

# **Arrowhead Outfitter Base Camp and Staging Area Renewal**

## **Introduction**

Every year since 2008, Arrowhead Outfitters has been authorized a permit to use public lands for a base camp and float plane staging area for transporting their hunting clients located at mile posts 145 and 150.5 off the Dalton Highway from August through September each year.

## **Summary**

BLM proposes to renew the permit to Arrowhead Outfitters, LLC for a base camp site, staging and refueling two (2) float planes at Grayling Lake located at mile posts 145 and 150.5 off the Dalton Highway for transporting hunting clients. This proposal would be from August 27, 2014 through October 15, 2017 yearly for three (3) years.

## **Alternatives Considered**

The No Alternative Option is the only alternative considered and was not selected as Arrowhead Outfitters, LLC would not be authorized to stage float planes and establish a base camp for transporting their clients.

## **Decision**

I have decided to authorize a permit for the purpose of a base camp at mile post 145 on the Dalton Highway and float plane refueling and staging area on Grayling Lake, mile post 150.5 each year for three (3) years from August 27, 2014 through October 15, 2017, to Arrowhead Outfitters, LLC.

## **Management Considerations**

The Categorical Exclusion and supporting documentation have been prepared consistent with the requirements of various statutes and regulations, including but not limited to:

- Alaska National Interest Lands Conservation Act of 1980 (ANILCA)
- Federal Land Policy and Management Act of 1976 (FLPMA)
- National Environmental Policy Act of 1969 (NEPA)
- National Historic Preservation Act of 1966 (NHPA)

One BLM land use plan applies to the overall project area, the Utility Corridor Resource Management Plan.

## **Public Involvement**

It was determined that due to the remoteness of the action, there would be no impact to the general public. Additionally, this document was published to the electronic Central Yukon Field Office NEPA Register on March 17, 2014. No comments have been received as of March 31, 2014.

## **Appeal or Protest Opportunities:**

This decision may be appealed to the Interior Board of Land Appeals, Office of Hearings and Appeals, in accordance with 43 CFR Part 4 and DOI Form 1842-1. The notice of appeal must be filed in the Bureau of Land Management Central Yukon Field Office, 1150 University Avenue, Fairbanks, Alaska 99709 within 30 days from receipt of this decision. If you decide to file an

appeal, you must carefully follow the procedure described on the enclosed form 1842-1. If you don't file your appeal at the locations specified on the form within 30 days, the Board may dismiss your appeal as untimely without considering its merits. Be sure to send a copy of your notice of appeal to each party named in this decision and to all of the addresses on the enclosed form 1842-1. You may also ask the Board to stay or suspend the effect of this decision while your appeal is pending. If you desire a stay, you must enclose your request for a stay with your notice of appeal. You have the burden of showing a stay is justified. The Board will grant a stay only if you provide sufficient justification based on the following standards:

1. The relative harm to the parties if the Board grants or denies the stay,
2. The likelihood of the success of your appeal on its merits,
3. The likelihood of immediate and irreparable harm if the Board does not grant the stay, and;
4. Whether the public interest favors granting a stay.

**Approval from Authorized Official:**

**Field Office Manager Decision**

Having considered a full range of alternatives, associated impacts, and public and agency input, I have decided to adopt and implement the attached Approved Plan in conformance with the Utility Corridor Resource Management Plan.

## — Essential Fish Habitat

**NEPA Document No.:** DOI-BLM-AK-F030-2014-0017-CX

**Prepared by:** David A. Esse

**Date:** 3/21/2014

**Essential Fish Habitat (EFH) Finding:** No anadromous species are present in the project area (ADF&G 2014) so the effects on EFH are expected to be nonexistent in the area encompassed by this permit. Based on this fact, the proposed action is assigned the EFH determination: *No effect*, and no further EFH consultation is required.

