Glenns Ferry, Idaho 83623-5032

Notice of Field Manager's Proposed Decision

Dear Mr. Owen:

This Proposed Decision is in response to your Application for Permit Renewal (grazing management proposal) for the Hammett #6 (01038) Allotment.

Introduction

This Proposed Decision addresses grazing management in the Hammett #6 Allotment and, if finalized, will serve as the Decision Record for Environmental Assessment (EA) DOI-BLM-ID-B010-2011-0021-EA, which this Proposed Decision incorporates by reference. This Proposed Decision reflects trend monitoring (conducted between 1987 and 2011) and assessments (conducted between 2004 and 2011), evaluation, and determination of the applicable Idaho Standards for Rangeland Health completed in 2014.

Background

The Hammett #6 Allotment is located approximately 12 miles northeast of Mountain Home, Idaho (Map 1). The current grazing permit (1101849) authorizing active use for David E. Owen, Jr. in the Hammett #6 Allotment was issued on March 1, 2014 (Table 1). This authorization will continue until this Proposed Decision becomes final, and a new grazing permit is issued.

Current Grazing Authorization

Table 1. Current mandatory terms and conditions for the Hammett #6 Allotment, Elmore County, Idaho.

Operator Name (Number)	Allotment		Livestock		Season of Use	% Public Land	AUMs		
	Name	No.	No.	Kind			Active	Suspended	Permitted
David E. Owen, Jr. (1101849) ¹	Hammett #6	01038	563	C	03/27-05/25	82	911	0	912

¹ This grazing authorization includes additional allotments (not shown above), which are not currently being evaluated. These allotments along with pertinent terms and conditions would remain on this authorization. Separate grazing authorizations would be created as necessary to implement the terms and conditions of the Final Decision.

Allotment Specific Terms and Conditions

1. Livestock grazing within Plateau, Hammett #6, Lower Bennett Creek, and Hammett Individual Allotments will be in accordance with the Final Decision 9/10/04.
2. The Allotments listed on this Grazing Permit are subject to the requirements described in 43 CFR subpart 4180 – Fundamentals of Rangeland Health and standards and guidelines for livestock grazing administration. This permit shall be modified (if necessary) to meet these requirements upon completion of a Standard and Guidelines Assessment, and Determination as scheduled by the Authorized Officer.
3. Pursuant to 43 CFR 10.4(B), the permittee must notify the BLM Field Manager, by telephone with written confirmation, immediately upon the discovery of human remains, funerary objects, sacred objects, or objects or cultural patrimony on federal land. Pursuant to 43 CFR 19.4(C), the permittee must immediately stop any ongoing activities connected with the discovery and make a reasonable effort to protect the discovered remains or objects.
4. Your certified Actual Use Report is due 15 days after authorized use has been completed.
5. In Lower Bennett Creek Allotment, the permittee will distribute the cattle to minimize overuse of critical areas.
6. In Hammett #6 Allotment, use in the Lower Pasture (containing Thorn Creek) will occur prior to April 13, each year. Use during May will alternate between the Upper Pasture of Dive Creek and the next Lower pasture containing Willow Creek. Use in the pasture west of Dive Creek will occur from May 19 to May 25. Use in this pasture may overlap the critical growth period in some years. If improvement does not occur, early removal in alternate years may be necessary. The permittee will distribute the cattle to minimize overuse of critical areas.
7. The current Exchange of Use Agreement for leased lands within Lower Bennett Creek and Hammett #6 allotments is the basis for the %PL allowances. Permitted use levels and EOU will remain the same as under the past permit, but will be licensed as %PL. If the lease is renewed for exactly the same lands, the EOU authorization will continue for the remainder of the term of this Permit. If not, maximum numbers of cattle will be adjusted accordingly.
8. In Plateau Allotment: The increase in permitted use is contingent upon a period of use during the dormant season for perennial grasses. Permitted use will revert to 267 AUMs if the permittee, heirs, or assigns request a change to spring use.

