roaded and fragmented than other parts of Cactus Park NCA unit. It may be less impacted by grazing than other areas and harbors critical big game habitat. Hoping to send you maps next week showing these areas. In particular I recommend keeping recreational use out of all the creek drainages in the upper Gibbler Gulch area, and closing roads on the adjacent mesas. Putting a motorized or mountain bike route over Gibbler Mountain would irreversibly change the natural quality, silence and solitude of this remote landscape. Lands that are currently undeveloped should stay that way as so much land in the NCA is criss-crossed with routes and trails.For example there is potential for retaining the remote "open space" setting of Gibbler Mountain, as specified in the 2007 Colorado BLM Recreation and Visitor Strategy, by closing 1227(!) (especially), 1269, 1309, 2674, 2673, 1249, 1171, 981, 980, 1150, 1154, 977, 979, 1312, 1310, 1334, 1330, 1344, 1286, 1242, 1213, 1238, 1242, 1204, 1213, 1239, 1214, 1212, 1200, 1263, 1204, 1198, 1187, 1210. Limit motorized traffic to roads 15 and 8.Similarly, there is potential for a large unmotorized area extending west from road 15 and Gibbler Gulch on the east, to road 8 on the west. To create an undisturbed nonmotorized area I recommend closing routes 1526, 2666, 1571, 2665, 1608, 1570, 1605, 1561, 1516, 1606, 1561, 1609 1633, 2664, 2663, 1412, 1424, 1456 1434, 1513, 1249, 1269.Many of these are duplicative, serve no purpose, or are dead ends, simply pioneered randomly, and should be closed.

## Route: 127

### Segment: 2799

#### Designation ?

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Minimize Harassment:** PPSV- Minimize fragmentation, Bighorn – SSR -- summer range, Big game winter range – close

##### Rationale for Decision

- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to reduce the miles of motorized and mechanized routes in bighorn sheep habitat.
- Route was designated to protect big game winter range

## Public Comments On Route: 1286

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 00000135-35

- Gibbler Gulch/Gibbler MountainThe following are route recommendations for Gibbler Gulch and Gibbler Mountain which together make a nice amount of relatively undisturbed open space and habitat. This area is less roaded and fragmented than other parts of Cactus Park NCA unit. It may be less impacted by grazing than other areas and harbors critical big game habitat. Hoping to send you maps next week showing these areas. In particular I recommend keeping recreational use out of all the creek drainages in the upper Gibbler Gulch area, and closing roads on the adjacent mesas. Putting a motorized or mountain bike route over Gibbler Mountain would irreversibly change the natural quality, silence and solitude of this remote landscape. Lands that are currently undeveloped should stay that way as so much land in the NCA is criss-crossed with routes and trails.For example there is potential for retaining the remote "open space" setting of Gibbler Mountain, as specified in the 2007 Colorado BLM Recreation and Visitor Strategy, by closing 1227(!) (especially), 1269, 1309, 2674, 2673, 1249, 1171, 981, 980, 1150, 1154, 977, 979, 1312, 1310, 1334, 1330, 1344, 1286, 1242, 1213, 1238, 1242, 1204, 1213, 1239, 1214, 1212, 1200, 1263, 1204, 1198, 1187, 1210. Limit motorized traffic to roads 15 and 8.Similarly, there is potential for a large unmotorized area extending west from road 15 and Gibbler Gulch on the east, to road 8 on the west. To create an undisturbed nonmotorized area I recommend closing routes 1526, 2666, 1571, 2665, 1608, 1570, 1605, 1561, 1516, 1606, 1561, 1609 1633, 2664, 2663, 1412, 1424, 1456 1434, 1513 , 1249, 1269.Many of these are duplicative, serve no purpose, or are dead ends, simply pioneered randomly, and should be closed.

## Public Comments On Route: 1292

Organization, commenter: Quiet Trails Group, Sherry Schenk

Comment ID: 00000115-44

• 1292, 1315, 1331, 1340 (Easternnob' flanked to the south by Triangle Mesa and to the north by the Ninemile Hill ERMA): A recommendation for these routes be left open for hike and horse was included in the QTG's scoping comments. In the draft's preferred alternative they are slated for closure. The QTG again states our interest in this being left open for quiet users, but we expand that list to include mountain bikers. We envision this route being extended to continue around the rim, eventually crossing 1192, before continuing along the rim northward as part of a long rim quiet trail within Ninemile Hill. Once reaching the Ninemile Hill ERMA, after crossing route 830, the rim route would change to just horse and foot to be consistent with the objectives of the ERMA. This is consistent with our recommendation of eliminating overlap between the ATV SRMA and the Bighorn Sheep Production, Winter and Summer Areas

Organization, commenter: None

Comment ID: PUB\_SC-014

• 1. We have identified known potential issues and criteria to guide the planning process based on lands and resources in the planning area. Please provide comments on these issues and criteria, and/or identify other issues or criteria that you think should be considered (If your comment pertains to a specific is sure or criteria, please use the reference code, e.g. "PCI") 2. What areas within the Dominguez-Escalante National Conservation Area or Dominguez Canyon Wilderness do you value? Why? Area 1 Great views birdwatching, wildlife potography & some hicking Area 2 Viewing from bluffs from above Area 3 I use this area a good many times a year Area 4 I can't get to this area to use. Area 5 I use any road or ATV trail thats OPEN 3. Please provide any additional comments that you have regarding this project. Comments on attach sheet. Maps with GPS routes in red. Things that I want to comment on concerning Dominguez-Escalante NCA. 1. Cactus Park area is used by the motorized community, Mountain bikers, Hikers, and Etc. There are a lot of roads, jeep & ATV trails that need to be open for everyone to use. The area has been used for cattle grazing, Christmas tree cutting, fire wood, and many other uses. As the population grows in this area there needs to be public land open for their use. 2. As the motorized roads, double track and single track trails are closed; much less area is left for folks to use. Any Wilderness and Wilderness Study Area restricts firefighting, timber cutting (to help control pine and pinion beeHe and controlling ground cover which will stop the massive fuel for fires) and weed control. Colorado is having large fires now because of these large amounts of fuel. 3. The attached maps have GPS routes shown in red that I have GPS'ed at different times. Please note that I have used these routes at different times. All these routes are jeep accessible; many are used by 2 wheel drive pickups. I almost never see hikers when I'm out using these routes on my ATV or Pickup. [ED: The D-E NCA's Recreation Planner identified the route numbers for routes highlighted on the map mentioned in this comment: 621, 624, 676, 649, 641, 743, 676, 741, 97, 96, 744, 733, 15, 838, 18, 945, 26, 847, 848, 941, 1192, 1292, 1377]

Organization, commenter: None

Comment ID: PUB\_SC-009

• [ED: Following are the text (in quotes) and the D-E NCA Recreation Planner's interpretation of what the commenter wrote on the maps they submitted during public scoping for the Dominguez RMP. The Rec Planner also identified the route numbers highlighted on the maps]: Routes 741 and 848 "needs ATV connector. Cultural sites can easily be avoided by the 50 foot policy." Routes 26 and 1017 "needs ATV connector." Route 941 "must remain open." Route 1017 "should be ATV route." There should be an "ATV connect" between routes 1198 and 1263. The following text was highlighted in orange "Highlighted routes are routes used often by WSATVA and other ATVs." in addition to all the routes mentioned previously, the following routes were highlighted in orange: 743, 97, 96, 26, 813, 842, 15, 847, 1393, 1192, 1292. [ED: On a second map, the commenter highlighted additional routes]: The following are "routes used often by WSATVA": 1516, 1571, 1605, 1633, 15, 1641, 1221. "SC-5" connecting routes 1605 and 1633 " and "SC-6" connecting routes 1516 and 1605 "need to become new ATV routes connecting these deadends." [ED: A map of the Gibbler Mountain area had additional text and routes]. "Highlighted routes" which "are often used by WSATVA 3 seasons" are as follows: 1235, 1221, 1409, 1310, 1263, 1198, 15. Route 1235 [is or should be] "an ATV route."

## Route: 1293

#### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density highest in Alt A
- DENSITY Route density low in Alt E

### Rationale

#### Designation Criteria

- **Minimize Harassment:** Big game winter range – close, PPSV- Minimize fragmentation
- **Recreation:** RMA objectives

#### Rationale for Decision

- Route was designated to protect big game winter range
- Route was designated to reduce fragmentation in Priority Vegetation types

## Public Comments On Route: 13

Organization, commenter: Quiet Trails Group, Sherry Schenk

Comment ID: 000000115-32

- Gibbler Mountain Area of Critical Environmental Concern: The QTG supports Gibbler Mtn ACEC from Alt D because protections are needed for the myriad of resources found here, especially if it is going to be located within an SRMA focused on motorized use. Further, we think the ACEC should be extended to include all of Gibbler Mountain. Surface-disturbance limitations and a rule of no motorized use should be included for the full ACEC, including this recommended expansion. With this expansion the full ACEC would be bounded by: Routes: 1235-1236-1228-1409-1221-15-8-887-18-17-945-947-951-954-959-962-966-969-1005-1006-1021-1022-1023-1024-1047-1150-1249-8, with 1269, and 1173-1174-1198-1200-1193 cherry-stemmed into the area. The reasons we support this designation are as follows: Roadless areas are an endangered resource in the high-desert west. Categorically, roadless areas especially within NCAs- should be protected as such. By making it a larger area not only does it protect this roadless area but also it better disguises the location of the dinosaur tracks and fossils which we see from page 872," are regionally significant and easily damaged". Per page 871, "This site also supports one of the best known occurrences (A-ranked) of Grand Junction milkvetch (Astragalus limifolius), a globally vulnerable plant (G3/S3) and a BLM sensitive plant species."o Map 3-13 needs to be updated to show the presence of Grand Junction milkvetch and Colorado Hookless cactus as the text on page 871 indicates both are present in this area. A recent hike in this area shows prolific big game use in the area, we assume it is their refuge from surrounding motorized use. Recent hikes have confirmed the presence of Ponderosa Pine atop Gibbler Mtn. This designation would aid in increasing the number of healthy Ponderosa Pines within the NCA, an action which would be in accordance with the Alternative E management objective on page 52. o Map 3-3 needs to be updated to reference the presence of Ponderosa Pine in this area. The designation of this expanded ACEC in the final plan, would address the need for non-motorized trails in this portion of the NCA, an opportunity currently missing from the draft plan. And to reiterate, these protections are needed for the myriad of resources found here, especially because they are to be located within an SRMA focused on motorized use

## Public Comments On Route: 1309

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 00000135-35

- Gibbler Gulch/Gibbler MountainThe following are route recommendations for Gibbler Gulch and Gibbler Mountain which together make a nice amount of relatively undisturbed open space and habitat. This area is less roaded and fragmented than other parts of Cactus Park NCA unit. It may be less impacted by grazing than other areas and harbors critical big game habitat. Hoping to send you maps next week showing these areas. In particular I recommend keeping recreational use out of all the creek drainages in the upper Gibbler Gulch area, and closing roads on the adjacent mesas. Putting a motorized or mountain bike route over Gibbler Mountain would irreversibly change the natural quality, silence and solitude of this remote landscape. Lands that are currently undeveloped should stay that way as so much land in the NCA is criss-crossed with routes and trails.For example there is potential for retaining the remote "open space" setting of Gibbler Mountain, as specified in the 2007 Colorado BLM Recreation and Visitor Strategy, by closing 1227(!) (especially), 1269, 1309, 2674, 2673, 1249, 1171, 981, 980, 1150, 1154, 977, 979, 1312, 1310, 1334, 1330, 1344, 1286, 1242, 1213, 1238, 1242, 1204, 1213, 1239, 1214, 1212, 1200, 1263, 1204, 1198, 1187, 1210. Limit motorized traffic to roads 15 and 8.Similarly, there is potential for a large unmotorized area extending west from road 15 and Gibbler Gulch on the east, to road 8 on the west. To create an undisturbed nonmotorized area I recommend closing routes 1526, 2666, 1571, 2665, 1608, 1570, 1605, 1561, 1516, 1606, 1561, 1609 1633, 2664, 2663, 1412, 1424, 1456 1434, 1513 , 1249, 1269.Many of these are duplicative, serve no purpose, or are dead ends, simply pioneered randomly, and should be closed.

## Route: 1310

### Segment: 1584

### Designation

#### Current Designation

Closed (Rehab)

#### Mitigation Criteria

- Needs Data - Cultural

#### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I moderate
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches >60 acres

### Rationale

#### Designation Criteria

- **Minimize Damage:** Riparian—ephemeral streams SSR 30 m
- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, GUSG –PSD in winter habitat

#### Rationale for Decision

- Route was designated to minimize travel routes in and crossing riparian and wetland areas.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range
- Route was designated to minimize fragmentation of Gunnison sage-grouse habitat.

### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 1310

Organization, commenter: Brandon Siegfried

Comment ID: 000000068-3

• The following high value recreational routes/roads are legal ROW's in the State of Colorado, Mesa County and the BLM does not have the jurisdiction to close them: 500, 472, 518, 521, 530, 39, 127, 572, 566, 66, 65, 148, 71, 74, 587, 595, 608, 622, 628, 635, 624, 609, 611, 706, 678, 700, 719, 726, 696, 26, 936, 847, 849, 919, 767, 824, 96, 822, 817, 950, 1021, 900, 2682, 1020, 1003, 1084, 1142, 1184, 1156, 1198, 1349, 1308, 1310, 1238, 1263, 1122, 1170, 1192, 974, 941, 1076, 1039, 1018, 1759, 1764, 1758, 1174, 1788, 1798, 1669, 1699, 1773, 1755, 1779, 1750, 1751, 1792, 1720, 1726, 1727, 1720, 1722, 1803, 1805, 1809, 1614, 1609, 1605, 1608, 1571, 1526, 1516, 1448, 755, 807, 900, 10, 48, 924, 950, 1005, 965, 8, 1115, 981, 984, 1135, 2678, 1249, 1171, 1150, 1249, 1320, 1235, 1236, 1228, 1227, 1409, 1456, 1349, 1308, 1513, 1221, 1550, 1567, 1641, 1612, 1740, 1688, 2597, 2598, 2601, 2440, 3160, 3162, 2089, 2166, 2170, 2596, 2171, 2003, 2122, 2126, 2189, 3145, 2182, 2179, 2178, 3143, 2181, 2121, 2122, 2168, 2126, 2180, 2095, 2173, 2174, 2620, 2129, 1686, 1692, 1667, 1647, 1631, 1613, 1596, 1549, 1541, 2647, 1633, 1605, 1608, 1571, 2645, 1507, 1448, 1496, 1516, 1504, 1510, 1508, 1509, 439, 431, 456, 461, 460, 391, 423, 415, 419, 407, 402, 367, 372, 339, 298, 338, 105, 368, 374, 393, 389, 390, 376, 377, 351, 350, 121, 345, 320, 301, 251, 234, 232, 205, 344, 107, 103, 152, 153, 161, 168, 3199, 188, 196, 255, 254, 236, 294, 242, 219, 201, 169, 162, 158, 160, 173. The following high value recreational routes/roads are legal ROW's in the State of Colorado, Delta County, and the BLM does not have the jurisdiction to close them: 3011, 2184, 2191, 3100, 2187, 2026, 2059, 2188, 2192, 3104, 2130, 3009, 2199, 2200, 2111, 2223, 2024, 3006, 2231, 3094, 2579, 2210, 2344, 2243, 2249, 2248, 3074, 2354, 2384, 2296, 2295, 2287, 2304, 2062, 2163, 3163, 2164, 2430, 4006, 3016, 2351, 3140, 2410, 4008, 2324, 2073, 2306, 2459, 3192, 3193, 2350, 2443, 2035, 2336, 2495, 2491, 2159, 3058, 2277, 2465, 2467, 3189, 2472, 2297, 2006, 2265, 2271, 2276, 2135, 2139, 3053, 2489, 3033, 3057, 2031, 2276, 2210, 2579, 2136, 2344, 3164, 2400, 2379, 3014, 2365, 3116, 2251, 2259, 2149, 2153, 2146, 2144, 2145, 2356, 2257, 2048, 2358, 3165, and 3166.

Comment ID: 00000135-35

• Gibbler Gulch/Gibbler Mountain The following are route recommendations for Gibbler Gulch and Gibbler Mountain which together make a nice amount of relatively undisturbed open space and habitat. This area is less roaded and fragmented than other parts of Cactus Park NCA unit. It may be less impacted by grazing than other areas and harbors critical big game habitat. Hoping to send you maps next week showing these areas. In particular I recommend keeping recreational use out of all the creek drainages in the upper Gibbler Gulch area, and closing roads on the adjacent mesas. Putting a motorized or mountain bike route over Gibbler Mountain would irreversibly change the natural quality, silence and solitude of this remote landscape. Lands that are currently undeveloped should stay that way as so much land in the NCA is criss-crossed with routes and trails. For example there is potential for retaining the remote "open space" setting of Gibbler Mountain, as specified in the 2007 Colorado BLM Recreation and Visitor Strategy, by closing 1227(!) (especially), 1269, 1309, 2674, 2673, 1249, 1171, 981, 980, 1150, 1154, 977, 979, 1312, 1310, 1334, 1330, 1344, 1286, 1242, 1213, 1238, 1242, 1204, 1213, 1239, 1214, 1212, 1200, 1263, 1204, 1198, 1187, 1210. Limit motorized traffic to roads 15 and 8. Similarly, there is potential for a large unmotorized area extending west from road 15 and Gibbler Gulch on the east, to road 8 on the west. To create an undisturbed nonmotorized area I recommend closing routes 1526, 2666, 1571, 2665, 1608, 1570, 1605, 1561, 1516, 1606, 1561, 1609, 1633, 2664, 2663, 1412, 1424, 1456, 1434, 1513, 1249, 1269. Many of these are duplicative, serve no purpose, or are dead ends, simply pioneered randomly, and should be closed.

The following high value recreational routes/roads are legal RS 2477 ROW's in the State of Colorado, Delta County, and the BLM does not have the jurisdiction to close them: 3011, 2184, 2191, 3100, 2187, 2026, 2059, 2188, 2192, 3104, 2130, 3009, 2199, 2200, 2111, 2223, 2024, 3006, 2231, 3094, 2579, 2210, 2344, 2243, 2249, 2248, 3074, 2354, 2384, 2296, 2295, 2287, 2304, 2062, 2163, 3163, 2164, 2430, 4006, 3016, 2351, 3140, 2410, 4008, 2324, 2073, 2306, 2459, 3192, 3193, 2350, 2443, 2035, 2336, 2495, 2491, 2159, 3058, 2277, 2465, 2467, 3189, 2472, 2297, 2006, 2265, 2271, 2276, 2135, 2139, 3053, 2489, 3033, 3057, 2031, 2276, 2210, 2579, 2136, 2344, 3164, 2400, 2379, 3014, 2365, 3116, 2251, 2259, 2149, 2153, 2146, 2144, 2145, 2356, 2257, 2048, 2358, 3165, and 3166.

Organization, commenter: None

Comment ID: PUB\_SC-009

• [ED: Following are the text (in quotes) and the D-E NCA Recreation Planner's interpretation of what the commenter wrote on the maps they submitted during public scoping for the Dominguez RMP. The Rec Planner also identified the route numbers highlighted on the maps]: Routes 741 and 848 "needs ATV connector. Cultural sites can easily be avoided by the 50 foot policy." Routes 26 and 1017 "needs ATV connector." Route 941 "must remain open." Route 1017 "should be ATV route." There should be an "ATV connect" between routes 1198 and 1263. The following text was highlighted in orange "Highlighted routes are routes used often by WSATVA and other ATVs." in addition to all the routes mentioned previously, the following routes were highlighted in orange: 743, 97, 96, 26, 813, 842, 15, 847, 1393, 1192, 1292. [ED: On a second map, the commenter highlighted additional routes]: The following are "routes used often by WSATVA": 1516, 1571, 1605, 1633, 15, 1641, 1221. "SC-5" connecting routes 1605 and 1633 " and "SC-6" connecting routes 1516 and 1605 "need to become new ATV routes connecting these deadends." [ED: A map of the Gibbler Mountain area had additional text and routes]. "Highlighted routes" which "are often used by WSATVA 3 seasons" are as follows: 1235, 1221, 1409, 1310, 1263, 1198, 15. Route 1235 [is or should be] "an ATV route."

## Route: 1311

### Segment: 1581

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density highest in Alt A
- DENSITY Route density high in Alt E

#### Rationale

##### Designation Criteria

- **Minimize Damage:** Fragile soils SSR
- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, GUSG – PSD in winter habitat

##### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range
- Route was designated to minimize fragmentation of Gunnison sage-grouse habitat.

Comment ID: 00000115-44

- 1292, 1315, 1331, 1340 (Easternnob' flanked to the south by Triangle Mesa and to the north by the Ninemile Hill ERMA): A recommendation for these routes be left open for hike and horse was included in the QTG's scoping comments. In the draft's preferred alternative they are slated for closure. The QTG again states our interest in this being left open for quiet users, but we expand that list to include mountain bikers. We envision this route being extended to continue around the rim, eventually crossing 1192, before continuing along the rim northward as part of a long rim quiet trail within Ninemile Hill. Once reaching the Ninemile Hill ERMA, after crossing route 830, the rim route would change to just horse and foot to be consistent with the objectives of the ERMA. This is consistent with our recommendation of eliminating overlap between the ATV SRMA and the Bighorn Sheep Production, Winter and Summer Areas

## Route: 1316

### Segment: 1554

#### Designation

##### Current Designation

Vehicles under 50" wide

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density highest in Alt A
- DENSITY Route density medium in Alt E

## Rationale

### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Vehicles under 50" wide

**Alternative C:** Foot/Horse

**Alternative D:** Vehicles under 50" wide

## Public Comments On Route: 1316

- No public comments for this Route

## Route: 1317

### Segment: 1571

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I moderate

- DENSITY Route density highest in Alt A
- DENSITY Route density high in Alt E

## Rationale

### Designation Criteria

- **Minimize Damage:** Fragile soils SSR
- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, Sage-Minimize fragmentation, GUSG –PSD in winter habitat

### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range
- Route was designated to reduce fragmentation of sagebrush patches
- Route was designated to minimize fragmentation of Gunnison sage-grouse habitat.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 1317

- No public comments for this Route

## Route: 1318

### Segment: 1556

## Designation

### Current Designation

Vehicles under 50" wide

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density highest in Alt A
- DENSITY Route density high in Alt E

## Rationale

### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 1318

- No public comments for this Route

## Route: 132

### Segment: 2793

## Designation

### Current Designation

Foot/Horse

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement

RANGE Range access for general livestock management

- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Admin/Permitted Use Only

**Alternative C:** Foot/Horse

**Alternative D:** Foot/Horse/Mechanized/Motorcycle

## Public Comments On Route: 132

- No public comments for this Route

## Route: 1320

### Segment: 1551

#### Designation ?

##### Current Designation

Open (All modes of travel)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E
- VEGETATION Sagebrush patches <60 acres

## Rationale

### Designation Criteria

- **No designation criteria for this route segment.**

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open (All modes of travel)

**Alternative C:** Closed (Rehab)

**Alternative D:** Open (All modes of travel)

## Public Comments On Route: 1320

Organization, commenter: Brandon Siegfried

Comment ID: 000000068-3

• The following high value recreational routes/roads are legal ROW's in the State of Colorado, Mesa County and the BLM does not have the jurisdiction to close them: 500, 472, 518, 521, 530, 39, 127, 572, 566, 66, 65, 148, 71, 74, 587, 595, 608, 622, 628, 635, 624, 609, 611, 706, 678, 700, 719, 726, 696, 26, 936, 847, 849, 919, 767, 824, 96, 822, 817, 950, 1021, 900, 2682, 1020, 1003, 1084, 1142, 1184, 1156, 1198, 1349, 1308, 1310, 1238, 1263, 1122, 1170, 1192, 974, 941, 1076, 1039, 1018, 1759, 1764, 1758, 1174, 1788, 1798, 1669, 1699, 1773, 1755, 1779, 1750, 1751, 1792, 1720, 1726, 1727, 1720, 1722, 1803, 1805, 1809, 1614, 1609, 1605, 1608, 1571, 1526, 1516, 1448, 755, 807, 900, 10, 48, 924, 950, 1005, 965, 8, 1115, 981, 984, 1135, 2678, 1249, 1171, 1150, 1249, 1320, 1235, 1236, 1228, 1227, 1409, 1456, 1349, 1308, 1513, 1221, 1550, 1567, 1641, 1612, 1740, 1688, 2597, 2598, 2601, 2440, 3160, 3162, 2089, 2166, 2170, 2596, 2171, 2003, 2122, 2126, 2189, 3145, 2182, 2179, 2178, 3143, 2181, 2121, 2122, 2168, 2126, 2180, 2095, 2173, 2174, 2620, 2129, 1686, 1692, 1667, 1647, 1631, 1613, 1596, 1549, 1541, 2647, 1633, 1605, 1608, 1571, 2645, 1507, 1448, 1496, 1516, 1504, 1510, 1508, 1509, 439, 431, 456, 461, 460, 391, 423, 415, 419, 407, 402, 367, 372, 339, 298, 338, 105, 368, 374, 393, 389, 390, 376, 377, 351, 350, 121, 345, 320, 301, 251, 234, 232, 205, 344, 107, 103, 152, 153, 161, 168, 3199, 188, 196, 255, 254, 236, 294, 242, 219, 201, 169, 162, 158, 160, 173. ## Route: 1321

### Segment: 1560

#### Designation

##### Current Designation

Open (All modes of travel)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density highest in Alt A
- DENSITY Route density high in Alt E

#### Rationale

##### Designation Criteria

- **No designation criteria for this route segment.**

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open (All modes of travel)

**Alternative C:** Open (All modes of travel)

**Alternative D:** Open (All modes of travel)

## Public Comments On Route: 1321

- No public comments for this Route

## Route: 1323

### Segment: 1547

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density highest in Alt A
- DENSITY Route density high in Alt E

#### Rationale

##### Designation Criteria

- **Minimize Damage:** Fragile soils SSR
- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, GUSG –PSD in winter habitat

##### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range
- Route was designated to minimize fragmentation of Gunnison sage-grouse habitat.

### Segment: 2791

### Designation

#### Current Designation

Foot/Horse

#### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

### Rationale

#### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

#### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

### Previous Alternatives Analyzed

### Public Comments On Route: 1330

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 000000135-35

- Gibbler Gulch/Gibbler MountainThe following are route recommendations for Gibbler Gulch and Gibbler Mountain which together make a nice amount of relatively undisturbed open space and habitat. This area is less roaded and fragmented than other parts of Cactus Park NCA unit. It may be less impacted by grazing than other areas and harbors critical big game habitat. Hoping to send you maps next week showing these areas. In particular I recommend keeping recreational use out of all the creek drainages in the upper Gibbler Gulch area, and closing roads on the adjacent mesas. Putting a motorized or mountain bike route over Gibbler Mountain would irreversibly change the natural quality, silence and solitude of this remote landscape. Lands that are currently undeveloped should stay that way as so much land in the NCA is criss-crossed with routes and trails.For example there is potential for retaining the remote "open space" setting of Gibbler Mountain, as specified in the 2007 Colorado BLM Recreation and Visitor Strategy, by closing 1227(!) (especially), 1269, 1309, 2674, 2673, 1249, 1171, 981, 980, 1150, 1154, 977, 979, 1312, 1310, 1334, 1330, 1344, 1286, 1242, 1213, 1238, 1242, 1204, 1213, 1239, 1214, 1212, 1200, 1263, 1204, 1198, 1187, 1210. Limit motorized traffic to roads 15 and 8.Similarly, there is potential for a large unmotorized area extending west from road 15 and Gibbler Gulch on the east, to road 8 on the west. To create an undisturbed nonmotorized area I recommend closing routes 1526, 2666, 1571, 2665, 1608, 1570, 1605, 1561, 1516, 1606, 1561, 1609 1633, 2664, 2663, 1412, 1424, 1456 1434, 1513 , 1249, 1269.Many of these are duplicative, serve no purpose, or are dead ends, simply pioneered randomly, and should be closed.

## Public Comments On Route: 1331

Organization, commenter: Quiet Trails Group, Sherry Schenk

Comment ID: 00000115-44

- 1292, 1315, 1331, 1340 (Easternnob' flanked to the south by Triangle Mesa and to the north by the Ninemile Hill ERMA): A recommendation for these routes be left open for hike and horse was included in the QTG's scoping comments. In the draft's preferred alternative they are slated for closure. The QTG again states our interest in this being left open for quiet users, but we expand that list to include mountain bikers. We envision this route being extended to continue around the rim, eventually crossing 1192, before continuing along the rim northward as part of a long rim quiet trail within Ninemile Hill. Once reaching the Ninemile Hill ERMA, after crossing route 830, the rim route would change to just horse and foot to be consistent with the objectives of the ERMA. This is consistent with our recommendation of eliminating overlap between the ATV SRMA and the Bighorn Sheep Production, Winter and Summer Areas

## Route: 1332

**Alternative D:** Closed (Rehab)

### Public Comments On Route: 1348

- No public comments for this Route

### Route: 1349

#### Segment: 1574

### Designation

#### Current Designation

Closed (Rehab)

#### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

#### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- RIPARIAN Riparian 9 stream crossings
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I moderate
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches >60 acres

### Rationale

#### Designation Criteria

- **Minimize Damage:** Riparian—ephemeral streams SSR 30 m, Fragile soils SSR
- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, GUSG –PSD in winter habitat

#### Rationale for Decision

- Route was designated to minimize travel routes in and crossing riparian and wetland areas.
- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range
- Route was designated to minimize fragmentation of Gunnison sage-grouse habitat.

### Previous Alternatives Analyzed

**Alternative A:** Vehicles under 50" wide

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

### Public Comments On Route: 1349

Organization, commenter: Brandon Siegfried

Comment ID: 00000068-3

- The following high value recreational routes/roads are legal ROW's in the State of Colorado, Mesa County and the BLM does not have the jurisdiction to close them: 500, 472, 518, 521, 530, 39, 127, 572, 566, 66, 65, 148, 71, 74, 587, 595, 608, 622, 628, 635, 624, 609, 611, 706, 678, 700, 719, 726, 696, 26, 936, 847, 849, 919, 767, 824, 96, 822, 817, 950, 1021, 900, 2682, 1020, 1003, 1084, 1142, 1184, 1156, 1198, 1349, 1308, 1310, 1238, 1263, 1122, 1170, 1192, 974, 941, 1076, 1039, 1018, 1759, 1764, 1758, 1174, 1788, 1798, 1669, 1699, 1773, 1755, 1779, 1750, 1751, 1792, 1720, 1726, 1727, 1720, 1722, 1803, 1805, 1809, 1614, 1609, 1605, 1608, 1571, 1526, 1516, 1448, 755, 807, 900, 10, 48, 924, 950, 1005, 965, 8, 1115, 981, 984, 1135, 2678, 1249, 1171, 1150, 1249, 1320, 1235, 1236, 1228, 1227, 1409, 1456, 1349, 1308, 1513, 1221, 1550, 1567, 1641, 1612, 1740, 1688, 2597, 2598, 2601, 2440, 3162, 2089, 2166, 2170, 2596, 2171, 2003, 2122, 2126, 2189, 3145, 2182, 2179, 2178, 3143, 2181, 2121, 2122, 2168, 2126, 2180, 2095, 2173, 2174, 2620, 2129, 1686, 1692, 1667, 1647, 1631, 1613, 1596, 1549, 1541, 2647, 1633, 1605, 1608, 1571, 2645, 1507, 1448, 1496, 1516, 1504, 1510, 1508, 1509, 439, 431, 456, 461, 460, 391, 423, 415, 419, 407, 402, 367, 372, 339, 298, 338, 105, 368, 374, 393, 389, 390, 376, 377, 351, 350, 121, 345, 320,

## Route: 135

### Segment: 2788

#### Designation

##### Current Designation

Foot/Horse

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- WILDLIFE Mule deer severe winter range
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Admin/Permitted Use Only

**Alternative C:** Foot/Horse

**Alternative D:** Foot/Horse/Mechanized/Motorcycle

## Public Comments On Route: 135

## Route: 1351

### Segment: 1511

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density highest in Alt A
- DENSITY Route density medium in Alt E

#### Rationale

##### Designation Criteria

- **Minimize Damage:** Fragile soils SSR

- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, GUSG –PSD in winter habitat

### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range
- Route was designated to minimize fragmentation of Gunnison sage-grouse habitat.

### Current Designation

Closed (Rehab)

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density highest in Alt A
- DENSITY Route density medium in Alt E

## Rationale

### Designation Criteria

- **Minimize Damage:** Fragile soils SSR
- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, GUSG –PSD in winter habitat

### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range
- Route was designated to minimize fragmentation of Gunnison sage-grouse habitat.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

## Public Comments On Route: 1377

Organization, commenter: Katie Steele

Comment ID: 000000056-3

- The second routes are 1377, 1233 and 1415 in Cactus Park. By closing these routes, it makes accessing the Wilderness a lot more difficult for a larger number of users. I would suggest keeping these routes open to motorized users and adding a parking lot to enable users access the Dominguez Canyon at that point. Otherwise, if you come into the NCA from the north and wish to access the Wilderness, the users will access from the Bridgeport Road and the mouth of Big Dominguez Canyon. This will only increase the usage by hikers, rafters, equestrian users, etc. As the usage increases, I can see numerous user conflicts by compressing the majority of the access through one location.

## Route: 1378

### Segment: 1471

#### Designation [?](#)

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Direct impact
- DENSITY Route density highest in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches >60 acres

#### Rationale

##### Designation Criteria

- **Minimize Damage:** Fragile soils SSR
- **Minimize Harassment:** PPSV- Minimize fragmentation, Bighorn – SSR -- summer range, GUSG –PSD in winter habitat

##### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to reduce the miles of motorized and mechanized routes in bighorn sheep habitat.
- Route was designated to minimize fragmentation of Gunnison sage-grouse habitat.

## Public Comments On Route: 1388

Organization, commenter: Janice Shepherd

Comment ID: 00000106-222

- Route 2628 should be closed. I can see leaving the routes that lead to and include 1388 open as Admin/Permittee, as 1388 leads to a stock pond (which had water in it on Aug 4th 2013 IMG\_9799). But the eastern end of 2628 is on top of a narrow berm that has only had cows walking across it. The western end leads to nothing of worth from an Admin/Permittee perspective. 2628 should be closed.

## Route: 139

### Segment: 2785

#### Designation [?](#)

**Current Designation**  
Admin/Permitted Use Only

#### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

#### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- WILDLIFE Mule deer severe winter range
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- No designation criteria for this route segment.

##### Rationale for Decision

- Route was designated to ensure access to rights-of-way, private property, and livestock grazing facilities.

## Public Comments On Route: 139

Organization, commenter: Janice Shepherd

Comment ID: 00000106-216

- Route 139 is indicated in Alternative E as open for Admin/Permittee. While it provides access to a stock pond this route drives straight up the slope of the dam and does not conform to the rule for sustainable routes (see photo IMG\_9822). Its visibility when approaching from the north is acting as an attractive nuisance to those seeking a motorized "jump" spot.

