Dear Reader:

The Bureau of Land Management (BLM) received Expressions of Interest to sell Federal oil and gas leases on 20 parcels of Federal minerals in a future lease sale. The purpose and need for action is to 1) respond to EOIs to lease parcels of land for oil and gas development as mandated by Federal laws, and 2) prevent substantial loss of oil and gas resources from Federal lands due to drainage, and ensure that Federal lessors are not subjected to revenue losses through drainage. Offering parcels for competitive oil and gas leasing provides opportunities for private individuals or companies to explore and develop federal oil and gas resources after receipt of necessary approvals, and to sell the oil and gas in public markets.

The proposed action is to lease 20 parcels within the Miles City and North Dakota Field Office areas. The BLM applied surface use stipulations to the parcels to avoid and minimize impacts to resources consistent with management decisions in the applicable Resource Management Plan (RMP). Those stipulations include, but are not limited to no surface occupancy in Greater Sage-Grouse general habitat, streams, riparian areas, and floodplains, timing limitations to minimize impacts to special status species during critical time periods, and survey and consultation requirements for cultural resources and threatened/endangered species. The BLM prepared an Environmental Assessment to disclose the direct, indirect, and cumulative effects of the December 2019 lease sale on five resource issues: Air Resources, Socio-economic Conditions, Greater Sage-Grouse, Pronghorn Antelope, and Water Resources. The EA also discloses how stipulations avoid/minimize impacts to other resources such as, but not limited to, cultural and paleontological resources, recreation, and special status species.

Public Involvement Opportunity

The Environmental Assessment and corresponding appendices are posted on the BLM ePlanning website for a 30-day comment period starting on August 15, 2019. Written comments must be postmarked by September 14, 2019 to be considered. Comments should be within the scope of the proposed action, specific to the proposed action, have a direct relationship to the proposed action and include supporting reasons for the BLM to consider. Issues identified from public comment may be used to modify or add project design features, mitigation, or alternatives.
