Sep 23, 2013

BLM Northwest Colorado

Dear Northwest Colorado,

I am writing in regards to your proposal to update your Resource Management Plan.

I want my public lands to be managed so that sage grouse and other wildlife have the habitat that they need to survive and flourish. It is critically important that priority sage grouse habitats be given strong protections during the planning process, in accordance with the recommendations of leading sage grouse scientists. These protections should include the following:

- * Priority habitats should be closed to oil and gas leasing, and withdrawn from strip mining and other forms of mineral development that are incompatible with giving the sage grouse the best chance to survive;
- * Industrial disturbance in these areas should not be allowed to exceed the 3% threshold established by scientists;
- * Above-ground power lines, communication towers, and other tall structures should be excluded from priority sage grouse areas to prevent the abandonment of important habitats;
- * Development on previously existing oil and gas leases should be restricted to levels that will have no negative effect on sage grouse, in accordance with the recommendations of the BLM's own National Technical Team;
- * Livestock grazing should be managed to leave behind sufficient grass to provide adequate cover in their nesting areas, and prevent the degradation of springs and watercourse habitats needed by sage grouse to raise their chicks; and
- * Sage grouse breeding and nesting habitats outside priority habitat areas should be managed to at least maintain current populations.

Strong protections for sage grouse habitat benefits hundreds of other types of wildlife, and can help the Bureau of Land Management safeguard opportunities for public recreation. Please ensure that sage grouse habitat management follows the recommendations of scientists, so that any commercial uses of our public lands are compatible with maintaining native wildlife.

Sincerely yours,

Dr. Robin Heileman
133 Arrow Rd # 237
Hilton Head, SC 29928-7306

BLM Northwest Colorado

Dear Northwest Colorado,

I am writing in regards to your proposal to update your Resource Management Plan.

I want my public lands to be managed so that sage grouse and other wildlife have the habitat that they need to survive and flourish. It is critically important that priority sage grouse habitats be given strong protections during the planning process, in accordance with the recommendations of leading sage grouse scientists. These protections should include the following:

- * Priority habitats should be closed to oil and gas leasing, and withdrawn from strip mining and other forms of mineral development that are incompatible with giving the sage grouse the best chance to survive;
- * Industrial disturbance in these areas should not be allowed to exceed the 3% threshold established by scientists;
- * Above-ground power lines, communication towers, and other tall structures should be excluded from priority sage grouse areas to prevent the abandonment of important habitats;
- * Development on previously existing oil and gas leases should be restricted to levels that will have no negative effect on sage grouse, in accordance with the recommendations of the BLM's own National Technical Team;
- * Livestock grazing should be managed to leave behind sufficient grass to provide adequate cover in their nesting areas, and prevent the degradation of springs and watercourse habitats needed by sage grouse to raise their chicks; and
- * Sage grouse breeding and nesting habitats outside priority habitat areas should be managed to at least maintain current populations.

Strong protections for sage grouse habitat benefits hundreds of other types of wildlife, and can help the Bureau of Land Management safeguard opportunities for public recreation. Please ensure that sage grouse habitat management follows the recommendations of scientists, so that any commercial uses of our public lands are compatible with maintaining native wildlife.

Sincerely yours,

Mr. Bruce Davis
1264 Clermont St
Denver, CO 80220-2438