9. Permitted use will increase to 552 AUMs pending construction of an enclosure around known slickspot peppergrass populations in Hammett Individual Allotment. When the enclosure is completed, permitted use will revert to a total of 473 AUMs. Use will be permitted up to the capacity of the pastures (if the enclosure is constructed) as long as total permitted use (689 AUMs) for the Plateau and Hammett Individual Allotments is not exceeded. EA-#99-38 defines pasture capacity.
10. In Hammett Individual Allotment: The increase in permitted use is contingent upon a period of use during the dormant season for perennial grasses. Permitted use will revert to 152 AUMs if the permittee, heirs, or assigns request a change to spring use.
11. The increase in permitted use is also contingent upon construction of an enclosure around known slickspot peppergrass populations. During the interim period, water troughs, salt blocks, and feed supplements will continue to be placed a minimum of 1.2 mile from known slickspot peppergrass populations. Use will be permitted up to the capacity of the pastures (if the enclosure is constructed) as long as total permitted use (689 AUMs) for the Plateau and Hammett Individual Allotments is not exceeded. EA-#99-38 defines pasture capacity.
12. In both Plateau and Hammett Individual allotments: IF sustained poor growth conditions require short-term reductions in use, BLM will take action under 43 CFR 4110.3-2(A), which provides for temporary suspensions in permitted use due to drought.
13. In event of unusual winter weather which may force wintering deer into these allotments, cattle will be herded away from remnant shrub stands and will be removed if herding is unsuccessful.
14. Grazing within the Hammett Individual and Plateau allotments will normally occur within the periods of use specified above. However, use could occur at any time between December 1 and February 28 provided that the BLM is notified in advance.
15. The permittee shall contact the BLM Authorized Officer at least two weeks prior to maintenance on existing reservoirs and spring developments so that an archeologist can evaluate the area for site potential and possible adverse effects.
16. All Appropriate documentation regarding Base Property leases, lands offered for Exchange of Use, and livestock control agreements must be approved prior to turn-out. Leases of land and/or livestock must be notarized prior to submission and be in accordance with Boise District Policy.
17. Livestock exclosures located within your grazing allotments are closed to all domestic grazing use.
18. Trailing activities must be coordinated with the BLM prior to initiation. A Trailing Permit, crossing permit or similar authorization may be required prior to crossing public lands. Permittee will also notify any all affected permittees in advance of trailing.
19. You are required to maintain rangeland improvements in accordance with the cooperative agreements and range improvement permits in which you are a signatory or assignee.
20. Salt and/or Supplement shall not be placed within one-quarter ($\frac{1}{4}$) mile of springs, streams, meadows, aspen stands, playas special status plant populations, or water developments.
21. Changes to scheduled use requires prior approval.
22. Turn-out is subject to Boise District Range Readiness Criteria.

23. Permittee will not trail livestock through element occurrences within the management area when soils are saturated.
24. Permittee shall place salt/supplement to minimize trampling of LEPA and of slickspots, respectively. Supplements will be placed at least ½ mile, preferably ¾ mile if practicable from occurrences. Supplements that are attractants should be placed so that the cattle will not trail through an element occurrence to the supplement or a water source. Attractants should be placed so that cattle are drawn away from the area of element occurrence.

Idaho Standards and Guidelines

Rangeland health assessment and monitoring data collected between 1987 and 2011 were used to assess allotment conditions. A 2014 Determination concluded that BLM-administered lands in the Hammett #6 Allotment met the following applicable Idaho Standards for Rangeland Health (Standards): Standard 2 (Riparian Areas and Wetlands), Standard 3 (Stream Channel and Floodplains), and Standard 7 (Water Quality). They were not meeting Standard 1 (Watersheds), Standard 4 (Native Plant Communities), and Standard 8 (Threatened and Endangered Plants and Animals) and current livestock grazing was considered a significant contributing factor. Tall-, mid-, and low-stature perennial grass frequencies were static or decreasing. Grazing was not in conformance with Guidelines for Livestock Grazing Management (Guidelines) related to: providing periodic growing season rest (4); maintaining appropriate hydrologic, nutrient, and energy flows (8), and maintaining plant vigor (9). The determination identified consistent spring livestock use as being the primary causal factor; however, fires were a factor especially related to the loss of shrubs.

