

APPENDIX E—FLUID MINERAL STIPULATIONS

Management Action #126	Alternative D	Stipulation Type: Controlled Surface Use (CSU)
Density and disturbance inside Greater Sage-Grouse designated core areas		
Management Action Text	<p>Inside Greater Sage-Grouse core habitat areas, the density and disturbance goals would include the following:</p> <ol style="list-style-type: none"> 1. The density of energy production (excluding coal and trona mining) and/or transmission structures (excluding buried pipelines or power lines) on the landscape would be managed. 2. An average of three energy production locations and/or transmission structures per 640 acres within the DDCT area would not be exceeded; and the combined value of existing and proposed disturbances within each DDCT would not exceed 9% loss of sagebrush habitat. 	
Protected Resource	Greater Sage-Grouse designated core areas	
Land Use Plan (LUP) Acres Affected (Approx.)	6,916,010 acres	
Stipulation Description	<p>Stipulation: Greater Sage-Grouse designated core areas. This area encompasses Greater Sage-Grouse designated core areas. Surface occupancy or use will be restricted to no more than an average of three energy production locations and/or transmission structures per 640 acres, and the cumulative value of all applicable surface disturbances, existing or future, must not result in greater than 9 percent loss of the sagebrush habitat within designated core areas, as mapped on the Field Office Geographic Information System (GIS) database, as described in the Disturbance Density Calculation Tool (DDCT).</p> <p>This lease does not guarantee the lessee the right to occupy the surface of the lease for the purpose of producing oil and natural gas within Greater Sage-Grouse designated core areas. The surface occupancy restriction criteria identified in this stipulation may preclude surface occupancy and may be beyond the ability of the lessee to meet due to existing surface disturbance on Federal, State, or private lands within designated core areas or surface disturbance created by other land users. The Bureau of Land Management (BLM) may require the lessee or operator to enter into a unit agreement or drilling easement to facilitate the equitable development of this and surrounding leases.</p> <p>Purpose: To protect Greater Sage-Grouse designated core areas from habitat fragmentation and loss.</p> <p>Exception: The authorized officer may grant an exception if an environmental record of review determines that the action, as proposed or conditioned, would not impair the function or utility of the site for the current or subsequent seasonal habitat, life-history, or behavioral needs of Greater Sage-Grouse. An exception to the 9% limit may be granted when additional mitigation is demonstrated to be capable of offsetting the resultant loss to Greater Sage-Grouse or their habitats. Energy production locations and transmission structures utilized for this computation are not limited to fluid minerals production and transmission. However, coal production, trona production, buried pipelines, and buried power lines are exempted from this computation. The BLM can and does grant exceptions if the BLM, in coordination with the Wyoming Game and Fish Department (WGFD), determines that granting an exception would not adversely impact the population being protected. Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see Bureau of Land Management Manuals 1624 and 3101 or Forest Service Manuals 1950 and 2820.)</p> <p>Modification: The authorized officer may modify the area subject to the stipulation or surface occupancy criteria if an environmental record of review finds that a portion of the CSU area is nonessential, or it is identified through scientific research or monitoring that the existing criteria are inadequate or overly protective for maintaining the function or utility of the site for the seasonal habitat, life-history, or behavioral needs of the Greater Sage-Grouse, including (but not limited to) reproductive display, daytime</p>	

	<p>loafing/staging activities, and nesting. Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see Bureau of Land Management Manuals 1624 and 3101 or Forest Service Manuals 1950 and 2820.)</p> <p>Waiver: This stipulation may be waived over the entire lease if, in coordination with the State wildlife agency, it is determined that the site is no longer considered in the land use plan to be within a Greater Sage-Grouse designated core area, or Greater Sage-Grouse are no longer a BLM sensitive or special status species or are not listed or determined to be warranted for listing by the U.S. Fish and Wildlife Service as threatened or endangered under the Endangered Species Act. Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see Bureau of Land Management Manuals 1624 and 3101 or Forest Service Manuals 1950 and 2820.)</p>	
