**CERTIFIED MAIL – RETURN RECEIPT REQUESTED 7011 2970 0002 6309 0731**

Double Anchor Ranch  
C/O Mr. Kelly Riggs  
5714 W. Double Anchor Drive  
Glenns Ferry, Idaho 83623-5022

**Notice of Field Manager's Proposed Decision**

Dear Mr. Riggs:

This Proposed Decision is in response to your Application for Permit Renewal (grazing management proposal) for the East Hammett #5 (01037) and East Bennett Mountain (01101) allotments.

**Introduction**

This Proposed Decision addresses grazing management in the Hammett #5 (01037, formerly East Hammett #5 and Pasture 3 of East Bennett Mountain) and East Bennett Mountain (01101, formerly Pasture 2 of East Bennett Mountain) allotments and, if finalized, will serve as the Decision Record for Environmental Assessment (EA) DOI-BLM-ID-B010-2011-0021-EA, which this Proposed Decision incorporates by reference. This Proposed Decision reflects completion of an evaluation and determination, based on trend monitoring (conducted between 1988 and 2011), 2004 field assessments, and subsequent site visits, of the applicable Idaho Standards for Rangeland Health in 2014.

**Background**

The East Hammett #5 Allotment (01037) is located approximately 13-18 miles northeast of Mountain Home, Idaho (Map 1). The current grazing permit (1101847) authorizing active use for Double Anchor Ranch in the East Hammett #5 and East Bennett Mountain allotments was issued on December 28, 2004 (Table 1). This authorization will continue until this Proposed Decision becomes final, and a new grazing permit is issued.

Current Grazing Authorization

Table 1. Current mandatory terms and conditions for the East Hammett #5 and East Bennett Mountain Allotments, Elmore County, Idaho.

Operator Name (Number)	Allotment		Livestock		Season of Use	% Public Land	AUMs		
	Name	No.	No.	Kind			Active	Suspended	Permitted
Double Anchor Ranch (1101847) <sup>1</sup>	East Hammett #5	01037	320	C	04/10-06/30	100	863	0	1,493
			314	C	10/01-11/30	100	630		
	East Bennett Mountain	01101	49	C	07/01-09/30	100	148	0	146

<sup>1</sup> This grazing authorization includes additional allotments (not shown above), which are not currently being evaluated. These allotments along with pertinent terms and conditions would remain on this authorization. Separate grazing authorizations would be created as necessary to implement the terms and conditions of the Final Decision.

**Allotment Specific Terms and Conditions**

1. Livestock grazing within the Double Anchor FFR, SW Alkali Seeding, East Hammett #5, and East Bennett Mountain allotments will be in accordance with this Final Decision, dated 9/10/04.
2. All Allotments listed on the Grazing Permit are subject to the requirements of 43 CFR 4180 – Fundamentals of Rangeland Health and Guidelines for Grazing Administration. This permit shall be modified (if necessary) to meet these requirements upon completion of a Standard and Guidelines Assessment, and Determination as scheduled by the Authorized Officer.
3. Pursuant to 43 CFR 10.4(B), the permittee must notify the BLM Field Manager, by telephone with written confirmation, immediately upon the discovery of human remains, funerary objects, sacred objects, or objects or cultural patrimony on federal land. Pursuant to 43 CFR 19.4(C), the permittee must immediately stop any ongoing activities connected with the discovery and make a reasonable effort to protect the discovered remains or objects.
4. Exchange of Use AUMs will be reflected in the annual billing based on current EOU agreements.
5. Double Anchor FFR-Livestock numbers may differ annually providing the period of use and total AUMs have not been exceeded. Grazing within the FFR shall not be detrimental to the public lands.
6. Annual use within the SW alkali allotment may be for a shorter period with a higher number of livestock providing the permitted period of use and permitted AUMs have not been exceeded. Fall use is not permitted in the SW Alkali Allotment at this time.
7. Voluntary Non-Use (generally 500 AUMs) may be taken on an annual basis without limitation in E. Hammett #5 in the fall to assist in making improvement in riparian habitats on Cold Springs Creek.
8. Your certified Actual Use Report is due 15 days after authorized use has been completed.
9. Livestock exclosures located within your grazing allotments are closed to all domestic grazing use.