Proposed Decision

In accordance with 43 CFR 4110.1(b) and 43 CFR 4110.3, upon my review of the record of performance for David E. Owen, Jr., I have determined that Mr. Owen has a satisfactory record of performance for the Hammett #6 Allotment. Therefore, it is my Proposed Decision as the authorized officer to issue a new 10-year grazing permit to David E. Owen, Jr. for the Hammett #6 Allotment (Map 1) as described in Alternatives B and C, in DOI-BLM-ID-B010-2011-0021-EA and as shown below in Table 2. Additionally, the Proposed Decision would:

- Authorize 911 AUMs of Active Use in the Hammett #6 Allotment.
- Modify the season of use from the application to reflect available pastures.
- Maximum numbers of livestock would be set for the allotment.
- If objectives identified in the Adaptive Management Monitoring Plan (Appendix 7 of DOI-BLM-ID-B010-2011-0021-EA) are not met after five years, then Alternative D (DOI-BLM-ID-B010-2011-0021-EA) would be implemented.
- Issue an Exchange of Use (EOU) agreement for non-BLM lands and adjust the percentage of public land accordingly in the Hammett #6 Allotment wherein the permittee can provide proof of control through a lease, deed, or other legal instrument.
- Use in the Hammett #6 Allotment would be billed "After-the-Fact" based on the actual use report.

Proposed Grazing Authorization

Table 2. Proposed mandatory terms and conditions for the Hammett #6 Allotment, Elmore County, Idaho.

Operator Name	Allotment		Livestock		Season of Use	% Public Land	AUMs		
	Name	No.	No.	Kind			Active	Suspended	Permitted
David E. Owen, Jr.	Hammett #6	01038	345	C	03/26-07/01	82	911	0	912

Other Terms and Conditions

1. Livestock grazing must be conducted in accordance with the Terms and Conditions described in the Final Decision dated _____.
2. Livestock turn-out would be subject to District Range Readiness Criteria.
3. Changes to the scheduled use would require prior approval by the authorized officer.
4. You are required to submit a signed and dated Actual Grazing Use Report form (BLM Form 4130-5) for each allotment you graze. The completed form(s) must be submitted to this office within 15 days from the last day of your authorized annual grazing use.
5. Salt and/or supplements shall not be placed within one-quarter (1/4)-mile of springs, streams, meadows, aspen stands, playas, special status plant populations, eligible historic properties, or water developments. Use of supplements other than the standard salt or mineral block on public land requires annual authorization by the authorized officer.
6. A crossing permit may be required prior to trailing livestock across public lands. Crossing activities must be coordinated with the BLM prior to initiation. Permittee would also notify any/all affected permittees in advance of crossing.
7. Livestock exclosures located within your grazing allotment(s) would be closed to all domestic grazing use.
8. Range improvements must be maintained in accordance with the cooperative agreement and range improvement permits in which you are a signatory or assignee. All maintenance activities which may result in ground disturbance require prior approval from the authorized officer.
9. Bird ladders that meet BLM standards must be installed and functioning on water troughs located on public lands. The permittee would inform BLM if bird ladders are needed on permanent troughs, and BLM would supply bird ladders. The permittee would be responsible for providing bird ladders for temporary troughs. It would be the permittee’s responsibility to maintain and install all bird ladders.
10. Pursuant to 43 CFR 10.4(b), you must notify the BLM Field Manager, by telephone with written confirmation, immediately upon the discovery of human remains, funerary objects, sacred objects, or objects of cultural patrimony on federal lands. Pursuant to 43 CFR 10.4(c), you must immediately stop any ongoing activities connected with such discovery and make a reasonable effort to protect the discovered remains or objects.
11. Permittees or lessees shall provide reasonable administrative access across private and leased lands to the BLM for the orderly management and protection of public lands.

Allotment Specific Terms and Conditions

1. In pastures 1-4, a deferred rotation system would be implemented. The pastures in total would be used for 30-45 days between May 1 and July 1; however, in a given pasture, no use

would occur during the soft boot to seed dissemination period for grasses one in four years. Pastures 5 and 6 would be used annually between March 26 and April 30.