Management Action #126	Proposed LUP Amendments	Stipulation Type: CSU
Density and disturbance inside Priority Habitat Management Areas (PHMA) (core only) and Forest Service priority-core management areas		
Management Action Text	<p>In PHMAs (core only), the density of disturbance of an activity (oil and gas or mining) would be limited to an average of one site per square mile (640 acres) within the DDCT, subject to valid existing rights. The one location and cumulative value of existing disturbances will not exceed 5 percent of suitable habitat of the DDCT area. Utilize the most current Greater Sage-Grouse density disturbance process (Appendix D) or other state and/or federal agreed-upon process for compliance evaluations.</p>	
Protected Resource	<p>Greater Sage-Grouse designated core habitat and Forest Service proposed sage-grouse core habitat</p>	
LUP Acres Affected (Approx.)	<p>7,003,040 acres</p>	
Stipulation Description	<p>Stipulation: Greater Sage-Grouse designated core areas. This area encompasses Greater Sage-Grouse designated core areas. Surface occupancy or use will be restricted to no more than an average of one disturbance location per 640 acres using the DDCT, and the cumulative value of all applicable surface disturbances, existing or future, must not exceed 5 percent of the DDCT area, as described in the Disturbance Density Calculation Tool (DDCT).</p> <p>This lease does not guarantee the lessee the right to occupy the surface of the lease for the purpose of producing oil and natural gas within Greater Sage-Grouse designated core areas. The surface occupancy restriction criteria identified in this stipulation may preclude surface occupancy and may be beyond the ability of the lessee to meet due to existing surface disturbance on Federal, State, or private lands within designated core areas or surface disturbance created by other land users. The BLM may require the lessee or operator to enter into a unit agreement or drilling easement to facilitate the equitable development of this and surrounding leases.</p> <p>Purpose: To protect Greater Sage-Grouse designated core areas from habitat fragmentation and loss.</p> <p>Exception: The authorized officer may grant an exception if an environmental record of review determines that the action, as proposed or conditioned, would not impair the function or utility of the site for the current or subsequent seasonal habitat, life-history, or behavioral needs of Greater Sage-Grouse. An exception to the stated limits may be granted when offsite mitigation is determined to provide an overall beneficial effect to Greater Sage-Grouse habitat and populations. The BLM can and does grant exceptions if the BLM, in coordination with the WGFD, determines that granting an exception would not adversely impact the population being protected. Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see Bureau of Land Management Manuals 1624 and 3101 or Forest Service Manuals 1950 and 2820.)</p> <p>Modification: The authorized officer may modify the area subject to the stipulation or surface occupancy criteria if an environmental record of review finds that a portion of the CSU area is nonessential, or it is identified through scientific research or monitoring that the existing criteria are inadequate or overly protective for maintaining the function or utility of the site for the seasonal habitat, life-history, or behavioral needs of the</p>	

	<p>Greater Sage-Grouse, including (but not limited to) reproductive display, daytime loafing/staging activities, and nesting. Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see Bureau of Land Management Manuals 1624 and 3101 or Forest Service Manuals 1950 and 2820.)</p> <p>Waiver: This stipulation may be waived over the entire lease if, in coordination with the State wildlife agency, it is determined that the site is no longer considered in the land use plan to be within a Greater Sage-Grouse designated core area, or Greater Sage-Grouse are no longer a BLM sensitive or special status species or are not listed or determined to be warranted for listing by the U.S. Fish and Wildlife Service as threatened or endangered under the Endangered Species Act. Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see Bureau of Land Management Manuals 1624 and 3101 or Forest Service Manuals 1950 and 2820.)</p>	
<p>Management Action #127</p>	<p>Alternative B</p>	<p>Stipulation Type: CSU</p>
<p>Density and disturbance inside Greater Sage-Grouse connectivity areas</p>		
<p>Management Action Text</p>	<p>Inside sage-grouse connectivity areas, the disturbance goals would include the following:</p> <ol style="list-style-type: none"> 1. The existing level of density of disturbance would be managed on the landscape. 2. Three percent habitat disturbance (up to 19.2 acres) per 640 acres would not be exceeded using the DDCT process. 	