10. You are required to coordinate trailing activities with the BLM prior to initiation. A Trailing Permit or similar authorization may be required prior to crossing public lands.
11. Salt and/or Supplement shall not be placed within one-quarter (¼) mile of springs, streams, meadows, aspen stands, playas, special status plant populations, or water developments.
12. Changes in schedules use require prior approval.
13. Turn-out is subject to Boise District Range Readiness Criteria.
14. All Appropriate documentation regarding Base Property leases, lands offered for Exchange of Use, and livestock control agreements must be approved prior to turn-out. Leases of land and/or livestock must be notarized prior to submission and be in compliance with Boise District Policy.
15. You are required to maintain rangeland improvements in accordance with the cooperative agreements and range improvements permits in which you are a signatory or assignee.
16. The land use plan allowable use level for riparian and upland vegetation is 50% of the current year's growth. Livestock should be removed from the use area, pasture, or allotment when this utilization has been reached.
17. Permittee will not trail livestock through element occurrences within the management area when soils are saturated.
18. Permittee shall place salt/supplement to minimize trampling of LEPA and of slickspots, respectively. Supplements will be placed at least ½ mile, preferably ¾ mile if practicable from occurrences. Supplements that are attractants should be placed so that cattle will not trail through an element occurrence to the supplement or a water source. Attractants should be placed so that cattle are drawn away from the area of the element occurrence.
19. LEPA conservation measures for that portion of EO 08 that is north of the Ole Oregon Trail Road and west of the Rye Grass Road will not be grazed for the 2004 season.

### **Idaho Standards and Guidelines**

Rangeland health assessment and monitoring data collected between 1988 and 2011 were used to assess allotment conditions. A 2014 Determination concluded that BLM-administered lands in the East Hammett #5 Allotment met the following applicable Idaho Standards for Rangeland Health (Standards): Standard 7 (Water Quality). They were not meeting Standard 1 (Watersheds), Standard 2 (Riparian Areas and Wetlands), Standard 3 (Stream Channel and Floodplains), Standard 4 (Native Plant Communities), and Standard 8 (Threatened and Endangered Plants and Animals) and current livestock grazing was considered a significant contributing factor. Tall- and mid-stature perennial grass frequencies were decreasing and shrub frequencies were static or increasing. Approximately 1.3 miles of perennial streams and seven springs were in functioning at risk (FAR) condition. Grazing was not in conformance with Guidelines for Livestock Grazing Management (Guidelines) related to: providing periodic growing season rest (4); maintaining wetland function (5); stream channel stability (7); maintaining appropriate hydrologic, nutrient, and energy flows (8); maintaining plant vigor (9); and providing conditions necessary to sustain native species (12). The determination identified consistent spring and fall livestock use as being the primary causal factor.

Based on a 2014 Determination, BLM-administered lands in the East Bennett Mountain Allotment were meeting Standard 8. Standards 1 and 4 were not being met; however the cause could not be determined. Active erosion indicators were present and perennial grass frequencies were decreasing and below site potential. Grazing was in conformance with Guidelines.

### **Proposed Decision**

In accordance with 43 CFR 4110.1(b), 43 CFR 4110.2, and 43 CFR 4110.3 and upon my review of the record of performance for Double Anchor Ranch, I have determined that Double Anchor Ranch has a satisfactory record of performance for the East Hammett #5 and East Bennett Mountain allotments. Therefore, it is my Proposed Decision as the authorized officer to issue a new 10-year grazing permit to Double Anchor Ranch for the Hammett #5 and East Bennett Mountain allotments (Map 1) as described in Alternative C, in DOI-BLM-ID-B010-2011-0021-EA and as shown below in Table 2. Additionally, the Proposed Decision would:

