DECISION RECORD

Argali Exploration Company Pipeline Renewal
DOI-BLM-CO-N05-2015-0062-CX

Decision

It is my decision to implement the Proposed Action as described in DOI-BLM-CO-N05-2015-0062-CX, renewing grant COC39379, authorizing a buried natural gas pipeline, for a 30-year term.

BLM Required Conditions of Approval to Mitigate Impacts to Cultural and Paleontological Resources

1. The applicant is responsible for informing all persons who are associated with the project that they will be subject to prosecution for knowingly disturbing archaeological sites or for collecting artifacts.
2. If any archaeological materials are discovered as a result of operations under this authorization, activity in the vicinity of the discovery will cease, and the BLM WRFO Archaeologist will be notified immediately. Work may not resume at that location until approved by the AO. The applicant will make every effort to protect the site from further impacts including looting, erosion, or other human or natural damage until BLM determines a treatment approach, and the treatment is completed. Unless previously determined in treatment plans or agreements, BLM will evaluate the cultural resources and, in consultation with the State Historic Preservation Office (SHPO), select the appropriate mitigation option within 48 hours of the discovery. The applicant, under guidance of the BLM, will implement the mitigation in a timely manner. The process will be fully documented in reports, site forms, maps, drawings, and photographs. The BLM will forward documentation to the SHPO for review and concurrence.
3. Pursuant to 43 CFR 10.4(g), the applicant must notify the AO, by telephone and written confirmation, immediately upon the discovery of human remains, funerary items, sacred objects, or objects of cultural patrimony. Further, pursuant to 43 CFR 10.4(c) and (d), the operator must stop activities in the vicinity of the discovery and protect it for 30 days or until notified to proceed by the AO.
4. The applicant is responsible for informing all persons who are associated with the project that they will be subject to prosecution for disturbing or collecting vertebrate or other scientifically-important fossils, collecting large amounts of petrified wood (over 25lbs./day, up to 250lbs./year), or collecting fossils for commercial purposes on public lands.

5. If any paleontological resources are discovered as a result of operations under this authorization, the applicant or any of his agents must stop work immediately at that site, immediately contact the BLM Paleontology Coordinator, and make every effort to protect the site from further impacts, including looting, erosion, or other human or natural damage. Work may not resume at that location until approved by the AO. The BLM or designated paleontologist will evaluate the discovery and take action to protect or remove the resource within 10 working days. Within 10 days, the operator will be allowed to continue construction through the site, or will be given the choice of either (a) following the Paleontology Coordinator's instructions for stabilizing the fossil resource in place and avoiding further disturbance to the fossil resource, or (b) following the Paleontology Coordinator's instructions for mitigating impacts to the fossil resource prior to continuing construction through the project area.

Mitigation Measures

1. All applicable terms, conditions, and stipulations contained in the original ROW grant and any amendments will be carried forward and remain in full force and effect. No new construction is authorized.
2. At least 90 days prior to termination of the right-of-way, the holder will contact the Authorized Officer to arrange a joint inspection of the right-of-way. The inspection will result in the development of an acceptable termination and rehabilitation plan submitted by the holder. This plan will include, but is not limited to, removal of facilities, drainage structures, and surface material; recontouring; topsoiling; or seeding. The Authorized Officer must approve the plan in writing prior to the holder's commencement of any termination activities.
3. The holder will conduct all activities associated with the operation and termination of the right-of-way within the authorized limits of the right-of-way.
4. Any proposal involving additional surface disturbance outside of the existing right-of-way disturbance requires an application to the BLM for analysis and authorization. New stipulations for construction would be applied to projects subject to the regulations and policies existing at the time of authorization.
5. The holder will monitor all disturbed and reclaimed areas through final abandonment for the presence of invasive, non-native, and/or noxious plant species. The holder will be responsible for eradication of noxious weeds that occur on site using materials and methods approved in advance by the Authorized Officer.
6. The holder will notify the authorized officer at least 60 days prior to non-emergency activities that would cause surface disturbance in the right-of-way. A "Notice to Proceed" will be required prior to any non-emergency activities that would cause surface disturbance on the right-of-way. Any request for a "Notice to Proceed" must be made to the authorized officer, who will review the Proposed Action for consistency with resource management concerns such as wildlife, big game winter range, paleontology, special status species, and cultural resource protection. The authorized officer may require the completion of special

status species surveys or other resource surveys. Additional measures may be required to protect special status species or other resources.

Compliance with Laws & Conformance with the Land Use Plan

This decision is in compliance with the Endangered Species Act and the National Historic Preservation Act. It is also in conformance with the 1997 White River Record of Decision/Approved Resource Management Plan.

Public Involvement

This project was posted on the WRFO's on-line National Environmental Policy Act (NEPA) register on 06/10/2015. No comments or inquiries have been received.

Rationale

The Proposed Action is categorically excluded from further documentation under the National Environmental Policy Act (NEPA) in accordance 516 DM 11.9, E9. This categorical exclusion is appropriate in this situation because there are no extraordinary circumstances potentially having effects that may significantly affect the environment. The Proposed Action has been reviewed, and none of the extraordinary circumstances described in 43 CFR 46.215 apply.

Monitoring and Compliance

On-going compliance inspections and monitoring will be conducted by the BLM White River Field Office staff during and after construction. Specific mitigation developed in this document will be followed. The holder will be notified of compliance related issues, and depending on the nature of the issue(s), will be provided 30 days to resolve such issues.

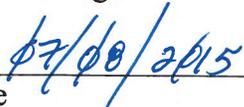

Administrative Remedies

This decision will take effect immediately upon the date it is signed by the Authorized Officer and will remain in effect while any appeal is pending unless the Interior Board of Land Appeals issues a stay (43 CFR 2801.10(b)). Any appeal of this decision must follow the procedures set forth in 43 CFR Part 4. Within 30 days of the decision, a Notice of Appeal must be filed in the office of the Authorized Officer at White River Field Office, 220 East Market St., Meeker, CO 81641 with copies sent to the Regional Solicitor, Rocky Mountain Region, 755 Parfet St., Suite 151, Lakewood, CO 80215, and to the Department of the Interior, Board of Land Appeals, 801 North Quincy St., MS300-QC, Arlington, VA, 22203. If a statement of reasons for the appeal is not included with the notice, it must be filed with the Interior Board of Land Appeals at the above address within 30 days after the Notice of Appeal is filed with the Authorized Officer.