<p>Protected Resource</p>	<p>Greater Sage-Grouse connectivity areas</p>	
<p>LUP Acres Affected (Approx.)</p>	<p>76,680 acres</p>	
<p>Stipulation Description</p>	<p>Stipulation: Greater Sage-Grouse connectivity areas. This area encompasses Greater Sage-Grouse connectivity areas. The cumulative value of all applicable surface disturbances (existing or future, and not limited to fluid mineral disturbances) must not exceed an average of 3% - or 19.2 acres (whichever represents the smaller disturbance) - of the sagebrush habitat mapped on the Field Office GIS database per 640 acres, as described in the Disturbance Density Calculation Tool (DDCT).</p> <p>This lease does not guarantee the lessee the right to occupy the surface of the lease for the purpose of producing oil and natural gas within Greater Sage-Grouse designated connectivity areas. The surface occupancy restriction criteria identified in this stipulation may preclude surface occupancy and may be beyond the ability of the lessee to meet due to existing surface disturbance on Federal, State, or private lands within designated connectivity areas or surface disturbance created by other land users. The BLM may require the lessee or operator to enter into a unit agreement or drilling easement to facilitate the equitable development of this and surrounding leases.</p> <p>Purpose: To protect Greater Sage-Grouse connectivity areas from habitat fragmentation and loss.</p> <p>Exception: The authorized officer may grant an exception if an environmental record of review determines that the action, as proposed or conditioned, would not impair the function or utility of the site for the current or subsequent seasonal habitat, life-history, or behavioral needs of Greater Sage-Grouse. The BLM can and does grant exceptions if the BLM, in coordination with the WGFD, determines that granting an exception would not adversely impact the population being protected. Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see Bureau of Land Management Manuals 1624 and 3101 or Forest Service Manuals 1950 and 2820.)</p> <p>Modification: The authorized officer may modify the area subject to the stipulation or surface occupancy criteria if an environmental record of review finds that a portion of the CSU area is nonessential, or it is identified through scientific research or monitoring that the existing criteria are inadequate or overly protective for maintaining the function or utility of the site for the seasonal habitat, life-history, or behavioral needs of the Greater Sage-Grouse, including (but not limited to) reproductive display, daytime loafing/staging activities, and nesting. Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see Bureau of Land Management Manuals</p>	

	<p>1624 and 3101 or Forest Service Manuals 1950 and 2820.)</p> <p>Waiver: This stipulation may be waived over the entire lease if, in coordination with the State wildlife agency, it is determined that the site is no longer considered in the land use plan to be within a Greater Sage-Grouse designated connectivity area, or Greater Sage-Grouse are no longer a BLM sensitive or special status species or are not listed or determined to be warranted for listing by the U.S. Fish and Wildlife Service as threatened or endangered under the Endangered Species Act. Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see Bureau of Land Management Manuals 1624 and 3101 or Forest Service Manuals 1950 and 2820.)</p>	
Management Action #127	Alternative D	Stipulation Type: CSU
Density and disturbance inside Greater Sage-Grouse connectivity areas		
Management Action Text	<p>Inside sage-grouse connectivity areas, the disturbance goals would include:</p> <ol style="list-style-type: none"> 1. The density of energy production (excluding coal and trona mining) and/or transmission structures (excluding buried pipelines or power lines) would be managed on the landscape. 2. Nine percent habitat disturbance (up to 57.6 acres) per 640 acres would not be exceeded using the DDCT process. 	
