## Public Comments On Route: 2025

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 00000135-22

• Little Mesa spurs Numerous damaging and randomly created spurs and loops branch off from Little Mesa Road, 2026-2025-2187 and should be closed. These include 2059, 2188, 2190, 3100, 2191, 2192, 2197, 2198, 3104, 3099, 3104. If some of these would make a link between Little Mesa and Dry Mesa, there should be one route only and it should be a full size vehicle 4WD route rather than an ATV route. Full-size vehicles are the traditional use of this county, whereas ATVs introduce a new, noisy, "go-anywhere," unenforceable use that is incompatible with the traditional rugged, remote and solitary setting of this area

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 00000135-28

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 2026

### Segment: 152

#### Designation [?](#)

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

## Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- SOIL Soils Steep Slopes 40%
- SOIL Soils Fragile
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk winter concentration areas
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I high
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches <60 acres

## Rationale

### Designation Criteria

- **Minimize Damage:** Fragile soils SSR
- **Minimize Harassment:** Sage-Minimize fragmentation

### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to reduce fragmentation of sagebrush patches

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed, seek re-route or mitigation

Comment ID: 000000135-28

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

Organization, commenter: Quiet Trails Group, Sherry Schenk

Comment ID: 00000115-68

• [Wagon Park/Sawmill Mesa (South) TMP-Level Comments: Quiet Trails Group supports the management decisions shown in Alternative E for the southern Sawmill Mesa area with the following specific suggestions:] Routes 3181-2399-2398-2354-2029-2376-2377-2378-2383-2382-2380: We would like to see these routes open to mechanical use (mountain biking) as it would create a bike loop system connecting Escalante Rim Rd to Sawmill Mesa Rd down to the northeast boundary of the NCA. We believe this area has the potential to provide a dynamic bicycling experience with trails of a variety of lengths and difficulties that lead to beautiful views and are easily accessible from Delta.

Comment ID: 000000135-28

- I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness.Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources.As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use.The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles.What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures.All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 2031

### Segment: 552

#### Designation

##### Current Designation

Open, seek re-route or mitigation

##### Mitigation Criteria

- Riparian

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- SOIL Soils Fragile
- WILDLIFE Mule deer severe winter range
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I low
- DENSITY Route density medium in Alt A
- DENSITY Route density medium in Alt E

#### Rationale

##### Designation Criteria

- No designation criteria for this route segment.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 2033

### Segment: 796

#### Designation ?

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- SOIL Soils Fragile
- WILDLIFE Mule deer severe winter range
- RIPARIAN Riparian crossing perennial stream
- CULTURAL Cultural Class I low
- SMAs Wild and Scenic River area
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- SSPLANT Special Status Species Colorado hookless cactus

#### Rationale

##### Designation Criteria

- **Minimize Damage:** Cactus – reduce density within 200m, Cultural – SSR within 100m sites
- **Minimize Harassment:** PPSV- Minimize fragmentation

##### Rationale for Decision

- Route was designated to reduce the density of routes within 200 meters of known Colorado hookless Cactus occurrences.
- Route was designated to minimize impacts to cultural resources.
- Route was designated to reduce fragmentation in Priority Vegetation types

#### Previous Alternatives Analyzed

Comment ID: 000000193-10

• 5. Since the BLM's route designations will become Implementation Decisions in the D-E NCA Comprehensive Travel and Transportation Management Plan (DRMP, page 22) it is critical that all of DMEA's access routes be accurately shown, and designated as 'Open' or 'Administrative Use Only' under all alternatives. This includes, but is not limited to, portions of the following numbered travel routes, as identified on the DENCA Draft RMP Route by Route Designation Figures (Figures N-1b\_Alt\_B\_CTMP; N-1c\_Alt\_C\_CTMP; N-1d\_Alt\_D\_CTMP; and N-1e\_Alt\_E\_CTMP): 2495, 2496, 2459, 2313, 2461, 2462, 2352, 2470, 2476, 3192, 2035, 2336, 2342.6. Designation of DMEA's access routes as 'Open' or 'Administrative Use Only' is consistent with the BLM's guidelines for the Dominguez-Escalante National Conservation Area Draft Resource Management Plan and Environmental Impact Statement, April 2013 Appendix N Comprehensive Travel and Transportation Management Plan Route-by-Route Designation, which states: "Through the process of route-by-route designation, the interdisciplinary team established some guidelines that were applied across all four action alternatives (Alternatives B, C, D, and E) .... 5. Routes that are associated with, or provide primary access to, established right-of-ways were either designated as open or as limited to administrative use only." (pages 899 and 900).

Organization, commenter: Delta-Montrose Electric Association (DMEA)

Comment ID: 000000193-2

• Route Specific Comments 1. Among the RMP alternatives, the No Action Alternative is preferred by DMEA since it allows for the continued use of existing access routes for the maintenance, repair and replacement of existing distribution lines and poles. DMEA does not believe there would be any significant impact to the maintenance, repair or replacement of the existing distribution system and access routes, under the No Action Alternative. 2. Alternative B would result in significant impacts to DMEA's ability to maintain, repair, replace or upgrade portions of the existing distribution lines within the NCA planning area. Under this alternative a number of DMEA access routes would be closed (e.g. 2496, 2035) or limited to ATV use only (e.g. 2336). Access restrictions would severely harm DMEA's ability to operate and maintain existing electrical distribution facilities as required by federal laws governing electric cooperatives/suppliers, and in accordance with our established standards. For access and maintenance of facilities, in all cases DMEA is requesting the use of existing roads and when roads are not available, the use of right-of-way for access. 3. Alternative C would result in the majority of existing DMEA access routes being designated as 'Administrative Use Only' (e.g. 2496, 2495, 2462, 2461, 2459, 2313, 3192). Based on the assumption that as a BLM right-of-way grant holder DMEA would have 'Administrative Use' and be allowed continued access to our distribution lines, no significant impacts would occur with this designation. Significant impacts would occur, however, where access is denied due to 'Closed' travel routes (e.g. 2336). 4. Alternative D would result in the majority of DMEA's access routes being designated as 'Open' north of the Gunnison River (e.g. 2496, 2495), while the majority of DMEA's access routes south of the river would be designated as 'Bicycle' (e.g. 2461, 2462, 2459, and 2313). In addition, this alternative would also designate several of DMEA's access routes as either 'Closed' or 'Administration Use Only'. Significant negative impacts to DMEA and our customers served off these lines would occur when DMEA's access is unreasonably limited or denied. No significant impacts would be expected where access routes are designated as 'Open' or 'Administrative Use Only'. 5. Alternative E would result in significant impacts to DMEA's ability to maintain, repair and replace portions of the existing distribution lines within the NCA planning area. Under this alternative a number of DMEA access routes would be 'Closed' (e.g. 2496, 2463) or limited to 'ATV' use (e.g. 2461, 2462, 2459). Again, these limitations on access would not permit DMEA to continue operating and maintaining the existing electrical facilities in this area in accordance with federal regulations and DMEA's established standards. Significant and serious impacts would occur where access routes to DMEA's distribution lines are designated as 'Closed', or 'ATV'.

## Route: 2036

### Segment: 3272

#### Designation

##### Current Designation

Admin/Permitted Use Only

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- LANDS DMEA access route
- SOIL Soils Fragile
- WILDLIFE Mule deer severe winter range
- RIPARIAN Riparian crossing perennial stream
- CULTURAL Cultural Class I moderate
- SMAs Wild and Scenic River area
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Minimize Damage:** Cactus – reduce density within 200m
- **Minimize Harassment:** PPSV- Minimize fragmentation

##### Rationale for Decision

- Route was designated to ensure access to rights-of-way, private property, and livestock grazing facilities.

#### Previous Alternatives Analyzed

**Alternative A:** None

**Alternative B:** None

**Alternative C:** None

**Alternative D:** None

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- WILDLIFE Pronghorn antelope winter concentration areas
- RIPARIAN Riparian 1 stream crossing
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I low
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Recreation:** Rec opportunities – general, RMA objectives

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

## Route: 2045

### Segment: 293

#### Designation [?](#)

**Current Designation**  
Closed (Rehab)

#### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

#### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Indirect impact
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches <60 acres

#### Rationale

##### Designation Criteria

- Minimize Damage:** Cactus – reduce density within 200m
- Wilderness / Natural Area:** ACEC-River Rims close within 200m cactus

##### Rationale for Decision

- Route was designated to reduce the density of routes within 200 meters of known Colorado hookless Cactus occurrences.
- Route was designated to protect Colorado hookless cactus within the River Rims ACEC

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness.Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources.As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use.The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles.What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures.All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 00000135-28

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the

kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

• I've been involved in the "process" of this NCA since long before the D-E NCA designation. "The Hunting Grounds" area is very personal and dear to me, so I'd like to share a little of my background and how it ties into where we are today. I'd been coming to Grand Junction since 1992, to enjoy the BLM public land opportunities of OHV use, while living in the Denver area. Close to home, solitary, public land opportunities did not exist near Denver. After a couple visits per year to the valley throughout the 1990's, I thought Grand Junction would be a great place to live. I began looking for acreage in/around the valley. When the realtor showed me a 40 acre parcel for sale, accessed via Bean Ranch Road, I had already looked at several others, from Debeque to Glade Park. When I arrived at this said parcel for sale, I said "this is THE one!" In Feb. 2001, I purchased the 40 acre parcel of dry land, which was (and still is) bordered by BLM land on 3 sides. (Note, this mentioned BLM land is now within the D-E NCA Hunting Grounds area.) In Sept. 2002 I made the move to Grand Junction, and in March of 2003 my home was completed and I was able to move onto my 40 acres. The dream I'd so looked forward to achieving was made a reality, as my preferred outdoor recreation activity was (and still is) OHV use, although I enjoy many other types of outdoor recreation. I now had the ability to leave my driveway, on my OHV, and explore diverse trails and see beautiful scenery and wildlife. Let me also mention that being able to reside on this 40 acres wasn't an easy endeavor, however, it was a choice that meant financial and life altering sacrifices, to be able to enjoy the recreation opportunities this location had to offer. One major note supporting that is that there is no piped/city water beyond where you crest the top of the hill of Bean Ranch Rd. All the homes located on the back side of Bean Ranch Rd do not have piped/city drinking water, so those home owners have either drilled a well (minimal) or use cisterns and haul, or have delivered, potable water. Let me tell you, this takes planning & some conditional living. But those are things I was willing to deal with, to occupy a residence in this great area of BLM recreation opportunities that I so desired, and to achieve my personal dreams of living "out of the city" for mental well being. When I first discovered my passion for OHV use, I rode a dirt bike. After about 13 years of riding dirt bikes, I tried atv-ing and discovered I could pack my rack with supplies for a days' outing (or more), and be gone on the trail, enjoying what there was to be seen! Soon after moving to the valley, I joined the WSATVA and made several friends who were atv-ers, so that has been my main OHV method for the past 12 years. Although WSATVA did welcome me in the beginning, as a dirt biker! For years, I have been able to leave my Bean Ranch Rd property, on or in my OHV of choice, and explore the existing diverse roads and trails, within the area known as The Hunting Grounds. These roads & trails lead to spectacular viewing accesses of the Gunnison River, from the canyon edge. There are also railroad track & tunnel views, and the majestic sites of the Dominguez Canyon Wilderness area and Cactus Park across the river. I have taken many friends and family to see these splendorous sites, when they have visited. I'd also like to include that any specific trail #'s that I do not mention, that are not currently listed as potential closures on Alternatives B or E, I want to remain open. I do not mention trails which I did not find threatened for closure. My desire is for The Hunting Grounds area for the existing roads and trails to remain open and to remain as multi-use. I will also acknowledge the need for protecting precious resources within this area. While attending many meetings leading up to the DRMP being executed, I found it somewhat frustrating, and perhaps aggravating, to learn how many people didn't even know of The Hunting Grounds existence until the D-E NCA designation came and the RMP process that has followed. And I'm just amazed at how now those folks who have newly experienced it, want use specific trails with government rules and regulations to be put into place regarding the do's and don'ts. Then, to hear those folks' comments to recommend adding staging areas, with information kiosks, bathrooms, and improved parking areas is just jaw dropping to me. Prior to the past 4-5 years, very few Mesa County residents and mostly local residents of Bean Ranch Road & Whitewater area had knowledge about The Hunting Grounds zone, and its spectacular BLM recreation opportunities, which currently include multi-use activities on roads and trails. I've come to learn that it was not ok, for the residents who live in that area, who sought land for their homes to be built on, to have driveway access to enjoy activities they love, and not ok to be privy to this area without the rest of Mesa County and beyond knowing also. I guess that goes with "if you build it, they will come" motto. I also find the requests for use specific trails, vs. multi-use, for reason of user conflicts and desire for quiet use trails un-necessary, as if anyone has spent any time in The Hunting Grounds area, you will find this is not a highly used public area, and if you even see other users, it is a minimal and infrequent experience. I do know that the residents who live in that area, want all existing trails to remain open and to multi-use. As we all know, "Alternative A", no change", really isn't a real alternative for this future planning, right? Alternative A would be my first choice for the future of this area. Leave it as it is, because it IS NOT BROKEN! In attempting to navigate the D-E NCA DRMP website, I thought in public meetings, Katie Stevens had said you could click on a trail slated for closure and it would give the reason. I was not successful in finding this resourceful tool, so without that information, my comments continue based on what I see for closure on the maps.

Comment ID: 000000135-25

- Sawmill Mesa Moving south to the CDOW parcel, the BLM should work with the BLM to close numerous user-created routes in the Sawmill Mesa, Grade Gulch and Mud Springs area. The CDOW road leading north east to Cactus Park has numerous random, unplanned spurs and duplicative routes branching off, which need to be closed. Only the main, historically-used arteries should remain open to preserve these remote vistas and natural soundscapes. Routes to be closed and obliterated are: 2273=2139-2696; 2141, 3138, 3135, along with other spurs off the Peach Orchard Point Road 2270, including 3126, 2271, 2272. 2270 all of which should be closed to maintain silent open space quality of this point. Other routes needing closure off the CDOW road are: 2261, 2259, 3002, 3090,

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 2052

## Public Comments On Route: 2053

Organization, commenter: COPMOBA, Scott Winans

Comment ID: 000000168-2

• Hunting Grounds In the Hunting Grounds area, a longer distance trail similar to Kokopelli's, Tabeguache, and Paradox Trails, would be of interest to this user group [COPMOBA]. Starting at the Old Spanish Trail in Orchard Mesa and ending in Delta, this trail idea is currently feasible when using a mix of single track, ATV width trail, jeep road and even Highway 50 for a few short sections. With very little trail construction making some connections to existing trails, nearly all of this highway use can be avoided. The major attraction of this area is the views from the rim above the Gunnison River in both directions. The existing trail and any trail construction should be routed to take advantage of this valuable view resource. The following recommendations are in the spirit of developing this long distance trail. Starting from the Kannah Creek area we recommend leaving 152 open to mountain bike use for a possible future connection to the lower Kannah Creek road. Possibilities included deeded access across private land, or new construction from the existing small portion of BLM land which the road accesses. Continuing, use existing full size and ATV trail to the end of 440, or a portion of 431, to access small drainage and then construct new trail to access Bridgeport Road. Then use 438, 449 and 2163 to access 2426 and 2427 to Dominguez Road (or 3098 and 3163 and then a very short new connector to 3133 out to highway) From Dominguez Road use 4000 to 3043, then single track 4001, 4005, 4006, 4007 and 3148 to reach Escalante Road. Very nice views exist in this area from the trail. The trail would then cross Escalante road to 2073 with a connection being built to 2053. This short deviation from the Escalante road would provide a safer route for mountain bikes than the twisty road with blind corners and high speed full size vehicles. The trail would cross the river on main bridge and immediately turn left and follow 2313, 2461 and 2462 with a connection to Delta via 2352, 470 2476 and 2489. This area using borders of the northern most point of the Escalante Rim, south to the Rim Road then using 2354 as the border on the west, the main county road on the east and then back down to the rim above river on the north would provide an excellent mountain bike emphasis area for the Delta community. Visitors and local users could ride from town or drive a very short distance. Quiet Use trails are rare in this area and this topography would allow for a rewarding experience for hiker, horse and mountain bike users. This scenario would provide an area similar to the Lunch Loops and Mack Ridge areas. With a long distance rail anchoring a Quiet Use stack loop system of trails which are extremely popular and very beneficial to users and the community at trail at large

Comment ID: 000000171-7

• IV. TRANSPORTATION AND TRAVEL MANAGEMENT Mr. Miller's owns various parcels of private property and multiple water diversions in the area in question, and must access these lands via roads and trails which currently cross public land. In addition, Mr. Miller must necessarily access various roads and trails to in the course of managing his livestock operation. The EIS proposes closing various roads and trails to public motorized travel, to minimize resource damage caused by the public on both public and private lands. EIS at 157, 187. Mr. Miller supports the BLM's proposal to restrict public access to protect public and private property, but only so long as he is not restricted from using these roads as may be necessary to access his private lands and manage his livestock operation. Thus, to the extent that the BLM wishes to close roads to motorized public traffic, it should simultaneously grant Mr. Miller legal, administrative access. In addition, Mr. Miller notes that he would be entitled to a formal decision, subject to appeal, prior to the BLM restricting access to his private property and/or otherwise impacting his livestock operation. Mr. Miller notes that the BLM has mis-classified many routes. See EIS Map N -1 e. Specifically, many routes which have historically been used to access private land and water diversions, and/or are necessary to maintain livestock improvements or otherwise manage and operate Mr. Miller's livestock operation, have been incorrectly labeled as closed or otherwise restricted in their use. These routes should be classified as "administrative," to recognize these historic uses and to allow for continued uses consistent therewith. The Routes which have been incorrectly classified and which should be classified as "administrative" are as follows: Routes 460, 1220, 1243, 1245, 2003, 2053, 2073, 2086, 2089, 2121, 2122, 2126, 2156, 2166, 2168, 2171 ~ 2172, 2177, 2180, 2336, 2342, 2354, 2408, 2412, 2445, 2581, 2582, 2583, 2585, 2587, 2588, 2590, 2591, 2593, 2595, 2596, 2598, 2599, 2612, 2613, 2622, 2691, 3011, 3048, 3070, 3131, 3141, and 3158. See EIS Map N-1e. In addition, Route 2072 is not completely depicted on the map, in that it extends down the river, across BLM and private property, an additional 2-3 miles, and likewise Route 3048 extends an additional 0.75 miles and leads to private property. Id. Finally, Map N-1e incorrectly labels Mr. Miller's privately owned bridge, which crosses the Gunnison River at the Bridgeport area, as "administrative." Id. Mr. Miller requests that the BLM correct these errors and mis-classifications.

## Public Comments On Route: 2058

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 000000135-23

- Dry Mesa RoadDry Mesa Road similarly has numerous parallel and duplicative routes and loops that are severely and unnecessarily fragmenting what has been a relatively intact habitat area. This spiderweb of routes did not exist a few years ago and should not be legitimized, just because new mobile technologies have the ability to get into these areas.Needing closure and obliteration specifically are routes 3105, 3104 2199, 2200, 2004, 2206, 2109, 2112, 2110, 2111, 3086, 2203, 2058, 2204, 2023. Effective closure and obliteration of these purposeless, randomly-created routes is necessary to restore the integrity of what was until recently a wild and remote landscape

• Little Mesa spurs Numerous damaging and randomly created spurs and loops branch off from Little Mesa Road, 2026-2025-2187 and should be closed. These include 2059, 2188, 2190, 3100, 2191, 2192, 2197, 2198, 3104, 3099, 3104. If some of these would make a link between Little Mesa and Dry Mesa, there should be one route only and it should be a full size vehicle 4WD route rather than an ATV route. Full-size vehicles are the traditional use of this county, whereas ATVs introduce a new, noisy, "go-anywhere," unenforceable use that is incompatible with the traditional rugged, remote and solitary setting of this area

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 206

### Segment: 2568

#### Designation

**Current Designation**  
Vehicles under 50" wide

#### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

#### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- Recreation:** RMA objectives, Rec opportunities – general, Rec opportunities - specific
- Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

- Alternative A:** Open (All modes of travel)
- Alternative B:** Closed (Not Rehabbed)
- Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 206

- No public comments for this Route

## Route: 2060

### Segment: 421

#### Designation [?](#)

##### Current Designation

Admin/Permitted Use Only

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- SOIL Soils Steep Slopes 40%
- SOIL Soils Fragile
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- No designation criteria for this route segment.

##### Rationale for Decision

- Route was designated to ensure access to rights-of-way, private property, and livestock grazing facilities.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Admin/Permitted Use Only

**Alternative C:** Open, seek re-route or mitigation

**Alternative D:** Open, seek re-route or mitigation

## Route: 2063

### Segment: 1294

## Designation

### Current Designation

Admin/Permitted Use Only

### Mitigation Criteria

- Needs Data - Cultural

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- CULTURAL Cultural Indirect impact
- DENSITY Route density low in Alt A
- DENSITY Route density low in Alt E
- SSPLANT Special Status Species Colorado hookless cactus

## Rationale

### Designation Criteria

- **Minimize Damage:** Cactus – reduce density within 200m, Cultural – SSR within 100m sites

### Rationale for Decision

- Route was designated to ensure access to rights-of-way, private property, and livestock grazing facilities.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

Alternative D: Closed (Rehab)

## Public Comments On Route: 2063

- No public comments for this Route

## Route: 2064

### Segment: 1293

#### Designation [?](#)

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- CULTURAL Cultural Indirect impact
- DENSITY Route density low in Alt A
- DENSITY Route density low in Alt E
- SSPLANT Special Status Species Colorado hookless cactus

#### Rationale

##### Designation Criteria

- Minimize Damage:** Cactus – reduce density within 200m
- Minimize Harassment:** PPSV- Minimize fragmentation

##### Rationale for Decision

- Route was designated to reduce the density of routes within 200 meters of known Colorado hookless Cactus occurrences.
- Route was designated to reduce fragmentation in Priority Vegetation types

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

## Route: 2065

### Segment: 1256

#### Designation [?](#)

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- SOIL Soils Fragile
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I moderate
- SMAs River Rims ACEC
- SMAs Wild and Scenic River area
- GEOPALEO Paleontological direct impact
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- Minimize Damage:** Cactus – reduce density within 200m, Geo/paleo – SSR in key sites
- Minimize Harassment:** PPSV- Minimize fragmentation, Bighorn – SSR -- summer range
- Wilderness / Natural Area:** ACEC-River Rims close within 200m cactus

##### Rationale for Decision

- Route was designated to reduce the density of routes within 200 meters of known Colorado hookless Cactus occurrences.
- Route was designated to protect geologic and paleontologic resources.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to reduce the miles of motorized and mechanized routes in bighorn sheep habitat.

- Route was designated to protect Colorado hookless cactus within the River Rims ACEC

## Previous Alternatives Analyzed

## Public Comments On Route: 2072

Organization, commenter: Escalante Ranch, Richard Miller

Comment ID: 000000171-7

• IV. TRANSPORTATION AND TRAVEL MANAGEMENT Mr. Miller's owns various parcels of private property and multiple water diversions in the area in question, and must access these lands via roads and trails which currently cross public land. In addition, Mr. Miller must necessarily access various roads and trails to in the course of managing his livestock operation. The EIS proposes closing various roads and trails to public motorized travel, to minimize resource damage caused by the public on both public and private lands. EIS at 157, 187. Mr. Miller supports the BLM's proposal to restrict public access to protect public and private property, but only so long as he is not restricted from using these roads as may be necessary to access his private lands and manage his livestock operation. Thus, to the extent that the BLM wishes to close roads to motorized public traffic, it should simultaneously grant Mr. Miller legal, administrative access. In addition, Mr. Miller notes that he would be entitled to a formal decision, subject to appeal, prior to the BLM restricting access to his private property and/or otherwise impacting his livestock operation. Mr. Miller notes that the BLM has mis-classified many routes. See EIS Map N -1 e. Specifically, many routes which have historically been used to access private land and water diversions, and/or are necessary to maintain livestock improvements or otherwise manage and operate Mr. Miller's livestock operation, have been incorrectly labeled as closed or otherwise restricted in their use. These routes should be classified as "administrative," to recognize these historic uses and to allow for continued uses consistent therewith. The Routes which have been incorrectly classified and which should be classified as "administrative" are as follows: Routes 460, 1220, 1243, 1245, 2003, 2053, 2073, 2086, 2089, 2121, 2122, 2126, 2156, 2166, 2168, 2171 ~ 2172, 2177, 2180, 2336, 2342, 2354, 2408, 2412, 2445, 2581, 2582, 2583, 2585, 2587, 2588, 2590, 2591, 2593, 2595, 2596, 2598, 2599, 2612, 2613, 2622, 2691, 3011, 3048, 3070, 3131, 3141, and 3158. See EIS Map N-1e. In addition, Route 2072 is not completely depicted on the map, in that it extends down the river, across BLM and private property, an additional 2-3 miles, and likewise Route 3048 extends an additional 0.75 miles and leads to private property. Id. Fina Uy, Map N-1e incorrectly labels Mr. Miller's privately owned bridge, which crosses the Gunnison River at the Bridgeport area, as "administrative." I d. Mr. Miller requests that the BLM correct these errors and mis-classifications.

Comment ID: 000000192-33

• Route number 2072. There is no reason for this to be an administrative route and needs to be left open.

Organization, commenter: Escalante Ranch, Kent Davis

Comment ID: 000000192-52

• Route number 2072. This is an incomplete route on the map as it extends to more private North along River through more BLM and to another private still further North.

## Route: 2073

### Segment: 1053

#### Designation

##### Current Designation

Open (All modes of travel)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- WILDLIFE Pronghorn antelope winter concentration areas
- CULTURAL Cultural Indirect impact
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- SSPLANT Special Status Species

#### Rationale

##### Designation Criteria

- **Recreation:** Rec opportunities – general

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed, seek re-route or mitigation

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed, seek re-route or mitigation

• The following high value recreational routes/roads are legal ROW's in the State of Colorado, Mesa County and the BLM does not have the jurisdiction to close them: 500, 472, 518, 521, 530, 39, 127, 572, 566, 66, 65, 148, 71, 74, 587, 595, 608, 622, 628, 635, 624, 609, 611, 706, 678, 700, 719, 726, 696, 26, 936, 847, 849, 919, 767, 824, 96, 822, 817, 950, 1021, 900, 2682, 1020, 1003, 1084, 1142, 1184, 1156, 1198, 1349, 1308, 1310, 1238, 1263, 1122, 1170, 1192, 974, 941, 1076, 1039, 1018, 1759, 1764, 1758, 1174, 1788, 1798, 1669, 1699, 1773, 1755, 1779, 1750, 1751, 1792, 1720, 1726, 1727, 1720, 1722, 1803, 1805, 1809, 1614, 1609, 1605, 1608, 1571, 1526, 1516, 1448, 755, 807, 900, 10, 48, 924, 950, 1005, 965, 8, 1115, 981, 984, 1135, 2678, 1249, 1171, 1150, 1249, 1320, 1235, 1236, 1228, 1227, 1409, 1456, 1349, 1308, 1513, 1221, 1550, 1567, 1641, 1612, 1740, 1688, 2597, 2598, 2601, 2440, 3160, 3162, 2089, 2166, 2170, 2596, 2171, 2003, 2122, 2126, 2189, 3145, 2182, 2179, 2178, 3143, 2181, 2121, 2122, 2168, 2126, 2180, 2095, 2173, 2174, 2620, 2129, 1686, 1692, 1667, 1647, 1631, 1613, 1596, 1549, 1541, 2647, 1633, 1605, 1608, 1571, 2645, 1507, 1448, 1496, 1516, 1504, 1510, 1508, 1509, 439, 431, 456, 461, 460, 391, 423, 415, 419, 407, 402, 367, 372, 339, 298, 338, 105, 368, 374, 393, 389, 390, 376, 377, 351, 350, 121, 345, 320, 301, 251, 234, 232, 205, 344, 107, 103, 152, 153, 161, 168, 3199, 188, 196, 255, 254, 236, 294, 242, 219, 201, 169, 162, 158, 160, 173. The following high value recreational routes/roads are legal ROW's in the State of Colorado, Delta County, and the BLM does not have the jurisdiction to close them: 3011, 2184, 2191, 3100, 2187, 2026, 2059, 2188, 2192, 3104, 2130, 3009, 2199, 2200, 2111, 2223, 2024, 3006, 2231, 3094, 2579, 2210, 2344, 2243, 2249, 2248, 3074, 2354, 2384, 2296, 2295, 2287, 2304, 2062, 2163, 3163, 2164, 2430, 4006, 3016, 2351, 3140, 2410, 4008, 2324, 2073, 2306, 2459, 3192, 3193, 2350, 2443, 2035, 2336, 2495, 2491, 2159, 3058, 2277, 2465, 2467, 3189, 2472, 2297, 2006, 2265, 2271, 2276, 2135, 2139, 3053, 2489, 3033, 3057, 2031, 2276, 2210, 2579, 2136, 2344, 3164, 2400, 2379, 3014, 2365, 3116, 2251, 2259, 2149, 2153, 2146, 2144, 2145, 2356, 2257, 2048, 2358, 3165, and 3166.

Organization, commenter: COPMOBA, Scott Winans

Comment ID: 000000168-2

• Hunting Grounds In the Hunting Grounds area, a longer distance trail similar to Kokopelli's, Tabeguache, and Paradox Trails, would be of interest to this user group [COPMOBA]. Starting at the Old Spanish Trail in Orchard Mesa and ending in Delta, this trail idea is currently feasible when using a mix of single track, ATV width trail, jeep road and even Highway 50 for a few short sections. With very little trail construction making some connections to existing trails, nearly all of this highway use can be avoided. The major attraction of this area is the views from the rim above the Gunnison River in both directions. The existing trail and any trail construction should be routed to take advantage of this valuable view resource. The following recommendations are in the spirit of developing this long distance trail. Starting from the Kannah Creek area we recommend leaving 152 open to mountain bike use for a possible future connection to the lower Kannah Creek road. Possibilities included deeded access across private land, or new construction from the existing small portion of BLM land which the road accesses. Continuing, use existing full size and ATV trail to the end of 440, or a portion of 431, to access small drainage and then construct new trail to access Bridgeport Road. Then use 438, 449 and 2163 to access 2426 and 2427 to Dominguez Road (or 3098 and 3163 and then a very short new connector to 3133 out to highway) From Dominguez Road use 4000 to 3043, then single track 4001, 4005, 4006, 4007 and 3148 to reach Escalante Road. Very nice views exist in this area from the trail. The trail would then cross Escalante road to 2073 with a connection being built to 2053. This short deviation from the Escalante road would provide a safer route for mountain bikes than the twisty road with blind corners and high speed full size vehicles. The trail would cross the river on main bridge and immediately turn left and follow 2313, 2461 and 2462 with a connection to Delta via 2352, 470 2476 and 2489. This area using borders of the northern most point of the Escalante Rim, south to the Rim Road then using 2354 as the border on the west, the main county road on the east and then back down to the rim above river on the north would provide an excellent mountain bike emphasis area for the Delta community. Visitors and local users could ride from town

or drive a very short distance. Quiet Use trails are rare in this area and this topography would allow for a rewarding experience for hiker, horse and mountain bike users. This scenario would provide an area similar to the Lunch Loops and Mack Ridge areas. With a long distance rail anchoring a Quiet Use stack loop system of trails which are extremely popular and very beneficial to users and the community at trail at large

Comment ID: 000000171-7

• IV. TRANSPORTATION AND TRAVEL MANAGEMENT Mr. Miller's owns various parcels of private property and multiple water diversions in the area in question, and must access these lands via roads and trails which currently cross public land. In addition, Mr. Miller must necessarily access various roads and trails to in the course of managing his livestock operation. The EIS proposes closing various roads and trails to public motorized travel, to minimize resource damage caused by the public on both public and private lands. EIS at 157, 187. Mr. Miller supports the BLM's proposal to restrict public access to protect public and private property, but only so long as he is not restricted from using these roads as may be necessary to access his private lands and manage his livestock operation. Thus, to the extent that the BLM wishes to close roads to motorized public traffic, it should simultaneously grant Mr. Miller legal, administrative access. In addition, Mr. Miller notes that he would be entitled to a formal decision, subject to appeal, prior to the BLM restricting access to his private property and/or otherwise impacting his livestock operation. Mr. Miller notes that the BLM has mis-classified many routes. See EIS Map N -1 e. Specifically, many routes which have historically been used to access private land and water diversions, and/or are necessary to maintain livestock improvements or otherwise manage and operate Mr. Miller's livestock operation, have been incorrectly labeled as closed or otherwise restricted in their use. These routes should be classified as "administrative," to recognize these historic uses and to allow for continued uses consistent therewith. The Routes which have been incorrectly classified and which should be classified as "administrative" are as follows: Routes 460, 1220, 1243, 1245, 2003, 2053, 2073, 2086, 2089, 2121, 2122, 2126, 2156, 2166, 2168, 2171 - 2172, 2177, 2180, 2336, 2342, 2354, 2408, 2412, 2445, 2581, 2582, 2583, 2585, 2587, 2588, 2590, 2591, 2593, 2595, 2596, 2598, 2599, 2612, 2613, 2622, 2691, 3011, 3048, 3070, 3131, 3141, and 3158. See EIS Map N-1e. In addition, Route 2072 is not completely depicted on the map, in that it extends down the river, across BLM and private property, an additional 2-3 miles, and likewise Route 3048 extends an additional 0.75 miles and leads to private property. Id. Fina Uy, Map N-1e incorrectly labels Mr. Miller's privately owned bridge, which crosses the Gunnison River at the Bridgeport area, as "administrative." I d. Mr. Miller requests that the BLM correct these errors and mis-classifications.

## Route: 2074

### Segment: 3171

#### Designation

##### Current Designation

Closed (Not Rehabbed)

##### Designation Following Mitigation

Foot/Horse

##### Mitigation Criteria

- Reroute
- Needs Data - SSS Plants
- Cultural
- Special Species Plant

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- WILDLIFE Pronghorn antelope winter concentration areas
- CULTURAL Cultural Class I low
- SMAs River Rims ACEC
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- SSPLANT Special Status Species Colorado hookless cactus

#### Rationale

##### Designation Criteria

- **Minimize Damage:** Cactus – reduce density within 200m, Cultural – SSR within 100m sites
- **Minimize Harassment:** PPSV- Minimize fragmentation
- **Wilderness / Natural Area:** ACEC-River Rims close within 200m cactus
- **Recreation:** RMA objectives, Rec opportunities - specific, Rec opportunities – general
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Public Comments On Route: 2074

Organization, commenter: Quiet Trails Group, Sherry Schenk

Comment ID: 000000115-75

- Routes 2328, 2327, 2076, 4008, 2074: As long as there is not a conflicting resource use, QTG recommends leaving these routes open to horse and foot as it offers nice views into the canyon. Specifically, we are concerned about disturbance to any prairie dog town in the vicinity and would support re-routing any of these or any other trails that could hurt prairie dog habitat and colonies in the southern portion of this unit.

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- WILDLIFE Pronghorn antelope winter concentration areas
- CULTURAL Cultural Class I low
- SMAs River Rims ACEC
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- SSPLANT Special Status Species Colorado hookless cactus

#### Rationale

##### Designation Criteria

- **Minimize Damage:** Cactus – reduce density within 200m, Cultural – SSR within 100m sites
- **Minimize Harassment:** PPSV- Minimize fragmentation
- **Wilderness / Natural Area:** ACEC-River Rims close within 200m cactus

##### Rationale for Decision

- Route was designated to reduce the density of routes within 200 meters of known Colorado hookless Cactus occurrences.
- Route was designated to minimize impacts to cultural resources.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect Colorado hookless cactus within the River Rims ACEC

### Public Comments On Route: 2076

Organization, commenter: Quiet Trails Group, Sherry Schenk

Comment ID: 000000115-75

- Routes 2328, 2327, 2076, 4008, 2074: As long as there is not a conflicting resource use, QTG recommends leaving these routes open to horse and foot as it offers nice views into the canyon. Specifically, we are concerned about disturbance to any prairie dog town in the vicinity and would support re-routing any of these or any other trails that could hurt prairie dog habitat and colonies in the southern portion of this unit.

## Public Comments On Route: 208

Organization, commenter: Janice Shepherd /  
Mechanized/Motorcycle

Comment ID: 000000106-211

- Alt E should not have 179, 186, 195 and 208 designated as ATV as they were inventoried as single track. See "Photo Comparison" at bottom of comment. Unfortunately as can be seen in the photos, some users have taken it upon themselves to widen some of these from single tracks to 2-tracks. These need to be rehabbed back to being single tracks.

Organization, commenter: Janice Shepherd

Comment ID: 00000106-212

- 208-195-186-182-243-257-262-253-240-221-198 I support the Quiet Trail Group's position of designating this loop for quiet trail users. The top segments 208-195-186-176 should be Mtn Bike, to connect with the Alt E proposed designation for 182-243. Note that 243 should not be designated Motorcycle as it is in Alt E as it is a short segment connecting two Mtn Bike routes. The rest of the loop should be Horse/foot as shown in Alt E. This approximately 4 mile loop makes a great short enjoyable hike. I've even done it with a group of friends on a July morning. The city high that day was 93. We finished the hike in the morning when the temperatures were still moderate. Afterwards we enjoyed lunch together at a restaurant on Orchard Mesa (local economic benefit). It is important to me to have easy access to such short quiet use loops within the NCA that are close to the city so that my friends and I can get some exercise together while enjoying each other's company even in summer months. On the height of land crossed by 240, there is a wonderful view back down the valley. The track blends in and the valley looks pristine and untouched by humans. It gives me a small sense of what it must have been like to be the first explorer here. I'd love to find other trails like this. Near 176, there is a pretty little dry fall. And the rock in the area is a conglomerate which is such an interesting contrast to vast amounts of sandstone. On foot it is fun to find such interesting anomalies. That is what is so great about hiking on 186-176-182, you have time to see the contrast and recognize the uniqueness of the area. There's time for my friends and me to admire the power of natural forces. We like this hike because of the sense of discovery of small and large details about the geology of the area.

## Public Comments On Route: 2085

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 00000135-28

- I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Public Comments On Route: 2086

Organization, commenter: Escalante Ranch, Richard Miller

Comment ID: 00000171-7

• IV. TRANSPORTATION AND TRAVEL MANAGEMENT Mr. Miller's owns various parcels of private property and multiple water diversions in the area in question, and must access these lands via roads and trails which currently cross public land. In addition, Mr. Miller must necessarily access various roads and trails to in the course of managing his livestock operation. The EIS proposes closing various roads and trails to public motorized travel, to minimize resource damage caused by the public on both public and private lands. EIS at 157, 187. Mr. Miller supports the BLM's proposal to restrict public access to protect public and private property, but only so long as he is not restricted from using these roads as may be necessary to access his private lands and manage his livestock operation. Thus, to the extent that the BLM wishes to close roads to motorized public traffic, it should simultaneously grant Mr. Miller legal, administrative access. In addition, Mr. Miller notes that he would be entitled to a formal decision, subject to appeal, prior to the BLM restricting access to his private property and/or otherwise impacting his livestock operation. Mr. Miller notes that the BLM has mis-classified many routes. See EIS Map N -1 e. Specifically, many routes which have historically been used to access private land and water diversions, and/or are necessary to maintain livestock improvements or otherwise manage and operate Mr. Miller's livestock operation, have been incorrectly labeled as closed or otherwise restricted in their use. These routes should be classified as "administrative," to recognize these historic uses and to allow for continued uses consistent therewith. The Routes which have been incorrectly classified and which should be classified as "administrative" are as follows: Routes 460, 1220, 1243, 1245, 2003, 2053, 2073, 2086, 2089, 2121, 2122, 2126, 2156, 2166, 2168, 2171-2172, 2177, 2180, 2336, 2342, 2354, 2408, 2412, 2445, 2581, 2582, 2583, 2585, 2587, 2588, 2590, 2591, 2593, 2595, 2596, 2598, 2599, 2612, 2613, 2622, 2691, 3011, 3048, 3070, 3131, 3141, and 3158. See EIS Map N-1e. In addition, Route 2072 is not completely depicted on the map, in that it extends down the river, across BLM and private property, an additional 2-3 miles, and likewise Route 3048 extends an additional 0.75 miles and leads to private property. Id. Fina Uy, Map N-1e incorrectly labels Mr. Miller's privately owned bridge, which crosses the Gunnison River at the Bridgeport area, as "administrative." I d. Mr. Miller requests that the BLM correct these errors and mis-classifications.

#### Rationale

##### Designation Criteria

- Recreation:** RMA objectives, Rec opportunities – general
- Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Vehicles under 50" wide

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 2089

Organization, commenter: Widefield School District 3, Terry Kimber

Comment ID: 000000046-2

• Road 2166: (Bad Point Rd) The Wilderness area has cut off this road only mile from the end of the road. This is a law enforcement nightmare. Let's not do that again in the NCA. Road 2166 in option E is ATV only to that point but can be driven by vehicle down to the big rock hill safely and easily. This location is called Jerry's Hole. One of our favorite hunting spots when there is water or weather. I recommend making the trail ATV only from that point rather than from road 2089. Road 2089: This road is seldom used yes but is very necessary to retrieve downed game from the back of Jerry's Hole. I recommend that a downed game by ATV designation for this and many other of the trails and roads that are proposed to be closed in the areas where hunting is a significant factor from August to November. Road 3143: (Sowbelly Ridge) Should be designated Downed Game ATV to the border of the wilderness area.

• Sowbelly Ridge: This is an area which my family and I have hunted for decades. We are meat hunters, not sport hunters, and depend on the elk, deer and bear meat we get to supplement our food supply through the winter. It has become increasingly difficult to get to where the animals are because of roads which have already been closed. I would ask that roads numbered 2571, 2597, 2598, 2601, 3162, 2089, and 2166 remain open. We need roads to help in game retrieval. This area is usually still "t-shirt" weather in October when we hunt, which means very warm temperatures. If an animal is left for too long in that weather, it will spoil if it isn't skinned, gutted and transported as soon as possible to a meat locker. We typically get the meat out of the back country where it was killed and get it to camp to hang overnight and then immediately take it to GJ to a meat locker. We don't "road hunt"; we take our ATVs to the edge our hunting area and then start walking usually all day and for many miles. Even if we are lucky enough to get our game, none of us, even young, strong guys, can carry more than a quarter of an elk at a time very far, as has been suggested. This would mean 4 trips to carry an animal out and it can't be done before the meat spoils. So which law should we break? The law that says you can't use an ATV on an existing road to retrieve game or the law that says you can't waste meat without facing a stiff fine? These roads are currently open and I ask that they remain open for game retrieval using ATVs: 2168, 2122, 2121, 2169 & 2170, 2596, 2171, 2003, 3145, 2182, 2179, 2178, 3143 and 2181.

• Cottonwood Creek This creek is a rare example of an almost completely unroaded, untrailed stream corridor for most of its length until it reaches Roubideau Creek and the Gunnison River. Unplanned, damaging routes along Cottonwood Creek upstream near the Forest Service boundary should all be closed to create an undisturbed full stretch of riparian corridor. Randomly created routes needing closure are: 2152, 2149, 2147, 2148, 2439, 2153, 2154, 2156. Closing these routes would restore a relatively intact watershed. Routes needing closure at the northern end of Cottonwood Creek, for the same reason, are: 3087, 3088, 3082, 3083, 3080, 3015, 2370, 2089, 2100, 3079, 3047, 2396, 2013, 3128, 3169, 2014, 2162, 2160, 2493, 3005. Some of these routes spur off 25 Mesa Road and do not actually enter the Cottonwood Creek drainage, but most if not all are not purposely created, not planned, are randomly scarring the landscape, and are introducing difficult to enforce ORV use. Only a few, if any should be left open, that have an overriding need and purpose. All the user-created routes descending into Cottonwood Creek should be closed, including 2100, 2370, 2099, and the whole tangle of routes 3169, etc etc

Comment ID: 000000135-4

• we appreciate the route closures in the preferred alternative. However, as you will see in our attached 2011 route-specific comments, we are concerned about the routes left open in the draft TMP that we and others had recommended for closure, in particular: o The two ATV trails (Numbers 3162/2089/2166, and 2596/2171/2003) in the Dominguez Addition Unit that need to be closed a) to protect this unit and b) to prevent the likelihood of incursions into the Dominguez wilderness, due to remote, unmanageable and unenforceable terrain. o Palmer Gulch road #2169/2170, needs to be closed. o Road #2181 needs to be closed to OHVs. o 1778/1727 o 1782/1768/2602 in Sawmill Mesa and Wagon Park zonos 1756 should be closed at the junction with 1758, and include closure of roads 1593 and 1585

• Manage Gunnison Slopes Unit and Dominguez Addition Unit as Lands with Wilderness Characteristics ERMA status for Gunnison Slopes is a good start, but it needs the additional protection as a LWC as well. Dominguez Addition also needs to be included as a LWC, and the two ATV routes currently open in the preferred Alternative (roads 3162/2089/2166, and 2596/2171/2003) definitively closed to maintain this area's wild character

Organization, commenter: Backcountry Hunters and Anglers, Craig Grother

Comment ID: 000000156-18

• Comments on Travel Management Plan The following comments are based upon my review of the Map of Route by Route Designations for Alternative E (Map N-1E) in relationship to the resource management goals and objectives of the NCA. As previously stated, we are concerned that wilderness characteristics within the Dominguez Addition Unit would be highly impacted by the preferred alternative through the inclusion of two ATV trails within the Unit. Both of these ATV trails are currently low-standard two-track roads that extend into the Dominguez Wilderness. The preferred alternative would restrict the use of these roads to ATVs and the trails would theoretically dead end at the Wilderness boundary. Even if ATV riders did respect the Wilderness boundary, these motorized trails would degrade the wilderness values of the Dominguez Addition Unit. For this reason we are recommending that these two roads (roads 3162/2089/2166, and 2596/2171/2003) be converted to non-motorized trails to provide big game solitude, backcountry hunting, and quiet recreation use opportunities.