- Combine the current East Hammett #5 Allotment with Pasture 3 of the current East Bennett Mountain Allotment to create the Hammett #5 Allotment (01037). The current Pasture 2 of the East Bennett Mountain Allotment would become the East Bennett Mountain Allotment (01101).
- Authorize 1,121 and 10 AUMs of Active Use, respectively, in the Hammett #5 and East Bennett Mountain allotments.
- Suspend 508 AUMs of Active Use in the Hammett #5 Allotment.
- Maximum numbers of livestock would be set for each allotment.
- Maintain the Section 20 and Section 22 spring developments (work completed by permittee). Develop livestock water facilities at Craster and Section 5 springs (work completed by BLM and permittee). Construct up to 3.1 miles of let-down fencing to BLM fencing specifications (work completed by permittee). All projects (Map 1) would be constructed to BLM standards and as described in DOI-BLM-ID-B010-2011-0021-EA. The permittee would be responsible for annual maintenance of these projects.
- If objectives identified in the Adaptive Management Monitoring Plan (Appendix 7 of DOI-BLM-ID-B010-2011-0021-EA) for the Hammett #5 Allotment are not met after five years, then Alternative D (DOI-BLM-ID-B010-2011-0021-EA) would be implemented. Alternatively, if statistically significant increases in objectives occur, then a portion or all of the 508 AUMs placed in suspension could be reinstated if resource values would be maintained.
- Issue an Exchange of Use (EOU) agreement for non-BLM lands and adjust the percentage of public land accordingly in the Hammett #5 Allotment wherein the permittee can provide proof of control through a lease, deed, or other legal instrument.
- Use in the Hammett #5 Allotment would be billed "After-the-Fact" based on the actual use report.

Proposed Grazing Authorization

Table 2. Proposed mandatory terms and conditions for the Hammett #5 and East Bennett Mountain Allotments, Elmore County, Idaho.

Operator Name	Allotment		Area (Pasture) Use Schedule		Livestock		Season of Use	% Public Land	AUMs		
	Name	No.			No.	Kind			Active	Suspended	Permitted
Double Anchor Ranch	Hammett #5	01037	Even Yrs.	West	201	C	04/15-08/01	59	425	508	1,629
				East	309	C	09/15-11/30	89	696		
			Odd Yrs.	East	218	C	04/15-08/01	89	695		
				West	285	C	09/15-11/30	59	426		
	East Bennett Mountain	01101	1	2	C	06/01-10/31	100	10	0	10	

**Other Terms and Conditions**

1. Livestock grazing must be conducted in accordance with the Terms and Conditions described in the Final Decision dated \_\_\_\_\_.
2. Livestock turn-out would be subject to District Range Readiness Criteria.
3. Changes to the scheduled use would require prior approval by the authorized officer.
4. You are required to submit a signed and dated Actual Grazing Use Report form (BLM Form 4130-5) for each allotment you graze. The completed form(s) must be submitted to this office within 15 days from the last day of your authorized annual grazing use.
5. Salt and/or supplements shall not be placed within one-quarter (1/4)-mile of springs, streams, meadows, aspen stands, playas, special status plant populations, eligible historic properties, or water developments. Use of supplements other than the standard salt or mineral block on public land requires annual authorization by the authorized officer.
6. A crossing permit may be required prior to trailing livestock across public lands. Crossing activities must be coordinated with the BLM prior to initiation. Permittee would also notify any/all affected permittees in advance of crossing.
7. Livestock exclosures located within your grazing allotment(s) would be closed to all domestic grazing use.
8. Range improvements must be maintained in accordance with the cooperative agreement and range improvement permits in which you are a signatory or assignee. All maintenance activities which may result in ground disturbance require prior approval from the authorized officer.
9. Bird ladders that meet BLM standards must be installed and functioning on water troughs located on public lands. The permittee would inform BLM if bird ladders are needed on permanent troughs, and BLM would supply bird ladders. The permittee would be responsible for providing bird ladders for temporary troughs. It would be the permittee's responsibility to maintain and install all bird ladders.
10. Pursuant to 43 CFR 10.4(b), you must notify the BLM Field Manager, by telephone with written confirmation, immediately upon the discovery of human remains, funerary objects, sacred objects, or objects of cultural patrimony on federal lands. Pursuant to 43 CFR 10.4(c), you must immediately stop any ongoing activities connected with such discovery and make a reasonable effort to protect the discovered remains or objects.
11. Permittees or lessees shall provide reasonable administrative access across private and leased lands to the BLM for the orderly management and protection of public lands.