Protected Resource	Greater Sage-Grouse connectivity areas	
LUP Acres Affected (Approx.)	76,680 acres	
Stipulation Description	<p>Stipulation: Greater Sage-Grouse connectivity areas. This area encompasses Greater Sage-Grouse connectivity areas. The cumulative value of all applicable surface disturbances (existing or future) from energy production locations and/or transmission structures must not exceed an average of 9 percent - or 57.6 acres (whichever represents the smaller disturbance) - of the sagebrush habitat mapped on the Field Office GIS database per 640 acres, as described in the Disturbance Density Calculation Tool (DDCT).</p> <p>This lease does not guarantee the lessee the right to occupy the surface of the lease for the purpose of producing oil and natural gas within Greater Sage-Grouse designated connectivity areas. The surface occupancy restriction criteria identified in this stipulation may preclude surface occupancy and may be beyond the ability of the lessee to meet due to existing surface disturbance on Federal, State, or private lands within designated connectivity areas or surface disturbance created by other land users. The BLM may require the lessee or operator to enter into a unit agreement or drilling easement to facilitate the equitable development of this and surrounding leases.</p> <p>Purpose: To protect Greater Sage-Grouse connectivity areas from habitat fragmentation and loss.</p> <p>Exception: The authorized officer may grant an exception if an environmental record of review determines that the action, as proposed or conditioned, would not impair the function or utility of the site for the current or subsequent seasonal habitat, life-history, or behavioral needs of Greater Sage-Grouse. An exception to the 9% limit may be granted when additional mitigation is demonstrated to be capable of offsetting the resultant loss to Greater Sage-Grouse or their habitats. Energy production locations and transmission structures utilized for this computation are not limited to fluid minerals production and transmission. However, coal production, trona production, buried pipelines, and buried power lines are exempted from this computation. The BLM can and does grant exceptions if the BLM, in coordination with the WGFD, determines that granting an exception would not adversely impact the population being protected. Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see Bureau of Land Management Manuals 1624 and 3101 or Forest Service Manuals 1950 and 2820.)</p>	

	<p>Waiver: This stipulation may be waived over the entire lease if, in coordination with the State wildlife agency, it is determined that the site is no longer considered in the land use plan to be Greater Sage-Grouse connectivity habitat, or Greater Sage-Grouse are no longer a BLM sensitive or special status species or are not listed or determined to be warranted for listing by the U.S. Fish and Wildlife Service as threatened or endangered under the Endangered Species Act. Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see Bureau of Land Management Manuals 1624 and 3101 or Forest Service Manuals 1950 and 2820.)</p>	
<p>Management Action #129</p>	<p>Alternative B</p>	<p>Stipulation Type: NSO</p>
<p>Greater Sage-Grouse leks inside designated core areas and connectivity areas</p>		
<p>Management Action Text</p>	<p>Sage-grouse leks inside sage-grouse priority and connectivity habitat areas: Provide the following conservation measures as terms and conditions of the approved Resource Management Plan (RMP): New surface occupancy would not be allowed on federal leases within priority habitats. This would include winter concentration areas during any time of the year. The following exceptions would be considered:</p> <ol style="list-style-type: none"> 1. If the lease is entirely within priority habitats, a 4-mile No Surface Occupancy (NSO) would be applied around the lek, and permitted disturbances would be limited to 1 per section with no more than 3% surface disturbance in that section. 2. If the entire lease is within the 4-mile lek perimeter, permitted disturbances would be limited to 1 per section with no more than 3% surface disturbance in that section. 	
<p>Protected Resource</p>	<p>Occupied Greater Sage-Grouse leks inside designated core areas and connectivity areas</p>	
<p>LUP Acres Affected (Approx.)</p>	<p>6,992,690 acres</p>	
<p>Stipulation Description</p>	<p>Stipulation: Occupied Greater Sage-Grouse leks inside designated core areas and connectivity areas. This area encompasses occupied Greater Sage-Grouse leks inside designated core areas and connectivity areas. No surface occupancy or use is allowed within a four (4) mile radius of the perimeter of occupied Greater Sage-Grouse leks inside designated core areas and connectivity areas, as mapped on the Field Office GIS database. Purpose: To protect occupied Greater Sage-Grouse leks and associated seasonal habitat, life-history, or behavioral needs of Greater Sage-Grouse in proximity to leks, from habitat fragmentation and loss and Greater Sage-Grouse populations from disturbance inside designated core areas and connectivity areas. Exception: The authorized officer may grant an exception if an environmental record of review determines that the action, as proposed or conditioned, would not impair the function or utility of the site for the current or subsequent seasonal habitat, life-history, or behavioral needs of Greater Sage-Grouse. The BLM can and does grant exceptions if the BLM, in coordination with the WGFD, determines that granting an exception would not adversely impact the population being protected. Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see Bureau of Land Management Manuals 1624 and 3101 or Forest Service Manuals 1950 and 2820.) Modification: The authorized officer may modify the area subject to the stipulation or the NSO criteria if an environmental record of review finds that a portion of the NSO area is nonessential, or it is identified through scientific research or monitoring that the existing criteria are inadequate or overly protective for maintaining the function or utility of the site for the seasonal habitat, life-history, or behavioral needs of the Greater Sage-Grouse, including (but not limited to) reproductive display, daytime loafing/staging activities, and nesting. Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see Bureau of Land Management Manuals 1624 and 3101 or Forest Service Manuals 1950 and 2820.) Waiver: This stipulation may be waived over the entire lease if, in coordination with the State wildlife agency, it is determined that the site is no longer considered in the land use</p>	

	plan to be within a Greater Sage-Grouse designated core area or connectivity area, or Greater Sage-Grouse are no longer a BLM sensitive or special status species or are not listed or determined to be warranted for listing by the U.S. Fish and Wildlife Service as threatened or endangered under the Endangered Species Act. Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see Bureau of Land Management Manuals 1624 and 3101 or Forest Service Manuals 1950 and 2820.)
