<td>The boundaries of areas previously considered as crucial winter habitats have been adjusted by using the GIS shapefiles provided by the Utah Division of Wildlife Resources (UDWR) for deer in August 2015 and for elk in April 2013.</td>
</tr>
</tbody>
</table>

**RATIONALE / JUSTIFICATION**

Vernal RMP ROD Management Decision WL-9 states that: “Minor adjustments to crucial wildlife habitat boundaries (see Figure 18a) periodically made by the Utah Division of Wildlife Resources (UDWR) will be accommodated through plan maintenance.”

[NOTE: Figure 18a only addresses crucial winter range for mule deer and elk; it does address crucial wildlife habitat boundaries for any other wildlife species.]