### **Allotment Specific Terms and Conditions**

1. Annual spring and fall use in the Hammett #5 Allotment would be authorized as follows:  
**Even** numbered years: West (aka Ryegrass) Pasture, 04/15 through 08/01  
East (aka Cold Sprs) Pasture, 09/15 through 11/30  
**Odd** numbered years: East (Cold Sprs) Pasture, 04/15 through 08/01  
West (Ryegrass) Pasture, 09/15 through 11/30
2. Prior to the beginning of each authorized use period in the Hammett #5 Allotment, the permittee would coordinate their intended operating plans with the BLM.
3. If the objectives identified in the monitoring plan (Appendix 7 of DOI-BLM-ID-B010-2011-0021-EA) for the Hammett #5 Allotment are not being met at the end of year five, the rest-rotation system described in Alternative D (DOI-BLM-ID-B010-2011-0021-EA) would be implemented. The pasture division fence would be removed and herding would be required to implement the system.
4. Livestock numbers in the Hammett #5 Allotment may vary, providing season of use and AUMs are not exceeded; however, the maximum number of livestock present at any one time would not exceed 450 head.
5. Livestock numbers in the East Bennett Mountain Allotment may vary, provided season of use and AUMs are not exceeded; however, the maximum number of livestock present at any one time would not exceed 600 head.

### **Rationale**

The BLM analyzed four alternatives for livestock grazing in the Hammett #5 and East Bennett Mountain allotments in DOI-BLM-ID-B010-2011-0021-EA.

#### **Hammett #5**

Implementing a spring/fall deferred-rotation system and a lower stocking rate than current Adjusted Management (10.6 acres/AUM versus 9.9 acres/AUM for Adjusted Management and 7 acres/AUM for current permitted use) would benefit watersheds (EA Section 3.1.2.4). Fencing to prevent livestock drift could further benefit soils in the deferred pasture, but would be difficult to quantify. Limiting maximum numbers to 450 head would reduce trampling impacts in concentrated use areas to a level that would maintain or improve watershed conditions. The expected lighter utilization would help reduce trampling and vegetation removal impacts to vegetation beyond current practices and leave more vegetation cover to protect the soil surface, resulting in slow, but significant progress being made toward meeting Standard 1.

The spring/fall deferred-rotation system and conservative stocking rate would continue to benefit upland plant communities (EA Section 3.2.2.5). The expected lighter utilization (<40%), based on a more conservative stocking rate, would help reduce grazing and trampling impacts to vegetation beyond current practices. Impacts from growing season use would be reduced because 18% less use (156 AUMs) would occur during the spring than under current Adjusted Management. Impacts from spring use would only occur in alternate years in a given area. Increased fall use could have minor impacts on palatable shrubs, but would occur in alternate years. Limiting maximum numbers to 450 head would reduce trampling impacts in concentrated use areas to a level that would maintain or improve vegetation conditions.

Mountain big sagebrush (where the shrub canopy is not closed), Wyoming big sagebrush, and bunchgrass communities in the former East Hammett #5 Allotment that are not meeting Standard 4 would show minor to moderate improvements; and the condition of plant communities that are properly functioning East Hammett #5 and Pasture 3 of East Bennett Mountain would be maintained. Low sagebrush communities would also exhibit minor to moderate improvements to perennial herbaceous plant condition. Conditions in mountain big sagebrush communities that are not meeting the Standard (in the former East Bennett Mountain Allotment and northern part of the former East Hammett #5 Allotment) would remain static, but livestock grazing would not be a contributing factor.

