APPLICANT: Stillwater Field Office, CCDO, BLM

**A. Description of the Proposed Action and any applicable mitigation measures**

The BLM is proposing to lease 50 parcels covering approximately 109,657 acres of public land for oil and gas exploration and development in Churchill County, Nevada on December 11, 2012. Lease issuance alone does not authorize any ground disturbing activities to explore for or develop oil and gas beyond casual use without site-specific approval for the intended operation. Such approval would require a separate site-specific environmental analysis.

**B. Land Use Plan (LUP) Conformance**

LUP Name: **Carson City Field Office Consolidated Resource Management Plan**  
Date Approved: May 9, 2001

The proposed action is consistent with the applicable land use plan because it is clearly consistent with the following land use plan decisions, objectives, terms, conditions:

**Objective 1:** Encourage development of energy and mineral resources in a timely manner to meet national, regional and local needs consistent with the objectives for other public land uses.

**Objective 2:** Oil, gas, and geothermal exploration and production upon BLM land are conducted through leases with the Bureau and are subject to terms and stipulations to comply with all applicable federal and state laws pertaining to various considerations for sanitation, water quality, wildlife, safety, and reclamation. Stipulations may be site specific and are derived from the environmental analysis process.

**C. Identify applicable National Environmental Policy Act (NEPA) documents and other related documents that cover the proposed action.**

#### **D. NEPA Adequacy Criteria**

**1. Is the new proposed action a feature of, or essentially similar to, an alternative analyzed in the existing NEPA document(s)? Is the project within the same analysis area, or if the project location is different, are the geographic and resource conditions sufficiently similar to those analyzed in the existing NEPA document(s)? If there are differences, can you explain why they are not substantial?**

The proposed action is within the project area analyzed in the 2009 EA and is identical to an alternative analyzed therein.

**2. Is the range of alternatives analyzed in the existing NEPA document(s) appropriate with respect to the new proposed action, given current environmental concerns, interests, and resource values?**

Yes, environmental concerns, interests and resource values have not changed at all since the completion of the 2009 EA. The range of alternatives in the 2009 EA is still appropriate since the environmental constraints of oil and gas leasing have not changed.

**3. Is the existing analysis valid in light of any new information or circumstances (such as, range- land health standard assessment, recent endangered species listings, and updated lists of BLM-sensitive species)? Can you reasonably conclude that new information and new circumstances would not substantially change the analysis of the new proposed action?**

Yes, the anticipated impacts to the resources have not changed. The proposed action will not have any adverse effect on the human health or environment. Any changes to lists of sensitive or endangered species would be addressed in a site specific environmental analysis should any future activity be **proposed. A full interdisciplinary team convened a field visit to the lease parcel sites on May 17, 2012 – no concerns were identified.**

**4. Are the direct, indirect, and cumulative effects that would result from implementation of the new proposed action similar (both quantitatively and qualitatively) to those analyzed in the existing NEPA document?**

Yes, the 2009 EA analyzed cumulative impacts on relevant resources. The cumulative impacts to public lands resulting from oil and gas leasing would remain unchanged from those analyzed in the 2009 EA. A full interdisciplinary team convened a field visit to the lease parcel sites on June 9, 2011 – no concerns were identified.

**5. Are the public involvement and interagency review associated with existing NEPA document(s) adequate for the current proposed action?**

Yes, oil and gas leasing was analyzed in the 2009 EA which describes the public involvement. Consultation with other agencies and interested parties was conducted for that document. Letters were sent to Nye County Commissioners regarding the upcoming lease offerings within their jurisdiction. The Yomba Shoshone and Fallon Paiute Shoshone Tribes will be notified via letter of the proposed leasing action.

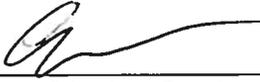

**E. Persons/Agencies/BLM Staff Consulted**

<u>Name</u>	<u>Title</u>	<u>Resource/Agency Represented</u>
Linda Appel	Rangeland Management Specialist	BLM Carson City District <i>LA 6/18/12</i>
Ed Klimasauskas	Geologist	BLM Carson City District <i>E 6-11-12</i>
Jill Devaurs	Rangeland Management Specialist	BLM Carson City District <i>JD 6-11-12</i>
Dave Schroeder	Natural Resource Specialist	BLM Carson City District
Dan Westermeyer	Recreation Planner	BLM Carson City District <i>DW 6-11/12</i>
John Wilson	Wildlife Biologist	BLM Carson City District <i>JW 6-11-12</i>
Jason Wright	Archaeologist	BLM Carson City District <i>JW 6-11-12</i>

Note: Refer to the EA/EIS for a complete list of the team members participating in the preparation of the original environmental analysis or planning documents.

**Conclusion**

Based on the review documented above, I conclude that this proposal conforms to the applicable land use plan and that the NEPA documentation fully covers the proposed action and constitutes BLM's compliance with the requirements of the NEPA.