Organization, commenter: Backcountry Hunters and Anglers, Craig Grother

Comment ID: 000000156-4

• Two other units with wilderness characteristics occur within the D-E NCA that are not included within the preferred alternative. Wilderness characteristics within the Gunnison Slopes Unit appear to have been largely protected through management of this area as an ERMA that would emphasize equestrian and hiking trail activities and dispersed camping. This management strategy seems reasonable to provide camping opportunities along the Gunnison River to accommodate boating use on the river while maintaining an overall primitive setting. However, wilderness characteristics within the Dominguez Addition Unit would be highly impacted by the preferred alternative through the inclusion of two ATV trails within the Unit. Both of these ATV trails are currently low-standard two-track roads that extend into the Dominguez Wilderness. The preferred alternative would restrict the use of these roads to ATVs and the trails would theoretically dead end at the Wilderness boundary. Even if ATV riders did respect the Wilderness boundary, these motorized trails would degrade the wilderness values of the Dominguez Addition Unit. For this reason we are recommending that these two roads (roads 3162/2089/2166, and 2596/2171/2003) be converted to non-motorized trails to provide big game solitude, backcountry hunting, and quiet recreation use opportunities

Comment ID: 000000171-7

• IV. TRANSPORTATION AND TRAVEL MANAGEMENT Mr. Miller's owns various parcels of private property and multiple water diversions in the area in question, and must access these lands via roads and trails which currently cross public land. In addition, Mr. Miller must necessarily access various roads and trails to in the course of managing his livestock operation. The EIS proposes closing various roads and trails to public motorized travel, to minimize resource damage caused by the public on both public and private lands. EIS at 157, 187. Mr. Miller supports the BLM's proposal to restrict public access to protect public and private property, but only so long as he is not restricted from using these roads as may be necessary to access his private lands and manage his livestock operation. Thus, to the extent that the BLM wishes to close roads to motorized public traffic, it should simultaneously grant Mr. Miller legal, administrative access. In addition, Mr. Miller notes that he would be entitled to a formal decision, subject to appeal, prior to the BLM restricting access to his private property and/or otherwise impacting his livestock operation. Mr. Miller notes that the BLM has mis-classified many routes. See EIS Map N-1 e. Specifically, many routes which have historically been used to access private land and water diversions, and/or are necessary to maintain livestock improvements or otherwise manage and operate Mr. Miller's livestock operation, have been incorrectly labeled as closed or otherwise restricted in their use. These routes should be classified as "administrative," to recognize these historic uses and to allow for continued uses consistent therewith. The Routes which have been incorrectly classified and which should be classified as "administrative" are as follows: Routes 460, 1220, 1243, 1245, 2003, 2053, 2073, 2086, 2089, 2121, 2122, 2126, 2156, 2166, 2168, 2171-2172, 2177, 2180, 2336, 2342, 2354, 2408, 2412, 2445, 2581, 2582, 2583, 2585, 2587, 2588, 2590, 2591, 2593, 2595, 2596, 2598, 2599, 2612, 2613, 2622, 2691, 3011, 3048, 3070, 3131, 3141, and 3158. See EIS Map N-1e. In addition, Route 2072 is not completely depicted on the map, in that it extends down the river, across BLM and private property, an additional 2-3 miles, and likewise Route 3048 extends an additional 0.75 miles and leads to private property. Id. Fina Uy, Map N-1e incorrectly labels Mr. Miller's privately owned bridge, which crosses the Gunnison River at the Bridgeport area, as "administrative." Id. Mr. Miller requests that the BLM correct these errors and mis-classifications.

Comment ID: 000000135-28

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 209

### Segment: 2571

#### Designation

##### Current Designation

Open (All modes of travel)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- RIPARIAN Riparian 1 stream crossing
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Admin/Permitted Use Only

**Alternative C:** Admin/Permitted Use Only

**Alternative D:** Admin/Permitted Use Only

## Public Comments On Route: 209

- No public comments for this Route

## Route: 2090

### Segment: 294

#### Designation

##### Current Designation

Admin/Permitted Use Only

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement

- RANGE Range access for general livestock management
- WILDLIFE Elk winter concentration areas
- WILDLIFE Elk severe winter range
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I high
- DENSITY Route density low in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- Minimize Damage:** Fragile soils SSR

### Rationale for Decision

- Route was designated to ensure access to rights-of-way, private property, and livestock grazing facilities.

## Previous Alternatives Analyzed

- The recently pioneered route, 2618-2090, spurring off County Rd 2091 west of Bennett's Basin should be closed and obliterated. It has no long-established purpose, having been recently created and serves only to scar the landscape. It is needlessly fragmenting what has been heretofore a relatively unfragmented area. Similarly 2168 should be closed as it is unnecessary, duplicative, parallels an existing route, is only recently-created, and serves no purpose.

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 000000135-28

- I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 2091

### Segment: 276

## Designation

### Current Designation

Closed (Rehab)

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I high
- DENSITY Route density low in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- Minimize Harassment:** PPSV- Minimize fragmentation

### Rationale for Decision

- Route was designated to reduce fragmentation in Priority Vegetation types

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Route: 2095

### Segment: 247

## Designation

### Current Designation

Admin/Permitted Use Only

### Designation Following Mitigation

Foot/Horse

### Mitigation Criteria

- Drainage Crossing
- Open to Foot and Horse (but still open to motorized for admin/permitted access)

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk severe winter range
- RIPARIAN Riparian crossing perennial stream
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I high
- DENSITY Route density low in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- **Minimize Damage:** Riparian - perennial streams SSR 100 m, Riparian—ephemeral streams SSR 30 m
- **Recreation:** Rec opportunities – general, RMA objectives
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 2097

### Segment: 279

#### Designation ?

##### Current Designation

Admin/Permitted Use Only

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- SOIL Soils Fragile
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk winter concentration areas
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Minimize Damage:** Fragile soils SSR, Soils - PSD slopes >40%
- **Minimize Harassment:** Sage-Minimize fragmentation, Raptor Potential Habitat, PPSV- Minimize fragmentation

##### Rationale for Decision

- Route was designated to ensure access to rights-of-way, private property, and livestock grazing facilities.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 2098

### Segment: 289

#### Designation [?](#)

##### Current Designation

Admin/Permitted Use Only

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- SOIL Soils Steep Slopes 40%
- SOIL Soils Fragile
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk winter concentration areas
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches >60 acres

#### Rationale

##### Designation Criteria

- **Minimize Damage:** Fragile soils SSR
- **Minimize Harassment:** Sage-Minimize fragmentation, PPSV- Minimize fragmentation, Raptor Potential Habitat

##### Rationale for Decision

- Route was designated to ensure access to rights-of-way, private property, and livestock grazing facilities.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Admin/Permitted Use Only

**Alternative C:** Admin/Permitted Use Only

**Alternative D:** Admin/Permitted Use Only

## Public Comments On Route: 2098

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. ## Public Comments On Route: 2099

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 000000135-26

• Cottonwood Creek This creek is a rare example of an almost completely unroaded, untrailed stream corridor for most of its length until it reaches Roubideau Creek and the Gunnison River. Unplanned, damaging routes along Cottonwood Creek upstream near the Forest Service boundary should all be closed to create an undisturbed full stretch of riparian corridor. Randomly created routes needing closure are: 2152, 2149, 2147, 2148, 2439, 2153, 2154, 2156. Closing these routes would restore a relatively intact watershed. Routes needing closure at the northern end of Cottonwood Creek, for the same reason, are: 3087, 3088, 3082, 3083, 3080, 3015, 2370, 2089, 2100, 3079, 3047, 2396, 2013, 3128, 3169, 2014, 2162, 2160, 2493, 3005. Some of these routes spur off 25 Mesa Road and do not actually enter the Cottonwood Creek drainage, but most if not all are not purposely created, not planned, are randomly scarring the landscape, and are introducing difficult to enforce ORV use. Only a few, if any should be left open, that have an overriding need and purpose. All the user-created routes descending into Cottonwood Creek should be closed, including 2100, 2370, 2099, and the whole tangle of routes 3169, etc etc

- WILDLIFE Elk severe winter range
- RIPARIAN Riparian 1 stream crossing
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Direct impact
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Minimize Damage:** Cultural – SSR within 100m sites
- **Minimize Harassment:** PPSV- Minimize fragmentation

##### Rationale for Decision

- Route was designated to ensure access to rights-of-way, private property, and livestock grazing facilities.

- I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness.Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources.As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use.The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles.What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures.All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Public Comments On Route: 2109

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 000000135-23

• Dry Mesa Road Dry Mesa Road similarly has numerous parallel and duplicative routes and loops that are severely and unnecessarily fragmenting what has been a relatively intact habitat area. This spiderweb of routes did not exist a few years ago and should not be legitimized, just because new mobile technologies have the ability to get into these areas. Needing closure and obliteration specifically are routes 3105, 3104 2199, 2200, 2004, 2206, 2109, 2112, 2110, 2111, 3086, 2203, 2058, 2204, 2023. Effective closure and obliteration of these purposeless, randomly-created routes is necessary to restore the integrity of what was until recently a wild and remote landscape

I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 2112

### Segment: 191

#### Designation

##### Current Designation

Open (All modes of travel)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- SOIL Soils Steep Slopes 40%
- SOIL Soils Fragile
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk winter concentration areas
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Indirect impact
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- Recreation:** RMA objectives, Rec opportunities – general

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Vehicles under 50" wide

**Alternative C:** Closed (Rehab)

**Alternative D:** Vehicles under 50" wide

## Public Comments On Route: 2112

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 00000135-23

• Dry Mesa Road Dry Mesa Road similarly has numerous parallel and duplicative routes and loops that are severely and unnecessarily fragmenting what has been a relatively intact habitat area. This spiderweb of routes did not exist a few years ago and should not be legitimized, just because new mobile technologies have the ability to get into these areas. Needing closure and obliteration specifically are routes 3105, 3104 2199, 2200, 2004, 2206, 2109, 2112, 2110, 2111, 3086, 2203, 2058, 2204, 2023. Effective closure and obliteration of these purposeless, randomly-created routes is necessary to restore the integrity of what was until recently a wild and remote landscape

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness.Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources.As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use.The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles.What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and

needs to be returned to its previous condition by comprehensive route closures.All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 212

### Segment: 2579

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- RIPARIAN Riparian 1 stream crossing
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

#### Rationale

##### Designation Criteria

- **Minimize Damage:** Fragile soils SSR, NHT – close routes for setting
- **Minimize Harassment:** PPSV- Minimize fragmentation

##### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to improve natural setting along the Old Spanish National Historic Trail.
- Route was designated to reduce fragmentation in Priority Vegetation types

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 212

Comment ID: 000000091-1

- Sowbelly Ridge: This is an area which my family and I have hunted for decades. We are meat hunters, not sport hunters, and depend on the elk, deer and bear meat we get to supplement our food supply through the winter. It has become increasingly difficult to get to where the animals are because of roads which have already been closed. I would ask that roads numbered 2571, 2597, 2598, 2601, 3162, 2089, and 2166 remain open. We need roads to help in game retrieval. This area is usually still "t-shirt" weather in October when we hunt, which means very warm temperatures. If an animal is left for too long in that weather, it will spoil if it isn't skinned, gutted and transported as soon as possible to a meat locker. We typically get the meat out of the back country where it was killed and get it to camp to hang overnight and then immediately take it to GJ to a meat locker. We don't "road hunt"; we take our ATVs to the edge our hunting area and then start walking usually all day and for many miles. Even if we are lucky enough to get our game, none of us, even young, strong guys, can carry more than a quarter of an elk at a time very far, as has been suggested. This would mean 4 trips to carry an animal out and it can't be done before the meat spoils. So which law should we break? The law that says you can't use an ATV on an existing road to retrieve game or the law that says you can't waste meat without facing a stiff fine? These roads are currently open and I ask that they remain open for game retrieval using ATVs: 2168, 2122, 2121, 2169 & 2170, 2596, 2171, 2003, 3145, 2182, 2179, 2178, 3143 and 2181.

Comment ID: 000000171-7

- IV. TRANSPORTATION AND TRAVEL MANAGEMENT Mr. Miller's owns various parcels of private property and multiple water diversions in the area in question, and must access these lands via roads and trails which currently cross public land. In addition, Mr. Miller must necessarily access various roads and trails to in the course of managing his livestock operation. The EIS proposes closing various roads and trails to public motorized travel, to minimize resource damage caused by the public on both public and private lands.

EIS at 157, 187. Mr. Miller supports the BLM's proposal to restrict public access to public and private property, but only so long as he is not restricted from using these roads as may be necessary to access his private lands and manage his livestock operation. Thus, to the extent that the BLM wishes to close roads to motorized public traffic, it should simultaneously grant Mr. Miller legal, administrative access. In addition, Mr. Miller notes that he would be entitled to a formal decision, subject to appeal, prior to the BLM restricting access to his private property and/or otherwise impacting his livestock operation. Mr. Miller notes that the BLM has mis-classified many routes. See EIS Map N-1 e. Specifically, many routes which have historically been used to access private land and water diversions, and/or are necessary to maintain livestock improvements or otherwise manage and operate Mr. Miller's livestock operation, have been incorrectly labeled as closed or otherwise restricted in their use. These routes should be classified as "administrative," to recognize these historic uses and to allow for continued uses consistent therewith. The Routes which have been incorrectly classified and which should be classified as "administrative" are as follows: Routes 460, 1220, 1243, 1245, 2003, 2053, 2073, 2086, 2089, 2121, 2122, 2126, 2156, 2166, 2168, 2171-2172, 2177, 2180, 2336, 2342, 2354, 2408, 2412, 2445, 2581, 2582, 2583, 2585, 2587, 2588, 2590, 2591, 2593, 2595, 2596, 2598, 2599, 2612, 2613, 2622, 2691, 3011, 3048, 3070, 3131, 3141, and 3158. See EIS Map N-1e. In addition, Route 2072 is not completely depicted on the map, in that it extends down the river, across BLM and private property, an additional 2-3 miles, and likewise Route 3048 extends an additional 0.75 miles and leads to private property. Id. FinaUy, Map N-1e incorrectly labels Mr. Miller's privately owned bridge, which crosses the Gunnison River at the Bridgeport area, as "administrative." I d. Mr. Miller requests that the BLM correct these errors and mis-classifications.

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to be downsized by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area.

## Route: 2122

### Segment: 354

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- SOIL Soils 25% to 40% Slopes
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I high
- DENSITY Route density medium in Alt A
- DENSITY Route density medium in Alt E

#### Rationale

##### Designation Criteria

- **Minimize Damage:** Fragile soils SSR, Soils - SSR slopes 25-40%
- **Minimize Harassment:** Raptor Potential Habitat
- **Recreation:** RMA objectives

##### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to protect potential raptor habitat

#### Previous Alternatives Analyzed

**Alternative A:** Vehicles under 50" wide

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed, seek re-route or mitigation

• Sowlbelly Ridge: This is an area which my family and I have hunted for decades. We are meat hunters, not sport hunters, and depend on the elk, deer and bear meat we get to supplement our food supply through the winter. It has become increasingly difficult to get to where the animals are because of roads which have already been closed. I would ask that roads numbered 2571, 2597, 2598, 2601, 3162, 2089, and 2166 remain open. We need roads to help in game retrieval. This area is usually still "t-shirt" weather in October when we hunt, which means very warm temperatures. If an animal is left for too long in that weather, it will spoil if it isn't skinned, gutted and transported as soon as possible to a meat locker. We typically get the meat out of the back country where it was killed and get it to camp to hang overnight and then immediately take it to GJ to a meat locker. We don't "road hunt"; we take our ATVs to the edge our hunting area and then start walking usually all day and for many miles. Even if we are lucky enough to get our game, none of us, even young, strong guys, can carry more than a quarter of an elk at a time very far, as has been suggested. This would mean 4 trips to carry an animal out and it can't be done before the meat spoils. So which law should we break? The law that says you can't use an ATV on an existing road to retrieve game or the law that says you can't waste meat without facing a stiff fine? These roads are currently open and I ask that they remain open for game retrieval using ATVs: 2168, 2122, 2121, 2169 & 2170, 2596, 2171, 2003, 3145, 2182, 2179, 2178, 3143 and 2181.

• Escalante Rd/Dry Mesa Rd, Sawmill Mesa Rd & 25 Mesa Rd areas: Due to hunting access use, and OHV recreation, I would like to see trail #'s 2166, 2168 & 2122, which are currently open to atv use, remain open to access as they currently are today. Other trails I'd like to see remain open as currently are, for same purposes, are #2169, 2596, 2171, 2003, 2122, 3145, 2182, 2179, 2178, 3143, 2181. These roads & trails are important to hunting access. Between Dry Mesa Rd & Sawmill Mesa Rd, I'd like for trails #'s 2243, 2244, 2248, 2249 and 2136 to remain open for atv use, as they currently are. These trails provide alternative route vs. having to travel on the main access roadways (Sawmill Mesa or Dry Mesa) and provide unique OHV recreation value for the activity I love to participate in. Alternative B & E designate these for horse and foot traffic and I'd like to see them remain open to atv activity as they currently are today. Trail # 2006, 2299, 2298, 2297 are slated for closure in Alt's B & E, but perhaps those would make a good horse/foot route vs. closure.

• Camp Ridge South of the Sowlbelly and Camp Ridge all the recently pioneered routes, 2122, 2172, 2126, 2180 and 2127, should be permanently closed and obliterated to reduce habitat fragmentation, improve wildlife security and return this area to its previous more primitive and solitary condition. These routes are unnecessary, go nowhere and serve no purpose

Organization, commenter: Escalante Ranch, Richard Miller

Comment ID: 00000171-7

• IV. TRANSPORTATION AND TRAVEL MANAGEMENT Mr. Miller's owns various parcels of private property and multiple water diversions in the area in question, and must access these lands via roads and trails which currently cross public land. In addition, Mr. Miller must necessarily access various roads and trails to in the course of managing his livestock operation. The EIS proposes closing various roads and trails to public motorized travel, to minimize resource damage caused by the public on both public and private lands. EIS at 157, 187. Mr. Miller supports the BLM's proposal to restrict public access to private property, but only so long as he is not restricted from using these roads as may be necessary to access his private lands and manage his livestock operation. Thus, to the extent that the BLM wishes to close roads to motorized public traffic, it should simultaneously grant Mr. Miller legal, administrative access. In addition, Mr. Miller notes that he would be entitled to a formal decision, subject to appeal, prior to the BLM restricting access to his private property and/or otherwise impacting his livestock operation. Mr. Miller notes that the BLM has mis-classified many routes. See EIS Map N -1 e. Specifically, many routes which have historically been used to access private land and water diversions, and/or are necessary to maintain livestock improvements or otherwise manage and operate Mr. Miller's livestock operation, have been incorrectly labeled as closed or otherwise restricted in their use. These routes should be classified as "administrative," to recognize these historic uses and to allow for continued uses consistent therewith. The routes which have been incorrectly classified and which should be classified as "administrative" are as follows: Routes 460, 1220, 1243, 1245, 2003, 2053, 2073, 2086, 2089, 2121, 2122, 2126, 2156, 2166, 2168, 2171, 2172, 2177, 2180, 2336, 2342, 2354, 2408, 2412, 2445, 2581, 2582, 2583, 2585, 2587, 2588, 2590, 2591, 2593, 2595, 2596, 2598, 2599, 2612, 2613, 2622, 2691, 3011, 3048, 3070, 3131, 3141, and 3158. See EIS Map N-1e. In addition, Route 2072 is not completely depicted on the map, in that it extends down the river, across BLM and private property, an additional 2-3 miles, and likewise Route 3048 extends an additional 0.75 miles and leads to private property. I'd like to see the BLM correct these errors and mis-classifications.

Comment ID: 00000135-28

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowlbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 2123

### Segment: 322

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- Needs Data - SSS Plants

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- SOIL Soils Fragile
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I high
- SMA Wild and Scenic River area
- DENSITY Route density low in Alt A
- DENSITY Route density low in Alt E
- SSPLANT Special Status Species Colorado hookless cactus

#### Rationale

##### Designation Criteria

- **Minimize Damage:** Cactus – reduce density within 200m
- **Minimize Harassment:** PPSV- Minimize fragmentation

#### Rationale for Decision

- Route was designated to reduce the density of routes within 200 meters of known Colorado hookless Cactus occurrences.
- Route was designated to reduce fragmentation in Priority Vegetation types

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- SOIL Soils 25% to 40% Slopes
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I high
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- **Minimize Damage:** Fragile soils SSR, Soils - SSR slopes 25-40%
- **Minimize Harassment:** Raptor Potential Habitat
- **Recreation:** RMA objectives

### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to protect potential raptor habitat

Comment ID: 00000068-3

• The following high value recreational routes/roads are legal ROW's in the State of Colorado, Mesa County and the BLM does not have the jurisdiction to close them: 500, 472, 518, 521, 530, 39, 127, 572, 566, 66, 65, 148, 71, 74, 587, 595, 608, 622, 628, 635, 624, 609, 611, 706, 678, 700, 719, 726, 696, 26, 936, 847, 849, 919, 767, 824, 96, 822, 817, 950, 1021, 900, 2682, 1020, 1003, 1084, 1142, 1184, 1156, 1198, 1349, 1308, 1310, 1238, 1263, 1122, 1170, 1192, 974, 941, 1076, 1039, 1018, 1759, 1764, 1758, 1174, 1788, 1798, 1669, 1699, 1773, 1755, 1779, 1750, 1751, 1792, 1720, 1726, 1727, 1720, 1722, 1803, 1805, 1809, 1614, 1609, 1605, 1608, 1571, 1526, 1516, 1448, 755, 807, 900, 10, 48, 924, 950, 1005, 965, 8, 1115, 981, 984, 1135, 2678, 1249, 1171, 1150, 1249, 1320, 1235, 1236, 1228, 1227, 1409, 1456, 1349, 1308, 1513, 1221, 1550, 1567, 1641, 1612, 1740, 1688, 2597, 2598, 2601, 2440, 3160, 3162, 2089, 2166, 2170, 2596, 2171, 2003, 2122, 2126, 2189, 3145, 2182, 2179, 2178, 3143, 2181, 2121, 2122, 2168, 2126, 2180, 2095, 2173, 2174, 2620, 2129, 1686, 1692, 1667, 1647, 1631, 1613, 1596, 1549, 1541, 2647, 1633, 1605, 1608, 1571, 2645, 1507, 1448, 1496, 1516, 1504, 1510, 1508, 1509, 439, 431, 456, 461, 460, 391, 423, 415, 419, 407, 402, 367, 372, 339, 298, 338, 105, 368, 374, 393, 389, 390, 376, 377, 351, 350, 121, 345, 320, 301, 251, 234, 232, 205, 344, 107, 103, 152, 153, 161, 168, 3199, 188, 196, 255, 254, 236, 294, 242, 219, 201, 169, 162, 158, 160, 173. The following high value recreational routes/roads are legal ROW's in the State of Colorado, Delta County, and the BLM does not have the jurisdiction to close them: 3011, 2184, 2191, 3100, 2187, 2026, 2059, 2188, 2192, 3104, 2130, 3009, 2199, 2200, 2111, 2223, 2024, 3006, 2231, 3094, 2579, 2210, 2344, 2243, 2249, 2248, 3074, 2354, 2384, 2296, 2295, 2287, 2304, 2062, 2163, 3163, 2164, 2430, 4006, 3016, 2351, 3140, 2410, 4008, 2324, 2073, 2306, 2459, 3192, 3193, 2350, 2443, 2035, 2336, 2495, 2491, 2159, 3058, 2277, 2465, 2467, 3189, 2472, 2297, 2006, 2265, 2271, 2276, 2135, 2139, 3053, 2489, 3033, 3057, 2031, 2276, 2210, 2579, 2136, 2344, 3164, 2400, 2379, 3014, 2365, 3116, 2251, 2259, 2149, 2153, 2146, 2144, 2145, 2356, 2257, 2048, 2358, 3165, and 3166.

• Camp Ridge South of the Sowbelly and Camp Ridge all the recently pioneered routes, 2122, 2172, 2126, 2180 and 2127, should be permanently closed and obliterated to reduce habitat fragmentation, improve wildlife security and return this area to its previous more primitive and solitary condition. These routes are unnecessary, go nowhere and serve no purpose

Organization, commenter: Escalante Ranch, Richard Miller

Comment ID: 000000171-7

• IV. TRANSPORTATION AND TRAVEL MANAGEMENT Mr. Miller's owns various parcels of private property and multiple water diversions in the area in question, and must access these lands via roads and trails which currently cross public land. In addition, Mr. Miller must necessarily access various roads and trails to in the course of managing his livestock operation. The EIS proposes closing various roads and trails to public motorized travel, to minimize resource damage caused by the public on both public and private lands. EIS at 157, 187. Mr. Miller supports the BLM's proposal to restrict public access to protect public and private property, but only so long as he is not restricted from using these roads as may be necessary to access his private lands and manage his livestock operation. Thus, to the extent that the BLM wishes to close roads to motorized public traffic, it should simultaneously grant Mr. Miller legal, administrative access. In addition, Mr. Miller notes that he would be entitled to a formal decision, subject to appeal, prior to the BLM restricting access to his private property and/or otherwise impacting his livestock operation. Mr. Miller notes that the BLM has mis-classified many routes. See EIS Map N -1 e. Specifically, many routes which have historically been used to access private land and water diversions, and/or are necessary to maintain livestock improvements or otherwise manage and operate Mr. Miller's livestock operation, have been incorrectly labeled as closed or otherwise restricted in their use. These routes should be classified as "administrative," to recognize these historic uses and to allow for continued uses consistent therewith. The Routes which have been incorrectly classified and which should be classified as "administrative" are as follows: Routes 460, 1220, 1243, 1245, 2003, 2053, 2073, 2086, 2089, 2121, 2122, 2126, 2156, 2166, 2168, 2171, 2172, 2177, 2180, 2336, 2342, 2354, 2408, 2412, 2445, 2581, 2582, 2583, 2585, 2587, 2588, 2590, 2591, 2593, 2595, 2596, 2598, 2599, 2612, 2613, 2622, 2691, 3011, 3048, 3070, 3131, 3141, and 3158. See EIS Map N-1e. In addition, Route 2072 is not completely depicted on the map, in that it extends down the river, across BLM and private property, an additional 2-3 miles, and likewise Route 3048 extends an additional 0.75 miles and leads to private property. Id. Fina Uy, Map N-1e incorrectly labels Mr. Miller's privately owned bridge, which crosses the Gunnison River at the Bridgeport area, as "administrative." I d. Mr. Miller requests that the BLM correct these errors and mis-classifications.

Comment ID: 000000135-28

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 2127

### Segment: 309

#### Designation

**Current Designation**  
Closed (Rehab)

#### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

#### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- SOIL Soils 25% to 40% Slopes
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I high
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Minimize Damage:** Fragile soils SSR, Soils - SSR slopes 25-40%
- **Minimize Harassment:** Raptor Potential Habitat
- **Recreation:** RMA objectives

##### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to protect potential raptor habitat

• Routes 2620 and 2128 near Kelso Creek should be closed to public access, kept open for private access only if necessary. To the east, spurs 2576 and 2129 should be closed and obliterated

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 213

### Segment: 2567

#### Designation

##### Current Designation

Open (All modes of travel)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- **Recreation:** Rec opportunities – general, Rec opportunities - specific

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 213

- No public comments for this Route

## Route: 2130

### Segment: 108

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- SOIL Soils Fragile
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk winter concentration areas
- RIPARIAN Riparian 1 stream crossing
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I high
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- **Minimize Damage:** Fragile soils SSR
- **Minimize Harassment:** Sage-Minimize fragmentation

### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to reduce fragmentation of sagebrush patches

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 2131

### Segment: 116

#### Designation [?](#)

##### Current Designation

Open, seek re-route or mitigation

##### Mitigation Criteria

- Riparian

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- SOIL Soils Fragile
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk winter concentration areas
- WILDLIFE Elk severe winter range
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I high
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- No designation criteria for this route segment.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open (All modes of travel)

**Alternative C:** Open, seek re-route or mitigation

**Alternative D:** Open, seek re-route or mitigation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands

- SOIL Soils Fragile
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk winter concentration areas
- WILDLIFE Elk severe winter range
- RIPARIAN Riparian 1 stream crossing
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I high
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- Minimize Damage:** Fragile soils SSR
- Minimize Harassment:** Sage-Minimize fragmentation

### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to reduce fragmentation of sagebrush patches

## Previous Alternatives Analyzed

## Public Comments On Route: 2134

• Sawmill Mesa Moving south to the CDOW parcel, the BLM should work with the BLM to close numerous user-created routes in the Sawmill Mesa, Grade Gulch and Mud Springs area. The CDOW road leading north east to Cactus Park has numerous random, unplanned spurs and duplicative routes branching off, which need to be closed. Only the main, historically-used arteries should remain open to preserve these remote vistas and natural soundscapes. Routes to be closed and obliterated are: 2273=2139-2696; 2141, 3138, 3135, along with other spurs off the Peach Orchard Point Road 2270, including 3126, 2271, 2272. 2270 all of which should be closed to maintain silent open space quality of this point. Other routes needing closure off the CDOW road are: 2261, 2259, 3002, 3090, 2260, 2051, 2258, 2259, 3154, 2233, 2263, 2254, 3031, 3109, 2134, 2255, 2257, 2250,

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 2136

### Segment: 83

#### Designation

##### Current Designation

Foot/Horse

##### Mitigation Criteria

- Needs Data - Range

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Range access for general livestock management
- SOIL Soils Steep Slopes 40%
- SOIL Soils 25% to 40% Slopes
- SOIL Soils Fragile
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range

- WILDLIFE Elk severe winter range
- RIPARIAN Riparian crossing perennial stream
- CULTURAL Cultural Class I moderate
- SMAs Lands with wilderness characteristics
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches <60 acres

## Rationale

### Designation Criteria

- **Minimize Damage:** Soils - SSR slopes 25-40%, Lands with wilderness characteristics
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

• Dry Mesa Rd. and Sawmill Mesa Rd.: Roads 2243, 2248, 2249 and 2136 are currently open for ATV use and I would like to see them remain so. It would make sense to also leave 2006, 2299, 2298, 2297 left open to horse/foot traffic, thereby providing multi-use with little user conflict

Organization, commenter: Tracey Rohde

Comment ID: 000000103-4

• Escalante Rd/Dry Mesa Rd, Sawmill Mesa Rd & 25 Mesa Rd areas: Due to hunting access use, and OHV recreation, I would like to see trail #'s 2166, 2168 & 2122, which are currently open to atv use, remain open to access as they currently are today. Other trails I'd like to see remain open as currently are, for same purposes, are #2169, 2596, 2171, 2003, 2122, 3145, 2182, 2179, 2178, 3143, 2181. These roads & trails are important to hunting access. Between Dry Mesa Rd & Sawmill Mesa Rd, I'd like for trails #'s 2243, 2244, 2248, 2249 and 2136 to remain open for atv use, as they currently are. These trails provide alternative route vs. having to travel on the main access roadways (Sawmill Mesa or Dry Mesa) and provide unique OHV recreation value for the activity I love to participate in. Alternative B & E designate these for horse and foot traffic and I'd like to see them remain open to atv activity as they currently are today. Trail # 2006, 2299, 2298, 2297 are slated for closure in Alt's B & E, but perhaps those would make a good horse/foot route vs. closure.

Comment ID: 000000135-24

• Black Point Draw/Black Point Three routes between Dry Mesa and the CDOW road leading north east to Cactus Park are redundant and unnecessarily fragmenting. 2579-2210-2344 is recently pioneered and should be closed immediately, along with its spurs 2136, 2209, 2208 and 3094. These encroach on a relatively wild Escalante Creek canyon and have had no traditional or long-term use or purpose. 2024 and 3006 are parallel and duplicative, provide the same experience as each other, and should be reduced to one route. The BLM should decide which route is the least damaging, and disturbing to wildlife, and easiest to enforce, and close the other one

- I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 2138

### Segment: 73

## Designation

### Current Designation

Closed (Rehab)

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I high
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- **Minimize Damage:** Fragile soils SSR, Soils - SSR slopes 25-40%

### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.

## Previous Alternatives Analyzed

**Alternative A:** Vehicles under 50" wide

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

- Sawmill Mesa Moving south to the CDOW parcel, the BLM should work with the BLM to close numerous user-created routes in the Sawmill Mesa, Grade Gulch and Mud Springs area. The CDOW road leading north east to Cactus Park has numerous random, unplanned spurs and duplicative routes branching off, which need to be closed. Only the main, historically-used arteries should remain open to preserve these remote vistas and natural soundscapes. Routes to be closed and obliterated are: 2273=2139-2696; 2141, 3138, 3135, along with other spurs off the Peach Orchard Point Road 2270, including 3126, 2271, 2272. 2270 all of which should be closed to maintain silent open space quality of this point. Other routes needing closure off the CDOW road are: 2261, 2259, 3002, 3090, 2260, 2051, 2258, 2259, 3154, 2233, 2263, 2254, 3031, 3109, 2134, 2255, 2257, 2250,

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 214

### Segment: 2618

#### Designation [?](#)

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- CULTURAL Cultural Class I low
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Minimize Damage:** Fragile soils SSR, NHT – close routes for setting
- **Minimize Harassment:** PPSV- Minimize fragmentation

##### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to improve natural setting along the Old Spanish National Historic Trail.
- Route was designated to reduce fragmentation in Priority Vegetation types

#### Previous Alternatives Analyzed

**Alternative A:** Foot/Horse/Mechanized/Motorcycle

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 2145

### Segment: 23

#### Designation

##### Current Designation

Admin/Permitted Use Only

##### Mitigation Criteria

- Work with Land Owner on Right of Way

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- LANDS Access to non-federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I high
- SMAs Wild and Scenic River area
- DENSITY Route density low in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Minimize Damage:** Fragile soils SSR

##### Rationale for Decision

- Route was designated to ensure access to rights-of-way, private property, and livestock grazing facilities.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Admin/Permitted Use Only

**Alternative C:** Admin/Permitted Use Only

**Alternative D:** Admin/Permitted Use Only

• Route 2145 appears to be a secondary access to a field (assuming the field is owned by nearby house owner). The primary access is from the county road at 12 S 736204 4272456. So this route 2145 should be closed.

Comment ID: 000000135-28

I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 2146

### Segment: 19

#### Designation ?

##### Current Designation

Admin/Permitted Use Only

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- SOIL Soils Steep Slopes 40%
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I high
- DENSITY Route density low in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches <60 acres

#### Rationale

##### Designation Criteria

- No designation criteria for this route segment.

##### Rationale for Decision

- Route was designated to ensure access to rights-of-way, private property, and livestock grazing facilities.

#### Previous Alternatives Analyzed

**Alternative A:** Admin/Permitted Use Only

**Alternative B:** Admin/Permitted Use Only

**Alternative C:** Open, seek re-route or mitigation

**Alternative D:** Open, seek re-route or mitigation

I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 2147

### Segment: 12

#### Designation

##### Current Designation

Admin/Permitted Use Only

##### Mitigation Criteria

- Drainage Crossing
- Steep slopes

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- LANDS Right of Way
- SOIL Soils Steep Slopes 40%
- SOIL Soils 25% to 40% Slopes
- SOIL Soils Fragile
- WILDLIFE Mule deer severe winter range
- RIPARIAN Riparian crossing perennial stream
- CULTURAL Cultural Class I high
- SMAs Wild and Scenic River area
- DENSITY Route density low in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Minimize Damage:** Soils -PSD slopes >40%, Riparian - perennial streams SSR 100 m
- **Minimize Harassment:** Raptor Potential Habitat

##### Rationale for Decision

- Route was designated to ensure access to rights-of-way, private property, and livestock grazing facilities.

#### Previous Alternatives Analyzed

**Alternative A:** Admin/Permitted Use Only

**Alternative B:** Admin/Permitted Use Only

**Alternative C:** Open, seek re-route or mitigation

**Alternative D:** Open, seek re-route or mitigation

## Public Comments On Route: 2147

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 00000135-26

• Cottonwood Creek This creek is a rare example of an almost completely unroaded, untrailed stream corridor for most of its length until it reaches Roubideau Creek and the Gunnison River. Unplanned, damaging routes along Cottonwood Creek upstream near the Forest Service boundary should all be closed to create an undisturbed full stretch of riparian corridor. Randomly created routes needing closure are: 2152, 2149, 2147, 2148, 2439, 2153, 2154, 2156. Closing these routes would restore a relatively intact watershed. Routes needing closure at the northern end of Cottonwood Creek, for the same reason, are: 3087, 3088, 3082, 3083, 3080, 3015, 2370, 2089, 2100, 3079, 3047, 2396, 2013, 3128, 3169, 2014, 2162, 2160, 2493, 3005. Some of these routes spur off 25 Mesa Road and do not actually enter the Cottonwood Creek drainage, but most if not all are not purposely created, not planned, are randomly scarring the landscape, and are introducing difficult to enforce ORV use. Only a few, if any should be left open, that have an overriding need and purpose. All the user-created routes descending into Cottonwood Creek should be closed, including 2100, 2370, 2099, and the whole tangle of routes 3169, etc etc

The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 2148

### Segment: 3192

#### Designation

##### Current Designation

Admin/Permitted Use Only

##### Mitigation Criteria

- Drainage Crossing
- Steep slopes

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- LANDS Access to non-federal lands

- LANDS Right of Way
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I high
- SMAs Wild and Scenic River area
- DENSITY Route density low in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- **Minimize Damage:** Soils -PSD slopes >40%, Riparian - perennial streams SSR 100 m
- **Minimize Harassment:** Raptor Potential Habitat

### Rationale for Decision

- Route was designated to ensure access to rights-of-way, private property, and livestock grazing facilities.

Comment ID: 000000135-26

• Cottonwood Creek This creek is a rare example of an almost completely unroaded, untrailed stream corridor for most of its length until it reaches Roubideau Creek and the Gunnison River. Unplanned, damaging routes along Cottonwood Creek upstream near the Forest Service boundary should all be closed to create an undisturbed full stretch of riparian corridor. Randomly created routes needing closure are: 2152, 2149, 2147, 2148, 2439, 2153, 2154, 2156. Closing these routes would restore a relatively intact watershed. Routes needing closure at the northern end of Cottonwood Creek, for the same reason, are: 3087, 3088, 3082, 3083, 3080, 3015, 2370, 2089, 2100, 3079, 3047, 2396, 2013, 3128, 3169, 2014, 2162, 2160, 2493, 3005. Some of these routes spur off 25 Mesa Road and do not actually enter the Cottonwood Creek drainage, but most if not all are not purposely created, not planned, are randomly scarring the landscape, and are introducing difficult to enforce ORV use. Only a few, if any should be left open, that have an overriding need and purpose. All the user-created routes descending into Cottonwood Creek should be closed, including 2100, 2370, 2099, and the whole tangle of routes 3169, etc etc

Comment ID: 000000135-28

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

● Cottonwood Creek This creek is a rare example of an almost completely unroaded, untrailed stream corridor for most of its length until it reaches Roubideau Creek and the Gunnison River. Unplanned, damaging routes along Cottonwood Creek upstream near the Forest Service boundary should all be closed to create an undisturbed full stretch of riparian corridor. Randomly created routes needing closure are: 2152, 2149, 2147, 2148, 2439, 2153, 2154, 2156. Closing these routes would restore a relatively intact watershed. Routes needing closure at the northern end of Cottonwood Creek, for the same reason, are: 3087, 3088, 3082, 3083, 3080, 3015, 2370, 2089, 2100, 3079, 3047, 2396, 2013, 3128, 3169, 2014, 2162, 2160, 2493, 3005. Some of these routes spur off 25 Mesa Road and do not actually enter the Cottonwood Creek drainage, but most if not all are not purposely created, not planned, are randomly scarring the landscape, and are introducing difficult to enforce ORV use. Only a few, if any should be left open, that have an overriding need and purpose. All the user-created routes descending into Cottonwood Creek should be closed, including 2100, 2370, 2099, and the whole tangle of routes 3169, etc etc

● I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 2154

### Segment: 9

#### Designation

## Current Designation

Admin/Permitted Use Only

## Mitigation Criteria

- Drainage Crossing

## Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- LANDS Access to non-federal lands
- SOIL Soils Steep Slopes 40%
- SOIL Soils Fragile
- WILDLIFE Mule deer severe winter range
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I high
- DENSITY Route density low in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- **No designation criteria for this route segment.**

### Rationale for Decision

- Route was designated to ensure access to rights-of-way, private property, and livestock grazing facilities.

## Previous Alternatives Analyzed

**Alternative A:** Closed (Not Rehabbed)

**Alternative B:** Admin/Permitted Use Only

**Alternative C:** Open, seek re-route or mitigation

**Alternative D:** Open, seek re-route or mitigation

Comment ID: 00000171-7

- IV. TRANSPORTATION AND TRAVEL MANAGEMENT Mr. Miller's owns various parcels of private property and multiple water diversions in the area in question, and must access these lands via roads and trails which currently cross public land. In addition, Mr. Miller must necessarily access various roads and trails to in the course of managing his livestock operation. The EIS proposes closing various roads and trails to public motorized travel, to minimize resource damage caused by the public on both public and privatelands. EIS at 157, 187. Mr. Miller supports the BLM's proposal to restrict public access to protect public and private property, but only so long as he is not restricted from using these roads as may be necessary to access his private lands and manage his livestock operation. Thus, to the extent that the BLM wishes to close roads to motorized public traffic, it should simultaneously grant Mr. Miller legal, administrative access. In addition, Mr. Miller notes that he would be entitled to a formal decision, subject to appeal, prior to the BLM restricting access to his private property and/or otherwise impacting his livestock operation. Mr. Miller notes that the BLM has mis-classified many routes. See EIS Map N -1 e. Specifically, many routes which have historically been used to access private land and water diversions, and/or are necessary to maintain livestock improvements or otherwise manage and operate Mr. Miller's livestock operation, have been incorrectly labeled as closed or otherwise restricted in their use. These routes should be classified as "administrative," to recognize these historic uses and to allow for continued uses consistent therewith. The Routes which have been incorrectly classified and which should be classified as "administrative" are as follows: Routes 460, 1220, 1243, 1245, 2003, 2053, 2073, 2086, 2089, 2121, 2122, 2126, 2156, 2166, 2168, 2171 ~ 2172, 2177, 2180, 2336, 2342, 2354, 2408, 2412, 2445, 2581, 2582, 2583, 2585, 2587, 2588, 2590, 2591, 2593, 2595, 2596, 2598, 2599, 2612, 2613, 2622, 2691, 3011, 3048, 3070, 3131, 3141, and 3158. See EIS Map N-1e. In addition, Route 2072 is not completely depicted on the map, in that it extends down the river, across BLM and private property, an additional 2-3 miles, and likewise Route 3048 extends an additional 0.75 miles and leads to private property. Id.

Finay, Map N-1e incorrectly labels Mr. Miller's privately owned bridge, which crosses the Gunnison River at the Bridgeport area, as "administrative." I d. Mr. Miller requests that the BLM correct these errors and mis-classifications.