## Public Comments On Route: 1393

Organization, commenter: None

Comment ID: PUB\_SC-009

- [ED: Following are the text (in quotes) and the D-E NCA Recreation Planner's interpretation of what the commenter wrote on the maps they submitted during public scoping for the Dominguez RMP. The Rec Planner also identified the route numbers highlighted on the maps]: Routes 741 and 848 "needs ATV connector. Cultural sites can easily be avoided by the 50 foot policy." Routes 26 and 1017 "needs ATV connector." Route 941 "must remain open." Route 1017 "should be ATV route." There should be an "ATV connect" between routes 1198 and 1263. The following text was highlighted in orange "Highlighted routes are routes used often by WSATVA and other ATVs." in addition to all the routes mentioned previously, the following routes were highlighted in orange: 743, 97, 96, 26, 813, 842, 15, 847, 1393, 1192, 1292. [ED: On a second map, the commenter highlighted additional routes]: The following are "routes used often by WSATVA": 1516, 1571, 1605, 1633, 15, 1641, 1221. "SC-5" connecting routes 1605 and 1633 " and "SC-6" connecting routes 1516 and 1605 "need to become new ATV routes connecting these deadends." [ED: A map of the Gibbler Mountain area had additional text and routes]. "Highlighted routes" which "are often used by WSATVA 3 seasons" are as follows: 1235, 1221, 1409, 1310, 1263, 1198, 15. Route 1235 [is or should be] "an ATV route."

## Route: 1395

### Segment: 1451

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- **Minimize Damage:** Fragile soils SSR
- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, GUSG –PSD in winter habitat

### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range
- Route was designated to minimize fragmentation of Gunnison sage-grouse habitat.

### Public Comments On Route: 1406

Organization, commenter: Janice Shepherd

Comment ID: 000000106-221

- Triangle Mesa route should be left open to horse and foot: 1416, 1406, 1219. I've hiked the loop part and it has some great views down into canyons of the wilderness that are breath-taking in wonder and beauty. I love seeing familiar places (in this case Big Dominguez Canyon) from a different perspective (above) as it brings a fresh view of familiar ground. This route is also listed in the popular book "Grand Junction Trails and Camping Guide" by Nattana Johnson.

Organization, commenter: Quiet Trails Group, Sherry Schenk

Comment ID: 000000115-52

- [Dominguez Canyon Wilderness TMP-Level Comments]Zone 2Triangle Mesa: Quiet Trails Group would like to see the Triangle Mesa trail kept open in the Wilderness as a hiking and horse trail assuming that we can protect the special resources in the area. Routes 1416-1406-1219 should be left open to horse and foot with their connection to 1417 (horse and foot in Alt E).

• Routes such as the Gible Gulch route, Farmer Canyon routes and the main routes in Wagon Park should remain open in December and January. A more prudent closure, if even needed, would be during "mud season" in the area. I would propose this to be from Mid February to April. BLM should tell Parks & Wildlife that this approach would make much more sense and accomplish the same thing as a five month closure.

• o The Gible Mountain ACEC as shown on map 2-5E does not encompass the mountain itself but only its northern slopes. I would prefer to see a non-motorized/non-mechanized ACEC for the whole of Gible Mountain and its surrounding slopes, bounded by the routes: 1235-1236-1228-1409-1221-15-8-887-18-17-945-947-951-959-966-969-1005-1006-1021-1022-1023-1024-1047-1150-1249, with 1269 left open to motorized use as a motorized cherry-stemmed route into the area. This would keep this wonderful roadless area (though too small a space for the inventory) roadless into the future. The text on page 871 indicates the area has one of the "best known" populations of the rare plant Grand Junction milkvetch as well as a large collection of fragile dinosaur tracks. The Special Species map from the Open House needs to be updated with this GJ milkvetch population. This ACEC representing a hole in the SRMA would properly protect all three features: roadless-ness, dinosaur tracks, and GJ milkvetch, at the cost of less than 5000 acres. This protection is consistent with this being a National Conservation Area and not a National Recreation Area. This position also has support from the D-E NCA Advisory Council. I recently hiked up to the top of the northern portion of Gible Mountain with a friend. We were inspired by the challenging terrain for hiking and the awesome views (photo IMG\_9998). We both had a great feeling of accomplishment when we reached the top. There is plenty of evidence of big game animals using the Gible Mountain as a quiet sanctuary from the surrounding motorized areas. This proposed ACEC would benefit them.

• Gible Mountain Area of Critical Environmental Concern: The QTG supports Gible Mtn ACEC from Alt D because protections are needed for the myriad of resources found here, especially if it is going to be located within an SRMA focused on motorized use. Further, we think the ACEC should be extended to include all of Gible Mountain. Surface-disturbance limitations and a rule of no motorized use should be included for the full ACEC, including this recommended expansion. With this expansion the full ACEC would be bounded by: Routes: 1235-1236-1228-1409-1221-15-8-887-18-17-945-947-951-954-959-962-966-969-1005-1006-1021-1022-1023-1024-1047-1150-1249-8, with 1269, and 1173-1174-1198-1200-1193 cherry-stemmed into the area. The reasons we support this designation are as follows: Roadless areas are an endangered resource in the high-desert west. Categorically, roadless areas especially within NCAs- should be protected as such. By making it a larger area not only does it protect this roadless area but also it better disguises the location of the dinosaur tracks and fossils which we see from page 872, "are regionally significant and easily damaged". Per page 871, "This site also supports one of the best known occurrences (A-ranked) of Grand Junction milkvetch (Astragalus limifolius), a globally vulnerable plant (G3/S3) and a BLM sensitive plant species." o Map 3-13 needs to be updated to show the presence of Grand Junction milkvetch and Colorado Hookless cactus as the text on page 871 indicates both are present in this area. A recent hike in this area shows prolific big game use in the area, we assume it is their refuge from surrounding motorized use. Recent hikes have confirmed the presence of Pondersa Pine atop Gible Mtn. This designation would aid in increasing the number of healthy Pondersa Pines within the NCA, an action which would be in accordance with the Alternative E management objective on page 52. o Map 3-3 needs to be updated to reference the presence of Pondersa Pine in this area. The designation of this expanded ACEC in the

final plan, would address the need for non-motorized trails in this portion of the NCA, an opportunity currently missing from the draft plan. And to reiterate, these protections are needed for the myriad of resources found here, especially because they are to be located within an SRMA focused on motorized use

• The following are comments on two hard copy maps I am sending today through the mail. Map 1 - Road Densities by watershed This map shows varying road densities with the DENCA. The watershed in section 1, circled on the map, has high road densities, 2.6 4 miles per square mile, that need to be reduced to restore the fragmented landscape. This is the Farmer Canyon, Gibbler Gulch area. The watershed found in section 2, circled on the map, has extremely high road densities, up to almost 7 miles per square mile. It is extremely important that the BLM reduce densities in this area, Cactus Park, which are affecting watershed health. The watershed found in section 3, circled on the map, is in the Hunting Ground unit and has moderate route densities, 1/7 2.6 miles per square mile, that likewise need to be reduced, closing duplicate and unnecessary routes, and adding no new routes. The water shed in section 4, circled on the map covers and Sawmill Mesa-Sowbelly Ridge unit of the NCA. It has the lowest route densities per square mile, which should be maintained. Map 2 - Overlapping Sensitive Species Habitat and CNHP Potential Conservation Areas This map shows areas of very high overlap, red, and high overlap, dark yellow. The red areas are located in the Wilderness and at the mouth of Big Dominguez Creek. The largest of the dark yellow areas (high concentrations of sensitive species) is in the Gibbler Gulch area of the Cactus Park unit, an area where my letter recommends multiple route closures to restore and protect the less motorized character of this landscape.

List of photos taken in Cactus Park August 22, 2011 Photo-point explanation 1. Only the last two digits of the numbered photographs are marked on the map except for 0705 and 0707 at the end of the list. 2. Photos 60 77 were taken along Route 8 on the Cactus Park map (found on the DENCA website). Route 8 is shown in purple and starts south of Cactus Park Road, #15. 3. Photos 82 - 95 were taken on Route 1235 branching east off Route 8 south of Gibbler Mt. Route 1235 is found on both the Cactus Park map and Farmers Canyon/Wagon Park map on the DENCA website. 4. On the Farmers Canyon map, Route 1235 joins routes 1236, 1228 and 1409 until it connects with 1221. 5. The route numbers used here are from the web maps and may not correspond with the route numbers on Lee's paper maps. 6. Photo 0707 was taken along Route 26, near the northeast corner of the Gunnison Bluffs Citizen Proposed wilderness List of Photo-points drawn on the Cactus Park and Farmers Canyon/Wagon Park maps (found on the DENCA website): 0660 User-created tracks, soil disturbance on Route 80661 User-created motorcycle tracks, area is remote and difficult to patrol 0662 Braided tracks, cryptogamic soil disturbance, rough road 0665 One of few less jolting sections of road 0672 View of Gibbler Mountain from the west. Gibbler Mountain is a 3000 acre unfragmented habitat area currently undisturbed by any roads or trails. It lends itself to designation as an untrailed, nonmotorized primitive area. 0674 View of Gibbler Mountain from the south 0675 View to the west from the same location on Route 8 0677 Closer view from the south 0682 Route narrows to ATV width here on Route 1235 where it branches off Route 8 south of Gibbler Mountain. 0684 Same 0689 View south from same spot into Gibbler Gulch and Dominguez Canyon on the far horizon. Gibbler Gulch forms another 3000 acre untrailed, unfragmented area which, if ATV route 1235 were closed, could be joined together with Gibbler Mountain, to create a 6000 acre non-motorized primitive area 0695 Same 0699 View of Route 8 0705 More braiding and soil damage on Route 80707 North end of Cactus Park accessed by the gravel quarry road

• [ED: Following are the text (in quotes) and the D-E NCA Recreation Planner's interpretation of what the commenter wrote on the maps they submitted during public scoping for the Dominguez RMP. The Rec Planner also identified the route numbers highlighted on the maps]: Routes 741 and 848 "needs ATV connector. Cultural sites can easily be avoided by the 50 foot policy." Routes 26 and 1017 "needs ATV connector." Route 941 "must remain open." Route 1017 "should be ATV route." There should be an "ATV connect" between routes 1198 and 1263. The following text was highlighted in orange "Highlighted routes are routes used often by WSATVA and other ATVs." in addition to all the routes mentioned previously, the following routes were highlighted in orange: 743, 97, 96, 26, 813, 842, 15, 847, 1393, 1192, 1292. [ED: On a second map, the commenter highlighted additional routes]: The following are "routes used often by WSATVA": 1516, 1571, 1605, 1633, 15, 1641, 1221. "SC-5" connecting routes 1605 and 1633 " and "SC-6" connecting routes 1516 and 1605 "need to become new ATV routes connecting these deadends." [ED: A map of the Gibbler Mountain area had additional text and routes]. "Highlighted routes" which "are often used by WSATVA 3 seasons" are as follows: 1235, 1221, 1409, 1310, 1263, 1198, 15. Route 1235 [is or should be] "an ATV route."

## Route: 141

### Segment: 2781

#### Designation

##### Current Designation

Foot/Horse

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Vehicles under 50" wide

**Alternative C:** Foot/Horse

**Alternative D:** Foot/Horse/Mechanized/Motorcycle

## Public Comments On Route: 141

- No public comments for this Route

## Route: 1411

## Route: 1412

### Segment: 1404

### Designation

#### Current Designation

Closed (Rehab)

#### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

#### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- RIPARIAN Riparian 2 stream crossings
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I moderate
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches <60 acres

### Rationale

#### Designation Criteria

- **Minimize Damage:** Riparian—ephemeral streams SSR 30 m
- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, GUSG –PSD in winter habitat, Sage-Minimize fragmentation

#### Rationale for Decision

- Route was designated to minimize travel routes in and crossing riparian and wetland areas.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range
- Route was designated to minimize fragmentation of Gunnison sage-grouse habitat.
- Route was designated to reduce fragmentation of sagebrush patches

### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 1412

• Gibbler Gulch/Gibbler Mountain The following are route recommendations for Gibbler Gulch and Gibbler Mountain which together make a nice amount of relatively undisturbed open space and habitat. This area is less roaded and fragmented than other parts of Cactus Park NCA unit. It may be less impacted by grazing than other areas and harbors critical big game habitat. Hoping to send you maps next week showing these areas. In particular I recommend keeping recreational use out of all the creek drainages in the upper Gibbler Gulch area, and closing roads on the adjacent mesas. Putting a motorized or mountain bike route over Gibbler Mountain would irreversibly change the natural quality, silence and solitude of this remote landscape. Lands that are currently undeveloped should stay that way as so much land in the NCA is criss-crossed with routes and trails. For example there is potential for retaining the remote "open space" setting of Gibbler Mountain, as specified in the 2007 Colorado BLM Recreation and Visitor Strategy, by closing 1227(!) (especially), 1269, 1309, 2674, 2673, 1249, 1171, 981, 980, 1150, 1154, 977, 979, 1312, 1310, 1334, 1330, 1344, 1286, 1242, 1213, 1238, 1242, 1204, 1213, 1239, 1214, 1212, 1200, 1263, 1204, 1198, 1187, 1210. Limit motorized traffic to roads 15 and 8. Similarly, there is potential for a large unmotorized area extending west from road 15 and Gibbler Gulch on the east, to road 8 on the west. To create an undisturbed nonmotorized area I recommend closing routes 1526, 2666, 1571, 2665, 1608, 1570, 1605, 1561, 1516, 1606, 1561, 1609 1633, 2664, 2663, 1412, 1424, 1456 1434, 1513, 1249, 1269. Many of these are duplicative, serve no purpose, or are dead ends, simply pioneered randomly, and should be closed.

## Route: 1413

### Segment: 1407

#### Designation

##### Current Designation

Vehicles under 50" wide

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk severe winter range
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I moderate
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches >60 acres

#### Rationale

##### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Vehicles under 50" wide

**Alternative C:** Foot/Horse

**Alternative D:** Vehicles under 50" wide

## Segment: 1390

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches >60 acres

#### Rationale

##### Designation Criteria

- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, GUSG – PSD in winter habitat

##### Rationale for Decision

- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range
- Route was designated to minimize fragmentation of Gunnison sage-grouse habitat.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

## Public Comments On Route: 1415

Organization, commenter: Katie Steele

Comment ID: 000000056-3

- The second routes are 1377, 1233 and 1415 in Cactus Park. By closing these routes, it makes accessing the Wilderness a lot more difficult for a larger number of users. I would suggest keeping these routes open to motorized users and adding a parking lot to enable users access the Dominguez Canyon at that point. Otherwise, if you come into the NCA from the north and wish to access the Wilderness, the users will access from the Bridgeport Road and the mouth of Big Dominguez Canyon. This will only increase the usage by hikers, rafters, equestrian users, etc. As the usage increases, I can see numerous user conflicts by compressing the majority of the access through one location.

## Route: 1416

### Segment: 1398

#### Designation

##### Current Designation

Foot/Horse

##### Mitigation Criteria

- Needs Data - Wildlife
- Raptors

##### Planning Criteria

## Public Comments On Route: 1416

Organization, commenter: Janice Shepherd

Comment ID: 00000106-221

- Triangle Mesa route should be left open to horse and foot: 1416, 1406, 1219. I've hiked the loop part and it has some great views down into canyons of the wilderness that are breath-taking in wonder and beauty. I love seeing familiar places (in this case Big Dominguez Canyon) from a different perspective (above) as it brings a fresh view of familiar ground. This route is also listed in the popular book "Grand Junction Trails and Camping Guide" by Nattana Johnson.

Organization, commenter: Quiet Trails Group, Sherry Schenk

Comment ID: 00000115-52

- [Dominguez Canyon Wilderness TMP-Level Comments]Zone 2Triangle Mesa: Quiet Trails Group would like to see the Triangle Mesa trail kept open in the Wilderness as a hiking and horse trail assuming that we can protect the special resources in the area. Routes 1416-1406-1219 should be left open to horse and foot with their connection to 1417 (horse and foot in Alt E).

## Public Comments On Route: 1418

Organization, commenter: Quiet Trails Group, Sherry Schenk

Comment ID: 000000115-51

- [Dominguez Canyon Wilderness TMP-Level Comments:Zone 1]Suggested Route: Quiet Trails Group sees a need for a foot trail over to the waterfall. There is a cairned route on the ground that is not included in the inventory and we believe this should be an officially recognized trail. The waterfall area makes a very pleasant spot to take a break by the sounds of rushing water.

## Route: 1419

### Segment: 1474

#### Designation ?

##### Current Designation

Vehicles under 50" wide

##### Mitigation Criteria

## Public Comments On Route: 1424

• Gibbler Gulch/Gibbler MountainThe following are route recommendations for Gibbler Gulch and Gibbler Mountain which together make a nice amount of relatively undisturbed open space and habitat. This area is less roaded and fragmented than other parts of Cactus Park NCA unit. It may be less impacted by grazing than other areas and harbors critical big game habitat. Hoping to send you maps next week showing these areas. In particular I recommend keeping recreational use out of all the creek drainages in the upper Gibbler Gulch area, and closing roads on the adjacent mesas. Putting a motorized or mountain bike route over Gibbler Mountain would irreversibly change the natural quality, silence and solitude of this remote landscape. Lands that are currently undeveloped should stay that way as so much land in the NCA is criss-crossed with routes and trails.For example there is potential for retaining the remote "open space" setting of Gibbler Mountain, as specified in the 2007 Colorado BLM Recreation and Visitor Strategy, by closing 1227(!) (especially), 1269, 1309, 2674, 2673, 1249, 1171, 981, 980, 1150, 1154, 977, 979, 1312, 1310, 1334, 1330, 1344, 1286, 1242, 1213, 1238, 1242, 1204, 1213, 1239, 1214, 1212, 1200, 1263, 1204, 1198, 1187, 1210. Limit motorized traffic to roads 15 and 8.Similarly, there is potential for a large unmotorized area extending west from road 15 and Gibbler Gulch on the east, to road 8 on the west. To create an undisturbed nonmotorized area I recommend closing routes 1526, 2666, 1571, 2665, 1608, 1570, 1605, 1561, 1516, 1606, 1561, 1609 1633, 2664, 2663, 1412, 1424, 1456 1434, 1513 , 1249, 1269.Many of these are duplicative, serve no purpose, or are dead ends, simply pioneered randomly, and should be closed.

## Public Comments On Route: 1434

Organization, commenter: Quiet Trails Group, Sherry Schenk

Comment ID: 000000115-42

- 1434, 1456 (Gibbler Gulch Area): During scoping QTG recommended that the route going down Gibbler Gulch be designated for hiking and horseback. In the draft's preferred alternative, it shows administrative. If we are correct in our understanding that BLM is actively working to acquire the private property to which it goes, QTG would like to repeat this recommendation but extend it to include mountain biking. Given the presence of riparian ecosystems in the area this route should be limited to non-motorized

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 000000135-35

- Gibbler Gulch/Gibbler MountainThe following are route recommendations for Gibbler Gulch and Gibbler Mountain which together make a nice amount of relatively undisturbed open space and habitat. This area is less roaded and fragmented than other parts of Cactus Park NCA unit. It may be less impacted by grazing than other areas and harbors critical big game habitat. Hoping to send you maps next week showing these areas. In particular I recommend keeping recreational use out of all the creek drainages in the upper Gibbler Gulch area, and closing roads on the adjacent mesas. Putting a motorized or mountain bike route over Gibbler Mountain would irreversibly change the natural quality, silence and solitude of this remote landscape. Lands that are currently undeveloped should stay that way as so much land in the NCA is criss-crossed with routes and trails.For example there is potential for retaining the remote "open space" setting of Gibbler Mountain, as specified in the 2007 Colorado BLM Recreation and Visitor Strategy, by closing 1227(!) (especially), 1269, 1309, 2674, 2673, 1249, 1171, 981, 980, 1150, 1154, 977, 979, 1312, 1310, 1334, 1330, 1344, 1286, 1242, 1213, 1238, 1242, 1204, 1213, 1239, 1214, 1212, 1200, 1263, 1204, 1198, 1187, 1210. Limit motorized traffic to roads 15 and 8.Similarly, there is potential for a large unmotorized area extending west from road 15 and Gibbler Gulch on the east, to road 8 on the west. To create an undisturbed nonmotorized area I recommend closing routes 1526, 2666, 1571, 2665, 1608, 1570, 1605, 1561, 1516, 1606, 1561, 1609, 1633, 2664, 2663, 1412, 1424, 1456 1434, 1513 , 1249, 1269.Many of these are duplicative, serve no purpose, or are dead ends, simply pioneered randomly, and should be closed.

## Route: 1435

### Segment: 1358

### Designation

#### Current Designation

Wilderness

#### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

#### Planning Criteria

- RECREATION Recreation access to dispersed campsite
- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density low in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- **No designation criteria for this route segment.**

### Rationale for Decision

- Non-system route inside the wilderness.

## Public Comments On Route: 1449

Organization, commenter: Janice Shepherd

Comment ID: 000000106-223

- 1465-1462-1449 I support the closing of these trails. At first I thought that the start of 1465 should be left open as the first clearing might make a good parking/camping area. But on a recent visit I could see that the slope of the land leaves the clearing as a sea of mud. Other places had dried out but here the mud was thick and nasty. Not a good spot to park and certainly not a good spot to camp. These routes have seen very little usage and the vegetation is growing in from the sides and up in the middle. Both 1462 and 1449 just kind of peter out and turning around a vehicle would be problematic.

• 1434, 1456 (Gibbler Gulch Area): During scoping QTG commenter recommended that the route going down Gibbler Gulch be designated for hiking and horseback. In the draft's preferred alternative, it shows administrative. If we are correct in our understanding that BLM is actively working to acquire the private property to which it goes, QTG would like to repeat this recommendation but extend it to include mountain biking. Given the presence of riparian ecosystems in the area this route should be limited to non-motorized

• Gibbler Gulch/Gibbler Mountain The following are route recommendations for Gibbler Gulch and Gibbler Mountain which together make a nice amount of relatively undisturbed open space and habitat. This area is less roaded and fragmented than other parts of Cactus Park NCA unit. It may be less impacted by grazing than other areas and harbors critical big game habitat. Hoping to send you maps next week showing these areas. In particular I recommend keeping recreational use out of all the creek drainages in the upper Gibbler Gulch area, and closing roads on the adjacent mesas. Putting a motorized or mountain bike route over Gibbler Mountain would irreversibly change the natural quality, silence and solitude of this remote landscape. Lands that are currently undeveloped should stay that way as so much land in the NCA is criss-crossed with routes and trails. For example there is potential for retaining the remote "open space" setting of Gibbler Mountain, as specified in the 2007 Colorado BLM Recreation and Visitor Strategy, by closing 1227(!) (especially), 1269, 1309, 2674, 2673, 1249, 1171, 981, 980, 1150, 1154, 977, 979, 1312, 1310, 1334, 1330, 1344, 1286, 1242, 1213, 1238, 1242, 1204, 1213, 1239, 1214, 1212, 1200, 1263, 1204, 1198, 1187, 1210. Limit motorized traffic to roads 15 and 8. Similarly, there is potential for a large unmotorized area extending west from road 15 and Gibbler Gulch on the east, to road 8 on the west. To create an undisturbed nonmotorized area I recommend closing routes 1526, 2666, 1571, 2665, 1608, 1570, 1605, 1561, 1516, 1606, 1561, 1609 1633, 2664, 2663, 1412, 1424, 1456 1434, 1513 , 1249, 1269. Many of these are duplicative, serve no purpose, or are dead ends, simply pioneered randomly, and should be closed.

#### Designation

##### Current Designation

Foot/Horse

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- LANDS Right of Way
- SOIL Soils Steep Slopes 40%
- SOIL Soils Fragile
- WILDLIFE Mule deer severe winter range
- WILDLIFE Big game winter concentration areas
- WILDLIFE Big game production areas
- WILDLIFE Big game summer concentration areas
- RIPARIAN Riparian 2 stream crossings
- RIPARIAN Riparian crossing perennial stream
- CULTURAL Cultural Direct impact
- SMA Wild and Scenic River area
- DENSITY Route density low in Alt A
- DENSITY Route density low in Alt E
- SSPLANT Special Status Species Colorado hookless cactus
- SSPLANT Special Status Species sensitive species planes

## Rationale

### Designation Criteria

- Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

• Page 99 Zone 1 in WildernessIn principle I support the position of limiting foot and horse travel to designated routes within Zone 1. However, I think some side trails need to be considered part of the designated route. - There are several cultural (some historic some prehistoric) that are worth getting a look that require a few steps away from the trail. For example the old coral and nearby structures are quite interesting and some of the rock art panels are on large boulders perpendicular to the trail. - The lower and upper waterfalls are nice places to sit and enjoy the sounds of the rushing water. Both spots are surrounded by exposed rock so make good sitting places. As part of a volunteer BLM work crew we cairned specific trails to the upper waterfall, so BLM is well aware of that trail. - Trail 2610 should be kept open to horse and foot and not closed. It should be extended in the inventory as it exists on the ground as a trail leading into Dry Fork canyon (a side canyon off Big D). The advantage of keeping this trail open is that it pulls some people away from the more heavily used Big D Canyon trail and it allows people to continue to enjoy this nice side canyon which is part of Zone 2. By directing some people away from the rest of Big D it works to protect the some of the cultural resources of Zone 1. I see from map 3-13 that special species exist at the bottom of Dry Fork canyon. Zone 1 could be continued an appropriate distance up this trail to ensure people stay on a designated trail. - I'm not quite sure what the BLM's expectations are for people seeking quick relief behind a bush. Will that be considered staying on the designated trail?- Consider the amazing adventure had by this blogger within Zone 1. Shouldn't other people continue to get to at least some of those nice water views? I think they should. <http://blog.bigskyconvection.com/2011/08/2011-april-6th-big-dominguez-creek.html>For years now everyone (or most everyone) has stayed on the East Side of the Creek in Little Dominguez Canyon for the mile of property occupied by Mr. Rambo. Once this restriction is no longer in place, it appears to me that there may be some opportunities for the creation of new side trails from Little Dominguez main trail, up to the mesa top to perhaps join with route 1493. How can people like me explore the viability of such possible new official trails if travel is limited to just 1457, 1486 and 1501 in the first part of Little Dominguez Canyon? I don't want to approach the BLM to build a trail unless I've hiked the area to satisfy myself that the hike is doable. Zone 1 should either end at the boundary where the current sign reads "Private Property Next 1 Mile..." or text should be added to indicate that "BLM, working with volunteers or partners, will examine the possibility of establishing side trails leading from Little Dominguez to the mesa to the west of Little Dominguez when Mr Rambo is not long maintaining his property lease."

- 1459 (off Divide Road, off 1504): Route is shown as being closed. Keep open until an alternate road to a better view point can be developed. 1509 leads to a somewhat better view point but as it hugs a private property line and is wide open to view from nearby property owner's homes, it is best closed

## Public Comments On Route: 1462

Organization, commenter: Janice Shepherd

Comment ID: 00000106-223

- 1465-1462-1449 I support the closing of these trails. At first I thought that the start of 1465 should be left open as the first clearing might make a good parking/camping area. But on a recent visit I could see that the slope of the land leaves the clearing as a sea of mud. Other places had dried out but here the mud was thick and nasty. Not a good spot to park and certainly not a good spot to camp. These routes have seen very little usage and the vegetation is growing in from the sides and up in the middle. Both 1462 and 1449 just kind of peter out and turning around a vehicle would be problematic.

## Public Comments On Route: 1465

Organization, commenter: Janice Shepherd

Comment ID: 00000106-223

- 1465-1462-1449 I support the closing of these trails. At first I thought that the start of 1465 should be left open as the first clearing might make a good parking/camping area. But on a recent visit I could see that the slope of the land leaves the clearing as a sea of mud. Other places had dried out but here the mud was thick and nasty. Not a good spot to park and certainly not a good spot to camp. These routes have seen very little usage and the vegetation is growing in from the sides and up in the middle. Both 1462 and 1449 just kind of peter out and turning around a vehicle would be problematic.

## Route: 1466

### Segment: 1323

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Indirect impact
- DENSITY Route density highest in Alt A
- DENSITY Route density low in Alt E

### Rationale

#### Designation Criteria

- **Minimize Damage:** Cultural – SSR within 100m sites, Fragile soils SSR
- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, GUSG –PSD in winter habitat

#### Rationale for Decision

- Route was designated to minimize impacts to cultural resources.
- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range
- Route was designated to minimize fragmentation of Gunnison sage-grouse habitat.

### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 1466

- No public comments for this Route

## Route: 1468

### Segment: 1321

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

RECREATION Recreation opportunities for access to and across federal lands

- WILDLIFE Elk severe winter range
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Indirect impact
- DENSITY Route density highest in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- **Minimize Damage:** Fragile soils SSR
- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, GUSG –PSD in winter habitat

### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range
- Route was designated to minimize fragmentation of Gunnison sage-grouse habitat.

**Alternative D:** Vehicles under 50" wide

## Public Comments On Route: 1481

- No public comments for this Route

## Route: 1483

### Segment: 1311

#### Designation ?

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Indirect impact
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches <60 acres

#### Rationale

##### Designation Criteria

- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, Sage-Minimize fragmentation, GUSG –PSD in winter habitat

##### Rationale for Decision

- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range
- Route was designated to reduce fragmentation of sagebrush patches

- Route was designated to minimize fragmentation of Gunnison sage-grouse habitat.

## Public Comments On Route: 1485

Organization, commenter: Quiet Trails Group, Sherry Schenk

Comment ID: 000000115-40

- 1485 (off Divide Road): Route is shown being closed about 66 feet short of an excellent view point and large parking/turn-around area. Route should be kept open to include access to that view point and perhaps more importantly to a parking/turn-around area. As mining remnants are visible in the area, an interpretative sign here about historic mining in the area would be worthwhile

## Route: 1486

## Public Comments On Route: 1486

Organization, commenter: Janice Shepherd

Comment ID: 000000106-64

- Page 99 Zone 1 in WildernessIn principle I support the position of limiting foot and horse travel to designated routes within Zone 1. However, I think some side trails need to be considered part of the designated route. - There are several cultural (some historic some prehistoric) that are worth getting a look that require a few steps away from the trail. For example the old coral and nearby structures are quite interesting and some of the rock art panels are on large boulders perpendicular to the trail. - The lower and upper waterfalls are nice places to sit and enjoy the sounds of the rushing water. Both spots are surrounded by exposed rock so make good sitting places. As part of a volunteer BLM work crew we cairned specific trails to the upper waterfall, so BLM is well aware of that trail.- Trail 2610 should be kept open to horse and foot and not closed. It should be extended in the inventory as it exists on the ground as a trail leading into Dry Fork canyon (a side canyon off Big D). The advantage of keeping this trail open is that it pulls some people away from the more heavily used Big D Canyon trail and it allows people to continue to enjoy this nice side canyon which is part of Zone 2. By directing some people away from the rest of Big D it works to protect the some of the cultural resources of Zone 1. I see from map 3-13 that special species exist at the bottom of Dry Fork canyon. Zone 1 could be continued an appropriate distance up this trail to ensure people stay on a designated trail. - I'm not quite sure what the BLM's expectations are for people seeking quick relief behind a bush. Will that be considered staying on the designated trail?- Consider the amazing adventure had by this blogger within Zone 1. Shouldn't other people continue to get to at least some of those nice water views? I think they should. <http://blog.bigskyconvection.com/2011/08/2011-april-6th-big-dominguez-creek.html>For years now everyone (or most everyone) has stayed on the East Side of the Creek in Little Dominguez Canyon for the mile of property occupied by Mr. Rambo. Once this restriction is no longer in place, it appears to me that there may be some opportunities for the creation of new side trails from Little Dominguez main trail, up to the mesa top to perhaps join with route 1493. How can people like me explore the viability of such possible new official trails if travel is limited to just 1457, 1486 and 1501 in the first part of Little Dominguez Canyon? I don't want to approach the BLM to build a trail unless I've hiked the area to satisfy myself that the hike is doable. Zone 1 should either end at the boundary where the current sign reads "Private Property Next 1 Mile..." or text should be added to indicate that "BLM, working with volunteers or partners, will examine the possibility of establishing side trails leading from Little Dominguez to the mesa to the west of

| Little Dominguez when Mr Rambo is not long maintaining his property lease."

## Route: 1497

### Segment: 1271

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk severe winter range
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I high
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- Minimize Damage:** Fragile soils SSR
- Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, GUSG –PSD in winter habitat

##### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range
- Route was designated to minimize fragmentation of Gunnison sage-grouse habitat.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 1497

- No public comments for this Route

## Route: 1498

### Segment: 1265

#### Designation

##### Current Designation

Wilderness

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density low in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- No designation criteria for this route segment.**

##### Rationale for Decision

- Non-system route inside the wilderness.

#### Previous Alternatives Analyzed

**Alternative A:** Foot/Horse

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 1498

- No public comments for this Route

### Route: 15

#### Segment: 1012

##### Designation [?](#)

###### Current Designation

Open (All modes of travel)

###### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

###### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I high
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches >60 acres

##### Rationale

###### Designation Criteria

- **Recreation:** Rec opportunities – general

###### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

### Rationale

#### Designation Criteria

- **Recreation:** Rec opportunities – general

#### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

Alternative A: County

Alternative B: County

Alternative C: County

Alternative D: County

## Segment: 1660

### Designation

#### Current Designation

Open (All modes of travel)

#### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

#### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- LANDS Access to non-federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches >60 acres

### Rationale

#### Designation Criteria

- **Recreation:** Rec opportunities – general

#### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

Alternative A: County

Alternative B: County

Alternative C: County

Alternative D: County

## Segment: 1675

### Designation

#### Current Designation

Open (All modes of travel)

#### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

## Public Comments On Route: 15

Organization, commenter: Janice Shepherd

Comment ID: 00000106-110

o The Gibbler Mountain ACEC as shown on map 2-5E does not encompass the mountain itself but only its northern slopes. I would prefer to see a non-motorized/non-mechanized ACEC for the whole of Gibbler Mountain and its surrounding slopes, bounded by the routes: 1235-1236-1228-1409-1221-15-8-887-18-17-945-547-951-959-966-969-1005-1006-1021-1022-1023-1024-1047-1150-1249, with 1269 left open to motorized use as a motorized cherry-stemmed route into the area. This would keep this wonderful roadless area (though too small a space for the inventory) roadless into the future. The text on page 871 indicates the area has one of the "best known" populations of the rare plant Grand Junction milkvetch as well as a large collection of fragile dinosaur tracks. The Special Species map from the Open House needs to be updated with this GJ milkvetch population. This ACEC representing a hole in the SRMA would properly protect all three features: roadless-ness, dinosaur tracks, and GJ milkvetch, at the cost of less than 5000 acres. This protection is consistent with this being a National Conservation Area and not a National Recreation Area. This position also has support from the D-E NCA Advisory Council. I recently hiked up to the top of the northern portion of Gibbler Mountain with a friend. We were inspired by the challenging terrain for hiking and the awesome views (photo IMG\_9998). We both had a great feeling of accomplishment when we reached the top. There is plenty of evidence of big game animals using the Gibbler Mountain as a quiet sanctuary from the surrounding motorized areas. This proposed ACEC would benefit them.