2. Prior to the beginning of each authorized use period in the Hammett #6 Allotment, the permittee would coordinate their intended operating plans with the BLM.
3. If the objectives identified in the monitoring plan (Appendix 7 of DOI-BLM-ID-B010-2011-0021-EA) for the Hammett #6 Allotment are not being met at the end of year five, the rest-rotation system described in Alternative D (DOI-BLM-ID-B010-2011-0021-EA) would be implemented.
4. Livestock numbers in the Hammett #6 Allotment may vary, providing season of use and AUMs are not exceeded; however, the maximum number of livestock present at any one time would not exceed 500 head.

Rationale

BLM analyzed four alternatives for grazing permit renewal in the Hammett #6 Allotments in DOI-BLM-ID-B010-2011-0021-EA.

Periodic (pastures 1-4) or annual (pastures 5 and 6) deferment during the critical growth period would benefit watersheds (EA Section 3.1.2.4). Minor to moderate improvements to soils would occur as biotic cover (i.e., perennial grasses and forbs, and biological soil crusts) increase in vigor and frequency. Soils and watersheds would be maintained in good condition in pastures 1 and 2 and significant progress would be made toward meeting Standard 1 in the remaining pastures.

Periodic avoidance of critical growing season use in pastures 1-4 would benefit upland vegetation (EA Section 3.2.2.5). Although pastures 1 and 2 would not be rested, resiliency (higher elevation areas with greater precipitation) and some deferment would help maintain communities in good condition over the long term. Mountain big sagebrush and Wyoming big sagebrush communities in pastures 3 and 4 would exhibit moderate increases in perennial grass and forb vigor and minor increases in frequency. Pastures 5 and 6 would be used annually prior to perennial grass critical growing period. Perennial grasses would incur trampling and grazing impacts each year, but would have an opportunity to re-grow and set seed with adequate precipitation. The maximum number of livestock allowed would be less than current numbers, which, in combination with a deferment system, would allow recovery of vegetation over the long term.

Streams and springs would be maintained in proper functioning condition and Standards 2 and 3 would continue to be met over the long term (EA Section 3.5.2.4).

Implementation of the grazing management actions would result in minor to moderate improvements in vigor and frequency of perennial grasses and forbs that would increase horizontal nesting cover for greater sage-grouse (EA Section 3.6.2.5). Significant progress would be made toward meeting Standards 4 and 8 where shrubs become re-established.

The permittee applied for a March 1 turn-out date to allow incorporation of the Lower Bennett Allotment into the grazing system. Both allotments were combined in the application. Because

DOI-BLM-ID-B010-2011-0021-EA only addressed the Hammett #6 Allotment, a March 26 turnout date, consistent with current permitted use, would be appropriate. Impacts from the later turnout would be consistent with those described for Alternative C.

Incorporating the Adaptive Management Plan (Appendix 7 of DOI-BLM-ID-B010-2011-0021-EA) would help insure that significant progress would be made toward meeting Standards where current livestock use is considered a primary causal factor for not meeting Standards. Upland vegetation and wildlife objectives, methods of measuring objectives, and triggers for changes in management when objective are not met are clearly stated and can be effectively implemented. If objectives are not met at the end of year five, implementation of Alternative D would make significant progress toward meeting Standards 1, 2, 3, 4, and 8 (EA sections 3.1.2.5, 3.2.2.6, 3.5.2.5, and 3.6.2.6).

Conclusion

In conclusion, it is my decision to select Alternative C for the Hammett #6 Allotment (with reduced maximum livestock numbers). I have determined the renewal of this grazing permit would be in conformance with the Jarbidge Resource Management Plan (RMP) dated March 23, 1987, and the proposed livestock grazing would meet or make significant progress toward meeting applicable Standards and Guidelines.