- I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 2157

### Segment: 493

#### Designation [?](#)

##### Current Designation

Open, seek re-route or mitigation

##### Mitigation Criteria

- Special Species Plant

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Indirect impact
- SMAs Escalante Canyon ACEC
- SMAs Wild and Scenic River area
- DENSITY Route density low in Alt A
- DENSITY Route density low in Alt E
- SSPLANT Special Status Species Colorado hookless cactus

#### Rationale

##### Designation Criteria

- No designation criteria for this route segment.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open (All modes of travel)

**Alternative C:** Closed (Rehab)

**Alternative D:** Open (All modes of travel)

The following high value recreational routes/roads are legal ROW's in the State of Colorado, Mesa County and the BLM does not have the jurisdiction to close them: 500, 472, 518, 521, 530, 39, 127, 572, 566, 66, 65, 148, 71, 74, 587, 595, 608, 622, 628, 635, 624, 609, 611, 706, 678, 700, 719, 726, 696, 26, 936, 847, 849, 919, 767, 824, 96, 822, 817, 950, 1021, 900, 2682, 1020, 1003, 1084, 1142, 1184, 1156, 1198, 1349, 1308, 1310, 1238, 1263, 1122, 1170, 1192, 974, 941, 1076, 1039, 1018, 1759, 1764, 1758, 1174, 1788, 1798, 1669, 1699, 1773, 1755, 1779, 1750, 1751, 1792, 1720, 1726, 1727, 1720, 1722, 1803, 1805, 1809, 1614, 1609, 1605, 1608, 1571, 1526, 1516, 1448, 755, 807, 900, 10, 48, 924, 950, 1005, 965, 8, 1115, 981, 984, 1135, 2678, 1249, 1171, 1150, 1249, 1320, 1235, 1236, 1228, 1227, 1409, 1456, 1349, 1308, 1513, 1221, 1550, 1567, 1641, 1612, 1740, 1688, 2597, 2598, 2601, 2440, 3160, 3162, 2089, 2166, 2170, 2596, 2171, 2003, 2122, 2126, 2189, 3145, 2182, 2179, 2178, 3143, 2181, 2121, 2122, 2168, 2126, 2180, 2095, 2173, 2174, 2620, 2129, 1686, 1692, 1667, 1647, 1631, 1613, 1596, 1549, 1541, 2647, 1633, 1605, 1608, 1571, 2645, 1507, 1448, 1496, 1516, 1504, 1510, 1508, 1509, 439, 431, 456, 461, 460, 391, 423, 415, 419, 407, 402, 367, 372, 339, 298, 338, 105, 368, 374, 393, 389, 390, 376, 377, 351, 350, 121, 345, 320, 301, 251, 234, 232, 205, 344, 107, 103, 152, 153, 161, 168, 3199, 188, 196, 255, 254, 236, 294, 242, 219, 201, 169, 162, 158, 160, 173. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 216

### Segment: 2553

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

## Rationale

### Designation Criteria

- Minimize Damage:** NHT – close routes for setting
- Minimize Harassment:** PPSV- Minimize fragmentation

### Rationale for Decision

- Route was designated to improve natural setting along the Old Spanish National Historic Trail.

- Route was designated to reduce fragmentation in Priority Vegetation types

## Previous Alternatives Analyzed

- Alternative A:** Vehicles under 50" wide
- Alternative B:** Closed (Not Rehabbed)
- Alternative C:** Closed (Rehab)
- Alternative D:** Closed (Rehab)

#### Designation [?](#)

##### Current Designation

Foot/Horse

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- SOIL Soils Steep Slopes 40%
- SOIL Soils 25% to 40% Slopes
- SOIL Soils Fragile
- WILDLIFE Mule deer severe winter range
- WILDLIFE Big game winter concentration areas
- WILDLIFE Big game summer concentration areas
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I low
- SMAs Wild and Scenic River area
- SMAs Lands with wilderness characteristics
- GEOPALEO Paleontological direct impat
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Wilderness / Natural Area:** Lands with wilderness characteristics – SSR
- **Recreation:** Rec opportunities – general
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Public Comments On Route: 2160

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 000000135-26

• Cottonwood Creek This creek is a rare example of an almost completely unroaded, untrailed stream corridor for most of its length until it reaches Roubideau Creek and the Gunnison River. Unplanned, damaging routes along Cottonwood Creek upstream near the Forest Service boundary should all be closed to create an undisturbed full stretch of riparian corridor. Randomly created routes needing closure are: 2152, 2149, 2147, 2148, 2439, 2153, 2154, 2156. Closing these routes would restore a relatively intact watershed. Routes needing closure at the northern end of Cottonwood Creek, for the same reason, are: 3087, 3088, 3082, 3083, 3080, 3015, 2370, 2089, 2100, 3079, 3047, 2396, 2013, 3128, 3169, 2014, 2162, 2160, 2493, 3005. Some of these routes spur off 25 Mesa Road and do not actually enter the Cottonwood Creek drainage, but most if not all are not purposely created, not planned, are randomly scarring the landscape, and are introducing difficult to enforce ORV use. Only a few, if any should be left open, that have an overriding need and purpose. All the user-created routes descending into Cottonwood Creek should be closed, including 2100, 2370, 2099, and the whole tangle of routes 3169, etc etc

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

- I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness.Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources.As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use.The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles.What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures.All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 2162

### Segment: 364

#### Designation

##### Current Designation

Foot/Horse

##### Mitigation Criteria

- Needs Data - Range

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk severe winter range
- WILDLIFE Big game winter concentration areas
- WILDLIFE Big game summer concentration areas
- RIPARIAN Riparian crossing perinnial stream
- CULTURAL Cultural Class I low
- SMAs Wild and Scenic River area
- SMAs Lands with wilderness characteristics

- GEOPALEO Paleontological direct impact
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- **Minimize Damage:** Lands with wilderness characteristics
- **Recreation:** Rec opportunities – general
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Foot/Horse

**Alternative C:** Closed (Rehab)

**Alternative D:** Open, seek re-route or mitigation

## Public Comments On Route: 2162

Comment ID: 00000135-26

• Cottonwood Creek This creek is a rare example of an almost completely unroaded, untrailed stream corridor for most of its length until it reaches Roubideau Creek and the Gunnison River. Unplanned, damaging routes along Cottonwood Creek upstream near the Forest Service boundary should all be closed to create an undisturbed full stretch of riparian corridor. Randomly created routes needing closure are: 2152, 2149, 2147, 2148, 2439, 2153, 2154, 2156. Closing these routes would restore a relatively intact watershed. Routes needing closure at the northern end of Cottonwood Creek, for the same reason, are: 3087, 3088, 3082, 3083, 3080, 3015, 2370, 2089, 2100, 3079, 3047, 2396, 2013, 3128, 3169, 2014, 2162, 2160, 2493, 3005. Some of these routes spur off 25 Mesa Road and do not actually enter the Cottonwood Creek drainage, but most if not all are not purposely created, are randomly scarring the landscape, and are introducing difficulty to enforce ORV use. Only a few, if any should be left open, that have an overriding need and purpose. All the user-created routes descending into Cottonwood Creek should be closed, including 2100, 2370, 2099, and the whole tangle of routes 3169, etc etc

• On the Preferred Alternative E, I would like to make two suggestions on routes that have either been temporarily closed or access restricted. The first route is on the Hunting Grounds. It is the route that takes you to the dedication site for the NCA. It's an incredible overlook of the Gunnison River, the Loretta House and the Big Dominguez Canyon. The route numbers involved are: 2163, 2164, 3051, 461, 454 and 450. I understand this is proposed as a temporary closure for the preservation of cultural resources. But, instead of closing the routes until the resources can be protected, why not leave it open until funding, man power, etc. are obtained. Then only close the route for the short time it would take to actually do the work needed. This would eliminate the route being closed for an indefinite period of time.

Comment ID: 000000168-2

• Hunting GroundsIn the Hunting Grounds area, a longer distance trail similar to Kokopelli's, Tabeguache, and Paradox Trails, would be of interest to this user group[COPMOBA]. Starting at the Old Spanish Trail in Orchard Mesa and ending in Delta, this trail idea is currently feasible when using a mix of single track, ATV width trail, jeep road and even Highway 50 for a few short sections. With very little trail construction making some connections to existing trails, nearly all of this highway use can be avoided. The major attraction of this area is the views from the rim above the Gunnison River in both directions. The existing trail and any trail construction should be routed to take advantage of this valuable view resource. The following recommendations are in the spirit of developing this long distance trail. Starting from the Kannah Creek area we recommend leaving 152 open to mountain bike use for a possible future connection to the lower Kannah Creek road. Possibilities included deeded access across private land, or new construction from the existing small portion of BLM land which the road accesses. Continuing, use existing full size and ATV trail to the end of 440, or a portion of 431, to access small drainage and then construct new trail to access Bridgeport Road. Then use 438, 449 and 2163 to access 2426 and 2427 to Dominguez Road (or 3098 and 3163 and then a very short new connector to 3133 out to highway) From Dominguez Road use 4000 to 3043, then single track 4001, 4005, 4006, 4007 and 3148 to reach Escalante Road. Very nice views exist in this area from the trail. The trail would then cross Escalante road to 2073 with a connection being built to 2053. This short deviation from the Escalante road would provide a safer route for mountain bikes than the twisty road with blind corners and high speed full size vehicles. The trail would cross the river on main bridge and immediately turn left and follow 2313, 2461 and 2462 with a connection to Delta via 2352, 470 2476 and 2489. This area using borders of the northern most point of the Escalante Rim, south to the Rim Road then using 2354 as the border on the west, the main county road on the east and then back down to the rim above river on the north would provide an excellent mountain bike emphasis area for the Delta community. Visitors and local users could ride from town or drive a very short distance. Quiet Use trails are rare in this area and this topography would allow for a rewarding experience for hiker, horse and mountain bike users. This scenario would provide an area similar to the Lunch Loops and Mack Ridge areas. With a long distance rail anchoring a Quiet Use stack loop system of trails which are extremely popular and very beneficial to users and the community at trail at large

- Contiguous Motorized Route traversing the Hunting Ground: Proposed Route (4000) which starts at Dominguez Escalante Road near Hwy 50 seems to make sense for a portion of a trail that would traverse the Hunting Ground area and connect with Delta. The same holds true for (2164). We favor the implementation of a contiguous trail the length of the Hunting Ground and would connect to Delta

## Route: 2165

### Segment: 1690

#### Designation

##### Current Designation

Open, seek re-route or mitigation

##### Mitigation Criteria

- Special Species Plant

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- LANDS Right of Way
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- SSLANT Special Status Species Colorado hookless cactus

#### Rationale

##### Designation Criteria

- No designation criteria for this route segment.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

- Alternative A:** Open (All modes of travel)
- Alternative B:** Open, seek re-route or mitigation

**Alternative C:** Closed, seek re-route or mitigation

**Alternative D:** Admin/Permitted Use Only

## Public Comments On Route: 2165

- No public comments for this Route

## Route: 2166

### Segment: 580

#### Designation

##### Current Designation

Vehicles under 50" wide

##### Mitigation Criteria

- Riparian

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Range access for general livestock management
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk severe winter range
- RIPARIAN Riparian 1 stream crossing
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I high
- SMAs Lands with wilderness characteristics
- DENSITY Route density medium in Alt A
- DENSITY Route density medium in Alt E
- VEGETATION Sagebrush patches <60 acres

#### Rationale

##### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Vehicles under 50" wide

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Open (All modes of travel)

## Public Comments On Route: 2166

Organization, commenter: Widefield School District 3, Terry Kimber

Comment ID: 000000046-2

• Road 2166: (Bad Point Rd) The Wilderness area has cut off this road only mile from the end of the road. This is a law enforcement nightmare. Let's not do that again in the NCA. Road 2166 in option E is ATV only to that point but can be driven by vehicle down to the big rock hill safely and easily. This location is called Jerry's Hole. One of our favorite hunting spots when there is water or weather. I recommend making the trail ATV only from that point rather than from road 2089. Road 2089: This road is seldom used yes but is very necessary to retrieve downed game from the back of Jerry's Hole. I recommend that a downed game by ATV designation for this and many other of the trails and roads that are proposed to be closed in the areas where hunting is a significant factor from August to November. Road 3143: (Sowbelly Ridge) Should be designated Downed Game ATV to the border of the wilderness area.

• Sowbelly Ridge: This is an area which my family and I have hunted for decades. We are meat hunters, not sport hunters, and depend on the elk, deer and bear meat we get to supplement our food supply through the winter. It has become increasingly difficult to get to where the animals are because of roads which have already been closed. I would ask that roads numbered 2571, 2597, 2598, 2601, 3162, 2089, and 2166 remain open. We need roads to help in game retrieval. This area is usually still "t-shirt" weather in October when we hunt, which means very warm temperatures. If an animal is left for too long in that weather, it will spoil if it isn't skinned, gutted and transported as soon as possible to a meat locker. We typically get the meat out of the back country where it was killed and get it to camp to hang overnight and then immediately take it to GJ to a meat locker. We don't "road hunt"; we take our ATVs to the edge our hunting area and then start walking usually all day and for many miles. Even if we are lucky enough to get our game, none of us, even young, strong guys, can carry more than a quarter of an elk at a time very far, as has been suggested. This would mean 4 trips to carry an animal out and it can't be done before the meat spoils. So which law should we break? The law that says you can't use an ATV on an existing road to retrieve game or the law that says you can't waste meat without facing a stiff fine? These roads are currently open and I ask that they remain open for game retrieval using ATVs: 2168, 2122, 2121, 2169 & 2170, 2596, 2171, 2003, 3145, 2182, 2179, 2178, 3143 and 2181.

• Escalante Rd/Dry Mesa Rd, Sawmill Mesa Rd & 25 Mesa Rd areas: Due to hunting access use, and OHV recreation, I would like to see trail #'s 2166, 2168 & 2122, which are currently open to atv use, remain open to access as they currently are today. Other trails I'd like to see remain open as currently are, for same purposes, are #2169, 2596, 2171, 2003, 2122, 3145, 2182, 2179, 2178, 3143, 2181. These roads & trails are important to hunting access. Between Dry Mesa Rd & Sawmill Mesa Rd, I'd like for trails #'s 2243, 2244, 2248, 2249 and 2136 to remain open for atv use, as they currently are. These trails provide alternative route vs. having to travel on the main access roadways (Sawmill Mesa or Dry Mesa) and provide unique OHV recreation value for the activity I love to participate in. Alternative B & E designate these for horse and foot traffic and I'd like to see them remain open to atv activity as they currently are today. Trail # 2006, 2299, 2298, 2297 are slated for closure in Alt's B & E, but perhaps those would make a good horse/foot route vs. closure.

• I believe the high concentration of cultural resources in the Dominguez Addition area (page 257) and the current low usage by motorized means there is an opportunity to protect these resources from damage like we've unfortunately seen at other sites when there is easy public access (think Rough Canyon or the "I LOVE" site on Hwy 141 south of Cactus Park entrance. I, therefore, support the designation of the Dominguez Addition as an ACEC with principles such as no surface disturbance except for construction of any needed water developments that might be needed for the Dominguez Allotment as long as those developments are kept well away from the cultural resource sites. Routes 2166 and 2177 should be either closed or gated and converted to Admin Use

• we appreciate the route closures in the preferred alternative. However, as you will see in our attached 2011 route-specific comments, we are concerned about the routes left open in the draft TMP that we and others had recommended for closure, in particular: o The two ATV trails (Numbers 3162/2089/2166, and 2596/2171/2003) in the Dominguez Addition Unit that need to be closed a) to protect this unit and b) to prevent the likelihood of incursions into the Dominguez wilderness, due to remote, unmanageable and unenforceable terrain. o Palmer Gulch road #2169/2170, needs to be closed. o Road #2181 needs to be closed to OHVs. o 1778/1727 o 1782/1768/2602 in Sawmill Mesa and Wagon Park zones o 1756 should be closed at the junction with 1758, and include closure of roads 1593 and 1585

• Manage Gunnison Slopes Unit and Dominguez Addition Unit as Lands with Wilderness Characteristics ERMA status for Gunnison Slopes is a good start, but it needs the additional protection as a LWC as well. Dominguez Addition also needs to be included as a LWC, and the two ATV routes currently open in the preferred Alternative (roads 3162/2089/2166, and 2596/2171/2003) definitively closed to maintain this area's wild character

• Comments on Travel Management Plan The following comments are based upon my review of the Map of Route by Route Designations for Alternative E (Map N-1E) in relationship to the resource management goals and objectives of the NCA. As previously stated, we are concerned that wilderness characteristics within the Dominguez Addition Unit would be highly impacted by the preferred alternative through the inclusion of two ATV trails within the Unit. Both of these ATV trails are currently low-standard two-track roads that extend into the Dominguez Wilderness. The preferred alternative would restrict the use of these roads to ATV's and the trails would theoretically dead end at the Wilderness boundary. Even if ATV riders did respect the Wilderness boundary, these motorized trails would degrade the wilderness values of the Dominguez Addition Unit. For this reason we are recommending that these two roads (roads 3162/2089/2166, and 2596/2171/2003) be converted to non-motorized trails to provide big game solitude, backcountry hunting, and quiet recreation use opportunities.

Organization, commenter: Backcountry Hunters and Anglers, Craig Grother

Comment ID: 00000156-4

• Two other units with wilderness characteristics occur within the D-E NCA that are not included within the preferred alternative. Wilderness characteristics within the Gunnison Slopes Unit appear to have been largely protected through management of this area as an ERMA that would emphasize equestrian and hiking trail activities and dispersed camping. This management strategy seems reasonable to provide camping opportunities along the Gunnison River to accommodate boating use on the river while maintaining an overall primitive setting. However, wilderness characteristics within the Dominguez Addition Unit would be highly impacted by the preferred alternative through the inclusion of two ATV trails within the Unit. Both of these ATV trails are currently low-standard two-track roads that extend into the Dominguez Wilderness. The preferred alternative would restrict the use of these roads to ATV's and the trails would theoretically dead end at the Wilderness boundary. Even if ATV riders did respect the Wilderness boundary, these motorized trails would degrade the wilderness values of the Dominguez Addition Unit. For this reason we are recommending that these two roads (roads 3162/2089/2166, and 2596/2171/2003) be converted to non-motorized trails to provide big game solitude, backcountry hunting, and quiet recreation use opportunities

• IV. TRANSPORTATION AND TRAVEL MANAGEMENT Mr. Miller's owns various parcels of private property and multiple water diversions in the area in question, and must access these lands via roads and trails which currently cross public land. In addition, Mr. Miller must necessarily access various roads and trails to in the course of managing his livestock operation. The EIS proposes closing various roads and trails to public motorized travel, to minimize resource damage caused by the public on both public and private lands. EIS at 157, 187. Mr. Miller supports the BLM's proposal to restrict public access to protect public and private property, but only so long as he is not restricted from using these roads as may be necessary to access his private lands and manage his livestock operation. Thus, to the extent that the BLM wishes to close roads to motorized public traffic, it should simultaneously grant Mr. Miller legal, administrative access. In addition, Mr. Miller notes that he would be entitled to a formal decision, subject to appeal, prior to the BLM restricting access to his private property and/or otherwise impacting his livestock operation. Mr. Miller notes that the BLM has mis-classified many routes. See EIS Map N -1 e. Specifically, many routes which have historically been used to access private land and water diversions, and/or are necessary to maintain livestock improvements or otherwise manage and operate Mr. Miller's livestock operation, have been incorrectly labeled as closed or otherwise restricted in their use. These routes should be classified as "administrative," to recognize these historic uses and to allow for continued uses consistent therewith. The Routes which have been incorrectly classified and which should be classified as "administrative" are as follows: Routes 460, 1220, 1243, 1245, 2003, 2053, 2073, 2086, 2089, 2121, 2122, 2126, 2156, 2166, 2168, 2171 ~ 2172, 2177, 2180, 2336, 2342, 2354, 2408, 2412, 2445, 2581, 2582, 2583, 2585, 2587, 2588, 2590, 2591, 2593, 2595, 2596, 2598, 2599, 2612, 2613, 2622, 2691, 3011, 3048, 3070, 3131, 3141, and 3158. See EIS Map N-1e. In addition, Route 2072 is not completely depicted on the map, in that it extends down the river, across BLM and private property, an additional 2-3 miles, and likewise Route 3048 extends an additional 0.75 miles and leads to private property. I'd. Fina Uy, Map N-1e incorrectly labels Mr. Miller's privately owned bridge, which crosses the Gunnison River at the Bridgeport area, as "administrative." I'd. Mr. Miller requests that the BLM correct these errors and mis-classifications.

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelson Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

Sowbelle Ridge: This is an area which my family and I have hunted for decades. We are meat hunters, not sport hunters, and depend on the elk, deer and bear meat we get to supplement our food supply through the winter. It has become increasingly difficult to get to where the animals are because of roads which have already been closed. I would ask that roads numbered 2571, 2597, 2598, 2601, 3162, 2089, and 2166 remain open. We need roads to help in game retrieval. This area is usually still "t-shirt" weather in October when we hunt, which means very warm temperatures. If an animal is left for too long in that weather, it will spoil if it isn't skinned, gutted and transported as soon as possible to a meat locker. We typically get the meat out of the back country where it was killed and get it to camp to hang overnight and then immediately take it to GJ to a meat locker. We don't "road hunt"; we take our ATVs to the edge our hunting area and then start walking usually all day and for many miles. Even if we are lucky enough to get our game, none of us, even young, strong guys, can carry more than a quarter of an elk at a time very far, as has been suggested. This would mean 4 trips to carry an animal out and it can't be done before the meat spoils. So which law should we break? The law that says you can't use an ATV on an existing road to retrieve game or the law that says you can't waste meat without facing a stiff fine? These roads are currently open and I ask that they remain open for game retrieval using ATVs: 2168, 2122, 2121, 2169 & 2170, 2596, 2171, 2003, 3145, 2182, 2179, 2178, 3143 and 2181.

Escalante Rd/Dry Mesa Rd, Sawmill Mesa Rd & 25 Mesa Rd areas: Due to hunting access use, and OHV recreation, I would like to see trail #'s 2166, 2168 & 2122, which are currently open to atv use, remain open to access as they currently are today. Other trails I'd like to see remain open as currently are, for same purposes, are #2169, 2596, 2171, 2003, 2122, 3145, 2182, 2179, 2178, 3143, 2181. These roads & trails are important to hunting access. Between Dry Mesa Rd & Sawmill Mesa Rd, I'd like for trails #'s 2243, 2244, 2248, 2249 and 2136 to remain open for atv use, as they currently are. These trails provide alternative route vs. having to travel on the main access roadways (Sawmill Mesa or Dry Mesa) and provide unique OHV recreation value for the activity I love to participate in. Alternative B & E designate these for horse and foot traffic and I'd like to see them remain open to atv activity as they currently are today. Trail # 2006, 2299, 2298, 2297 are slated for closure in Alt's B & E, but perhaps those would make a good horse/foot route vs. closure.

The recently pioneered route, 2618-2090, spurring off County Rd 2091 west of Bennett's Basin should be closed and obliterated. It has no long-established purpose, having been recently created and serves only to scar the landscape. It is needlessly fragmenting what has been heretofore a relatively unfragmented area. Similarly 2168 should be closed as it is unnecessary, duplicative, parallels an existing route, is only recently-created, and serves no purpose.

Comment ID: 000000171-7

IV. TRANSPORTATION AND TRAVEL MANAGEMENT Mr. Miller's owns various parcels of private property and multiple water diversions in the area in question, and must access these lands via roads and trails which currently cross publicland. In addition, Mr. Miller must necessarily access various roads and trails to in the course of managing his livestock operation. The EIS proposes closing various roads and trails to public motorized travel, to minimize resource damage caused by the public on both public and privatelands. EIS at 157, 187. Mr. Miller supports the BLM's proposal to restrict public access to protect public and private property, but only so long as he is not restricted from using these roads as may be necessary to access his private lands and manage his livestock operation. Thus, to the extent that the BLM wishes to close roads to motorized public traffic, it should simultaneously grant Mr. Miller legal, administrative access. In addition, Mr. Miller notes that he would be entitled to a formal decision, subject to appeal, prior to the BLM restricting access to his private property and/or otherwise impacting his livestock operation. Mr. Miller notes that the BLM has mis-classified many routes. See EIS Map N -1 e. Specifically, many routes which have historically been used to access private land and water diversions, and/or are necessary to maintain livestock improvements or otherwise manage and operate Mr. Miller's livestock operation, have been incorrectly labeled as closed or otherwise restricted in their use. These routes should be classified as "administrative," to recognize these historic uses and to allow for continued uses consistent therewith. The Routes which have been incorrectly classified and which should be classified as "administrative" are as follows: Routes 460, 1220, 1243, 1245, 2003, 2053, 2073, 2086, 2089, 2121, 2122, 2126, 2156, 2166, 2168, 2171 ~ 2172, 2177, 2180, 2336, 2342, 2354, 2408, 2412, 2445, 2581, 2582, 2583, 2585, 2587, 2588, 2590, 2591, 2593, 2595, 2596, 2598, 2599, 2612, 2613, 2622, 2691, 3011, 3048, 3070, 3131, 3141, and 3158. See EIS Map N-1e. In addition, Route 2072 is not completely depicted on the map, in that it extends down the river, across BLM and private property, an additional 2-3 miles, and likewise Route 3048 extends an additional 0.75 miles and leads to private property. I'd. Fina Uy, Map N-1e incorrectly labels Mr. Miller's privately owned bridge, which crosses the Gunnison River at the Bridgeport area, as "administrative." I d. Mr. Miller requests that the BLM correct these errors and mis-classifications.

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Public Comments On Route: 2169

Organization, commenter: Karen Green

Comment ID: 00000091-1

• Sowbelly Ridge: This is an area which my family and I have hunted for decades. We are meat hunters, not sport hunters, and depend on the elk, deer and bear meat we get to supplement our food supply through the winter. It has become increasingly difficult to get to where the animals are because of roads which have already been closed. I would ask that roads numbered 2571, 2597, 2598, 2601, 3162, 2089, and 2166 remain open. We need roads to help in game retrieval. This area is usually still "t-shirt" weather in October when we hunt, which means very warm temperatures. If an animal is left for too long in that weather, it will spoil if it isn't skinned, gutted and transported as soon as possible to a meat locker. We typically get the meat out of the back country where it was killed and get it to camp to hang overnight and then immediately take it to GJ to a meat locker. We don't "road hunt"; we take our ATVs to the edge our hunting area and then start walking usually all day and for many miles. Even if we are lucky enough to get our game, none of us, even young, strong guys, can carry more than a quarter of an elk at a time very far, as has been suggested. This would mean 4 trips to carry an animal out and it can't be done before the meat spoils. The law that says you can't use an ATV on an existing road to retrieve game or the law that says you can't waste meat without facing a stiff fine? These roads are currently open and I ask that they remain open for game retrieval using ATVs: 2168, 2122, 2121, 2169 & 2170, 2596, 2171, 2003, 3145, 2182, 2179, 2178, 3143 and 2181.

• Escalante Rd/Dry Mesa Rd, Sawmill Mesa Rd & 25 Mesa Rd areas: Due to hunting access use, and OHV recreation, I would like to see trail #'s 2166, 2168 & 2122, which are currently open to atv use, remain open to access as they currently are today. Other trails I'd like to see remain open as currently are, for same purposes, are #2169, 2596, 2171, 2003, 2122, 3145, 2182, 2179, 2178, 3143, 2181. These roads & trails are important to hunting access. Between Dry Mesa Rd & Sawmill Mesa Rd, I'd like for trails #'s 2243, 2244, 2248, 2249 and 2136 to remain open for atv use, as they currently are. These trails provide alternative route vs. having to travel on the main access roadways (Sawmill Mesa or Dry Mesa) and provide unique OHV recreation value for the activity I love to participate in. Alternative B & E designate these for horse and foot traffic and I'd like to see them remain open to atv activity as they currently are today. Trail # 2006, 2299, 2298, 2297 are slated for closure in Alt's B & E, but perhaps those would make a good horse/foot route vs. closure.

• Route 2169 along Palmer Gulch, west of Camp Ridge, duplicates 2596, 2171, 2003, and 2177 on Camp Ridge and should be closed especially since it is in a canyon drainage with good habitat value

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 00000135-4

we appreciate the route closures in the preferred alternative. However, as you will see in our attached 2011 route-specific comments, we are concerned about the routes left open in the draft TMP that we and others had recommended for closure, in particular: o The two ATV trails (Numbers 3162/2089/2166, and 2596/2171/2003) in the Dominguez Addition Unit that need to be closed a) to protect this unit and b) to prevent the likelihood of incursions into the Dominguez wilderness, due to remote, unmanageable and unenforceable terrain. o Palmer Gulch road #2169/2170, needs to be closed. o Road #2181 needs to be closed to OHVs. o 1778/1727 o 1782/1768/2602 in Sawmill Mesa and Wagon Park zones 1756 should be closed at the junction with 1758, and include closure of roads 1593 and 1585

It has become increasingly difficult to get to where the animals are because of roads which have already been closed. I would ask that roads numbered 2571, 2597, 2598, 2601, 3162, 2089, and 2166 remain open. We need roads to help in game retrieval. This area is usually still "t-shirt" weather in October when we hunt, which means very warm temperatures. If an animal is left for too long in that weather, it will spoil if it isn't skinned, gutted and transported as soon as possible to a meat locker. We typically get the meat out of the back country where it was killed and get it to camp to hang overnight and then immediately take it to GJ to a meat locker. We don't "road hunt"; we take our ATVs to the edge our hunting area and then start walking usually all day and for many miles. Even if we are lucky enough to get our game, none of us, even young, strong guys, can carry more than a quarter of an elk at a time very far, as has been suggested. This would mean 4 trips to carry an animal out and it can't be done before the meat spoils. So which law should we break? The law that says you can't use an ATV on an existing road to retrieve game or the law that says you can't waste meat without facing a stiff fine? These roads are currently open and I ask that they remain open for game retrieval using ATVs: 2168, 2122, 2121, 2169 & 2170, 2596, 2171, 2003, 3145, 2182, 2179, 2178, 3143 and 2181.

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 2171

### Segment: 411

#### Designation

##### Current Designation

Open (All modes of travel)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range

- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I high
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches <60 acres

## Rationale

### Designation Criteria

- **Recreation:** Rec opportunities – general, RMA objectives

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Admin/Permitted Use Only

**Alternative C:** Admin/Permitted Use Only

**Alternative D:** Admin/Permitted Use Only

- Sowbelly Ridge: This is an area which my family and I have hunted for decades. We are meat hunters, not sport hunters, and depend on the elk, deer and bear meat we get to supplement our food supply through the winter. It has become increasingly difficult to get to where the animals are because of roads which have already been closed. I would ask that roads numbered 2571, 2597, 2598, 2601, 3162, 2089, and 2166 remain open. We need roads to help in game retrieval. This area is usually still "t-shirt" weather in October when we hunt, which means very warm temperatures. If an animal is left for too long in that weather, it will spoil if it isn't skinned, gutted and transported as soon as possible to a meat locker. We typically get the meat out of the back country where it was killed and get it to camp to hang overnight and then immediately take it to GJ to a meat locker. We don't "road hunt"; we take our ATVs to the edge our hunting area and then start walking usually all day and for many miles. Even if we are lucky enough to get our game, none of us, even young, strong guys, can carry more than a quarter of an elk at a time very far, as has been suggested. This would mean 4 trips to carry an animal out and it can't be done before the meat spoils. So which law should we break? The law that says you can't use an ATV on an existing road to retrieve game or the law that says you can't waste meat without facing a stiff fine? These roads are currently open and I ask that they remain open for game retrieval using ATVs: 2168, 2122, 2121, 2169 & 2170, 2596, 2171, 2003, 3145, 2182, 2179, 2178, 3143 and 2181.

Comment ID: 00000103-4

- Escalante Rd/Dry Mesa Rd, Sawmill Mesa Rd & 25 Mesa Rd areas: Due to hunting access use, and OHV recreation, I would like to see trail #'s 2166, 2168 & 2122, which are currently open to atv use, remain open to access as they currently are today. Other trails I'd like to see remain open as currently are, for same purposes, are #2169, 2596, 2171, 2003, 2122, 3145, 2182, 2179, 2178, 3143, 2181. These roads & trails are important to hunting access. Between Dry Mesa Rd & Sawmill Mesa Rd, I'd like for trails #'s 2243, 2244, 2248, 2249 and 2136 to remain open for atv use, as they currently are. These trails provide alternative route vs. having to travel on the main access roadways (Sawmill Mesa or Dry Mesa) and provide unique OHV recreation value for the activity I love to participate in. Alternative B & E designate these for horse and foot traffic and I'd like to see them remain open to atv activity as they currently are today. Trail # 2006, 2299, 2298, 2297 are slated for closure in Alt's B & E, but perhaps those would make a good horse/foot route vs. closure.

- Route 2169 along Palmer Gulch, west of Camp Ridge, duplicates 2596, 2171, 2003, and 2177 on Camp Ridge and should be closed especially since it is in a canyon drainage with good habitat value

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 00000135-14

- Camp Ridge Horse pack trail 2596, 2171 and 2177 should be nonmotorized and nonmechanized to avoid downgrading the existing "remote, open space recreation setting" of Camp Ridge, as directed in the Colorado BLM's 2007 Recreation and Visitor Services Guide. This document directs that such remote, primitive settings be retained

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 00000135-5

- Manage Gunnison Slopes Unit and Dominguez Addition Unit as Lands with Wilderness Characteristics ERMA status for Gunnison Slopes is a good start, but it needs the additional protection as a LWC as well. Dominguez Addition also needs to be included as a LWC, and the two ATV routes currently open in the preferred Alternative (roads 3162/2089/2166, and 2596/2171/2003) definitively closed to maintain this area's wild character

Organization, commenter: Backcountry Hunters and Anglers, Craig Grother

Comment ID: 00000156-18

- Comments on Travel Management Plan The following comments are based upon my review of the Map of Route by Route Designations for Alternative E (Map N-1E) in relationship to the resource management goals and objectives of the NCA. As previously stated, we are concerned that wilderness characteristics within the Dominguez Addition Unit would be highly impacted by the preferred alternative through the inclusion of two ATV trails within the Unit. Both of these ATV trails are currently low-standard two-track roads that extend into the Dominguez Wilderness. The preferred alternative would restrict the use of these roads to ATV's and the trails would theoretically dead end at the Wilderness boundary. Even if ATV riders did respect the Wilderness boundary, these motorized trails would degrade the wilderness values of the Dominguez Addition Unit. For this reason we are recommending that these two roads (roads 3162/2089/2166, and 2596/2171/2003) be converted to non-motorized trails to provide big game solitude, backcountry hunting, and quiet recreation use opportunities.

Organization, commenter: Backcountry Hunters and Anglers, Craig Grother

Comment ID: 00000156-4

- Two other units with wilderness characteristics occur within the D-E NCA that are not included within the preferred alternative. Wilderness characteristics within the Gunnison Slopes Unit appear to have been largely protected through management of this area as

an ERMA that would emphasize equestrian and hiking trail activities and dispersed camping. This management strategy seems reasonable to provide camping opportunities along the Gunnison River to accommodate boating use on the river while maintaining an overall primitive setting. However, wilderness characteristics within the Dominguez Addition Unit would be highly impacted by the preferred alternative through the inclusion of two ATV trails within the Unit. Both of these ATV trails are currently low-standard two-track roads that extend into the Dominguez Wilderness. The preferred alternative would restrict the use of these roads to ATV's and the trails would theoretically dead end at the Wilderness boundary. Even if ATV riders did respect the Wilderness boundary, these motorized trails would degrade the wilderness values of the Dominguez Addition Unit. For this reason we are recommending that these two roads (roads 3162/2089/2166, and 2596/2171/2003) be converted to non-motorized trails to provide big game solitude, backcountry hunting, and quiet recreation use opportunities

• IV. TRANSPORTATION AND TRAVEL MANAGEMENT Mr. Miller's owns various parcels of private property and multiple water diversions in the area in question, and must access these lands via roads and trails which currently cross public land. In addition, Mr. Miller must necessarily access various roads and trails to in the course of managing his livestock operation. The EIS proposes closing various roads and trails to public motorized travel, to minimize resource damage caused by the public on both public and private lands. EIS at 157, 187. Mr. Miller supports the BLM's proposal to restrict public access to protect public and private property, but only so long as he is not restricted from using these roads as may be necessary to access his private lands and manage his livestock operation. Thus, to the extent that the BLM wishes to close roads to motorized public traffic, it should simultaneously grant Mr. Miller legal, administrative access. In addition, Mr. Miller notes that he would be entitled to a formal decision, subject to appeal, prior to the BLM restricting access to his private property and/or otherwise impacting his livestock operation. Mr. Miller notes that the BLM has mis-classified many routes. See EIS Map N - 1. Specifically, many routes which have historically been used to access private land and water diversions, and/or are necessary to maintain livestock improvements or otherwise manage and operate Mr. Miller's livestock operation, have been incorrectly labeled as closed or otherwise restricted in their use. These routes should be classified as "administrative," to recognize these historic uses and to allow for continued uses consistent therewith. The Routes which have been incorrectly classified and which should be classified as "administrative" are as follows: Routes 460, 1220, 1243, 1245, 2003, 2053, 2073, 2086, 2089, 2121, 2122, 2126, 2156, 2166, 2168, 2171 ~ 2172, 2177, 2180, 2336, 2342, 2354, 2408, 2412, 2445, 2581, 2582, 2583, 2585, 2587, 2588, 2590, 2591, 2593, 2595, 2596, 2598, 2599, 2612, 2613, 2622, 2691, 3011, 3048, 3070, 3131, 3141, and 3158. See EIS Map N-1e. In addition, Route 2072 is not completely depicted on the map, in that it extends down the river, across BLM and private property, an additional 2-3 miles, and likewise Route 3048 extends an additional 0.75 miles and leads to private property. Id. Fina Uy, Map N-1e incorrectly labels Mr. Miller's privately owned bridge, which crosses the Gunnison River at the Bridgeport area, as "administrative." I d. Mr. Miller requests that the BLM correct these errors and mis-classifications.

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 2172

### Segment: 318

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- SOIL Soils 25% to 40% Slopes
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I high
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Minimize Damage:** Fragile soils SSR, Soils - SSR slopes 25-40%
- **Minimize Harassment:** Raptor Potential Habitat
- **Recreation:** RMA objectives

##### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to protect potential raptor habitat

#### Previous Alternatives Analyzed

**Alternative A:** Foot/Horse/Mechanized/Motorcycle

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed, seek re-route or mitigation

## Public Comments On Route: 2172

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 000000135-18

• Camp RidgeSouth of the Sowbelly and Camp Ridge all the recently pioneered routes, 2122, 2172, 2126, 2180 and 2127, should be permanently closed and obliterated to reduce habitat fragmentation, improve wildlife security and return this area to its previous more primitive and solitary condition. These routes are unnecessary, go nowhere and serve no purpose

Organization, commenter: Escalante Ranch, Richard Miller

Comment ID: 000000171-7

• IV. TRANSPORTATION AND TRAVEL MANAGEMENTMr. Miller's owns various parcels of private property and multiple water diversions in the area in question, and must access these lands via roads and trails which currently cross publicland. In addition, Mr. Miller must necessarily access various roads and trails to in the course of managing his livestock operation. The EIS proposes closing various roads and trails to public motorized travel, to minimize resource damage caused by the public on both public and private lands. EIS at 157, 187. Mr. Miller supports the BLM's proposal to restrict public access to protect public and private property, but only so long as he is not restricted from using these roads as may be necessary to access his private lands and manage his livestock operation. Thus, to the extent that the BLM wishes to close roads to motorized public traffic, it should simultaneously grant Mr. Miller legal, administrative access. In addition, Mr. Miller notes that he would be entitled to a formal decision, subject to appeal, prior to the BLM restricting access to his private property and/or otherwise impacting his livestock operation. Mr. Miller notes that the BLM has mis-classified many routes. See EIS Map N - 1 e. Specifically, many routes which have historically been used to access private land and water diversions, and/or are necessary to maintain livestock improvements or otherwise manage and operate Mr. Miller's livestock operation, have been incorrectly labeled as closed or otherwise restricted in their use. These routes should be classified as "administrative," to recognize these historic uses and to allow for continued uses consistent therewith. The Routes which have been incorrectly classified and which should be classified as "administrative" are as follows: Routes 460, 1220, 1243, 1245, 2003, 2053, 2073, 2086, 2089, 2121, 2122, 2126, 2156, 2166, 2168, 2171, 2172, 2177, 2180, 2336, 2342, 2354, 2408, 2412, 2445, 2581, 2582, 2583, 2585, 2587, 2588, 2590, 2591, 2593, 2595, 2596, 2598, 2599, 2612, 2613, 2622, 2691, 3011, 3048, 3070, 3131, 3141, and 3158. See EIS Map N-1e. In addition, Route 2072 is not completely depicted on the map, in that it extends down the river, across BLM and private property, an additional 2-3 miles, and likewise Route 3048 extends an additional 0.75 miles and leads to private property. Id. Fina Uy, Map N-1e incorrectly labels Mr. Miller's privately owned bridge, which crosses the Gunnison River at the Bridgeport area, as "administrative." I d. Mr. Miller requests that the BLM correct these errors and mis-classifications.

- I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 2174

### Segment: 249

#### Designation ?

##### Current Designation

Admin/Permitted Use Only

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk severe winter range
- RIPARIAN Riparian 1 stream crossing
- RIPARIAN Riparian crossing perennal stream
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I high
- DENSITY Route density low in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- No designation criteria for this route segment.

##### Rationale for Decision

- Route was designated to ensure access to rights-of-way, private property, and livestock grazing facilities.

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 2175

### Segment: 585

#### Designation ?

##### Current Designation

Admin/Permitted Use Only

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk severe winter range
- RIPARIAN Riparian 1 stream crossing
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I moderate
- DENSITY Route density medium in Alt A
- DENSITY Route density medium in Alt E
- VEGETATION Sagebrush patches <60 acres

#### Rationale

##### Designation Criteria

- **Minimize Harassment:** PPSV- Minimize fragmentation

##### Rationale for Decision

- Route was designated to ensure access to rights-of-way, private property, and livestock grazing facilities.

## Public Comments On Route: 2177

Organization, commenter: Janice Shepherd

Comment ID: 00000106-62

• I believe the high concentration of cultural resources in the Dominguez Addition area (page 257) and the current low usage by motorized means there is an opportunity to protect these resources from damage like we've unfortunately seen at other sites when there is easy public access (think Rough Canyon or the "I LOVE" site on Hwy 141 south of Cactus Park entrance. I, therefore, support the designation of the Dominguez Addition as an ACEC with principles such as no surface disturbance except for construction of any needed water developments that might be needed for the Dominguez Allotment as long as those developments are kept well away from the cultural resource sites. Routes 2166 and 2177 should be either closed or gated and converted to Admin Use

Organization, commenter: Quiet Trails Group, Sherry Schenk

Comment ID: 000000115-49

• [Dominguez Canyon Wilderness RMP-Level Comments] Zone 3 currently has two long distance trails, the McCarty Trail (2177) and the Gunnison Trail (2445). The QTG supports the addition of some shorter loop hikes within this zone. As we've mentioned earlier we know many quiet trail users prefer to stay on trails rather than travel cross-country. Adding some loops within this zone will help quiet trail users enjoy more areas of this wilderness zone

Organization, commenter: Quiet Trails Group, Sherry Schenk

Comment ID: 000000115-69

• [Wagon Park/Sawmill Mesa (South) TMP-Level Comments:Quiet Trails Group supports the management decisions shown in Alternative E for the southern Sawmill Mesa area with the following specific suggestions:]Route 2177: Quiet Users would encourage the BLM to take some type of action to gain/confirm citizen access to the McCarty Trail. At the moment, the entrance of McCarty Trail off Escalante Canyon Rd is on private land and it is unclear if folks are trespassing to get to the McCarty trailhead. Improving trailer parking would also be beneficial to horseback riders coming to the area.

• Route 2169 along Palmer Gulch, west of Camp Ridge, duplicates 2596, 2171, 2003, and 2177 on Camp Ridge and should be closed especially since it is in a canyon drainage with good habitat value

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 00000135-14

• Camp RidgeHorse pack trail 2596, 2171 and 2177 should be nonmotorized and nonmechanized to avoid downgrading the existing "remote, open space recreation setting" of Camp Ridge, as directed in the Colorado BLM's 2007 Recreation and Visitor Services Guide. This document directs that such remote, primitive settings be retained

Comment ID: 00000157-13

• Why is the Mc Carty trail not closed for mitigation of the parking area in the same manner that motorized trails are temporarily closed for mitigation? Seems to be same situation

Organization, commenter: Escalante Ranch, Richard Miller

Comment ID: 00000171-7

• IV. TRANSPORTATION AND TRAVEL MANAGEMENTMr. Miller's owns various parcels of private property and multiple water diversions in the area in question, and must access these lands via roads and trails which currently cross publicland. In addition, Mr. Miller must necessarily access various roads and trails to in the course of managing his livestock operation. The EIS proposes closing various roads and trails to publicmotorized travel, to minimize resource damage caused by the public on both public and privatelands. EIS at 157, 187. Mr. Miller supports the BLM's proposal to restrict public access to protect public and private property, but only so long as he is not restricted from using these roads as may be necessary to access his private lands and manage his livestock operation. Thus, to the extent that the BLM wishes to close roads to motorized public traffic, it should simultaneously grant Mr. Miller legal, administrative access. In addition, Mr. Miller notes that he would be entitled to a formal decision, subject to appeal, prior to the BLM restricting access to his private property and/or otherwise impacting his livestock operation.Mr. Miller notes that the BLM has mis-classified many routes. See EIS Map N -1 e. Specifically, many routes which have historically been used to access private land and waterdiversions, and/or are necessary to maintain livestock improvements or otherwise manage and operate Mr. Miller's livestock operation, have been incorrectly labeled as closed or otherwise restricted in their use. These routes should be classified as "administrative," to recognize these historic uses and to allow for continued uses consistent therewith. The Routes which have been incorrectly classified and which should be classified as "administrative" are as follows: Routes 460, 1220, 1243, 1245, 2003, 2053, 2073, 2086, 2089, 2121, 2122, 2126, 2156, 2166, 2168, 2171~2172, 2177, 2180, 2336, 2342, 2354, 2408, 2412, 2445, 2581, 2582, 2583, 2585, 2587, 2588, 2590, 2591, 2593, 2595, 2596, 2598, 2599, 2612, 2613, 2622, 2691, 3011, 3048, 3070, 3131, 3141, and 3158. See EIS Map N-1e. In addition, Route 2072 is not completely depicted on the map, in that it extends down the river, across BLM and private property, an additional 2-3 miles, and likewise Route 3048 extends an additional 0.75 miles and leads to private property. Id. Fina Uy, Map N-1e incorrectly labels Mr. Miller's privately owned bridge, which crosses the Gunnison River at the Bridgeport area, as "administrative." I d. Mr. Miller requests that the BLM correct these errors and mis-classifications.

