Notice of Field Manager's Final Decision

Dear Mrs. Cornell:

This Final Decision temporarily closes all burned public lands administered by the Bureau of Land Management (BLM) located in Thompson Ranch Pasture (2) of the Cornell (00820) Allotment. The public lands in this pasture were affected by the Pony Complex fires (Pony Fire) in 2013 (Map 1). This decision will be effective upon issuance and until resource objectives identified in this decision are achieved.

Background

The August 10, 2013 Pony Fire burned 44 acres of public land in the Thompson Ranch Pasture. The fire damaged vegetation including grasses, forbs, and sagebrush, which left soils exposed and susceptible to accelerated wind and water erosion. Because the Pony Fire exhibited low to extreme burn intensities, vegetation treatments beyond natural recovery were identified. An Emergency Stabilization and Burned Area Rehabilitation Plan for the Pony Fire was signed on September 12, 2013.

Prior to the fire, vegetation communities were characterized by sagebrush steppe (Wyoming big sagebrush overstory with perennial and annual, primarily exotic, grass and forb understory) or exotic annual (with some perennial grasses and forbs present) communities.

The pasture contains public lands classified as greater sage-grouse Preliminary General Habitat (PGH). PGH are areas outside of breeding habitat that support important seasonal (winter, summer, fall habitat, migration corridors) or year-round habitat. Greater sage-grouse are a candidate species for listing under the Endangered Species Act. The closest active lek is approximately five miles from the burned pasture.

Prior to the fire, your annual grazing authorization for the Cornell Allotment (Authorization #1101617) was for 12 Animal Unit Months (AUMs) (Table 1).

Table 1. Permitted use for Authorization #1101617, Thompson Ranch Pasture, Cornell (00820) Allotment, Elmore County, Idaho.

Allotment Name & No.	Livestock No. & Kind.	Season of Use	% Public Land	AUMs		
				Active	Suspended	Permitted
Cornell (00820) – Thompson Ranch Pasture	1 Cattle	03/01-02/28	100	12	0	12

Determination of Land Use Plan Conformance and NEPA Adequacy

The grazing closure is consistent with the Kuna Management Framework Plan (KMFP) dated March 30, 1983.

KMFP:

- Manage all watersheds to achieve stable or moderate soil surface factor conditions and, where feasible/economical, strive for maintaining or establishing good perennial vegetation cover (WS-1.1).

The environmental effects of the treatments were adequately addressed in the Boise District Normal Fire Rehabilitation Plan (NFRP) Environmental Assessment (EA), #ID-090-2004-050 and the Determination of Land Use Plan Conformance and NEPA Adequacy (DNA), DOI-BLM-ID-B010-2012-0049-DNA. I have determined that the implementation of the action identified in the Pony Fire ESR Plan would have no significant effects on the quality of the human environment. My review found that the EA adequately addressed impacts that could occur from this action.

Final Decision

My Final Decision is to temporarily close to grazing all BLM-administered lands in the Thompson Ranch Pasture of the Cornell (00820) Allotment in Elmore County, Idaho. Your active use will be temporarily reduced from 12 AUMs to zero AUMs (Table 2).

Table 2. Modified Permitted use for Authorization #1101617, Cornell (00820) Allotment, Elmore County, Idaho.

Allotment Name & No.	Livestock No. & Kind.	Season of Use	% Public Land	AUMs		
				Active	Suspended	Permitted
Cornell (00820) – Thompson Ranch Pasture	0 Cattle	03/01-02/28	100	0	12	0

The grazing closure will remain in effect for a minimum of two growing seasons and until the following resource objectives for burned areas are achieved:

- Canopy gaps of 0 – 50 cm comprise 95% of measured transects.
- Total ground cover is greater than 60%.
- In addition to the above objectives, a qualitative assessment of the following will also occur before grazing resumption would occur:
 - Perennial plant vigor.
 - Desirable perennial plant seed production.

- Precipitation information during the non-growing (winter) and growing (spring through early summer) seasons.
- Erosion potential.