• Route 2663 leads to a stock pond, but then the bulk of it parallels 15 and should be closed. Given that not all stock ponds in the NCA have roads leading to them, is it really necessary to keep these other stock pond roads open? For example the pond at 12 S 712030 4295897 has no documented road leading to it. Is that stock pond no longer needed?

Comment ID: 00000106-230

• Near the intersection of 1003 and 15 there is a very large pile ash and trash. Pallets must have been burned here as the ash is heavily laden with nails.

Organization, commenter: Janice Shepherd

Comment ID: 00000106-88

• Page 111 Portable Toilets and Fire Pans I believe the text is missing the crucial word "solid" in front of "human waste" for Alternatives B E. I don't think it is reasonable to expect human urine to be hauled out. Also fire pans aren't usually set up for carrying the ash so the text should be adjusted to indicate that not only will fire pans be required but the ash must also be hauled out. The text also needs clarification that fire pans and ash removal should be used for campfires even when not part of an overnight camping experience (i.e. an early evening campfire where the recreationalists are not planning on spending the night). On a recent Gunnison River canoe trip with canoes rented from a commercial operator, we were advised "Urinate in the river (not in calm water nor on wet sand or soil nor on vegetation)." That should be listed here and posted at popular put-ins (Escalante and Bridgeport). Given the rule of the use of fire pans, there should be a management action that all rock fire rings within the listed areas should be removed and those campfire areas rehabilitated as part of other development work in those areas. I guess this applies equally to campfire areas that have no rings (such as the one near the intersection of routes 15 and 1003 where a thick pile from wood pallet fires exists.) With these changes I support Alternative E. I strongly support the text about fire pans and hauling ash away. It is unfortunate but campfire rings seem to be a magnet to all forms of trash. Also there is an unfortunate tendency of some to burn wooden pallets. People doing so might not even see the harm because they consider the pallets to be wood so ok to burn. They are not taking into consideration the nails and other hardware left behind.

Comment ID: 00000115-32

• Gibbler Mountain Area of Critical Environmental Concern: The QTG supports Gibbler Mtn ACEC from Alt D because protections are needed for the myriad of resources found here, especially if it is going to be located within an SRMA focused on motorized use. Further, we think the ACEC should be extended to include all of Gibbler Mountain. Surface-disturbance limitations and a rule of no motorized use should be included for the full ACEC, including this recommended expansion. With this expansion the full ACEC would be bounded by: Routes: 1235-1236-1228-1409-1221-15-8-887-18-17-945-947-951-954-959-962-966-969-1005-1006-1021-1022-1023-1024-1047-1150-1249-8, with 1269, and 1173-1174-1198-1200-1193 cherry-stemmed into the area. The reasons we support this designation are as follows: Roadless areas are an endangered resource in the high-desert west. Categorically, roadless areas especially within NCAs- should be protected as such. By making it a larger area not only does it protect this roadless area but also it better disguises the location of the dinosaur tracks and fossils which we see from page 872," are regionally significant and easily damaged". Per page 871, "This site also supports one of the best known occurrences (A-ranked) of Grand Junction milkvetch (Astragalus linifolius), a globally vulnerable plant (G3/S3) and a BLM sensitive plant species." o Map 3-13 needs to be updated to show the presence of Grand Junction milkvetch and Colorado Hookless cactus as the text on page 871 indicates both are present in this area. A recent hike in this area shows prolific big game use in the area, we assume it is their refuge from surrounding motorized use. Recent hikes have confirmed the presence of Pondersa Pine atop Gibbler Mtn. This designation would aid in increasing the number of healthy Pondersa Pines within the NCA, an action which would be in accordance with the Alternative E management objective on page 52. o Map 3-3 needs to be updated to reference the presence of Pondersa Pine in this area. The designation of this expanded ACEC in the final plan, would address the need for non-motorized trails in this portion of the NCA, an opportunity currently missing from the draft plan. And to reiterate, these protections are needed for the myriad of resources found here, especially because they are to be located within an SRMA focused on motorized use

Comment ID: 00000115-39

• Cactus Park 15 (access from Hwy 141): We recommend that the BLM and the county work together to improve the access from Hwy 141 so that passenger cars can get as far as the staging area. Most of this road is quite useable and it is only the first 250 feet that are problematic. Near the staging area is the Gunnison Gravel interpretive area. Accessing this interesting interpretive area should not be limited to those driving high-clearance vehicles. We also envision quiet trail users driving as far as the intersection with Route 26 and accessing the Ninemile Hill ERMA via Route 26

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 00000135-35

• Gibbler Gulch/Gibbler Mountain The following are route recommendations for Gibbler Gulch and Gibbler Mountain which together make a nice amount of relatively undisturbed open space and habitat. This area is less roaded and fragmented than other parts of Cactus Park NCA unit. It may be less impacted by grazing than other areas and harbors critical big game habitat. Hoping to send you maps next week showing these areas. In particular I recommend keeping recreational use out of all the creek drainages in the upper Gibbler Gulch area, and closing roads on the adjacent mesas. Putting a motorized or mountain bike route over Gibbler Mountain would irreversibly change the natural quality, silence and solitude of this remote landscape. Lands that are currently undeveloped should stay that way as so much land in the NCA is criss-crossed with routes and trails. For example there is potential for retaining the remote "open space" setting of Gibbler Mountain, as specified in the 2007 Colorado BLM Recreation and Visitor Strategy, by closing 1227(!) (especially), 1269, 1309, 2674, 2673, 1249, 1171, 981, 980, 1150, 1154, 977, 979, 1312, 1310, 1334, 1330, 1344, 1286, 1242, 1213, 1238, 1242, 1204, 1213, 1239, 1214, 1212, 1200, 1263, 1204, 1198, 1187, 1210. Limit motorized traffic to roads 15 and 8. Similarly, there is potential for a large unmotorized area extending west from road 15 and Gibbler Gulch on the east, to road 8 on the west. To create an undisturbed nonmotorized area I recommend closing routes 1526, 2666, 1571, 2665, 1608, 1570, 1605, 1561, 1516, 1606, 1561, 1609 1633, 2664, 2663, 1412, 1424, 1456 1434, 1513 , 1249, 1269. Many of these are duplicative, serve no purpose, or are dead ends, simply pioneered randomly, and should be closed.

Comment ID: 00000135-38

• The following are comments on two hard copy maps I am sending today through the mail. Map 1 - Road Densities by watershed This map shows varying road densities with the DENCA. The watershed in section 1, circled on the map, has high road densities, 2.6 4 miles per square mile, that need to be reduced to restore the fragmented landscape. This is the Farmer Canyon, Gibbler Gulch area. The watershed found in section 2, circled on the map, has extremely high route densities, up to almost 7 miles per square mile. It is extremely important that the BLM reduce densities in this area, Cactus Park, which are affecting watershed health. The watershed found in section 3, circled on the map, is in the Hunting Ground unit and has moderate route densities, 1/7 2.6 miles per square mile, that likewise need to be reduced, closing duplicate and unnecessary routes, and adding no new routes. The water shed in section 4, circled on the map covers and Sawmill Mesa-Sowbely Ridge unit of the NCA. It has the lowest route densities per square mile, which should be maintained. Map 2 - Overlapping Sensitive Species Habitat and CNHP Potential Conservation Areas This map shows areas of very high overlap, red, and high overlap, dark yellow. The red areas are located in the Wilderness and at the mouth of Big Dominguez Creek. The largest of the dark yellow areas (high concentrations of sensitive species) is in the Gibbler Gulch area of the Cactus Park unit, an area where my letter recommends multiple route closures to restore and protect the less motorized character of this landscape.

List of photos taken in Cactus Park August 22, 2011 Photo-point explanation. Only the last two digits of the numbered photographs are marked on the map except for 0705 and 0707 at the end of the list. 2. Photos 60 77 were taken along Route 8 on the Cactus Park map (found on the DENCA website). Route 8 is shown in purple and starts south of Cactus Park Road, #15. 3. Photos 82 - 95 were taken on Route 1235 branching east off Route 8 south of Gibbler Mt. Route 1235 is found on both the Cactus Park map and Farmers Canyon/Wagon Park map on the DENCA website. 4. On the Farmers Canyon map, Route 1235 joins routes 1236, 1228 and 1409 until it connects with 1221. 5. The route numbers used here are from the web maps and may not correspond with the route numbers on Lee's paper maps. 6. Photo 0707 was taken along Route 26, near the northeast corner of the Gunnison Bluffs Citizen Proposed wilderness List of Photo-points drawn on the Cactus Park and Farmers Canyon/Wagon Park maps (found on the DENCA website): 0660 User-created tracks, soil disturbance on Route 80661 User-created motorcycle tracks, area is remote and difficult to patrol 0662 Braided tracks, cryptogamic soil disturbance, rough road 0665 One of few less jolting sections of road 0672 View of Gibbler Mountain from the west. Gibbler Mountain is a 3000 acre unfragmented habitat area currently undisturbed by any roads or trails. It lends itself to designation as an untrailed, nonmotorized primitive area. 0674 View of Gibbler Mountain from the south 0675 View to the west from the same location on Route 8 0677 Closer view from the south 0682 Route narrows to ATV width here on Route 1235 where it branches off Route 8 south of Gibbler Mountain. 0684 Same 0689 View south from same spot into Gibbler Gulch and Dominguez Canyon on the far horizon. Gibbler Gulch forms another 3000 acre untrailed, unfragmented area which, if ATV route 1235 were closed, could be joined together with Gibbler Mountain, to create a 6000 acre non-motorized primitive area 0695 Same 0699 View of Route 8 0705 More braiding and soil damage on Route 80707 North end of Cactus Park accessed by the gravel quarry road

• 1. We have identified known potential issues and criteria to guide the planning process based on lands and resources in the planning area. Please provide comments on these issues and criteria, and/or identify other issues or criteria that you think should be considered (If your comment pertains to a specific issue or criteria, please use the reference code, e.g. "PCI") 2. What areas within the Dominguez-Escalante National Conservation Area or Dominguez Canyon Wilderness do you value? Why? Area 1 Great views birdwatching, wildlife potogrpghing & some hicking Area 2 Viewing from bluffs from above Area 3 I use this area a good many times a year Area 4 I can't get to this area to use. Area 5 I use any road or ATV trail thats OPEN 3. Please provide any additional comments that you have regarding this project. Comments on attach sheet. Maps with GPS routes in red. Things that I want to comment on concerning Dominguez-Escalante NCA. 1. Cactus Park area is used by the motorized community, Mountain bikers, Hikers, and Etc. There are a lot of roads, jeep & ATV trails that need to be open for everyone to use. The area has been used for cattle grazing, Christmas tree cutting, fire wood, and many other uses. As the population grows in this area there needs to be public land open for their use. 2. As

the motorized roads, double track and single track trails are closed; much less area is left for folks to use. Any Wilderness and Wilderness Study Area restricts firefighting, timber cutting (to help control pine and piñon beetle and controlling ground cover which will stop the massive fuel for fires) and weed control. Colorado is having large fires now because of these large amounts of fuel. 3. The attached maps have GPS routes shown in red that I have GPS'ed at different times. Please note that I have used these routes at different times. All these routes are jeep accessible; many are used by 2 wheel drive pickups. I almost never see hikers when I'm out using these routes on my ATV or Pickup. [ED: The D-E NCA's Recreation Planner identified the route numbers for routes highlighted on the map mentioned in this comment: 621, 624, 676, 649, 641, 743, 676, 741, 97, 96, 744, 733, 15, 838, 18, 945, 26, 847, 848, 941, 1192, 1292, 1377]

- [ED: Following are the text (in quotes) and the D-E NCA Recreation Planner's interpretation of what the commenter wrote on the maps they submitted during public scoping for the Dominguez RMP. The Rec Planner also identified the route numbers highlighted on the maps]: Routes 741 and 848 "needs ATV connector. Cultural sites can easily be avoided by the 50 foot policy." Routes 26 and 1017 "needs ATV connector." Route 941 "must remain open." Route 1017 "should be ATV route." There should be an "ATV connect" between routes 1198 and 1263. The following text was highlighted in orange "Highlighted routes are routes used often by WSATVA and other ATVs." in addition to all the routes mentioned previously, the following routes were highlighted in orange: 743, 97, 96, 26, 813, 842, 15, 847, 1393, 1192, 1292. [ED: On a second map, the commenter highlighted additional routes]: The following are "routes used often by WSATVA": 1516, 1571, 1605, 1633, 15, 1641, 1221. "SC-5" connecting routes 1605 and 1633 " and "SC-6" connecting routes 1516 and 1605 "need to become new ATV routes connecting these deadends." [ED: A map of the Gibbler Mountain area had additional text and routes]. "Highlighted routes" which "are often used by WSATVA 3 seasons" are as follows: 1235, 1221, 1409, 1310, 1263, 1198, 15. Route 1235 [is or should be] "an ATV route."

## Route: 150

### Segment: 2789

#### Designation [?](#)

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- Needs Data - Cultural
- Work with Land Owner on Public Access

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- RIPARIAN Riparian crossing perennial stream
- CULTURAL Cultural indirect impact
- SMAs Wild and Scenic River area
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Minimize Damage:** Cactus – reduce density within 200m, Riparian - perennial streams SSR 100 m
- **Minimize Harassment:** PPSV- Minimize fragmentation
- **Recreation:** Rec opportunities – general

##### Rationale for Decision

- Route was designated to reduce the density of routes within 200 meters of known Colorado hookless Cactus occurrences.
- Route was designated to minimize travel routes in and crossing riparian and wetland areas.
- Route was designated to reduce fragmentation in Priority Vegetation types

#### Previous Alternatives Analyzed

## Public Comments On Route: 1501

Organization, commenter: Janice Shepherd

Comment ID: 00000106-64

• Page 99 Zone 1 in WildernessIn principle I support the position of limiting foot and horse travel to designated routes within Zone 1. However, I think some side trails need to be considered part of the designated route. - There are several cultural (some historic some prehistoric) that are worth getting a look that require a few steps away from the trail. For example the old coral and nearby structures are quite interesting and some of the rock art panels are on large boulders perpendicular to the trail. - The lower and upper waterfalls are nice places to sit and enjoy the sounds of the rushing water. Both spots are surrounded by exposed rock so make good sitting places. As part of a volunteer BLM work crew we cairmed specific trails to the upper waterfall, so BLM is well aware of that trail.- Trail 2610 should be kept open to horse and foot and not closed. It should be extended in the inventory as it exists on the ground as a trail leading into Dry Fork canyon (a side canyon off Big D). The advantage of keeping this trail open is that it pulls some people away from the more heavily used Big D Canyon trail and it allows people to continue to enjoy this nice side canyon which is part of Zone 2. By directing some people away from the rest of Big D it works to protect the some of the cultural resources of Zone 1. I see from map 3-13 that special species exist at the bottom of Dry Fork canyon. Zone 1 could be continued an appropriate distance up this trail to ensure people stay on a designated trail. - I'm not quite sure what the BLM's expectations are for people seeking quick relief behind a bush. Will that be considered staying on the designated trail?- Consider the amazing adventure had by this blogger within Zone 1. Shouldn't other people continue to get to at least some of those nice water views? I think they should. <http://blog.bigskyconvection.com/2011/08/2011-april-6th-big-dominguez-creek.html>For years now everyone (or most everyone) has stayed on the East Side of the Creek in Little Dominguez Canyon for the mile of property occupied by Mr. Rambo. Once this restriction is no longer in place, it appears to me that there may be some opportunities for the creation of new side trails from Little Dominguez main trail, up to the mesa top to perhaps join with route 1493. How can people like me explore the viability of such possible new official trails if travel is limited to just 1457, 1486 and 1501 in the first part of Little Dominguez Canyon? I don't want to approach the BLM to build a trail unless I've hiked the area to satisfy myself that the hike is doable. Zone 1 should either end at the boundary where the current sign reads "Private Property Next 1 Mile..." or text should be added to indicate that "BLM, working with volunteers or partners, will examine the possibility of establishing side trails leading from Little Dominguez to the mesa to the west of Little Dominguez when Mr Rambo is not long maintaining his property lease."

## Public Comments On Route: 1502

Organization, commenter: Janice Shepherd

Comment ID: 000000106-219

- Route 2651 not only goes past the stock pond but it has a section that is parallel to 1502. This route should lead only to the stock pond and not past it and it should not have a section parallel to 1502. One or the other should be closed for that parallel portion.

Organization, commenter: Quiet Trails Group, Sherry Schenk

Comment ID: 000000115-41

• 1459 (off Divide Road, off 1504): Route is shown as being closed. Keep open until an alternate road to a better view point can be developed. 1509 leads to a somewhat better view point but as it hugs a private property line and is wide open to view from nearby property owner's homes, it is best closed

## Route: 1505

### Segment: 1285

## Designation

### Current Designation

Closed (Rehab)

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

## Rationale

### Designation Criteria

- **Minimize Damage:** Fragile soils SSR
- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, Sage-Minimize fragmentation, GUSG –PSD in winter habitat

### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range
- Route was designated to reduce fragmentation of sagebrush patches
- Route was designated to minimize fragmentation of Gunnison sage-grouse habitat.

## Route: 1508

### Segment: 1246

## Designation

### Current Designation

Closed (Rehab)

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

## Rationale

### Designation Criteria

- Minimize Damage:** Fragile soils SSR
- Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, Sage-Minimize fragmentation, GUSG –PSD in winter habitat

### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range
- Route was designated to reduce fragmentation of sagebrush patches
- Route was designated to minimize fragmentation of Gunnison sage-grouse habitat.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 1508

The following high value recreational routes/roads are legal RS 2477ROW's in the State of Colorado, Delta County, and the BLM does not have the jurisdiction to close them: 3011, 2184, 2191, 3100, 2187, 2026, 2059, 2188, 2192, 3104, 2130, 3009, 2199, 2200, 2111, 2223, 2024, 3006, 2231, 3094, 2579, 2210, 2344, 2243, 2249, 2248, 3074, 2354, 2384, 2296, 2295, 2287, 2304, 2062, 2163, 3163, 2164, 2430, 4006, 3016, 2351, 3140, 2410, 4008, 2324, 2073, 2306, 2459, 3192, 3193, 2350, 2443, 2035, 2336, 2495, 2491, 2159, 3058, 2277, 2465, 2467, 3189, 2472, 2297, 2006, 2265, 2271, 2276, 2135, 2139, 3053, 2489, 3033, 3057, 2031, 2276, 2210, 2579, 2136, 2344, 3164, 2400, 2379, 3014, 2365, 3116, 2251, 2259, 2149, 2153, 2146, 2144, 2145, 2356, 2257, 2048, 2358, 3165, and 3166.

## Route: 1509

### Segment: 1337

## Designation

### Current Designation

Closed (Rehab)

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation access to dispersed campsite
- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

## Rationale

## Designation Criteria

- **Minimize Damage:** Fragile soils SSR
- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, Sage-Minimize fragmentation, GUSG –PSD in winter habitat

## Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range
- Route was designated to reduce fragmentation of sagebrush patches
- Route was designated to minimize fragmentation of Gunnison sage-grouse habitat.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

• 1459 (off Divide Road, off 1504): Route is shown as being closed. Keep open until an alternate road to a better view point can be developed. 1509 leads to a somewhat better view point but as it hugs a private property line and is wide open to view from nearby property owner's homes, it is best closed

## Route: 1513

### Segment: 1231

#### Designation ?

##### Current Designation

Vehicles under 50" wide

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation access to dispersed campsite
- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- Recreation:** RMA objectives, Rec opportunities - specific
- Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Vehicles under 50" wide

• Additionally, we offered the recommendation that in the future this mountain bike, horse, foot route be extended to connect in with one of the ATV trails located to the south, either 1513 or 1516 might be reachable

• Gibbler Gulch/Gibbler MountainThe following are route recommendations for Gibbler Gulch and Gibbler Mountain which together make a nice amount of relatively undisturbed open space and habitat. This area is less roaded and fragmented than other parts of Cactus Park NCA unit. It may be less impacted by grazing than other areas and harbors critical big game habitat. Hoping to send you maps next week showing these areas. In particular I recommend keeping recreational use out of all the creek drainages in the upper Gibbler Gulch area, and closing roads on the adjacent mesas. Putting a motorized or mountain bike route over Gibbler Mountain would irreversibly change the natural quality, silence and solitude of this remote landscape. Lands that are currently undeveloped should stay that way as so much land in the NCA is criss-crossed with routes and trails. For example there is potential for retaining the remote "open space" setting of Gibbler Mountain, as specified in the 2007 Colorado BLM Recreation and Visitor Strategy, by closing 1227(!) (especially), 1269, 1309, 2674, 2673, 1249, 1171, 981, 980, 1150, 1154, 977, 979, 1312, 1310, 1334, 1330, 1344, 1286, 1242, 1213, 1238, 1242, 1204, 1213, 1239, 1214, 1212, 1200, 1263, 1204, 1198, 1187, 1210. Limit motorized traffic to roads 15 and 8. Similarly, there is potential for a large unmotorized area extending west from road 15 and Gibbler Gulch on the east, to road 8 on the west. To create an undisturbed nonmotorized area I recommend closing routes 1526, 2666, 1571, 2665, 1608, 1570, 1605, 1561, 1516, 1606, 1561, 1609, 1633, 2664, 2663, 1412, 1424, 1456, 1434, 1513, 1249, 1269. Many of these are duplicative, serve no purpose, or are dead ends, simply pioneered randomly, and should be closed.

## Route: 1514

### Segment: 1239

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Elk severe winter range
- CULTURAL Cultural none
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches >60 acres

#### Rationale

##### Designation Criteria

- **Minimize Damage:** Fragile soils SSR
- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, Sage-Minimize fragmentation, GUSG –PSD in winter habitat

##### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range
- Route was designated to reduce fragmentation of sagebrush patches
- Route was designated to minimize fragmentation of Gunnison sage-grouse habitat.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 1514

- No public comments for this Route

## Route: 1515

### Segment: 1226

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches >60 acres

#### Rationale

##### Designation Criteria

- **Minimize Damage:** Fragile soils SSR
- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, Sage-Minimize fragmentation, GUSG –PSD in winter habitat

##### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range
- Route was designated to reduce fragmentation of sagebrush patches

## Public Comments On Route: 1515

- No public comments for this Route

## Route: 1516

### Segment: 1272

#### Designation [?](#)

##### Current Designation

Vehicles under 50" wide

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk severe winter range
- RIPARIAN Riparian 3 stream crossings
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I moderate
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Admin/Permitted Use Only

**Alternative C:** Open, seek re-route or mitigation

**Alternative D:** Admin/Permitted Use Only

• Additionally, we offered the recommendation that in the future this mountain bike, horse, foot route be extended to connect in with one of the ATV trails located to the south, either 1513 or 1516 might be reachable

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 000000135-35

• Gibbler Gulch/Gibbler Mountain The following are route recommendations for Gibbler Gulch and Gibbler Mountain which together make a nice amount of relatively undisturbed open space and habitat. This area is less roaded and fragmented than other parts of Cactus Park NCA unit. It may be less impacted by grazing than other areas and harbors critical big game habitat. Hoping to send you maps next week showing these areas. In particular I recommend keeping recreational use out of all the creek drainages in the upper Gibbler Gulch area, and closing roads on the adjacent mesas. Putting a motorized or mountain bike route over Gibbler Mountain would irreversibly change the natural quality, silence and solitude of this remote landscape. Lands that are currently undeveloped should stay that way as so much land in the NCA is criss-crossed with routes and trails. For example there is potential for retaining the remote "open space" setting of Gibbler Mountain, as specified in the 2007 Colorado BLM Recreation and Visitor Strategy, by closing 1227(!) (especially), 1269, 1309, 2674, 2673, 1249, 1171, 981, 980, 1150, 1154, 977, 979, 1312, 1310, 1334, 1330, 1344, 1286, 1242, 1213, 1238, 1242, 1204, 1213, 1239, 1214, 1212, 1200, 1263, 1204, 1198, 1187, 1210. Limit motorized traffic to roads 15 and 8. Similarly, there is potential for a large unmotorized area extending west from road 15 and Gibbler Gulch on the east, to road 8 on the west. To create an undisturbed nonmotorized area I recommend closing routes 1526, 2666, 1571, 2665, 1608, 1570, 1605, 1561, 1516, 1606, 1561, 1609 1633, 2664, 2663, 1412, 1424, 1456 1434, 1513, 1249, 1269. Many of these are duplicative, serve no purpose, or are dead ends, simply pioneered randomly, and should be closed.

• [ED: Following are the text (in quotes) and the D-E NCA Recreation Planner's interpretation of what the commenter wrote on the maps they submitted during public scoping for the Dominguez RMP. The Rec Planner also identified the route numbers highlighted on the maps]: Routes 741 and 848 "needs ATV connector. Cultural sites can easily be avoided by the 50 foot policy." Routes 26 and 1017 "needs ATV connector." Route 941 "must remain open." Route 1017 "should be ATV route." There should be an "ATV connect" between routes 1198 and 1263. The following text was highlighted in orange "Highlighted routes are routes used often by WSATVA and other ATVs." in addition to all the routes mentioned previously, the following routes were highlighted in orange: 743, 97, 96, 26, 813, 842, 15, 847, 1393, 1192, 1292. [ED: On a second map, the commenter highlighted additional routes]: The following are "routes used often by WSATVA": 1516, 1571, 1605, 1633, 15, 1641, 1221. "SC-5" connecting routes 1605 and 1633 " and "SC-6" connecting routes 1516 and 1605 "need to become new ATV routes connecting these deadends." [ED: A map of the Gibbler Mountain area had additional text and routes]. "Highlighted routes" which "are often used by WSATVA 3 seasons" are as follows: 1235, 1221, 1409, 1310, 1263, 1198, 15. Route 1235 [is or should be] "an ATV route."

Comment ID: 00000168-2

• Hunting Grounds In the Hunting Grounds area, a longer distance trail similar to Kokopelli's, Tabeguache, and Paradox Trails, would be of interest to this user group [COPMOBA]. Starting at the Old Spanish Trail in Orchard Mesa and ending in Delta, this trail idea is currently feasible when using a mix of single track, ATV width trail, jeep road and even Highway 50 for a few short sections. With very little trail construction making some connections to existing trails, nearly all of this highway use can be avoided. The major attraction of this area is the views from the rim above the Gunnison River in both directions. The existing trail and any trail construction should be routed to take advantage of this valuable view resource. The following recommendations are in the spirit of developing this long distance trail. Starting from the Kannah Creek area we recommend leaving 152 open to mountain bike use for a possible future connection to the lower Kannah Creek road. Possibilities included deeded access across private land, or new construction from the existing small portion of BLM land which the road accesses. Continuing, use existing full size and ATV trail to the end of 440, or a portion of 431, to access small drainage and then construct new trail to access Bridgeport Road. Then use 438, 449 and 2163 to access 2426 and 2427 to Dominguez Road (or 3098 and 3163 and then a very short new connector to 3133 out to highway) From Dominguez Road use 4000 to 3043, then single track 4001, 4005, 4006, 4007 and 3148 to reach Escalante Road. Very nice views exist in this area from the trail. The trail would then cross Escalante road to 2073 with a connection being built to 2053. This short deviation from the Escalante road would provide a safer route for mountain bikes than the twisty road with blind corners and high speed full size vehicles. The trail would cross the river on main bridge and immediately turn left and follow 2313, 2461 and 2462 with a connection to Delta via 2352, 470 2476 and 2489. This area using borders of the northern most point of the Escalante Rim, south to the Rim Road then using 2354 as the border on the west, the main county road on the east and then back down to the rim above river on the north would provide an excellent mountain bike emphasis area for the Delta community. Visitors and local users could ride from town or drive a very short distance. Quiet Use trails are rare in this area and this topography would allow for a rewarding experience for hiker, horse and mountain bike users. This scenario would provide an area similar to the Lunch Loops and Mack Ridge areas. With a long distance rail anchoring a Quiet Use stack loop system of trails which are extremely popular and very beneficial to users and the community at trail at large

• Hunting Grounds Recreation Management Area Page 117: The preferred alternative identifies a "mixed-use connective trail between Whitewater and Delta." Mesa County is in the process of adopting the Grand Valley Trails Master Plan (GVTMP), which includes the Whitewater area. The draft GVTMP includes the following note: "Future trail connections to Delta County and the Dominguez-Escalante NCA are considered part of future trails expansion plans that are not reflected in the GVTMP maps. These trails would generally follow the Gunnison River." The note is intended to support the mixed-use connective trail identified in the RMP. The GVTMP also emphasizes partnerships for the creation of trails. Mesa County would like to work with the BLM to identify the route of the proposed multi-use connective trail. The Hunting Grounds area is widely used by local residents, especially in the winter when other areas are not open. It is important to maintain and improve public access to the Hunting Grounds. Access is proposed to be limited to Bean Ranch Road. Additionally, the Travel Management map shows several gaps between routes running along the east side of the Gunnison River. Mesa County would like to work with the BLM to identify possible access points, trail connections and trail heads that might be built, both inside and outside the NCA, which would provide public access from County roads to the Hunting Grounds as well as close gaps in the route system. Specific areas of interest are the Simioe Road area (Route 152) and around Bridgeport Road (Route 431)

• Gibbler Gulch/Gibbler Mountain The following are route recommendations for Gibbler Gulch and Gibbler Mountain which together make a nice amount of relatively undisturbed open space and habitat. This area is less roaded and fragmented than other parts of Cactus Park NCA unit. It may be less impacted by grazing than other areas and harbors critical big game habitat. Hoping to send you maps next week showing these areas. In particular I recommend keeping recreational use out of all the creek drainages in the upper Gibbler Gulch area, and closing roads on the adjacent mesas. Putting a motorized or mountain bike route over Gibbler Mountain would irreversibly change the natural quality, silence and solitude of this remote landscape. Lands that are currently undeveloped should stay that way as so much land in the NCA is criss-crossed with routes and trails. For example there is potential for retaining the remote "open space" setting of Gibbler Mountain, as specified in the 2007 Colorado BLM Recreation and Visitor Strategy, by closing 1227(!) (especially), 1269, 1309, 2674, 2673, 1249, 1171, 981, 980, 1150, 1154, 977, 979, 1312, 1310, 1334, 1330, 1344, 1286, 1242, 1213, 1238, 1242, 1204, 1213, 1239, 1214, 1212, 1200, 1263, 1204, 1198, 1187, 1210. Limit motorized traffic to roads 15 and 8. Similarly, there is potential for a large unmotorized area extending west from road 15 and Gibbler Gulch on the east, to road 8 on the west. To create an undisturbed nonmotorized area I recommend closing routes 1526, 2666, 1571, 2665, 1608, 1570, 1605, 1561, 1516, 1606, 1561, 1609, 1633, 2664, 2663, 1412, 1424, 1456, 1434, 1513, 1249, 1269. Many of these are duplicative, serve no purpose, or are dead ends, simply pioneered randomly, and should be closed.

• The following high value recreational routes/roads are legal RS 2477 ROW's in the State of Colorado, Mesa County and the BLM does not have the jurisdiction to close them: 500, 472, 518, 521, 530, 39, 127, 572, 566, 66, 65, 148, 71, 74, 587, 595, 608, 622, 628, 635, 624, 609, 611, 706, 678, 700, 719, 726, 696, 26, 936, 847, 849, 919, 767, 824, 96, 822, 817, 950, 1021, 900, 2682, 1020, 1003, 1084, 1142, 1184, 1156, 1198, 1349, 1308, 1310, 1238, 1263, 1122, 1170, 1192, 974, 941, 1076, 1039, 1018, 1759, 1764, 1758, 1174, 1788, 1798, 1669, 1699, 1773, 1755, 1779, 1750, 1751, 1792, 1720, 1726, 1727, 1720, 1722, 1803, 1805, 1809, 1614, 1609, 1605, 1608, 1571, 1526, 1516, 1448, 755, 807, 900, 10, 48, 924, 950, 1005, 965, 8, 1115, 981, 984, 1135, 2678, 1249, 1171, 1150, 1249, 1320, 1235, 1236, 1228, 1227, 1409, 1456, 1349, 1308, 1513, 1221, 1550, 1567, 1641, 1612, 1740, 1688, 2597, 2598, 2601, 2440, 3160, 3162, 2089, 2166, 2170, 2596, 2171, 2003, 2122, 2126, 2189, 3145, 2182, 2179, 2178, 3143, 2181, 2121, 2122, 2168, 2126, 2180, 2095, 2173, 2174, 2620, 2129, 1686, 1692, 1667, 1647, 1631, 1613, 1596, 1549, 1541, 2647, 1633, 1605, 1608, 1571, 2645, 1507, 1448, 1496, 1516, 1504, 1510, 1508, 1509, 439, 431, 456, 461, 460, 391, 423, 415, 419, 407, 402, 367, 372, 339, 298, 338, 105, 368, 374, 393, 389, 390, 376, 377, 351, 350, 121, 345, 320, 301, 251, 234, 232, 205, 344, 107, 103, 152, 153, 161, 168, 3199, 188, 196, 255, 254, 236, 294, 242, 219, 201, 169, 162, 158, 160, 173. ## Route: 1529

### Segment: 1211

#### Designation [?](#)

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation access to dispersed campsite
- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Indirect impact
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Minimize Damage:** Fragile soils SSR
- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, GUSG –PSD in winter habitat, Sage-Minimize fragmentation

##### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range
- Route was designated to minimize fragmentation of Gunnison sage-grouse habitat.
- Route was designated to reduce fragmentation of sagebrush patches

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 1529

- No public comments for this Route

## Route: 153

### Segment: 2739

#### Designation [?](#)

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- RIPARIAN Riparian 1 stream crossing
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I low
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Minimize Damage:** NHT – close routes for setting, Riparian—ephemeral streams SSR 30 m
- **Minimize Harassment:** PPSV- Minimize fragmentation

### Rationale for Decision

- Route was designated to improve natural setting along the Old Spanish National Historic Trail.
- Route was designated to minimize travel routes in and crossing riparian and wetland areas.
- Route was designated to reduce fragmentation in Priority Vegetation types

### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

• The following high value recreational routes/roads are legal RS 2477 ROW's in the State of Colorado, Mesa County and the BLM does not have the jurisdiction to close them: 500, 472, 518, 521, 530, 39, 127, 572, 566, 66, 65, 148, 71, 74, 587, 595, 608, 622, 628, 635, 624, 609, 611, 706, 678, 700, 719, 726, 696, 26, 936, 847, 849, 919, 767, 824, 96, 822, 817, 950, 1021, 900, 2682, 1020, 1003, 1084, 1142, 1184, 1156, 1198, 1349, 1308, 1310, 1238, 1263, 1122, 1170, 1192, 974, 941, 1076, 1039, 1018, 1759, 1764, 1758, 1174, 1788, 1798, 1669, 1699, 1773, 1755, 1779, 1750, 1751, 1792, 1720, 1726, 1727, 1720, 1722, 1803, 1805, 1809, 1614, 1609, 1605, 1608, 1571, 1526, 1516, 1448, 755, 807, 900, 10, 48, 924, 950, 1005, 965, 8, 1115, 981, 984, 1135, 2678, 1249, 1171, 1150, 1249, 1320, 1235, 1236, 1228, 1227, 1409, 1456, 1349, 1308, 1513, 1221, 1550, 1567, 1641, 1612, 1740, 1688, 2597, 2598, 2601, 2440, 3160, 3162, 2089, 2166, 2170, 2596, 2171, 2003, 2122, 2126, 2189, 3145, 2182, 2179, 2178, 3143, 2181, 2121, 2122, 2168, 2126, 2180, 2095, 2173, 2174, 2620, 2129, 1686, 1692, 1667, 1647, 1631, 1613, 1596, 1549, 1541, 2647, 1633, 1605, 1608, 1571, 2645, 1507, 1448, 1496, 1516, 1504, 1510, 1508, 1509, 439, 431, 456, 461, 460, 391, 423, 415, 419, 407, 402, 367, 372, 339, 298, 338, 105, 368, 374, 393, 389, 390, 376, 377, 351, 350, 121, 345, 320, 301, 251, 234, 232, 205, 344, 107, 103, 152, 153, 161, 168, 3199, 188, 196, 255, 254, 236, 294, 242, 219, 201, 169, 162, 158, 160, 173. The following high value recreational routes/roads are legal RS 2477ROW's in the State of Colorado, Delta County, and the BLM does not have the jurisdiction to close them: 3011, 2184, 2191, 3100, 2187, 2026, 2059, 2188, 2192, 3104, 2130, 3009, 2199, 2200, 2111, 2223, 2024, 3006, 2231, 3094, 2579, 2210, 2344, 2243, 2249, 2248, 3074, 2354, 2384, 2296, 2295, 2287, 2304, 2062, 2163, 3163, 2164, 2430, 4006, 3016, 2351, 3140, 2410, 4008, 2324, 2073, 2306, 2459, 3192, 3193, 2350, 2443, 2035, 2336, 2495, 2491, 2159, 3058, 2277, 2465, 2467, 3189, 2472, 2297, 2006, 2265, 2271, 2276, 2135, 2139, 3053, 2489, 3033, 3057, 2031, 2276, 2210, 2579, 2136, 2344, 3164, 2400, 2379, 3014, 2365, 3116, 2251, 2259, 2149, 2153, 2146, 2144, 2145, 2356, 2257, 2048, 2358, 3165, and 3166.

