Dear Interested Public:

The Bureau of Land Management (BLM), Humboldt River Field Office (HRFO) is seeking public input as it initiates the Environmental Analysis (EA) process for a proposal by Humboldt County Road Department, to improve access along Mayhew Road. This project would include construction of a right-of-way (ROW) of varying widths including Bruce Drive, an extension of Mayhew, and Bronco Drive. Humboldt County is seeking a perpetual ROW, as the roadway will be utilized daily.

NDOT has proposed the closure of two of the four access points for Sand Dunes subdivisions for safety reasons. With the closure, the closest safe access for the subdivisions is Mayhew Drive. To extend Mayhew Drive, crossing public lands would be required. Several two track roadways exist on BLM property in the area and with the addition of an improved gravel roadway, the two tracks will no longer be utilized.

The road would be constructed with crushed aggregate in the center of the ROW, 24 feet in width, with open v-ditch drainage structures on both sides of the roadway for the entire length. The proposal includes 18 inch drain pipes at all roadway intersections that would facilitate the flow of water. The intersections at Bruce, Sarah, Delaney, Shirley (between Delaney and Bruce), Baker and Bronco Streets would have a 50 foot wide radius. Construction equipment used would include a dozer, loader, backhoe, grader, and a dump truck. The construction time frame would be two years from the grant of the ROW.

The planned location is about nine miles north of Winnemucca, NV, in the Sand Dunes Subdivisions off of US 95. (see enclosed figures 1 and 2):