**NEPA Document No.:** DOI-BLM-AK-F030-2014-0017-CX

**/Serial No.:** F-95417

**Applicant:** Arrowhead Outfitters, LLC

**Location:** Mile posts 145 and 150.5 on the Dalton Highway more particularly described as within Secs. 23, Tps. 24 N., Rs. 13 and 14 W., and Secs. 27 and 34, T. 25 N., R. 13 W., Fairbanks Meridian, containing approximately 6.00 acres

**Prepared by:** Lisa Shon Jodwalis

**Date:** 3/19/2014

## Proposed Action

Arrowhead Outfitters proposes to renew their permit to stage and refuel two (2) float planes at Grayling Lake and a base camp for their business approximately five (5) miles south of Grayling Lake each year for three (3) years from August 27, 2014 through October 15, 2017. The base camp would be temporarily parked on a hard gravel pad next to the camp site which consists of a 30 foot self-contained motorhome, 20 foot enclosed utility trailer and a pick up truck. There would be two large holding tanks which he dumps the RV holding tanks into; he can go for three-four weeks before he would need to dump holding tanks at Coldfoot or BLM dump at five-mile. The base camp would also house a small generator, ATV with small trailer, 10 foot x 10 foot screened tent, 12 foot x 14 foot canvas tent, toilet tent with porta-potty, satellite dish with base and 6–8 client vehicles. The camp is located about five miles south of Grayling Lake at the expired Recreation & Public Purpose lease F-78201. The area is off road to material sites F-95107 (Alyeska) and F-93007 (ADOT&PF). This lease was for a sanitary landfill in an old gravel pit and has expired. The camp site is on the entrance road to the landfill site and was not part of the landfill. At the Grayling Lake location they propose to stage two floatplanes M6 Maule-235 (N56458) and M7 Maule-235 (N770XR) while conducting their flight operation for approximately 35 hunting clients. They also propose to install temporary dock due to an accommodation for a physical limitation to assist him in loading, unloading, refueling and docking their aircraft. When not in use, the ATV would be parked out of sight of the public. The dock consists of wood 4 foot x 60 foot which would be removed at the end of the season. The following equipment would be staged at the aircraft tie down area — a very small generator for heating up the aircraft during very cold temperatures, stored in a storage container and under a tarp when not in use. A plastic tote containing absorbent pads, aircraft cowling cover and wing covers, paper towels and miscellaneous items. A small containment box with a few quarts of aviation oil, funnel and extra five gallon gas cans. In the back of a pick up truck is a 275 gallon temporary fuel storage tank containing aviation gas would be located near the lakes edge in approved proper containment. Crew will consist of five (5) persons, 2 pilots, 2 ramp/camp crew and office manager. They propose to fly approximately 35 clients from this site.

## Evaluation

The basis for this evaluation is BLM Manual 6310-Conducting Wilderness Characteristics Inventory on BLM Lands, and BLM Manual 6320 - Considering Lands with Wilderness Characteristics in the BLM Land Use Planning Process, which direct offices to conduct and

maintain inventories regarding the presence or absence of wilderness characteristics, and to consider identified Lands with Wilderness Characteristics (LWC) in land use plans and when analyzing projects under the National Environmental Policy Act (NEPA).

Effects on wilderness characteristics on BLM lands within the Utility Corridor are evaluated according to the Nonwilderness Assessment, a special project approved by the BLM Director and conducted by the BLM along portions of the Trans-Alaska Pipeline System (TAPS) corridor in 1980. This assessment identified lands under BLM administration that were considered lacking in the wilderness characteristics as defined by the Wilderness Act of 1964. The assessment was conducted in a manner that met the requirements of Section 603 of the Federal Land Policy and Management Act of 1976 (FLPMA).

The Dalton Highway and Trans-Alaska Pipeline parallel each other for the entire length of the Utility Corridor. The pipeline is 48” in diameter and elevated above ground for much of its length so it is highly visible. The Dalton Highway supplies Alaska’s arctic oilfields and supports considerable industrial traffic year-round. These man-made features and associated human activities are highly visible and audible depending on proximity and local topography. Permitted activities such as gravel- and gold mining occur throughout the area and have expanded in some locations. These developments are substantially noticeable and alter the natural character of lands in the immediate vicinity

The action being considered is located within the Prospect Segment of the Nonwilderness Assessment, which covered approximately 555,000 acres total in 1980. Portions of this segment meet the 5,000 acre minimum size. However it was determined that the Prospect Segment did not meet the standards for naturalness due to roads, camps, airfields, pipelines, material sites and associated facilities. These disturbances bisect the entire length of the segment.

## **FINDING**

The proposed action will occur in an area that has been determined not to have wilderness characteristics. The proposed action will not have any impact on wilderness characteristics.

