Dear BLM,

My family and I live in Colorado and are avid and responsible off-highway motorcyclists. I'm writing you this letter to request that you refrain from listing the greater sage grouse species on the ESA list. The resulting reduced road construction and limited soil disturbance levels aren't justified. Additionally, the large of amounts of land that are considered the grouse's habitat are out of date and most likely improperly classified.

In terms of the proposal, I prefer "Alternative A".

Thank you for your consideration of my request.

Mike Hawkins
