14. Special Conditions

Normal maintenance of fences is defined as: The labor and materials needs to keep and existing fence in a condition adequate to prevent livestock movement through, under, or over the fence. This includes but is not limited to:

1. Ensuring that all strands of fence wire between fence posts are tightly stretched and secured to the fence posts by metal clips or staples as appropriate for the type of post.
2. Ensuring that all fence posts are securely in place and that bent, broken, or missing posts and stays are replaced as needed.
3. Ensuring that all wooden stretch panels, corner braces, and gate posts are securely in place and in sound condition. Rotten or broken wood posts must be replaced as needed.
4. Ensuring that all strands of fence wire and fence spacing wires or wood poles which form the gates are properly stretched and secured. Each gate should have a suitable smooth retaining wire or latch for secure closure of the gate.
5. Ensuring that the appropriate Bureau standards are maintained.