Comment ID: 00000135-28

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

Organization, commenter: Karen Green

Comment ID: 000000091-1

• Sowbelly Ridge: This is an area which my family and I have hunted for decades. We are meat hunters, not sport hunters, and depend on the elk, deer and bear meat we get to supplement our food supply through the winter. It has become increasingly difficult to get to where the animals are because of roads which have already been closed. I would ask that roads numbered 2571, 2597, 2598, 2601, 3162, 2089, and 2166 remain open. We need roads to help in game retrieval. This area is usually still "t-shirt" weather in October when we hunt, which means very warm temperatures. If an animal is left for too long in that weather, it will spoil if it isn't skinned, gutted and transported as soon as possible to a meat locker. We typically get the meat out of the back country where it was killed and get it to camp to hang overnight and then immediately take it to GJ to a meat locker. We don't "road hunt"; we take our ATVs to the edge our hunting area and then start walking usually all day and for many miles. Even if we are lucky enough to get our game, none of us, even young, strong guys, can carry more than a quarter of an elk at a time very far, as has been suggested. This would mean 4 trips to carry an animal out and it can't be done before the meat spoils. So which law should we break? The law that says you can't use an ATV on an existing road to retrieve game or the law that says you can't waste meat without facing a stiff fine? These roads are currently open and I ask that they remain open for game retrieval using ATVs: 2168, 2122, 2121, 2169 & 2170, 2596, 2171, 2003, 3145, 2182, 2179, 2178, 3143 and 2181.

Comment ID: 000000103-4

• Escalante Rd/Dry Mesa Rd, Sawmill Mesa Rd & 25 Mesa Rd areas: Due to hunting access use, and OHV recreation, I would like to see trail #'s 2166, 2168 & 2122, which are currently open to atv use, remain open to access as they currently are today. Other trails I'd like to see remain open as currently are, for same purposes, are #2169, 2596, 2171, 2003, 2122, 3145, 2182, 2179, 2178, 3143, 2181. These roads & trails are important to hunting access. Between Dry Mesa Rd & Sawmill Mesa Rd, I'd like for trails #'s 2243, 2244, 2248, 2249 and 2136 to remain open for atv use, as they currently are. These trails provide alternative route vs. having to travel on the main access roadways (Sawmill Mesa or Dry Mesa) and provide unique OHV recreation value for the activity I love to participate in. Alternative B & E designate these for horse and foot traffic and I'd like to see them remain open to atv activity as they currently are today. Trail # 2006, 2299, 2298, 2297 are slated for closure in Alt's B & E, but perhaps those would make a good horse/foot route vs. closure.

Comment ID: 000000135-16

• Loop 2178 and spur 3145 need to be closed and obliterated as duplicative, user-created and serving no purpose. Dense networks of ATV trails have already been designated in portions of the GJFO such as North Desert and Bangs Canyon where they are much better located near urban centers. Permanently designating ATVs routes in these remote areas will downgrade the quiet and solitude needed by wildlife and by quiet users fleeing an increasingly noisy and urbanized society

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 2179

## Segment: 478

### Designation

#### Current Designation

Open, seek re-route or mitigation

#### Mitigation Criteria

- Riparian

#### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- SOIL Soils Fragile
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk severe winter range
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Indirect impact
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches >60 acres

### Rationale

#### Designation Criteria

- No designation criteria for this route segment.

#### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open (All modes of travel)

**Alternative C:** Open, seek re-route or mitigation

• Sowlbelly Ridge: This is an area which my family and I have hunted for decades. We are meat hunters, not sport hunters, and depend on the elk, deer and bear meat we get to supplement our food supply through the winter. It has become increasingly difficult to get to where the animals are because of roads which have already been closed. I would ask that roads numbered 2571, 2597, 2598, 2601, 3162, 2089, and 2166 remain open. We need roads to help in game retrieval. This area is usually still "t-shirt" weather in October when we hunt, which means very warm temperatures. If an animal is left for too long in that weather, it will spoil if it isn't skinned, gutted and transported as soon as possible to a meat locker. We typically get the meat out of the back country where it was killed and get it to camp to hang overnight and then immediately take it to GJ to a meat locker. We don't "road hunt"; we take our ATVs to the edge our hunting area and then start walking usually all day and for many miles. Even if we are lucky enough to get our game, none of us, even young, strong guys, can carry more than a quarter of an elk at a time very far, as has been suggested. This would mean 4 trips to carry an animal out and it can't be done before the meat spoils. So which law should we break? The law that says you can't use an ATV on an existing road to retrieve game or the law that says you can't waste meat without facing a stiff fine? These roads are currently open and I ask that they remain open for game retrieval using ATVs: 2168, 2122, 2121, 2169 & 2170, 2596, 2171, 2003, 3145, 2182, 2179, 2178, 3143 and 2181.

• Escalante Rd/Dry Mesa Rd, Sawmill Mesa Rd & 25 Mesa Rd areas: Due to hunting access use, and OHV recreation, I would like to see trail #'s 2166, 2168 & 2122, which are currently open to atv use, remain open to access as they currently are today. Other trails I'd like to see remain open as currently are, for same purposes, are #2169, 2596, 2171, 2003, 2122, 3145, 2182, 2179, 2178, 3143, 2181. These roads & trails are important to hunting access. Between Dry Mesa Rd & Sawmill Mesa Rd, I'd like for trails #'s 2243, 2244, 2248, 2249 and 2136 to remain open for atv use, as they currently are. These trails provide alternative route vs. having to travel on the main access roadways (Sawmill Mesa or Dry Mesa) and provide unique OHV recreation value for the activity I love to participate in. Alternative B & E designate these for horse and foot traffic and I'd like to see them remain open to atv activity as they currently are today. Trail # 2006, 2299, 2298, 2297 are slated for closure in Alt's B & E, but perhaps those would make a good horse/foot route vs. closure.

• Sowlbelly Ridge Route 2537, 3096, 2182 2179, 3143 along Sowlbelly Ridge dead ends at the wilderness and should be closed to ATVs, but possibly kept open for 4WD hunting access and horse back use, to preserve nonmotorized hunting opportunities and its remote setting, in accordance with the guidance above

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 218

### Segment: 2564

#### Designation

##### Current Designation

Admin/Permitted Use Only

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

#### Rationale

##### Designation Criteria

- No designation criteria for this route segment.

##### Rationale for Decision

- Route was designated to ensure access to rights-of-way, private property, and livestock grazing facilities.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Admin/Permitted Use Only

**Alternative C:** Admin/Permitted Use Only

**Alternative D:** Admin/Permitted Use Only

## Public Comments On Route: 218

- No public comments for this Route

## Route: 2180

### Segment: 310

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- SOIL Soils 25% to 40% Slopes
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I high
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Minimize Damage:** Fragile soils SSR, Soils - SSR slopes 25-40%
- **Minimize Harassment:** Raptor Potential Habitat
- **Recreation:** RMA objectives

##### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.

- Route was designated to protect potential raptor habitat

## Previous Alternatives Analyzed

**Alternative A:** Foot/Horse/Mechanized/Motorcycle

**Alternative B:** Closed (Not Rehabbed)

• Camp Ridge South of the Sowlbelly and Camp Ridge all the recently pioneered routes, 2122, 2172, 2126, 2180 and 2127, should be permanently closed and obliterated to reduce habitat fragmentation, improve wildlife security and return this area to its previous more primitive and solitary condition. These routes are unnecessary, go nowhere and serve no purpose

Organization, commenter: Escalante Ranch, Richard Miller

Comment ID: 000000171-7

• IV. TRANSPORTATION AND TRAVEL MANAGEMENT Mr. Miller's owns various parcels of private property and multiple water diversions in the area in question, and must access these lands via roads and trails which currently cross public land. In addition, Mr. Miller must necessarily access various roads and trails in the course of managing his livestock operation. The EIS proposes closing various roads and trails to public motorized travel, to minimize resource damage caused by the public on both public and private lands. EIS at 157, 187. Mr. Miller supports the BLM's proposal to restrict public access to protect public and private property, but only so long as he is not restricted from using these roads as may be necessary to access his private lands and manage his livestock operation. Thus, to the extent that the BLM wishes to close roads to motorized public traffic, it should simultaneously grant Mr. Miller legal, administrative access. In addition, Mr. Miller notes that he would be entitled to a formal decision, subject to appeal, prior to the BLM restricting access to his private property and/or otherwise impacting his livestock operation. Mr. Miller notes that the BLM has misclassified many routes. See EIS Map N-1 e. Specifically, many routes which have historically been used to access private land and water diversions, and/or are necessary to maintain livestock improvements or otherwise manage and operate Mr. Miller's livestock operation, have been incorrectly labeled as closed or otherwise restricted in their use. These routes should be classified as "administrative," to recognize these historic uses and to allow for continued uses consistent therewith. The Routes which have been incorrectly classified and which should be classified as "administrative" are as follows: Routes 460, 1220, 1243, 1245, 2003, 2053, 2073, 2086, 2089, 2121, 2122, 2126, 2156, 2166, 2168, 2171-2172, 2177, 2180, 2336, 2342, 2354, 2408, 2412, 2445, 2581, 2582, 2583, 2585, 2587, 2588, 2590, 2591, 2593, 2595, 2596, 2598, 2599, 2612, 2613, 2622, 2691, 3011, 3048, 3070, 3131, 3141, and 3158. See EIS Map N-1 e. In addition, Route 2072 is not completely depicted on the map, in that it extends down the river, across BLM and private property, an additional 2-3 miles, and likewise Route 3048 extends an additional 0.75 miles and leads to private property. Id. Fina Uy, Map N-1 e incorrectly labels Mr. Miller's privately owned bridge, which crosses the Gunnison River at the Bridgeport area, as "administrative." I d. Mr. Miller requests that the BLM correct these errors and mis-classifications.

Comment ID: 00000135-28

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowlbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 2181

### Segment: 496

#### Designation

##### Current Designation

Open, seek re-route or mitigation

##### Mitigation Criteria

- Riparian

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk severe winter range

- CULTURAL Cultural Class I low
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches <60 acres

## Rationale

### Designation Criteria

- No designation criteria for this route segment.

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Admin/Permitted Use Only

**Alternative C:** Open, seek re-route or mitigation

**Alternative D:** Open, seek re-route or mitigation

• Sowbelly Ridge: This is an area which my family and I have hunted for decades. We are meat hunters, not sport hunters, and depend on the elk, deer and bear meat we get to supplement our food supply through the winter. It has become increasingly difficult to get to where the animals are because of roads which have already been closed. I would ask that roads numbered 2571, 2597, 2598, 2601, 3162, 2089, and 2166 remain open. We need roads to help in game retrieval. This area is usually still "t-shirt" weather in October when we hunt, which means very warm temperatures. If an animal is left for too long in that weather, it will spoil if it isn't skinned, gutted and transported as soon as possible to a meat locker. We typically get the meat out of the back country where it was killed and get it to camp to hang overnight and then immediately take it to GJ to a meat locker. We don't "road hunt"; we take our ATVs to the edge our hunting area and then start walking usually all day and for many miles. Even if we are lucky enough to get our game, none of us, even young, strong guys, can carry more than a quarter of an elk at a time very far, as has been suggested. This would mean 4 trips to carry an animal out and it can't be done before the meat spoils. So which law should we break? The law that says you can't use an ATV on an existing road to retrieve game or the law that says you can't waste meat without facing a stiff fine? These roads are currently open and I ask that they remain open for game retrieval using ATVs: 2168, 2122, 2121, 2169 & 2170, 2596, 2171, 2003, 3145, 2182, 2179, 2178, 3143 and 2181.

• Escalante Rd/Dry Mesa Rd, Sawmill Mesa Rd & 25 Mesa Rd areas: Due to hunting access use, and OHV recreation, I would like to see trail #'s 2166, 2168 & 2122, which are currently open to atv use, remain open to access as they currently are today. Other trails I'd like to see remain open as currently are, for same purposes, are #2169, 2596, 2171, 2003, 2122, 3145, 2182, 2179, 2178, 3143, 2181. These roads & trails are important to hunting access. Between Dry Mesa Rd & Sawmill Mesa Rd, I'd like for trails #'s 2243, 2244, 2248, 2249 and 2136 to remain open for atv use, as they currently are. These trails provide alternative route vs. having to travel on the main access roadways (Sawmill Mesa or Dry Mesa) and provide unique OHV recreation value for the activity I love to participate in. Alternative B & E designate these for horse and foot traffic and I'd like to see them remain open to atv activity as they currently are today. Trail # 2006, 2299, 2298, 2297 are slated for closure in Alt's B & E, but perhaps those would make a good horse/foot route vs. closure.

• Tatum GulchRoute 2181 along Tatum Gulch and moving into Tatum Ridge and Tatum Park parallels and duplicates the Sowbelly Ridge routes listed above and should be closed an obliterated to create a logical southern expansion of the wilderness all the way to the Escalante Creek Road

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 00000135-4

• We appreciate the route closures in the preferred alternative. However, as you will see in our attached 2011 route-specific comments, we are concerned about the routes left open in the draft TMP that we and others had recommended for closure, in particular: o The two ATV trails (Numbers 3162/2089/2166, and 2596/2171/2003) in the Dominguez Addition Unit that need to be closed a) to protect this unit and b) to prevent the likelihood of incursions into the Dominguez wilderness, due to remote, unmanageable and unenforceable terrain. o Palmer Gulch road #2169/2170, needs to be closed. o Road #2181 needs to be closed to OHVs. o 1778/1727 o 1782/1768/2602 in Sawmill Mesa and Wagon Park zoneso 1756 should be closed at the junction with 1758, and include closure of roads 1593 and 1585

Comment ID: 00000156-20

• We also request that the BLM reconsider leaving road 2181 open to motorized vehicles. We feel that this road in Tatum Ridge should be converted to a non-motorized trail at the junction with road 3096 to provide additional opportunities for backcountry hunting. A trailhead could be designated here at the head of Ridge to accommodate a few vehicles.

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the

kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 2182

### Segment: 445

#### Designation

##### Current Designation

Open (All modes of travel)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Indirect impact
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches >60 acres

#### Rationale

##### Designation Criteria

- No designation criteria for this route segment.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open (All modes of travel)

**Alternative C:** Open, seek re-route or mitigation

**Alternative D:** Open, seek re-route or mitigation

Comment ID: 000000135-28

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 2183

### Segment: 323

#### Designation [?](#)

**Current Designation**  
Open (All modes of travel)

#### Mitigation Criteria

- Needs Data - Cultural

#### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- SOIL Soils Fragile
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I high
- SMA Wild and Scenic River area
- DENSITY Route density low in Alt A
- DENSITY Route density low in Alt E
- SSPLANT Special Status Species Colorado hookless cactus

#### Rationale

##### Designation Criteria

- Recreation:** RMA objectives, Rec opportunities - specific

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Closed (Not Rehabbed)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 2185

### Segment: 3051

#### Designation ?

##### Current Designation

Open, seek re-route or mitigation

##### Mitigation Criteria

- Riparian

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- SOIL Soils Fragile
- WILDLIFE Mule deer severe winter range
- RIPARIAN Riparian crossing perennial stream
- CULTURAL Cultural Class I moderate
- SMAs Wild and Scenic River area
- DENSITY Route density low in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- No designation criteria for this route segment.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 000000135-28

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 2186

### Segment: 123

#### Designation ?

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- SOIL Soils Fragile
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk winter concentration areas
- WILDLIFE Elk severe winter range
- RIPARIAN Riparian crossing ephemeral stream

- CULTURAL Cultural Class I high
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- **Minimize Damage:** Fragile soils SSR
- **Minimize Harassment:** Sage-Minimize fragmentation

### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to reduce fragmentation of sagebrush patches

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

### Segment: 3035

## Designation ?

### Current Designation

Closed (Rehab)

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- SOIL Soils Steep Slopes 40%
- SOIL Soils Fragile
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk winter concentration areas
- WILDLIFE Elk severe winter range
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I moderate
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches <60 acres

## Rationale

### Designation Criteria

- **Minimize Damage:** Soils -PSD slopes >40%
- **Minimize Harassment:** Sage-Minimize fragmentation

### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to reduce fragmentation of sagebrush patches

• The following high value recreational routes/roads are legal ROW's in the State of Colorado, Mesa County and the BLM does not have the jurisdiction to close them: 500, 472, 518, 521, 530, 39, 127, 572, 566, 66, 65, 148, 71, 74, 587, 595, 608, 622, 628, 635, 624, 609, 611, 706, 678, 700, 719, 726, 696, 26, 936, 847, 849, 919, 767, 824, 96, 822, 817, 950, 1021, 900, 2682, 1020, 1003, 1084, 1142, 1184, 1156, 1198, 1349, 1308, 1310, 1238, 1263, 1122, 1170, 1192, 974, 941, 1076, 1039, 1018, 1759, 1764, 1758, 1174, 1788, 1798, 1669, 1699, 1773, 1755, 1779, 1750, 1751, 1792, 1720, 1726, 1727, 1720, 1722, 1803, 1805, 1809, 1614, 1609, 1605, 1608, 1571, 1526, 1516, 1448, 755, 807, 900, 10, 48, 924, 950, 1005, 965, 8, 1115, 981, 984, 1135, 2678, 1249, 1171, 1150, 1249, 1320, 1235, 1236, 1228, 1227, 1409, 1456, 1349, 1308, 1513, 1221, 1550, 1567, 1641, 1612, 1740, 1688, 2597, 2598, 2601, 2440, 3160, 3162, 2089, 2166, 2170, 2596, 2171, 2003, 2122, 2126, 2189, 3145, 2182, 2179, 2178, 3143, 2181, 2121, 2122, 2168, 2126, 2180, 2095, 2173, 2174, 2620, 2129, 1686, 1692, 1667, 1647, 1631, 1613, 1596, 1549, 1541, 2647, 1633, 1605, 1608, 1571, 2645, 1507, 1448, 1496, 1516, 1504, 1510, 1508, 1509, 439, 431, 456, 461, 460, 391, 423, 415, 419, 407, 402, 367, 372, 339, 298, 338, 105, 368, 374, 393, 389, 390, 376, 377, 351, 350, 121, 345, 320, 301, 251, 234, 232, 205, 344, 107, 103, 152, 153, 161, 168, 3199, 188, 196, 255, 254, 236, 294, 242, 219, 201, 169, 162, 158, 160, 173. The following high value recreational routes/roads are legal ROW's in the State of Colorado, Delta County, and the BLM does not have the jurisdiction to close them: 3011, 2184, 2191, 3100, 2187, 2026, 2059, 2188, 2192, 3104, 2130, 3009, 2199, 2200, 2111, 2223, 2024, 3006, 2231, 3094, 2579, 2210, 2344, 2243, 2249, 2248, 3074, 2354, 2384, 2296, 2295, 2287, 2304, 2062, 2163, 3163, 2164, 2430, 4006, 3016, 2351, 3140, 2410, 4008, 2324, 2073, 2306, 2459, 3192, 3193, 2350, 2443, 2035, 2336, 2495, 2491, 2159, 3058, 2277, 2465, 2467, 3189, 2472, 2297, 2006, 2265, 2271, 2276, 2135, 2139, 3053, 2489, 3033, 3057, 2031, 2276, 2210, 2579, 2136, 2344, 3164, 2400, 2379, 3014, 2365, 3116, 2251, 2259, 2149, 2153, 2146, 2144, 2145, 2356, 2257, 2048, 2358, 3165, and 3166.

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 000000135-21

• Little Mesa Moving SE, Route 2187 along Little Mesa should be closed to motor vehicles and mountain bikes, as it parallel's Dry Mesa Road and has similar views. It should be open as a pack trail. If there is an important reason to keep it open to motors it should stay unmaintained as a high-clear, rough 4WD road, open to full size vehicles, but not designated an ATV route, nor put on ATV maps as described above. The historic remote and rugged settings, wide open spaces, solitude of this mesa, and freedom from the noise of off-road vehicles traffic, should be retained and preserved. Designated ATV trails on Little Mesa would be an incompatible use

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 000000135-22

• Little Mesa spurs Numerous damaging and randomly created spurs and loops branch off from Little Mesa Road, 2026-2025-2187 and should be closed. These include 2059, 2188, 2190, 3100, 2191, 2192, 2197, 2198, 3104, 3099, 3104. If some of these would make a link between Little Mesa and Dry Mesa, there should be one route only and it should be a full size vehicle 4WD route rather than an ATV route. Full-size vehicles are the traditional use of this county, whereas ATVs introduce a new, noisy, "go-anywhere," unenforceable use that is incompatible with the traditional rugged, remote and solitary setting of this area

Organization, commenter: CMDA, Brandon Siegfried

Comment ID: DENCA-1-22470-4

• The following high value recreational routes/roads are legal RS 2477 ROW's in the State of Colorado, Mesa County and the BLM does not have the jurisdiction to close them: 500, 472, 518, 521, 530, 39, 127, 572, 566, 66, 65, 148, 71, 74, 587, 595, 608, 622, 628, 635, 624, 609, 611, 706, 678, 700, 719, 726, 696, 26, 936, 847, 849, 919, 767, 824, 96, 822, 817, 950, 1021, 900, 2682, 1020, 1003, 1084, 1142, 1184, 1156, 1198, 1349, 1308, 1310, 1238, 1263, 1122, 1170, 1192, 974, 941, 1076, 1039, 1018, 1759, 1764, 1758, 1174, 1788, 1798, 1669, 1699, 1773, 1755, 1779, 1750, 1751, 1792, 1720, 1726, 1727, 1720, 1722, 1803, 1805, 1809, 1614, 1609, 1605, 1608, 1571, 1526, 1516, 1448, 755, 807, 900, 10, 48, 924, 950, 1005, 965, 8, 1115, 981, 984, 1135, 2678, 1249, 1171, 1150, 1249, 1320, 1235, 1236, 1228, 1227, 1409, 1456, 1349, 1308, 1513, 1221, 1550, 1567, 1641, 1612, 1740, 1688, 2597, 2598, 2601, 2440, 3160, 3162, 2089, 2166, 2170, 2596, 2171, 2003, 2122, 2126, 2189, 3145, 2182, 2179, 2178, 3143, 2181, 2121, 2122, 2168, 2126, 2180, 2095, 2173, 2174, 2620, 2129, 1686, 1692, 1667, 1647, 1631, 1613, 1596, 1549, 1541, 2647, 1633, 1605, 1608, 1571, 2645, 1507, 1448, 1496, 1516, 1504, 1510, 1508, 1509, 439, 431, 456, 461, 460, 391, 423, 415, 419, 407, 402, 367, 372, 339, 298, 338, 105, 368, 374, 393, 389, 390, 376, 377, 351, 350, 121, 345, 320, 301, 251, 234, 232, 205, 344, 107, 103, 152, 153, 161, 168, 3199, 188, 196, 255, 254, 236, 294, 242, 219, 201, 169, 162, 158, 160, 173. • I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 2188

### Segment: 153

#### Designation

##### Current Designation

Vehicles under 50" wide

##### Mitigation Criteria

- Reroute
- Verify if reroute is needed or a connection

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- SOIL Soils Fragile
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk winter concentration areas
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I high
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches <60 acres

#### Rationale

##### Designation Criteria

- **Recreation:** Rec opportunities – general, RMA objectives
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Vehicles under 50" wide

• Little Mesa spurs Numerous damaging and randomly created spurs and loops branch off from Little Mesa Road, 2026-2025-2187 and should be closed. These include 2059, 2188, 2190, 3100, 2191, 2192, 2197, 2198, 3104, 3099, 3104. If some of these would make a link between Little Mesa and Dry Mesa, there should be one route only and it should be a full size vehicle 4WD route rather than an ATV route. Full-size vehicles are the traditional use of this county, whereas ATVs introduce a new, noisy, "go-anywhere," unenforceable use that is incompatible with the traditional rugged, remote and solitary setting of this area

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is an other National Conservation Area, not Recreation Area

## Route: 2188

### Segment: 155

#### Designation

##### Current Designation

Open (All modes of travel)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- SOIL Soils Fragile
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk winter concentration areas
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I high
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches <60 acres

#### Rationale

##### Designation Criteria

- No designation criteria for this route segment.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Vehicles under 50" wide

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 219

### Segment: 2561

#### Designation

##### Current Designation

Open (All modes of travel)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Public Comments On Route: 2190

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 00000135-22

• Little Mesa spursNumerous damaging and randomly created spurs and loops branch off from Little Mesa Road, 2026-2025-2187 and should be closed. These include 2059, 2188, 2190, 3100, 2191, 2192, 2197, 2198, 3104, 3099, 3104.If some of these would make a link between Little Mesa and Dry Mesa, there should be one route only and it should be a full size vehicle 4WD route rather than an ATV route. Full-size vehicles are the traditional use of this county, whereas ATVs introduce a new, noisy, "go-anywhere," unenforceable use that is incompatible with the traditional rugged, remote and solitary setting of this area

Little Mesa spurs Numerous damaging and randomly created spurs and loops branch off from Little Mesa Road, 2026-2025-2187 and should be closed. These include 2059, 2188, 2190, 3100, 2191, 2192, 2197, 2198, 3104, 3099, 3104. If some of these would make a link between Little Mesa and Dry Mesa, there should be one route only and it should be a full size vehicle 4WD route rather than an ATV route. Full-size vehicles are the traditional use of this county, whereas ATVs introduce a new, noisy, "go-anywhere," unenforceable use that is incompatible with the traditional rugged, remote and solitary setting of this area

I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 2192

## Segment: 141

### Designation

#### Current Designation

Open (All modes of travel)

#### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

#### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- SOIL Soils Fragile
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk winter concentration areas
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I high
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

### Rationale

#### Designation Criteria

- No designation criteria for this route segment.

#### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open (All modes of travel)

**Alternative C:** Open, seek re-route or mitigation

**Alternative D:** Open, seek re-route or mitigation

Comment ID: 000000135-22

Little Mesa spurs Numerous damaging and randomly created spurs and loops branch off from Little Mesa Road, 2026-2025-2187 and should be closed. These include 2059, 2188, 2190, 3100, 2191, 2192, 2197, 2198, 3104, 3099, 3104. If some of these would make a link between Little Mesa and Dry Mesa, there should be one route only and it should be a full size vehicle 4WD route rather than an ATV route. Full-size vehicles are the traditional use of this county, whereas ATVs introduce a new, noisy, "go-anywhere," unenforceable use that is incompatible with the traditional rugged, remote and solitary setting of this area

I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 2193

## Segment: 117

### Designation [?](#)

#### Current Designation

Closed (Rehab)

#### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

#### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- SOIL Soils Fragile
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk winter concentration areas
- WILDLIFE Elk severe winter range
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I high
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

### Rationale

#### Designation Criteria

- **Minimize Damage:** Fragile soils SSR
- **Minimize Harassment:** Sage-Minimize fragmentation

#### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to reduce fragmentation of sagebrush patches

### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

## Public Comments On Route: 2197

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 000000135-22

- Little Mesa spursNumerous damaging and randomly created spurs and loops branch off from Little Mesa Road, 2026-2025-2187 and should be closed. These include 2059, 2188, 2190, 3100, 2191, 2192, 2197, 2198, 3104, 3099, 3104.If some of these would make a link between Little Mesa and Dry Mesa, there should be one route only and it should be a full size vehicle 4WD route rather than an ATV route. Full-size vehicles are the traditional use of this county, whereas ATVs introduce a new, noisy, "go-anywhere," unenforceable use that is incompatible with the traditional rugged, remote and solitary setting of this area

• Dry Mesa Road Dry Mesa Road similarly has numerous parallel and duplicative routes and loops that are severely and unnecessarily fragmenting what has been a relatively intact habitat area. This spiderweb of routes did not exist a few years ago and should not be legitimized, just because new mobile technologies have the ability to get into these areas. Needing closure and obliteration specifically are routes 3105, 3104 2199, 2200, 2004, 2206, 2109, 2112, 2110, 2111, 3086, 2203, 2058, 2204, 2023. Effective closure and obliteration of these purposeless, randomly-created routes is necessary to restore the integrity of what was until recently a wild and remote landscape

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowlbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can

be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 22

### Segment: 2813

#### Designation [?](#)

##### Current Designation

Foot/Horse

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open (All modes of travel)

**Alternative C:** Foot/Horse

**Alternative D:** Foot/Horse/Mechanized/Motorcycle

## Public Comments On Route: 22

- No public comments for this Route

## Route: 220

### Segment: 2562

#### Designation [?](#)

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- Needs Data - SSS Plants

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

#### Rationale

##### Designation Criteria

- **Minimize Damage:** NHT – close routes for setting
- **Minimize Harassment:** Raptor Potential Habitat, PPSV- Minimize fragmentation

##### Rationale for Decision

- Route was designated to improve natural setting along the Old Spanish National Historic Trail.
- Route was designated to protect potential raptor habitat
- Route was designated to reduce fragmentation in Priority Vegetation types

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open, seek re-route or mitigation

**Alternative C:** Closed (Rehab)

**Alternative D:** Open, seek re-route or mitigation

## Public Comments On Route: 220

- No public comments for this Route

## Route: 2200

### Segment: 186

#### Designation ?

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- SOIL Soils Steep Slopes 40%
- SOIL Soils Fragile
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk winter concentration areas
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches >60 acres

#### Rationale

##### Designation Criteria

- **Minimize Harassment:** Sage-Minimize fragmentation

##### Rationale for Decision

- Route was designated to reduce fragmentation of sagebrush patches

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Vehicles under 50" wide

**Alternative C:** Closed (Rehab)

**Alternative D:** Vehicles under 50" wide

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and

needs to be returned to its previous condition by comprehensive route closures.All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 2203

### Segment: 164

#### Designation [?](#)

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- SOIL Soils Fragile
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk winter concentration areas
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- Minimize Damage:** Fragile soils SSR
- Minimize Harassment:** Sage-Minimize fragmentation

##### Rationale for Decision

- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to reduce fragmentation of sagebrush patches

## Public Comments On Route: 2203

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 000000135-23

• Dry Mesa RoadDry Mesa Road similarly has numerous parallel and duplicative routes and loops that are severely and unnecessarily fragmenting what has been a relatively intact habitat area. This spiderweb of routes did not exist a few years ago and should not be legitimized, just because new mobile technologies have the ability to get into these areas.Needing closure and obliteration specifically are routes 3105, 3104 2199, 2200, 2004, 2206, 2109, 2112, 2110, 2111, 3086, 2203, 2058, 2204, 2023. Effective closure and obliteration of these purposeless, randomly-created routes is necessary to restore the integrity of what was until recently a wild and remote landscape

## Public Comments On Route: 2208

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 000000135-24

- Black Point Draw/Black Point Three routes between Dry Mesa and the CDOW road leading north east to Cactus Park are redundant and unnecessarily fragmenting. 2579-2210-2344 is recently pioneered and should be closed immediately, along with its spurs 2136, 2209, 2208 and 3094. These encroach on a relatively wild Escalante Creek canyon and have had no traditional or long-term use or purpose. 2024 and 3006 are parallel and duplicative, provide the same experience as each other, and should be reduced to one route. The BLM should decide which route is the least damaging, and disturbing to wildlife, and easiest to enforce, and close the other one

- 208-195-186-182-243-257-262-253-240-221-198 I support the Quiet Trail Group's position of designating this loop for quiet trail users. The top segments 208-195-186-176 should be Mtn Bike, to connect with the Alt E proposed designation for 182-243. Note that 243 should not be designated Motorcycle as it is in Alt E as it is a short segment connecting two Mtn Bike routes. The rest of the loop should be Horse/foot as shown in Alt E. This approximately 4 mile loop makes a great short enjoyable hike. I've even done it with a group of friends on a July morning. The city high that day was 93. We finished the hike in the morning when the temperatures were still moderate. Afterwards we enjoyed lunch together at a restaurant on Orchard Mesa (local economic benefit). It is important to me to have easy access to such short quiet use loops within the NCA that are close to the city so that my friends and I can get some exercise together while enjoying each other's company even in summer months. On the height of land crossed by 240, there is a wonderful view back down the valley. The track blends in and the valley looks pristine and untouched by humans. It gives me a small sense of what it must have been like to be the first explorer here. I'd love to find other trails like this. Near 176, there is a pretty little dry fall. And the rock in the area is a conglomerate which is such an interesting contrast to vast amounts of sandstone. On foot it is fun to find such interesting anomalies. That is what is so great about hiking on 186-176-182, you have time to see the contrast and recognize the uniqueness of the area. There's time for my friends and me to admire the power of natural forces. We like this hike because of the sense of discovery of small and large details about the geology of the area.

## Route: 2210

### Segment: 82

## Designation

### Current Designation

Open (All modes of travel)

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- SOIL Soils Steep Slopes 40%
- SOIL Soils Fragile
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I high
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches >60 acres

## Rationale

### Designation Criteria

- **No designation criteria for this route segment.**

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Vehicles under 50" wide

**Alternative B:** Admin/Permitted Use Only

**Alternative C:** Open, seek re-route or mitigation

**Alternative D:** Admin/Permitted Use Only

Comment ID: 000000115-67

• [Wagon Park/Sawmill Mesa (South) TMP-Level Comments: Quiet Trails Group supports the management decisions shown in Alternative E for the southern Sawmill Mesa area with the following specific suggestions:] Route 2024: We support closing 2024 as it appears to be a duplicative route. The surrounding routes 2578-3006-2232-2231 and 2579-3108-2210-2344 connect to Forest Service trails. If there are cattle or other uses for this road not shown on the map, we would support an administrative designation. Otherwise we would like to see 2024 closed to reduce route density in the area because of the presence of big game. We also see that these routes stop at the Dry Fork LWC unit; we would urge the BLM to make sure there is a topographical or physical barrier to stop motorized access into the LWC. Please put signage back at the Forest Boundary that the routes dead-end ahead.

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 000000135-24

• Black Point Draw/Black Point Three routes between Dry Mesa and the CDOW road leading north east to Cactus Park are redundant and unnecessarily fragmenting. 2579-2210-2344 is recently pioneered and should be closed immediately, along with its spurs 2136, 2209, 2208 and 3094. These encroach on a relatively wild Escalante Creek canyon and have had no traditional or long-term use or purpose. 2024 and 3006 are parallel and duplicative, provide the same experience as each other, and should be reduced to one route. The BLM should decide which route is the least damaging, and disturbing to wildlife, and easiest to enforce, and close the other one

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 2211

### Segment: 5

#### Designation ?

##### Current Designation

Admin/Permitted Use Only

##### Mitigation Criteria

- Drainage Crossing
- Steep slopes

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- CULTURAL Cultural Class I high
- SMAs Wild and Scenic River area
- DENSITY Route density low in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Minimize Damage:** Soils - PSD slopes >40%, Riparian - perennial streams SSR 100 m
- **Minimize Harassment:** Raptor Potential Habitat

##### Rationale for Decision

- Route was designated to ensure access to rights-of-way, private property, and livestock grazing facilities.

#### Previous Alternatives Analyzed

Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 2217

### Segment: 284

#### Designation

##### Current Designation

Admin/Permitted Use Only

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- SOIL Soils Fragile
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk winter concentration areas
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

### Rationale

#### Designation Criteria

- **Minimize Damage:** Fragile soils SSR
- **Minimize Harassment:** Sage-Minimize fragmentation, PPSV- Minimize fragmentation, Raptor Potential Habitat

#### Rationale for Decision

- Route was designated to ensure access to rights-of-way, private property, and livestock grazing facilities.

### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Admin/Permitted Use Only

**Alternative C:** Admin/Permitted Use Only

**Alternative D:** Admin/Permitted Use Only

### Public Comments On Route: 2217

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 00000135-28

- I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

### Route: 222

#### Segment: 2546

#### Designation

##### Current Designation

Vehicles under 50" wide

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

### Rationale

#### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general, Rec opportunities - specific
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

#### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

Comment ID: 00000135-28

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 2224

### Segment: 278

## Designation

### Current Designation

Closed (Rehab)

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- SOIL Soils Fragile
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk winter concentration areas
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- **Minimize Damage:** Fragile soils SSR
- **Minimize Harassment:** PPSV- Minimize fragmentation, Sage-Minimize fragmentation, Raptor Potential Habitat

### Rationale for Decision

Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.

- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to reduce fragmentation of sagebrush patches
- Route was designated to protect potential raptor habitat

- I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 2227

### Segment: 257

## Designation

### Current Designation

Route Does not Exist

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- SOIL Soils Steep Slopes 40%
- SOIL Soils Fragile
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- **No designation criteria for this route segment.**

### Rationale for Decision

- No Rationale for this designation.

### Segment: 2542

#### Designation [?](#)

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- Needs Data - SSS Plants

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

## Rationale

### Designation Criteria

- Minimize Damage:** NHT – close routes for setting
- Minimize Harassment:** Raptor Potential Habitat, PPSV- Minimize fragmentation

### Rationale for Decision

- Route was designated to improve natural setting along the Old Spanish National Historic Trail.
- Route was designated to protect potential raptor habitat
- Route was designated to reduce fragmentation in Priority Vegetation types

## Previous Alternatives Analyzed

• [Wagon Park/Sawmill Mesa (South) TMP-Level Comments:Quiet Trails Group supports the management decisions shown in Alternative E for the southern Sawmill Mesa area with the following specific suggestions:] Route 2024: We support closing 2024 as it appears to be a duplicative route. The surrounding routes 2578-3006-2232-2231 and 2579-3108-2210-2344 connect to Forest Service trails. If there are cattle or other uses for this road not shown on the map, we would support an administrative designation. Otherwise we would like to see 2024 closed to reduce route density in the area because of the presence of big game.We also see that these routes stop at the Dry Fork LWC unit; we would urge the BLM to make sure there is a topographical or physical barrier to stop motorized access into the LWC. Please put signage back at the Forest Boundary that the routes dead-end ahead.

Comment ID: 00000135-28

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness.Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources.As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use.The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles.What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures.All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 2233

### Segment: 107

#### Designation [?](#)

##### Current Designation

Open (All modes of travel)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- SOIL Soils Steep Slopes 40%
- SOIL Soils Fragile
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk severe winter range
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I moderate
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches >60 acres

#### Rationale

##### Designation Criteria

- No designation criteria for this route segment.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open, seek re-route or mitigation

**Alternative C:** Open, seek re-route or mitigation

## Public Comments On Route: 2233

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 000000135-25

• Sawmill Mesa Moving south to the CDOW parcel, the BLM should work with the BLM to close numerous user-created routes in the Sawmill Mesa, Grade Gulch and Mud Springs area. The CDOW road leading north east to Cactus Park has numerous random, unplanned spurs and duplicative routes branching off, which need to be closed. Only the main, historically-used arteries should remain open to preserve these remote vistas and natural soundscapes. Routes to be closed and obliterated are: 2273=2139-2696; 2141, 3138, 3135, along with other spurs off the Peach Orchard Point Road 2270, including 3126, 2271, 2272, 2270 all of which should be closed to maintain silent open space quality of this point. Other routes needing closure off the CDOW road are: 2261, 2259, 3002, 3090, 2260, 2051, 2258, 2259, 3154, 2233, 2263, 2254, 3031, 3109, 2134, 2255, 2257, 2250.

## Public Comments On Route: 2241

Organization, commenter: Quiet Trails Group, Sherry Schenk

Comment ID: 00000115-66

- Wagon Park/Sawmill Mesa (South) TMP-Level Comments:Quiet Trails Group supports the management decisions shown in Alternative E for the southern Sawmill Mesa area with the following specific suggestions:Route 2249: We support Alternative E having 2249 as a horse/foot trail, as we are concerned about the impacts to the stream and water quality from motorized vehicles. We recommend that the BLM install adequate barriers at the intersection with Route 2241. We've seen that the current barrier is inadequate to stop ATV use

## Public Comments On Route: 2242

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 00000135-28

- I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness.Finally, the hundreds of small scars, spurs, loops and

proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

Dry Mesa Rd. and Sawmill Mesa Rd.: Roads 2243, 2248, 2249 and 2136 are currently open for ATV use and I would like to see them remain so. It would make sense to also leave 2006, 2299, 2298, 2297 left open to horse/foot traffic, thereby providing multi-use with little user conflict

Organization, commenter: Jolene George

Comment ID: 000000096-2

2.Route # 2249, 2248, 2244, 2243 is identified on the "Route by Route Designations Alternative E Map" as a horse trail but is currently used as a multiple use trail which includes OHV's. I disagree with the redesignation of this trail to horseback/hikers only. I have hiked this trail and it is beautiful and offers many opportunities for all user groups. It is less traveled because it is not signed and hidden from view on the main road. In all of the times I've been on this trail, I've never seen another user. This trail should remain open to motorized use.

Organization, commenter: Lawrence Ribnick

Comment ID: 000000099-5

Construct some foot and horse only trails outside of Wilderness. Examples: Construct trail along rim of Gunnison Bluffs and the trail up Dry Fork needs to be closed to motorize use

Organization, commenter: Tracey Rohde

Comment ID: 00000103-4

Escalante Rd/Dry Mesa Rd, Sawmill Mesa Rd & 25 Mesa Rd areas: Due to hunting access use, and OHV recreation, I would like to see trail #'s 2166, 2168 & 2122, which are currently open to atv use, remain open to access as they currently are today. Other trails I'd like to see remain open as currently are, for same purposes, are #2169, 2596, 2171, 2003, 2122, 3145, 2182, 2179, 2178, 3143, 2181. These roads & trails are important to hunting access. Between Dry Mesa Rd & Sawmill Mesa Rd, I'd like for trails #'s 2243, 2244, 2248, 2249 and 2136 to remain open for atv use, as they currently are. These trails provide alternative route vs. having to travel on the main access roadways (Sawmill Mesa or Dry Mesa) and provide unique OHV recreation value for the activity I love to participate in. Alternative B & E designate these for horse and foot traffic and I'd like to see them remain open to atv activity as they currently are today. Trail # 2006, 2299, 2298, 2297 are slated for closure in Alt's B & E, but perhaps those would make a good horse/foot route vs. closure.

Comment ID: 000000156-22

• Within the Sawmill Mesa area we are very pleased to see the establishment of two major horse & foot trails in the area. Route 2243/2244/2248/2249 provides access into the Dry Fork of Escalante Canyon. This canyon provides excellent opportunities for hiking, backpacking, backcountry hunting, horseback riding, exploring, and other quiet use recreation. Route 2377/2376/2353/2354/2399 in the Escalante Rim area also provides opportunities for these activities in an area that provides excellent solitude. We fully support the designation of these routes as being open to horse and foot travel only.

## Public Comments On Route: 2248

Organization, commenter: COHVCO, James Solomon

Comment ID: 00000065-29

• In the Cottonwood/Dry Fork SRMA, Alternative (D): Trail 2249 & 2248 provide a motorized route allowing access to this interesting canyon. This provides an opportunity for exploring in a true back country setting and enhances the recreation experience for individuals who are not capable of hiking or riding a horse. Motorized access to our public lands is becoming more and more restricted and this policy needs to loosen up some and allow more people opportunity to have a back country experience.

Organization, commenter: COHVCO, James Solomon

Comment ID: 00000065-3

• ATV Trail 2249 & 2248 off Dry Mesa Road would make a great Motorized opportunity to explore a secluded and beautiful draw: Alternative (D) addresses this route and proposes to make it open to motorized travel at the ATV width. This is a very good idea and should be included in the final RMP. Please keep in mind the need for more quality options for this type of recreation. The Dry Mesa Road allows for a great round trip loop ride up onto the North Uncompahgre and back on the Escalante Road. • Dry Mesa Rd. and Sawmill Mesa Rd.: Roads 2243, 2248, 2249 and 2136 are currently open for ATV use and I would like to see them remain so. It would make sense to also leave 2006, 2299, 2298, 2297 left open to horse/foot traffic, thereby providing multi-use with little user conflict

Organization, commenter: Jolene George

Comment ID: 000000096-2

• 2.Route # 2249, 2248, 2244, 2243 is identified on the "Route by Route Designations Alternative E Map" as a horse trail but is currently used as a multiple use trail which includes OHV's. I disagree with the redesignation of this trail to horseback/hikers only. I have hiked this trail and it is beautiful and offers many opportunities for all user groups. It is less traveled because it is not signed and hidden from view on the main road. In all of the times I've been on this trail, I've never seen another user. This trail should remain open to motorized use.