Management Action #129	Alternative D
Stipulation Type: NSO	
Greater Sage-Grouse leks inside designated core areas and connectivity areas	
Management Action Text	Greater Sage-Grouse leks inside core and connectivity habitat areas: Surface occupancy or surface disturbing activities would be prohibited or restricted on or within one quarter (0.25) mile radius of the perimeter of occupied Greater Sage-Grouse leks (Map 2-2).
Protected Resource	Occupied Greater Sage-Grouse leks inside designated core areas and connectivity areas
LUP Acres Affected (Approx.)	6,992,690 acres
Stipulation Description	<p>Stipulation: Occupied Greater Sage-Grouse leks inside designated core areas and connectivity areas. <p>Management Action Text</p>	<p>Greater Sage-Grouse leks outside core and connectivity habitat areas: Surface occupancy and surface disturbing activities would be prohibited or restricted on or within a one quarter (0.25) mile radius of the perimeter of occupied Greater Sage-Grouse leks (Map 2-3).</p>
<p>Protected Resource</p>	<p>Occupied Greater Sage-Grouse leks outside designated core areas and connectivity areas</p>
<p>LUP Acres Affected (Approx.)</p>	<p>10,334,040 acres</p>

<p>Stipulation Description</p>	<p>Stipulation: Occupied Greater Sage-Grouse leks outside designated core areas and connectivity areas. This area encompasses occupied Greater Sage-Grouse leks outside designated core areas and connectivity areas. No surface occupancy or use is allowed within a one-quarter (0.25) mile radius of the perimeter of occupied Greater Sage-Grouse leks outside designated core areas and connectivity areas, as mapped on the Field Office GIS database.</p> <p>Purpose: To protect occupied Greater Sage-Grouse leks, and associated seasonal habitat, life- history, or behavioral needs of Greater Sage-Grouse in proximity to leks, from habitat fragmentation and loss, and Greater Sage-Grouse populations from disturbance outside designated core areas and connectivity areas.</p> <p>Exception: The authorized officer may grant an exception if an environmental record of review determines that the action, as proposed or conditioned, would not impair the function or utility of the site for the current or subsequent seasonal habitat, life-history, or behavioral needs of Greater Sage-Grouse. The BLM can and does grant exceptions if the BLM, in coordination with the WGFD, determines that granting an exception would not adversely impact the population being protected. Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see Bureau of Land Management Manuals 1624 and 3101 or Forest Service Manuals 1950 and 2820.)</p> <p>Modification: The authorized officer may modify the area subject to the stipulation or the NSO criteria if an environmental record of review finds that a portion of the NSO area is nonessential, or it is identified through scientific research or monitoring that the existing criteria are inadequate or overly protective for maintaining the function or utility of the site for the seasonal habitat, life-history, or behavioral needs of the Greater Sage-Grouse, including (but not limited to) reproductive display, daytime loafing/staging activities, and nesting. Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see Bureau of Land Management Manuals 1624 and 3101 or Forest Service Manuals 1950 and 2820.)</p> <p>Waiver: This stipulation may be waived over the entire lease if, in coordination with the State wildlife agency, it is determined that the site is no longer considered in the land use plan to be within a Greater Sage-Grouse designated core area or connectivity area, or Greater Sage-Grouse are no longer a BLM sensitive or special status species or are not listed or determined to be warranted for listing by the U.S. Fish and Wildlife Service as threatened or endangered under the Endangered Species Act. Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see Bureau of Land Management Manuals 1624 and 3101 or Forest Service Manuals 1950 and 2820.)</p>