When it is determined by BLM staff (based on monitoring) that vegetation recovery objectives have been met, grazing resumption would occur at seasons and levels (up to the terms and conditions described in **Error! Reference source not found.**) that would maintain the long-term viability of vegetation conditions.

This decision is final and effective upon issuance in accordance with 43 CFR 4110.3-2(a), 4110.3-3(b), and 4160.3(f).

Rationale

I have decided to close all public lands in the Thompson Ranch Pasture to livestock grazing because the Pony Fire resulted in the loss of vegetation cover that protects the soil surface. This lack of protection increases both soil susceptibility to accelerated erosion and the opportunity for invasive and noxious weeds to establish. Grazing the burned areas would further increase the potential for resource damage and decrease perennial plant recovery. Because of these potential risks, I have determined that the public land grazing areas affected by Pony Fire require immediate protection of the soil, vegetation, and other resources. Achievement of the recovery objectives will ensure watershed protection and vegetation health. Because of the need for resource protection, I am required by 43 CFR § 4110.3-3(b), to modify your grazing permit within the Middle Pasture of the Cornell Allotment. Based on these factors and previous livestock use, I have determined that a temporary suspension of the AUMs associated with burned BLM acres will best allow vegetation resource objectives to be met.

Fire perimeter, land ownership, and permitted use data were used to determine BLM acres and AUMs in the pasture. Prior to the occurrence of the fire, the permittee was authorized for 12 AUMs on approximately 45 acres of public land in the pasture (Table 1). The 44 acres of BLM-administered land in the pasture represents 98% of the public land the permittee is authorized to graze. The commensurate reduction based on acreage would be 12 AUMs.

This temporary suspension of active use will be made as provided for in 4110.3-2(a).

Authority

The authority under which this decision is made is found in the following 43 CFR 4100 citations:

- 4110.3-2(a) Decreasing permitted use (suspending permitted use on a temporary basis due to fire)
- 4110.3-3(b) Implementing reductions in permitted use (due to fire)
- 4160.3(f) Final decisions (effective upon issuance)

Right of Appeal

Any applicant, permittee, lessee or other person whose interest is adversely affected by the final decision may file an appeal in writing in accordance with 43 CFR 4.470 and 43 CFR 4160.4. The appeal must be filed within 30 days following receipt of the final decision. The appeal may be

accompanied by a petition for a stay of the decision in accordance with 43 CFR 4.471 pending final determination on appeal. Any notice of appeal and/or petition for stay must be sent or delivered to the office of the authorized officer: Tate Fischer, Four Rivers Field Office Manager, 3948 Development Avenue, Boise ID 83705, by mail or personal delivery. The person/party must also serve a copy of the appeal on the Office of the Solicitor, Boise Field Solicitors Office, University Plaza, 960 Broadway Ave., Suite 400, Boise Idaho, 83706 and person(s) named [43 CFR 4.421(h)] in the *copies sent to:* section of this decision.

Should you wish to file a motion for stay, see 43 CFR 4.471 (a) and (b). In accordance with 43 CFR 4.471(c), a petition for a stay must show sufficient justification based on the following standards:

1. The relative harm to the parties if the stay is granted or denied.
2. The likelihood of the appellant's success on the merits.
3. The likelihood of immediate and irreparable harm if the stay is not granted, and
4. Whether the public interest favors granting the stay.

As noted above, the petition for stay must be filed in the office of the authorized officer and served in accordance with 43 CFR 4.471. In accordance with 43 CFR 4.401, BLM does not accept fax or email filing of a notice of appeal and petition for stay. Any notice of appeal and/or petition for stay must be sent or delivered to the office of the authorized officer by mail or personal delivery.

Any person named in the decision that receives a copy of a petition for a stay and/or an appeal see 43 CFR 4.472(b) for procedures to follow if you wish to respond.

If you have any questions, please contact Mike Barnum, Range Management Specialist, at (208) 384-3218, or myself at (208) 384-3430.

Sincerely,

/S/Tate Fischer 8/15/2014