Approximately 15 acres of upland vegetation adjacent to the proposed pasture division fence could be disturbed and trampled over the long term; however, the fencing would facilitate more effective implementation of the deferred-rotation system resulting in improvements in perennial grasses throughout the pastures (EA Section 3.2.2.5). Development of Craster and Section 5 springs would result in short-term construction related and long-term livestock utilization/congregation related impacts to vegetation. Up to 3 acres at each site (6 acres total) would incur short-term impacts. Over the long-term as livestock use these facilities, up to 40 acres surrounding each spring (80 acres total) would exhibit a gradient of disturbance. Net short- and long-term impacts to upland vegetation from repairs to Section 22 and Ryegrass springs would be negligible because the facilities are already used by livestock.

With a deferred-rotations system, the two FAR condition segments of West Fork Cold Springs Creek (1.3 miles) would improve to proper functioning condition and meet Standards 2 and 3 over the long term, as the density of deep-rooted riparian vegetation in the understory increases (EA Section 3.5.2.4). Livestock grazing and trampling impacts would only occur in the spring or fall in alternate years, allowing recovery of vegetation density, cover, and vigor. Fall grazing impacts could be greater (than current use levels) depending on woody vegetation utilization levels, but impacts would only occur every other year.

Moderate short-term construction or maintenance impacts would occur at four springs proposed for maintenance or development (EA Section 3.5.2.4). Grazing and trampling impacts would not be expected to increase over current levels because livestock already use these water sources. Implementation of a deferred-rotation system would limit livestock impacts to either the spring or fall, but not both, resulting in improvements in all FAR condition springs. There would be a improvement in functioning condition and Standard 2 would be met over the long term.

Disturbance and trampling impacts to nesting and brood-rearing habitat would be reduced from current levels because of lower stocking rates and would only occur every other spring in a given pasture (EA Section 3.6.2.5). Low stocking rates would help reduce structural and trampling impacts to shrubs in winter habitat. Limiting maximum numbers to 450 head would reduce trampling impacts in concentrated use areas to a level that would maintain nesting and brood-rearing conditions. Standards 4 and 8 would be met over the long term where increases in perennial grasses and forbs would provide suitable nesting cover and forage.

Incorporating the Adaptive Management Plan (Appendix 7 of DOI-BLM-ID-B010-2011-0021-EA) would help insure that significant progress would be made toward meeting Standards where current livestock use is considered a primary causal factor for not meeting Standards. Objectives for upland vegetation, riparian areas, and wildlife habitat, methods of measuring objectives, and triggers for changes in management when objectives are not met are clearly stated and can be effectively implemented. If objectives are not met at the end of year five, implementation of Alternative D would make significant progress toward meeting Standards 1, 2, 3, 4, and 8 (EA sections 3.1.2.5, 3.2.2.6, 3.5.2.5, and 3.6.2.6).

### East Bennett Mountain

Vegetation cover is similar to expected levels (i.e., shrub cover has not affected grass cover). Although stocked at a moderate rate (5.5 acres/AUM), annual use primarily after the growing period in a resilient community would maintain suitable watershed, vegetation, and special status species habitat conditions. The season of use would occur primarily outside the growing period for perennial grasses; therefore, cover and vegetation should be maintained. Concentrated use would not be expected to occur on BLM-administered lands. Standards 1, 4, and 8 would continue to be met over the long term (EA sections 3.1.2.4, 3.2.2.5, and 3.6.2.5).

### **Conclusion**

In conclusion, it is my decision to select Alternative C for the Hammett #5 (with reduced maximum livestock numbers) and East Bennett Mountain allotments. I have determined the renewal of this grazing permit would be in conformance with the Jarbidge Resource Management Plan (RMP) dated March 23, 1987, and the proposed livestock grazing would meet or make significant progress toward meeting applicable Standards and Guidelines.

