

Definitions

- **Off-Highway Vehicle (OHV):** Any motorized vehicle capable of, or designed for, travel on or immediately over land, water, or other natural terrain.
- **Tertiary Road:** Generally a two-track that may or may not be usable by a two-wheel drive vehicle. Generally formal maintenance is not performed on this type of route.
- **Single Track:** Pedestrian, bicycle, motorcycle; trucks and ATVs are prohibited. Can be up to 50 inches wide.
- **Primary Road Unpaved:** A regularly maintained road wide enough for at least two vehicles. Provides access between major points. Serves a large area, with many roads branching from it.
- **Primary Road Paved:** Major / Minor highway. Provides access between major points. Serves a large area, with many roads branching from it.
- **Secondary Road Paved:** A paved road that is not a highway, with other roads of lesser quality branching from it.
- **Secondary Road Unpaved:** Generally, a regularly maintained one-lane road, with other roads of lesser quality branching from it. Connects primary roads, and major points.
- **Reclaiming:** Has not been used enough so there is intact woody vegetation growing in it that would be damaged by the passage of a vehicle. Erosion and vegetation may block way, cause vehicle to get stuck and/or cause damage to vehicle. Crew should use discretion in using such a route.