### Route: 1530

#### Segment: 1212

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Minimize Damage:** Fragile soils SSR
- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, GUSG –PSD in winter habitat, Sage-Minimize fragmentation

##### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range
- Route was designated to minimize fragmentation of Gunnison sage-grouse habitat.
- Route was designated to reduce fragmentation of sagebrush patches

### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

### Public Comments On Route: 1530

- No public comments for this Route

## Route: 1532

### Segment: 1205

#### Designation [?](#)

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Elk severe winter range
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I moderate
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches >60 acres

#### Rationale

##### Designation Criteria

- **Minimize Damage:** Fragile soils SSR
- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, GUSG –PSD in winter habitat, Sage-Minimize fragmentation

##### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range
- Route was designated to minimize fragmentation of Gunnison sage-grouse habitat.
- Route was designated to reduce fragmentation of sagebrush patches

## Public Comments On Route: 1534

- No public comments for this Route

## Route: 1536

### Segment: 1214

#### Designation [?](#)

##### Current Designation

Foot/Horse

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation access to dispersed campsite
- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density low in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches >60 acres

#### Rationale

##### Designation Criteria

- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Admin/Permitted Use Only

**Alternative B:** Admin/Permitted Use Only

• The following high value recreational routes/roads are legal RS 2477 ROW's in the State of Colorado, Mesa County and the BLM does not have the jurisdiction to close them: 500, 472, 518, 521, 530, 39, 127, 572, 566, 66, 65, 148, 71, 74, 587, 595, 608, 622, 628, 635, 624, 609, 611, 706, 678, 700, 719, 726, 696, 26, 936, 847, 849, 919, 767, 824, 96, 822, 817, 950, 1021, 900, 2682, 1020, 1003, 1084, 1142, 1184, 1156, 1198, 1349, 1308, 1310, 1238, 1263, 1122, 1170, 1192, 974, 941, 1076, 1039, 1018, 1759, 1764, 1758, 1174, 1788, 1798, 1669, 1699, 1773, 1755, 1779, 1750, 1751, 1792, 1720, 1726, 1727, 1720, 1722, 1803, 1805, 1809, 1614, 1609, 1605, 1608, 1571, 1526, 1516, 1448, 755, 807, 900, 10, 48, 924, 950, 1005, 965, 8, 1115, 981, 984, 1135, 2678, 1249, 1171, 1150, 1249, 1320, 1235, 1236, 1228, 1227, 1409, 1456, 1349, 1308, 1513, 1221, 1550, 1567, 1641, 1612, 1740, 1688, 2597, 2598, 2601, 2440, 3160, 3162, 2089, 2166, 2170, 2596, 2171, 2003, 2122, 2126, 2189, 3145, 2182, 2179, 2178, 3143, 2181, 2121, 2122, 2168, 2126, 2180, 2095, 2173, 2174, 2620, 2129, 1686, 1692, 1667, 1647, 1631, 1613, 1596, 1549, 1541, 2647, 1633, 1605, 1608, 1571, 2645, 1507, 1448, 1496, 1516, 1504, 1510, 1508, 1509, 439, 431, 456, 461, 460, 391, 423, 415, 419, 407, 402, 367, 372, 339, 298, 338, 105, 368, 374, 393, 389, 390, 376, 377, 351, 350, 121, 345, 320, 301, 251, 234, 232, 205, 344, 107, 103, 152, 153, 161, 168, 3199, 188, 196, 255, 254, 236, 294, 242, 219, 201, 169, 162, 158, 160, 173. The following high value recreational routes/roads are legal RS 2477ROW's in the State of Colorado, Delta County, and the BLM does not have the jurisdiction to close them: 3011, 2184, 2191, 3100, 2187, 2026, 2059, 2188, 2192, 3104, 2130, 3009, 2199, 2200, 2111, 2223, 2024, 3006, 2231, 3094, 2579, 2210, 2344, 2243, 2249, 2248, 3074, 2354, 2384, 2296, 2295, 2287, 2304, 2062, 2163, 3163, 2164, 2430, 4006, 3016, 2351, 3140, 2410, 4008, 2324, 2073, 2306, 2459, 3192, 3193, 2350, 2443, 2035, 2336, 2495, 2491, 2159, 3058, 2277, 2465, 2467, 3189, 2472, 2297, 2006, 2265, 2271, 2276, 2135, 2139, 3053, 2489, 3033, 3057, 2031, 2276, 2210, 2579, 2136, 2344, 3164, 2400, 2379, 3014, 2365, 3116, 2251, 2259, 2149, 2153, 2146, 2144, 2145, 2356, 2257, 2048, 2358, 3165, and 3166.

## Route: 1542

### Segment: 1197

#### Designation ?

##### Current Designation

Open (All modes of travel)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- LANDS Access to non-federal lands
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches >60 acres

#### Rationale

##### Designation Criteria

- No designation criteria for this route segment.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open (All modes of travel)

**Alternative C:** Admin/Permitted Use Only

**Alternative D:** Open (All modes of travel)

## Public Comments On Route: 1542

- No public comments for this Route

## Route: 1543

### Segment: 1210

#### Designation ?

##### Current Designation

Open (All modes of travel)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation access to dispersed campsite
- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Elk severe winter range

- CULTURAL Cultural Indirect impact
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- No designation criteria for this route segment.

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open (All modes of travel)

**Alternative C:** Closed (Rehab)

**Alternative D:** Open (All modes of travel)

## Public Comments On Route: 1543

- No public comments for this Route

## Route: 1549

### Segment: 1204

## Designation

### Current Designation

Closed (Rehab)

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches >60 acres

## Rationale

### Designation Criteria

- **Minimize Damage:** Fragile soils SSR
- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, GUSG –PSD in winter habitat, Sage-Minimize fragmentation

### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range
- Route was designated to minimize fragmentation of Gunnison sage-grouse habitat.
- Route was designated to reduce fragmentation of sagebrush patches

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Route: 155

### Segment: 2674

#### Designation [?](#)

##### Current Designation

Admin/Permitted Use Only

##### Designation Following Mitigation

Open (All modes of travel)

##### Mitigation Criteria

- Work with Land Owner on Public Access
- Work with Land Owner on Right of Way

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- LANDS Access to non-federal lands
- LANDS Right of Way
- RIPARIAN Riparian 1 stream crossing
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I low
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- No designation criteria for this route segment.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Admin/Permitted Use Only

**Alternative C:** Admin/Permitted Use Only

**Alternative D:** Admin/Permitted Use Only

## Public Comments On Route: 155

- No public comments for this Route

## Route: 1550

### Segment: 1238

#### Designation [?](#)

##### Current Designation

Vehicles under 50" wide

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches >60 acres

#### Rationale

##### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities - specific
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

## Route: 1551

### Segment: 1183

#### Designation ?

##### Current Designation

Open (All modes of travel)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E

### Rationale

#### Designation Criteria

- Recreation:** Rec opportunities – general

#### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

### Previous Alternatives Analyzed

**Alternative A:** County

**Alternative B:** County

**Alternative C:** County

**Alternative D:** County

## Public Comments On Route: 1551

- No public comments for this Route

## Route: 1554

### Segment: 1188

#### Designation ?

## Current Designation

Wilderness

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density low in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches >60 acres

## Rationale

### Designation Criteria

- **No designation criteria for this route segment.**

### Rationale for Decision

- Non-system route inside the wilderness.

## Previous Alternatives Analyzed

**Alternative A:** Foot/Horse

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 1554

## Route: 1555

### Segment: 1180

## Designation

### Current Designation

Open (All modes of travel)

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches >60 acres

## Rationale

### Designation Criteria

- **No designation criteria for this route segment.**

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Admin/Permitted Use Only

**Alternative C:** Admin/Permitted Use Only

**Alternative D:** Admin/Permitted Use Only

## Public Comments On Route: 1555

- No public comments for this Route

## Route: 1556

### Segment: 1175

## Designation

## Current Designation

Admin/Permitted Use Only

## Mitigation Criteria

- No Mitigation Criteria for this Route Segment

## Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches >60 acres

## Rationale

### Designation Criteria

- **Minimize Damage:** Fragile soils SSR
- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close

### Rationale for Decision

- Route was designated to ensure access to rights-of-way, private property, and livestock grazing facilities.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Admin/Permitted Use Only

**Alternative C:** Admin/Permitted Use Only

**Alternative D:** Admin/Permitted Use Only

## Public Comments On Route: 1556

- No public comments for this Route

## Route: 1557

### Segment: 1185

## Designation

### Current Designation

Vehicles under 50" wide

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk severe winter range
- RIPARIAN Riparian 1 stream crossing
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I moderate
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches >60 acres

## Rationale

### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Admin/Permitted Use Only

**Alternative C:** Admin/Permitted Use Only

**Alternative D:** Admin/Permitted Use Only

## Public Comments On Route: 1557

- No public comments for this Route

## Route: 1559

### Segment: 1167

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation access to dispersed campsite
- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Minimize Damage:** Fragile soils SSR
- **Minimize Harassment:** Big game winter range – close, PPSV- Minimize fragmentation

##### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to protect big game winter range
- Route was designated to reduce fragmentation in Priority Vegetation types

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 1559

## Route: 156

### Segment: 2675

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- LANDS Access to non-federal lands
- LANDS Right of Way
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I low
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Minimize Damage:** NHT – close routes for setting
- **Minimize Harassment:** PPSV- Minimize fragmentation

##### Rationale for Decision

- Route was designated to improve natural setting along the Old Spanish National Historic Trail.
- Route was designated to reduce fragmentation in Priority Vegetation types

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Admin/Permitted Use Only

**Alternative C:** Admin/Permitted Use Only

## Public Comments On Route: 156

Organization, commenter: Janice Shepherd

Comment ID: 000000106-237

- Routes 156, 157, 158, 159 it appears that the BLM is selecting to keep open (as Admin) a narrow barely used route vs the wide more frequently used road. Was that really the intent?

## Route: 1560

### Segment: 1191

### Public Comments On Route: 1561

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 000000135-35

• Gibbler Gulch/Gibbler MountainThe following are route recommendations for Gibbler Gulch and Gibbler Mountain which together make a nice amount of relatively undisturbed open space and habitat. This area is less roaded and fragmented than other parts of Cactus Park NCA unit. It may be less impacted by grazing than other areas and harbors critical big game habitat. Hoping to send you maps next week showing these areas. In particular I recommend keeping recreational use out of all the creek drainages in the upper Gibbler Gulch area, and closing roads on the adjacent mesas. Putting a motorized or mountain bike route over Gibbler Mountain would irreversibly change the natural quality, silence and solitude of this remote landscape. Lands that are currently undeveloped should stay that way as so much land in the NCA is criss-crossed with routes and trails.For example there is potential for retaining the remote "open space" setting of Gibbler Mountain, as specified in the 2007 Colorado BLM Recreation and Visitor Strategy, by closing 1227(!) (especially), 1269, 1309, 2674, 2673, 1249, 1171, 981, 980, 1150, 1154, 977, 979, 1312, 1310, 1334, 1330, 1344, 1286, 1242, 1213, 1238, 1242, 1204, 1213, 1239, 1214, 1212, 1200, 1263, 1204, 1198, 1187, 1210. Limit motorized traffic to roads 15 and 8. Similarly, there is potential for a large unmotorized area extending west from road 15 and Gibbler Gulch on the east, to road 8 on the west. To create an undisturbed nonmotorized area I recommend closing routes 1526, 2666, 1571, 2665, 1608, 1570, 1605, 1561, 1516, 1606, 1561, 1609 1633, 2664, 2663, 1412, 1424, 1456 1434, 1513 , 1249, 1269.Many of these are duplicative, serve no purpose, or are dead ends, simply pioneered randomly, and should be closed.

### Route: 1562

#### Segment: 1166

#### Designation ?

##### Current Designation

Closed (Rehab)

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range
- Route was designated to minimize fragmentation of Gunnison sage-grouse habitat.
- Route was designated to reduce fragmentation of sagebrush patches

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 1565

- No public comments for this Route

## Route: 1566

### Segment: 1165

## Designation

### Current Designation

Vehicles under 50" wide

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches >60 acres

## Rationale

### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Admin/Permitted Use Only

**Alternative C:** Admin/Permitted Use Only

**Alternative D:** Admin/Permitted Use Only

## Public Comments On Route: 1566

- No public comments for this Route

## Route: 1567

### Segment: 1207

## Designation

### Current Designation

Admin/Permitted Use Only

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches >60 acres

## Rationale

### Designation Criteria

- **Minimize Damage:** Fragile soils SSR
- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close

### Rationale for Decision

- Route was designated to ensure access to rights-of-way, private property, and livestock grazing facilities.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Admin/Permitted Use Only

**Alternative C:** Admin/Permitted Use Only

**Alternative D:** Admin/Permitted Use Only

## Route: 157

### Segment: 2672

#### Designation

##### Current Designation

Admin/Permitted Use Only

##### Designation Following Mitigation

Open (All modes of travel)

##### Mitigation Criteria

- Work with Land Owner on Public Access
- Work with Land Owner on Right of Way

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I low
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- No designation criteria for this route segment.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Not Rehabbed)

## Public Comments On Route: 157

Organization, commenter: Janice Shepherd

Comment ID: 000000106-237

- Routes 156, 157, 158, 159 it appears that the BLM is selecting to keep open (as Admin) a narrow barely used route vs the wide more frequently used road. Was that really the intent?

## Route: 1570

### Segment: 1178

#### Designation

##### Current Designation

Open (All modes of travel)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- WILDLIFE Elk severe winter range
- RIPARIAN Riparian 1 stream crossing
- RIPARIAN Riparian crossing ephemeral stream

- CULTURAL Cultural Class I moderate
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches >60 acres

## Rationale

### Designation Criteria

- **No designation criteria for this route segment.**

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

## Public Comments On Route: 1570

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 000000135-35

• Gibbler Gulch/Gibbler MountainThe following are route recommendations for Gibbler Gulch and Gibbler Mountain which together make a nice amount of relatively undisturbed open space and habitat. This area is less roaded and fragmented than other parts of Cactus Park NCA unit. It may be less impacted by grazing than other areas and harbors critical big game habitat. Hoping to send you maps next week showing these areas. In particular I recommend keeping recreational use out of all the creek drainages in the upper Gibbler Gulch area, and closing roads on the adjacent mesas. Putting a motorized or mountain bike route over Gibbler Mountain would irreversibly change the natural quality, silence and solitude of this remote landscape. Lands that are currently undeveloped should stay that way as so much land in the NCA is criss-crossed with routes and trails.For example there is potential for retaining the remote "open space" setting of Gibbler Mountain, as specified in the 2007 Colorado BLM Recreation and Visitor Strategy, by closing 1227(!) (especially), 1269, 1309, 2674, 2673, 1249, 1171, 981, 980, 1150, 1154, 977, 979, 1312, 1310, 1334, 1330, 1344, 1286, 1242, 1213, 1238, 1242, 1204, 1213, 1239, 1214, 1212, 1200, 1263, 1204, 1198, 1187, 1210. Limit motorized traffic to roads 15 and 8.Similarly, there is potential for a large unmotorized area extending west from road 15 and Gibbler Gulch on the east, to road 8 on the west. To create an undisturbed nonmotorized area I recommend closing routes 1526, 2666, 1571, 2665, 1608, 1570, 1605, 1561, 1516, 1606, 1561, 1609 1633, 2664, 2663, 1412, 1424, 1456 1434, 1513 , 1249, 1269.Many of these are duplicative, serve no purpose, or are dead ends, simply pioneered randomly, and should be closed.

## Route: 1571

### Segment: 1220

## Designation

### Current Designation

Vehicles under 50" wide

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management

• P 126-128 SRMA in Cactus Park. The 1st objective on p 126 puts all of Cactus Park into a SRMA with ATV riding as the main activity in alt E, despite having habitat for the soon to be listed Gunnison sage-grouse in this area. Alt C targets other uses, hiking horseback, back road touring. Either the GUSG habitat could be eliminated from the SRMA, or the ATV routes shown on the current travel map (1633,1605,1608,1571), changed to administrative

• Gibbler Gulch/Gibbler Mountain The following are route recommendations for Gibbler Gulch and Gibbler Mountain which together make a nice amount of relatively undisturbed open space and habitat. This area is less roaded and fragmented than other parts of Cactus Park NCA unit. It may be less impacted by grazing than other areas and harbors critical big game habitat. Hoping to send you maps next week showing these areas. In particular I recommend keeping recreational use out of all the creek drainages in the upper Gibbler Gulch area, and closing roads on the adjacent mesas. Putting a motorized or mountain bike route over Gibbler Mountain would irreversibly change the natural quality, silence and solitude of this remote landscape. Lands that are currently undeveloped should stay that way as so much land in the NCA is criss-crossed with routes and trails. For example there is potential for retaining the remote "open space" setting of Gibbler Mountain, as specified in the 2007 Colorado BLM Recreation and Visitor Strategy, by closing 1227(!) (especially), 1269, 1309, 2674, 2673, 1249, 1171, 981, 980, 1150, 1154, 977, 979, 1312, 1310, 1334, 1330, 1344, 1286, 1242, 1213, 1238, 1242, 1204, 1213, 1239, 1214, 1212, 1200, 1263, 1204, 1198, 1187, 1210. Limit motorized traffic to roads 15 and 8. Similarly, there is potential for a large unmotorized area extending west from road 15 and Gibbler Gulch on the east, to road 8 on the west. To create an undisturbed nonmotorized area I recommend closing routes 1526, 2666, 1571, 2665, 1608, 1570, 1605, 1561, 1516, 1606, 1561, 1609, 1633, 2664, 2663, 1412, 1424, 1456, 1434, 1513, 1249, 1269. Many of these are duplicative, serve no purpose, or are dead ends, simply pioneered randomly, and should be closed.

• [ED: Following are the text (in quotes) and the D-E NCA Recreation Planner's interpretation of what the commenter wrote on the maps they submitted during public scoping for the Dominguez RMP. The Rec Planner also identified the route numbers highlighted on the maps]: Routes 741 and 848 "needs ATV connector. Cultural sites can easily be avoided by the 50 foot policy." Routes 26 and 1017 "needs ATV connector." Route 941 "must remain open." Route 1017 "should be ATV route." There should be an "ATV connect" between routes 1198 and 1263. The following text was highlighted in orange "Highlighted routes are routes used often by WSATVA and other ATVs." in addition to all the routes mentioned previously, the following routes were highlighted in orange: 743, 97, 96, 26, 813, 842, 15, 847, 1393, 1192, 1292. [ED: On a second map, the commenter highlighted additional routes]: The following are "routes used often by WSATVA": 1516, 1571, 1605, 1633, 15, 1641, 1221. "SC-5" connecting routes 1605 and 1633 "and "SC-6" connecting routes 1516 and 1605 "need to become new ATV routes connecting these deadends." [ED: A map of the Gibbler Mountain area had additional text and routes]. "Highlighted routes" which "are often used by WSATVA 3 seasons" are as follows: 1235, 1221, 1409, 1310, 1263, 1198, 15. Route 1235 [is or should be] "an ATV route."

## Route: 1573

### Segment: 1151

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches >60 acres

#### Rationale

##### Designation Criteria

- **Minimize Damage:** Fragile soils SSR
- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, GUSG –PSD in winter habitat, Sage-Minimize fragmentation

##### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range
- Route was designated to minimize fragmentation of Gunnison sage-grouse habitat.
- Route was designated to reduce fragmentation of sagebrush patches

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

## Route: 1583

### Segment: 1169

#### Designation [?](#)

##### Current Designation

Admin/Permitted Use Only

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- RIPARIAN Riparian 1 stream crossing
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I moderate
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches >60 acres

#### Rationale

##### Designation Criteria

- Minimize Damage:** Fragile soils SSR
- Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close

##### Rationale for Decision

- Route was designated to ensure access to rights-of-way, private property, and livestock grazing facilities.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Admin/Permitted Use Only

**Alternative C:** Admin/Permitted Use Only

**Alternative D:** Admin/Permitted Use Only

#### Designation [?](#)

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation access to dispersed campsite
- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk winter concentration areas
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Direct impact
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches >60 acres

#### Rationale

##### Designation Criteria

- Minimize Damage:** Cultural – SSR within 100m sites
- Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, Bighorn – SSR -- summer range

##### Rationale for Decision

- Route was designated to minimize impacts to cultural resources.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range

- Route was designated to reduce the miles of motorized and mechanized routes in bighorn sheep habitat.

### Public Comments On Route: 1585

Organization, commenter: Quiet Trails Group, Sherry Schenk

Comment ID: 000000115-53

- [Dominguez Canyon Wilderness TMP-Level Comments]Zone 2]Routes 1756-5-1593-1585: Quiet Trails Group would also suggest keeping these routes open to horse and foot traffic, with a future possibility of connecting to route 2610. This would make a great trail system for horseback riders and long distance hikers. Route 1756 starts in the Wagon Park area.

Organization, commenter: Quiet Trails Group, Sherry Schenk

Comment ID: 000000115-59

- Wagon Park/Sawmill Mesa (North) TMP-Level Comments:Routes 1756-5-1593-1585: Quiet Trails Group would suggest keeping these routes open to horse and foot traffic, connecting to route 2610. This would make a great trail system for horseback riders and long distance hikers. This comment is predominantly related to Zone 2 of the Wilderness, however, as route 1756 starts in the Wagon Park area we have also included this comment here

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 000000135-4

- we appreciate the route closures in the preferred alternative. However, as you will see in our attached 2011 route-specific comments, we are concerned about the routes left open in the draft TMP that we and others had recommended for closure, in particular: o The two ATV trails (Numbers 3162/2089/2166, and 2596/2171/2003) in the Dominguez Addition Unit that need to be closed a) to protect this unit and b) to prevent the likelihood of incursions into the Dominguez wilderness, due to remote, unmanageable and unenforceable terrain. o Palmer Gulch road #2169/2170, needs to be closed. o Road #2181 needs to be closed to OHVs. o 1778/1727 o 1782/1768/2602 in Sawmill Mesa and Wagon Park zones o 1756 should be closed at the junction with 1758, and include closure of roads 1593 and 1585

Organization, commenter: Backcountry Hunters and Anglers, Craig Grother

Comment ID: 000000156-21

- Within the Sawmill Mesa and Wagon Park mixed-use areas, we recommend the following modifications to the preferred alternative to improve big game habitat effectiveness and the quality of traditional big game hunting and non-motorized recreation opportunities within these areas. Close and obliterate spur roads 1782/1768/2602 located on the rim of the Big Dominguez Canyon. This road does not access any wilderness trailheads or serve any other purpose we know of. We also do not understand why road 1756 was left open half way down the ridge instead of just closing the entire length of the route. This road should be closed at the junction with 1758, and include closure of roads 1593 and 1585 as shown in the preferred alternative. We would also like to see road 1778/1727 down Wildhorse Draw closed to motorized vehicles and retained as a non-motorized trail. Closing this route to motorized vehicles would also enhance big game habitat effectiveness and provide a high quality backcountry hunting area.

- Wagon Park/Sawmill Mesa (North) TMP-Level Comments:Routes 1756-5-1593-1585: Quiet Trails Group would suggest keeping these routes open to horse and foot traffic, connecting to route 2610. This would make a great trail system for horseback riders and long distance hikers. This comment is predominantly related to Zone 2 of the Wilderness, however, as route 1756 starts in the Wagon Park area we have also included this comment here

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 000000135-4

- we appreciate the route closures in the preferred alternative. However, as you will see in our attached 2011 route-specific comments, we are concerned about the routes left open in the draft TMP that we and others had recommended for closure, in particular:
  - o The two ATV trails (Numbers 3162/2089/2166, and 2596/2171/2003) in the Dominguez Addition Unit that need to be closed a) to protect this unit and b) to prevent the likelihood of incursions into the Dominguez wilderness, due to remote, unmanageable and unenforceable terrain.
  - o Palmer Gulch road #2169/2170, needs to be closed.
  - o Road #2181 needs to be closed to OHVs.
  - o 1778/1727 o 1782/1768/2602 in Sawmill Mesa and Wagon Park zonos 1756 should be closed at the junction with 1758, and include closure of roads 1593 and 1585

Organization, commenter: Backcountry Hunters and Anglers, Craig Grother

Comment ID: 000000156-21

- Within the Sawmill Mesa and Wagon Park mixed-use areas, we recommend the following modifications to the preferred alternative to improve big game habitat effectiveness and the quality of traditional big game hunting and non-motorized recreation opportunities within these areas.
  - Close and obliterate spur roads 1782/1768/2602 located on the rim of the Big Dominguez Canyon. This road does not access any wilderness trailheads or serve any other purpose we know of. We also do not understand why road 1756 was left open half way down the ridge instead of just closing the entire length of the route. This road should be closed at the junction with 1758, and include closure of roads 1593 and 1585 as shown in the preferred alternative. We would also like to see road 1778/1727 down Wildhorse Draw closed to motorized vehicles and retained as a non-motorized trail. Closing this route to motorized vehicles would also enhance big game habitat effectiveness and provide a high quality backcountry hunting area.

## Route: 1594

### Segment: 1120

#### Designation [?](#)

##### Current Designation

Foot/Horse

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- RIPARIAN Riparian 1 stream crossing
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I high
- SMAs Wild and Scenic River area
- DENSITY Route density low in Alt A
- DENSITY Route density low in Alt E
- SSPLANT Special Status Species sensitive species planes

## Rationale

### Designation Criteria

- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Foot/Horse

**Alternative B:** Foot/Horse

**Alternative C:** Foot/Horse

**Alternative D:** Foot/Horse

## Public Comments On Route: 1594

- No public comments for this Route

## Route: 1596

### Segment: 1117

### Designation

#### Current Designation

Closed (Rehab)

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches >60 acres

## Rationale

### Designation Criteria

- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, GUSG –PSD in winter habitat, Sage-Minimize fragmentation

### Rationale for Decision

- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range
- Route was designated to minimize fragmentation of Gunnison sage-grouse habitat.
- Route was designated to reduce fragmentation of sagebrush patches

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Route: 1597

### Segment: 1137

#### Designation ?

##### Current Designation

Admin/Permitted Use Only

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches >60 acres

#### Rationale

##### Designation Criteria

- **Minimize Damage:** Fragile soils SSR
- **Minimize Harassment:** PPSV- Minimize fragmentation, Sage-Minimize fragmentation, Big game winter range – close, GUSG –PSD in winter habitat

##### Rationale for Decision

- Route was designated to ensure access to rights-of-way, private property, and livestock grazing facilities.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Admin/Permitted Use Only

**Alternative C:** Admin/Permitted Use Only

**Alternative D:** Admin/Permitted Use Only

## Public Comments On Route: 1597

## Route: 1599

### Segment: 1113

#### Designation ?

##### Current Designation

Vehicles under 50" wide

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general

- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

#### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Admin/Permitted Use Only

**Alternative C:** Admin/Permitted Use Only

**Alternative D:** Admin/Permitted Use Only

#### Public Comments On Route: 1599

- No public comments for this Route

#### Route: 16

##### Segment: 2011

#### Designation [?](#)

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Indirect impact
- SMAs Gibbler Mountain ACEC
- DENSITY Route density highest in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Minimize Harassment:** Big game winter range – close, PPSV- Minimize fragmentation

##### Rationale for Decision

- Route was designated to protect big game winter range
- Route was designated to reduce fragmentation in Priority Vegetation types

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

#### Public Comments On Route: 16

- No public comments for this Route

#### Route: 160

##### Segment: 2666

#### Designation [?](#)

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I low
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Minimize Damage:** NHT – close routes for setting, Riparian—ephemeral streams SSR 30 m, Fragile soils SSR
- **Minimize Harassment:** PPSV- Minimize fragmentation

##### Rationale for Decision

- Route was designated to improve natural setting along the Old Spanish National Historic Trail.
- Route was designated to minimize travel routes in and crossing riparian and wetland areas.
- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to reduce fragmentation in Priority Vegetation types

## Route: 1601

### Segment: 1105

#### Designation

##### Current Designation

Open (All modes of travel)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Indirect impact
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches >60 acres

#### Rationale

##### Designation Criteria

- No designation criteria for this route segment.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Admin/Permitted Use Only

**Alternative C:** Open, seek re-route or mitigation

**Alternative D:** Admin/Permitted Use Only

## Public Comments On Route: 1601

- No public comments for this Route

## Route: 1602

### Segment: 1100

#### Designation [?](#)

##### Current Designation

Open (All modes of travel)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Indirect impact
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches <60 acres

#### Rationale

##### Designation Criteria

- **No designation criteria for this route segment.**

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Admin/Permitted Use Only

**Alternative C:** Open, seek re-route or mitigation

**Alternative D:** Admin/Permitted Use Only

## Public Comments On Route: 1602

- No public comments for this Route

## Route: 1603

### Segment: 1136

#### Designation [?](#)

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation access to dispersed campsite
- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches >60 acres

#### Rationale

##### Designation Criteria

- **Minimize Damage:** Fragile soils SSR
- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, GUSG –PSD in winter habitat

##### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range
- Route was designated to minimize fragmentation of Gunnison sage-grouse habitat.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 1603

- No public comments for this Route

### Route: 1604

#### Segment: 1103

• P 126-128 SRMA in Cactus Park. The 1st objective on p 126 puts all of Cactus Park into a SRMA with ATV riding as the main activity in alt E, despite having habitat for the soon to be listed Gunnison sage-grouse in this area. Alt C targets other uses, hiking horseback, back road touring. Either the GUSG habitat could be eliminated from the SRMA, or the ATV routes shown on the current travel map (1633,1605,1608,1571), changed to administrative

• Gibbler Gulch/Gibbler Mountain The following are route recommendations for Gibbler Gulch and Gibbler Mountain which together make a nice amount of relatively undisturbed open space and habitat. This area is less roaded and fragmented than other parts of Cactus Park NCA unit. It may be less impacted by grazing than other areas and harbors critical big game habitat. Hoping to send you maps next week showing these areas. In particular I recommend keeping recreational use out of all the creek drainages in the upper Gibbler Gulch area, and closing roads on the adjacent mesas. Putting a motorized or mountain bike route over Gibbler Mountain would irreversibly change the natural quality, silence and solitude of this remote landscape. Lands that are currently undeveloped should stay that way as so much land in the NCA is criss-crossed with routes and trails. For example there is potential for retaining the remote "open space" setting of Gibbler Mountain, as specified in the 2007 Colorado BLM Recreation and Visitor Strategy, by closing 1227(!) (especially), 1269, 1309, 2674, 2673, 1249, 1171, 981, 980, 1150, 1154, 977, 979, 1312, 1310, 1334, 1330, 1344, 1286, 1242, 1213, 1238, 1242, 1204, 1213, 1239, 1214, 1212, 1200, 1263, 1204, 1198, 1187, 1210. Limit motorized traffic to roads 15 and 8. Similarly, there is potential for a large unmotorized area extending west from road 15 and Gibbler Gulch on the east, to road 8 on the west. To create an undisturbed nonmotorized area I recommend closing routes 1526, 2666, 1571, 2665, 1608, 1570, 1605, 1561, 1516, 1606, 1561, 1609, 1633, 2664, 2663, 1412, 1424, 1456, 1434, 1513, 1249, 1269. Many of these are duplicative, serve no purpose, or are dead ends, simply pioneered randomly, and should be closed.

• [ED: Following are the text (in quotes) and the D-E NCA Recreation Planner's interpretation of what the commenter wrote on the maps they submitted during public scoping for the Dominguez RMP. The Rec Planner also identified the route numbers highlighted on the maps]: Routes 741 and 848 "needs ATV connector. Cultural sites can easily be avoided by the 50 foot policy." Routes 26 and 1017 "needs ATV connector." Route 941 "must remain open." Route 1017 "should be ATV route." There should be an "ATV connect" between routes 1198 and 1263. The following text was highlighted in orange "Highlighted routes are routes used often by WSATVA and other ATVs." in addition to all the routes mentioned previously, the following routes were highlighted in orange: 743, 97, 96, 26, 813, 842, 15, 847, 1393, 1192, 1292. [ED: On a second map, the commenter highlighted additional routes]: The following are "routes used often by WSATVA": 1516, 1571, 1605, 1633, 15, 1641, 1221. "SC-5" connecting routes 1605 and 1633 " and "SC-6" connecting routes 1516 and 1605 "needs to become new ATV routes connecting these deadends." [ED: A map of the Gibbler Mountain area had additional text and routes]. "Highlighted routes" which "are often used by WSATVA 3 seasons" are as follows: 1235, 1221, 1409, 1310, 1263, 1198, 15. Route 1235 [is or should be] "an ATV route."