### **Authority**

The authorities under which this decision is being issued include the Taylor Grazing Act of 1934, as amended, and the Federal Land Policy and Management Act of 1976, as promulgated through Title 43 of the Code of Federal Regulations (CFR) Subpart 4100 Grazing Administration - Exclusive of Alaska. My decision is issued under the following specific regulations:

- 4100.0-8 Land use plans. The Jarbidge RMP designates the East Hammett #5 and East Bennett Mountain allotments available for livestock grazing;
- 4110.3 Changes in permitted use;
- 4130.2 Grazing permits or leases. Grazing permits may be issued to qualified applicants on lands designated as available for livestock grazing. Grazing permits shall be issued for a term of 10 years unless the authorized officer determines that a lesser term is in the best interest of sound management;
- 4130.3 Terms and conditions. Grazing permits must specify the terms and conditions that are needed to achieve desired resource conditions, including both mandatory and other terms and conditions;
- 4130.6-1(a) Exchange of Use grazing agreements; and
- 4180 Fundamentals of Rangeland Health and Standards and Guidelines for Grazing Administration. This Proposed Decision would result in taking appropriate action(s) to

modify existing grazing management in order to make significant progress toward achieving rangeland health.

### **Right of Protest and/or Appeal**

Any applicant, permittee, lessee or other interested publics may protest the Proposed Decision under 43 CFR §§ 4160.1 and 4160.2, in person or in writing within 15 days after receipt of such decision to:

Tate Fischer  
Four Rivers Field Manager  
3948 S. Development Avenue  
Boise, Idaho 83705-5339

The protest, if filed, should clearly and concisely state the reason(s) why the Proposed Decision is in error.

In accordance with 43 CFR § 4160.3(a), in the absence of a protest, the Proposed Decision will become the Final Decision of the authorized officer without further notice unless otherwise provided in the Proposed Decision.

In accordance with 43 CFR § 4160.3(b), upon a timely filing of a protest, after a review of protest received and other information pertinent to the case, the authorized officer shall issue a Final Decision.

Any applicant, permittee, lessee or other person whose interest is adversely affected by the Final Decision may file an appeal in writing in for the purpose of a hearing before an administrative law judge in accordance with 43 CFR §§ 4160.3(c), 4160.4, 4.21, and 4.470. The appeal must be filed within 30 days following receipt of the Final Decision or within 30 days after the date the Proposed Decision becomes final. The appeal may be accompanied by a petition for a stay of the decision in accordance with 43 CFR § 4.471 pending final determination on appeal. The appeal and petition for a stay must be filed in the office of the authorized officer, as noted above. In accordance with 43 CFR § 4.401, the BLM does not accept fax or email filing of a notice of appeal and petition for stay. Any notice of appeal and/or petition for stay must be sent or delivered to the office of the authorized officer by mail or personal delivery.

Within 15 days of filing the appeal, or the appeal and petition for stay, with the BLM officer named above, the appellant must also serve copies on other persons named in the *copies sent to* section of this decision in accordance with 43 CFR § 4.421 and on the Office of the Field Solicitor located at the address below in accordance with 43 CFR §§ 4.470(a) and 4.471(b).

Boise Field Solicitor's Office  
University Plaza  
960 S. Broadway Avenue Suite 400  
Boise, Idaho 83706-6240

The appeal shall state the reasons, clearly and concisely, why the appellant thinks the Final Decision is in error and otherwise complies with the provisions of 43 CFR § 4.470.

Should you wish to file a petition for a stay, see 43 CFR 4.471 (a) and (b). In accordance with 43 CFR 4.471(c), a petition for a stay must show sufficient justification based on the following standards:

1. The relative harm to the parties if the stay is granted or denied.
2. The likelihood of the appellant's success on the merits.
3. The likelihood of immediate and irreparable harm if the stay is not granted, and
4. Whether the public interest favors granting the stay.

As noted above, the petition for stay must be filed in the office of the authorized officer and served in accordance with 43 CFR 4.471. In accordance with 43 CFR 4.401, BLM does not accept fax or email filing of a notice of appeal and petition for stay. Any notice of appeal and/or petition for stay must be sent or delivered to the office of the authorized officer by mail or personal delivery.

Any person named in the decision that receives a copy of a petition for a stay and/or an appeal, see 43 CFR 4.472(b) for procedures to follow if you wish to respond.

If you have any questions, please contact either Matt McCoy Four Rivers Assistant Field Manager at (208) 384-3343, or myself at 208-384-3430.

Sincerely,

*/s/ Tate Fischer*
