

Worksheet
Determination of NEPA Adequacy (DNA)
U.S. Department of the Interior
Bureau of Land Management

FIELD OFFICE: Stillwater Field Office, Carson City District

NEPA NUMBER: DOI-BLM-NV-C010-2012-0006-DNA

CASEFILE PROJECT NUMBER: NVN-088129X Geothermal Unit

PROPOSED ACTION TITLE/TYPE: Magma McCoy II Road Improvement

LOCATION/LEGAL DESCRIPTION: T22N, R39E, Sections 24, 25, and 36

APPLICANT: Magma Energy (U.S.) Corp.

A. Description of the Proposed Action and any applicable mitigation measures

Magma Energy (U.S.) Corp. proposes to repair and improve the existing county road in northern Edwards Creek Valley in order to provide all weather access to the McCoy II project area. Ground disturbance would be limited to the existing roadbed. No new disturbance would be authorized. The McCoy II geothermal exploration project was analyzed in DOI-BLM-NV-C010-2011-0514-EA and FONSI/DR signed 10/18/2011.

B. Land Use Plan (LUP) Conformance

LUP Name: **Carson City Field Office Consolidated Resource Management Plan**

Date Approved: May 9, 2001

The proposed action is consistent with the applicable land use plan because it is clearly consistent with the following land use plan decisions, objectives, terms, conditions:

Objective 1: Encourage development of energy and mineral resources in a timely manner to meet national, regional and local needs consistent with the objectives for other public land uses.

Objective 2: Oil, gas, and geothermal exploration and production upon BLM land are conducted through leases with the Bureau and are subject to terms and stipulations to comply with all applicable federal and state laws pertaining to various considerations for sanitation, water quality, wildlife, safety, and reclamation. Stipulations may be site specific and are derived from the environmental analysis process.

C. Identify applicable National Environmental Policy Act (NEPA) documents and other related documents that cover the proposed action.

Carson City District Office – Magma Energy (U.S.) Corp. McCoy II Geothermal Exploration Project, Environmental Assessment DOI-BLM-NV-C010-2011-0514-EA and FONSI/DR signed 10/18/2011.

D. NEPA Adequacy Criteria

1. Is the new proposed action a feature of, or essentially similar to, an alternative analyzed in the existing NEPA document(s)? Is the project within the same analysis area, or if the project location is different, are the geographic and resource conditions sufficiently similar to those analyzed in the existing NEPA document(s)? If there are differences, can you explain why they are not substantial?

The proposed action is outside but adjacent to the project area analyzed in the Magma Energy (U.S.) Corp. McCoy II Geothermal Exploration Project, Environmental Assessment DOI-BLM-NV-C010-2011-0514-EA and FONSI/DR signed 10/18/2011. However, no new ground disturbance would be authorized. Improvements and repairs would be limited to the existing road bed.

2. Is the range of alternatives analyzed in the existing NEPA document(s) appropriate with respect to the new proposed action, given current environmental concerns, interests, and resource values?

Yes, environmental concerns, interests and resource values have not changed at all since the completion of the 2011 EA. The range of alternatives in the 2011 EA includes improvements to existing roads within the project area. These are still appropriate since the environmental constraints of the geothermal exploration have not changed.

3. Is the existing analysis valid in light of any new information or circumstances (such as, range-land health standard assessment, recent endangered species listings, updated lists of BLM-sensitive species)? Can you reasonably conclude that new information and new circumstances would not substantially change the analysis of the new proposed action?

Yes, the anticipated impacts to the resources have not changed. The proposed action is to repair and improve an existing road. The proposed action will not have any adverse effect on the human health or environment.

4. Are the direct, indirect, and cumulative effects that would result from implementation of the new proposed action similar (both quantitatively and qualitatively) to those analyzed in the existing NEPA document?

Yes, the 2011 EA analyzed cumulative impacts on relevant resources. The analyzed action is not different from the construction and improvement of roads analyzed in the 2011 EA. Ground disturbance would be limited to the existing road bed.

5. Are the public involvement and interagency review associated with existing NEPA document(s) adequate for the current proposed action?

Yes, the geothermal resource exploration operations were analyzed in the 2011 EA which describes the public involvement. Consultation with other agencies and interested parties was conducted for that document. The Fallon Paiute Tribe will be notified via letter of the proposed road improvements.

E. Persons/Agencies/BLM Staff Consulted

<u>Name</u>	<u>Title</u>	<u>Resource/Agency Represented</u>
Jason Wright <i>JW 10/19/11</i>	Stillwater Archaeologist	BLM Carson City District

Note: Refer to the EA/EIS for a complete list of the team members participating in the preparation of the original environmental analysis or planning documents.

Conclusion

Based on the review documented above, I conclude that this proposal conforms to the applicable land use plan and that the NEPA documentation fully covers the proposed action and constitutes BLM's compliance with the requirements of the NEPA.

Signature of Project Lead

Signature of NEPA Coordinator

Signature of Responsible Official