## Route: 1606

### Segment: 1108

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, GUSG – PSD in winter habitat, Sage-Minimize fragmentation

##### Rationale for Decision

- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range
- Route was designated to minimize fragmentation of Gunnison sage-grouse habitat.
- Route was designated to reduce fragmentation of sagebrush patches

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 1606

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 00000135-35

- Gibbler Gulch/Gibbler MountainThe following are route recommendations for Gibbler Gulch and Gibbler Mountain which together make a nice amount of relatively undisturbed open space and habitat. This area is less roaded and fragmented than other parts of Cactus Park NCA unit. It may be less impacted by grazing than other areas and harbors critical big game habitat. Hoping to send you maps next week showing these areas. In particular I recommend keeping recreational use out of all the creek drainages in the upper Gibbler Gulch area, and closing roads on the adjacent mesas. Putting a motorized or mountain bike route over Gibbler Mountain would irreversibly change the natural quality, silence and solitude of this remote landscape. Lands that are currently undeveloped should stay that way as so much land in the NCA is criss-crossed with routes and trails.For example there is potential for retaining the remote "open space" setting of Gibbler Mountain, as specified in the 2007 Colorado BLM Recreation and Visitor Strategy, by closing 1227(!) (especially), 1269, 1309, 2674, 2673, 1249, 1171, 981, 980, 1150, 1154, 977, 979, 1312, 1310, 1334, 1330, 1344, 1286, 1242, 1213, 1238, 1242, 1204, 1213, 1239, 1214, 1212, 1200, 1263, 1204, 1198, 1187, 1210. Limit motorized traffic to roads 15 and 8.Similarly, there is potential for a large unmotorized area extending west from road 15 and Gibbler Gulch on the east, to road 8 on the west. To create an undisturbed nonmotorized area I recommend closing routes 1526, 2666, 1571, 2665, 1608, 1570, 1605, 1561, 1516, 1606, 1561, 1609 1633, 2664, 2663, 1412, 1424, 1456 1434, 1513 , 1249, 1269.Many of these are duplicative, serve no purpose, or are dead ends, simply pioneered randomly, and should be closed.

## Route: 1607

### Segment: 1107

#### Designation

##### Current Designation

## Public Comments On Route: 1607

- No public comments for this Route

## Route: 1608

### Segment: 1154

#### Designation

##### Current Designation

Vehicles under 50" wide

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Indirect impact
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches >60 acres

#### Rationale

## Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

## Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

• P 126-128 SRMA in Cactus Park. The 1st objective on p 126 puts all of Cactus Park into a SRMA with ATV riding as the main activity in alt E, despite having habitat for the soon to be listed Gunnison sage-grouse in this area. Alt C targets other uses, hiking horseback, back road touring. Either the GUSG habitat could be eliminated from the SRMA, or the ATV routes shown on the current travel map (1633,1605,1608,1571), changed to administrative

• The following high value recreational routes/roads are legal RS 2477 ROW's in the State of Colorado, Mesa County and the BLM does not have the jurisdiction to close them: 500, 472, 518, 521, 530, 39, 127, 572, 566, 66, 65, 148, 71, 74, 587, 595, 608, 622, 628, 635, 624, 609, 611, 706, 678, 700, 719, 726, 696, 26, 936, 847, 849, 919, 767, 824, 96, 822, 817, 950, 1021, 900, 2682, 1020, 1003, 1084, 1142, 1184, 1156, 1198, 1349, 1308, 1310, 1238, 1263, 1122, 1170, 1192, 974, 941, 1076, 1039, 1018, 1759, 1764, 1758, 1174, 1788, 1798, 1669, 1699, 1773, 1755, 1779, 1750, 1751, 1792, 1720, 1726, 1727, 1720, 1722, 1803, 1805, 1809, 1614, 1609, 1605, 1608, 1571, 1526, 1516, 1448, 755, 807, 900, 10, 48, 924, 950, 1005, 965, 8, 1115, 981, 984, 1135, 2678, 1249, 1171, 1150, 1249, 1320, 1235, 1236, 1228, 1227, 1409, 1456, 1349, 1308, 1513, 1221, 1550, 1567, 1641, 1612, 1740, 1688, 2597, 2598, 2601, 2440, 3160, 3162, 2089, 2166, 2170, 2596, 2171, 2003, 2122, 2126, 2189, 3145, 2182, 2179, 2178, 3143, 2181, 2121, 2122, 2168, 2126, 2180, 2095, 2173, 2174, 2620, 2129, 1686, 1692, 1667, 1647, 1631, 1613, 1596, 1549, 1541, 2647, 1633, 1605, 1608, 1571, 2645, 1507, 1448, 1496, 1516, 1504, 1510, 1508, 1509, 439, 431, 456, 461, 460, 391, 423, 415, 419, 407, 402, 367, 372, 339, 298, 338, 105, 368, 374, 393, 389, 390, 376, 377, 351, 350, 121, 345, 320, 301, 251, 234, 232, 205, 344, 107, 103, 152, 153, 161, 168, 3199, 188, 196, 255, 254, 236, 294, 242, 219, 201, 169, 162, 158, 160, 173. The following high value recreational routes/roads are legal RS 2477 ROW's in the State of Colorado, Delta County, and the BLM does not have the jurisdiction to close them: 3011, 2184, 2191, 3100, 2187, 2026, 2059, 2188, 2192, 3104, 2130, 3009, 2199, 2200, 2111, 2223, 2024, 3006, 2231, 3094, 2579, 2210, 2344, 2243, 2249, 2248, 3074, 2354, 2384, 2296, 2295, 2287, 2304, 2062, 2163, 3163, 2164, 2430, 4006, 3016, 2351, 3140, 2410, 4008, 2324, 2073, 2306, 2459, 3192, 3193, 2350, 2443, 2035, 2336, 2495, 2491, 2159, 3058, 2277, 2465, 2467, 3189, 2472, 2297, 2006, 2265, 2271, 2276, 2135, 2139, 3053, 2489, 3033, 3057, 2031, 2276, 2210, 2579, 2136, 2344, 3164, 2400, 2379, 3014, 2365, 3116, 2251, 2259, 2149, 2153, 2146, 2144, 2145, 2356, 2257, 2048, 2358, 3165, and 3166.

## Route: 1609

### Segment: 1101

#### Designation

##### Current Designation

Vehicles under 50" wide

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Indirect impact
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

- Alternative A:** Open (All modes of travel)
- Alternative B:** Admin/Permitted Use Only
- Alternative C:** Admin/Permitted Use Only
- Alternative D:** Admin/Permitted Use Only

• Gibbler Gulch/Gibbler Mountain The following are route recommendations for Gibbler Gulch and Gibbler Mountain which together make a nice amount of relatively undisturbed open space and habitat. This area is less roaded and fragmented than other parts of Cactus Park NCA unit. It may be less impacted by grazing than other areas and harbors critical big game habitat. Hoping to send you maps next week showing these areas. In particular I recommend keeping recreational use out of all the creek drainages in the upper Gibbler Gulch area, and closing roads on the adjacent mesas. Putting a motorized or mountain bike route over Gibbler Mountain would irreversibly change the natural quality, silence and solitude of this remote landscape. Lands that are currently undeveloped should stay that way as so much land in the NCA is criss-crossed with routes and trails. For example there is potential for retaining the remote "open space" setting of Gibbler Mountain, as specified in the 2007 Colorado BLM Recreation and Visitor Strategy, by closing 1227(!) (especially), 1269, 1309, 2674, 2673, 1249, 1171, 981, 980, 1150, 1154, 977, 979, 1312, 1310, 1334, 1330, 1344, 1286, 1242, 1213, 1238, 1242, 1204, 1213, 1239, 1214, 1212, 1200, 1263, 1204, 1198, 1187, 1210. Limit motorized traffic to roads 15 and 8. Similarly, there is potential for a large unmotorized area extending west from road 15 and Gibbler Gulch on the east, to road 8 on the west. To create an undisturbed nonmotorized area I recommend closing routes 1526, 2666, 1571, 2665, 1608, 1570, 1605, 1561, 1516, 1606, 1561, 1609, 1633, 2664, 2663, 1412, 1424, 1456, 1434, 1513, 1249, 1269. Many of these are duplicative, serve no purpose, or are dead ends, simply pioneered randomly, and should be closed.

## Route: 161

### Segment: 2734

#### Designation

**Current Designation**  
Open (All modes of travel)

#### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

#### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Indirect impact
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general, Rec opportunities - specific

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

- Alternative A:** Open (All modes of travel)
- Alternative B:** Admin/Permitted Use Only
- Alternative C:** Admin/Permitted Use Only
- Alternative D:** Open, seek re-route or mitigation

• I've been involved in the "process" of this NCA since long before the D-E NCA designation. "The Hunting Grounds" area is very personal and dear to me, so I'd like to share a little of my background and how it ties into where we are today. I'd been coming to Grand Junction since 1992, to enjoy the BLM public land opportunities of OHV use, while living in the Denver area. Close to home, solitary, public land opportunities did not exist near Denver. After a couple visits per year to the valley throughout the 1990's, I thought Grand Junction would be a great place to live. I began looking for acreage in/around the valley. When the realtor showed me a 40 acre parcel for sale, accessed via Bean Ranch Road, I had already looked at several others, from Debeque to Glade Park. When I arrived at this said parcel for sale, I said "this is THE one!" In Feb. 2001, I purchased the 40 acre parcel of dry land, which was (and still is) bordered by BLM land on 3 sides. (Note, this mentioned BLM land is now within the D-E NCA Hunting Grounds area.) In Sept. 2002 I made the move to Grand Junction, and in March of 2003 my home was completed and I was able to move onto my 40 acres. The dream I'd so looked forward to achieving was made a reality, as my preferred outdoor recreation activity was (and still is) OHV use, although I enjoy many other types of outdoor recreation. I now had the ability to leave my driveway, on my OHV, and explore diverse trails and see beautiful scenery and wildlife. Let me also mention that being able to reside on this 40 acres wasn't an easy endeavor, however, it was a choice that meant financial and life altering sacrifices, to be able to enjoy the recreation opportunities this location had to offer. One major note supporting that is that there is no piped/city water beyond where you crest the top of the hill of Bean Ranch Rd. All the homes located on the back side of Bean Ranch Rd do not have piped/city drinking water, so those home owners have either drilled a well (minimal) or use cisterns and haul, or have delivered, potable water. Let me tell you, this takes planning & some conditional living. But those are things I was willing to deal with, to occupy a residence in this great area of BLM recreation opportunities that I so desired, and to achieve my personal dreams of living "out of the city" for mental well being. When I first discovered my passion for OHV use, I rode a dirt bike. After about 13 years of riding dirt bikes, I tried atv-ing and discovered I could pack my rack with supplies for a days' outing (or more), and be gone on the trail, enjoying what there was to be seen! Soon after moving to the valley, I joined the WSATVA and made several friends who were atv-ers, so that has been my main OHV method for the past 12 years. Although WSATVA did welcome me in the beginning, as a dirt biker! For years, I have been able to leave my Bean Ranch Rd property, on or in my OHV of choice, and explore the existing diverse roads and trails, within the area known as The Hunting Grounds. These roads & trails lead to spectacular viewing accesses of the Gunnison River, from the canyon edge. There are also railroad track & tunnel views, and the majestic sites of the Dominguez Canyon Wilderness area and Cactus Park across the river. I have taken many friends and family to see these splendorous sites, when they have visited. I'd also like to include that any specific trail #'s that I do not mention, that are not currently listed as potential closures on Alternatives B or E, I want to remain open. I do not mention trails which I did not find threatened for closure. My desire is for The Hunting Grounds area for the existing roads and trails to remain open and to remain as multi-use. I will also acknowledge the need for protecting precious resources within this area. While attending many meetings leading up to the DRMP being executed, I found it somewhat frustrating, and perhaps aggravating, to learn how many people didn't even know of The Hunting Grounds existence until the D-E NCA designation came and the RMP process that has followed. And I'm just amazed at how now those folks who have newly experienced it, want use specific trails with government rules and regulations to be put into place regarding the do's and don'ts. Then, to hear those folks' comments to recommend adding staging areas, with information kiosks, bathrooms, and improved parking areas is just jaw dropping to me. Prior to the past 4-5 years, very few Mesa County residents and mostly local residents of Bean Ranch Road & Whitewater area had knowledge about The Hunting Grounds zone, and its spectacular BLM recreation opportunities, which currently include multi-use activities on roads and trails. I've come to learn that it was not ok, for the residents who live in that area, who sought land for their homes to be built on, to have driveway access to enjoy activities they love, and not ok to be privy to this area without the rest of Mesa County and beyond knowing also. I guess that goes with "if you build it, they will come" motto. I also find the requests for use specific trails, vs. multi-use, for reason of user conflicts and desire for quiet use trails unnecessary, as if anyone has spent any time in The Hunting Grounds area, you will find this is not a highly used public area, and if you even see other users, it is a minimal and infrequent experience. I do know that the residents who live in that area, want all existing trails to remain open and to multi-use. As we all know, "Alternative A", no change", really isn't a real alternative for this future planning, right? Alternative A would be my first choice for the future of this area. Leave it as it is, because it IS NOT BROKEN! In attempting to navigate the D-E NCA DRMP website, I thought in public meetings, Katie Stevens had said you could click on a trail slated for closure and it would give the reason. I was not successful in finding this resourceful tool, so without that information, my comments continue based on what I see for closure on the maps.

• Route 161 comes to an end at an intersection with two roads that are to be closed. Unless the plan is to continue 161 in another direction, it seems to make more sense to end 161 back at the last view point at: 12 S 722414 4311947 Ending at a view point makes the outing feel worthwhile.

## Route: 1610

### Segment: 1102

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, GUSG –PSD in winter habitat, Sage-Minimize fragmentation

##### Rationale for Decision

- Route was designated to reduce fragmentation in Priority Vegetation types

- Route was designated to protect big game winter range
- Route was designated to minimize fragmentation of Gunnison sage-grouse habitat.
- Route was designated to reduce fragmentation of sagebrush patches

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 1610

- No public comments for this Route

## Route: 1612

### Segment: 1122

#### Designation [?](#)

##### Current Designation

Vehicles under 50" wide

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I moderate
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches >60 acres

#### Rationale

##### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities - specific
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

### Segment: 3037

#### Designation [?](#)

##### Current Designation

Open (All modes of travel)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation access to dispersed campsite
- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **No designation criteria for this route segment.**

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Route: 1613

### Segment: 1109

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, GUSG –PSD in winter habitat, Sage-Minimize fragmentation

##### Rationale for Decision

- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range
- Route was designated to minimize fragmentation of Gunnison sage-grouse habitat.
- Route was designated to reduce fragmentation of sagebrush patches

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Route: 1614

### Segment: 1094

#### Designation ?

##### Current Designation

Vehicles under 50" wide

##### Mitigation Criteria

- Needs Data - Cultural

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- WILDLIFE Elk severe winter range
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Direct impact
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- Recreation:** RMA objectives, Rec opportunities – general
- Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Admin/Permitted Use Only

**Alternative C:** Admin/Permitted Use Only

**Alternative D:** Admin/Permitted Use Only

## Route: 1620

### Segment: 1082

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, GUSG –PSD in winter habitat, Sage-Minimize fragmentation

### Rationale for Decision

- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range

- Route was designated to minimize fragmentation of Gunnison sage-grouse habitat.
- Route was designated to reduce fragmentation of sagebrush patches

## Previous Alternatives Analyzed

- Alternative A:** Open (All modes of travel)
- Alternative B:** Closed (Not Rehabbed)
- Alternative C:** Closed (Rehab)
- Alternative D:** Closed (Rehab)

## Public Comments On Route: 1620

## Route: 163

### Segment: 2658

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- RIPARIAN Riparian 2 stream crossings
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I low
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Minimize Damage:** NHT – close routes for setting, Riparian—ephemeral streams SSR 30 m, Fragile soils SSR
- **Minimize Harassment:** PPSV- Minimize fragmentation

##### Rationale for Decision

- Route was designated to improve natural setting along the Old Spanish National Historic Trail.
- Route was designated to minimize travel routes in and crossing riparian and wetland areas.
- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to reduce fragmentation in Priority Vegetation types

## Route: 1632

### Segment: 1069

#### Designation

##### Current Designation

Foot/Horse

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- WILDLIFE Big game production areas
- WILDLIFE Big game summer concentration areas
- RIPARIAN Riparian 3 stream crossings
- RIPARIAN Riparian crossing perinnial stream
- CULTURAL Cultural Class I moderate
- SMAs Wild and Scenic River area
- DENSITY Route density low in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Foot/Horse

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Not Rehabbed)

**Alternative D:** Foot/Horse

## Public Comments On Route: 1632

- No public comments for this Route

## Route: 1633

## Segment: 1133

### Designation

#### Current Designation

Vehicles under 50" wide

#### Mitigation Criteria

- Reroute
- Cultural

#### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Direct impact
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches >60 acres

### Rationale

#### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

#### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Admin/Permitted Use Only

**Alternative C:** Open, seek re-route or mitigation

• P 126-128 SRMA in Cactus Park. The 1st objective on p 126 puts all of Cactus Park into a SRMA with ATV riding as the main activity in alt E, despite having habitat for the soon to be listed Gunnison sage-grouse in this area. Alt C targets other uses, hiking horseback, back road touring. Either the GUSG habitat could be eliminated from the SRMA, or the ATV routes shown on the current travel map (1633,1605,1608,1571), changed to administrative

• Trail Name: Route 1633 Trail Description (challenges, viewpoints, terrain type, etc.): Click here to enter text. Your historical use/activities (frequency, rock crawling, exploring, testing, photography, camping): Click here to enter text. Why you like this trail (challenges you/vehicle, close to home, wildlife, historic sites, scenic views): Click here to enter text. Benefits you receive by using this trail (exercise, socializing with friends/family, solitude, remoteness): Click here to enter text. Other Comment (what is your desired outcome for this trail, additional ideas to be considered): It makes no sense that this route is marked as closed until mitigated in Alternative D & E, but marked as Admin without any mitigation in Alt. C. If the route can be used as is for administrative uses, this indicates that motorized use can continue while mitigation is planned for. This route should be left open to full-size and all other motorized and non-motorized uses

• Gibbler Gulch/Gibbler Mountain The following are route recommendations for Gibbler Gulch and Gibbler Mountain which together make a nice amount of relatively undisturbed open space and habitat. This area is less roaded and fragmented than other parts of Cactus Park NCA unit. It may be less impacted by grazing than other areas and harbors critical big game habitat. Hoping to send you maps next week showing these areas. In particular I recommend keeping recreational use out of all the creek drainages in the upper Gibbler Gulch area, and closing roads on the adjacent mesas. Putting a motorized or mountain bike route over Gibbler Mountain would irreversibly change the natural quality, silence and solitude of this remote landscape. Lands that are currently undeveloped should stay that way as so much land in the NCA is criss-crossed with routes and trails. For example there is potential for retaining the remote "open space" setting of Gibbler Mountain, as specified in the 2007 Colorado BLM Recreation and Visitor Strategy, by closing 1227(!) (especially), 1269, 1309, 2674, 2673, 1249, 1171, 981, 980, 1150, 1154, 977, 979, 1312, 1310, 1334, 1330, 1344, 1286, 1242, 1213, 1238, 1242, 1204, 1213, 1239, 1214, 1212, 1200, 1263, 1204, 1198, 1187, 1210. Limit motorized traffic to roads 15 and 8. Similarly, there is potential for a large unmotorized area extending west from road 15 and Gibbler Gulch on the east, to road 8 on the west. To create an undisturbed nonmotorized area I recommend closing routes 1526, 2666, 1571, 2665, 1608, 1570, 1605, 1561, 1516, 1606, 1561, 1609, 1633, 2664, 2663, 1412, 1424, 1456, 1434, 1513, 1249, 1269. Many of these are duplicative, serve no purpose, or are dead ends, simply pioneered randomly, and should be closed.

- [ED: Following are the text (in quotes) and the D-E NCA Recreation Planner's interpretation of what the commenter wrote on the maps they submitted during public scoping for the Dominguez RMP. The Rec Planner also identified the route numbers highlighted on the maps]: Routes 741 and 848 "needs ATV connector. Cultural sites can easily be avoided by the 50 foot policy." Routes 26 and 1017 "needs ATV connector." Route 941 "must remain open." Route 1017 "should be ATV route." There should be an "ATV connect" between routes 1198 and 1263. The following text was highlighted in orange "Highlighted routes are routes used often by WSATVA and other ATVs." in addition to all the routes mentioned previously, the following routes were highlighted in orange: 743, 97, 96, 26, 813, 842, 15, 847, 1393, 1192, 1292. [ED: On a second map, the commenter highlighted additional routes]: The following are "routes used often by WSATVA": 1516, 1571, 1605, 1633, 15, 1641, 1221. "SC-5" connecting routes 1605 and 1633 " and "SC-6" connecting routes 1516 and 1605 "need to become new ATV routes connecting these deadends." [ED: A map of the Gibbler Mountain area had additional text and routes]. "Highlighted routes" which "are often used by WSATVA 3 seasons" are as follows: 1235, 1221, 1409, 1310, 1263, 1198, 15. Route 1235 [is or should be] "an ATV route."

## Route: 1634

### Segment: 1054

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Minimize Damage:** Fragile soils SSR
- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, GUSG –PSD in winter habitat

##### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range
- Route was designated to minimize fragmentation of Gunnison sage-grouse habitat.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 1634

- No public comments for this Route

## Route: 1636

### Segment: 1043

#### Designation

##### Current Designation

Open (All modes of travel)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

#### Rationale

##### Designation Criteria

- **No designation criteria for this route segment.**

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Public Comments On Route: 1639

- No public comments for this Route

## Route: 164

### Segment: 2657

#### Designation [?](#)

**Current Designation**  
Closed (Rehab)

#### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

#### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I low
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- Minimize Damage:** NHT – close routes for setting, Riparian—ephemeral streams SSR 30 m, Fragile soils SSR
- Minimize Harassment:** PPSV- Minimize fragmentation

##### Rationale for Decision

- Route was designated to improve natural setting along the Old Spanish National Historic Trail.
- Route was designated to minimize travel routes in and crossing riparian and wetland areas.
- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to reduce fragmentation in Priority Vegetation types

• [ED: Following are the text (in quotes) and the D-E NCA Recreation Planner's interpretation of what the commenter wrote on the maps they submitted during public scoping for the Dominguez RMP. The Rec Planner also identified the route numbers highlighted on the maps]: Routes 741 and 848 "needs ATV connector. Cultural sites can easily be avoided by the 50 foot policy." Routes 26 and 1017 "needs ATV connector." Route 941 "must remain open." Route 1017 "should be ATV route." There should be an "ATV connect"

between routes 1198 and 1263. The following text was highlighted in orange "Highlighted routes are routes used often by WSATVA and other ATVs." in addition to all the routes mentioned previously, the following routes were highlighted in orange: 743, 97, 96, 26, 813, 842, 15, 847, 1393, 1192, 1292. [ED: On a second map, the commenter highlighted additional routes]: The following are "routes used often by WSATVA": 1516, 1571, 1605, 1633, 15, 1641, 1221. "SC-5" connecting routes 1605 and 1633 " and "SC-6" connecting routes 1516 and 1605 "need to become new ATV routes connecting these deadends." [ED: A map of the Gibbler Mountain area had additional text and routes]. "Highlighted routes" which "are often used by WSATVA 3 seasons" are as follows: 1235, 1221, 1409, 1310, 1263, 1198, 15. Route 1235 [is or should be] "an ATV route."

## Route: 1642

### Segment: 1038

#### Designation [?](#)

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

#### Rationale

##### Designation Criteria

- Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, GUSG –PSD in winter habitat

##### Rationale for Decision

- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range
- Route was designated to minimize fragmentation of Gunnison sage-grouse habitat.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 1642

- No public comments for this Route

## Route: 1645

### Segment: 1048

#### Designation [?](#)

##### Current Designation

Foot/Horse

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- WILDLIFE Big game production areas
- WILDLIFE Big game summer concentration areas
- RIPARIAN Riparian 1 stream crossing
- RIPARIAN Riparian crossing perennial stream
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I moderate
- SMAs Wild and Scenic River area
- DENSITY Route density low in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Foot/Horse

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Not Rehabbed)

## Public Comments On Route: 1645

- No public comments for this Route

## Route: 1646

### Segment: 1027

#### Designation [?](#)

##### Current Designation

Open (All modes of travel)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

#### Rationale

##### Designation Criteria

- **No designation criteria for this route segment.**

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Open (All modes of travel)

**Alternative D:** Open (All modes of travel)

## Public Comments On Route: 1646

- No public comments for this Route

## Route: 1647

### Segment: 1029

#### Designation [?](#)

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I high
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

#### Rationale

##### Designation Criteria

- **Minimize Damage:** Fragile soils SSR
- **Minimize Harassment:** PPSV- Minimize fragmentation, GUSG –PSD in winter habitat, Big game winter range – close

##### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to minimize fragmentation of Gunnison sage-grouse habitat.
- Route was designated to protect big game winter range

#### Previous Alternatives Analyzed

The following high value recreational routes/roads are legal ROW's in the State of Colorado, Delta County, and the BLM does not have the jurisdiction to close them: 3011, 2184, 2191, 3100, 2187, 2026, 2059, 2188, 2192, 3104, 2130, 3009, 2199, 2200, 2111, 2223, 2024, 3006, 2231, 3094, 2579, 2210, 2344, 2243, 2249, 2248, 3074, 2354, 2384, 2296, 2295, 2287, 2304, 2062, 2163, 3163, 2164, 2430, 4006, 3016, 2351, 3140, 2410, 4008, 2324, 2073, 2306, 2459, 3192, 3193, 2350, 2443, 2035, 2336, 2495, 2491, 2159, 3058, 2277, 2465, 2467, 3189, 2472, 2297, 2006, 2265, 2271, 2276, 2135, 2139, 3053, 2489, 3033, 3057, 2031, 2276, 2210, 2579, 2136, 2344, 3164, 2400, 2379, 3014, 2365, 3116, 2251, 2259, 2149, 2153, 2146, 2144, 2145, 2356, 2257, 2048, 2358, 3165, and 3166.

## Route: 1648

### Segment: 1024

#### Designation [?](#)

##### Current Designation

Open (All modes of travel)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation access to dispersed campsite
- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I high
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

#### Rationale

##### Designation Criteria

- No designation criteria for this route segment.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Open (All modes of travel)

**Alternative D:** Open (All modes of travel)

## Public Comments On Route: 1648

- No public comments for this Route

## Route: 165

### Segment: 2655

#### Designation [?](#)

##### Current Designation

Foot/Horse/Mechanized/Motorcycle

##### Mitigation Criteria

- Reroute
- Needs Data - SSS Plants
- Drainage Crossing
- Reroute trail out of drainage.

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands

- RECREATION Recreation access for the Old Spanish National Historic Trail
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I low
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- Recreation:** RMA objectives, Rec opportunities – general
- Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Vehicles under 50" wide

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

### Current Designation

Closed (Rehab)

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation access to dispersed campsite
- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I high
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

## Rationale

### Designation Criteria

- Minimize Damage:** Fragile soils SSR
- Minimize Harassment:** PPSV- Minimize fragmentation, GUSG –PSD in winter habitat, Big game winter range – close

### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to minimize fragmentation of Gunnison sage-grouse habitat.
- Route was designated to protect big game winter range

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 1650

The following high value recreational routes/roads are legal RS 2477ROW's in the State of Colorado, Delta County, and the BLM does not have the jurisdiction to close them: 3011, 2184, 2191, 3100, 2187, 2026, 2059, 2188, 2192, 3104, 2130, 3009, 2199, 2200, 2111, 2223, 2024, 3006, 2231, 3094, 2579, 2210, 2344, 2243, 2249, 2248, 3074, 2354, 2384, 2296, 2295, 2287, 2304, 2062, 2163, 3163, 2164, 2430, 4006, 3016, 2351, 3140, 2410, 4008, 2324, 2073, 2306, 2459, 3192, 3193, 2350, 2443, 2035, 2336, 2495, 2491, 2159, 3058, 2277, 2465, 2467, 3189, 2472, 2297, 2006, 2265, 2271, 2276, 2135, 2139, 3053, 2489, 3033, 3057, 2031, 2276, 2210, 2579, 2136, 2344, 3164, 2400, 2379, 3014, 2365, 3116, 2251, 2259, 2149, 2153, 2146, 2144, 2145, 2356, 2257, 2048, 2358, 3165, and 3166.

## Route: 1669

### Segment: 1032

#### Designation

##### Current Designation

Admin/Permitted Use Only

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk winter concentration areas
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I high
- DENSITY Route density low in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches <60 acres

#### Rationale

##### Designation Criteria

- **Minimize Damage:** Fragile soils SSR, Riparian—ephemeral streams SSR 30 m
- **Minimize Harassment:** PPSV- Minimize fragmentation, Bighorn – SSR -- summer range, Big game winter range – close

##### Rationale for Decision

- Route was designated to ensure access to rights-of-way, private property, and livestock grazing facilities.

#### Previous Alternatives Analyzed

**Alternative A:** Closed (Not Rehabbed)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Not Rehabbed)

**Alternative D:** Open (All modes of travel)

## Public Comments On Route: 1669

## Route: 167

### Segment: 2649

#### Designation

## Current Designation

Open (All modes of travel)

## Mitigation Criteria

- No Mitigation Criteria for this Route Segment

## Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general, Rec opportunities - specific

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Admin/Permitted Use Only

**Alternative C:** Admin/Permitted Use Only

**Alternative D:** Open, seek re-route or mitigation

## Public Comments On Route: 167

- No public comments for this Route

## Route: 1670

### Segment: 996

## Designation

### Current Designation

Open (All modes of travel)

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

## Rationale

### Designation Criteria

- **No designation criteria for this route segment.**

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Admin/Permitted Use Only

**Alternative C:** Open (All modes of travel)

**Alternative D:** Open (All modes of travel)

- No public comments for this Route

## Route: 1671

### Segment: 984

## Designation

### Current Designation

Closed (Rehab)

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches >60 acres

## Rationale

### Designation Criteria

- **Minimize Damage:** Fragile soils SSR
- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, GUSG –PSD in winter habitat, Sage-Minimize fragmentation

### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range
- Route was designated to minimize fragmentation of Gunnison sage-grouse habitat.
- Route was designated to reduce fragmentation of sagebrush patches

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Elk severe winter range
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I moderate
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Minimize Damage:** Fragile soils SSR
- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, GUSG –PSD in winter habitat, Sage-Minimize fragmentation

##### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range
- Route was designated to minimize fragmentation of Gunnison sage-grouse habitat.
- Route was designated to reduce fragmentation of sagebrush patches

• Road 168: This road leads to a unique lookout with a beautiful view of Kannah Creek meeting the Gunnison. In the summer we travel this road by ATV, and in the winter's cold we travel this frozen road in a Jeep. We've been out to this point three times in the last 9 months always with friends or neighbors. It is a great destination in a Jeep for a sunny, winter afternoon wiener roast. Once again, with all the above as background, I recommend that road 168 remain open to Jeeps. Access to 168 is by roads 196 and a portion of 183. From the junction of 236 and 254 use 196. Connect to the northern portion of 183 which is between 196 and 168. I recommend that 196 and the northern portion of 183 remain open to Jeeps. I do support the ATV designation for 183 south of the 183/196 junction. I also support the ATV designation for 255 along the rim north of its junction with 254.

## Route: 1687

### Segment: 977

#### Designation [?](#)

##### Current Designation

Open (All modes of travel)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk winter concentration areas
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I high
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches <60 acres

#### Rationale

##### Designation Criteria

- No designation criteria for this route segment.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open (All modes of travel)

**Alternative C:** Open (All modes of travel)

**Alternative D:** Open (All modes of travel)

## Public Comments On Route: 1687

- No public comments for this Route

## Route: 1688

### Segment: 976

#### Designation [?](#)

##### Current Designation

Vehicles under 50" wide

##### Mitigation Criteria

- Consider rerouting to edge of sagebrush

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- RIPARIAN Riparian 1 stream crossing
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I high
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches <60 acres

#### Rationale

##### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed, seek re-route or mitigation

The following high value recreational routes/roads are legal RS 2477ROW's in the State of Colorado, Delta County, and the BLM does not have the jurisdiction to close them: 3011, 2184, 2191, 3100, 2187, 2026, 2059, 2188, 2192, 3104, 2130, 3009, 2199, 2200, 2111, 2223, 2024, 3006, 2231, 3094, 2579, 2210, 2344, 2243, 2249, 2248, 3074, 2354, 2384, 2296, 2295, 2287, 2304, 2062, 2163, 3163, 2164, 2430, 4006, 3016, 2351, 3140, 2410, 4008, 2324, 2073, 2306, 2459, 3192, 3193, 2350, 2443, 2035, 2336, 2495, 2491, 2159, 3058, 2277, 2465, 2467, 3189, 2472, 2297, 2006, 2265, 2271, 2276, 2135, 2139, 3053, 2489, 3033, 3057, 2031, 2276, 2210, 2579, 2136, 2344, 3164, 2400, 2379, 3014, 2365, 3116, 2251, 2259, 2149, 2153, 2146, 2144, 2145, 2356, 2257, 2048, 2358, 3165, and 3166.

## Route: 1689

### Segment: 958

#### Designation

##### Current Designation

Open (All modes of travel)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk winter concentration areas
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I high
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- No designation criteria for this route segment.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open (All modes of travel)

**Alternative C:** Open (All modes of travel)

**Alternative D:** Open (All modes of travel)

## Public Comments On Route: 1689

- No public comments for this Route

## Route: 169

### Segment: 2989

#### Designation

##### Current Designation

Admin/Permitted Use Only

##### Designation Following Mitigation

Open (All modes of travel)

##### Mitigation Criteria

- Work with Land Owner on Public Access
- Work with Land Owner on Right of Way

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- CULTURAL Cultural Class I low
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- No designation criteria for this route segment.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

• Pages 115-118 Hunting GroundAt a couple of the Advisory Council meetings the owner of the land that abuts 178 and 169 said that they welcomed people crossing their property to get on the NCA. The BLM should work with the property owner to establish a long-term agreement that gives public access along this route. If the owner is not willing to give permanent easement then perhaps they would consider a 20 year optionally renewable easement that would last the life of the RMP.

## Route: 1690

### Segment: 961

#### Designation

##### Current Designation

Open (All modes of travel)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation access to dispersed campsite

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- WILDLIFE Elk severe winter range
- RIPARIAN Riparian 1 stream crossing
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I high
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches <60 acres

## Rationale

### Designation Criteria

- No designation criteria for this route segment.