Comment ID: 00000103-4

• Escalante Rd/Dry Mesa Rd, Sawmill Mesa Rd & 25 Mesa Rd areas: Due to hunting access use, and OHV recreation, I would like to see trail #'s 2166, 2168 & 2122, which are currently open to atv use, remain open to access as they currently are today. Other trails I'd like to see remain open as currently are, for same purposes, are #2169, 2596, 2171, 2003, 2122, 3145, 2182, 2179, 2178, 3143, 2181. These roads & trails are important to hunting access. Between Dry Mesa Rd & Sawmill Mesa Rd, I'd like for trails #'s 2243, 2244, 2248, 2249 and 2136 to remain open for atv use, as they currently are. These trails provide alternative route vs. having to travel on the main access roadways (Sawmill Mesa or Dry Mesa) and provide unique OHV recreation value for the activity I love to participate in. Alternative B & E designate these for horse and foot traffic and I'd like to see them remain open to atv activity as they currently are today. Trail # 2006, 2299, 2298, 2297 are slated for closure in Alt's B & E, but perhaps those would make a good horse/foot route vs. closure.

• Trail Number(s): 2249/2248 Trail Name: Dry Mesa & Sawmill area Trail Description (challenges, viewpoints, terrain type, etc.): Click here to enter text. Your historical use/activities (frequency, rock crawling, exploring, testing, photography, camping): 4-Wheeling by fullsize 4WD Why you like this trail (challenges you/vehicle, close to home, wildlife, historic sites, scenic views): Scenic views, exploration of a remote area. Benefits you receive by using this trail (exercise, socializing with friends/family, solitude, remoteness): This area gives a feeling of remoteness and is fun to explore in a fullsize 4WD. Other Comment (what is your desired outcome for this trail, additional ideas to be considered): These routes should remain open to fullsize 4WD

• Dry Fork - I was there in summer of 2011. ATVs have started a trial up the creek bottom with no regard for habitat or aquatic environment. This illegal ATV route must be closed. It is degrading the water quality and the environmental integrity of Dry Fork

Organization, commenter: Backcountry Hunters and Anglers, Craig Grother

Comment ID: 00000156-22

• Within the Sawmill Mesa area we are very pleased to see the establishment of two major horse & foot trails in the area. Route 2243/2244/2248/2249 provides access into the Dry Fork of Escalante Canyon. This canyon provides excellent opportunities for hiking, backpacking, backcountry hunting, horseback riding, exploring, and other quiet use recreation. Route 2377/2376/2353/2354/2399 in the Escalante Rim area also provides opportunities for these activities in an area that provides excellent solitude. We fully support the designation of these routes as being open to horse and foot travel only.

Comment ID: 00000135-28

I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 2249

### Segment: 532

#### Designation

##### Current Designation

Foot/Horse

##### Mitigation Criteria

- Needs Data - Range

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Range access for general livestock management
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk severe winter range
- RIPARIAN Riparian 2 stream crossings
- RIPARIAN Riparian crossing perennial stream
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I low

- SMAs Lands with wilderness characteristics
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- **Minimize Damage:** Riparian crossing reductions, Lands with wilderness characteristics
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Vehicles under 50" wide

**Alternative B:** Foot/Horse

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed, seek re-route or mitigation

## Public Comments On Route: 2249

Organization, commenter: COHVCO, James Solomon

Comment ID: 000000065-29

- In the Cottonwood/Dry Fork SRMA, Alternative (D): Trail 2249 & 2248 provide a motorized route allowing access to this interesting canyon. This provides a opportunity for exploring in a true back country setting and enhances the recreation experience for individuals who are not capable of hiking or riding a horse. Motorized access to our public lands is becoming more and more restricted and this policy needs to loosen up some and allow more people opportunity to have a back country experience.

- Dry Mesa Rd. and Sawmill Mesa Rd.: Roads 2243, 2248, 2249 and 2136 are currently open for ATV use and I would like to see them remain so. It would make sense to also leave 2006, 2299, 2298, 2297 left open to horse/foot traffic, thereby providing multi-use with little user conflict

Organization, commenter: Jolene George

Comment ID: 000000096-2

- 2.Route # 2249, 2248, 2244, 2243 is identified on the "Route by Route Designations Alternative E Map" as a horse trail but is currently used as a multiple use trail which includes OHV's. I disagree with the redesignation of this trail to horseback/hikers only. I have hiked this trail and it is beautiful and offers many opportunities for all user groups. It is less traveled because it is not signed and hidden from view on the main road. In all of the times I've been on this trail, I've never seen another user. This trail should remain open to motorized use.

- Escalante Rd/Dry Mesa Rd, Sawmill Mesa Rd & 25 Mesa Rd areas: Due to hunting access use, and OHV recreation, I would like to see trail #'s 2166, 2168 & 2122, which are currently open to atv use, remain open to access as they currently are today. Other trails I'd like to see remain open as currently are, for same purposes, are #2169, 2596, 2171, 2003, 2122, 3145, 2182, 2179, 2178, 3143, 2181. These roads & trails are important to hunting access. Between Dry Mesa Rd & Sawmill Mesa Rd, I'd like for trails #'s 2243, 2244, 2248, 2249 and 2136 to remain open for atv use, as they currently are. These trails provide alternative route vs. having to travel on the main access roadways (Sawmill Mesa or Dry Mesa) and provide unique OHV recreation value for the activity I love to participate in. Alternative B & E designate these for horse and foot traffic and I'd like to see them remain open to atv activity as they currently are today. Trail # 2006, 2299, 2298, 2297 are slated for closure in Alt's B & E, but perhaps those would make a good horse/foot route vs. closure.

- Wagon Park/Sawmill Mesa (South) TMP-Level Comments:Quiet Trails Group supports the management decisions shown in Alternative E for the southern Sawmill Mesa area with the following specific suggestions:Route 2249: We support Alternative E having 2249 as a horse/foot trail, as we are concerned about the impacts to the stream and water quality from motorized vehicles. We recommend that the BLM install adequate barriers at the intersection with Route 2241. We've seen that the current barrier is inadequate to stop ATV use

- Within the Sawmill Mesa area we are very pleased to see the establishment of two major horse & foot trails in the area. Route 2243/2244/2248/2249 provides access into the Dry Fork of Escalante Canyon. This canyon provides excellent opportunities for hiking, backpacking, backcountry hunting, horseback riding, exploring, and other quiet use recreation. Route 2377/2376/2353/2354/2399 in the Escalante Rim area also provides opportunities for these activities in an area that provides excellent solitude. We fully support the designation of these routes as being open to horse and foot travel only.

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 225

### Segment: 2543

#### Designation

##### Current Designation

Open (All modes of travel)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

#### Rationale

##### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Admin/Permitted Use Only

**Alternative C:** Admin/Permitted Use Only

**Alternative D:** Admin/Permitted Use Only

## Public Comments On Route: 225

### Segment: 136

#### Designation

##### Current Designation

Admin/Permitted Use Only

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- SOIL Soils Steep Slopes 40%
- SOIL Soils Fragile
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches >60 acres

## Rationale

### Designation Criteria

- **Minimize Harassment:** Sage-Minimize fragmentation

### Rationale for Decision

- Route was designated to ensure access to rights-of-way, private property, and livestock grazing facilities.

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 000000135-25

• Sawmill Mesa Moving south to the CDOW parcel, the BLM should work with the BLM to close numerous user-created routes in the Sawmill Mesa, Grade Gulch and Mud Springs area. The CDOW road leading north east to Cactus Park has numerous random, unplanned spurs and duplicative routes branching off, which need to be closed. Only the main, historically-used arteries should remain open to preserve these remote vistas and natural soundscapes. Routes to be closed and obliterated are: 2273=2139-2696; 2141, 3138, 3135, along with other spurs off the Peach Orchard Point Road 2270, including 3126, 2271, 2272, 2270 all of which should be closed to maintain silent open space quality of this point. Other routes needing closure off the CDOW road are: 2261, 2259, 3002, 3090, 2260, 2051, 2258, 2259, 3154, 2233, 2263, 2254, 3031, 3109, 2134, 2255, 2257, 2250.

I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 2252

### Segment: 125

#### Designation

##### Current Designation

Admin/Permitted Use Only

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- SOIL Soils Fragile
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Indirect impact
- DENSITY Route density highest in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches >60 acres

#### Rationale

##### Designation Criteria

- No designation criteria for this route segment.

##### Rationale for Decision

- Route was designated to ensure access to rights-of-way, private property, and livestock grazing facilities.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

Comment ID: 000000135-25

• Sawmill Mesa Moving south to the CDOW parcel, the BLM should work with the BLM to close numerous user-created routes in the Sawmill Mesa, Grade Gulch and Mud Springs area. The CDOW road leading north east to Cactus Park has numerous random, unplanned spurs and duplicative routes branching off, which need to be closed. Only the main, historically-used arteries should remain open to preserve these remote vistas and natural soundscapes. Routes to be closed and obliterated are: 2273=2139-2696; 2141, 3138, 3135, along with other spurs off the Peach Orchard Point Road 2270, including 3126, 2271, 2272. 2270 all of which should be closed to maintain silent open space quality of this point. Other routes needing closure off the CDOW road are: 2261, 2259, 3002, 3090, 2260, 2051, 2258, 2259, 3154, 2233, 2263, 2254, 3031, 3109, 2134, 2255, 2257, 2250,

However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 2256

### Segment: 135

#### Designation ?

##### Current Designation

Admin/Permitted Use Only

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- SOIL Soils Steep Slopes 40%
- SOIL Soils Fragile
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches >60 acres

#### Rationale

##### Designation Criteria

- **Minimize Harassment:** Sage-Minimize fragmentation

##### Rationale for Decision

- Route was designated to ensure access to rights-of-way, private property, and livestock grazing facilities.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open, seek re-route or mitigation

**Alternative C:** Open, seek re-route or mitigation

**Alternative D:** Open, seek re-route or mitigation

Comment ID: 000000135-25

• Sawmill Mesa Moving south to the CDOW parcel, the BLM should work with the BLM to close numerous user-created routes in the Sawmill Mesa, Grade Gulch and Mud Springs area. The CDOW road leading north east to Cactus Park has numerous random, unplanned spurs and duplicative routes branching off, which need to be closed. Only the main, historically-used arteries should remain open to preserve these remote vistas and natural soundscapes. Routes to be closed and obliterated are: 2273=2139-2696; 2141, 3138, 3135, along with other spurs off the Peach Orchard Point Road 2270, including 3126, 2271, 2272. 2270 all of which should be closed to maintain silent open space quality of this point. Other routes needing closure off the CDOW road are: 2261, 2259, 3002, 3090, 2260, 2051, 2258, 2259, 3154, 2233, 2263, 2254, 3031, 3109, 2134, 2255, 2257, 2250,

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 2258

### Segment: 98

#### Designation

##### Current Designation

Open, seek re-route or mitigation

##### Mitigation Criteria

- Reroute
- move to the edge of Sagebrush park

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement

- RANGE Range access for general livestock management
- SOIL Soils Steep Slopes 40%
- SOIL Soils Fragile
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Indirect impact
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches >60 acres

## Rationale

### Designation Criteria

- **No designation criteria for this route segment.**

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open (All modes of travel)

## Route: 2259

### Segment: 96

## Designation

### Current Designation

Open (All modes of travel)

### Mitigation Criteria

- Possible new alignment for 2260, 3001, 3002, 2258, 2254, 3109, etc.

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- SOIL Soils Steep Slopes 40%
- SOIL Soils Fragile
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Indirect impact
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches >60 acres

## Rationale

### Designation Criteria

- **Recreation:** Rec opportunities – general

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

• Sawmill Mesa Moving south to the CDOW parcel, the BLM should work with the BLM to close numerous user-created routes in the Sawmill Mesa, Grade Gulch and Mud Springs area. The CDOW road leading north east to Cactus Park has numerous random, unplanned spurs and duplicative routes branching off, which need to be closed. Only the main, historically-used arteries should remain open to preserve these remote vistas and natural soundscapes. Routes to be closed and obliterated are: 2273=2139-2696; 2141, 3138, 3135, along with other spurs off the Peach Orchard Point Road 2270, including 3126, 2271, 2272. 2270 all of which should be closed to maintain silent open space quality of this point. Other routes needing closure off the CDOW road are: 2261, 2259, 3002, 3090, 2260, 2051, 2258, 2259, 3154, 2233, 2263, 2254, 3031, 3109, 2134, 2255, 2257, 2250,

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 226

### Segment: 2544

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

#### Rationale

##### Designation Criteria

- Minimize Damage:** NHT – close routes for setting
- Minimize Harassment:** PPSV- Minimize fragmentation

##### Rationale for Decision

- Route was designated to improve natural setting along the Old Spanish National Historic Trail.
- Route was designated to reduce fragmentation in Priority Vegetation types

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 226

- No public comments for this Route

## Route: 2260

### Segment: 90

#### Designation [?](#)

##### Current Designation

Open, seek re-route or mitigation

##### Mitigation Criteria

- Reroute
- move to the edge of Sagebrush park

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- SOIL Soils Steep Slopes 40%
- SOIL Soils Fragile
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I high
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches >60 acres

#### Rationale

##### Designation Criteria

- No designation criteria for this route segment.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open (All modes of travel)

**Alternative C:** Closed (Rehab)

**Alternative D:** Open, seek re-route or mitigation

Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 2262

### Segment: 88

## Designation

### Current Designation

Closed (Rehab)

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- SOIL Soils Fragile
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches >60 acres

## Rationale

### Designation Criteria

- **Minimize Harassment:** Sage-Minimize fragmentation

### Rationale for Decision

- Route was designated to reduce fragmentation of sagebrush patches

## Previous Alternatives Analyzed

- Alternative A:** Open (All modes of travel)
- Alternative B:** Closed (Not Rehabbed)
- Alternative C:** Closed (Rehab)
- Alternative D:** Closed (Rehab)

## Public Comments On Route: 2262

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 00000135-28

- I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. ## Route: 2264

### Segment: 76

#### Designation [?](#)

##### Current Designation

Open, seek re-route or mitigation

##### Mitigation Criteria

- Steep slopes issue; ensure a maintenance priority.

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- LANDS Access to non-federal lands
- SOIL Soils Steep Slopes 40%
- SOIL Soils 25% to 40% Slopes
- SOIL Soils Fragile
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk severe winter range
- RIPARIAN Riparian 1 stream crossing
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I high
- DENSITY Route density medium in Alt A
- DENSITY Route density medium in Alt E

#### Rationale

##### Designation Criteria

- No designation criteria for this route segment.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 2266

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- LANDS Access to non-federal lands
- SOIL Soils Steep Slopes 40%
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- No designation criteria for this route segment.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

Comment ID: 000000135-28

- I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 227

### Segment: 2555

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- RIPARIAN Riparian 1 stream crossing
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I low
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E
- SSPLANT Special Status Species Colorado hookless cactus

#### Rationale

##### Designation Criteria

- Minimize Damage:** Cactus – reduce density within 200m, NHT – close routes for setting, Riparian—ephemeral streams SSR 30 m, Fragile soils SSR
- Minimize Harassment:** PPSV- Minimize fragmentation

##### Rationale for Decision

- Route was designated to reduce the density of routes within 200 meters of known Colorado hookless Cactus occurrences.
- Route was designated to improve natural setting along the Old Spanish National Historic Trail.
- Route was designated to minimize travel routes in and crossing riparian and wetland areas.
- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to reduce fragmentation in Priority Vegetation types

## Public Comments On Route: 2270

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 00000135-25

• Sawmill Mesa Moving south to the CDOW parcel, the BLM should work with the BLM to close numerous user-created routes in the Sawmill Mesa, Grade Gulch and Mud Springs area. The CDOW road leading north east to Cactus Park has numerous random, unplanned spurs and duplicative routes branching off, which need to be closed. Only the main, historically-used arteries should remain open to preserve these remote vistas and natural soundscapes. Routes to be closed and obliterated are: 2273=2139-2696; 2141, 3138, 3135, along with other spurs off the Peach Orchard Point Road 2270, including 3126, 2271, 2272. 2270 all of which should be closed to maintain silent open space quality of this point. Other routes needing closure off the CDOW road are: 2261, 2259, 3002, 3090, 2260, 2051, 2258, 2259, 3154, 2233, 2263, 2254, 3031, 3109, 2134, 2255, 2257, 2250,

## Public Comments On Route: 2273

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 00000135-25

• Sawmill Mesa Moving south to the CDOW parcel, the BLM should work with the BLM to close numerous user-created routes in the Sawmill Mesa, Grade Gulch and Mud Springs area. The CDOW road leading north east to Cactus Park has numerous random, unplanned spurs and duplicative routes branching off, which need to be closed. Only the main, historically-used arteries should remain open to preserve these remote vistas and natural soundscapes. Routes to be closed and obliterated are: 2273=2139-2696; 2141, 3138, 3135, along with other spurs off the Peach Orchard Point Road 2270, including 3126, 2271, 2272, 2270 all of which should be closed to maintain silent open space quality of this point. Other routes needing closure off the CDOW road are: 2261, 2259, 3002, 3090, 2260, 2051, 2258, 2259, 3154, 2233, 2263, 2254, 3031, 3109, 2134, 2255, 2257, 2250,

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 2277

### Segment: 3181

## Designation

### Current Designation

Open, seek re-route or mitigation

### Mitigation Criteria

- Reroute
- Reroute to the edge of the Sagebrush field

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- LANDS Access to non-federal lands
- SOIL Soils Steep Slopes 40%
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Indirect impact
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches <60 acres

## Rationale

### Designation Criteria

- **Recreation:** Rec opportunities – general, RMA objectives

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open (All modes of travel)

**Alternative C:** Open, seek re-route or mitigation

**Alternative D:** Open, seek re-route or mitigation

## Public Comments On Route: 2277

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 2283

### Segment: 3184

## Designation

### Current Designation

Foot/Horse

### Mitigation Criteria

- Foot and horse (but still open to motorized for admin/permitted access)

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- LANDS Access to non-federal lands
- WILDLIFE Mule deer severe winter range
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I high
- DENSITY Route density low in Alt A
- DENSITY Route density low in Alt E

### Rationale

#### Designation Criteria

- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

#### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

### Previous Alternatives Analyzed

**Alternative A:** Vehicles under 50" wide

**Alternative B:** Admin/Permitted Use Only

**Alternative C:** Open, seek re-route or mitigation

**Alternative D:** Open, seek re-route or mitigation

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 2287

### Segment: 747

#### Designation [?](#)

##### Current Designation

Open, seek re-route or mitigation

##### Mitigation Criteria

- Reroute
- Special Species Plant

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E
- SSPLANT Special Status Species Colorado hookless cactus

## Rationale

### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open, seek re-route or mitigation

**Alternative C:** Open, seek re-route or mitigation

**Alternative D:** Admin/Permitted Use Only

## Public Comments On Route: 2287

Comment ID: 000000135-28

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 2294

### Segment: 730

#### Designation

##### Current Designation

Open, seek re-route or mitigation

##### Mitigation Criteria

- Riparian

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- SOIL Soils Steep Slopes 40%
- SOIL Soils Fragile
- WILDLIFE Mule deer severe winter range
- RIPARIAN Riparian 1 stream crossing
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I low
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **No designation criteria for this route segment.**

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open, seek re-route or mitigation

**Alternative C:** Closed, seek re-route or mitigation

**Alternative D:** Admin/Permitted Use Only

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 2297

### Segment: 707

#### Designation

##### Current Designation

Closed (Not Rehabbed)

##### Designation Following Mitigation

Foot/Horse

##### Mitigation Criteria

- Needs Data - SSS Plants

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- SOIL Soils Steep Slopes 40%
- SOIL Soils Fragile
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Minimize Harassment:** PPSV- Minimize fragmentation
- **Recreation:** RMA objectives, Rec opportunities – general
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed, seek re-route or mitigation

• Dry Mesa Rd. and Sawmill Mesa Rd.: Roads 2243, 2248, 2249 and 2136 are currently open for ATV use and I would like to see them remain so. It would make sense to also leave 2006, 2299, 2298, 2297 left open to horse/foot traffic, thereby providing multi-use with little user conflict

Organization, commenter: Jolene George

Comment ID: 00000096-5

- 5. Route # 2006, 2008, 2299, 2298, 2007, and 2297 are designated as "closed" because they don't connect into any other trails. I disagree with your assessment that this trail lacks an identified use. This trail provides all recreationalists a way to access the gullies and other topographic features of the immediate area for hiking, exploring, sightseeing, picnicking, solitude etc... This trail should remain open.

Organization, commenter: Tracey Rohde

Comment ID: 00000103-4

- Escalante Rd/Dry Mesa Rd, Sawmill Mesa Rd & 25 Mesa Rd areas: Due to hunting access use, and OHV recreation, I would like to see trail #'s 2166, 2168 & 2122, which are currently open to atv use, remain open to access as they currently are today. Other trails I'd like to see remain open as currently are, for same purposes, are #2169, 2596, 2171, 2003, 2122, 3145, 2182, 2179, 2178, 3143, 2181. These roads & trails are important to hunting access. Between Dry Mesa Rd & Sawmill Mesa Rd, I'd like for trails #'s 2243, 2244, 2248, 2249 and 2136 to remain open for atv use, as they currently are. These trails provide alternative route vs. having to travel on the main access roadways (Sawmill Mesa or Dry Mesa) and provide unique OHV recreation value for the activity I love to participate in. Alternative B & E designate these for horse and foot traffic and I'd like to see them remain open to atv activity as they currently are today. Trail # 2006, 2299, 2298, 2297 are slated for closure in Alt's B & E, but perhaps those would make a good horse/foot route vs. closure.

- I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 2298

### Segment: 696

#### Designation

##### Current Designation

Closed (Not Rehabbed)

##### Designation Following Mitigation

Foot/Horse

##### Mitigation Criteria

- Needs Data - SSS Plants

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- SOIL Soils Fragile
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Minimize Harassment:** PPSV- Minimize fragmentation
- **Recreation:** RMA objectives, Rec opportunities – general
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed, seek re-route or mitigation

## Public Comments On Route: 2298

- Dry Mesa Rd. and Sawmill Mesa Rd.: Roads 2243, 2248, 2249 and 2136 are currently open for ATV use and I would like to see them remain so. It would make sense to also leave 2006, 2299, 2298, 2297 left open to horse/foot traffic, thereby providing multi-use with little user conflict

Organization, commenter: Jolene George

Comment ID: 000000096-5

- 5. Route # 2006, 2008, 2299, 2298, 2007, and 2297 are designated as "closed" because they don't connect into any other trails. I disagree with your assessment that this trail lacks an identified use. This trail provides all recreationalists a way to access the gullies and other topographic features of the immediate area for hiking, exploring, sightseeing, picnicking, solitude etc... This trail should remain open.

Comment ID: 000000103-4

• Escalante Rd/Dry Mesa Rd, Sawmill Mesa Rd & 25 Mesa Rd areas: Due to hunting access use, and OHV recreation, I would like to see trail #'s 2166, 2168 & 2122, which are currently open to atv use, remain open to access as they currently are today. Other trails I'd like to see remain open as currently are, for same purposes, are #2169, 2596, 2171, 2003, 2122, 3145, 2182, 2179, 2178, 3143, 2181. These roads & trails are important to hunting access. Between Dry Mesa Rd & Sawmill Mesa Rd, I'd like for trails #'s 2243, 2244, 2248, 2249 and 2136 to remain open for atv use, as they currently are. These trails provide alternative route vs. having to travel on the main access roadways (Sawmill Mesa or Dry Mesa) and provide unique OHV recreation value for the activity I love to participate in. Alternative B & E designate these for horse and foot traffic and I'd like to see them remain open to atv activity as they currently are today. Trail # 2006, 2299, 2298, 2297 are slated for closure in Alt's B & E, but perhaps those would make a good horse/foot route vs. closure.

- RANGE Range access for general livestock management
- WILDLIFE Mule deer severe winter range
- RIPARIAN Riparian 1 stream crossing
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I low
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- Recreation:** RMA objectives, Rec opportunities – general

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Admin/Permitted Use Only

**Alternative C:** Open, seek re-route or mitigation

**Alternative D:** Open, seek re-route or mitigation

## Public Comments On Route: 2303

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 000000135-28

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 2304

### Segment: 3049

## Designation

### Current Designation

Open, seek re-route or mitigation

### Mitigation Criteria

- Riparian. Steep slopes issue; ensure a maintenance priority.

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- SOIL Soils Steep Slopes 40%
- SOIL Soils Fragile
- WILDLIFE Mule deer severe winter range
- RIPARIAN Riparian 3 stream crossings
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I low
- DENSITY Route density medium in Alt A
- DENSITY Route density medium in Alt E

## Rationale

### Designation Criteria

- No designation criteria for this route segment.**

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

**Route: 2305****Segment: 755****Designation** 

## Current Designation

Open (All modes of travel)

## Mitigation Criteria

- No Mitigation Criteria for this Route Segment

## Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density medium in Alt A
- DENSITY Route density medium in Alt E

## Rationale

### Designation Criteria

- **No designation criteria for this route segment.**

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Public Comments On Route: 2306

• The following high value recreational routes/roads are legal ROW's in the State of Colorado, Mesa County and the BLM does not have the jurisdiction to close them: 500, 472, 518, 521, 530, 39, 127, 572, 566, 66, 65, 148, 71, 74, 587, 595, 608, 622, 628, 635, 624, 609, 611, 706, 678, 700, 719, 726, 696, 26, 936, 847, 849, 919, 767, 824, 96, 822, 817, 950, 1021, 900, 2682, 1020, 1003, 1084, 1142, 1184, 1156, 1198, 1349, 1308, 1310, 1238, 1263, 1122, 1170, 1192, 974, 941, 1076, 1039, 1018, 1759, 1764, 1758, 1174, 1788, 1798, 1669, 1699, 1773, 1755, 1779, 1750, 1751, 1792, 1720, 1726, 1727, 1720, 1722, 1803, 1805, 1809, 1614, 1609, 1605, 1608, 1571, 1526, 1516, 1448, 755, 807, 900, 10, 48, 924, 950, 1005, 965, 8, 1115, 981, 984, 1135, 2678, 1249, 1171, 1150, 1249, 1320, 1235, 1236, 1228, 1227, 1409, 1456, 1349, 1308, 1513, 1221, 1550, 1567, 1641, 1612, 1740, 1688, 2597, 2598, 2601, 2440, 3160, 3162, 2089, 2166, 2170, 2596, 2171, 2003, 2122, 2126, 2189, 3145, 2182, 2179, 2178, 3143, 2181, 2121, 2122, 2168, 2126, 2180, 2095, 2173, 2174, 2620, 2129, 1686, 1692, 1667, 1647, 1631, 1613, 1596, 1549, 1541, 2647, 1633, 1605, 1608, 1571, 2645, 1507, 1448, 1496, 1516, 1504, 1510, 1508, 1509, 439, 431, 456, 461, 460, 391, 423, 415, 419, 407, 402, 367, 372, 339, 298, 338, 105, 368, 374, 393, 389, 390, 376, 377, 351, 350, 121, 345, 320, 301, 251, 234, 232, 205, 344, 107, 103, 152, 153, 161, 168, 3199, 188, 196, 255, 254, 236, 294, 242, 219, 201, 169, 162, 158, 160, 173. The following high value recreational routes/roads are legal ROW's in the State of Colorado, Delta County, and the BLM does not have the jurisdiction to close them: 3011, 2184, 2191, 3100, 2187, 2026, 2059, 2188, 2192, 3104, 2130, 3009, 2199, 2200, 2111, 2223, 2024, 3006, 2231, 3094, 2579, 2210, 2344, 2243, 2249, 2248, 3074, 2354, 2384, 2296, 2295, 2287, 2304, 2062, 2163, 3163, 2164, 2430, 4006, 3016, 2351, 3140, 2410, 4008, 2324, 2073, 2306, 2459, 3192, 3193, 2350, 2443, 2035, 2336, 2495, 2491, 2159, 3058, 2277, 2465, 2467, 3189, 2472, 2297, 2006, 2265, 2271, 2276, 2135, 2139, 3053, 2489, 3033, 3057, 2031, 2276, 2210, 2579, 2136, 2344, 3164, 2400, 2379, 3014, 2365, 3116, 2251, 2259, 2149, 2153, 2146, 2144, 2145, 2356, 2257, 2048, 2358, 3165, and 3166.

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 2307

### Segment: 856

#### Designation ?

**Current Designation**  
Vehicles under 50" wide

#### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

#### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- RANGE Range access for general livestock management
- CULTURAL Cultural Indirect impact
- SMAs Wild and Scenic River area
- DENSITY Route density highest in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Admin/Permitted Use Only

**Alternative D:** Open, seek re-route or mitigation

## Public Comments On Route: 2307

- No public comments for this Route

## Route: 2308

### Segment: 825

#### Designation ?

**Current Designation**

Vehicles under 50" wide

#### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

#### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- RANGE Range access for general livestock management
- SOIL Soils Fragile
- CULTURAL Cultural Class I low
- SMAs Wild and Scenic River area
- DENSITY Route density highest in Alt A
- DENSITY Route density low in Alt E
- SSPLANT Special Status Species Colorado hookless cactus

### Rationale

#### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

#### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Admin/Permitted Use Only

**Alternative D:** Open, seek re-route or mitigation

### Public Comments On Route: 2308

**Alternative D:** Closed (Rehab)

### Public Comments On Route: 231

Organization, commenter: COPMOBA, Scott Winans

Comment ID: 000000168-2

- Hunting GroundsIn the Hunting Grounds area, a longer distance trail similar to Kokopelli's, Tabeguache, and Paradox Trails, would be of interest to this user group[COPMOBA]. Starting at the Old Spanish Trail in Orchard Mesa and ending in Delta, this trail idea is currently feasible when using a mix of single track, ATV width trail, jeep road and even Highway 50 for a few short sections. With very little trail construction making some connections to existing trails, nearly all of this highway use can be avoided. The major attraction of this area is the views from the rim above the Gunnison River in both directions. The existing trail and any trail construction should be routed to take advantage of this valuable view resource.The following recommendations are in the spirit of developing this long distance trail.Starting from the Kannah Creek area we recommend leaving 152 open to mountain bike use for a possible future connection to the lower Kannah Creek road. Possibilities included deeded access across private land, or new construction from the

existing small portion of BLM land which the road accesses. Continuing, use existing full size and ATV trail to the end of 440, or a portion of 431, to access small drainage and then construct new trail to access Bridgeport Road. Then use 438, 449 and 2163 to access 2426 and 2427 to Dominguez Road (or 3098 and 3163 and then a very short new connector to 3133 out to highway) From Dominguez Road use 4000 to 3043, then single track 4001,4005,4006,4007 and 3148 to reach Escalante Road. Very nice views exist in this area from the trail. The trail would then cross Escalante road to 2073 with a connection being built to 2053. This short deviation from the Escalante road would provide a safer route for mountain bikes than the twisty road with blind corners and high speed full size vehicles. The trail would cross the river on main bridge and immediately turn left and follow 2313, 2461 and 2462 with a connection to Delta via 2352, 470 2476 and 2489. This area using borders of the northern most point of the Escalante Rim, south to the Rim Road then using 2354 as the border on the west, the main county road on the east and then back down to the rim above river on the north would provide an excellent mountain bike emphasis area for the Delta community. Visitors and local users could ride from town or drive a very short distance. Quiet Use trails are rare in this area and this topography would allow for a rewarding experience for hiker, horse and mountain bike users. This scenario would provide an area similar to the Lunch Loops and Mack Ridge areas. With a long distance rail anchoring a Quiet Use stack loop system of trails which are extremely popular and very beneficial to users and the community at trail at large

## Route: 2313

### Segment: 812

#### Designation [?](#)

##### Current Designation

Vehicles under 50" wide

##### Mitigation Criteria

- Reroute
- Needs Data - Cultural
- Special Species Plant

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- LANDS Access to non-federal lands
- LANDS Right of Way
- LANDS DMEA access route
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I moderate
- SMAs River Rims ACEC
- SMAs Wild and Scenic River area
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- SSPLANT Special Status Species Colorado hookless cactus

#### Rationale

##### Designation Criteria

- **Wilderness / Natural Area:** ACEC-River Rims close within 200m cactus
- **Recreation:** Rec opportunities – general, RMA objectives
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

Organization, commenter: Delta-Montrose Electric Association (DMEA)

Comment ID: 00000193-10

• 5. Since the BLM's route designations will become Implementation Decisions in the D-E NCA Comprehensive Travel and Transportation Management Plan (DRMP, page 22) it is critical that all of DMEA's access routes be accurately shown, and designated as 'Open' or 'Administrative Use Only' under all alternatives. This includes, but is not limited to, portions of the following numbered travel routes, as identified on the DENCA Draft RMP Route by Route Designation Figures (Figures N-1b\_Alt\_B\_CTMP; N-1c\_Alt\_C\_CTMP; N-1d\_Alt\_D\_CTMP; and N-1e\_Alt\_E\_CTMP): 2495, 2496, 2459, 2313, 2461, 2462 2352, 2470, 2476, 3192, 2035, 2336, 2342.6. Designation of DMEA's access routes as 'Open' or 'Administrative Use Only' is consistent with the BLM's guidelines for the Dominguez-Escalante National Conservation Area Draft Resource Management Plan and Environmental Impact Statement, April 2013 Appendix N Comprehensive Travel and Transportation Management Plan Route-by-Route Designation, which states: "Through the process of route-by-route designation, the interdisciplinary team established some guidelines that were applied across all four action alternatives (Alternatives B, C, D, and E) .... 5. Routes that are associated with, or provide primary access to, established right-of-ways were either designated as open or as limited to administrative use only." (pages 899 and 900).

Organization, commenter: Delta-Montrose Electric Association (DMEA)

Comment ID: 00000193-2

• Route Specific Comments 1. Among the RMP alternatives, the No Action Alternative is preferred by DMEA since it allows for the continued use of existing access routes for the maintenance, repair and replacement of existing distribution lines and poles. DMEA does

not believe there would be any significant impacts to the maintenance, repair or replacement of the existing distribution system and access routes, under the No Action Alternative. 2. Alternative B would result in significant impacts to DMEA's ability to maintain, repair, replace or upgrade portions of the existing distribution lines within the NCA planning area. Under this alternative a number of DMEA access routes would be closed (e.g. 2496, 2035) or limited to ATV use only (e.g. 2336). Access restrictions would severely harm DMEA's ability to operate and maintain existing electrical distribution facilities as required by federal laws governing electric cooperatives/suppliers, and in accordance with our established standards. For access and maintenance of facilities, in all cases DMEA is requesting the use of existing roads and when roads are not available, the use of right-of-way for access. 3. Alternative C would result in the majority of existing DMEA access routes being designated as 'Administrative Use Only' (e.g. 2496, 2495, 2462, 2461, 2459, 2313, 3192). Based on the assumption that as a BLM right-of-way grant holder DMEA would have 'Administrative Use' and be allowed continued access to our distribution lines, no significant impacts would occur with this designation. Significant impacts would occur, however, where access is denied due to 'Closed' travel routes (e.g. 2336). 4. Alternative D would result in the majority of DMEA's access routes being designated as 'Open' north of the Gunnison River (e.g. 2496, 2495), while the majority of DMEA's access routes south of the river would be designated as 'Bicycle' (e.g. 2461, 2462, 2459, and 2313). In addition, this alternative would also designate several of DMEA's access routes as either 'Closed' or 'Administration Use Only'. Significant negative impacts to DMEA and our customers served off these lines would occur when DMEA's access is unreasonably limited or denied. No significant impacts would be expected where access routes are designated as 'Open' or 'Administrative Use Only'. 5. Alternative E would result in significant impacts to DMEA's ability to maintain, repair and replace portions of the existing distribution lines within the NCA planning area. Under this alternative a number of DMEA access routes would be 'Closed' (e.g. 2496, 2463) or limited to 'ATV' use (e.g. 2461, 2462, 2459). Again, these limitations on access would not permit DMEA to continue operating and maintaining the existing electrical facilities in this area in accordance with federal regulations and DMEA's established standards. Significant and serious impacts would occur where access routes to DMEA's distribution lines are designated as 'Closed', or 'ATV'.

Comment ID: 00000135-28

- I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 2314

### Segment: 811

#### Designation ?

##### Current Designation

Admin/Permitted Use Only

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Range access for general livestock management
- LANDS Right of Way
- LANDS DMEA access route
- SOIL Soils Fragile
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- SMAs Wild and Scenic River area
- DENSITY Route density highest in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Minimize Damage:** Cactus – reduce density within 200m
- **Minimize Harassment:** PPSV- Minimize fragmentation

##### Rationale for Decision

- Route was designated to ensure access to rights-of-way, private property, and livestock grazing facilities.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open, seek re-route or mitigation

**Alternative C:** Admin/Permitted Use Only

**Alternative D:** Open (All modes of travel)

## Public Comments On Route: 2320

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 00000135-28

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

### Current Designation

Closed (Not Rehabbed)

### Designation Following Mitigation

Foot/Horse

### Mitigation Criteria

- Needs Data - SSS Plants

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- **Minimize Damage:** Cultural – SSR within 100m sites
- **Minimize Harassment:** PPSV- Minimize fragmentation, Bighorn – SSR -- summer range
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Public Comments On Route: 2322

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 00000135-28

- I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 2323

### Segment: 1074

#### Designation [?](#)

##### Current Designation

Open, seek re-route or mitigation

##### Mitigation Criteria

- Special Species Plant

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- WILDLIFE Pronghorn antelope winter concentration areas
- CULTURAL Cultural Indirect impact
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E
- SSPLANT Special Status Species Colorado hookless cactus

#### Rationale

##### Designation Criteria

- **No designation criteria for this route segment.**

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open, seek re-route or mitigation

## Public Comments On Route: 2323

Organization, commenter: Janice Shepherd

Comment ID: 00000106-178

- Given that the pronghorn winter concentration (map 3-15) overlaps with soils areas that are "not meeting" land health standards, could it be that if the area around the current winter concentration was closed to motorized/mechanized travel during the winter months (Nov April) that the pronghorn might naturally gravitate to the surrounding healthier land (slightly healthier)? I believe it would be a worthwhile experiment. The result might be a stronger pronghorn population. Routes 3139, 2323 and 3140 appear to be right beside the winter area and it might be helpful to the pronghorn population to close them. The County might be willing to consider a winter closure of their road on the north side of the area, as it might have two benefits the economic draw of watchable wildlife from a larger pronghorn population and saving maintenance from mud damages to their road.

## Route: 2324

### Segment: 3172

#### Designation [?](#)

##### Current Designation

Closed (Not Rehabbed)

##### Designation Following Mitigation

Foot/Horse

##### Mitigation Criteria

- Reroute
- Needs Data - SSS Plants

## Public Comments On Route: 2327

Organization, commenter: Quiet Trails Group, Sherry Schenk

Comment ID: 000000115-75

- Routes 2328, 2327, 2076, 4008, 2074: As long as there is not a conflicting resource use, QTG recommends leaving these routes open to horse and foot as it offers nice views into the canyon. Specifically, we are concerned about disturbance to any prairie dog town in the vicinity and would support re-routing any of these or any other trails that could hurt prairie dog habitat and colonies in the southern portion of this unit.

## Public Comments On Route: 2336

Organization, commenter: Thunder Mountain Wheelers ATV Club, Walt Blackburn

Comment ID: 00000001-13

• [SS: Regarding closure of trails pending mitigation] Specifically we refer to the Gunnison River trail and Gibley Gulch. The Gunnison river trail is the most popular OHV trail in the NCA. It passes by, at a safe distance, many old historical encampments and cultural displays. Such displays have been there undisturbed for decades. It appears that the only know cultural sites are NOT on BLM lands. According to the map they appear to be on the CP&W lands. With new and proper signage we see no reason these routes could not remain open without any user created problems. The Gunnison River trail has been in existence since pioneer days without any manifestation of resource, cultural or vegetation infractions. The route was there, way before CP&W acquired the lands that it now crosses

Organization, commenter: Thunder Mountain Wheelers, Mike Wilson

Comment ID: 000000157-8

• The temporary closure of the Gunnison river trail for whatever reason, because it crosses CPW land, or for other reasons, maybe because if a conflict with plant life does not seem justified. Until recently the Colorado fishing guide and regulation gave specific directions as how to access the Water Wheel Tract. As for protection of some plant that trail has been there, as a wagon road into Escalante canyon, a care road to same place, access for the power company to build the power line to the canyon, and for the last twenty or so years as a jeep road and ATV trail. For over 10 years Thunder Mountain Wheelers has maintained the portion that follows along the river. Two different Game Wardens have given verbal approval to me personally to maintain the trail. Several times both verbal and written requests have been presented to the Montrose Field Office for Thunder Mountain Wheelers to adopt the Gunnison River Trail. We have been ignored by BLM

Organization, commenter: Escalante Ranch, Richard Miller

Comment ID: 000000171-7

• IV. TRANSPORTATION AND TRAVEL MANAGEMENT Mr. Miller's owns various parcels of private property and multiple water diversions in the area in question, and must access these lands via roads and trails which currently cross public land. In addition, Mr. Miller must necessarily access various roads and trails to in the course of managing his livestock operation. The EIS proposes closing various roads and trails to public motorized travel, to minimize resource damage caused by the public on both public and private lands. EIS at 157, 187. Mr. Miller supports the BLM's proposal to restrict public access to private property, but only so long as he is not restricted from using these roads as may be necessary to access his private lands and manage his livestock operation. Thus, to the extent that the BLM wishes to close roads to motorized public traffic, it should simultaneously grant Mr. Miller legal, administrative access. In addition, Mr. Miller notes that he would be entitled to a formal decision, subject to appeal, prior to the BLM restricting access to his private property and/or otherwise impacting his livestock operation. Mr. Miller notes that the BLM has mis-classified many routes. See EIS Map N-1.e. Specifically, many routes which have historically been used to access private land and water diversions, and/or are necessary to maintain livestock improvements or otherwise manage and operate Mr. Miller's livestock operation, have been incorrectly labeled as closed or otherwise restricted in their use. These routes should be classified as "administrative," to recognize these historic uses and to allow for continued uses consistent therewith. The Routes which have been incorrectly classified and which should be classified as "administrative" are as follows: Routes 460, 1220, 1243, 1245, 2003, 2053, 2073, 2086, 2089, 2121, 2122, 2126, 2156, 2166, 2168, 2171-2172, 2177, 2180, 2336, 2342, 2354, 2408, 2412, 2445, 2581, 2582, 2583, 2585, 2587, 2588, 2590, 2591, 2593, 2595, 2596, 2598, 2599, 2612, 2613, 2622, 2691, 3011, 3048, 3070, 3131, 3141, and 3158. See EIS Map N-1.e. In addition, Route 2072 is not completely depicted on the map, in that it extends down the river, across BLM and private property, an additional 2-3 miles, and likewise Route 3048 extends an additional 0.75 miles and leads to private property. Id. Finally, Map N-1.e incorrectly labels Mr. Miller's privately owned bridge, which crosses the Gunnison River at the Bridgeport area, as "administrative." I d. Mr. Miller requests that the BLM correct these errors and mis-classifications.

Organization, commenter: Delta-Montrose Electric Association (DMEA)

Comment ID: 000000193-10

• 5. Since the BLM's route designations will become Implementation Decisions in the D-E NCA Comprehensive Travel and Transportation Management Plan (DRMP, page 22) it is critical that all of DMEA's access routes be accurately shown, and designated as 'Open' or 'Administrative Use Only' under all alternatives. This includes, but is not limited to, portions of the following numbered travel routes, as identified on the DENCA Draft RMP Route by Route Designation Figures (Figures N-1b\_Alt\_B\_CTMP; N-1c\_Alt\_C\_CTMP; N-1d\_Alt\_D\_CTMP; and N-1e\_Alt\_E\_CTMP): 2495, 2496, 2459, 2313, 2461, 2462, 2352, 2470, 2476, 3192, 2035, 2336, 2342.6. Designation of DMEA's access routes as 'Open' or 'Administrative Use Only' is consistent with the BLM's guidelines for the Dominguez-Escalante National Conservation Area Draft Resource Management Plan and Environmental Impact Statement, April 2013 Appendix N Comprehensive Travel and Transportation Management Plan Route-by-Route Designation, which states: "Through the process of route-by-route designation, the interdisciplinary team established some guidelines that were applied across all four action alternatives (Alternatives B, C, D, and E) .... 5. Routes that are associated with, or provide primary access to, established right-of-ways were either designated as open or as limited administrative use only." (pages 899 and 900).