Authority

The authorities under which this decision is being issued include the Taylor Grazing Act of 1934, as amended, and the Federal Land Policy and Management Act of 1976, as promulgated through Title 43 of the Code of Federal Regulations (CFR) Subpart 4100 Grazing Administration - Exclusive of Alaska. My decision is issued under the following specific regulations:

- 4100.0-8 Land use plans. The Jarbidge RMP designates the Hammett #6 allotment available for livestock grazing;
- 4110.3 Changes in permitted use;
- 4130.2 Grazing permits or leases. Grazing permits may be issued to qualified applicants on lands designated as available for livestock grazing. Grazing permits shall be issued for a term of 10 years unless the authorized officer determines that a lesser term is in the best interest of sound management;
- 4130.3 Terms and conditions. Grazing permits must specify the term and conditions that are needed to achieve desired resource conditions, including both mandatory and other terms and conditions;
- 4130.6-1(a) Exchange of Use grazing agreements; and
- 4180 Fundamentals of Rangeland Health and Standards and Guidelines for Grazing Administration. Implementation of this proposed decision would result in the taking of appropriate action(s) to modify existing grazing management to make significant progress toward achieving rangeland health.

Right of Protest and/or Appeal

Any applicant, permittee, lessee or other interested public may protest the Proposed Decision under 43 CFR §§ 4160.1 and 4160.2, in person or in writing within 15 days after receipt of such decision to:

Tate Fischer
Four Rivers Field Manager
3948 S. Development Avenue
Boise, Idaho 83705-5339

The protest, if filed, should clearly and concisely state the reason(s) why the Proposed Decision is in error.

In accordance with 43 CFR § 4160.3(a), in the absence of a protest, the Proposed Decision will become the Final Decision of the authorized officer without further notice unless otherwise provided in the Proposed Decision.

In accordance with 43 CFR § 4160.3(b), upon a timely filing of a protest, after a review of protest received and other information pertinent to the case, the authorized officer shall issue a Final Decision.

Any applicant, permittee, lessee or other person whose interest is adversely affected by the Final Decision may file an appeal in writing in for the purpose of a hearing before an administrative law judge in accordance with 43 CFR §§ 4160.3(c), 4160.4, 4.21, and 4.470. The appeal must be filed within 30 days following receipt of the Final Decision or within 30 days after the date the Proposed Decision becomes final. The appeal may be accompanied by a petition for a stay of the decision in accordance with 43 CFR § 4.471 pending final determination on appeal. The appeal and petition for a stay must be filed in the office of the authorized officer, as noted above. In accordance with 43 CFR § 4.401, the BLM does not accept fax or email filing of a notice of appeal and petition for stay. Any notice of appeal and/or petition for stay must be sent or delivered to the office of the authorized officer by mail or personal delivery.

Within 15 days of filing the appeal, or the appeal and petition for stay, with the BLM officer named above, the appellant must also serve copies on other persons named in the *copies sent to* section of this decision in accordance with 43 CFR § 4.421 and on the Office of the Field Solicitor located at the address below in accordance with 43 CFR §§ 4.470(a) and 4.471(b).

Boise Field Solicitor's Office
University Plaza
960 S. Broadway Avenue Suite 400
Boise, Idaho 83706-6240

The appeal shall state the reasons, clearly and concisely, why the appellant thinks the Final Decision is in error and otherwise complies with the provisions of 43 CFR § 4.470.

Should you wish to file a petition for a stay, see 43 CFR 4.471 (a) and (b). In accordance with 43 CFR 4.471(c), a petition for a stay must show sufficient justification based on the following standards:

1. The relative harm to the parties if the stay is granted or denied.
2. The likelihood of the appellant's success on the merits.
3. The likelihood of immediate and irreparable harm if the stay is not granted, and
4. Whether the public interest favors granting the stay.

As noted above, the petition for stay must be filed in the office of the authorized officer and served in accordance with 43 CFR 4.471. In accordance with 43 CFR 4.401, BLM does not accept fax or email filing of a notice of appeal and petition for stay. Any notice of appeal and/or petition for stay must be sent or delivered to the office of the authorized officer by mail or personal delivery.

Any person named in the decision that receives a copy of a petition for a stay and/or an appeal, see 43 CFR 4.472(b) for procedures to follow if you wish to respond.

If you have any questions, please contact either Matt McCoy Four Rivers Assistant Field Manager at (208) 384-3343, or myself at 208-384-3430.

Sincerely,

/s/ Tate Fischer