<p>Greater Sage-Grouse winter concentration areas within PHMAs (core only), and outside PHMAs (core only) when supporting wintering Greater Sage-Grouse that nest within PHMAs (core only)</p>	
<p>Management Action Text</p>	<p>Sage-grouse winter concentration areas: Surface disturbing and/or disruptive activities in mapped sage-grouse winter concentration areas would be prohibited from December 1–March 14 to protect PHMA (core only) populations of sage-grouse that use these winter concentration habitats. This timing limitation would be applied to all winter concentration areas within PHMAs. Activities in unsuitable habitats within PHMAs would be evaluated under the exception, waiver, and modification criteria and could be allowed on a case-by-case basis. Protection of additional mapped winter concentration areas in GHMAs would be implemented where winter concentration areas are identified as supporting populations of sage-grouse that attend leks within PHMAs (core only). Appropriate seasonal timing restrictions and habitat protection measures would be considered and evaluated in all identified winter concentration areas.</p>
<p>Protected Resource</p>	<p>Greater Sage-Grouse winter concentration areas within designated core areas, and outside designated core areas when supporting wintering Greater Sage-Grouse that nest within designated core areas</p>
<p>LUP Acres Affected (Approx.)</p>	<p>6,916,010 acres</p>
<p>Stipulation Description</p>	<p>Stipulation: Greater Sage-Grouse winter concentration areas. This area encompasses Greater Sage-Grouse winter concentration areas. No surface use is allowed during December 1 – March 14 within Greater Sage-Grouse winter concentration areas in designated core areas, and outside designated core areas when supporting wintering Greater Sage-Grouse that attend leks within designated core areas. Purpose: To seasonally protect Greater Sage-Grouse winter concentration areas from disruptive activities. Exception: The authorized officer may grant an exception if an environmental record of review determines that the action, as proposed or conditioned, will not impair the</p>

	<p>function and suitability of the winter concentration area, or it is determined that the winter concentration area is not occupied by concentrated populations of Greater Sage-Grouse during the period of concern. Actions designed to enhance the long-term utility or availability of suitable Greater Sage-Grouse habitat may be exempted from this timing limitation. The BLM can and does grant exceptions to seasonal restrictions if the BLM, in coordination with the WGFD, determines that granting an exception would not adversely impact the population being protected. Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see Bureau of Land Management Manuals 1624 and 3101 or Forest Service Manuals 1950 and 2820.)</p> <p>Modification: The authorized officer may modify the size and shape of the TLS area or the TLS criteria if an environmental record of review indicates the actual habitat suitability for seasonal Greater Sage-Grouse activities is greater or less than the stipulated area, or it is identified through scientific research or monitoring that the existing criteria are inadequate or overly protective for maintaining the function or utility of the site for the seasonal habitat, life-history, or behavioral needs of the Greater Sage-Grouse, including (but not limited to) reproductive display, daytime loafing/staging activities, and nesting. Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see Bureau of Land Management Manuals 1624 and 3101 or Forest Service Manuals 1950 and 2820.)</p> <p>Waiver: This stipulation may be waived over the entire lease if, in coordination with the State wildlife agency, it is determined that the described lands are incapable of serving the long-term requirements of Greater Sage-Grouse winter habitat and that these ranges no longer warrant consideration as components of Greater Sage-Grouse winter habitat. Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see Bureau of Land Management Manuals 1624 and 3101 or Forest Service Manuals 1950 and 2820.)</p>
