The road is paved and existing and is the sole access for the Power Plant. Along with the access Road, NV Energy is proposing landscaping on either side of the road at the request of Clark County Planning Department.

Decision:

It is my decision to implement the above proposed action known as Alternative No. 1, with the mitigation measures and relevant information identified in the environmental assessment and incorporated into stipulations known as Exhibit A.

Compliance with NEPA:

An environmental analysis was carried out in compliance with the NEPA Act, to evaluate the proposal for a ROW for an access road and landscaping on public lands.

Effects the proposed action may have on our resources were addressed for air quality, invasive species/noxious weeds, hydrologic conditions, paleontology, threatened, endangered or candidate animal and plant species, water resources, wilderness, wetlands, and other types of resource issues.

This environmental analysis is appropriate in this situation because there are no extraordinary circumstances potentially having effects that may significantly affect the environment. The proposed action has been reviewed, and none of the extraordinary circumstances described in 516 DM 2 of the Department Manual apply.

Public Involvement:

Consultation and internal scoping and coordination was carried out with federal, state, and local agencies and interested parties.

Effects the proposed action may have on our resources were evaluated by resource specialists. Comments providing substantive information relevant to the analysis and mitigation measures were included in exhibit A stipulations which will be attached to the grant.

An environmental analysis is available for review by the public on the internet on the DOI.GOV website under NEPA number: DOI-BLM-NV-S010-2012-0135-EA.

Rationale:

The proposed action is in conformance with the approved land use plan: Las Vegas Resource Management Plan and Final Environmental Impact Statement, and Record of Decision for the Approved Las Vegas Resource Management Plan and Final Environmental Impact Statement, October 1998.

The action meets ROW Management. Objective: RW-1: “ Meet public demand and reduce impacts to sensitive resources by providing an orderly system of development for transportation, including legal access to private inholdings, communications, flood control, major utility transmission lines, and related facilities.”

The action meets Management Direction. RW-1-h: “All public land within the planning area, except as stated in RW-1-c through RW-1-g, are available at the discretion of the agency for ROW’s under the authority of the Federal Land Policy Management Act.”