Organization, commenter: Delta-Montrose Electric Association (DMEA)

Comment ID: 000000193-2

• Route Specific Comments 1. Among the RMP alternatives, the No Action Alternative is preferred by DMEA since it allows for the continued use of existing access routes for the maintenance, repair and replacement of existing distribution lines and poles. DMEA does not believe there would be any significant impacts to the maintenance, repair or replacement of the existing distribution system and access routes, under the No Action Alternative. 2. Alternative B would result in significant impacts to DMEA's ability to maintain, repair, replace or upgrade portions of the existing distribution lines within the NCA planning area. Under this alternative a number of DMEA access routes would be closed (e.g. 2496, 2035) or limited to ATV use only (e.g. 2336). Access restrictions would severely harm DMEA's ability to operate and maintain existing electrical distribution facilities as required by federal laws governing electric cooperatives/suppliers, and in accordance with our established standards. For access and maintenance of facilities, in all cases DMEA is requesting the use of existing roads and when roads are not available, the use of right-of-way for access. 3. Alternative C would result in the majority of existing DMEA access routes being designated as 'Administrative Use Only' (e.g. 2496, 2495, 2462, 2461, 2459, 2313, 3192). Based on the assumption that as a BLM right-of-way grant holder DMEA would have 'Administrative Use' and be allowed continued access to our distribution lines, no significant impacts would occur with this designation. Significant impacts would occur, however, where access is denied due to 'Closed' travel routes (e.g. 2336). 4. Alternative D would result in the majority of DMEA's access routes being designated as 'Open' north of the Gunnison River (e.g. 2496, 2495), while the majority of DMEA's access routes south of the river would be designated as 'Bicycle' (e.g. 2461, 2462, 2459, and 2313). In addition, this alternative would also designate several of DMEA's access routes as either 'Closed' or 'Administrative Use Only'. Significant negative impacts to DMEA and our customers served off these lines would occur when DMEA's access is unreasonably limited or denied. No significant impacts would be expected where access routes are designated as 'Open' or 'Administrative Use Only'. 5. Alternative E would result in significant impacts to DMEA's ability to maintain, repair and replace portions of the existing distribution lines within the NCA planning area. Under this alternative a number of DMEA access routes would be 'Closed' (e.g. 2496, 2463) or limited to 'ATV' use (e.g. 2461, 2462, 2459). Again, these limitations on access would not permit DMEA to continue operating and maintaining the existing electrical facilities in this area in accordance with federal regulations and DMEA's established standards. Significant and serious impacts would occur where access routes to DMEA's distribution lines are designated as 'Closed', or 'ATV'.

• The following high value recreational routes/roads are legal RS 2477 ROW's in the State of Colorado, Mesa County and the BLM does not have the jurisdiction to close them: 500, 472, 518, 521, 530, 39, 127, 572, 566, 66, 65, 148, 71, 74, 587, 595, 608, 622, 628, 635, 624, 609, 611, 706, 678, 700, 719, 726, 696, 26, 936, 847, 849, 919, 767, 824, 96, 822, 817, 950, 1021, 900, 2682, 1020, 1003, 1084, 1142, 1184, 1156, 1198, 1349, 1308, 1310, 1238, 1263, 1122, 1170, 1192, 974, 941, 1076, 1039, 1018, 1759, 1764, 1758, 1174, 1788, 1798, 1669, 1699, 1773, 1755, 1779, 1750, 1751, 1792, 1720, 1726, 1727, 1720, 1722, 1803, 1805, 1809, 1614, 1609, 1605, 1608, 1571, 1526, 1516, 1448, 755, 807, 900, 10, 48, 924, 950, 1005, 965, 8, 1115, 981, 984, 1135, 2678, 1249, 1171, 1150, 1249, 1320, 1235, 1236, 1228, 1227, 1409, 1456, 1349, 1308, 1513, 1221, 1550, 1567, 1641, 1612, 1740, 1688, 2597, 2598, 2601, 2440, 3160, 3162, 2089, 2166, 2170, 2596, 2171, 2003, 2122, 2126, 2189, 3145, 2182, 2179, 2178, 3143, 2181, 2121, 2122, 2168, 2126, 2180, 2095, 2173, 2174, 2620, 2129, 1686, 1692, 1667, 1647, 1631, 1613, 1596, 1549, 1541, 2647, 1633, 1605, 1608, 1571, 2645, 1507, 1448, 1496, 1516, 1504, 1510, 1508, 1509, 439, 431, 456, 461, 460, 391, 423, 415, 419, 407, 402, 367, 372, 339, 298, 338, 105, 368, 374, 393, 389, 390, 376, 377, 351, 350, 121, 345, 320, 301, 251, 234, 232, 205, 344, 107, 103, 152, 153, 161, 168, 3199, 188, 196, 255, 254, 236, 294, 242, 219, 201, 169, 162, 158, 160, 173. The following high value recreational routes/roads are legal RS 2477 ROW's in the State of Colorado, Delta County, and the BLM does not have the jurisdiction to close them: 3011, 2184, 2191, 3100, 2187, 2026, 2059, 2188, 2192, 3104, 2130, 3009, 2199, 2200, 2111, 2223, 2024, 3006, 2231, 3094, 2579, 2210, 2344, 2243, 2249, 2248, 3074, 2354, 2384, 2296, 2295, 2287, 2304, 2062, 2163, 3163, 2164, 2430, 4006, 3016, 2351, 3140, 2410, 4008, 2324, 2073, 2306, 2459, 3192, 3193, 2350, 2443, 2035, 2336, 2495, 2491, 2159, 3058, 2277, 2465, 2467, 3189, 2472, 2297, 2006, 2265, 2271, 2276, 2135, 2139, 3053, 2489, 3033, 3057, 2031, 2276, 2210, 2579, 2136, 2344, 3164, 2400, 2379, 3014, 2365, 3116, 2251, 2259, 2149, 2153, 2146, 2144, 2145, 2356, 2257, 2048, 2358, 3165, and 3166.

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 2337

### Segment: 889

#### Designation [?](#)

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- LANDS Right of Way
- WILDLIFE Mule deer severe winter range
- RIPARIAN Riparian crossing perennial stream
- CULTURAL Cultural Indirect impact
- SMAs River Rims ACEC
- SMAs Wild and Scenic River area
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- SSPLANT Special Status Species Colorado hookless cactus

#### Rationale

##### Designation Criteria

- **Minimize Damage:** Cactus – reduce density within 200m
- **Minimize Harassment:** PPSV- Minimize fragmentation
- **Wilderness / Natural Area:** ACEC-River Rims close within 200m cactus

##### Rationale for Decision

- Route was designated to reduce the density of routes within 200 meters of known Colorado hookless Cactus occurrences.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect Colorado hookless cactus within the River Rims ACEC

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Admin/Permitted Use Only

## Public Comments On Route: 2337

- SMAs Wild and Scenic River area
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- SSPLANT Special Status Species Colorado hookless cactus

#### Rationale

##### Designation Criteria

- Minimize Damage:** Cactus – reduce density within 200m
- Wilderness / Natural Area:** ACEC-River Rims close within 200m cactus
- Recreation:** Rec opportunities – general
- Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Admin/Permitted Use Only

**Alternative C:** Open, seek re-route or mitigation

**Alternative D:** Open, seek re-route or mitigation

## Public Comments On Route: 2342

Organization, commenter: Escalante Ranch, Richard Miller

Comment ID: 000000171-7

• IV. TRANSPORTATION AND TRAVEL MANAGEMENT Mr. Miller's owns various parcels of private property and multiple water diversions in the area in question, and must access these lands via roads and trails which currently cross public land. In addition, Mr. Miller must necessarily access various roads and trails to in the course of managing his livestock operation. The EIS proposes closing various roads and trails to public motorized travel, to minimize resource damage caused by the public on both public and private lands. EIS at 157, 187. Mr. Miller supports the BLM's proposal to restrict public access to protect public and private property, but only so long as he is not restricted from using these roads as may be necessary to access his private lands and manage his livestock operation. Thus, to the extent that the BLM wishes to close roads to motorized public traffic, it should simultaneously grant Mr. Miller legal, administrative access. In addition, Mr. Miller notes that he would be entitled to a formal decision, subject to appeal, prior to the BLM restricting access to his private property and/or otherwise impacting his livestock operation. Mr. Miller notes that the BLM has mis-classified many routes. See EIS Map N -1 e. Specifically, many routes which have historically been used to access private land and water diversions, and/or are necessary to maintain livestock improvements or otherwise manage and operate Mr. Miller's livestock operation, have been incorrectly labeled as closed or otherwise restricted in their use. These routes should be classified as "administrative," to recognize these historic uses and to allow for continued uses consistent therewith. The routes which have been incorrectly classified and which should be classified as "administrative" are as follows: Routes 460, 1220, 1243, 1245, 2003, 2053, 2073, 2086, 2089, 2121, 2122, 2126, 2156, 2166, 2168, 2171 ~ 2172, 2177, 2180, 2336, 2342, 2354, 2408, 2412, 2445, 2581, 2582, 2583, 2585, 2587, 2588, 2590, 2591, 2593, 2595, 2596, 2598, 2599, 2612, 2613, 2622, 2691, 3011, 3048, 3070, 3131, 3141, and 3158. See EIS Map N-1e. In addition, Route 2072 is not completely depicted on the map, in that it extends down the river, across BLM and private property, an additional 2-3 miles, and likewise Route 3048 extends an additional 0.75 miles and leads to private property. Id. Fina Uy, Map N-1e incorrectly labels Mr. Miller's privately owned bridge, which crosses the Gunnison River at the Bridgeport area, as "administrative." I d. Mr. Miller requests that the BLM correct these errors and mis-classifications.

Organization, commenter: Delta-Montrose Electric Association (DMEA)

Comment ID: 000000193-10

• 5. Since the BLM's route designations will become Implementation Decisions in the D-E NCA Comprehensive Travel and Transportation Management Plan (DRMP, page 22) it is critical that all of DMEA's access routes be accurately shown, and designated as 'Open' or 'Administrative Use Only' under all alternatives. This includes, but is not limited to, portions of the following numbered travel routes, as identified on the DENCA Draft RMP Route by Route Designation Figures (Figures N-1b, Alt\_B\_CTMP; N-1c, Alt\_C\_CTMP; N-1d, Alt\_D\_CTMP; and N-1e, Alt\_E\_CTMP): 2495, 2496, 2459, 2313, 2461, 2462, 2352, 2470, 2476, 3192, 2035, 2336, 2342.6. Designation of DMEA's access routes as 'Open' or 'Administrative Use Only' is consistent with the BLM's guidelines for the Dominguez-Escalante National Conservation Area Draft Resource Management Plan and Environmental Impact Statement, April 2013 Appendix N Comprehensive Travel and Transportation Management Plan Route-by-Route Designation, which states: "Through the process of route-by-route designation, the interdisciplinary team established some guidelines that were applied across all four action alternatives (Alternatives B, C, D, and E) ... 5. Routes that are associated with, or provide primary access to, established right-of-ways were either designated as open or as limited to administrative use only." (pages 899 and 900).

Comment ID: DENCA-1-21111-1

• Road 2342 Designation - Administrative Comment Number: 1 Comment Title: Road 2342 Designation - Administrative Comment: I hunt around Escalante Canyon Road a lot. I use road 2342 to get to my hunting destination. While it is but a short road, the road is

critical to access an excellent duck hunting spot. I've tried to walk in from Escalante Canyon Road. The problem is you either spook the ducks trying to lumber along in wadders or you end up falling a few times trying to walk with wadders and duck decoys. The road is very important to me so I can get to my absolute favorite duck hunting spot. Access on the other side of the river is even more problematic. This road is the best access to that duck hunting. Oh, and don't tell anybody else about my duck hunting spot. I do hope you keep this road in the inventory.

Comment ID: 00000115-67

• [Wagon Park/Sawmill Mesa (South) TMP-Level Comments: Quiet Trails Group supports the management decisions shown in Alternative E for the southern Sawmill Mesa area with the following specific suggestions:] Route 2024: We support closing 2024 as it appears to be a duplicative route. The surrounding routes 2578-3006-2232-2231 and 2579-3108-2210-2344 connect to Forest Service trails. If there are cattle or other uses for this road not shown on the map, we would support an administrative designation. Otherwise we would like to see 2024 closed to reduce route density in the area because of the presence of big game. We also see that these routes stop at the Dry Fork LWC unit; we would urge the BLM to make sure there is a topographical or physical barrier to stop motorized access into the LWC. Please put signage back at the Forest Boundary that the routes dead-end ahead.

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 00000135-24

• Black Point Draw/Black Point Three routes between Dry Mesa and the CDOW road leading north east to Cactus Park are redundant and unnecessarily fragmenting. 2579-2210-2344 is recently pioneered and should be closed immediately, along with its spurs 2136, 2209, 2208 and 3094. These encroach on a relatively wild Escalante Creek canyon and have had no traditional or long-term use or purpose. 2024 and 3006 are parallel and duplicative, provide the same experience as each other, and should be reduced to one route. The BLM should decide which route is the least damaging, and disturbing to wildlife, and easiest to enforce, and close the other one

Comment ID: 00000135-28

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 2345

Admin/Permitted Use Only

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- LANDS Access to non-federal lands
- WILDLIFE Mule deer severe winter range
- RIPARIAN Riparian crossing perennial stream
- CULTURAL Cultural Class I moderate
- SMAs Wild and Scenic River area
- DENSITY Route density low in Alt A
- DENSITY Route density low in Alt E
- SSPLANT Special Status Species Colorado hookless cactus

## Rationale

### Designation Criteria

- **No designation criteria for this route segment.**

### Rationale for Decision

- Route was designated to ensure access to rights-of-way, private property, and livestock grazing facilities.

## Previous Alternatives Analyzed

**Alternative A:** Admin/Permitted Use Only

**Alternative B:** Admin/Permitted Use Only

**Alternative C:** Open, seek re-route or mitigation

**Alternative D:** Open, seek re-route or mitigation

## Public Comments On Route: 2348

- No public comments for this Route

## Route: 2349

### Segment: 863

## Designation

### Current Designation

Open (All modes of travel)

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- LANDS Right of Way
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

### Rationale

#### Designation Criteria

- No designation criteria for this route segment.

#### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open (All modes of travel)

**Alternative C:** Admin/Permitted Use Only

**Alternative D:** Admin/Permitted Use Only

## Public Comments On Route: 2349

Organization, commenter: Desert Ecosystem Analysis and Restoration, Eric Rechel

Comment ID: 000000109-10

- Need to close roads that approach prairie dog colonies or make them administrative or have seasonal closures, i.e., in the spring. Examples are roads 2350 and 2349 in the Hunting ground and road 3140

## Route: 235

### Segment: 2520

#### Designation ?

##### Current Designation

Open (All modes of travel)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E
- SSPLANT Special Status Species Colorado hookless cactus

### Rationale

#### Designation Criteria

- No designation criteria for this route segment.

#### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Vehicles under 50" wide

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 235

- No public comments for this Route

## Route: 2350

### Segment: 940

#### Designation ?

##### Current Designation

Open, seek re-route or mitigation

##### Mitigation Criteria

- Special Species Plant
- Riparian

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- RANGE Range access for general livestock management
- LANDS Right of Way
- SOIL Soils Steep Slopes 40%
- SOIL Soils Fragile
- WILDLIFE Pronghorn antelope winter concentration areas
- RIPARIAN Riparian 3 stream crossings
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- SSPLANT Special Status Species Colorado hookless cactus

## Rationale

### Designation Criteria

- No designation criteria for this route segment.

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Route: 2351

### Segment: 3009

#### Designation

##### Current Designation

Foot/Horse

##### Mitigation Criteria

- Reroute
- Interpretation

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- SOIL Soils Steep Slopes 40%
- SOIL Soils Fragile
- WILDLIFE Pronghorn antelope winter concentration areas
- RIPARIAN Riparian 3 stream crossings

- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I low
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- **Minimize Damage:** NHT – close routes for setting
- **Minimize Harassment:** Pronghorn - Close and rehab - wincon
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Foot/Horse/Mechanized/Motorcycle

**Alternative B:** Open, seek re-route or mitigation

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 2351

Organization, commenter: COHVCO, James Solomon  
/Mechanized/Motorcycle

Comment ID: 000000065-19

• There is currently 12 miles of single track trail on the South end of the Hunting ground that starts at Escalante Canyon Road. This trail as depicted in Alternative (D) appears to be designated Bicycle. This trail should be designated motorized single track as well. It is used by riders from Montrose, Delta, and the Grand Valley. This area has great potential for further trail development because a motorcycle needs about 35-50 miles of trail, depending on the difficulty of the terrain. The terrain in this area is of a rolling moderated difficulty, therefore a need to add trail and tighten up the existing trail to slow the riders down.

## Route: 2352

### Segment: 769

## Designation

### Current Designation

Open, seek re-route or mitigation

### Mitigation Criteria

- Special Species Plant
- Riparian. Steep slopes issue; ensure a maintenance priority.

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- LANDS Access to non-federal lands
- LANDS Right of Way
- LANDS DMEA access route
- SOIL Soils Steep Slopes 40%
- WILDLIFE Mule deer severe winter range
- RIPARIAN Riparian 1 stream crossing
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I low
- SMAs River Rims ACEC
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

- SSPLANT Special Status Species Colorado hookless cactus

## Rationale

### Designation Criteria

- **No designation criteria for this route segment.**

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open, seek re-route or mitigation

**Alternative C:** Closed, seek re-route or mitigation

**Alternative D:** Admin/Permitted Use Only

## Public Comments On Route: 2352

Organization, commenter: COPMOBA, Scott Winans

Comment ID: 000000168-2

• Hunting GroundsIn the Hunting Grounds area, a longer distance trail similar to Kokopelli's, Tabeguache, and Paradox Trails, would be of interest to this user group[COPMOBA]. Starting at the Old Spanish Trail in Orchard Mesa and ending in Delta, this trail idea is currently feasible when using a mix of single track, ATV width trail, jeep road and even Highway 50 for a few short sections. With very little trail construction making some connections to existing trails, nearly all of this highway use can be avoided. The major attraction of this area is the views from the rim above the Gunnison River in both directions. The existing trail and any trail construction should be routed to take advantage of this valuable view resource.The following recommendations are in the spirit of developing this long distance trail.Starting from the Kannah Creek area we recommend leaving 152 open to mountain bike use for a possible future connection to the lower Kannah Creek road. Possibilities included deeded access across private land, or new construction from the existing small portion of BLM land which the road accesses. Continuing, use existing full size and ATV trail to the end of 440, or a portion of 431 ,to access small drainage and then construct new trail to access Bridgeport Road. Then use 438, 449 and 2163 to access 2426 and 2427 to Dominguez Road (or 3098 and 3163 and then a very short new connector to 3133 out to highway) From Dominguez Road use 4000 to 3043, then single track 4001,4005,4006,4007 and 3148 to reach Escalante Road. Very nice vi ews ex ist in this area from the trail. The trail would then cross Escalante road to 2073 with a connection being built to 2053. This short deviation from the Escalante road would provide a safer route for mountain bikes than the twisty road with blind comers and high speed full size vehicles. The trail would cross the river on main bridge and immediatel y turn left and follow 2313, 2461 and 2462 with a connection to Delta via 2352, 470 2476 and 2489. This area using borders of the northern most point of the Escalante Rim, south to the Rim Road then using 2354 as the border on the west, the main county road on the east and then back down to the rim above river on the north would provide an xcellent mountain bike emphasis area for the Delta community. Visitors and local users could ride from town or drive a very short distance. Quiet Use trails are rare in this area and this topography would allow for a rewarding experience for hiker, horse and mountain bike users. This scenario would provide an area similar to the Lunch Loops and Mack Ridge areas. With a long distance rail anchoring a Quiet Use stack loop system of trails which are extremely popular and very beneficial to users and the community at trail at large

• 5. Since the BLM's route designations will become ImplementationDecisions in the D-E NCA Comprehensive Travel and TransportationManagement Plan (DRMP, page 22) it is critical that all of DMEA's accessroutes be accurately shown, and designated as 'Open' or 'AdministrativeUse Only' under all alternatives. This includes, but is not limited to,portions of the following numbered travel routes, as identified on theDENCA Draft RMP Route by Route Designation Figures (Figures N-1b\_Alt\_B\_CTMP; N-1c\_Alt\_C\_CTMP; N-1d\_Alt\_D\_CTMP; and N-1e\_AltE\_CTMP ): 2495, 2496, 2459, 2313, 2461, 2462 2352, 2470, 2476, 3192,2035, 2336, 2342.6. Designation of DMEA's access routes as 'Open' or 'Administrative UseOnly' is consistent with the BLM's guidelines for the Dominguez-EscalanteNational Conservation Area Draft Resource Management Plan andEnvironmental Impact Statement, April 2013 Appendix N ComprehensiveTravel and Transportation Management Plan Route-by-Route Designation,which states:"Through the process of route-by-route designation, theinterdisciplinary team established some guidelines that were appliedacross all four action alternatives (Alternatives B, C, D, and E) ...5. Routes that are associated with, or provide primary access to,established right-ofways were either designated as open or as limitedto administrative use only." (pages 899 and 900).

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness.Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources.As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use.The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles.What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures.All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 2353

### Segment: 487

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- **Minimize Damage:** Geo/paleo – SSR in key sites
- **Minimize Harassment:** Raptor Potential Habitat, PPSV- Minimize fragmentation, Bighorn – SSR -- summer range

### Rationale for Decision

- Route was designated to protect geologic and paleontologic resources.
- Route was designated to protect potential raptor habitat
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to reduce the miles of motorized and mechanized routes in bighorn sheep habitat.

Comment ID: 000000156-22

• Within the Sawmill Mesa area we are very pleased to see the establishment of two major horse & foot trails in the area. Route 2243/2244/2248/2249 provides access into the Dry Fork of Escalante Canyon. This canyon provides excellent opportunities for hiking, backpacking, backcountry hunting, horseback riding, exploring, and other quiet use recreation. Route 2377/2376/2353/2354/2399 in the Escalante Rim area also provides opportunities for these activities in an area that provides excellent solitude. We fully support the designation of these routes as being open to horse and foot travel only.

• Specific Routes Designated as Closed or Re-designated: 1. The route identified as 2354 on the "Route by Route Designations Alternative E Map" has been identified as a horse trail but is a well traveled motorized/multiple use trail. I strongly disagree with the re-designation of this trail to horseback/hikers only. These user groups are free to utilize almost every acre of the D-E NCA as you acknowledged in the RMP. This is a very popular ATV and motorcycle trail that provides access between Escalante Rim Road and Sawmill Mesa Road. The trail is relatively easy to travel and is appreciated by those with disabilities. The trail offers excellent riding opportunities as well as outstanding views of the canyon. This trail should remain open to motorized use. I've never seen a horse back rider or

hiker on this trail, but I have seen bicyclists, ATV's and motorcyclists. There is not enough recreational pressure in the D-E NCA to justify limiting the few quality multiple use trails like this one to horse/hikers only.

• [Wagon Park/Sawmill Mesa (South) TMP-Level Comments:Quiet Trails Group supports the management decisions shown in Alternative E for the southern Sawmill Mesa area with the following specific suggestions:]Routes 3181-2399-2398-2354-2029-2376-2377-2378-2383-2382-2380: We would like to see these routes open to mechanical use (mountain biking) as it would create a bike loop system connecting Escalante Rim Rd to Sawmill Mesa Rd down to the northeast boundary of the NCA. We believe this area has the potential to provide a dynamic bicycling experience with trails of a variety of lengths and difficulties that lead to beautiful views and are easily accessible from Delta.

Comment ID: 00000157-11

• In specific changes on the plan E the closure of the rim road to motorized by the Dry Fork of Escalante which is shown to be now a horse trail. I talked to a good number of horse people early on and was told that they did not want specified trails and that they would ride where ever they wanted. This is a very heavily used road by jeeps ,Pickups ATVs and some other users. Very little use by horse or hickers is seen on the road

Possibilities included deeded access across private land, or new construction from the existing small portion of BLM land which the road accesses. Continuing, use existing full size and ATV trail to the end of 440, or a portion of 431, to access small drainage and then construct new trail to access Bridgeport Road. Then use 438, 449 and 2163 to access 2426 and 2427 to Dominguez Road (or 3098 and 3163 and then a very short new connector to 3133 out to highway) From Dominguez Road use 4000 to 3043, then single track 4001,4005,4006,4007 and 3148 to reach Escalante Road. Very nice vi e ws ex ist in this area from the trail. The trail would then cross Escalante road to 2073 with a connection being built to 2053. This short deviation from the Escalante road would provide a safer route for mountain bikes than the twisty road with blind comers and high speed full size vehicles. The trail would cross the river on main bridge and immediatel y turn left and follow 2313, 2461 and 2462 with a connection to Delta via 2352, 470 2476 and 2489. This area using borders of the northern most point of the Escalante Rim, south to the Rim Road then using 2354 as the border on the west, the main county road on the east and then back down to the rim above river on the north would provide an xcellent mountain bike emphasis area for the Delta community. Visitors and local users could ride from town or drive a very short distance. Quiet Use trails are rare in this area and this topography would allow for a rewarding experience for hiker, horse and mountain bike users. This scenario would provide an area similar to the Lunch Loops and Mack Ridge areas. With a long distance rail anchoring a Quiet Use stack loop system of trails which are extremely popular and very beneficial to users and the community at trail at large

Comment ID: 00000171-7

• IV. TRANSPORTATION AND TRAVEL MANAGEMENTMr. Miller's owns various parcels of private property and multiple water diversions in thearea in question, and must access these lands via roads and trails which currently cross publicland. In addition, Mr. Miller must necessarily access various roads and trails to in the course ofmanaging his livestock operation. The EIS proposes closing various roads and trails to publicmotorized travel, to minimize resource damage caused by the public on both public and privatelands. EIS at 157, 187. Mr. Miller supports the BLM's proposal to restrict public access toprotect public and private property, but only so long as he is not restricted from using these roads as may be necessary to access his private lands and manage his livestock operation. Thus, to the extent that the BLM wishes to close roads to motorized public traffic, it should simultaneously grant Mr. Miller legal, administrative access. In addition, Mr. Miller notes that he would be entitled to a formal decision, subject to appeal, prior to the BLM restricting access to his private property and/or otherwise impacting his livestock operation.Mr. Miller notes that the BLM has mis-classified many routes. See EIS Map N -1 e.Specifically, many routes which have historically been used to access private land and waterdiversions, and/or are necessary to maintain livestock improvements or otherwise manage andoperate Mr. Miller's livestock operation, have been incorrectly labeled as closed or otherwise restricted in their use. These routes should be classified as "administrative," to recognize thesehistoric uses and to allow for continued uses consistent therewith. The Routes which have beenincorrectly classified and which should be classified as "administrative" are as follows:Routes460, 1220,1243,1245,2003,2053,2073,2086,2089,2121,2122,2126,2156,2166,2168,2171~2172,2177,2180,2336,2342,2354,2408,2412,2445,2581,2582,2583,2585,2587,2588,2590,2591,2593,2595,2596,2598,2599,2612,2613,2622,2691,3011,3048,3070,3131,3141,and3158.See EIS Map N-1e. In addition, Route 2072 is not completely depicted on the map, in that itextends down the river, across BLM and private property, an additional2-3 miles, and likewiseRoute 3048 extends an additional 0.75 miles and leads to private property. Id. FinaUy, Map N-1e incorrectly labels Mr. Miller's privately owned bridge, which crosses the Gunnison River atthe Bridgeport area, as "administrative." I d. Mr. Miller requests that the BLM correct theseerrors and mis-classifications.

• The following high value recreational routes/roads are legal RS 2477 ROW's in the State of Colorado, Mesa County and the BLM does not have the jurisdiction to close them: 500, 472, 518, 521, 530, 39, 127, 572, 566, 66, 65, 148, 71, 74, 587, 595, 608, 622, 628, 635, 624, 609, 611, 706, 678, 700, 719, 726, 696, 26, 936, 847, 849, 919, 767, 824, 96, 822, 817, 950, 1021, 900, 2682, 1020, 1003, 1084, 1142, 1184, 1156, 1198, 1349, 1308, 1310, 1238, 1263, 1122, 1170, 1192, 974, 941, 1076, 1039, 1018, 1759, 1764, 1758, 1174, 1788, 1798, 1669, 1699, 1773, 1755, 1779, 1750, 1751, 1792, 1720, 1726, 1727, 1720, 1722, 1803, 1805, 1809, 1614, 1609, 1605, 1608, 1571, 1526, 1516, 1448, 755, 807, 900, 10, 48, 924, 950, 1005, 965, 8, 1115, 981, 984, 1135, 2678, 1249, 1171, 1150, 1249, 1320, 1235, 1236, 1228, 1227, 1409, 1456, 1349, 1308, 1513, 1221, 1550, 1567, 1641, 1612, 1740, 1688, 2597, 2598, 2601, 2440, 3160, 3162, 2089, 2166, 2170, 2596, 2171, 2003, 2122, 2126, 2189, 3145, 2182, 2179, 2178, 3143, 2181, 2121, 2122, 2168, 2126, 2180, 2095, 2173, 2174, 2620, 2129, 1686, 1692, 1667, 1647, 1631, 1613, 1596, 1549, 1541, 2647, 1633, 1605, 1608, 1571, 2645, 1507, 1448, 1496, 1516, 1504, 1510, 1508, 1509, 439, 431, 456, 461, 460, 391, 423, 415, 419, 407, 402, 367, 372, 339, 298, 338, 105, 368, 374, 393, 389, 390, 376, 377, 351, 350, 121, 345, 320, 301, 251, 234, 232, 205, 344, 107, 103, 152, 153, 161, 168, 3199, 188, 196, 255, 254, 236, 294, 242, 219, 201, 169, 162, 158, 160, 173. The following high value recreational routes/roads are legal RS 2477ROW's in the State of Colorado, Delta County, and the BLM does not have the jurisdiction to close them: 3011, 2184, 2191, 3100, 2187, 2026, 2059, 2188, 2192, 3104, 2130, 3009, 2199, 2200, 2111, 2223, 2024, 3006, 2231, 3094, 2579, 2210, 2344, 2243, 2249, 2248, 3074, 2354, 2384, 2296, 2295, 2287, 2304, 2062, 2163, 3163, 2164, 2430, 4006, 3016, 2351, 3140, 2410, 4008, 2324, 2073, 2306, 2459, 3192, 3193, 2350, 2443, 2035, 2336, 2495, 2491, 2159, 3058, 2277, 2465, 2467, 3189, 2472, 2297, 2006, 2265, 2271, 2276, 2135, 2139, 3053, 2489, 3033, 3057, 2031, 2276, 2210, 2579, 2136, 2344, 3164, 2400, 2379, 3014, 2365, 3116, 2251, 2259, 2149, 2153, 2146, 2144, 2145, 2356, 2257, 2048, 2358, 3165, and 3166.

## Route: 2355

### Segment: 550

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I moderate
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- **Minimize Damage:** Geo/paleo – SSR in key sites, Cactus – reduce density within 200m
- **Minimize Harassment:** Sage-Minimize fragmentation, Bighorn – SSR -- summer range, PPSV- Minimize fragmentation

### Rationale for Decision

- Route was designated to protect geologic and paleontologic resources.
- Route was designated to reduce the density of routes within 200 meters of known Colorado hookless Cactus occurrences.
- Route was designated to reduce fragmentation of sagebrush patches
- Route was designated to reduce the miles of motorized and mechanized routes in bighorn sheep habitat.
- Route was designated to reduce fragmentation in Priority Vegetation types

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 2355

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 000000135-28

- I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 2356

### Segment: 97

#### Designation

##### Current Designation

Open (All modes of travel)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- SOIL Soils Fragile
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I low
- SMAs Lands with wilderness characteristics
- DENSITY Route density medium in Alt A
- DENSITY Route density medium in Alt E

## Rationale

### Designation Criteria

- **No designation criteria for this route segment.**

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 2358

### Segment: 275

#### Designation

##### Current Designation

Open (All modes of travel)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- SOIL Soils Steep Slopes 40%
- SOIL Soils Fragile
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- No designation criteria for this route segment.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open, seek re-route or mitigation

**Alternative C:** Closed (Rehab)

**Alternative D:** Open, seek re-route or mitigation

What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 2359

### Segment: 215

#### Designation ?

##### Current Designation

Admin/Permitted Use Only

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- SOIL Soils Fragile
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Indirect impact
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches <60 acres

#### Rationale

##### Designation Criteria

- Minimize Damage:** Cultural – SSR within 100m sites
- Minimize Harassment:** Sage-Minimize fragmentation

##### Rationale for Decision

- Route was designated to ensure access to rights-of-way, private property, and livestock grazing facilities.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Not Rehabbed)

**Alternative D:** Closed (Not Rehabbed)

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 236

## Segment: 2586

### Designation

#### Current Designation

Open, seek re-route or mitigation

#### Mitigation Criteria

- Riparian

#### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- RIPARIAN Riparian 1 stream crossing
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

### Rationale

#### Designation Criteria

- No designation criteria for this route segment.

#### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

### Previous Alternatives Analyzed

• Road 168: This road leads to a unique lookout with a beautiful view of Kannah Creek meeting the Gunnison. In the summer we travel this road by ATV, and in the winter's cold we travel this frozen road in a Jeep. We've been out to this point three times in the last 9 months always with friends or neighbors. It is a great destination in a Jeep for a sunny, winter afternoon wiener roast. Once again, with all the above as background, I recommend that road 168 remain open to Jeeps. Access to 168 is by roads 196 and a portion of 183. From the junction of 236 and 254 use 196. Connect to the northern portion of 183 which is between 196 and 168. I recommend that 196 and the northern portion of 183 remain open to Jeeps. I do support the ATV designation for 183 south of the 183/196 junction. I also support the ATV designation for 255 along the rim north of its junction with 254.

## Route: 2360

### Segment: 207

### Designation

#### Current Designation

Admin/Permitted Use Only

#### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

#### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands

- SOIL Soils Fragile
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk severe winter range
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches >60 acres

## Rationale

### Designation Criteria

- **Minimize Harassment:** Sage-Minimize fragmentation

### Rationale for Decision

- Route was designated to ensure access to rights-of-way, private property, and livestock grazing facilities.

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 2363

### Segment: 203

#### Designation

##### Current Designation

Open, seek re-route or mitigation

### Mitigation Criteria

- Reroute
- move to the edge of Sagebrush park

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- SOIL Soils Steep Slopes 40%
- SOIL Soils Fragile
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk severe winter range
- RIPARIAN Riparian 1 stream crossing
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches <60 acres

## Rationale

### Designation Criteria

- **No designation criteria for this route segment.**

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 2366

### Segment: 122

#### Designation ?

##### Current Designation

Open, seek re-route or mitigation

##### Mitigation Criteria

- Riparian

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- SOIL Soils Fragile
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk severe winter range
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches <60 acres

#### Rationale

##### Designation Criteria

- No designation criteria for this route segment.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open (All modes of travel)

**Alternative C:** Open (All modes of travel)

**Alternative D:** Open (All modes of travel)

## Public Comments On Route: 2366

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 00000135-28

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Public Comments On Route: 2370

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 000000135-26

• Cottonwood Creek This creek is a rare example of an almost completely unroaded, untrailed stream corridor for most of its length until it reaches Roubideau Creek and the Gunnison River. Unplanned, damaging routes along Cottonwood Creek upstream near the Forest Service boundary should all be closed to create an undisturbed full stretch of riparian corridor. Randomly created routes needing closure are: 2152, 2149, 2147, 2148, 2439, 2153, 2154, 2156. Closing these routes would restore a relatively intact watershed. Routes needing closure at the northern end of Cottonwood Creek, for the same reason, are: 3087, 3088, 3082, 3083, 3080, 3015, 2370, 2089, 2100, 3079, 3047, 2396, 2013, 3128, 3169, 2014, 2162, 2160, 2493, 3005. Some of these routes spur off 25 Mesa Road and do not actually enter the Cottonwood Creek drainage, but most if not all are not purposely created, not planned, are randomly scarring the landscape, and are introducing difficult to enforce ORV use. Only a few, if any should be left open, that have an overriding need and purpose. All the user-created routes descending into Cottonwood Creek should be closed, including 2100, 2370, 2099, and the whole tangle of routes 3169, etc etc

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 000000135-27

• Orchard Point, Stone Basin recommended closures Fragmenting, random routes needing closure north of Peach Orchard Point and Grade Gulch are 2261, 2260, 2251, 3117, 2114, 2365, 3116, 3114, 2362, 2048, 2238, 2236, 2237, 3113, , 2239, 2359, 2049, 2358, 2105, 3115, 2363, 2367, 2369, 2103, 3074, 3078, 2229, 2045, 3112, 3165, 3166, 2104, 2363, 2360, 2367, 2369, 3165, 2375, 2388, 3007, 2391, 2117, 2381, 2118, 3174, 2030, 3178, 2056, 3072, 2394, 3155, 3156, 2490, 3171, 2099, 3070, 3047, 2013, 3172, 2409. Recommended closures near the Narrows: 3047, 2396, 2013, 3128, 2014, 3169, 3005, 2162, 2160, 2493, 3005, 2099, 2370. Kelso Gulch needed closures are 3092, 3157, 2301, 3057, 2031, 3026, 3024, 3170, 3167, 3060, 3061, 2087, 3158, 2490, 3172, 3014

• [Wagon Park/Sawmill Mesa (South) TMP-Level Comments:Quiet Trails Group supports the management decisions shown in Alternative E for the southern Sawmill Mesa area with the following specific suggestions:]Routes 3181-2399-2398-2354-2029-2376-2377-2378-2383-2382-2380: We would like to see these routes open to mechanical use (mountain biking) as it would create a bike loop system connecting Escalante Rim Rd to Sawmill Mesa Rd down to the northeast boundary of the NCA. We believe this area has the potential to provide a dynamic bicycling experience with trails of a variety of lengths and difficulties that lead to beautiful views and are easily accessible from Delta.

Organization, commenter: Backcountry Hunters and Anglers, Craig Grother

Comment ID: 000000156-22

• Within the Sawmill Mesa area we are very pleased to see the establishment of two major horse & foot trails in the area. Route 2243/2244/2248/2249 provides access into the Dry Fork of Escalante Canyon. This canyon provides excellent opportunities for hiking, backpacking, backcountry hunting, horseback riding, exploring, and other quiet use recreation. Route 2377/2376/2353/2354/2399 in the Escalante Rim area also provides opportunities for these activities in an area that provides excellent solitude. We fully support the designation of these routes as being open to horse and foot travel only.

## Route: 2377

### Segment: 435

#### Designation

##### Current Designation

Open (All modes of travel)

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- SOIL Soils Steep Slopes 40%
- SOIL Soils Fragile
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

## Rationale

### Designation Criteria

- **Recreation:** Rec opportunities – general, RMA objectives

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Foot/Horse

**Alternative C:** Closed, seek re-route or mitigation

**Alternative D:** Open, seek re-route or mitigation

The following high value recreational routes/roads are legal RS 2477ROW's in the State of Colorado, Delta County, and the BLM does not have the jurisdiction to close them: 3011, 2184, 2191, 3100, 2187, 2026, 2059, 2188, 2192, 3104, 2130, 3009, 2199, 2200, 2111, 2223, 2024, 3006, 2231, 3094, 2579, 2210, 2344, 2243, 2249, 2248, 3074, 2354, 2384, 2296, 2295, 2287, 2304, 2062, 2163, 3163, 2164, 2430, 4006, 3016, 2351, 3140, 2410, 4008, 2324, 2073, 2306, 2459, 3192, 3193, 2350, 2443, 2035, 2336, 2495, 2491, 2159, 3058, 2277, 2465, 2467, 3189, 2472, 2297, 2006, 2265, 2271, 2276, 2135, 2139, 3053, 2489, 3033, 3057, 2031, 2276, 2210, 2579, 2136, 2344, 3164, 2400, 2379, 3014, 2365, 3116, 2251, 2259, 2149, 2153, 2146, 2144, 2145, 2356, 2257, 2048, 2358, 3165, and 3166.

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 2380

### Segment: 401

#### Designation [?](#)

##### Current Designation

Open (All modes of travel)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- SOIL Soils Steep Slopes 40%
- SOIL Soils Fragile
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E
- VEGETATION Sagebrush patches >60 acres

#### Rationale

##### Designation Criteria

- **Recreation:** Rec opportunities – general, RMA objectives

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Foot/Horse

Comment ID: 00000115-68

• [Wagon Park/Sawmill Mesa (South) TMP-Level Comments: Quiet Trails Group supports the management decisions shown in Alternative E for the southern Sawmill Mesa area with the following specific suggestions:] Routes 3181-2399-2398-2354-2029-2376-2377-2378-2383-2382-2380: We would like to see these routes open to mechanical use (mountain biking) as it would create a bike loop system connecting Escalante Rim Rd to Sawmill Mesa Rd down to the northeast boundary of the NCA. We believe this area has the potential to provide a dynamic bicycling experience with trails of a variety of lengths and difficulties that lead to beautiful views and are easily accessible from Delta.

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness.Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources.As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use.The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles.What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures.All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 2382

### Segment: 408

### Designation

#### Current Designation

Open (All modes of travel)

#### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

#### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- SOIL Soils Steep Slopes 40%
- SOIL Soils Fragile
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E
- VEGETATION Sagebrush patches >60 acres

## Rationale

### Designation Criteria

- **Recreation:** Rec opportunities – general, RMA objectives

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Foot/Horse

**Alternative C:** Closed, seek re-route or mitigation

**Alternative D:** Open, seek re-route or mitigation

## Public Comments On Route: 2382

Organization, commenter: Quiet Trails Group, Sherry Schenk

Comment ID: 000000115-68

• [Wagon Park/Sawmill Mesa (South) TMP-Level Comments:Quiet Trails Group supports the management decisions shown in Alternative E for the southern Sawmill Mesa area with the following specific suggestions:]Routes 3181-2399-2398-2354-2029-2376-2377-2378-2383-2382-2380: We would like to see these routes open to mechanical use (mountain biking) as it would create a bike loop system connecting Escalante Rim Rd to Sawmill Mesa Rd down to the northeast boundary of the NCA. We believe this area has the potential to provide a dynamic bicycling experience with trails of a variety of lengths and difficulties that lead to beautiful views and are easily accessible from Delta.

## Public Comments On Route: 2385

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 00000135-28

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black

bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

- I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 2389

## Segment: 330

### Designation

#### Current Designation

Closed (Rehab)

#### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

#### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I moderate
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

### Rationale

#### Designation Criteria

- **Minimize Harassment:** PPSV- Minimize fragmentation, Raptor Potential Habitat

#### Rationale for Decision

- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect potential raptor habitat

### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed, seek re-route or mitigation

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 239

Organization, commenter: Quiet Trails Group, Sherry Schenk

Comment ID: 000000115-71

- Routes 239, 272, 280: These routes should be designated as ATV unless there is a resource issue with leaving these open. We anticipate that quiet trail users will use these routes to access 297, 311, etc from the parking at the end of Bean Ranch Road as it is more direct than going the longer way around via 293, 292, 288, 302, etc

## Route: 2390

### Segment: 388

#### Designation [?](#)

##### Current Designation

Closed (Not Rehabbed)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- SOIL Soils Fragile
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches <60 acres

#### Rationale

##### Designation Criteria

- **Minimize Harassment:** Sage-Minimize fragmentation

##### Rationale for Decision

- Route was designated to reduce fragmentation of sagebrush patches

#### Previous Alternatives Analyzed

## Public Comments On Route: 2396

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 000000135-26

Cottonwood Creek This creek is a rare example of an almost completely unroaded, untrailed stream corridor for most of its length until it reaches Roubideau Creek and the Gunnison River. Unplanned, damaging routes along Cottonwood Creek upstream near the Forest Service boundary should all be closed to create an undisturbed full stretch of riparian corridor. Randomly created routes needing closure are: 2152, 2149, 2147, 2148, 2439, 2153, 2154, 2156. Closing these routes would restore a relatively intact watershed. Routes needing closure at the northern end of Cottonwood Creek, for the same reason, are: 3087, 3088, 3082, 3083, 3080, 3015, 2370, 2089, 2100, 3079, 3047, 2396, 2013, 3128, 3169, 2014, 2162, 2160, 2493, 3005. Some of these routes spur off 25 Mesa Road and do not actually enter the Cottonwood Creek drainage, but most if not all are not purposely created, not planned, are randomly scarring the landscape, and are introducing difficult to enforce ORV use. Only a few, if any should be left open, that have an overriding need and purpose. All the user-created routes descending into Cottonwood Creek should be closed, including 2100, 2370, 2099, and the whole tangle of routes 3169, etc etc

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 2397

### Segment: 302

## Designation ?

### Current Designation

Closed (Rehab)

### Mitigation Criteria

- Needs Data - Paleo

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- SOIL Soils Fragile
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk severe winter range
- WILDLIFE Big game winter concentration areas
- WILDLIFE Big game summer concentration areas
- CULTURAL Cultural Class I low
- SMA Wild and Scenic River area

- GEOPALEO Paleontological direct impat
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- **Minimize Damage:** Geo/paleo – SSR in key sites

### Rationale for Decision

- Route was designated to protect geologic and paleontologic resources.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

- [Wagon Park/Sawmill Mesa (South) TMP-Level Comments: Quiet Trails Group supports the management decisions shown in Alternative E for the southern Sawmill Mesa area with the following specific suggestions:] Routes 3181-2399-2398-2354-2029-2376-2377-2378-2383-2382-2380: We would like to see these routes open to mechanical use (mountain biking) as it would create a bike loop system connecting Escalante Rim Rd to Sawmill Mesa Rd down to the northeast boundary of the NCA. We believe this area has the potential to provide a dynamic bicycling experience with trails of a variety of lengths and difficulties that lead to beautiful views and are easily accessible from Delta.

