

Finding of No Significant Impact
Arizona Nevada Tower Corporation Request for New
Communication Facility at the Lower Potosi Communication Site

Serial Number: N-88220

Environmental Assessment DOI-BLM-NV-S010-2012-0075-EA

I have reviewed the Environmental Assessment (EA) for the right-of-way for a new unmanned wireless telecommunications facility consisting of a 200' x 200' site containing a 12' x 80' prefabricated multi-tenant equipment building, up to a 300' self-supported lattice tower, power to the facility, and an access road to the site, at the Lower Potosi Communication Site on public lands. Based on the analysis of potential environmental impacts contained in EA DOI-BLM-NV-S010-2012-0075-EA, I have determined that the proposed action with the mitigation measures described in the EA will not have any significant impacts on the environment and an Environmental Impact Statement is not required.

Mitigation Measures:

Effects the proposed action may have on our resources were addressed for air quality, invasive species/noxious weeds, hydrologic conditions, recreation, paleontology, threatened, endangered or candidate animal and plant species, water resources, wilderness, wetlands, and other types of resource issues. Comments providing substantive information relevant to the analysis and mitigation measures are included in the Exhibit B Stipulations which will be attached to the grant(s)
