HOW TO USE THIS DOCUMENT

The following pages contain maps reflecting area descriptions contained in Chapters 2 through 4 of the Jarbidge Draft RMP/EIS. Surface management is only displayed on Maps 2 and 3 and, with the exception of Maps 79 through 83, removed from other maps in order to better display the information being presented. However, decisions made in Chapter 2 and displayed on the maps in this document only apply to BLM-managed lands.

The best available data were used to create the maps using Geographic Information Systems (GIS). Due to the scale at which the maps were created, readers should not infer that the maps reflect precise locations. These maps are provided to assist the reader in understanding the affected resources and uses of the planning area and comparing alternatives. BLM data were used to create the maps unless a different source is specified at the bottom of the map.

No warranty is made by the BLM for use of these data for purposes not intended by BLM. BLM does not warranty the accuracy, reliability, or completeness of these data for individual use or aggregate use with other data.