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Admin/Permitted Use Only

**Alternative C:** Open, seek re-route or mitigation

**Alternative D:** Open (All modes of travel)

## Public Comments On Route: 1690

- No public comments for this Route

## Route: 1691

### Segment: 960

## Designation ?

### Current Designation

Open (All modes of travel)

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- WILDLIFE Elk severe winter range

## Public Comments On Route: 1691

- No public comments for this Route

## Route: 1692

### Segment: 978

## Designation ?

### Current Designation

Closed (Rehab)

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Elk severe winter range
- RIPARIAN Riparian 3 stream crossings
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I high
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches <60 acres

## Rationale

### Designation Criteria

- Minimize Damage:** Riparian—ephemeral streams SSR 30 m
- Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, GUSG –PSD in winter habitat, Sage-Minimize fragmentation

### Rationale for Decision

- Route was designated to minimize travel routes in and crossing riparian and wetland areas.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range
- Route was designated to minimize fragmentation of Gunnison sage-grouse habitat.
- Route was designated to reduce fragmentation of sagebrush patches

## Previous Alternatives Analyzed

## Route: 1693

### Segment: 965

### Designation ?

#### Current Designation

Admin/Permitted Use Only

#### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

#### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I high
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

## Rationale

### Designation Criteria

- **Minimize Damage:** Fragile soils SSR
- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, GUSG –PSD in winter habitat

### Rationale for Decision

- Route was designated to ensure access to rights-of-way, private property, and livestock grazing facilities.

### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Admin/Permitted Use Only

**Alternative C:** Admin/Permitted Use Only

**Alternative D:** Admin/Permitted Use Only

### Public Comments On Route: 1693

- No public comments for this Route

### Route: 1694

#### Segment: 966

### Designation ?

#### Current Designation

Closed (Rehab)

#### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

#### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I high
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

### Rationale

#### Designation Criteria

- **Minimize Damage:** Fragile soils SSR
- **Minimize Harassment:** Sage-Minimize fragmentation, PPSV- Minimize fragmentation, Big game winter range – close, GUSG –PSD in winter habitat

#### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to reduce fragmentation of sagebrush patches
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range
- Route was designated to minimize fragmentation of Gunnison sage-grouse habitat.

### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

### Public Comments On Route: 1694

- No public comments for this Route

### Route: 1696

#### Segment: 971

### Designation ?

#### Current Designation

Closed (Rehab)

#### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

#### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- RIPARIAN Riparian 1 stream crossing
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I high
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

- VEGETATION Sagebrush patches <60 acres

## Rationale

### Designation Criteria

- **Minimize Damage:** Fragile soils SSR, Riparian—ephemeral streams SSR 30 m
- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, Sage-Minimize fragmentation

### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to minimize travel routes in and crossing riparian and wetland areas.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range
- Route was designated to reduce fragmentation of sagebrush patches

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

• [Wagon Park] The user-created connector that links 1783 and 1792 should be closed to keep traffic on main roads, reduce wildlife impacts and create habitat security, and limit the spread of hard-to-enforce motorized and mountain bike use

## Route: 17

### Segment: 2008

#### Designation

##### Current Designation

Vehicles under 50" wide

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Indirect impact
- SMAs Gibbler Mountain ACEC
- DENSITY Route density highest in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Vehicles under 50" wide

**Alternative C:** Closed (Rehab)

Comment ID: 00000106-110

• o The Gibbler Mountain ACEC as shown on map 2-5E does not encompass the mountain itself but only its northern slopes. I would prefer to see a non-motorized/non-mechanized ACEC for the whole of Gibbler Mountain and its surrounding slopes, bounded by the routes: 1235-1236-1228-1409-1221-15-8-887-18-17-945-547-951-959-966-969-1005-1006-1021-1022-1023-1024-1047-1150-1249, with 1269 left open to motorized use as a motorized cherry-stemmed route into the area. This would keep this wonderful roadless area (though too small a space for the inventory) roadless into the future. The text on page 871 indicates the area has one of the "best known" populations of the rare plant Grand Junction milkvetch as well as a large collection of fragile dinosaur tracks. The Special Species map from the Open House needs to be updated with this GJ milkvetch population. This ACEC representing a hole in the SRMA would properly protect all three features: roadless-ness, dinosaur tracks, and GJ milkvetch, at the cost of less than 5000 acres. This protection is consistent with this being a National Conservation Area and not a National Recreation Area. This position also has support from the D-E NCA Advisory Council. I recently hiked up to the top of the northern portion of Gibbler Mountain with a friend. We were inspired by the challenging terrain for hiking and the awesome views (photo IMG\_9998). We both had a great feeling of accomplishment when we reached the top. There is plenty of evidence of big game animals using the Gibbler Mountain as a quiet sanctuary from the surrounding motorized areas. This proposed ACEC would benefit them.

Organization, commenter: Quiet Trails Group, Sherry Schenk

Comment ID: 00000115-32

Gibbler Mountain Area of Critical Environmental Concern: The QTG supports Gibbler Mtn ACEC from Alt D because protections are needed for the myriad of resources found here, especially if it is going to be located within an SRMA focused on motorized use. Further, we think the ACEC should be extended to include all of Gibbler Mountain. Surface-disturbance limitations and a rule of no motorized use should be included for the full ACEC, including this recommended expansion. With this expansion the full ACEC would be bounded by: Routes: 1235-1236-1228-1409-1221-15-8-887-18-17-945-947-951-954-959-962-966-969-1005-1006-1021-1022-1023-1024-1047-1150-1249-8, with 1269, and 1173-1174-1198-1200-1193 cherry-stemmed into the area. The reasons we support this designation are as follows: Roadless areas are an endangered resource in the high-desert west. Categorically, roadless areas especially within NCAs- should be protected as such. By making it a larger area not only does it protect this roadless area but also it better disguises the location of the dinosaur tracks and fossils which we see from page 872," are regionally significant and easily damaged". Per page 871, "This site also supports one of the best known occurrences (A-ranked) of Grand Junction milkvetch (*Astragalus linifolius*), a globally vulnerable plant (G3/S3) and a BLM sensitive plant species."o Map 3-13 needs to be updated to show the presence of Grand Junction milkvetch and Colorado Hookless cactus as the text on page 871 indicates both are present in this area. A recent hike in this area shows prolific big game use in the area, we assume it is their refuge from surrounding motorized use. Recent hikes have confirmed the presence of Ponderosa Pine atop Gibbler Mtn. This designation would aid in increasing the number of healthy Ponderosa Pines within the NCA, an action which would be in accordance with the Alternative E management objective on page 52. o Map 3-3 needs to be updated to reference the presence of Ponderosa Pine in this area. The designation of this expanded ACEC in the final plan, would address the need for non-motorized trails in this portion of the NCA, an opportunity currently missing from the draft plan. And to reiterate, these protections are needed for the myriad of resources found here, especially because they are to be located within an SRMA focused on motorized use

## Route: 170

### Segment: 2644

#### Designation [?](#)

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- RIPARIAN Riparian 1 stream crossing
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I low
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- Minimize Damage:** NHT – close routes for setting, SS Plants-SSR within 100m, Riparian—ephemeral streams SSR 30 m
- Minimize Harassment:** PPSV- Minimize fragmentation

##### Rationale for Decision

- Route was designated to improve natural setting along the Old Spanish National Historic Trail.
- Route was designated to protect and enhance special status fish, wildlife, and plant populations.
- Route was designated to minimize travel routes in and crossing riparian and wetland areas.
- Route was designated to reduce fragmentation in Priority Vegetation types

#### Previous Alternatives Analyzed

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I high
- DENSITY Route density medium in Alt A
- DENSITY Route density medium in Alt E
- VEGETATION Sagebrush patches >60 acres

#### Rationale

##### Designation Criteria

- Minimize Damage:** Fragile soils SSR
- Minimize Harassment:** Sage-Minimize fragmentation, PPSV- Minimize fragmentation, Big game winter range – close, GUSG –PSD in winter habitat

##### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.

- Route was designated to reduce fragmentation of sagebrush patches
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range
- Route was designated to minimize fragmentation of Gunnison sage-grouse habitat.

#### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I high
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches >60 acres

## Rationale

### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

- Alternative B:** Closed (Not Rehabbed)
- Alternative C:** Closed (Rehab)
- Alternative D:** Closed, seek re-route or mitigation

## Public Comments On Route: 1710

- No public comments for this Route

## Route: 1713

### Segment: 931

#### Designation

**Current Designation**  
Open (All modes of travel)

#### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

#### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- CULTURAL Cultural Class I high
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches >60 acres

#### Rationale

##### Designation Criteria

- No designation criteria for this route segment.**

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open (All modes of travel)

**Alternative C:** Open (All modes of travel)

- No public comments for this Route

## Route: 1715

### Segment: 944

#### Designation

**Current Designation**  
Closed (Rehab)

#### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

#### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I high
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches >60 acres

#### Rationale

##### Designation Criteria

- Minimize Damage:** Fragile soils SSR
- Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close, GUSG –PSD in winter habitat

##### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range
- Route was designated to minimize fragmentation of Gunnison sage-grouse habitat.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

## Route: 172

### Segment: 2637

#### Designation [?](#)

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- RIPARIAN Riparian 1 stream crossing
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I low
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Minimize Damage:** NHT – close routes for setting, SS Plants-SSR within 100m, Riparian—ephemeral streams SSR 30 m
- **Minimize Harassment:** PPSV- Minimize fragmentation

##### Rationale for Decision

- Route was designated to improve natural setting along the Old Spanish National Historic Trail.
- Route was designated to protect and enhance special status fish, wildlife, and plant populations.
- Route was designated to minimize travel routes in and crossing riparian and wetland areas.

- Route was designated to reduce fragmentation in Priority Vegetation types

## Route: 1721

### Segment: 973

#### Designation

##### Current Designation

Foot/Horse

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- RIPARIAN Riparian 1 stream crossing
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I low
- DENSITY Route density low in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Foot/Horse

**Alternative B:** Closed (Not Rehabbed)

## Route: 1723

### Segment: 929

#### Designation ?

##### Current Designation

Admin/Permitted Use Only

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- CULTURAL Cultural Class I high
- SMAs Wild and Scenic River area
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches >60 acres

#### Rationale

##### Designation Criteria

- **Minimize Damage:** Fragile soils SSR
- **Minimize Harassment:** PPSV- Minimize fragmentation

##### Rationale for Decision

- Route was designated to ensure access to rights-of-way, private property, and livestock grazing facilities.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Admin/Permitted Use Only

**Alternative C:** Admin/Permitted Use Only

**Alternative D:** Admin/Permitted Use Only

## Public Comments On Route: 1723

- No public comments for this Route

## Route: 1725

### Segment: 913

#### Designation ?

##### Current Designation

Open (All modes of travel)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation access to dispersed campsite
- RECREATION Recreation opportunities for access to and across federal lands
- CULTURAL Cultural Class I high

- SMAs Wild and Scenic River area
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- **No designation criteria for this route segment.**

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open (All modes of travel)

Comment ID: 000000168-4

- Cactus ParkNew trail construction on very top of NE ridge above Cactus Park. It would connect 738 to 998 crossing 26 midway and would also make a great hiking trail with amazing views in both directions.We [COPMOBA]agree with 1728 and 1725 as accessible for mountain bike due to the trail being managed as such after crossing National Forest land boundary

## Route: 1726

### Segment: 924

## Designation [?](#)

### Current Designation

Vehicles under 50" wide

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk winter concentration areas
- WILDLIFE Elk severe winter range
- RIPARIAN Riparian 1 stream crossing
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I high
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

• The following high value recreational routes/roads are legal RS 2477 ROW's in the State of Colorado, Mesa County and the BLM does not have the jurisdiction to close them: 500, 472, 518, 521, 530, 39, 127, 572, 566, 66, 65, 148, 71, 74, 587, 595, 608, 622, 628, 635, 624, 609, 611, 706, 678, 700, 719, 726, 696, 26, 936, 847, 849, 919, 767, 824, 96, 822, 817, 950, 1021, 900, 2682, 1020, 1003, 1084, 1142, 1184, 1156, 1198, 1349, 1308, 1310, 1238, 1263, 1122, 1170, 1192, 974, 941, 1076, 1039, 1018, 1759, 1764, 1758, 1174, 1788, 1798, 1669, 1699, 1773, 1755, 1779, 1750, 1751, 1792, 1720, 1726, 1727, 1720, 1722, 1803, 1805, 1809, 1614, 1609, 1605, 1608, 1571, 1526, 1516, 1448, 755, 807, 900, 10, 48, 924, 950, 1005, 965, 8, 1115, 981, 984, 1135, 2678, 1249, 1171, 1150, 1249, 1320, 1235, 1236, 1228, 1227, 1409, 1456, 1349, 1308, 1513, 1221, 1550, 1567, 1641, 1612, 1740, 1688, 2597, 2598, 2601, 2440, 3160, 3162, 2089, 2166, 2170, 2596, 2171, 2003, 2122, 2126, 2189, 3145, 2182, 2179, 2178, 3143, 2181, 2121, 2122, 2168, 2126, 2180, 2095, 2173, 2174, 2620, 2129, 1686, 1692, 1667, 1647, 1631, 1613, 1596, 1549, 1541, 2647, 1633, 1605, 1608, 1571, 2645, 1507, 1448, 1496, 1516, 1504, 1510, 1508, 1509, 439, 431, 456, 461, 460, 391, 423, 415, 419, 407, 402, 367, 372, 339, 298, 338, 105, 368, 374, 393, 389, 390, 376, 377, 351, 350, 121, 345, 320, 301, 251, 234, 232, 205, 344, 107, 103, 152, 153, 161, 168, 3199, 188, 196, 255, 254, 236, 294, 242, 219, 201, 169, 162, 158, 160, 173. The following high value recreational routes/roads are legal RS 2477ROW's in the State of Colorado, Delta County, and the BLM does not have the jurisdiction to close them: 3011, 2184, 2191, 3100, 2187, 2026, 2059, 2188, 2192, 3104, 2130, 3009, 2199, 2200, 2111, 2223, 2024, 3006, 2231, 3094, 2579, 2210, 2344, 2243, 2249, 2248, 3074, 2354, 2384, 2296, 2295, 2287, 2304, 2062, 2163, 3163, 2164, 2430, 4006, 3016, 2351, 3140, 2410, 4008, 2324, 2073, 2306, 2459, 3192, 3193, 2350, 2443, 2035, 2336, 2495, 2491, 2159, 3058, 2277, 2465, 2467, 3189, 2472, 2297, 2006, 2265, 2271, 2276, 2135, 2139, 3053, 2489, 3033, 3057, 2031, 2276, 2210, 2579, 2136, 2344, 3164, 2400, 2379, 3014, 2365, 3116, 2251, 2259, 2149, 2153, 2146, 2144, 2145, 2356, 2257, 2048, 2358, 3165, and 3166.

## Route: 1727

### Segment: 918

#### Designation

##### Current Designation

Vehicles under 50" wide

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk winter concentration areas
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I high
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Admin/Permitted Use Only

**Alternative C:** Admin/Permitted Use Only

**Alternative D:** Open (All modes of travel)

• The following high value recreational routes/roads are legal ROW's in the State of Colorado, Mesa County and the BLM does not have the jurisdiction to close them: 500, 472, 518, 521, 530, 39, 127, 572, 566, 66, 65, 148, 71, 74, 587, 595, 608, 622, 628, 635, 624, 609, 611, 706, 678, 700, 719, 726, 696, 26, 936, 847, 849, 919, 767, 824, 96, 822, 817, 950, 1021, 900, 2682, 1020, 1003, 1084, 1142, 1184, 1156, 1198, 1349, 1308, 1310, 1238, 1263, 1122, 1170, 1192, 974, 941, 1076, 1039, 1018, 1759, 1764, 1758, 1174, 1788, 1798, 1669, 1699, 1773, 1755, 1779, 1750, 1751, 1792, 1720, 1726, 1727, 1720, 1722, 1803, 1805, 1809, 1614, 1609, 1605, 1608, 1571, 1526, 1516, 1448, 755, 807, 900, 10, 48, 924, 950, 1005, 965, 8, 1115, 981, 984, 1135, 2678, 1249, 1171, 1150, 1249, 1320, 1235, 1236, 1228, 1227, 1409, 1456, 1349, 1308, 1513, 1221, 1550, 1567, 1641, 1612, 1740, 1688, 2597, 2598, 2601, 2440, 3160, 3162, 2089, 2166, 2170, 2596, 2171, 2003, 2122, 2126, 2189, 3145, 2182, 2179, 2178, 3143, 2181, 2121, 2122, 2168, 2126, 2180, 2095, 2173, 2174, 2620, 2129, 1686, 1692, 1667, 1647, 1631, 1613, 1596, 1549, 1541, 2647, 1633, 1605, 1608, 1571, 2645, 1507, 1448, 1496, 1516, 1504, 1510, 1508, 1509, 439, 431, 456, 461, 460, 391, 423, 415, 419, 407, 402, 367, 372, 339, 298, 338, 105, 368, 374, 393, 389, 390, 376, 377, 351, 350, 121, 345, 320, 301, 251, 234, 232, 205, 344, 107, 103, 152, 153, 161, 168, 3199, 188, 196, 255, 254, 236, 294, 242, 219, 201, 169, 162, 158, 160, 173. The following high value recreational routes/roads are legal ROW's in the State of Colorado, Delta County, and the BLM does not have the jurisdiction to close them: 3011, 2184, 2191, 3100, 2187, 2026, 2059, 2188, 2192, 3104, 2130, 3009, 2199, 2200, 2111, 2223, 2024, 3006, 2231, 3094, 2579, 2210, 2344, 2243, 2249, 2248, 3074, 2354, 2384, 2296, 2295, 2287, 2304, 2062, 2163, 3163, 2164, 2430, 4006, 3016, 2351, 3140, 2410, 4008, 2324, 2073, 2306, 2459, 3192, 3193, 2350, 2443, 2035, 2336, 2495, 2491, 2159, 3058, 2277, 2465, 2467, 3189, 2472, 2297, 2006, 2265, 2271, 2276, 2135, 2139, 3053, 2489, 3033, 3057, 2031, 2276, 2210, 2579, 2136, 2344, 3164, 2400, 2379, 3014, 2365, 3116, 2251, 2259, 2149, 2153, 2146, 2144, 2145, 2356, 2257, 2048, 2358, 3165, and 3166.

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 00000135-4

• we appreciate the route closures in the preferred alternative. However, as you will see in our attached 2011 route-specific comments, we are concerned about the routes left open in the draft TMP that we and others had recommended for closure, in particular: o The two ATV trails (Numbers 3162/2089/2166, and 2596/2171/2003) in the Dominguez Addition Unit that need to be closed a) to protect this unit and b) to prevent the likelihood of incursions into the Dominguez wilderness, due to remote, unmanageable and unenforceable terrain. o Palmer Gulch road #2169/2170, needs to be closed. o Road #2181 needs to be closed to OHVs. o 1778/1727 o 1782/1768/2602 in Sawmill Mesa and Wagon Park zonos 1756 should be closed at the junction with 1758, and include closure of roads 1593 and 1585

Organization, commenter: Backcountry Hunters and Anglers, Craig Grother

Comment ID: 00000156-21

• Within the Sawmill Mesa and Wagon Park mixed-use areas, we recommend the following modifications to the preferred alternative to improve big game habitat effectiveness and the quality of traditional big game hunting and non-motorized recreation opportunities within these areas. Close and obliterate spur roads 1782/1768/2602 located on the rim of the Big Dominguez Canyon. This road does not access any wilderness trailheads or serve any other purpose we know of. We also do not understand why road 1756 was left open half way down the ridge instead of just closing the entire length of the route. This road should be closed at the junction with 1758, and include closure of roads 1593 and 1585 as shown in the preferred alternative. We would also like to see road 1778/1727 down Wildhorse Draw closed to motorized vehicles and retained as a non-motorized trail. Closing this route to motorized vehicles would also enhance big game habitat effectiveness and provide a high quality backcountry hunting area.

## Route: 1728

### Segment: 907

#### Designation

##### Current Designation

Foot/Horse

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation access to dispersed campsite
- RECREATION Recreation opportunities for access to and across federal lands
- RIPARIAN Riparian crossing perinial stream
- CULTURAL Cultural Class I high
- SMAs Wild and Scenic River area
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Recreation:** Rec opportunities - specific
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Foot/Horse

**Alternative C:** Foot/Horse

**Alternative D:** Foot/Horse

## Public Comments On Route: 1728

Organization, commenter: COPMOBA, Scott Winans

Comment ID: 000000168-4

- Cactus ParkNew trail construction on very top of NE ridge above Cactus Park. It would connect 738 to 998 crossing 26 midway and would also make a great hiking trail with amazing views in both directions.We [COPMOBA]agree with 1728 and 1725 as accessible for mountain bike due to the trail being managed as such after crossing National Forest land boundary

## Route: 173

### Segment: 2647

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- RIPARIAN Riparian 2 stream crossings
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I low
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Minimize Damage:** NHT – close routes for setting, Riparian—ephemeral streams SSR 30 m, Fragile soils SSR
- **Minimize Harassment:** PPSV- Minimize fragmentation

##### Rationale for Decision

- Route was designated to improve natural setting along the Old Spanish National Historic Trail.
- Route was designated to minimize travel routes in and crossing riparian and wetland areas.
- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to reduce fragmentation in Priority Vegetation types

## Previous Alternatives Analyzed

**Alternative A:** Vehicles under 50" wide

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

## Public Comments On Route: 1734

Organization, commenter: Quiet Trails Group, Sherry Schenk

Comment ID: 000000115-4

- Route Density Reductions: Maintaining a rural, western setting is critical to all recreational experiences within the NCA and to the legacy of this landscape. As such, we strongly support the elimination of redundant routes proposed in the preferred alternative.d. Non-Motorized Trail Network: We would like to see a network of non-motorized trails located throughout the NCA and are pleased that for the most part this desire is accommodated in BLM's preferred alternative whether it is through language indicating the future development of non-motorized routes or the designation of some existing routes as non-motorized in the draft Travel Plan. We fully recognize that this NCA is multiple-use in nature and so acknowledge that in many instances recreationists will need to collectively share routes, however the quality of our experience is greatly enhanced by having some routes located in quiet-settings. oTo elaborate, we envision that this system will include some routes which are shared with motorized users and which provide connectivity to segments located within entirely quiet settings or to segments in semi-quiet areas in which motorized routes may run in parallel. Further, we envision that this network will provide opportunities for non-motorized single-day excursions in addition to non-motorized multi-day excursions!o As a quick example, we are very pleased with the Ninemile Hill ERMA which is included in the preferred alternative. Targeted activities include horseback riding, hiking and dispersed camping. Future trail development will be non-motorized and we are very excited about the quiet, day-use opportunities to be found here (not to mention theintro-to backpacking/horsepacking' which the ERMA can provide, assuming of course that some of the designated campsites are only accessible from non-motorized routes!). However we also recognize and respect the need for, and management of, some continued motorized access in this region and we are happy to accommodate motorized use on those routes suggested in the preferred alternative.o On the other hand, we are

concerned about the lack of designated and future non-motorized routes within the Cactus Park SRMA as it represents about 13% of the NCA and only includes two short non-motorized routes in Alternative E. (Route 786 near Gunnison Gravels - is about .15 miles long and Route 1734 (near High Park) is about .21 miles long - for a total of about 1/3 of a mile of non-motorized routes.) See pages 9 and 10 for some proposals to address this deficiency.

## Route: 1735

## Route: 1741

### Segment: 938

#### Designation

##### Current Designation

Foot/Horse

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- RIPARIAN Riparian 1 stream crossing
- RIPARIAN Riparian crossing perennial stream
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I high
- SMAs Wild and Scenic River area
- DENSITY Route density low in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Foot/Horse

**Alternative B:** Foot/Horse

**Alternative C:** Foot/Horse

**Alternative D:** Foot/Horse

## Public Comments On Route: 1741

- No public comments for this Route

## Route: 1744

### Segment: 867

#### Designation

##### Current Designation

Open, seek re-route or mitigation

##### Mitigation Criteria

- Riparian

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- RIPARIAN Riparian crossing perennial stream
- CULTURAL Cultural Class I high
- SMAs Wild and Scenic River area
- DENSITY Route density low in Alt A
- DENSITY Route density low in Alt E

#### Rationale

### Designation Criteria

- No designation criteria for this route segment.

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Route: 1749

### Segment: 919

## Designation

### Current Designation

Foot/Horse

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands

- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- RIPARIAN Riparian 5 stream crossings
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I moderate
- DENSITY Route density low in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches <60 acres

## Rationale

### Designation Criteria

- Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Foot/Horse

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Not Rehabbed)

**Alternative D:** Foot/Horse

## Public Comments On Route: 1749

- No public comments for this Route

## Route: 175

### Segment: 2652

## Designation

### Current Designation

Closed (Rehab)

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- Minimize Damage:** NHT – close routes for setting
- Minimize Harassment:** PPSV- Minimize fragmentation

### Rationale for Decision

- Route was designated to improve natural setting along the Old Spanish National Historic Trail.
- Route was designated to reduce fragmentation in Priority Vegetation types

## Previous Alternatives Analyzed

**Alternative A:** Vehicles under 50" wide

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 175

The following high value recreational routes/roads are legal RS 2477ROW's in the State of Colorado, Delta County, and the BLM does not have the jurisdiction to close them: 3011, 2184, 2191, 3100, 2187, 2026, 2059, 2188, 2192, 3104, 2130, 3009, 2199, 2200, 2111, 2223, 2024, 3006, 2231, 3094, 2579, 2210, 2344, 2243, 2249, 2248, 3074, 2354, 2384, 2296, 2295, 2287, 2304, 2062, 2163, 3163, 2164, 2430, 4006, 3016, 2351, 3140, 2410, 4008, 2324, 2073, 2306, 2459, 3192, 3193, 2350, 2443, 2035, 2336, 2495, 2491, 2159, 3058, 2277, 2465, 2467, 3189, 2472, 2297, 2006, 2265, 2271, 2276, 2135, 2139, 3053, 2489, 3033, 3057, 2031, 2276, 2210, 2579, 2136, 2344, 3164, 2400, 2379, 3014, 2365, 3116, 2251, 2259, 2149, 2153, 2146, 2144, 2145, 2356, 2257, 2048, 2358, 3165, and 3166.

## Route: 1751

### Segment: 869

## Designation

### Current Designation

Admin/Permitted Use Only

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk winter concentration areas
- WILDLIFE Elk severe winter range
- RIPARIAN Riparian 1 stream crossing
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Direct impact
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches <60 acres

## Rationale

### Designation Criteria

- **Minimize Damage:** Fragile soils SSR, Cultural – SSR within 100m sites
- **Minimize Harassment:** PPSV- Minimize fragmentation, Sage-Minimize fragmentation, Big game winter range – close

### Rationale for Decision

- Route was designated to ensure access to rights-of-way, private property, and livestock grazing facilities.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Not Rehabbed)

**Alternative D:** Admin/Permitted Use Only

• Routes such as the Gibler Gulch route, Farmer Canyon routes and the main routes in Wagon Park should remain open in December and January. A more prudent closure, if even needed, would be during "mud season" in the area. I would propose this to be from Mid February to April. BLM should tell Parks & Wildlife that this approach would make much more sense and accomplish the same thing as a five month closure.

Comment ID: 000000103-6

• Wagon Park area: Trail #1778 is currently an open multi-use route and I'd like to see it remain as such. #1756 is currently open for atv use, until it approaches the wilderness boundary, then changes to foot & horse use only. I want this trail to remain as it is today. #1751 accesses overlooks at the wilderness boundary, but is shown in Alt E for admin use, and closed in Alt B. I would like it to remain open, for the public to enjoy those overlook viewing sites. #1759, #1792 & #1751 are shown to be closed or administrative use and I perceive this as a wilderness buffer zone, as they are trails currently open at the edge of wilderness boundary. Buffer zones are not a valid reason for trail closure, and are an illegal practice according to the process guidelines. I also do not support proposed seasonal closures for this area.

• The following high value recreational routes/roads are legal RS 2477 ROW's in the State of Colorado, Mesa County and the BLM does not have the jurisdiction to close them: 500, 472, 518, 521, 530, 39, 127, 572, 566, 66, 65, 148, 71, 74, 587, 595, 608, 622, 628, 635, 624, 609, 611, 706, 678, 700, 719, 726, 696, 26, 936, 847, 849, 919, 767, 824, 96, 822, 817, 950, 1021, 900, 2682, 1020, 1003, 1084, 1142, 1184, 1156, 1198, 1349, 1308, 1310, 1238, 1263, 1122, 1170, 1192, 974, 941, 1076, 1039, 1018, 1759, 1764, 1758, 1174, 1788, 1798, 1669, 1699, 1773, 1755, 1779, 1750, 1751, 1792, 1720, 1726, 1727, 1720, 1722, 1803, 1805, 1809, 1614, 1609, 1605, 1608, 1571, 1526, 1516, 1448, 755, 807, 900, 10, 48, 924, 950, 1005, 965, 8, 1115, 981, 984, 1135, 2678, 1249, 1171, 1150, 1249, 1320, 1235, 1236, 1228, 1227, 1409, 1456, 1349, 1308, 1513, 1221, 1550, 1567, 1641, 1612, 1740, 1688, 2597, 2598, 2601, 2440, 3160, 3162, 2089, 2166, 2170, 2596, 2171, 2003, 2122, 2126, 2189, 3145, 2182, 2179, 2178, 3143, 2181, 2121, 2122, 2168, 2126, 2180, 2095, 2173, 2174, 2620, 2129, 1686, 1692, 1667, 1647, 1631, 1613, 1596, 1549, 1541, 2647, 1633, 1605, 1608, 1571, 2645, 1507, 1448, 1496, 1516, 1504, 1510, 1508, 1509, 439, 431, 456, 461, 460, 391, 423, 415, 419, 407, 402, 367, 372, 339, 298, 338, 105, 368, 374, 393, 389, 390, 376, 377, 351, 350, 121, 345, 320, 301, 251, 234, 232, 205, 344, 107, 103, 152, 153, 161, 168, 3199, 188, 196, 255, 254, 236, 294, 242, 219, 201, 169, 162, 158, 160, 173. The following high value recreational routes/roads are legal RS 2477ROW's in the State of Colorado, Delta County, and the BLM does not have the jurisdiction to close them: 3011, 2184, 2191, 3100, 2187, 2026, 2059, 2188, 2192, 3104, 2130, 3009, 2199, 2200, 2111, 2223, 2024, 3006, 2231, 3094, 2579, 2210, 2344, 2243, 2249, 2248, 3074, 2354, 2384, 2296, 2295, 2287, 2304, 2062, 2163, 3163, 2164, 2430, 4006, 3016, 2351, 3140, 2410, 4008, 2324, 2073, 2306, 2459, 3192, 3193, 2350, 2443, 2035, 2336, 2495, 2491, 2159, 3058, 2277, 2465, 2467, 3189, 2472, 2297, 2006, 2265, 2271, 2276, 2135, 2139, 3053, 2489, 3033, 3057, 2031, 2276, 2210, 2579, 2136, 2344, 3164, 2400, 2379, 3014, 2365, 3116, 2251, 2259, 2149, 2153, 2146, 2144, 2145, 2356, 2257, 2048, 2358, 3165, and 3166.

## Route: 1753

### Segment: 853

## Designation

### Current Designation

Open (All modes of travel)

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation access to dispersed campsite
- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I high
- SMAs Wild and Scenic River area
- DENSITY Route density low in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- **No designation criteria for this route segment.**

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open (All modes of travel)

**Alternative C:** Closed (Rehab)

**Alternative D:** Open (All modes of travel)

## Public Comments On Route: 1753

- No public comments for this Route

## Route: 1754

### Segment: 857

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk winter concentration areas
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I high
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches >60 acres

#### Rationale

##### Designation Criteria

- **Minimize Damage:** Fragile soils SSR
- **Minimize Harassment:** PPSV- Minimize fragmentation, Sage-Minimize fragmentation, Big game winter range – close

##### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to reduce fragmentation of sagebrush patches
- Route was designated to protect big game winter range

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open (All modes of travel)

**Alternative C:** Open (All modes of travel)

**Alternative D:** Open (All modes of travel)

## Public Comments On Route: 1754

- No public comments for this Route

## Route: 1755

### Segment: 858

## Route: 1756

### Segment: 1078

#### Designation

##### Current Designation

Foot/Horse

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk winter concentration areas
- WILDLIFE Elk severe winter range
- RIPARIAN Riparian 34 stream crossings
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I high
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

### Previous Alternatives Analyzed

**Alternative A:** Vehicles under 50" wide

**Alternative B:** Closed (Not Rehabbed)

## Public Comments On Route: 1756

Organization, commenter: Western Slope ATV Association, Steve Chapel

Comment ID: 000000089-10

- Routes such as the Gibley Gulch route, Farmer Canyon routes and the main routes in Wagon Park should remain open in December and January. A more prudent closure, if even needed, would be during "mud season" in the area. I would propose this to be from Mid February to April. BLM should tell Parks & Wildlife that this approach would make much more sense and accomplish the same thing as a five month closure.

Organization, commenter: Tracey Rohde

Comment ID: 000000103-6

- Wagon Park area: Trail #1778 is currently an open multi-use route and I'd like to see it remain as such. #1756 is currently open for atv use, until it approaches the wilderness boundary, then changes to foot & horse use only. I want this trail to remain as it is today. #1751 accesses overlooks at the wilderness boundary, but is shown in Alt E for admin use, and closed in Alt B. I would like it to remain open, for the public to enjoy those overlook viewing sites. #1759, #1792 & #1751 are shown to be closed or administrative use and I perceive this as a wilderness buffer zone, as they are trails currently open at the edge of wilderness boundary. Buffer zones are not a valid reason for trail closure, and are an illegal practice according to the process guidelines. I also do not support proposed seasonal closures for this area.

Organization, commenter: Janice Shepherd

Comment ID: 000000106-24

- I support the reduction of route density for purposes of reducing habitat fragmentation. Not only is this better for the vegetation and wildlife, but it is more visually appealing to visitors. Density of routes also impacts noise level in the NCA. One area I am concerned about is Wagon Park. There are 5 parallel routes into the area within a distance of little over 2 miles. A mammal running from the sounds of approaching vehicles on one road may well soon confront another road with more vehicles. At least some of those routes should be closed to meet this objective.

Organization, commenter: Quiet Trails Group, Sherry Schenk

Comment ID: 000000115-53

- [Dominguez Canyon Wilderness TMP-Level Comments]Zone 2]Routes 1756-5-1593-1585: Quiet Trails Group would also suggest keeping these routes open to horse and foot traffic, with a future possibility of connecting to route 2610. This would make a great trail system for horseback riders and long distance hikers. Route 1756 starts in the Wagon Park area.

