

**Finding of No Significant Impact
Rights-of-way for a Detention Basin on Public Lands**

Serial Number: N-92317

DOI-BLM-NV-S010-2014-0002-EA

I have reviewed the Environmental Assessment (EA) for the right-of-way for an detention basin and related facilities on public lands. Based on the analysis of potential environmental impacts contained in the EA DOI-BLM-NV-S010-2014-0002-EA, I have determined that the proposed action with the mitigation measures described in the EA will not have any significant impacts on the environment and an Environmental Impact Statement is not required.

Mitigation Measures:

Effects the proposed action may have on our resources were addressed for air quality, invasive species/noxious weeds, hydrologic conditions, paleontology, threatened, endangered or candidate animal and plant species, water resources, wilderness, wetlands, and other types of resource issues. Comments providing substantive information relevant to the analysis and mitigation measures are included in Exhibit A Stipulations which will be attached to the grant.