Within the Sawmill Mesa area we are very pleased to see the establishment of two major horse & foot trails in the area. Route 2243/2244/2248/2249 provides access into the Dry Fork of Escalante Canyon. This canyon provides excellent opportunities for hiking, backpacking, backcountry hunting, horseback riding, exploring, and other quiet use recreation. Route 2377/2376/2353/2354/2399 in the Escalante Rim area also provides opportunities for these activities in an area that provides excellent solitude. We fully support the designation of these routes as being open to horse and foot travel only.

## Public Comments On Route: 240

Organization, commenter: Janice Shepherd

Comment ID: 00000106-212

- 208-195-186-182-243-257-262-253-240-221-198 I support the Quiet Trail Group's position of designating this loop for quiet trail users. The top segments 208-195-186-176 should be Mtn Bike, to connect with the Alt E proposed designation for 182-243. Note that 243 should not be designated Motorcycle as it is in Alt E as it is a short segment connecting two Mtn Bike routes. The rest of the loop should be Horse/foot as shown in Alt E. This approximately 4 mile loop makes a great short enjoyable hike. I've even done it with a group of friends on a July morning. The city high that day was 93. We finished the hike in the morning when the temperatures were still moderate. Afterwards we enjoyed lunch together at a restaurant on Orchard Mesa (local economic benefit). It is important to me to have easy access to such short quiet use loops within the NCA that are close to the city so that my friends and I can get some exercise together while enjoying each other's company even in summer months. On the height of land crossed by 240, there is a wonderful view back down the valley. The track blends in and the valley looks pristine and untouched by humans. It gives me a small sense of what it must have been like to be the first explorer here. I'd love to find other trails like this. Near 176, there is a pretty little dry fall. And the rock in the area is a conglomerate which is such an interesting contrast to vast amounts of sandstone. On foot it is fun to find such interesting anomalies. That is what is so great about hiking on 186-176-182, you have time to see the contrast and recognize the uniqueness of the area. There's time for my friends and me to admire the power of natural forces. We like this hike because of the sense of discovery of small and large details about the geology of the area.

## Route: 2400

Comment ID: 000000135-28

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 2401

### Designation [?](#)

#### Current Designation

Closed (Rehab)

#### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

#### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E

### Rationale

#### Designation Criteria

- **Minimize Damage:** SS Veg Communities – SSR
- **Minimize Harassment:** PPSV- Minimize fragmentation, Bighorn – SSR -- summer range

#### Rationale for Decision

- Route was designated to protect and enhance special status fish, wildlife, and plant populations.
- Route was designated to reduce fragmentation in Priority Vegetation types

Route was designated to reduce the miles of motorized and mechanized routes in bighorn sheep habitat.

## Public Comments On Route: 2408

Organization, commenter: Escalante Ranch, Richard Miller

Comment ID: 000000171-7

- IV. TRANSPORTATION AND TRAVEL MANAGEMENT Mr. Miller's owns various parcels of private property and multiple water diversions in the area in question, and must access these lands via roads and trails which currently cross public land. In addition, Mr. Miller must necessarily access various roads and trails to in the course of managing his livestock operation. The EIS proposes closing various roads and trails to public motorized travel, to minimize resource damage caused by the public on both public and private lands. EIS at 157, 187. Mr. Miller supports the BLM's proposal to restrict public access to protect public and private property, but only so long as he is not restricted from using these roads as may be necessary to access his private lands and manage his livestock operation.

Thus, to the extent that the BLM wishes to close roads to motorized public traffic, it should simultaneously grant Mr. Miller legal, administrative access. In addition, Mr. Miller notes that he would be entitled to a formal decision, subject to appeal, prior to the BLM restricting access to his private property and/or otherwise impacting his livestock operation. Mr. Miller notes that the BLM has mis-classified many routes. See EIS Map N -1 e. Specifically, many routes which have historically been used to access private land and water diversions, and/or are necessary to maintain livestock improvements or otherwise manage and operate Mr. Miller's livestock operation, have been incorrectly labeled as closed or otherwise restricted in their use. These routes should be classified as "administrative," to recognize these historic uses and to allow for continued uses consistent therewith. The routes which have been incorrectly classified and which should be classified as "administrative" are as follows: Routes 460, 1220, 1243, 1245, 2003, 2053, 2073, 2086, 2089, 2121, 2122, 2126, 2156, 2166, 2168, 2171-2172, 2177, 2180, 2336, 2342, 2354, 2408, 2412, 2445, 2581, 2582, 2583, 2585, 2587, 2588, 2590, 2591, 2593, 2595, 2596, 2598, 2599, 2612, 2613, 2622, 2691, 3011, 3048, 3070, 3131, 3141, and 3158. See EIS Map N-1e. In addition, Route 2072 is not completely depicted on the map, in that it extends down the river, across BLM and private property, an additional 2-3 miles, and likewise Route 3048 extends an additional 0.75 miles and leads to private property. Id. Fina Uy, Map N-1e incorrectly labels Mr. Miller's privately owned bridge, which crosses the Gunnison River at the Bridgeport area, as "administrative." I d. Mr. Miller requests that the BLM correct these errors and mis-classifications.

## Route: 2411

### Segment: 1126

#### Designation ?

##### Current Designation

Admin/Permitted Use Only

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- LANDS Access to non-federal lands
- SOIL Soils Fragile
- WILDLIFE Mule deer severe winter range
- RIPARIAN Riparian crossing perennial stream
- CULTURAL Cultural Class I moderate
- SMA Wild and Scenic River area
- DENSITY Route density low in Alt A
- DENSITY Route density low in Alt E
- SSPLANT Special Status Species Colorado hookless cactus

#### Rationale

##### Designation Criteria

- No designation criteria for this route segment.

##### Rationale for Decision

- Route was designated to ensure access to rights-of-way, private property, and livestock grazing facilities.

### Public Comments On Route: 2412

Organization, commenter: Escalante Ranch, Richard Miller

Comment ID: 000000171-7

• IV. TRANSPORTATION AND TRAVEL MANAGEMENT Mr. Miller's owns various parcels of private property and multiple water diversions in the area in question, and must access these lands via roads and trails which currently cross public land. In addition, Mr. Miller must necessarily access various roads and trails to in the course of managing his livestock operation. The EIS proposes closing various roads and trails to public motorized travel, to minimize resource damage caused by the public on both public and private lands. EIS at 157, 187. Mr. Miller supports the BLM's proposal to restrict public access to protect public and private property, but only so long as he is not restricted from using these roads as may be necessary to access his private lands and manage his livestock operation. Thus, to the extent that the BLM wishes to close roads to motorized public traffic, it should simultaneously grant Mr. Miller legal, administrative access. In addition, Mr. Miller notes that he would be entitled to a formal decision, subject to appeal, prior to the BLM restricting access to his private property and/or otherwise impacting his livestock operation. Mr. Miller notes that the BLM has mis-classified many routes. See EIS Map N -1 e. Specifically, many routes which have historically been used to access private land and water diversions, and/or are necessary to maintain livestock improvements or otherwise manage and operate Mr. Miller's livestock operation, have been incorrectly labeled as closed or otherwise restricted in their use. These routes should be classified as "administrative," to recognize these historic uses and to allow for continued uses consistent therewith. The Routes which have been incorrectly classified and which should be classified as "administrative" are as follows: Routes 460, 1220, 1243, 1245, 2003, 2053, 2073, 2086, 2089, 2121, 2122, 2126, 2156, 2166, 2168, 2171 ~ 2172, 2177, 2180, 2336, 2342, 2354, 2408, 2412, 2445, 2581, 2582, 2583, 2585, 2587, 2588, 2590, 2591, 2593, 2595, 2596, 2598, 2599, 2612, 2613, 2622, 2691, 3011, 3048, 3070, 3131, 3141, and 3158. See EIS Map N-1e. In addition, Route 2072 is not completely depicted on the map, in that it extends down the river, across BLM and private property, an additional 2-3 miles, and likewise Route 3048 extends an additional 0.75 miles and leads to private property. Id. Fina Uy, Map N-1e incorrectly labels Mr. Miller's privately owned bridge, which crosses the Gunnison River at the Bridgeport area, as "administrative." I d. Mr. Miller requests that the BLM correct these errors and mis-classifications.

Organization, commenter: Escalante Ranch, Kent Davis

- Route number 2412. This cannot be closed as it is an access during flood stages of the river.

### Route: 2413

#### Segment: 1124

#### Designation

##### Current Designation

Closed (Not Rehabbed)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- LANDS Access to non-federal lands
- SOIL Soils Fragile
- WILDLIFE Mule deer severe winter range
- RIPARIAN Riparian crossing perennial stream
- CULTURAL Cultural Class I moderate
- SMAs Wild and Scenic River area
- DENSITY Route density low in Alt A
- DENSITY Route density low in Alt E
- SSPLANT Special Status Species Colorado hookless cactus

### Rationale

#### Designation Criteria

- **Minimize Damage:** Cactus – reduce density within 200m

- **Minimize Harassment:** PPSV- Minimize fragmentation

### Rationale for Decision

- Route was designated to reduce the density of routes within 200 meters of known Colorado hookless Cactus occurrences.
- Route was designated to reduce fragmentation in Priority Vegetation types

### Previous Alternatives Analyzed

**Alternative A:** Admin/Permitted Use Only

**Alternative B:** Closed (Not Rehabbed)

## Route: 2421

### Segment: 1257

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- RANGE Range access for general livestock management
- RIPARIAN Riparian 1 stream crossing
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I low
- SMAs River Rims ACEC
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E
- SSPLANT Special Status Species Colorado hookless cactus

#### Rationale

##### Designation Criteria

- **Minimize Damage:** Cactus – reduce density within 200m
- **Minimize Harassment:** Bighorn – SSR -- summer range, PPSV- Minimize fragmentation
- **Wilderness / Natural Area:** ACEC-River Rims close within 200m cactus

##### Rationale for Decision

- Route was designated to reduce the density of routes within 200 meters of known Colorado hookless Cactus occurrences.
- Route was designated to reduce the miles of motorized and mechanized routes in bighorn sheep habitat.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect Colorado hookless cactus within the River Rims ACEC

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open, seek re-route or mitigation

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 2421

- No public comments for this Route

## Route: 2422

Organization, commenter: Janice Shepherd

Comment ID: 00000106-210

- 4000-3016-3040-3043-2423 I support the Quiet Trail Group's position of designating this Mtn Bike, Horse and Foot only. It would be a component of the Mtn Bike long-distance trail from Whitewater to Delta. Part of it is also used for horseback riding events. There are great dramatic views looking down the cliffs at the Gunnison far below. Walking along this route gives me the time to contemplate the grandeur of the area, from the mighty power of water carving canyons over thousands of years, to the contrast of the snow-capped Mesa to the east. It is great to experience the winds of spring that mark the changing of the seasons in a quiet setting, so having this route be non-motorized is important to me.

## Route: 2424

### Segment: 1442

#### Designation

## Current Designation

Closed (Rehab)

## Mitigation Criteria

- No Mitigation Criteria for this Route Segment

## Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I moderate
- SMAs Wild and Scenic River area
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- **Minimize Harassment:** PPSV- Minimize fragmentation, Bighorn – SSR -- summer range

### Rationale for Decision

- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to reduce the miles of motorized and mechanized routes in bighorn sheep habitat.

## Public Comments On Route: 2426

Organization, commenter: Janice Shepherd

Comment ID: 000000106-226

- 2426, 2427 My husband and I hiked down this route. With the curves in the canyon, it makes it a fun hike as you wonder what will be around the corner. The reward for the hike was getting down to the river. I can see the mountain bikers would enjoy these routes too and they could be part of the long-distance mountain biking trail being considered between Whitewater and Delta. Route 3098 looked like a great place to come back to explore, another appealing twisty canyon.

- Trail Number(s): 2428/2427/2426 Trail Name: Click here to enter text. Trail Description (challenges, viewpoints, terrain type, etc.): Click here to enter text. Your historical use/activities (frequency, rock crawling, exploring, testing, photography, camping): Jeeping/exploring Why you like this trail (challenges you/vehicle, close to home, wildlife, historic sites, scenic views): This route is fun in a Jeep. Benefits you receive by using this trail (exercise, socializing with friends/family, solitude, remoteness): This is a fun, moderately challenging 4WD route. Other Comment (what is your desired outcome for this trail, additional ideas to be considered): This route should remain open to fullsize 4WD

Organization, commenter: COPMOBA, Scott Winans

Comment ID: 000000168-2

- Hunting Grounds In the Hunting Grounds area, a longer distance trail similar to Kokopelli's, Tabeguache, and Paradox Trails, would be of interest to this user group [COPMOBA]. Starting at the Old Spanish Trail in Orchard Mesa and ending in Delta, this trail idea is currently feasible when using a mix of single track, ATV width trail, jeep road and even Highway 50 for a few short sections. With very little trail construction making some connections to existing trails, nearly all of this highway use can be avoided. The major attraction of this area is the views from the rim above the Gunnison River in both directions. The existing trail and any trail construction should be routed to take advantage of this valuable view resource. The following recommendations are in the spirit of developing this long distance trail. Starting from the Kannah Creek area we recommend leaving 152 open to mountain bike use for a possible future connection to the lower Kannah Creek road. Possibilities included deeded access across private land, or new construction from the existing small portion of BLM land which the road accesses. Continuing, use existing full size and ATV trail to the end of 440, or a portion of 431, to access small drainage and then construct new trail to access Bridgeport Road. Then use 438, 449 and 2163 to access 2426 and 2427 to Dominguez Road (or 3098 and 3163 and then a very short new connector to 3133 out to highway) From Dominguez Road use 4000 to 3043, then single track 4001, 4005, 4006, 4007 and 3148 to reach Escalante Road. Very nice views exist in this area from the trail. The trail would then cross Escalante road to 2073 with a connection being built to 2053. This short deviation from the Escalante road would provide a safer route for mountain bikes than the twisty road with blind corners and high speed full size vehicles. The trail would cross the river on main bridge and immediately turn left and follow 2313, 2461 and 2462 with a connection to Delta via 2352, 470 2476 and 2489. This area using borders of the northern most point of the Escalante Rim, south to the Rim Road then using 2354 as the border on the west, the main county road on the east and then back down to the rim above river on the north would provide an excellent mountain bike emphasis area for the Delta community. Visitors and local users could ride from town or drive a very short distance. Quiet Use trails are rare in this area and this topography would allow for a rewarding experience for hiker, horse and mountain bike users. This scenario would provide an area similar to the Lunch Loops and Mack Ridge areas. With a long distance rail anchoring a Quiet Use stack loop system of trails which are extremely popular and very beneficial to users and the community at trail at large

- Hunting Grounds In the Hunting Grounds area, a longer distance trail similar to Kokopelli's, Tabeguache, and Paradox Trails, would be of interest to this user group [COPMOBA]. Starting at the Old Spanish Trail in Orchard Mesa and ending in Delta, this trail idea is currently feasible when using a mix of single track, ATV width trail, jeep road and even Highway 50 for a few short sections. With very little trail construction making some connections to existing trails, nearly all of this highway use can be avoided. The major attraction of this area is the views from the rim above the Gunnison River in both directions. The existing trail and any trail construction should be routed to take advantage of this valuable view resource. The following recommendations are in the spirit of developing this long distance trail. Starting from the Kannah Creek area we recommend leaving 152 open to mountain bike use for a possible future connection to the lower Kannah Creek road. Possibilities included deeded access across private land, or new construction from the existing small portion of BLM land which the road accesses. Continuing, use existing full size and ATV trail to the end of 440, or a portion of 431, to access small drainage and then construct new trail to access Bridgeport Road. Then use 438, 449 and 2163 to access 2426 and 2427 to Dominguez Road (or 3098 and 3163 and then a very short new connector to 3133 out to highway) From Dominguez Road use 4000 to 3043, then single track 4001, 4005, 4006, 4007 and 3148 to reach Escalante Road. Very nice views exist in this area from the trail. The trail would then cross Escalante road to 2073 with a connection being built to 2053. This short deviation from the Escalante road would provide a safer route for mountain bikes than the twisty road with blind corners and high speed full size vehicles. The trail would cross the river on main bridge and immediately turn left and follow 2313, 2461 and 2462 with a connection to Delta via 2352, 470 2476 and 2489. This area using borders of the northern most point of the Escalante Rim, south to the Rim Road then using 2354 as the border on the west, the main county road on the east and then back down to the rim above river on the north would provide an excellent mountain bike emphasis area for the Delta community. Visitors and local users could ride from town or drive a very short distance. Quiet Use trails are rare in this area and this topography would allow for a rewarding experience for hiker, horse and mountain bike users. This scenario would provide an area similar to the Lunch Loops and Mack Ridge areas. With a long distance rail anchoring a Quiet Use stack loop system of trails which are extremely popular and very beneficial to users and the community at trail at large

## Route: 2428

### Segment: 1476

## Designation

### Current Designation

Closed (Rehab)

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands

- RECREATION Recreation access for the Old Spanish National Historic Trail
- CULTURAL Cultural Indirect impact
- SMAs Wild and Scenic River area
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E
- SSPLANT Special Status Species Colorado hookless cactus

## Rationale

### Designation Criteria

- **Minimize Harassment:** PPSV- Minimize fragmentation, Bighorn – SSR -- summer range

### Rationale for Decision

- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to reduce the miles of motorized and mechanized routes in bighorn sheep habitat.

## Previous Alternatives Analyzed

**Alternative A:** Vehicles under 50" wide

- 208-195-186-182-243-257-262-253-240-221-198 I support the Quiet Trail Group's position of designating this loop for quiet trail users. The top segments 208-195-186-176 should be Mtn Bike, to connect with the Alt E proposed designation for 182-243. Note that 243 should not be designated Motorcycle as it is in Alt E as it is a short segment connecting two Mtn Bike routes. The rest of the loop should be Horse/foot as shown in Alt E. This approximately 4 mile loop makes a great short enjoyable hike. I've even done it with a group of friends on a July morning. The city high that day was 93. We finished the hike in the morning when the temperatures were still moderate. Afterwards we enjoyed lunch together at a restaurant on Orchard Mesa (local economic benefit). It is important to me to have easy access to such short quiet use loops within the NCA that are close to the city so that my friends and I can get some exercise together while enjoying each other's company even in summer months. On the height of land crossed by 240, there is a wonderful view back down the valley. The track blends in and the valley looks pristine and untouched by humans. It gives me a small sense of what it must have been like to be the first explorer here. I'd love to find other trails like this. Near 176, there is a pretty little dry fall. And the rock in the area is a conglomerate which is such an interesting contrast to vast amounts of sandstone. On foot it is fun to find such interesting anomalies. That is what is so great about hiking on 186-176-182, you have time to see the contrast and recognize the uniqueness of the area. There's time for my friends and me to admire the power of natural forces. We like this hike because of the sense of discovery of small and large details about the geology of the area.

- RECREATION Recreation access for the Old Spanish National Historic Trail
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- CULTURAL Cultural Class I low
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E
- SSPLANT Special Status Species Colorado hookless cactus

### Rationale

#### Designation Criteria

- **Recreation:** Rec opportunities – general

#### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open, seek re-route or mitigation

**Alternative C:** Closed, seek re-route or mitigation

**Alternative D:** Admin/Permitted Use Only

## Public Comments On Route: 2433

- No public comments for this Route

## Route: 2434

### Segment: 1306

### Designation

#### Current Designation

Admin/Permitted Use Only

#### Mitigation Criteria

- Needs Data - Cultural

#### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Indirect impact
- DENSITY Route density low in Alt A
- DENSITY Route density low in Alt E
- SSPLANT Special Status Species Colorado hookless cactus

### Rationale

#### Designation Criteria

- **Minimize Damage:** Cactus – reduce density within 200m, Cultural – SSR within 100m sites

#### Rationale for Decision

- Route was designated to ensure access to rights-of-way, private property, and livestock grazing facilities.

### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 2434

#### Designation [?](#)

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- CULTURAL Cultural Class I low
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- SSPLANT Special Status Species Colorado hookless cactus

#### Rationale

##### Designation Criteria

- **Minimize Damage:** Cactus – reduce density within 200m
- **Minimize Harassment:** PPSV- Minimize fragmentation, Raptor Potential Habitat

##### Rationale for Decision

- Route was designated to reduce the density of routes within 200 meters of known Colorado hookless Cactus occurrences.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to protect potential raptor habitat

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

## Public Comments On Route: 2439

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 000000135-26

Cottonwood Creek This creek is a rare example of an almost completely unroaded, untrailed stream corridor for most of its length until it reaches Roubideau Creek and the Gunnison River. Unplanned, damaging routes along Cottonwood Creek upstream near the Forest Service boundary should all be closed to create an undisturbed full stretch of riparian corridor. Randomly created routes needing closure are: 2152, 2149, 2147, 2148, 2439, 2153, 2154, 2156. Closing these routes would restore a relatively intact watershed. Routes needing closure at the northern end of Cottonwood Creek, for the same reason, are: 3087, 3088, 3082, 3083, 3080, 3015, 2370, 2089, 2100, 3079, 3047, 2396, 2013, 3128, 3169, 2014, 2162, 2160, 2493, 3005. Some of these routes spur off 25 Mesa Road and do not actually enter the Cottonwood Creek drainage, but most if not all are not purposely created, not planned, are randomly scarring the landscape, and are introducing difficult to enforce ORV use. Only a few, if any should be left open, that have an overriding need and purpose. All the user-created routes descending into Cottonwood Creek should be closed, including 2100, 2370, 2099, and the whole tangle of routes 3169, etc etc

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 000000135-28

I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 244

The following high value recreational routes/roads are legal ROW's in the State of Colorado, Mesa County and the BLM does not have the jurisdiction to close them: 500, 472, 518, 521, 530, 39, 127, 572, 566, 66, 65, 148, 71, 74, 587, 595, 608, 622, 628, 635, 624, 609, 611, 706, 678, 700, 719, 726, 696, 26, 936, 847, 849, 919, 767, 824, 96, 822, 817, 950, 1021, 900, 2682, 1020, 1003, 1084, 1142, 1184, 1156, 1198, 1349, 1308, 1310, 1238, 1263, 1122, 1170, 1192, 974, 941, 1076, 1039, 1018, 1759, 1764, 1758, 1174, 1788, 1798, 1669, 1699, 1773, 1755, 1779, 1750, 1751, 1792, 1720, 1726, 1727, 1720, 1722, 1803, 1805, 1809, 1614, 1609, 1605, 1608, 1571, 1526, 1516, 1448, 755, 807, 900, 10, 48, 924, 950, 1005, 965, 8, 1115, 981, 984, 1135, 2678, 1249, 1171, 1150, 1249, 1320, 1235, 1236, 1228, 1227, 1409, 1456, 1349, 1308, 1513, 1221, 1550, 1567, 1641, 1612, 1740, 1688, 2597, 2598, 2601, 2440, 3160, 3162, 2089, 2166, 2170, 2596, 2171, 2003, 2122, 2126, 2189, 3145, 2182, 2179, 2178, 3143, 2181, 2121, 2122, 2168, 2126, 2180, 2095, 2173, 2174, 2620, 2129, 1686, 1692, 1667, 1647, 1631, 1613, 1596, 1549, 1541, 2647, 1633, 1605, 1608, 1571, 2645, 1507, 1448, 1496, 1516, 1504, 1510, 1508, 1509, 439, 431, 456, 461, 460, 391, 423, 415, 419, 407, 402, 367, 372, 339, 298, 338, 105, 368, 374, 393, 389, 390, 376, 377, 351, 350, 121, 345, 320, 301, 251, 234, 232, 205, 344, 107, 103, 152, 153, 161, 168, 3199, 188, 196, 255, 254, 236, 294, 242, 219, 201, 169, 162, 158, 160, 173. **Public Comments On Route: 2445**

Organization, commenter: Quiet Trails Group, Sherry Schenk

Comment ID: 000000115-49

- [Dominguez Canyon Wilderness RMP-Level Comments] Zone 3 currently has two long distance trails, the McCarty Trail (2177) and the Gunnison Trail (2445). The QTG supports the addition of some shorter loop hikes within this zone. As we've mentioned earlier we know many quiet trail users prefer to stay on trails rather than travel cross-country. Adding some loops within this zone will help quiet trail users enjoy more areas of this wilderness zone

Organization, commenter: Quiet Trails Group, Sherry Schenk

Comment ID: 000000115-55

- [Dominguez Canyon Wilderness TMP-Level Comments]Zone 3Routes 2581, 2582: Quiet Trails Group would like to keep these routes open for quiet use, connecting to 2445. The combination makes a nice 7 mile loop with the added enjoyment of interesting canyon views at a couple of spots along 2581.

Organization, commenter: Escalante Ranch, Richard Miller

Comment ID: 000000171-7

- IV. TRANSPORTATION AND TRAVEL MANAGEMENTMr. Miller's owns various parcels of private property and multiple water diversions in the area in question, and must access these lands via roads and trails which currently cross publicland. In addition, Mr. Miller must necessarily access various roads and trails to in the course ofmanaging his livestock operation. The EIS proposes closing various roads and trails to publicmotorized travel, to minimize resource damage caused by the public on both public and privatelands. EIS at 157, 187. Mr. Miller supports the BLM's proposal to restrict public access toprotect public and private property, but only so long as he is not restricted from using these roads as may be necessary to access his private lands and manage his livestock operation. Thus, to the extent that the BLM wishes to close roads to motorized public traffic, it should simultaneously grant Mr. Miller legal, administrative access. In addition, Mr. Miller notes that he would be entitled to a formal decision, subject to appeal, prior to the BLM restricting access to his private property and/or otherwise impacting his livestock operation.Mr. Miller notes that the BLM has mis-classified many routes. See EIS Map N -1 e. Specifically, many routes which have historically been used to access private land and waterdiversions, and/or are necessary to maintain livestock improvements or otherwise manage andoperate Mr. Miller's livestock operation, have been incorrectly labeled as closed or otherwiserestricted in their use. These routes should be classified as "administrative," to recognize thesehistoric uses and to allow for continued uses consistent therewith. The Routes which have beenincorrectly classified and which should be classified as "administrative" are as follows:Routes460, 1220,1243,1245,2003,2053,2073,2086,2089,2121,2122,2126,2156,2166,2168,2171-2172,2177,2180,2336,2342,2354,2408,2412,2445,2581,2582,2583,2585,2587,2588,2590,2591,2593,2595,2596,2598,2599,2612,2613,2622,2691,3011,3048,3070,3131,3141,and3158.See EIS Map N-1e. In addition, Route 2072 is not completely depicted on the map, in that itextends down the river, across BLM and private property, an additional2-3 miles, and likewiseRoute 3048 extends an additional 0.75 miles and leads to private property. Id. FinaUy, Map N-1e incorrectly labels Mr. Miller's privately owned bridge, which crosses the Gunnison River atthe Bridgeport area, as "administrative." I d. Mr. Miller requests that the BLM correct theseerrors and mis-classifications.

- No Mitigation Criteria for this Route Segment

#### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Range access for general livestock management
- WILDLIFE Mule deer severe winter range
- RIPARIAN Riparian crossing perinnial stream
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I moderate
- SMAs River Rims ACEC
- SMAs Wild and Scenic River area
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- SSPLANT Special Status Species Colorado hookless cactus

### Rationale

#### Designation Criteria

- **No designation criteria for this route segment.**

#### Rationale for Decision

- No Rationale for this designation.

### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open, seek re-route or mitigation

**Alternative C:** Open, seek re-route or mitigation

**Alternative D:** Closed (Rehab)

• The following high value recreational routes/roads are legal ROW's in the State of Colorado, Mesa County and the BLM does not have the jurisdiction to close them: 500, 472, 518, 521, 530, 39, 127, 572, 566, 66, 65, 148, 71, 74, 587, 595, 608, 622, 628, 635, 624, 609, 611, 706, 678, 700, 719, 726, 696, 26, 936, 847, 849, 919, 767, 824, 96, 822, 817, 950, 1021, 900, 2682, 1020, 1003, 1084, 1142, 1184, 1156, 1198, 1349, 1308, 1310, 1238, 1263, 1122, 1170, 1192, 974, 941, 1076, 1039, 1018, 1759, 1764, 1758, 1174, 1788, 1798, 1669, 1699, 1773, 1755, 1779, 1750, 1751, 1792, 1720, 1726, 1727, 1720, 1722, 1803, 1805, 1809, 1614, 1609, 1605, 1608, 1571, 1526, 1516, 1448, 755, 807, 900, 10, 48, 924, 950, 1005, 965, 8, 1115, 981, 984, 1135, 2678, 1249, 1171, 1150, 1249, 1320, 1235, 1236, 1228, 1227, 1409, 1456, 1349, 1308, 1513, 1221, 1550, 1567, 1641, 1612, 1740, 1688, 2597, 2598, 2601, 2440, 3160, 3162, 2089, 2166, 2170, 2596, 2171, 2003, 2122, 2126, 2189, 3145, 2182, 2179, 2178, 3143, 2181, 2121, 2122, 2168, 2126, 2180, 2095, 2173, 2174, 2620, 2129, 1686, 1692, 1667, 1647, 1631, 1613, 1596, 1549, 1541, 2647, 1633, 1605, 1608, 1571, 2645, 1507, 1448, 1496, 1516, 1504, 1510, 1508, 1509, 439, 431, 456, 461, 460, 391, 423, 415, 419, 407, 402, 367, 372, 339, 298, 338, 105, 368, 374, 393, 389, 390, 376, 377, 351, 350, 121, 345, 320, 301, 251, 234, 232, 205, 344, 107, 103, 152, 153, 161, 168, 3199, 188, 196, 255, 254, 236, 294, 242, 219, 201, 169, 162, 158, 160, 173. The following high value recreational routes/roads are legal ROW's in the State of Colorado, Delta County, and the BLM does not have the jurisdiction to close them: 3011, 2184, 2191, 3100, 2187, 2026, 2059, 2188, 2192, 3104, 2130, 3009, 2199, 2200, 2111, 2223, 2024, 3006, 2231, 3094, 2579, 2210, 2344, 2243, 2249, 2248, 3074, 2354, 2384, 2296, 2295, 2287, 2304, 2062, 2163, 3163, 2164, 2430, 4006, 3016, 2351, 3140, 2410, 4008, 2324, 2073, 2306, 2459, 3192, 3193, 2350, 2443, 2035, 2336, 2495, 2491, 2159, 3058, 2277, 2465, 2467, 3189, 2472, 2297, 2006, 2265, 2271, 2276, 2135, 2139, 3053, 2489, 3033, 3057, 2031, 2276, 2210, 2579, 2136, 2344, 3164, 2400, 2379, 3014, 2365, 3116, 2251, 2259, 2149, 2153, 2146, 2144, 2145, 2356, 2257, 2048, 2358, 3165, and 3166.

Organization, commenter: Delta-Montrose Electric Association (DMEA)

Comment ID: 00000193-10

• 5. Since the BLM's route designations will become Implementation Decisions in the D-E NCA Comprehensive Travel and Transportation Management Plan (DRMP, page 22) it is critical that all of DMEA's access routes be accurately shown, and designated as 'Open' or 'Administrative Use Only' under all alternatives. This includes, but is not limited to, portions of the following numbered travel routes, as identified on the DENCA Draft RMP Route by Route Designation Figures (Figures N-1b\_Alt\_B\_CTMP; N-1c\_Alt\_C\_CTMP; N-1d\_Alt\_D\_CTMP; and N-1e\_Alt\_E\_CTMP): 2495, 2496, 2459, 2313, 2461, 2462, 2352, 2470, 2476, 3192, 2035, 2336, 2342.6. Designation of DMEA's access routes as 'Open' or 'Administrative Use Only' is consistent with the BLM's guidelines for the Dominguez-Escalante National Conservation Area Draft Resource Management Plan and Environmental Impact Statement, April 2013 Appendix N Comprehensive Travel and Transportation Management Plan Route-by-Route Designation, which states: "Through the process of route-by-route designation, the interdisciplinary team established some guidelines that were applied across all four action alternatives (Alternatives B, C, D, and E) ....5. Routes that are associated with, or provide primary access to, established right-of-ways were either designated as open or as limited to administrative use only." (pages 899 and 900).

Organization, commenter: Delta-Montrose Electric Association (DMEA)

Comment ID: 00000193-2

• Route Specific Comments. 1. Among the RMP alternatives, the No Action Alternative is preferred by DMEA since it allows for the continued use of existing access routes for the maintenance, repair and replacement of existing distribution lines and poles. DMEA does not believe there would be any significant impacts to the maintenance, repair or replacement of the existing distribution system and access routes, under the No Action Alternative. 2. Alternative B would result in significant impacts to DMEA's ability to maintain, repair, replace or upgrade portions of the existing distribution lines within the NCA planning area. Under this alternative a number of DMEA access routes would be closed (e.g. 2496, 2035) or limited to ATV use only (e.g. 2336). Access restrictions would severely harm DMEA's ability to operate and maintain existing electrical distribution facilities as required by federal laws governing electric cooperatives/suppliers, and in accordance with our established standards. For access and maintenance of facilities, in all cases DMEA is requesting the use of existing roads and when roads are not available, the use of right-of-way for access. 3. Alternative C would result in the majority of existing DMEA access routes being designated as 'Administrative Use Only' (e.g. 2496, 2495, 2462, 2461, 2459, 2313, 3192). Based on the assumption that as a BLM right-of-way grant holder DMEA would have 'Administrative Use' and be allowed continued access to our distribution lines, no significant impacts would occur with this designation. Significant impacts would occur, however, where access is denied due to 'Closed' travel routes (e.g. 2336). 4. Alternative D would result in the majority of DMEA's access routes being designated as 'Open' north of the Gunnison River (e.g. 2496, 2495), while the majority of DMEA's access routes south of the river would be designated as 'Bicycle' (e.g. 2461, 2462, 2459, and 2313). In addition, this alternative would also designate several of DMEA's access routes as either 'Closed' or 'Administrative Use Only'. Significant negative impacts to DMEA and our customers served off these lines would occur when DMEA's access is unreasonably limited or denied. No significant impacts would be expected where access routes are designated as 'Open' or 'Administrative Use Only'. 5. Alternative E would result in significant impacts to DMEA's ability to maintain, repair and replace portions of the existing distribution lines within the NCA planning area. Under this alternative a number of DMEA access routes would be 'Closed' (e.g. 2496, 2463) or limited to 'ATV' use (e.g. 2461, 2462, 2459). Again, these limitations on access would not permit DMEA to continue operating and maintaining the existing electrical facilities in this area in accordance with federal regulations and DMEA's established standards. Significant and serious impacts would occur where access routes to DMEA's distribution lines are designated as 'Closed', or 'ATV'.

• The following high value recreational routes/roads are legal RS 2477 ROW's in the State of Colorado, Mesa County and the BLM does not have the jurisdiction to close them: 500, 472, 518, 521, 530, 39, 127, 572, 566, 66, 65, 148, 71, 74, 587, 595, 608, 622, 628, 635, 624, 609, 611, 706, 678, 700, 719, 726, 696, 26, 936, 847, 849, 919, 767, 824, 96, 822, 817, 950, 1021, 900, 2682, 1020, 1003, 1084, 1142, 1184, 1156, 1198, 1349, 1308, 1310, 1238, 1263, 1122, 1170, 1192, 974, 941, 1076, 1039, 1018, 1759, 1764, 1758, 1174, 1788, 1798, 1669, 1699, 1773, 1755, 1779, 1750, 1751, 1792, 1720, 1726, 1727, 1720, 1722, 1803, 1805, 1809, 1614, 1609, 1605, 1608, 1571, 1526, 1516, 1448, 755, 807, 900, 10, 48, 924, 950, 1005, 965, 8, 1115, 981, 984, 1135, 2678, 1249, 1171, 1150, 1249, 1320, 1235, 1236, 1228, 1227, 1409, 1456, 1349, 1308, 1513, 1221, 1550, 1567, 1641, 1612, 1740, 1688, 2597, 2598, 2601, 2440, 3160, 3162, 2089, 2166, 2170, 2596, 2171, 2003, 2122, 2126, 2189, 3145, 2182, 2179, 2178, 3143, 2181, 2121, 2122, 2168, 2126, 2180, 2095, 2173, 2174, 2620, 2129, 1686, 1692, 1667, 1647, 1631, 1613, 1596, 1549, 1541, 2647, 1633, 1605, 1608, 1571, 2645, 1507, 1448, 1496, 1516, 1504, 1510, 1508, 1509, 439, 431, 456, 461, 460, 391, 423, 415, 419, 407, 402, 367, 372, 339, 298, 338, 105, 368, 374, 393, 389, 390, 376, 377, 351, 350, 121, 345, 320, 301, 251, 234, 232, 205, 344, 107, 103, 152, 153, 161, 168, 3199, 188, 196, 255, 254, 236, 294, 242, 219, 201, 169, 162, 158, 160, 173. • I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 246

### Segment: 2576

#### Designation

##### Current Designation

Foot/Horse

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- RIPARIAN Riparian 1 stream crossing
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I low
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

##### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Foot/Horse/Mechanized/Motorcycle

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

## Public Comments On Route: 246

- No public comments for this Route

## Route: 2460

### Segment: 798

#### Designation

##### Current Designation

Admin/Permitted Use Only

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- LANDS Access to non-federal lands
- LANDS DMEA access route
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I moderate
- SMAs River Rims ACEC
- SMAs Wild and Scenic River area

- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

## Rationale

### Designation Criteria

- **Minimize Harassment:** Bighorn – SSR -- summer range, Raptor Potential Habitat
- **Wilderness / Natural Area:** ACEC-River Rims close within 200m cactus

### Rationale for Decision

- Route was designated to ensure access to rights-of-way, private property, and livestock grazing facilities.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Admin/Permitted Use Only

**Alternative C:** Admin/Permitted Use Only

**Alternative D:** Admin/Permitted Use Only

Comment ID: 000000168-2

Hunting GroundsIn the Hunting Grounds area, a longer distance trail similar to Kokopelli's, Tabeguache, and Paradox Trails, would be of interest to this user group[COPMOBA]. Starting at the Old Spanish Trail in Orchard Mesa and ending in Delta, this trail idea is currently feasible when using a mix of single track, ATV width trail, jeep road and even Highway 50 for a few short sections. With very little trail construction making some connections to existing trails, nearly all of this highway use can be avoided. The major attraction of this area is the views from the rim above the Gunnison River in both directions. The existing trail and any trail construction should be routed to take advantage of this valuable view resource.The following recommendations are in the spirit of developing this long distance trail.Starting from the Kannah Creek area we recommend leaving 152 open to mountain bike use for a possible future connection to the lower Kannah Creek road. Possibilities included deeded access across private land, or new construction from the existing small portion of BLM land which the road accesses. Continuing, use existing full size and ATV trail to the end of 440, or a portion of 431 ,to access small drainage and then construct new trail to access Bridgeport Road. Then use 438, 449 and 2163 to access 2426 and 2427 to Dominguez Road (or 3098 and 3163 and then a very short new connector to 3133 out to highway) From Dominguez Road use 4000 to 3043, then single track 4001,4005,4006,4007 and 3148 to reach Escalante Road. Very nice vi ews ex ist in this area from the trail. The trail would then cross Escalante road to 2073 with a connection being built to 2053. This short deviation from the Escalante road would provide a safer route for mountain bikes than the twisty road with blind comers and high speed full size vehicles. The trail would cross the river on main bridge and immediatel y turn left and follow 2313, 2461 and 2462 with a connection to Delta via 2352, 470 2476 and 2489. This area using borders of the northern most point of the Escalante Rim, south to the Rim Road then using 2354 as the border on the west, the main county road on the east and then back down to the rim above river on the north would provide an xcellent mountain bike emphasis area for the Delta community. Visitors and local users could ride from town or drive a very short distance. Quiet Use trails are rare in this area and this topography would allow for a rewarding experience for hiker, horse and mountain bike users. This scenario would provide an area similar to the Lunch Loops and Mack Ridge areas. With a long distance rail anchoring a Quiet Use stack loop system of trails which are extremely popular and very beneficial to users and the community at trail at large

Organization, commenter: Delta-Montrose Electric Association (DMEA) Comment ID: 000000193-10

• 5. Since the BLM's route designations will become ImplementationDecisions in the D-E NCA Comprehensive Travel and TransportationManagement Plan (DRMP, page 22) it is critical that all of DMEA's accessroutes be accurately shown, and designated as 'Open' or 'AdministrativeUse Only' under all alternatives. This includes, but is not limited to, portions of the following numbered travel routes, as identified on theDENCA Draft RMP Route by Route Designation Figures (Figures N-1b\_Alt\_B\_CTMP; N-1c\_Alt\_C\_CTMP; N-1d\_Alt\_D\_CTMP; and N-1e\_AltE\_CTMP ): 2495, 2496, 2459, 2313, 2461, 2462 2352, 2470, 2476, 3192,2035, 2336, 2342.6. Designation of DMEA's access routes as 'Open' or 'Administrative UseOnly' is consistent with the BLM's guidelines for the Dominguez-EscalanteNational Conservation Area Draft Resource Management Plan andEnvironmental Impact Statement, April 2013 Appendix N ComprehensiveTravel and Transportation Management Plan Route-by-Route Designation,which states:"Through the process of route-by-route designation, theinterdisciplinary team established some guidelines that were appliedacross all four action alternatives (Alternatives B, C, D, and E) ....5. Routes that are associated with, or provide primary access to,established right-of-ways were either designated as open or as limitedto administrative use only." (pages 899 and 900).

Organization, commenter: Delta-Montrose Electric Association (DMEA) Comment ID: 000000193-2

• Route Specific Comments1. Among the RMP alternatives, the No Action Alternative is preferred byDMEA since it allows for the continued use of existing access routes forthe maintenance, repair and replacement of existing distribution linesand poles. DMEA does not believe there would be any significant impactsto the maintenance, repair or replacement of the existing distributionsystem and access routes, under the No Action Alternative.2. Alternative B would result in significant impacts to DMEA's ability to maintain, repair, replace or upgrade portions of the existing distributionlines within the NCA planning area. Under this alternative a number ofDMEA access routes would be closed (e.g. 2496, 2035) or limited to ATVuse only (e.g. 2336). Access restrictions would severely harm DMEA'sability to operate and maintain existing electrical distribution facilities asrequired by federal laws governing electric cooperatives/suppliers, andin accordance with our established standards.For access and maintenance of facilities, in all cases DMEA is requestingthe use of existing roads and when roads are not available, the use ofright-of-way for access.3. Alternative C would result in the majority of existing DMEA access routesbeing designated as 'Administrative Use Only' (e.g. 2496, 2495, 2462,2461, 2459, 2313, 3192). Based on the assumption that as a BLM rightof-way grant holder DMEA would have 'Administrative Use' and beallowed continued access to our distribution lines, no significant impactswould occur with this designation. Significant impacts would occur,however, where access is denied due to 'Closed' travel routes (e.g. 2336).4. Alternative D would result in the majority of DMEA's access routes beingdesignated as 'Open' north of the Gunnison River (e.g. 2496, 2495), whilethe majority of DMEA's access routes south of the river would bedesignated as 'Bicycle' (e.g. 2461, 2462, 2459, and 2313). In addition,this alternative would also designate several of DMEA's access routes aseither 'Closed' or 'Administration Use Only'. Significant negative impactsto DMEA and our customers served off these lines would occur whenDMEA's access is unreasonably limited or denied. No significant impactswould be expected where access routes are designated as 'Open' or'Administrative Use Only'.5. Alternative E would result in significant impacts to DMEA's ability to maintain, repair and replace portions of the existing distribution lineswithin the NCA planning area. Under this alternative a number of DMEAaccess routes would be 'Closed' (e.g. 2496, 2463) or limited to 'ATV' use(e.g. 2461, 2462, 2459). Again, these limitations on access would notpermit DMEA to continue operating and maintaining the existingelectrical facilities in this area in accordance with federal regulations andDMEA's established standards. Significant and serious impacts wouldoccur where access routes to DMEA's distribution lines are designated as'Closed', or 'ATV'.

In addition, this alternative would also designate several of DMEA's access routes as either 'Closed' or 'Administration Use Only'. Significant negative impacts to DMEA and our customers served off these lines would occur when DMEA's access is unreasonably limited or denied. No significant impacts would be expected where access routes are designated as 'Open' or 'Administrative Use Only'. 5. Alternative E would result in significant impacts to DMEA's ability to maintain, repair and replace portions of the existing distribution lines within the NCA planning area. Under this alternative a number of DMEA access routes would be 'Closed' (e.g. 2496, 2463) or limited to 'ATV' use (e.g. 2461, 2462, 2459). Again, these limitations on access would not permit DMEA to continue operating and maintaining the existing electrical facilities in this area in accordance with federal regulations and DMEA's established standards. Significant and serious impacts would occur where access routes to DMEA's distribution lines are designated as 'Closed', or 'ATV'.