- Wagon Park/Sawmill Mesa (North) TMP-Level Comments:Routes 1756-5-1593-1585: Quiet Trails Group would suggest keeping these routes open to horse and foot traffic, connecting to route 2610. This would make a great trail system for horseback riders and long distance hikers. This comment is predominantly related to Zone 2 of the Wilderness, however, as route 1756 starts in the Wagon Park area we have also included this comment here

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 000000135-32

- [Wagon Park] The entirety of 1756, located in the Dry Creek drainage, should be closed to all trail use and obliterated to protect canyon vegetation, wildlife security and wet areas

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 000000135-4

- we appreciate the route closures in the preferred alternative. However, as you will see in our attached 2011 route-specific comments, we are concerned about the routes left open in the draft TMP that we and others had recommended for closure, in particular: o The two ATV trails (Numbers 3162/2089/2166, and 2596/2171/2003) in the Dominguez Addition Unit that need to be closed a) to protect this unit and b) to prevent the likelihood of incursions into the Dominguez wilderness, due to remote, unmanageable and unenforceable terrain. o Palmer Gulch road #2169/2170, needs to be closed. o Road #2181 needs to be closed to OHVs. o 1778/1727 o 1782/1768/2602 in Sawmill Mesa and Wagon Park zonos o 1756 should be closed at the junction with 1758, and include closure of roads 1593 and 1585

Organization, commenter: Backcountry Hunters and Anglers, Craig Grother

Comment ID: 000000156-21

- Within the Sawmill Mesa and Wagon Park mixed-use areas, we recommend the following modifications to the preferred alternative to improve big game habitat effectiveness and the quality of traditional big game hunting and non-motorized recreation opportunities within these areas. Close and obliterate spur roads 1782/1768/2602 located on the rim of the Big Dominguez Canyon. This road does not access any wilderness trailheads or serve any other purpose we know of. We also do not understand why road 1756 was left open half way down the ridge instead of just closing the entire length of the route. This road should be closed at the junction with 1758, and include closure of roads 1593 and 1585 as shown in the preferred alternative. We would also like to see road 1778/1727 down Wildhorse Draw closed to motorized vehicles and retained as a non-motorized trail. Closing this route to motorized vehicles would also enhance big game habitat effectiveness and provide a high quality backcountry hunting area.

Organization, commenter: COPMOBA, Scott Winans

Comment ID: 000000168-5

**/Mechanized (but still open to motorized for admin/permitted access)**

- Wagon ParkIn Wagon Park we [COPMOBA]recommend leaving 1759 open to mountai n bike access instead of being an administrative road. Resource damage to an existing administrative road seems minimal and would provide a rare mechanized opportunity in that area. A new connection to 1756 outside of wilderness boundary would provide a nice loop with canyon and ridge experiences

## Route: 1757

## Public Comments On Route: 1758

Organization, commenter: Brandon Siegfried

Comment ID: 000000068-3

• The following high value recreational routes/roads are legal ROW's in the State of Colorado, Mesa County and the BLM does not have the jurisdiction to close them: 500, 472, 518, 521, 530, 39, 127, 572, 566, 66, 65, 148, 71, 74, 587, 595, 608, 622, 628, 635, 624, 609, 611, 706, 678, 700, 719, 726, 696, 26, 936, 847, 849, 919, 767, 824, 96, 822, 817, 950, 1021, 900, 2682, 1020, 1003, 1084, 1142, 1184, 1156, 1198, 1349, 1308, 1310, 1238, 1263, 1122, 1170, 1192, 974, 941, 1076, 1039, 1018, 1759, 1764, 1758, 1174, 1788, 1798, 1669, 1699, 1773, 1755, 1779, 1750, 1751, 1792, 1720, 1726, 1727, 1720, 1722, 1803, 1805, 1809, 1614, 1609, 1605, 1608, 1571, 1526, 1516, 1448, 755, 807, 900, 10, 48, 924, 950, 1005, 965, 8, 1115, 981, 984, 1135, 2678, 1249, 1171, 1150, 1249, 1320, 1235, 1236, 1228, 1227, 1409, 1456, 1349, 1308, 1513, 1221, 1550, 1567, 1641, 1612, 1740, 1688, 2597, 2598, 2601, 2440, 3160, 3162, 2089, 2166, 2170, 2596, 2171, 2003, 2122, 2126, 2189, 3145, 2182, 2179, 2178, 3143, 2181, 2121, 2122, 2168, 2126, 2180, 2095, 2173, 2174, 2620, 2129, 1686, 1692, 1667, 1647, 1631, 1613, 1596, 1549, 1541, 2647, 1633, 1605, 1608, 1571, 2645, 1507, 1448, 1496, 1516, 1504, 1510, 1508, 1509, 439, 431, 456, 461, 460, 391, 423, 415, 419, 407, 402, 367, 372, 339, 298, 338, 105, 368, 374, 393, 389, 390, 376, 377, 351, 350, 121, 345, 320, 301, 251, 234, 232, 205, 344, 107, 103, 152, 153, 161, 168, 3199, 188, 196, 255, 254, 236, 294, 242, 219, 201, 169, 162, 158, 160, 173. The following high value recreational routes/roads are legal ROW's in the State of Colorado, Delta County, and the BLM does not have the jurisdiction to close them: 3011, 2184, 2191, 3100, 2187, 2026, 2059, 2188, 2192, 3104, 2130, 3009, 2199, 2200, 2111, 2223, 2024, 3006, 2231, 3094, 2579, 2210, 2344, 2243, 2249, 2248, 3074, 2354, 2384, 2296, 2295, 2287, 2304, 2062, 2163, 3163, 2164, 2430, 4006, 3016, 2351, 3140, 2410, 4008, 2324, 2073, 2306, 2459, 3192, 3193, 2350, 2443, 2035, 2336, 2495, 2491, 2159, 3058, 2277, 2465, 2467, 3189, 2472, 2297, 2006, 2265, 2271, 2276, 2135, 2139, 3053, 2489, 3033, 3057, 2031, 2276, 2210, 2579, 2136, 2344, 3164, 2400, 2379, 3014, 2365, 3116, 2251, 2259, 2149, 2153, 2146, 2144, 2145, 2356, 2257, 2048, 2358, 3165, and 3166.

Organization, commenter: Western Slope ATV Association, Steve Chapel

Comment ID: 000000089-10

• Routes such as the Gibley Gulch route, Farmer Canyon routes and the main routes in Wagon Park should remain open in December and January. A more prudent closure, if even needed, would be during "mud season" in the area. I would propose this to be from Mid February to April. BLM should tell Parks & Wildlife that this approach would make much more sense and accomplish the same thing as a five month closure.

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 000000135-4

• we appreciate the route closures in the preferred alternative. However, as you will see in our attached 2011 route-specific comments, we are concerned about the routes left open in the draft TMP that we and others had recommended for closure, in particular: o The two ATV trails (Numbers 3162/2089/2166, and 2596/2171/2003) in the Dominguez Addition Unit that need to be closed a) to protect this unit and b) to prevent the likelihood of incursions into the Dominguez wilderness, due to remote, unmanageable and unenforceable terrain. o Palmer Gulch road #2169/2170, needs to be closed. o Road #2181 needs to be closed to OHVs. o 1778/1727 o 1782/1768/2602 in Sawmill Mesa and Wagon Park zones o 1756 should be closed at the junction with 1758, and include closure of roads 1593 and 1585

Organization, commenter: Backcountry Hunters and Anglers, Craig Grother

Comment ID: 000000156-21

• Within the Sawmill Mesa and Wagon Park mixed-use areas, we recommend the following modifications to the preferred alternative to improve big game habitat effectiveness and the quality of traditional big game hunting and non-motorized recreation opportunities within these areas. Close and obliterate spur roads 1782/1768/2602 located on the rim of the Big Dominguez Canyon. This road does not access any wilderness trailheads or serve any other purpose we know of. We also do not understand why road 1756 was left open half way down the ridge instead of just closing the entire length of the route. This road should be closed at the junction with 1758, and include closure of roads 1593 and 1585 as shown in the preferred alternative. We would also like to see road 1778/1727

down Wildhorse Draw closed to motorized vehicles and retained as a non-motorized trail. Closing this route to motorized vehicles would also enhance big game habitat effectiveness and provide a high quality backcountry hunting area.

Organization, commenter: CMDA, Brandon Siegfried

## Route: 1759

### Segment: 1134

#### Designation ?

##### Current Designation

Vehicles under 50" wide

##### Mitigation Criteria

- Reroute
- Close before edge of last sagebrush park

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk winter concentration areas
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Direct impact
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches >60 acres

#### Rationale

##### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Admin/Permitted Use Only

**Alternative D:** Admin/Permitted Use Only

• Wagon Park: This is an area that is wonderful for ATV riding as well as a good hunting area. I would ask that all the roads in that area remain open. After all, it is bordered on three sides by Wilderness, so those who wish to get away from ATVs or noise of any kind still have an enormous area to hike and mountain bike. Road numbers 1764 and 1759 are slated for Administrative Use which means no public use. I request those roads remain open to the general public for game retrieval and riding

Organization, commenter: Tracey Rohde

Comment ID: 00000103-6

• Wagon Park area: Trail #1778 is currently an open multi-use route and I'd like to see it remain as such. #1756 is currently open for atv use, until it approaches the wilderness boundary, then changes to foot & horse use only. I want this trail to remain as it is today. #1751 accesses overlooks at the wilderness boundary, but is shown in Alt E for admin use, and closed in Alt B. I would like it to remain open, for the public to enjoy those overlook viewing sites. #1759, #1792 & #1751 are shown to be closed or administrative use and I perceive this as a wilderness buffer zone, as they are trails currently open at the edge of wilderness boundary. Buffer zones are not a valid reason for trail closure, and are an illegal practice according to the process guidelines. I also do not support proposed seasonal closures for this area.

• I support the reduction of route density for purposes of reducing habitat fragmentation. Not only is this better for the vegetation and wildlife, but it is more visually appealing to visitors. Density of routes also impacts noise level in the NCA. One area I am concerned about is Wagon Park. There are 5 parallel routes into the area within a distance of little over 2 miles. A mammal running from the sounds of approaching vehicles on one road may well soon confront another road with more vehicles. At least some of those routes

should be closed to meet this objective.

Organization, commenter: COPMOBA, Scott Winans

Comment ID: 000000168-5

- Wagon ParkIn Wagon Park we [COPMOBA]recommend leaving 1759 open to mountai n bike access instead of being an administrative road. Resource damage to an existing administrative road seems minimal and would provide a rare mechanized opportunity in that area. A new connection to 1756 outside of wilderness boundary would provide a nice loop with canyon and ridge experiences

Comment ID: 000000197-3

- Some of the reasons given by the BLM for closures included, "administrative routes". However, route 1759 marked "administrative", in preferred alternative E, is marked closed in C. If this route is needed as an administrative route, how could it be closed in any alternative? This leads us to believe that routes were marked closed without much thought, and if it is closed to the public as administrative, or just closed makes little difference to the BLM, as long as it is closed. It just changes the amount of red lines on the map, and makes a few less on the E alternative. Fewer red lines give the needed range of alternatives required, but the fact is, theDragon route is closed either way. "Administrative", or closed to the public is, is a misleading way to close a route. In some cases giving private land owners exclusive access to many more acres of public land than the general public has. Placing the gates to private land many miles from the private land, and locating them on public land is theft of the access to the public land, while gifting it to the private land owners. Very poor management techniques, pitting private land owners against the public land users, and creating user conflicts. The administrative routes will remain open and maintained for use, but not by the public. Our tax dollars at work for the gain of the private land owners.

## Route: 176

### Segment: 2629

#### Designation ?

##### Current Designation

Foot/Horse/Mechanized/Motorcycle

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I low
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Foot/Horse/Mechanized/Motorcycle

**Alternative B:** Vehicles under 50" wide

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 176

Organization, commenter: Janice Shepherd

Comment ID: 000000106-212

- 208-195-186-182-243-257-262-253-240-221-198 I support the Quiet Trail Group's position of designating this loop for quiet trail users. The top segments 208-195-186-176 should be Mtn Bike, to connect with the Alt E proposed designation for 182-243. Note that 243 should not be designated Motorcycle as it is in Alt E as it is a short segment connecting two Mtn Bike routes. The rest of the loop should be Horse/foot as shown in Alt E. This approximately 4 mile loop makes a great short enjoyable hike. I've even done it with a group of friends on a July morning. The city high that day was 93. We finished the hike in the morning when the temperatures were still moderate. Afterwards we enjoyed lunch together at a restaurant on Orchard Mesa (local economic benefit). It is important to me to have easy access to such short quiet use loops within the NCA that are close to the city so that my friends and I can get some exercise together while enjoying each other's company even in summer months. On the height of land crossed by 240, there is a wonderful view back down the valley. The track blends in and the valley looks pristine and untouched by humans. It gives me a small sense of what it must have been like to be the first explorer here. I'd love to find other trails like this. Near 176, there is a pretty little dry fall. And the rock in the area is a conglomerate which is such an interesting contrast to vast amounts of sandstone. On foot it is fun to find such interesting anomalies. That is what is so great about hiking on 186-176-182, you have time to see the contrast and recognize the uniqueness of the area. There's time for my friends and me to admire the power of natural forces. We like this hike because of the sense of discovery of small and large details about the geology of the area.

## Route: 1760

### Segment: 823

#### Designation ?

##### Current Designation

Closed (Rehab)

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I high
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- **Minimize Damage:** Fragile soils SSR
- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close

### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range

• Wagon Park: This is an area that is wonderful for ATV riding as well as a good hunting area. I would ask that all the roads in that area remain open. After all, it is bordered on three sides by Wilderness, so those who wish to get away from ATVs or noise of any kind still have an enormous area to hike and mountain bike. Road numbers 1764 and 1759 are slated for Administrative Use which means no public use. I request those roads remain open to the general public for game retrieval and riding

• The different alternatives in the draft RMP arbitrarily pick one user group to cater to without respect to the terrain and user needs. This is especially evident in the 9-Mile Hill area. The plan appears to pick a user group out of the hat for each alternative and decides to make the trails open to that user group without analysis of what kind of users are currently using these trails. The BLM gives the impression that it aims to maximize user conflict by identifying areas currently open to multi-use and denying access to all but the favored group of the moment. The plan ignores the existence of ample opportunities for quiet use in the wilderness area when it allocates additional quiet use areas within the planning area without analysis showing these are needed. The BLM fails to present data that supports a need to make the majority of the total area quiet use. The plan inappropriately seeks to create additional buffer zones of quiet use adjacent to the wilderness. This is evident in the alternatives for Route 1764 in Wagon Park. This route should be kept open. The 9-Mile Hill area and Cactus Park area have traditionally been multiple (motorized) use and should continue to be managed for multiple motorized use. The proposed winter closures are not warranted.

• Trail Number(s): 1764 Trail Name: Wagon Park area Trail Description (challenges, viewpoints, terrain type, etc.): Click here to enter text. Your historical use/activities (frequency, rock crawling, exploring, testing, photography, camping): Exploration by vehicle, multi-use recreation Why you like this trail (challenges you/vehicle, close to home, wildlife, historic sites, scenic views): Click here to enter text. Benefits you receive by using this trail (exercise, socializing with friends/family, solitude, remoteness): This route allows me to enjoy a feeling of remoteness from my fullsize 4WD. It allows me to get close to the wilderness boundary and enjoy the views. It provides the opportunity to park my vehicle near the boundary and then explore the wilderness on foot from an uncrowded entry point. Other Comment (what is your desired outcome for this trail, additional ideas to be considered): This route should remain open to fullsize 4WD and all other motorized & non-motorized users

## Route: 1765

### Segment: 805

#### Designation

##### Current Designation

Vehicles under 50" wide

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I high
- DENSITY Route density low in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

### Segment: 804

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I high
- DENSITY Route density low in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches >60 acres

## Rationale

### Designation Criteria

- **Minimize Damage:** Fragile soils SSR
- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close

### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range

## Previous Alternatives Analyzed

**Alternative A:** Admin/Permitted Use Only

## Public Comments On Route: 1768

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 000000135-4

• we appreciate the route closures in the preferred alternative. However, as you will see in our attached 2011 route-specific comments, we are concerned about the routes left open in the draft TMP that we and others had recommended for closure, in particular: o The two ATV trails (Numbers 3162/2089/2166, and 2596/2171/2003) in the Dominguez Addition Unit that need to be closed a) to protect this unit and b) to prevent the likelihood of incursions into the Dominguez wilderness, due to remote, unmanageable and unenforceable terrain. o Palmer Gulch road #2169/2170, needs to be closed. o Road #2181 needs to be closed to OHVs. o 1778/1727 o 1782/1768/2602 in Sawmill Mesa and Wagon Park zones o 1756 should be closed at the junction with 1758, and include closure of roads 1593 and 1585

Organization, commenter: Backcountry Hunters and Anglers, Craig Grother

Comment ID: 000000156-21

• Within the Sawmill Mesa and Wagon Park mixed-use areas, we recommend the following modifications to the preferred alternative to improve big game habitat effectiveness and the quality of traditional big game hunting and non-motorized recreation opportunities within these areas. Close and obliterate spur roads 1782/1768/2602 located on the rim of the Big Dominguez Canyon. This road does not access any wilderness trailheads or serve any other purpose we know of. We also do not understand why road 1756 was left open half way down the ridge instead of just closing the entire length of the route. This road should be closed at the junction with 1758, and include closure of roads 1593 and 1585 as shown in the preferred alternative. We would also like to see road 1778/1727 down Wildhorse Draw closed to motorized vehicles and retained as a non-motorized trail. Closing this route to motorized vehicles would also enhance big game habitat effectiveness and provide a high quality backcountry hunting area.

## Route: 1769

### Segment: 860

#### Designation [?](#)

##### Current Designation

Foot/Horse

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands

• Routes such as the Gibler Gulch route, Farmer Canyon routes and the main routes in Wagon Park should remain open in December and January. A more prudent closure, if even needed, would be during "mud season" in the area. I would propose this to be from Mid February to April. BLM should tell Parks & Wildlife that this approach would make much more sense and accomplish the same thing as a five month closure.

• I support the reduction of route density for purposes of reducing habitat fragmentation. Not only is this better for the vegetation and wildlife, but it is more visually appealing to visitors. Density of routes also impacts noise level in the NCA. One area I am concerned about is Wagon Park. There are 5 parallel routes into the area within a distance of little over 2 miles. A mammal running from the sounds of approaching vehicles on one road may well soon confront another road with more vehicles. At least some of those routes should be closed to meet this objective.

## Public Comments On Route: 1778

Organization, commenter: Tracey Rohde

Comment ID: 000000103-6

• Wagon Park area: Trail #1778 is currently an open multi-use route and I'd like to see it remain as such. #1756 is currently open for atv use, until it approaches the wilderness boundary, then changes to foot & horse use only. I want this trail to remain as it is today. #1751 accesses overlooks at the wilderness boundary, but is shown in Alt E for admin use, and closed in Alt B. I would like it to remain open, for the public to enjoy those overlook viewing sites. #1759, #1792 & #1751 are shown to be closed or administrative use and I perceive this as a wilderness buffer zone, as they are trails currently open at the edge of wilderness boundary. Buffer zones are not a valid reason for trail closure, and are an illegal practice according to the process guidelines. I also do not support proposed seasonal closures for this area.

Organization, commenter: Janice Shepherd

Comment ID: 000000106-24

• I support the reduction of route density for purposes of reducing habitat fragmentation. Not only is this better for the vegetation and wildlife, but it is more visually appealing to visitors. Density of routes also impacts noise level in the NCA. One area I am concerned about is Wagon Park. There are 5 parallel routes into the area within a distance of little over 2 miles. A mammal running from the sounds of approaching vehicles on one road may well soon confront another road with more vehicles. At least some of those routes should be closed to meet this objective.

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 000000135-4

• we appreciate the route closures in the preferred alternative. However, as you will see in our attached 2011 route-specific comments, we are concerned about the routes left open in the draft TMP that we and others had recommended for closure, in particular: o The two ATV trails (Numbers 3162/2089/2166, and 2596/2171/2003) in the Dominguez Addition Unit that need to be closed a) to protect this unit and b) to prevent the likelihood of incursions into the Dominguez wilderness, due to remote, unmanageable and unenforceable terrain. o Palmer Gulch road #2169/2170, needs to be closed. o Road #2181 needs to be closed to OHVs. o 1778/1727 o 1782/1768/2602 in Sawmill Mesa and Wagon Park zones o 1756 should be closed at the junction with 1758, and include closure of roads 1593 and 1585

Organization, commenter: Backcountry Hunters and Anglers, Craig Grother

Comment ID: 000000156-21

• Within the Sawmill Mesa and Wagon Park mixed-use areas, we recommend the following modifications to the preferred alternative to improve big game habitat effectiveness and the quality of traditional big game hunting and non-motorized recreation opportunities within these areas. Close and obliterate spur roads 1782/1768/2602 located on the rim of the Big Dominguez Canyon. This road does not access any wilderness trailheads or serve any other purpose we know of. We also do not understand why road 1756 was left open half way down the ridge instead of just closing the entire length of the route. This road should be closed at the junction with 1758, and include closure of roads 1593 and 1585 as shown in the preferred alternative. We would also like to see road 1778/1727 down Wildhorse Draw closed to motorized vehicles and retained as a non-motorized trail. Closing this route to motorized vehicles would also enhance big game habitat effectiveness and provide a high quality backcountry hunting area.

## Route: 178

### Segment: 2640

## Designation

### Current Designation

Admin/Permitted Use Only

### Designation Following Mitigation

Open (All modes of travel)

### Mitigation Criteria

- Work with Land Owner on Public Access
- Work with Land Owner on Right of Way

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- CULTURAL Cultural Class I low
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- No designation criteria for this route segment.

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

## Public Comments On Route: 178

Organization, commenter: Janice Shepherd

Comment ID: 000000106-94

- Pages 115-118 Hunting GroundAt a couple of the Advisory Council meetings the owner of the land that abuts 178 and 169 said that they welcomed people crossing their property to get on the NCA. The BLM should work with the property owner to establish a long-term agreement that gives public access along this route. If the owner is not willing to give permanent easement then perhaps they would consider a 20 year optionally renewable easement that would last the life of the RMP.

## Route: 1781

### Segment: 787

#### Designation [?](#)

##### Current Designation

Open, seek re-route or mitigation

##### Mitigation Criteria

- Riparian

## Public Comments On Route: 1782

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 000000135-4

• we appreciate the route closures in the preferred alternative. However, as you will see in our attached 2011 route-specific comments, we are concerned about the routes left open in the draft TMP that we and others had recommended for closure, in particular: o The two ATV trails (Numbers 3162/2089/2166, and 2596/2171/2003) in the Dominguez Addition Unit that need to be closed a) to protect this unit and b) to prevent the likelihood of incursions into the Dominguez wilderness, due to remote, unmanageable and unenforceable terrain. o Palmer Gulch road #2169/2170, needs to be closed. o Road #2181 needs to be closed to OHVs. o 1778/1727 o 1782/1768/2602 in Sawmill Mesa and Wagon Park zones o 1756 should be closed at the junction with 1758, and include closure of roads 1593 and 1585

Organization, commenter: Backcountry Hunters and Anglers, Craig Grother

Comment ID: 000000156-21

• Within the Sawmill Mesa and Wagon Park mixed-use areas, we recommend the following modifications to the preferred alternative to improve big game habitat effectiveness and the quality of traditional big game hunting and non-motorized recreation opportunities within these areas. Close and obliterate spur roads 1782/1768/2602 located on the rim of the Big Dominguez Canyon. This road does not access any wilderness trailheads or serve any other purpose we know of. We also do not understand why road 1756 was left open half way down the ridge instead of just closing the entire length of the route. This road should be closed at the junction with 1758, and include closure of roads 1593 and 1585 as shown in the preferred alternative. We would also like to see road 1778/1727 down Wildhorse Draw closed to motorized vehicles and retained as a non-motorized trail. Closing this route to motorized vehicles would also enhance big game habitat effectiveness and provide a high quality backcountry hunting area.

## Route: 1783

### Segment: 771

### Designation

#### Current Designation

Closed (Rehab)

#### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

#### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk winter concentration areas
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I high
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- **Minimize Damage:** Fragile soils SSR
- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close

### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect big game winter range

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

## Route: 179

### Segment: 2627

#### Designation

##### Current Designation

Foot/Horse/Mechanized/Motorcycle

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- RIPARIAN Riparian 1 stream crossing
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I low
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- Recreation:** RMA objectives, Rec opportunities – general
- Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Foot/Horse/Mechanized/Motorcycle

**Alternative B:** Vehicles under 50" wide

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 179

/Mechanized/Motorcycle

Comment ID: 000000106-211

Alt E should not have 179, 186, 195 and 208 designated as ATV as they were inventoried as single track. See "Photo Comparison" at bottom of comment. Unfortunately as can be seen in the photos, some users have taken it upon themselves to widen some of these from single tracks to 2-tracks. These need to be rehabbed back to being single tracks.

## Route: 1790

### Segment: 776

#### Designation

##### Current Designation

Open (All modes of travel)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk winter concentration areas
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I high
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- No designation criteria for this route segment.**

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

Comment ID: 000000103-6

Wagon Park area: Trail #1778 is currently an open multi-use route and I'd like to see it remain as such. #1756 is currently open for atv use, until it approaches the wilderness boundary, then changes to foot & horse use only. I want this trail to remain as it is today. #1751 accesses overlooks at the wilderness boundary, but is shown in Alt E for admin use, and closed in Alt B. I would like it to remain open, for the public to enjoy those overlook viewing sites. #1759, #1792 & #1751 are shown to be closed or administrative use and I perceive this as a wilderness buffer zone, as they are trails currently open at the edge of wilderness boundary. Buffer zones are not a valid reason for trail closure, and are an illegal practice according to the process guidelines. I also do not support proposed seasonal closures for this area.

Comment ID: 000000135-33

[Wagon Park] The user-created connector that links 1783 and 1792 should be closed to keep traffic on main roads, reduce wildlife impacts and create habitat security, and limit the spread of hard-to-enforce motorized and mountain bike use

The following high value recreational routes/roads are legal RS 2477 ROW's in the State of Colorado, Mesa County and the BLM does not have the jurisdiction to close them: 500, 472, 518, 521, 530, 39, 127, 572, 566, 66, 65, 148, 71, 74, 587, 595, 608, 622, 628, 635, 624, 609, 611, 706, 678, 700, 719, 726, 696, 26, 936, 847, 849, 919, 767, 824, 96, 822, 817, 950, 1021, 900, 2682, 1020, 1003, 1084, 1142, 1184, 1156, 1198, 1349, 1308, 1310, 1238, 1263, 1122, 1170, 1192, 974, 941, 1076, 1039, 1018, 1759, 1764, 1758, 1174, 1788, 1798, 1669, 1699, 1773, 1755, 1779, 1750, 1751, 1792, 1720, 1726, 1727, 1720, 1722, 1803, 1805, 1809, 1614, 1609, 1605, 1608, 1571, 1526, 1516, 1448, 755, 807, 900, 10, 48, 924, 950, 1005, 965, 8, 1115, 981, 984, 1135, 2678, 1249, 1171, 1150, 1249, 1320, 1235, 1236, 1228, 1227, 1409, 1456, 1349, 1308, 1513, 1221, 1550, 1567, 1641, 1612, 1740, 1688, 2597, 2598, 2601, 2440, 3160, 3162, 2089, 2166, 2170, 2596, 2171, 2003, 2122, 2126, 2189, 3145, 2182, 2179, 2178, 3143, 2181, 2121, 2122, 2168, 2126, 2180, 2095, 2173, 2174, 2620, 2129, 1686, 1692, 1667, 1647, 1631, 1613, 1596, 1549, 1541, 2647, 1633, 1605, 1608, 1571, 2645, 1507, 1448, 1496, 1516, 1504, 1510, 1508, 1509, 439, 431, 456, 461, 460, 391, 423, 415, 419, 407, 402, 367, 372, 339, 298, 338, 105, 368, 374, 393, 389, 390, 376, 377, 351, 350, 121, 345, 320, 301, 251, 234, 232, 205, 344, 107, 103, 152, 153, 161, 168, 3199, 188, 196, 255, 254, 236, 294, 242, 219, 201, 169, 162, 158, 160, 173. The following high value recreational routes/roads are legal RS 2477ROW's in the State of Colorado, Delta County, and the BLM does not have the jurisdiction to close them: 3011, 2184, 2191, 3100, 2187, 2026, 2059, 2188, 2192, 3104, 2130, 3009, 2199, 2200, 2111, 2223, 2024, 3006, 2231, 3094, 2579, 2210, 2344, 2243, 2249, 2248, 3074, 2354, 2384, 2296, 2295, 2287, 2304, 2062, 2163, 3163, 2164, 2430, 4006, 3016, 2351, 3140, 2410, 4008, 2324, 2073, 2306, 2459, 3192, 3193, 2350, 2443, 2035, 2336, 2495, 2491, 2159, 3058, 2277, 2465, 2467, 3189, 2472, 2297, 2006, 2265, 2271, 2276, 2135, 2139, 3053, 2489, 3033, 3057, 2031, 2276, 2210, 2579, 2136,

## Route: 1793

### Segment: 749

#### Designation

**Current Designation**  
Wilderness

#### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

#### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk winter concentration areas
- WILDLIFE Elk severe winter range
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I high
- DENSITY Route density low in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches <60 acres

#### Rationale

##### Designation Criteria

- **No designation criteria for this route segment.**

##### Rationale for Decision

- Non-system route inside the wilderness.

#### Previous Alternatives Analyzed

**Alternative A:** Admin/Permitted Use Only

**Alternative B:** Admin/Permitted Use Only

**Alternative C:** Admin/Permitted Use Only

**Alternative D:** Admin/Permitted Use Only

## Public Comments On Route: 1793

**Current Designation**  
Wilderness

#### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

#### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk winter concentration areas
- WILDLIFE Elk severe winter range
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I moderate
- DENSITY Route density low in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches <60 acres

#### Rationale

##### Designation Criteria

- **No designation criteria for this route segment.**

##### Rationale for Decision

- Non-system route inside the wilderness.

#### Previous Alternatives Analyzed

**Alternative A:** Admin/Permitted Use Only

**Alternative B:** Admin/Permitted Use Only

**Alternative C:** Admin/Permitted Use Only

Alternative D: Admin/Permitted Use Only

## Public Comments On Route: 1794

- No public comments for this Route

## Route: 1795

### Segment: 785

#### Designation [?](#)

##### Current Designation

Foot/Horse

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk winter concentration areas
- WILDLIFE Elk severe winter range
- RIPARIAN Riparian 2 stream crossings
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I high
- DENSITY Route density low in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches <60 acres

#### Rationale

##### Designation Criteria

- Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

Alternative A: Foot/Horse

Alternative B: Closed (Not Rehabbed)

Alternative C: Closed (Not Rehabbed)

Alternative D: Foot/Horse

## Public Comments On Route: 1795

- No public comments for this Route

## Route: 1796

### Segment: 742

#### Designation [?](#)

##### Current Designation

Admin/Permitted Use Only

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk winter concentration areas
- WILDLIFE Elk severe winter range
- RIPARIAN Riparian 1 stream crossing
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I high
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches >60 acres

#### Rationale

##### Designation Criteria

- Minimize Damage:** Riparian—ephemeral streams SSR 30 m
- Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close

### Rationale for Decision

- Route was designated to ensure access to rights-of-way, private property, and livestock grazing facilities.

### Previous Alternatives Analyzed

**Alternative A:** Admin/Permitted Use Only

**Alternative B:** Admin/Permitted Use Only

**Alternative C:** Admin/Permitted Use Only

### Route: 18

#### Segment: 2060

## Designation

### Current Designation

Open (All modes of travel)

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation access to dispersed campsite
- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Indirect impact
- SMAs Gibbler Mountain ACEC
- DENSITY Route density highest in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches >60 acres

## Rationale

### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general, Rec opportunities - specific

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Vehicles under 50" wide

**Alternative C:** Closed (Rehab)

**Alternative D:** Vehicles under 50" wide

## Public Comments On Route: 18

Organization, commenter: Janice Shepherd

Comment ID: 000000106-110

- o The Gibbler Mountain ACEC as shown on map 2-5E does not encompass the mountain itself but only its northern slopes. I would prefer to see a non-motorized/non-mechanized ACEC for the whole of Gibbler Mountain and its surrounding slopes, bounded by the routes: 1235-1236-1228-1409-1221-15-8-887-18-17-945-547-951-959-966-969-1005-1006-1021-1022-1023-1024-1047-1150-1249, with 1269 left open to motorized use as a motorized cherry-stemmed route into the area. This would keep this wonderful roadless area (though too small a space for the inventory) roadless into the future. The text on page 871 indicates the area has one of the "best known" populations of the rare plant Grand Junction milkvetch as well as a large collection of fragile dinosaur tracks. The Special Species map from the Open House needs to be updated with this GJ milkvetch population. This ACEC representing a hole in the SRMA would properly protect all three features: roadless-ness, dinosaur tracks, and GJ milkvetch, at the cost of less than 5000 acres. This protection is consistent with this being a National Conservation Area and not a National Recreation Area. This position also has support from the D-E NCA Advisory Council. I recently hiked up to the top of the northern portion of Gibbler Mountain with a friend. We were inspired by the challenging terrain for hiking and the awesome views (photo IMG\_9998). We both had a great feeling of accomplishment when we reached the top. There is plenty of evidence of big game animals using the Gibbler Mountain as a quiet sanctuary from the surrounding motorized areas. This proposed ACEC would benefit them.