The base camp would also house a small generator, ATV with small trailer, 10 foot x 10 foot screened tent, 12 foot x 14 foot canvas tent, toilet tent with porta-potty, satellite dish with base and 6–8 client vehicles. The camp is located about five miles south of Grayling Lake at the expired Recreation & Ought Public Purpose lease F-78201. The area is off road to material sites F-95107 (Alyeska) and F-93007 (ADOT&PF). This lease was for a sanitary landfill in an old gravel pit and has expired. The camp site is on the entrance road to the landfill site and was not part of the landfill. At the Grayling Lake location they propose to stage two floatplanes M6 Maule-235 (N56458) and M7 Maule-235 (N770XR) while conducting their flight operation for approximately 35 hunting clients. They also propose to install temporary dock due to an accommodation for a physical limitation to assist him in loading, unloading, refueling and docking their aircraft. When not in use, the ATV would be parked out of sight of the public. The dock consists of wood 4 foot x 60 foot which would be removed at the end of the season. The following equipment would be staged at the aircraft tie down area — a very small generator for heating up the aircraft during very cold temperatures, stored in a storage container and under a tarp when not in use. A plastic tote containing absorbent pads, aircraft cowling cover and wing covers, paper towels and miscellaneous items. A small containment box with a few quarts of aviation oil, funnel and extra five gallon gas cans. In the back of a pick up truck is a 275 gallon temporary fuel storage tank containing aviation gas would be located near the lakes edge in approved proper containment. Crew will consist of five (5) persons, 2 pilots, 2 ramp/camp crew and office manager. They propose to fly approximately 35 clients from this site.

**Location:** Mile posts 145 and 150.5 on the Dalton Highway one site at Grayling Lake

**Township/Range:** Secs. 23, Tps. 24 N., Rs. 13 and 14 W., and Secs. 27 and 34, T. 25 N., R. 13 W., Fairbanks Meridian, containing approximately 6.00 acres

**Evaluation by:** Erin Julianus and David Esse

**Date:** 3/24/2014 and 3/21/14

**Type of Assessment/Sources:** Review of application materials, subsistence database, local knowledge, interviews with staff knowledgeable about the area and the proposed action

## **Effect of the proposal on subsistence uses and needs**

Fisheries: With the exception of airplane landings at Grayling Lake, this activity will not occur in, or affect, fish habitat (streams or lakes). In addition, the Jim River (to which Grayling Lake flows) is closed to subsistence fishing. Subsequently, the proposed action will not significantly reduce harvestable fisheries resources that are available for subsistence use. The proposed action will not alter the distribution, migration or location of harvestable fisheries resources for the same reason. Neither will it create any legal or physical barriers that would limit access by subsistence users of the fisheries resource.

### Wildlife:

The proposed action will not significantly restrict subsistence uses. No reasonably foreseeable and significant decrease in the abundance of harvestable resources or in the distribution of harvestable resources, and no reasonably foreseeable limitations on harvester access, will result from the proposed action.

### Other resources:

The proposed action is not anticipated to change or impact any other harvestable resources such as wood, water, berries, or vegetation since no collection of these resources is planned for under the proposed action.

## **Expected reduction, if any, in the availability of resources due to alteration in resource distribution, migration, or location:**

None. Fish and wildlife resources may temporarily avoid the project area while the permittee and associates are present. However, there is no expected reduction in the availability of resources due to alteration in resource distribution, migration, or location.

## **Expected limitation, if any, in the access of subsistence users resulting from the proposal:**

None. Access to subsistence resources will not be hampered by the proposed action.

## **Availability of other lands, if any, for the purpose sought to be achieved:**

This application is for continued activity in an area used in previous years. Therefore, no other lands were considered for this use.

## **Other alternatives, if any, which would reduce or eliminate the use, occupancy, or disposition of public lands needed for subsistence purposes:**

There is no substantial evidence that would indicate a significant impact on subsistence will result from the proposed action. No other alternatives were evaluated.

## **Findings:**

The proposed action will not significantly restrict subsistence uses. No reasonably foreseeable and significant decrease in the abundance of harvestable resources or in the distribution of harvestable

resources, and no reasonably foreseeable limitations on harvester access have been forecasted to emerge as a function of the action that is analyzed in this document.