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelson Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 2463

### Segment: 792

#### Designation ?

##### Current Designation

Open (All modes of travel)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- LANDS DMEA access route
- WILDLIFE Mule deer severe winter range
- RIPARIAN Riparian crossing perennial stream
- CULTURAL Cultural Indirect impact
- SMAs River Rims ACEC

- SMAs Wild and Scenic River area
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- SSPLANT Special Status Species Colorado hookless cactus

## Rationale

### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Open, seek re-route or mitigation

**Alternative D:** Open, seek re-route or mitigation

## Public Comments On Route: 2463

Organization, commenter: Delta-Montrose Electric Association (DMEA)

Comment ID: 000000193-2

• Route Specific Comments  
 1. Among the RMP alternatives, the No Action Alternative is preferred by DMEA since it allows for the continued use of existing access routes for the maintenance, repair and replacement of existing distribution lines and poles. DMEA does not believe there would be any significant impacts to the maintenance, repair or replacement of the existing distribution system and access routes, under the No Action Alternative.  
 2. Alternative B would result in significant impacts to DMEA's ability to maintain, repair, replace or upgrade portions of the existing distribution lines within the NCA planning area. Under this alternative a number of DMEA access routes would be closed (e.g. 2496, 2035) or limited to ATV use only (e.g. 2336). Access restrictions would severely harm DMEA's ability to operate and maintain existing electrical distribution facilities as required by federal laws governing electric cooperatives/suppliers, and in accordance with our established standards. For access and maintenance of facilities, in all cases DMEA is requesting the use of existing roads and when roads are not available, the use of right-of-way for access.  
 3. Alternative C would result in the majority of existing DMEA access routes being designated as 'Administrative Use Only' (e.g. 2496, 2495, 2462, 2461, 2459, 2313, 3192). Based on the assumption that as a BLM right-of-way grant holder DMEA would have 'Administrative Use' and be allowed continued access to our distribution lines, no significant impacts would occur with this designation. Significant impacts would occur, however, where access is denied due to 'Closed' travel routes (e.g. 2336).  
 4. Alternative D would result in the majority of DMEA's access routes being designated as 'Open' north of the Gunnison River (e.g. 2496, 2495), while the majority of DMEA's access routes south of the river would be designated as 'Bicycle' (e.g. 2461, 2462, 2459, and 2313). In addition, this alternative would also designate several of DMEA's access routes as either 'Closed' or 'Administration Use Only'. Significant negative impacts to DMEA and our customers served off these lines would occur when DMEA's access is unreasonably limited or denied. No significant impacts would be expected where access routes are designated as 'Open' or 'Administrative Use Only'.  
 5. Alternative E would result in significant impacts to DMEA's ability to maintain, repair and replace portions of the existing distribution lines within the NCA planning area. Under this alternative a number of DMEA access routes would be 'Closed' (e.g. 2496, 2463) or limited to 'ATV' use (e.g. 2461, 2462, 2459). Again, these limitations on access would not permit DMEA to continue operating and maintaining the existing electrical facilities in this area in accordance with federal regulations and DMEA's established standards. Significant and serious impacts would occur where access routes to DMEA's distribution lines are designated as 'Closed', or 'ATV'.

## Segment: 723

### Designation

#### Current Designation

Closed (Rehab)

#### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

#### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- RIPARIAN Riparian 9 stream crossings
- RIPARIAN Riparian crossing perinial stream
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I moderate
- SMAs River Rims ACEC
- SMAs Wild and Scenic River area
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- SSPLANT Special Status Species Colorado hookless cactus

## Rationale

### Designation Criteria

- **Minimize Damage:** Cactus – reduce density within 200m, Riparian - perennial streams SSR 100 m, Soils -PSD slopes >40%, Riparian—ephemeral streams SSR 30 m
- **Minimize Harassment:** PPSV- Minimize fragmentation, Bighorn – SSR -- summer range
- **Wilderness / Natural Area:** ACEC-River Rims close within 200m cactus

### Rationale for Decision

- Route was designated to reduce the density of routes within 200 meters of known Colorado hookless Cactus occurrences.
- Route was designated to minimize travel routes in and crossing riparian and wetland areas.
- Route was designated to minimize levels of soil erosion that contributes salt, sediment, and selenium into stream and river systems.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to reduce the miles of motorized and mechanized routes in bighorn sheep habitat.
- Route was designated to protect Colorado hookless cactus within the River Rims ACEC

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed, seek re-route or mitigation

## Segment: 725

### Designation

#### Current Designation

Closed (Rehab)

#### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

#### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- SMAs River Rims ACEC

- SMAs Wild and Scenic River area
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E
- SSPLANT Special Status Species Colorado hookless cactus

## Rationale

### Designation Criteria

- **Minimize Damage:** Cactus – reduce density within 200m
- **Minimize Harassment:** PPSV- Minimize fragmentation, Bighorn – SSR -- summer range
- **Wilderness / Natural Area:** ACEC-River Rims close within 200m cactus

### Rationale for Decision

- Route was designated to reduce the density of routes within 200 meters of known Colorado hookless Cactus occurrences.
- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to reduce the miles of motorized and mechanized routes in bighorn sheep habitat.
- Route was designated to protect Colorado hookless cactus within the River Rims ACEC

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Rehab)

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 2468

### Segment: 687

#### Designation ?

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- RIPARIAN Riparian 1 stream crossing
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I low
- SMAs River Rims ACEC
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

- SSPLANT Special Status Species Colorado hookless cactus

## Rationale

### Designation Criteria

- **Minimize Harassment:** PPSV- Minimize fragmentation, Bighorn – SSR -- summer range
- **Wilderness / Natural Area:** ACEC-River Rims close within 200m cactus

### Rationale for Decision

- Route was designated to reduce fragmentation in Priority Vegetation types
- Route was designated to reduce the miles of motorized and mechanized routes in bighorn sheep habitat.
- Route was designated to protect Colorado hookless cactus within the River Rims ACEC

### Public Comments On Route: 2470

Organization, commenter: Delta-Montrose Electric Association (DMEA)

Comment ID: 000000193-10

- 5. Since the BLM's route designations will become Implementation Decisions in the D-E NCA Comprehensive Travel and Transportation Management Plan (DRMP, page 22) it is critical that all of DMEA's access routes be accurately shown, and designated as 'Open' or 'Administrative Use Only' under all alternatives. This includes, but is not limited to, portions of the following numbered travel routes, as identified on the DENCA Draft RMP Route by Route Designation Figures (Figures N-1b\_Alt\_B\_CTMP; N-1c\_Alt\_C\_CTMP; N-1d\_Alt\_D\_CTMP; and N-1e\_Alt\_E\_CTMP ): 2495, 2496, 2459, 2313, 2461, 2462 2352, 2470, 2476, 3192.2035, 2336, 2342.6. Designation of DMEA's access routes as 'Open' or 'Administrative Use Only' is consistent with the BLM's guidelines for the Dominguez-Escalante National Conservation Area Draft Resource Management Plan and Environmental Impact Statement, April 2013 Appendix N Comprehensive Travel and Transportation Management Plan Route-by-Route Designation, which states: "Through the process of route-by-route designation, the interdisciplinary team established some guidelines that were applied across all four action alternatives (Alternatives B, C, D, and E) ....5. Routes that are associated with, or provide primary access to, established right-of-ways were either designated as open or as limited to administrative use only." (pages 899 and 900).

- I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black

bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 2472

### Segment: 667

#### Designation

##### Current Designation

Closed (Not Rehabbed)

##### Designation Following Mitigation

Admin/Permitted Use Only

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- SMAs River Rims ACEC
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- SSPLANT Special Status Species Colorado hookless cactus

#### Rationale

##### Designation Criteria

- Minimize Damage:** Cactus – reduce density within 200m
- Minimize Harassment:** Bighorn – SSR -- summer range
- Wilderness / Natural Area:** ACEC-River Rims close within 200m cactus

##### Rationale for Decision

- Route was designated to ensure access to rights-of-way, private property, and livestock grazing facilities.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed, seek re-route or mitigation

## Public Comments On Route: 2472

Organization, commenter: Brandon Siegfried

Comment ID: 00000068-3

The following high value recreational routes/roads are legal ROW's in the State of Colorado, Mesa County and the BLM does not have the jurisdiction to close them: 500, 472, 518, 521, 530, 39, 127, 572, 566, 66, 65, 148, 71, 74, 587, 595, 608, 622, 628, 635, 624, 609, 611, 706, 678, 700, 719, 726, 696, 26, 936, 847, 849, 919, 767, 824, 96, 822, 817, 950, 1021, 900, 2682, 1020, 1003, 1084, 1142, 1184, 1156, 1198, 1349, 1308, 1310, 1238, 1263, 1122, 1170, 1192, 974, 941, 1076, 1039, 1018, 1759, 1764, 1758, 1174, 1788, 1798, 1669, 1699, 1773, 1755, 1779, 1750, 1751, 1792, 1720, 1726, 1727, 1720, 1722, 1803, 1805, 1809, 1614, 1609, 1605, 1608, 1571, 1526, 1516, 1448, 755, 807, 900, 10, 48, 924, 950, 1005, 965, 8, 1115, 981, 984, 1135, 2678, 1249, 1171, 1150, 1249, 1320, 1235, 1236, 1228, 1227, 1409, 1456, 1349, 1308, 1513, 1221, 1550, 1567, 1641, 1612, 1740, 1688, 2597, 2598, 2601, 2440, 3160, 3162, 2089, 2166, 2170, 2596, 2171, 2003, 2122, 2126, 2189, 3145, 2182, 2179, 2178, 3143, 2181, 2121, 2122, 2168, 2126, 2180, 2095, 2173, 2174, 2620, 2129, 1686, 1692, 1667, 1647, 1631, 1613, 1596, 1549, 1541, 2647, 1633, 1605, 1608, 1571, 2645, 1507, 1448, 1496, 1516, 1504, 1510, 1508, 1509, 439, 431, 456, 461, 460, 391, 423, 415, 419, 407, 402, 367, 372, 339, 298, 338, 105, 368, 374, 393, 389, 390, 376, 377, 351, 350, 121, 345, 320, 301, 251, 234, 232, 205, 344, 107, 103, 152, 153, 161, 168, 3199, 188, 196, 255, 254, 236, 294, 242, 219, 201, 169, 162, 158, 160, 173. 4. Route # 2472 needs to be reclassified from Administrative use to ATV/multiple use to provide access to route # 3189 which provides river access. This route has a desirable end destination and a clearly identifiable use for motorized users as well as mechanized and quiet users.

## Public Comments On Route: 2476

Organization, commenter: COPMOBA, Scott Winans

Comment ID: 000000168-2

• Hunting Grounds In the Hunting Grounds area, a longer distance trail similar to Kokopelli's, Tabeguache, and Paradox Trails, would be of interest to this user group [COPMOBA]. Starting at the Old Spanish Trail in Orchard Mesa and ending in Delta, this trail idea is currently feasible when using a mix of single track, ATV width trail, jeep road and even Highway 50 for a few short sections. With very little trail construction making some connections to existing trails, nearly all of this highway use can be avoided. The major attraction of this area is the views from the rim above the Gunnison River in both directions. The existing trail and any trail construction should be routed to take advantage of this valuable view resource. The following recommendations are in the spirit of developing this long distance trail. Starting from the Kannah Creek area we recommend leaving 152 open to mountain bike use for a possible future connection to the lower Kannah Creek road. Possibilities included deeded access across private land, or new construction from the existing small portion of BLM land which the road accesses. Continuing, use existing full size and ATV trail to the end of 440, or a portion of 431, to access small drainage and then construct new trail to access Bridgeport Road. Then use 438, 449 and 2163 to access 2426 and 2427 to Dominguez Road (or 3098 and 3163 and then a very short new connector to 3133 out to highway) From Dominguez Road use 4000 to 3043, then single track 4001, 4005, 4006, 4007 and 3148 to reach Escalante Road. Very nice views exist in this area from the trail. The trail would then cross Escalante road to 2073 with a connection being built to 2053. This short deviation from the Escalante road would provide a safer route for mountain bikes than the twisty road with blind corners and high speed full size vehicles. The trail would cross the river on main bridge and immediately turn left and follow 2313, 2461 and 2462 with a connection to Delta via 2352, 470 2476 and 2489. This area using borders of the northern most point of the Escalante Rim, south to the Rim Road then using 2354 as the border on the west, the main county road on the east and then back down to the rim above river on the north would provide an excellent mountain bike emphasis area for the Delta community. Visitors and local users could ride from town or drive a very short distance. Quiet Use trails are rare in this area and this topography would allow for a rewarding experience for hiker, horse and mountain bike users. This scenario would provide an area similar to the Lunch Loops and Mack Ridge areas. With a long distance trail anchoring a Quiet Use stack loop system of trails which are extremely popular and very beneficial to users and the community at trail at large

• 5. Since the BLM's route designations will become Implementation Decisions in the D-E NCA Comprehensive Travel and Transportation Management Plan (DRMP, page 22) it is critical that all of DMEA's access routes be accurately shown, and designated as 'Open' or 'Administrative Use Only' under all alternatives. This includes, but is not limited to, portions of the following numbered travel routes, as identified on the DENCA Draft RMP Route by Route Designation Figures (Figures N-1b, Alt\_B\_CTMP; N-1c, Alt\_C\_CTMP; N-1d, Alt\_D\_CTMP; and N-1e, Alt\_E\_CTMP): 2495, 2496, 2459, 2313, 2461, 2462, 2352, 2470, 2476, 3192, 2035, 2336, 2342.6. Designation of DMEA's access routes as 'Open' or 'Administrative Use Only' is consistent with the BLM's guidelines for the Dominguez-Escalante National Conservation Area Draft Resource Management Plan and Environmental Impact Statement, April 2013 Appendix N Comprehensive Travel and Transportation Management Plan Route-by-Route Designation, which states: "Through the process of route-by-route designation, the interdisciplinary team established some guidelines that were applied across all four action alternatives (Alternatives B, C, D, and E) ... 5. Routes that are associated with, or provide primary access to, established right-of-ways were either designated as open or as limited administrative use only." (pages 899 and 900).

Comment ID: 000000135-28

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 2477

### Segment: 648

#### Designation

##### Current Designation

Closed (Rehab)

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- SMAs River Rims ACEC
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E
- SSPLANT Special Status Species Colorado hookless cactus

#### Rationale

##### Designation Criteria

- Minimize Damage:** Cactus – reduce density within 200m
- Minimize Harassment:** Bighorn – SSR -- summer range
- Wilderness / Natural Area:** ACEC-River Rims close within 200m cactus

##### Rationale for Decision

- Route was designated to reduce the density of routes within 200 meters of known Colorado hookless Cactus occurrences.
- Route was designated to reduce the miles of motorized and mechanized routes in bighorn sheep habitat.
- Route was designated to protect Colorado hookless cactus within the River Rims ACEC

However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 2488

### Segment: 679

#### Designation

##### Current Designation

Admin/Permitted Use Only

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- SMAs River Rims ACEC
- DENSITY Route density high in Alt A
- DENSITY Route density low in Alt E

#### Rationale

##### Designation Criteria

- **Minimize Harassment:** Bighorn – SSR -- summer range, PPSV- Minimize fragmentation
- **Wilderness / Natural Area:** ACEC-River Rims close within 200m cactus

##### Rationale for Decision

- Route was designated to ensure access to rights-of-way, private property, and livestock grazing facilities.

### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed, seek re-route or mitigation

• Hunting GroundsIn the Hunting Grounds area, a longer distance trail similar to Kokopelli's, Tabeguache, and Paradox Trails, would be of interest to this user group[COPMOBA]. Starting at the Old Spanish Trail in Orchard Mesa and ending in Delta, this trail idea is currently feasible when using a mix of single track, ATV width trail, jeep road and even Highway 50 for a few short sections. With very little trail construction making some connections to existing trails, nearly all of this highway use can be avoided. The major attraction of this area is the views from the rim above the Gunnison River in both directions. The existing trail and any trail construction should be routed to take advantage of this valuable view resource. The following recommendations are in the spirit of developing this long distance trail. Starting from the Kannah Creek area we recommend leaving 152 open to mountain bike use for a possible future connection to the lower Kannah Creek road. Possibilities included deeded access across private land, or new construction from the existing small portion of BLM land which the road accesses. Continuing, use existing full size and ATV trail to the end of 440, or a portion of 431, to access small drainage and then construct new trail to access Bridgeport Road. Then use 438, 449 and 2163 to access 2426 and 2427 to Dominguez Road (or 3098 and 3163 and then a very short new connector to 3133 out to highway) From Dominguez Road use 4000 to 3043, then single track 4001, 4005, 4006, 4007 and 3148 to reach Escalante Road. Very nice views exist in this area from the trail. The trail would then cross Escalante road to 2073 with a connection being built to 2053. This short deviation from the Escalante road would provide a safer route for mountain bikes than the twisty road with blind corners and high speed full size vehicles. The trail would cross the river on main bridge and immediately turn left and follow 2313, 2461 and 2462 with a connection to Delta via 2352, 470, 2476 and 2489. This area using borders of the northern most point of the Escalante Rim, south to the Rim Road then using 2354 as the border on the west, the main county road on the east and then back down to the rim above river on the north would provide an excellent mountain bike emphasis area for the Delta community. Visitors and local users could ride from town or drive a very short distance. Quiet Use trails are rare in this area and this topography would allow for a rewarding experience for hiker, horse and mountain bike users. This scenario would provide an area similar to the Lunch Loops and Mack Ridge areas. With a long distance rail anchoring a Quiet Use stack loop system of trails which are extremely popular and very beneficial to users and the community at trail at large

## Segment: 3048

#### Designation

##### Current Designation

Foot/Horse

##### Mitigation Criteria

- Needs Data - SSS Plants

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I low
- SMAs Wild and Scenic River area
- DENSITY Route density medium in Alt A
- DENSITY Route density low in Alt E
- SSPLANT Special Status Species Colorado hookless cactus

#### Rationale

##### Designation Criteria

- **Wilderness / Natural Area:** Wild&Scenic objectives
- **Recreation:** RMA objectives, Rec opportunities – general
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

#### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

#### Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Rehab)

**Alternative D:** Closed (Not Rehabbed)

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Public Comments On Route: 2493

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 00000135-26

- Cottonwood Creek This creek is a rare example of an almost completely unroaded, untrailed stream corridor for most of its length until it reaches Roubideau Creek and the Gunnison River. Unplanned, damaging routes along Cottonwood Creek upstream near the Forest Service boundary should all be closed to create an undisturbed full stretch of riparian corridor. Randomly created routes needing closure are: 2152, 2149, 2147, 2148, 2439, 2153, 2154, 2156. Closing these routes would restore a relatively intact watershed. Routes needing closure at the northern end of Cottonwood Creek, for the same reason, are: 3087, 3088, 3082, 3083, 3080, 3015, 2370, 2089, 2100, 3079, 3047, 2396, 2013, 3128, 3169, 2014, 2162, 2160, 2493, 3005. Some of these routes spur off 25 Mesa Road and do not actually enter the Cottonwood Creek drainage, but most if not all are not purposely created, not planned, are randomly scarring the landscape, and are introducing difficult to enforce ORV use. Only a few, if any should be left open, that have an overriding need and purpose. All the user-created routes descending into Cottonwood Creek should be closed, including 2100, 2370, 2099, and the whole tangle of routes 3169, etc etc

• 5. Since the BLM's route designations will become Implementation Decisions in the D-E NCA Comprehensive Travel and Transportation Management Plan (DRMP, page 22) it is critical that all of DMEA's access routes be accurately shown, and designated as 'Open' or 'Administrative Use Only' under all alternatives. This includes, but is not limited to, portions of the following numbered travel routes, as identified on the DENCA Draft RMP Route by Route Designation Figures (Figures N-1b\_Alt\_B\_CTMP; N-1c\_Alt\_C\_CTMP; N-1d\_Alt\_D\_CTMP; and N-1e\_Alt\_E\_CTMP): 2495, 2496, 2459, 2313, 2461, 2462, 2352, 2470, 2476, 3192, 2035, 2336, 2342.6. Designation of DMEA's access routes as 'Open' or 'Administrative Use Only' is consistent with the BLM's guidelines for the Dominguez-Escalante National Conservation Area Draft Resource Management Plan and Environmental Impact Statement, April 2013 Appendix N Comprehensive Travel and Transportation Management Plan Route-by-Route Designation, which states: "Through the process of route-by-route designation, the interdisciplinary team established some guidelines that were applied across all four action alternatives (Alternatives B, C, D, and E) ....5. Routes that are associated with, or provide primary access to, established right-of-ways were either designated as open or as limited to administrative use only." (pages 899 and 900).

Comment ID: 00000193-2

• Route Specific Comments. 1. Among the RMP alternatives, the No Action Alternative is preferred by DMEA since it allows for the continued use of existing access routes for the maintenance, repair and replacement of existing distribution lines and poles. DMEA does not believe there would be any significant impact to the maintenance, repair or replacement of the existing distribution system and access routes, under the No Action Alternative. 2. Alternative B would result in significant impacts to DMEA's ability to maintain, repair, replace or upgrade portions of the existing distribution lines within the NCA planning area. Under this alternative a number of DMEA access routes would be closed (e.g. 2496, 2035) or limited to ATV use only (e.g. 2336). Access restrictions would severely harm DMEA's ability to operate and maintain existing electrical distribution facilities as required by federal laws governing electric cooperatives/suppliers, and in accordance with our established standards. For access and maintenance of facilities, in all cases DMEA is requesting the use of existing roads and when roads are not available, the use of right-of-way for access. 3. Alternative C would result in the majority of existing DMEA access routes being designated as 'Administrative Use Only' (e.g. 2496, 2495, 2462, 2461, 2459, 2313, 3192). Based on the assumption that as a BLM right-of-way grant holder DMEA would have 'Administrative Use' and be allowed continued access to our distribution lines, no significant impacts would occur with this designation. Significant impacts would occur, however, where access is denied due to 'Closed' travel routes (e.g. 2336). 4. Alternative D would result in the majority of DMEA's access routes being designated as 'Open' north of the Gunnison River (e.g. 2496, 2495), while the majority of DMEA's access routes south of the river would be designated as 'Bicycle' (e.g. 2461, 2462, 2459, and 2313). In addition, this alternative would also designate several of DMEA's access routes as either 'Closed' or 'Administrative Use Only'. Significant negative impacts to DMEA and our customers served off these lines would occur when DMEA's access is unreasonably limited or denied. No significant impacts would be expected where access routes are designated as 'Open' or 'Administrative Use Only'. 5. Alternative E would result in significant impacts to DMEA's ability to maintain, repair and replace portions of the existing distribution lines within the NCA planning area. Under this alternative a number of DMEA access routes would be 'Closed' (e.g. 2496, 2463) or limited to 'ATV' use (e.g. 2461, 2462, 2459). Again, these limitations on access would not permit DMEA to continue operating and maintaining the existing electrical facilities in this area in accordance with federal regulations and DMEA's established standards. Significant and serious impacts would occur where access routes to DMEA's distribution lines are designated as 'Closed', or 'ATV'.

- Route Specific Comments 1. Among the RMP alternatives, the No Action Alternative is preferred by DMEA since it allows for the continued use of existing access routes for the maintenance, repair and replacement of existing distribution lines and poles. DMEA does not believe there would be any significant impacts to the maintenance, repair or replacement of the existing distribution system and access routes, under the No Action Alternative. 2. Alternative B would result in significant impacts to DMEA's ability to maintain, repair, replace or upgrade portions of the existing distribution lines within the NCA planning area. Under this alternative a number of DMEA access routes would be closed (e.g. 2496, 2035) or limited to ATV use only (e.g. 2336). Access restrictions would severely harm DMEA's ability to operate and maintain existing electrical distribution facilities as required by federal laws governing electric cooperatives/suppliers, and in accordance with our established standards. For access and maintenance of facilities, in all cases DMEA is requesting the use of existing roads and when roads are not available, the use of right-of-way for access. 3. Alternative C would result in the majority of existing DMEA access routes being designated as 'Administrative Use Only' (e.g. 2496, 2495, 2462, 2461, 2459, 2313, 3192). Based on the assumption that as a BLM right-of-way grant holder DMEA would have 'Administrative Use' and be allowed continued access to our distribution lines, no significant impacts would occur with this designation. Significant impacts would occur, however, where access is denied due to 'Closed' travel routes (e.g. 2336). 4. Alternative D would result in the majority of DMEA's access routes being designated as 'Open' north of the Gunnison River (e.g. 2496, 2495), while the majority of DMEA's access routes south of the river would be designated as 'Bicycle' (e.g. 2461, 2462, 2459, and 2313). In addition, this alternative would also designate several of DMEA's access routes as either 'Closed' or 'Administration Use Only'. Significant negative impacts to DMEA and our customers served off these lines would occur when DMEA's access is unreasonably limited or denied. No significant impacts would be expected where access routes are designated as 'Open' or 'Administrative Use Only'. 5. Alternative E would result in significant impacts to DMEA's ability to maintain, repair and replace portions of the existing distribution lines within the NCA planning area. Under this alternative a number of DMEA access routes would be 'Closed' (e.g. 2496, 2463) or limited to 'ATV' use (e.g. 2461, 2462, 2459). Again, these limitations on access would not permit DMEA to continue operating and maintaining the existing electrical facilities in this area in accordance with federal regulations and DMEA's established standards. Significant and serious impacts would occur where access routes to DMEA's distribution lines are designated as 'Closed', or 'ATV'.

#### Route: 252

## Segment: 2501

### Designation

#### Current Designation

Closed (Rehab)

#### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

#### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- CULTURAL Cultural Class I low
- DENSITY Route density highest in Alt A
- DENSITY Route density medium in Alt E

### Rationale

#### Designation Criteria

- **Minimize Damage:** NHT – close routes for setting
- **Minimize Harassment:** PPSV- Minimize fragmentation

#### Rationale for Decision

- Route was designated to improve natural setting along the Old Spanish National Historic Trail.
- Route was designated to reduce fragmentation in Priority Vegetation types

### Previous Alternatives Analyzed

- 208-195-186-182-243-257-262-253-240-221-198 I support the Quiet Trail Group's position of designating this loop for quiet trail users. The top segments 208-195-186-176 should be Mtn Bike, to connect with the Alt E proposed designation for 182-243. Note that 243 should not be designated Motorcycle as it is in Alt E as it is a short segment connecting two Mtn Bike routes. The rest of the loop should be Horse/foot as shown in Alt E. This approximately 4 mile loop makes a great short enjoyable hike. I've even done it with a group of friends on a July morning. The city high that day was 93. We finished the hike in the morning when the temperatures were still moderate. Afterwards we enjoyed lunch together at a restaurant on Orchard Mesa (local economic benefit). It is important to me to have easy access to such short quiet use loops within the NCA that are close to the city so that my friends and I can get some exercise together while enjoying each other's company even in summer months. On the height of land crossed by 240, there is a wonderful

view back down the valley. The track blends in and the valley looks pristine and untouched by humans. It gives me a small sense of what it must have been like to be the first explorer here. I'd love to find other trails like this. Near 176, there is a pretty little dry fall. And the rock in the area is a conglomerate which is such an interesting contrast to vast amounts of sandstone. On foot it is fun to find such interesting anomalies. That is what is so great about hiking on 186-176-182, you have time to see the contrast and recognize the uniqueness of the area. There's time for my friends and me to admire the power of natural forces. We like this hike because of the sense of discovery of small and large details about the geology of the area.

• The Hunting Ground roads and trails are used mostly by families, couples and casual sight-seers out for a day enjoying the great outdoors and moseying along the canyon rim. Jeeps and ATVs provide 95% of the conveyance. The Hunting Ground roads and trails generally do not have the length or technical challenge for a good group run by the clubs in the area. With that said, I'd like to see more of the roads along the canyon rim open to jeeps as well as ATVs. The Hunting Ground is a multi-use ERMA and there is no reason to close most of the rim trails to full-size vehicles. I belong to the Jeep Club and the ATV Club and I see no benefit to ATVs by shutting Jeeps out of so many of the rim trails. Most, but not all, the rim trails were put in by full-size and do not have erosion or wear-and-tear issues. Roads 317 and 326: With that as background, I recommend that roads 317 and 326 remain open to full-size as they connect between full-size roads 254 and 331

• Road 168: This road leads to a unique lookout with a beautiful view of Kannah Creek meeting the Gunnison. In the summer we travel this road by ATV, and in the winter's cold we travel this frozen road in a Jeep. We've been out to this point three times in the last 9 months always with friends or neighbors. It is a great destination in a Jeep for a sunny, winter afternoon wiener roast. Once again, with all the above as background, I recommend that road 168 remain open to Jeeps. Access to 168 is by roads 196 and a portion of 183. From the junction of 236 and 254 use 196. Connect to the northern portion of 183 which is between 196 and 168. I recommend that 196 and the northern portion of 183 remain open to Jeeps. I do support the ATV designation for 183 south of the 183/196 junction. I also support the ATV designation for 255 along the rim north of its junction with 254.

## Route: 2541

### Segment: 384

## Designation

### Current Designation

Open (All modes of travel)

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement

- RANGE Range access for general livestock management
- WILDLIFE Elk severe winter range
- RIPARIAN Riparian 1 stream crossing
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I high
- DENSITY Route density medium in Alt A
- DENSITY Route density medium in Alt E
- VEGETATION Sagebrush patches <60 acres

## Rationale

### Designation Criteria

- **Recreation:** Rec opportunities – general

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

- Bennett's Basin Because there is so much wild country to the south, Roads 2597, 2541, crossing Bennett's Basin, and 2571 and 2601 should be considered for closure to expand the wilderness. At the very least, motorized use on these routes should be kept low by not maintaining them, rather by keeping them as rough, high clearance, full-sized vehicle 4WD roads, rather than as ATV routes, not marking them as ATV routes on maps, nor adding ATV amenities, nor advertizing them as ATV routes on widely publicized ATV and 4X4 websites, brochures, gazetteers, etc.

## Route: 255

### Segment: 2537

## Designation

### Current Designation

Vehicles under 50" wide

### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RECREATION Recreation access for the Old Spanish National Historic Trail
- CULTURAL Cultural Indirect impact
- DENSITY Route density high in Alt A
- DENSITY Route density medium in Alt E

## Rationale

### Designation Criteria

- **Recreation:** RMA objectives, Rec opportunities – general
- **Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Open (All modes of travel)

**Alternative B:** Open, seek re-route or mitigation

**Alternative C:** Closed (Rehab)

• Road 168:This road leads to a unique lookout with a beautiful view of Kannah Creek meeting the Gunnison. In the summer we travel this road by ATV, and in the winter's cold we travel this frozen road in a Jeep. We've been out to this point three times in the last 9 months always with friends or neighbors. It is a great destination in a Jeep for a sunny, winter afternoon wiener roast. Once again, with all the above as background, I recommend that road 168 remain open to Jeeps. Access to 168 is by roads 196 and a portion of 183. From the junction of 236 and 254 use 196. Connect to the northern portion of 183 which is between 196 and 168. I recommend that 196 and the northern portion of 183 remain open to Jeeps.I do support the ATV designation for 183 south of the 183/196 junction. I also support the ATV designation for 255 along the rim north of its junction with 254.

## Public Comments On Route: 257

Organization, commenter: Janice Shepherd

Comment ID: 00000106-212

- 208-195-186-182-243-257-262-253-240-221-198 I support the Quiet Trail Group's position of designating this loop for quiet trail users. The top segments 208-195-186-176 should be Mtn Bike, to connect with the Alt E proposed designation for 182-243. Note that 243 should not be designated Motorcycle as it is in Alt E as it is a short segment connecting two Mtn Bike routes. The rest of the loop should be Horse/foot as shown in Alt E. This approximately 4 mile loop makes a great short enjoyable hike. I've even done it with a group of friends on a July morning. The city high that day was 93. We finished the hike in the morning when the temperatures were still moderate. Afterwards we enjoyed lunch together at a restaurant on Orchard Mesa (local economic benefit). It is important to me to have easy access to such short quiet use loops within the NCA that are close to the city so that my friends and I can get some exercise together while enjoying each other's company even in summer months. On the height of land crossed by 240, there is a wonderful view back down the valley. The track blends in and the valley looks pristine and untouched by humans. It gives me a small sense of what it must have been like to be the first explorer here. I'd love to find other trails like this. Near 176, there is a pretty little dry fall. And the rock in the area is a conglomerate which is such an interesting contrast to vast amounts of sandstone. On foot it is fun to find such interesting anomalies. That is what is so great about hiking on 186-176-182, you have time to see the contrast and recognize the uniqueness of the area. There's time for my friends and me to admire the power of natural forces. We like this hike because of the sense of discovery of small and large details about the geology of the area.

## Route: 2571

## Public Comments On Route: 2571

Organization, commenter: Karen Green

Comment ID: 00000091-1

- Sowbelly Ridge: This is an area which my family and I have hunted for decades. We are meat hunters, not sport hunters, and depend on the elk, deer and bear meat we get to supplement our food supply through the winter. It has become increasingly difficult to get to where the animals are because of roads which have already been closed. I would ask that roads numbered 2571, 2597, 2598, 2601, 3162, 2089, and 2166 remain open. We need roads to help in game retrieval. This area is usually still "t-shirt" weather in October when we hunt, which means very warm temperatures. If an animal is left for too long in that weather, it will spoil if it isn't skinned, gutted and transported as soon as possible to a meat locker. We typically get the meat out of the back country where it was killed and get it to camp to hang overnight and then immediately take it to GJ to a meat locker. We don't "road hunt"; we take our ATVs to the edge our hunting area and then start walking usually all day and for many miles. Even if we are lucky enough to get our game, none of us, even young, strong guys, can carry more than a quarter of an elk at a time very far, as has been suggested. This would mean 4 trips to carry an animal out and it can't be done before the meat spoils. So which law should we break? The law that says you can't use an ATV on an existing road to retrieve game or the law that says you can't waste meat without facing a stiff fine? These roads are currently open and I ask that they remain open for game retrieval using ATVs: 2168, 2122, 2121, 2169 & 2170, 2596, 2171, 2003, 3145, 2182, 2179, 2178, 3143 and 2181.

Comment ID: 000000135-11

- Bennett's Basin Because there is so much wild country to the south, Roads 2597, 2541, crossing Bennett's Basin, and 2571 and 2601 should be considered for closure to expand the wilderness. At the very least, motorized use on these routes should be kept low by not maintaining them, rather by keeping them as rough, high clearance, full-sized vehicle 4WD roads, rather than as ATV routes, not marking them as ATV routes on maps, nor adding ATV amenities, nor advertizing them as ATV routes on widely publicized ATV and 4X4 websites, brochures, gazetteers, etc.

Organization, commenter: Rocky Mountain Recreation Initiative, Rosalind McClellan

Comment ID: 000000135-28

- I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Public Comments On Route: 2578

Organization, commenter: Quiet Trails Group, Sherry Schenk

Comment ID: 000000115-67

• [Wagon Park/Sawmill Mesa (South) TMP-Level Comments: Quiet Trails Group supports the management decisions shown in Alternative E for the southern Sawmill Mesa area with the following specific suggestions:] Route 2024: We support closing 2024 as it appears to be a duplicative route. The surrounding routes 2578-3006-2232-2231 and 2579-3108-2210-2344 connect to Forest Service trails. If there are cattle or other uses for this road not shown on the map, we would support an administrative designation. Otherwise we would like to see 2024 closed to reduce route density in the area because of the presence of big game. We also see that these routes stop at the Dry Fork LWC unit; we would urge the BLM to make sure there is a topographical or physical barrier to stop motorized access into the LWC. Please put signage back at the Forest Boundary that the routes dead-end ahead.

Comment ID: 000000135-28

• I recommend that main arteries be kept open including the Escalante Creek, Dry Mesa, and DOW Sawmill Mesa Roads. However smaller roads such as those in Bennett's Basin, Camp and Sowbelly Ridges, Tatum Ridge and Tatum Gulch, Long Point, Black Point, Peach Orchard Point, Grade Gulch, Kelso Gulch, Cottonwood Creek, Camp Ridge should be considered for closure, especially those near the Dominguez Wilderness whose closure could expand the wilderness. Finally, the hundreds of small scars, spurs, loops and proliferating routes throughout the Sawmill Mesa unit, only some of which have been listed in the comments above, need to be closed in their entirety, excepting those very few spurs and new routes for which there is a clear and demonstrated need, and whose use can be managed and enforced by the BLM within its limited resources. As is clear, the thrust of these route inventory comments is that the Sawmill Mesa Unit of the Dominguez-Escalante NCA contains primitive, rugged, remote and solitary recreational settings of the kind that the 2007 state BLM Recreation Strategy directs be retained rather than being allowed to downslide by allowing inappropriate and uncontrolled off-road vehicle use. The Sawmill Mesa unit also provides important habitat security for big horn sheep, elk, black bear and many other species, which is being fragmented and compromised by newly introduced disturbance from ATVs and other vehicles. What, until recently, was a relatively remote and solitary landscape has become increasingly fragmented and disturbed and needs to be returned to its previous condition by comprehensive route closures. All this is in keeping with the fact that this is a National Conservation Area, not Recreation Area

## Route: 2579

### Segment: 67

#### Designation ?

## Current Designation

Open (All modes of travel)

## Mitigation Criteria

- No Mitigation Criteria for this Route Segment

## Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- RANGE Access to range improvement
- RANGE Range access for general livestock management
- SOIL Soils Steep Slopes 40%
- SOIL Soils Fragile
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk severe winter range
- CULTURAL Cultural Class I high
- DENSITY Route density low in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches >60 acres

## Rationale

### Designation Criteria

- No designation criteria for this route segment.

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Vehicles under 50" wide

Black Point Draw/Black Point Three routes between Dry Mesa and the CDOW road leading north east to Cactus Park are redundant and unnecessarily fragmenting. 2579-2210-2344 is recently pioneered and should be closed immediately, along with its spurs 2136, 2209, 2208 and 3094. These encroach on a relatively wild Escalante Creek canyon and have had no traditional or long-term use or purpose. 2024 and 3006 are parallel and duplicative, provide the same experience as each other, and should be reduced to one route. The BLM should decide which route is the least damaging, and easiest to enforce, and close the other one

## Public Comments On Route: 2581

Organization, commenter: Quiet Trails Group, Sherry Schenk

Comment ID: 000000115-55

- [Dominguez Canyon Wilderness TMP-Level Comments]Zone 3Routes 2581, 2582: Quiet Trails Group would like to keep these routes open for quiet use, connecting to 2445. The combination makes a nice 7 mile loop with the added enjoyment of interesting canyon views at a couple of spots along 2581.

Organization, commenter: Escalante Ranch, Richard Miller

Comment ID: 000000171-7

- IV. TRANSPORTATION AND TRAVEL MANAGEMENTMr. Miller's owns various parcels of private property and multiple water diversions in the area in question, and must access these lands via roads and trails which currently cross public land. In addition, Mr. Miller must necessarily access various roads and trails to in the course of managing his livestock operation. The EIS proposes closing various roads and trails to public motorized travel, to minimize resource damage caused by the public on both public and private lands. EIS at 157, 187. Mr. Miller supports the BLM's proposal to restrict public access to protect public and private property, but only so long as he is not restricted from using these roads as may be necessary to access his private lands and manage his livestock operation. Thus, to the extent that the BLM wishes to close roads to motorized public traffic, it should simultaneously grant Mr. Miller legal, administrative access. In addition, Mr. Miller notes that he would be entitled to a formal decision, subject to appeal, prior to the BLM restricting access to his private property and/or otherwise impacting his livestock operation. Mr. Miller notes that the BLM has mis-classified many routes. See EIS Map N -1 e. Specifically, many routes which have historically been used to access private land and water diversions, and/or are necessary to maintain livestock improvements or otherwise manage and operate Mr. Miller's livestock operation, have been incorrectly labeled as closed or otherwise restricted in their use. These routes should be classified as "administrative," to recognize these historic uses and to allow for continued uses consistent therewith. The Routes which have been incorrectly classified and which should be classified as "administrative" are as follows: Routes 460, 1220, 1243, 1245, 2003, 2053, 2073, 2086, 2089, 2121, 2122, 2126, 2156, 2166, 2168, 2171, 2172, 2177, 2180, 2336, 2342, 2354, 2408, 2412, 2445, 2581, 2582, 2583, 2585, 2587, 2588, 2590, 2591, 2593, 2595, 2596, 2598, 2599, 2612, 2613, 2622, 2691, 3011, 3048, 3070, 3131, 3141, and 3158. See EIS Map N-1e. In addition, Route 2072 is not completely depicted on the map, in that it extends down the river, across BLM and private property, an additional 2-3 miles, and likewise Route 3048 extends an additional 0.75 miles and leads to private property. Id. Fina Uy, Map N-1e incorrectly labels Mr. Miller's privately owned bridge, which crosses the Gunnison River at the Bridgeport area, as "administrative." I d. Mr. Miller requests that the BLM correct these errors and mis-classifications.

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer winter concentration areas
- WILDLIFE Mule deer severe winter range
- WILDLIFE Elk winter concentration areas
- WILDLIFE Elk severe winter range
- RIPARIAN Riparian 1 stream crossing
- RIPARIAN Riparian crossing ephemeral stream
- CULTURAL Cultural Class I low
- DENSITY Route density low in Alt A
- DENSITY Route density low in Alt E
- VEGETATION Sagebrush patches >60 acres

## Rationale

### Designation Criteria

- Minimize Conflicts:** Route was designated to minimize conflicts between recreation users.

### Rationale for Decision

- Route was designated to support recreation area objectives and/or provide access to and across public lands.

## Previous Alternatives Analyzed

**Alternative A:** Foot/Horse

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Not Rehabbed)

**Alternative D:** Closed (Not Rehabbed)

## Public Comments On Route: 2582

Organization, commenter: Quiet Trails Group, Sherry Schenk

Comment ID: 000000115-55

- [Dominguez Canyon Wilderness TMP-Level Comments]Zone 3Routes 2581, 2582: Quiet Trails Group would like to keep these routes open for quiet use, connecting to 2445. The combination makes a nice 7 mile loop with the added enjoyment of interesting canyon views at a couple of spots along 2581.

Organization, commenter: Escalante Ranch, Richard Miller

Comment ID: 000000171-7

- IV. TRANSPORTATION AND TRAVEL MANAGEMENTMr. Miller's owns various parcels of private property and multiple water diversions in the area in question, and must access these lands via roads and trails which currently cross public land. In addition, Mr. Miller must necessarily access various roads and trails to in the course of managing his livestock operation. The EIS proposes closing various roads and trails to public motorized travel, to minimize resource damage caused by the public on both public and private lands. EIS at 157, 187. Mr. Miller supports the BLM's proposal to restrict public access to protect public and private property, but only so long as he is not restricted from using these roads as may be necessary to access his private lands and manage his livestock operation. Thus, to the extent that the BLM wishes to close roads to motorized public traffic, it should simultaneously grant Mr. Miller legal, administrative access. In addition, Mr. Miller notes that he would be entitled to a formal decision, subject to appeal, prior to the BLM restricting access to his private property and/or otherwise impacting his livestock operation. Mr. Miller notes that the BLM has mis-classified many routes. See EIS Map N -1 e. Specifically, many routes which have historically been used to access private land and water diversions, and/or are necessary to maintain livestock improvements or otherwise manage and operate Mr. Miller's livestock operation, have been incorrectly labeled as closed or otherwise restricted in their use. These routes should be classified as "administrative," to recognize these historic uses and to allow for continued uses consistent therewith. The Routes which have been incorrectly classified and which should be classified as "administrative" are as follows: Routes 460, 1220, 1243, 1245, 2003, 2053, 2073, 2086, 2089, 2121, 2122, 2126, 2156, 2166, 2168, 2171-2172, 2177, 2180, 2336, 2342, 2354, 2408, 2412, 2445, 2581, 2582, 2583, 2585, 2587, 2588, 2590, 2591, 2593, 2595, 2596, 2598, 2599, 2612, 2613, 2622, 2691, 3011, 3048, 3070, 3131, 3141, and 3158. See EIS Map N-1e. In addition, Route 2072 is not completely depicted on the map, in that it extends down the river, across BLM and private property, an additional 2-3 miles, and likewise Route 3048 extends an additional 0.75 miles and leads to private property. Id. Fina Uy, Map N-1e incorrectly labels Mr. Miller's privately owned bridge, which crosses the Gunnison River at the Bridgeport area, as "administrative." Id. Mr. Miller requests that the BLM correct these errors and mis-classifications.

## Route: 2583

### Segment: 604

#### Designation [?](#)

##### Current Designation

Wilderness

##### Mitigation Criteria

- No Mitigation Criteria for this Route Segment

##### Planning Criteria

- RECREATION Recreation opportunities for access to and across federal lands
- WILDLIFE Mule deer severe winter range
- CULTURAL Cultural Class I high
- DENSITY Route density medium in Alt A
- DENSITY Route density medium in Alt E

#### Rationale

##### Designation Criteria

- No designation criteria for this route segment.

##### Rationale for Decision

- Non-system route inside the wilderness.

## Previous Alternatives Analyzed

**Alternative A:** Foot/Horse

**Alternative B:** Closed (Not Rehabbed)

**Alternative C:** Closed (Not Rehabbed)
