I am a local resident, living in Dayton NV, and I've been riding the Pine Nut Mtn range for 20 years. I have a business in Mound House (The Outdoor Toy Store), and we are a licensed OHV Dealer. I've been involved with several off road groups over the years. There is no evidence that supports the closing or restriction of OHV use in this area on behalf of the Sage Grouse. If the grouse population is in fact diminishing, you should have a serious conversation with the Ravens in the area. The only thing that will be accomplished, is to hurt the local economy. My friends, family and customers come from all states around to ride the trails in this area. I have been working on establishing an annual guided tour event for UTV's and ATV's that will bring thousands of dollars to local businesses. Fact of the matter is that birds do not nest on trails and in all the years I've been here, I've never even seen a Sage Grouse in this area. Please allow OUR public lands remain open to us (The Public). Terry McT.