Organization, commenter: Quiet Trails Group, Sherry Schenk

Comment ID: 000000115-32

- Gibbler Mountain Area of Critical Environmental Concern: The QTG supports Gibbler Mtn ACEC from Alt D because protections are needed for the myriad of resources found here, especially if it is going to be located within an SRMA focused on motorized use. Further, we think the ACEC should be extended to include all of Gibbler Mountain. Surface-disturbance limitations and a rule of no motorized use should be included for the full ACEC, including this recommended expansion. With this expansion the full ACEC would be bounded by: Routes: 1235-1236-1228-1409-1221-15-8-887-18-17-945-947-951-954-959-962-966-969-1005-1006-1021-1022-1023-1024-1047-1150-1249-8, with 1269, and 1173-1174-1198-1200-1193 cherry-stemmed into the area. The reasons we support this designation are as follows: Roadless areas are an endangered resource in the high-desert west. Categorically, roadless areas especially within NCAs- should be protected as such. By making it a larger area not only does it protect this roadless area but also it better disguises the location of the dinosaur tracks and fossils which we see from page 872," are regionally significant and easily damaged". Per page 871, "This site also supports one of the best known occurrences (A-ranked) of Grand Junction milkvetch (Astragalus linifolius), a globally vulnerable plant (G3/S3) and a BLM sensitive plant species."o Map 3-13 needs to be updated to show the presence of Grand Junction milkvetch and Colorado Hookless cactus as the text on page 871 indicates both are present in this area. A recent hike in this area shows prolific big game use in the area, we assume it is their refuge from surrounding motorized use. Recent hikes have confirmed the presence of Ponderosa Pine atop Gibbler Mtn. This designation would aid in increasing the number of healthy Ponderosa Pines within the NCA, an action which would be in accordance with the Alternative E management objective on page 52. o Map 3-3 needs to be updated to reference the presence of Ponderosa Pine in this area. The designation of this expanded ACEC in the final plan, would address the need for non-motorized trails in this portion of the NCA, an opportunity currently missing from the draft plan. And to reiterate, these protections are needed for the myriad of resources found here, especially because they are to be located within an SRMA focused on motorized use

- 1. We have identified known potential issues and criteria to guide the planning process based on lands and resources in the planning area. Please provide comments on these issues and criteria, and/or identify other issues or criteria that you think should be considered (If your comment pertains to a specific is sure or criteria, please use the reference code, e.g. "PCI") 2. What areas within the Dominguez-Escalante National Conservation Area or Dominguez Canyon Wilderness do you value? Why? Area 1 Great views birdwatching, wildlife potogrpghing & some hicking Area 2 Viewing from bluffs from above Area 3 I use this area a good many times a year Area 4 I can't get to this area to use. Area 5 I use any road or ATV trail thats OPEN 3. Please provide any additional comments that you have regarding this project. Comments on attach sheet. Maps with GPS routes in red. Things that I want to comment on concerning Dominguez-Escalante NCA. 1. Cactus Park area is used by the motorized community, Mountain bikers, Hikers, and Etc. There are a lot of roads, jeep & ATV trails that need to be open for everyone to use. The area has been used for cattle grazing, Christmas tree cutting, fire wood, and many other uses. As the population grows in this area there needs to be public land open for their use. 2. As the motorized roads, double track and single track trails are closed; much less area is left for folks to use. Any Wilderness and Wilderness Study Area restricts firefighting, timber cutting (to help control pine and pinion beeHe and controlling ground cover which will stop the massive fuel for fires) and weed control. Colorado is having large fires now because of these large amounts of fuel. 3. The attached maps have GPS routes shown in red that I have GPS'ed at different times. Please note that I have used these routes at different times. All these routes are jeep accessible; many are used by 2 wheel drive pickups. I almost never see hikers when I'm out using these routes on my ATV or Pickup. [ED: The D-E NCA's Recreation Planner identified the route numbers for routes highlighted on the map mentioned in this comment: 621, 624, 676, 649, 641, 743, 676, 741, 97, 96, 744, 733, 15, 838, 18, 945, 26, 847, 848, 941, 1192, 1292, 1377]

## Route: 180

### Segment: 2621

## Designation

### Current Designation

Foot/Horse/Mechanized/Motorcycle

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- CULTURAL Cultural Class I low
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E

### Rationale

#### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

#### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

### Previous Alternatives Analyzed

**Alternative A:** Vehicles under 50" wide

**Alternative B:** Vehicles under 50" wide

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

### Public Comments On Route: 180

- No public comments for this Route

### Route: 1803

#### Segment: 741

### Designation

#### Current Designation

Open (All modes of travel)

#### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

#### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk winter concentration areas
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I high
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches >60 acres

### Rationale

#### Designation Criteria

- **No designation criteria for this route segment.**

## Route: 1804

### Segment: 731

#### Designation

##### Current Designation

Open, seek re-route or mitigation

##### Mitigation Criteria

- Drainage Crossing
- Riparian

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk severe winter range
- RIPARIAN Riparian 1 stream crossing
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I high
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches <60 acres

#### Rationale

##### Designation Criteria

- **Recreation:** Rec opportunities – general, RMA objectives

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Admin/Permitted Use Only

**Alternative C:** Admin/Permitted Use Only

**Alternative D:** Open (All modes of travel)

### Route: 1806

#### Segment: 727

##### Designation

**Current Designation**  
Wilderness

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I high
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- No designation criteria for this route segment.

##### Rationale for Decision

- Non-system route inside the wilderness.

#### Previous Alternatives Analyzed

**Alternative A:** Foot/Horse

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Not Rehabbed)

**Alternative D:** Closed (Rehab)

### Public Comments On Route: 1806

- No public comments for this Route

### Route: 1807

#### Segment: 724

## Designation [?](#)

### Current Designation

Admin/Permitted Use Only

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I high
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- **Minimize Damage:** Fragile soils SSR
- **Minimize Harassment:** PPSV- Minimize fragmentation, Big game winter range – close

### Rationale for Decision

- Route was designated to ensure access to rights-of-way, private property, and livestock grazing facilities.

## Previous Alternatives Analyzed

**Alternative A:** Admin/Permitted Use Only

**Alternative B:** Admin/Permitted Use Only

**Alternative C:** Admin/Permitted Use Only

**Alternative D:** Open (All modes of travel)

## Public Comments On Route: 1807

- No public comments for this Route

## Route: 1809

### Segment: 714

## Route: 181

### Segment: 2619

#### Designation ?

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I low
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- Minimize Damage:** Fragile soils SSR, NHT – close routes for setting
- Minimize Harassment:** PPSV- Minimize fragmentation

##### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to improve natural setting along the Old Spanish National Historic Trail.
- Route was designated to reduce fragmentation in Priority Vegetation types

#### Previous Alternatives Analyzed

**Alternative A:** Vehicles under 50" wide

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 181

- No public comments for this Route

## Route: 1810

### Segment: 738

#### Designation ?

##### Current Designation

Foot/Horse

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation access to dispersed campsite
- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk winter concentration areas
- WILDLIFE Elk severe winter range
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I high
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E

- SSPLANT Special Status Species sensitive species planes
- VEGETATION Sagebrush patches <60 acres

## Rationale

### Designation Criteria

- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

Comment ID: 000000106-212

- 208-195-186-182-243-257-262-253-240-221-198 I support the Quiet Trail Group's position of designating this loop for quiet trail users. The top segments 208-195-186-176 should be Mtn Bike, to connect with the Alt E proposed designation for 182-243. Note that 243 should not be designated Motorcycle as it is in Alt E as it is a short segment connecting two Mtn Bike routes. The rest of the loop should be Horse/foot as shown in Alt E. This approximately 4 mile loop makes a great short enjoyable hike. I've even done it with a group of friends on a July morning. The city high that day was 93. We finished the hike in the morning when the temperatures were still moderate. Afterwards we enjoyed lunch together at a restaurant on Orchard Mesa (local economic benefit). It is important to me to have easy access to such short quiet use loops within the NCA that are close to the city so that my friends and I can get some exercise together while enjoying each other's company even in summer months. On the height of land crossed by 240, there is a wonderful view back down the valley. The track blends in and the valley looks pristine and untouched by humans. It gives me a small sense of what it must have been like to be the first explorer here. I'd love to find other trails like this. Near 176, there is a pretty little dry fall. And the rock in the area is a conglomerate which is such an interesting contrast to vast amounts of sandstone. On foot it is fun to find such interesting anomalies. That is what is so great about hiking on 186-176-182, you have time to see the contrast and recognize the uniqueness of the area. There's time for my friends and me to admire the power of natural forces. We like this hike because of the sense of discovery of small and large details about the geology of the area.

### Route: 183

#### Segment: 2631

#### Designation [?](#)

##### Current Designation

Open (All modes of travel)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- CULTURAL Cultural Class I low

- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general, Rec opportunities - specific

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

## Public Comments On Route: 183

Organization, commenter: Bob Janowski

Comment ID: 000000151-2

- Road 168: This road leads to a unique lookout with a beautiful view of Kannah Creek meeting the Gunnison. In the summer we travel this road by ATV, and in the winter's cold we travel this frozen road in a Jeep. We've been out to this point three times in the last 9 months always with friends or neighbors. It is a great destination in a Jeep for a sunny, winter afternoon wiener roast. Once again, with all the above as background, I recommend that road 168 remain open to Jeeps. Access to 168 is by roads 196 and a portion of 183. From the junction of 236 and 254 use 196. Connect to the northern portion of 183 which is between 196 and 168. I recommend that 196 and the northern portion of 183 remain open to Jeeps. I do support the ATV designation for 183 south of the 183/196 junction. I also support the ATV designation for 255 along the rim north of its junction with 254.

Organization, commenter: Janice Shepherd  
/Mechanized/Motorcycle

Comment ID: 000000106-211

• Alt E should not have 179, 186, 195 and 208 designated as ATV as they were inventoried as single track. See "Photo Comparison" at bottom of comment. Unfortunately as can be seen in the photos, some users have taken it upon themselves to widen some of these from single tracks to 2-tracks. These need to be rehabbed back to being single tracks.

## Route: 189

### Segment: 2605

#### Designation [?](#)

##### Current Designation

Open (All modes of travel)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general, Rec opportunities - specific

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Admin/Permitted Use Only

**Alternative C:** Admin/Permitted Use Only

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 189

## Route: 190

### Segment: 2603

#### Designation [?](#)

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Minimize Damage:** NHT – close routes for setting, Fragile soils SSR

- **Minimize Harassment:** PPSV- Minimize fragmentation

### Rationale for Decision

- Route was designated to improve natural setting along the Old Spanish National Historic Trail.
- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to reduce fragmentation in Priority Vegetation types

### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

### Public Comments On Route: 190

- No public comments for this Route

### Route: 191

#### Segment: 2606

#### Designation

##### Current Designation

Vehicles under 50" wide

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open, seek re-route or mitigation

**Alternative C:** Closed (Rehab)

**Alternative D:** Open, seek re-route or mitigation

### Public Comments On Route: 191

- No public comments for this Route

### Route: 192

#### Segment: 2638

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- RIPARIAN Riparian 1 stream crossing
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Indirect impact
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Minimize Damage:** NHT – close routes for setting, SS Plants-SSR within 100m, Riparian—ephemeral streams SSR 30 m

**Minimize Harassment:** PPSV- Minimize fragmentation

### Rationale for Decision

- Route was designated to improve natural setting along the Old Spanish National Historic Trail.
- Route was designated to protect and enhance special status fish, wildlife, and plant populations.
- Route was designated to minimize travel routes in and crossing riparian and wetland areas.
- Route was designated to reduce fragmentation in Priority Vegetation types

### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**/Mechanized/Motorcycle**

Comment ID: 000000106-211

- Alt E should not have 179, 186, 195 and 208 designated as ATV as they were inventoried as single track. See "Photo Comparison" at bottom of comment. Unfortunately as can be seen in the photos, some users have taken it upon themselves to widen some of these from single tracks to 2-tracks. These need to be rehabbed back to being single tracks.

- 208-195-186-182-243-257-262-253-240-221-198 I support the Quiet Trail Group's position of designating this loop for quiet trail users. The top segments 208-195-186-176 should be Mtn Bike, to connect with the Alt E proposed designation for 182-243. Note that 243 should not be designated Motorcycle as it is in Alt E as it is a short segment connecting two Mtn Bike routes. The rest of the loop should be Horse/foot as shown in Alt E. This approximately 4 mile loop makes a great short enjoyable hike. I've even done it with a group of friends on a July morning. The city high that day was 93. We finished the hike in the morning when the temperatures were still moderate. Afterwards we enjoyed lunch together at a restaurant on Orchard Mesa (local economic benefit). It is important to me to have easy access to such short quiet use loops within the NCA that are close to the city so that my friends and I can get some exercise together while enjoying each other's company even in summer months. On the height of land crossed by 240, there is a wonderful view back down the valley. The track blends in and the valley looks pristine and untouched by humans. It gives me a small sense of what it must have been like to be the first explorer here. I'd love to find other trails like this. Near 176, there is a pretty little dry fall. And the rock in the area is a conglomerate which is such an interesting contrast to vast amounts of sandstone. On foot it is fun to find such interesting anomalies. That is what is so great about hiking on 186-176-182, you have time to see the contrast and recognize the uniqueness of the area. There's time for my friends and me to admire the power of natural forces. We like this hike because of the sense of discovery of small and large details about the geology of the area.

• Road 168: This road leads to a unique lookout with a beautiful view of Kannah Creek meeting the Gunnison. In the summer we travel this road by ATV, and in the winter's cold we travel this frozen road in a Jeep. We've been out to this point three times in the last 9 months always with friends or neighbors. It is a great destination in a Jeep for a sunny, winter afternoon wiener roast. Once again, with all the above as background, I recommend that road 168 remain open to Jeeps. Access to 168 is by roads 196 and a portion of 183. From the junction of 236 and 254 use 196. Connect to the northern portion of 183 which is between 196 and 168. I recommend that 196 and the northern portion of 183 remain open to Jeeps. I do support the ATV designation for 183 south of the 183/196 junction. I also support the ATV designation for 255 along the rim north of its junction with 254.

• 208-195-186-182-243-257-262-253-240-221-198 I support the Quiet Trail Group's position of designating this loop for quiet trail users. The top segments 208-195-186-176 should be Mtn Bike, to connect with the Alt E proposed designation for 182-243. Note that 243 should not be designated Motorcycle as it is in Alt E as it is a short segment connecting two Mtn Bike routes. The rest of the loop should be Horse/foot as shown in Alt E. This approximately 4 mile loop makes a great short enjoyable hike. I've even done it with a group of friends on a July morning. The city high that day was 93. We finished the hike in the morning when the temperatures were still moderate. Afterwards we enjoyed lunch together at a restaurant on Orchard Mesa (local economic benefit). It is important to me to have easy access to such short quiet use loops within the NCA that are close to the city so that my friends and I can get some exercise together while enjoying each other's company even in summer months. On the height of land crossed by 240, there is a wonderful view back down the valley. The track blends in and the valley looks pristine and untouched by humans. It gives me a small sense of what it must have been like to be the first explorer here. I'd love to find other trails like this. Near 176, there is a pretty little dry fall. And the rock in the area is a conglomerate which is such an interesting contrast to vast amounts of sandstone. On foot it is fun to find such interesting anomalies. That is what is so great about hiking on 186-176-182, you have time to see the contrast and recognize the uniqueness of the area. There's time for my friends and me to admire the power of natural forces. We like this hike because of the sense of discovery of small and large details about the geology of the area.

## Public Comments On Route: 2001

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 000000135-28

- I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 2003

• Sowlbelly Ridge: This is an area which my family and I have hunted for decades. We are meat hunters, not sport hunters, and depend on the elk, deer and bear meat we get to supplement our food supply through the winter. It has become increasingly difficult to get to where the animals are because of roads which have already been closed. I would ask that roads numbered 2571, 2597, 2598, 2601, 3162, 2089, and 2166 remain open. We need roads to help in game retrieval. This area is usually still "t-shirt" weather in October when we hunt, which means very warm temperatures. If an animal is left for too long in that weather, it will spoil if it isn't skinned, gutted and transported as soon as possible to a meat locker. We typically get the meat out of the back country where it was killed and get it to camp to hang overnight and then immediately take it to GJ to a meat locker. We don't "road hunt"; we take our ATVs to the edge our hunting area and then start walking usually all day and for many miles. Even if we are lucky enough to get our game, none of us, even young, strong guys, can carry more than a quarter of an elk at a time very far, as has been suggested. This would mean 4 trips to carry an animal out and it can't be done before the meat spoils. So which law should we break? The law that says you can't use an ATV on an existing road to retrieve game or the law that says you can't waste meat without facing a stiff fine? These roads are currently open and I ask that they remain open for game retrieval using ATVs: 2168, 2122, 2121, 2169 & 2170, 2596, 2171, 2003, 3145, 2182, 2179, 2178, 3143 and 2181.

• Escalante Rd/Dry Mesa Rd, Sawmill Mesa Rd & 25 Mesa Rd areas: Due to hunting access use, and OHV recreation, I would like to see trail #'s 2166, 2168 & 2122, which are currently open to atv use, remain open to access as they currently are today. Other trails I'd like to see remain open as currently are, for same purposes, are #2169, 2596, 2171, 2003, 2122, 3145, 2182, 2179, 2178, 3143, 2181. These roads & trails are important to hunting access. Between Dry Mesa Rd & Sawmill Mesa Rd, I'd like for trails #'s 2243, 2244, 2248, 2249 and 2136 to remain open for atv use, as they currently are. These trails provide alternative route vs. having to travel on the main access roadways (Sawmill Mesa or Dry Mesa) and provide unique OHV recreation value for the activity I love to participate in. Alternative B & E designate these for horse and foot traffic and I'd like to see them remain open to atv activity as they currently are today. Trail # 2006, 2299, 2298, 2297 are slated for closure in Alt's B & E, but perhaps those would make a good horse/foot route vs. closure.

Comment ID: 00000135-4

• we appreciate the route closures in the preferred alternative. However, as you will see in our attached 2011 route-specific comments, we are concerned about the routes left open in the draft TMP that we and others had recommended for closure, in particular: o The two ATV trails (Numbers 3162/2089/2166, and 2596/2171/2003) in the Dominguez Addition Unit that need to be closed a) to protect this unit and b) to prevent the likelihood of incursions into the Dominguez wilderness, due to remote, unmanageable and unenforceable terrain. o Palmer Gulch road #2169/2170, needs to be closed. o Road #2181 needs to be closed to OHVs. o 1778/1727 o 1782/1768/2602 in Sawmill Mesa and Wagon Park zonos 1756 should be closed at the junction with 1758, and include closure of

roads 1593 and 1585

• Manage Gunnison Slopes Unit and Dominguez Addition Unit as Lands with Wilderness Characteristics ERMA status for Gunnison Slopes is a good start, but it needs the additional protection as a LWC as well. Dominguez Addition also needs to be included as a LWC, and the two ATV routes currently open in the preferred Alternative (roads 3162/2089/2166, and 2596/2171/2003) definitively closed to maintain this area's wild character

Comment ID: 00000156-18

• Comments on Travel Management Plan The following comments are based upon my review of the Map of Route by Route Designations for Alternative E (Map N-1E) in relationship to the resource management goals and objectives of the NCA. As previously stated, we are concerned that wilderness characteristics within the Dominguez Addition Unit would be highly impacted by the preferred alternative through the inclusion of two ATV trails within the Unit. Both of these ATV trails are currently low-standard two-track roads that extend into the Dominguez Wilderness. The preferred alternative would restrict the use of these roads to ATV's and the trails would theoretically dead end at the Wilderness boundary. Even if ATV riders did respect the Wilderness boundary, these motorized trails would degrade the wilderness values of the Dominguez Addition Unit. For this reason we are recommending that these two roads (roads 3162/2089/2166, and 2596/2171/2003) be converted to non-motorized trails to provide big game solitude, backcountry hunting, and quiet recreation use opportunities.

Comment ID: 00000156-4

• Two other units with wilderness characteristics occur within the D-E NCA that are not included within the preferred alternative. Wilderness characteristics within the Gunnison Slopes Unit appear to have been largely protected through management of this area as an ERMA that would emphasize equestrian and hiking trail activities and dispersed camping. This management strategy seems reasonable to provide camping opportunities along the Gunnison River to accommodate boating use on the river while maintaining an overall primitive setting. However, wilderness characteristics within the Dominguez Addition Unit would be highly impacted by the preferred alternative through the inclusion of two ATV trails within the Unit. Both of these ATV trails are currently low-standard two-track roads that extend into the Dominguez Wilderness. The preferred alternative would restrict the use of these roads to ATV's and the trails would theoretically dead end at the Wilderness boundary. Even if ATV riders did respect the Wilderness boundary, these motorized trails would degrade the wilderness values of the Dominguez Addition Unit. For this reason we are recommending that these two roads (roads 3162/2089/2166, and 2596/2171/2003) be converted to non-motorized trails to provide big game solitude, backcountry hunting, and quiet recreation use opportunities

• IV. TRANSPORTATION AND TRAVEL MANAGEMENT Mr. Miller's owns various parcels of private property and multiple water diversions in the area in question, and must access these lands via roads and trails which currently cross public land. In addition, Mr. Miller must necessarily access various roads and trails to in the course of managing his livestock operation. The EIS proposes closing various roads and trails to public motorized travel, to minimize resource damage caused by the public on both public and private lands. EIS at 157, 187. Mr. Miller supports the BLM's proposal to restrict public access to protect public and private property, but only so long as he is not restricted from using these roads as may be necessary to access his private lands and manage his livestock operation. Thus, to the extent that the BLM wishes to close roads to motorized public traffic, it should simultaneously grant Mr. Miller legal, administrative access. In addition, Mr. Miller notes that he would be entitled to a formal decision, subject to appeal, prior to the BLM restricting access to his private property and/or otherwise impacting his livestock operation. Mr. Miller notes that the BLM has misclassified many routes. See EIS Map N-1 e. Specifically, many routes which have historically been used to access private land and water diversions, and/or are necessary to maintain livestock improvements or otherwise manage and operate Mr. Miller's livestock operation, have been incorrectly labeled as closed or otherwise restricted in their use. These routes should be classified as "administrative," to recognize these historic uses and to allow for continued uses consistent therewith. The Routes which have been incorrectly classified and which should be classified as "administrative" are as follows: Routes 460, 1220, 1243, 2003, 2053, 2073, 2086, 2089, 2121, 2122, 2126, 2156, 2166, 2168, 2171, 2172, 2177, 2180, 2336, 2342, 2354, 2408, 2412, 2445, 2581, 2582, 2583, 2585, 2587, 2588, 2590, 2591, 2593, 2595, 2596, 2598, 2599, 2612, 2613, 2622, 2691, 3011, 3048, 3070, 3131, 3141, and 3158. See EIS Map N-1e. In addition, Route 2072 is not completely depicted on the map, in that it extends down the river, across BLM and private property, an additional 2-3 miles, and likewise Route 3048 extends an additional 0.75 miles and leads to private property. Id. Fina Uy, Map N-1e incorrectly labels Mr. Miller's privately owned bridge, which crosses the Gunnison River at the Bridgeport area, as "administrative." I d. Mr. Miller requests that the BLM correct these errors and mis-classifications.

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 2004

### Segment: 156

#### Designation

##### Current Designation

Vehicles under 50" wide

##### Mitigation Criteria

- Reroute
- Reroute to the edge of the Sagebrush

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- SOIL Soils Steep Slopes 40%
- SOIL Soils Fragile
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk winter concentration areas
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density high in Alt A

- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches >60 acres

## Rationale

### Designation Criteria

- **Recreation:** Rec opportunities – general, RMA objectives
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Vehicles under 50" wide

**Alternative C:** Closed (Rehab)

**Alternative D:** Vehicles under 50" wide

## Public Comments On Route: 2004

Organization, commenter: Janice Shepherd

- 2004 and 3086 in the KML version don't connect with the county road at their intersection, guessing they do in reality.

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 000000135-23

- Dry Mesa Road Dry Mesa Road similarly has numerous parallel and duplicative routes and loops that are severely and unnecessarily fragmenting what has been a relatively intact habitat area. This spiderweb of routes did not exist a few years ago and should not be legitimized, just because new mobile technologies have the ability to get into these areas. Needing closure and obliteration specifically are routes 3105, 3104 2199, 2200, 2004, 2206, 2109, 2112, 2110, 2111, 3086, 2203, 2058, 2204, 2023. Effective closure and obliteration of these purposeless, randomly-created routes is necessary to restore the integrity of what was until recently a wild and remote landscape

As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 2005

### Segment: 608

## Designation ?

### Current Designation

Open, seek re-route or mitigation

### Mitigation Criteria

- Reroute
- Needs Data - Bighorn Sheep

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- SOIL Soils Fragile
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- SSPLANT Special Status Species Colorado hookless cactus

## Rationale

### Designation Criteria

- **No designation criteria for this route segment.**

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 2005

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 000000135-28

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 2006

### Segment: 605

#### Designation [?](#)

##### Current Designation

Closed, seek re-route or mitigation

##### Designation Following Mitigation

Foot/Horse

##### Mitigation Criteria

- Needs Data - SSS Plants

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Range access for general livestock management
- WILDLIFE Mule deer severe winter range
- RIPARIAN Riparian 1 stream crossing
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I moderate
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E
- SSPLANT Special Status Species Colorado hookless cactus

#### Rationale

##### Designation Criteria

- **Minimize Damage:** Cactus – reduce density within 200m
- **Minimize Harassment:** PPSV- Minimize fragmentation
- **Recreation:** RMA objectives, Rec opportunities – general
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

• Dry Mesa Rd. and Sawmill Mesa Rd.: Roads 2243, 2248, 2249 and 2136 are currently open for ATV use and I would like to see them remain so. It would make sense to also leave 2006, 2299, 2298, 2297 left open to horse/foot traffic, thereby providing multi-use with little user conflict

Organization, commenter: Jolene George

Comment ID: 000000096-5

• 5. Route # 2006, 2008, 2299, 2298, 2007, and 2297 are designated as "closed" because they don't connect into any other trails. I disagree with your assessment that this trail lacks an identified use. This trail provides all recreationalists a way to access the gullies and other topographic features of the immediate area for hiking, exploring, sightseeing, picnicking, solitude etc... This trail should remain open.

Organization, commenter: Tracey Rohde

Comment ID: 00000103-4

• Escalante Rd/Dry Mesa Rd, Sawmill Mesa Rd & 25 Mesa Rd areas: Due to hunting access use, and OHV recreation, I would like to see trail #'s 2166, 2168 & 2122, which are currently open to atv use, remain open to access as they currently are today. Other trails I'd like to see remain open as currently are, for same purposes, are #2169, 2596, 2171, 2003, 2122, 3145, 2182, 2179, 2178, 3143, 2181. These roads & trails are important to hunting access. Between Dry Mesa Rd & Sawmill Mesa Rd, I'd like for trails #'s 2243, 2244, 2248, 2249 and 2136 to remain open for atv use, as they currently are. These trails provide alternative route vs. having to travel on the main access roadways (Sawmill Mesa or Dry Mesa) and provide unique OHV recreation value for the activity I love to participate in. Alternative B & E designate these for horse and foot traffic and I'd like to see them remain open to atv activity as they currently are today. Trail # 2006, 2299, 2298, 2297 are slated for closure in Alt's B & E, but perhaps those would make a good horse/foot route vs. closure.

• The following high value recreational routes/roads are legal RS 2477 ROW's in the State of Colorado, Mesa County and the BLM does not have the jurisdiction to close them: 500, 472, 518, 521, 530, 39, 127, 572, 566, 66, 65, 148, 71, 74, 587, 595, 608, 622, 628, 635, 624, 609, 611, 706, 678, 700, 719, 726, 696, 26, 936, 847, 849, 919, 767, 824, 96, 822, 817, 950, 1021, 900, 2682, 1020, 1003, 1084, 1142, 1184, 1156, 1198, 1349, 1308, 1310, 1238, 1263, 1122, 1170, 1192, 974, 941, 1076, 1039, 1018, 1759, 1764, 1758, 1174, 1788, 1798, 1669, 1699, 1773, 1755, 1779, 1750, 1751, 1792, 1720, 1726, 1727, 1720, 1722, 1803, 1805, 1809, 1614, 1609, 1605, 1608, 1571, 1526, 1516, 1448, 755, 807, 900, 10, 48, 924, 950, 1005, 965, 8, 1115, 981, 984, 1135, 2678, 1249, 1171, 1150, 1249, 1320, 1235, 1236, 1228, 1227, 1409, 1456, 1349, 1308, 1513, 1221, 1550, 1567, 1641, 1612, 1740, 1688, 2597, 2598, 2601, 2440, 3160, 3162, 2089, 2166, 2170, 2596, 2171, 2003, 2122, 2126, 2189, 3145, 2182, 2179, 2178, 3143, 2181, 2121, 2122, 2168, 2126, 2180, 2095, 2173, 2174, 2620, 2129, 1686, 1692, 1667, 1647, 1631, 1613, 1596, 1549, 1541, 2647, 1633, 1605, 1608, 1571, 2645, 1507, 1448, 1496, 1516, 1504, 1510, 1508, 1509, 439, 431, 456, 461, 460, 391, 423, 415, 419, 407, 402, 367, 372, 339, 298, 338, 105, 368, 374, 393, 389, 390, 376, 377, 351, 350, 121, 345, 320, 301, 251, 234, 232, 205, 344, 107, 103, 152, 153, 161, 168, 3199, 188, 196, 255, 254, 236, 294, 242, 219, 201, 169, 162, 158, 160, 173. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 201

### Segment: 2620

#### Designation

**Current Designation**  
Open (All modes of travel)

#### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

#### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

### Rationale

#### Designation Criteria

- Recreation:** RMA objectives, Rec opportunities – general

#### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Admin/Permitted Use Only

**Alternative C:** Admin/Permitted Use Only

**Alternative D:** Admin/Permitted Use Only

## Route: 2010

### Segment: 686

#### Designation

**Current Designation**  
Closed (Rehab)

#### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

#### Planning Criteria

RECREATION Recreation opportunities for access to and across federal lands

- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- SMAs River Rims ACEC
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- **Minimize Harassment:** PPSV- Minimize fragmentation, Bighorn – SSR -- summer range
- **Wilderness / Natural Area:** ACEC-River Rims close within 200m cactus

### Rationale for Decision

- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to reduce the miles of motorized and mechanized routes in bighorn sheep habitat.
- Route was designated to protect Colorado hookless cactus within the River Rims ACEC

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed, seek re-route or mitigation

## Public Comments On Route: 2010

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 00000135-28

- I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 2013

### Segment: 314

## Designation [?](#)

### Current Designation

Closed (Rehab)

### Mitigation Criteria

- Needs Data - Cultural

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- SOIL Soils Fragile
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk severe winter range
- WILDLIFE Big game winter concentration areas
- WILDLIFE Big game summer concentration areas
- CULTURAL Cultural Class I low
- SMAs Wild and Scenic River area
- GEOPALEO Paleontological direct impact
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- **Minimize Damage:** Geo/paleo – SSR in key sites, Cultural – SSR within 100m sites
- **Minimize Harassment:** Bighorn – Close and rehab --wincon

### Rationale for Decision

- Route was designated to protect geologic and paleontologic resources.
- Route was designated to minimize impacts to cultural resources.
- Route was designated to reduce the miles of motorized and mechanized routes in bighorn sheep habitat.

## Public Comments On Route: 2013

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 00000135-26

• Cottonwood Creek This creek is a rare example of an almost completely unroaded, untrailed stream corridor for most of its length until it reaches Roubideau Creek and the Gunnison River. Unplanned, damaging routes along Cottonwood Creek upstream near the Forest Service boundary should all be closed to create an undisturbed full stretch of riparian corridor. Randomly created routes needing closure are: 2152, 2149, 2147, 2148, 2439, 2153, 2154, 2156. Closing these routes would restore a relatively intact watershed. Routes needing closure at the northern end of Cottonwood Creek, for the same reason, are: 3087, 3088, 3082, 3083, 3080, 3015, 2370, 2089, 2100, 3079, 3047, 2396, 2013, 3128, 3169, 2014, 2162, 2160, 2493, 3005. Some of these routes spur off 25 Mesa Road and do not actually enter the Cottonwood Creek drainage, but most if not all are not purposely created, not planned, are randomly scarring the landscape, and are introducing difficult to enforce ORV use. Only a few, if any should be left open, that have an overriding need and purpose. All the user-created routes descending into Cottonwood Creek should be closed, including 2100, 2370, 2099, and the whole tangle of routes 3169, etc etc

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 00000135-27

• Orchard Point, Stone Basin recommended closures Fragmenting, random routes needing closure north of Peach Orchard Point and Grade Gulch are 2261, 2260, 2251, 3117, 2114, 2365, 3116, 3114, 2362, 2048, 2238, 2236, 2237, 3113, , 2239, 2359, 2049, 2358, 2105, 3115, 2363, 2367, 2369, 2103, 3074, 3078, 2229, 2045, 3112, 3165, 3166, 2104, 2363, 2360, 2367, 2369, 3165, 2375, 2388, 3007, 2391, 2117, 2381, 2118, 3174, 2030, 3178, 2056, 3072, 2394, 3155, 3156, 2490, 3171, 2099, 3070, 3047, 2013, 3172, 2409. Recommended closures near the Narrows: 3047, 2396, 2013, 3128, 2014, 3169, 3005, 2162, 2160, 2493, 3005, 2099, 2370. Kelso Gulch needed closures are 3092, 3157, 2301, 3057, 2031, 3026, 3024, 3170, 3167, 3060, 3061, 2087, 3158, 2490, 3172, 3014

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 2015

### Segment: 413

#### Designation

##### Current Designation

Open (All modes of travel)

##### Mitigation Criteria

- Needs Data - SSS Plants

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- SOIL Soils Steep Slopes 40%
- SOIL Soils Fragile
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density medium in Alt A

- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Public Comments On Route: 2023

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 00000135-23

- Dry Mesa Road/Dry Mesa Road similarly has numerous parallel and duplicative routes and loops that are severely and unnecessarily fragmenting what has been a relatively intact habitat area. This spiderweb of routes did not exist a few years ago and should not be legitimized, just because new mobile technologies have the ability to get into these areas. Needing closure and obliteration specifically are routes 3105, 3104 2199, 2200, 2004, 2206, 2109, 2112, 2110, 2111, 3086, 2203, 2058, 2204, 2023. Effective closure and obliteration of these purposeless, randomly-created routes is necessary to restore the integrity of what was until recently a wild and remote landscape

Organization, commenter: Quiet Trails Group, Sherry Schenk

Comment ID: 000000115-67

[Wagon Park/Sawmill Mesa (South) TMP-Level Comments: Quiet Trails Group supports the management decisions shown in Alternative E for the southern Sawmill Mesa area with the following specific suggestions:] Route 2024: We support closing 2024 as it appears to be a duplicative route. The surrounding routes 2578-3006-2232-2231 and 2579-3108-2210-2344 connect to Forest Service trails. If there are cattle or other uses for this road not shown on the map, we would support an administrative designation. Otherwise we would like to see 2024 closed to reduce route density in the area because of the presence of big game. We also see that these routes stop at the Dry Fork LWC unit; we would urge the BLM to make sure there is a topographical or physical barrier to stop motorized access into the LWC. Please put signage back at the Forest Boundary that the routes dead-end ahead.

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 000000135-24

Black Point Draw/Black Point Three routes between Dry Mesa and the CDOW road leading north east to Cactus Park are redundant and unnecessarily fragmenting. 2579-2210-2344 is recently pioneered and should be closed immediately, along with its spurs 2136, 2209, 2208 and 3094. These encroach on a relatively wild Escalante Creek canyon and have had no traditional or long-term use or purpose. 2024 and 3006 are parallel and duplicative, provide the same experience as each other, and should be reduced to one route. The BLM should decide which route is the least damaging, and disturbing to wildlife, and easiest to enforce, and close the other one

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 2025

### Segment: 183

#### Designation [?](#)

##### Current Designation

Vehicles under 50" wide

##### Mitigation Criteria

- Reroute
- Verify if reroute is needed or a connection

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- SOIL Soils Fragile
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk winter concentration areas
- WILDLIFE Elk severe winter range
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I high
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches <60 acres

#### Rationale

##### Designation Criteria

- **Recreation:** Rec opportunities – general, RMA objectives
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.
