c/o St. Clair Ranch, Phil St. Clair  
45408 Izee-Paulina Lane  
Canyon City, OR 97820

Dear Mr. St. Clair:

## **NOTICE OF FIELD MANAGER'S PROPOSED DECISION FOR GRAZING LEASE RENEWAL OF THE SODA CREEK ALLOTMENT (NO.04044 )**

### **Background**

The Prineville District of the Bureau of Land Management (BLM) prepared an Environmental Assessment (EA) and Finding of No Significant Impacts (FONSI) for the Multiple Grazing Permit and Lease Renewals Environmental Assessment, NEPA Register Number DOI-BLM-ORWA-P000-2013-0006-EA. The actions included in this Decision Record were analyzed in that EA. The project area for the EA includes BLM-administered public land throughout the Prineville BLM District. The proposed decision is for the Soda Creek Allotment, which is located approximately 0.10 miles from the Town of Izee, OR and includes 1,985 acres of BLM-administered public land (see attached allotment map). The EA, FONSI, project area maps and other information are available at the Prineville BLM office or on the **project website**: <http://tinyurl.com/Prineville-MGPREA>

The EA considered actions to renew as-is, renew with modifications, or not renew the grazing permits for several grazing allotments. The EA also considered actions to install new range developments and/or maintain certain existing range developments. The EA and FONSI were prepared in order to complete full processing of the grazing permits and leases and for compliance with the National Environmental Policy Act of 1969 (NEPA).

## **Public, tribal and other involvement**

The BLM mailed over 130 tribal and public scoping letters in January 2013. An addendum was sent out two weeks later when it was discovered that one allotment proposed for renewal had been mistakenly left off the original letter. The BLM received 14 letters or e-mails in reply to scoping. In many cases the comments led to the development of issues and the incorporation of project design features into the action alternatives (as described in the EA Chapter 2, Alternatives).

The general public was also notified of the project in January 2013 via the Prineville District Project Planning Update which is posted on the Prineville public website at <http://www.blm.gov/or/districts/prineville/plans/plans.php>.

The BLM met in person with Phil St. Clair on February 18, 2014, to discuss the proposed actions and grazing management strategies outlined in the EA; this was an effort to gain an understanding of how the proposed actions would affect Mr. St. Clair's livestock operation and what potential there would be to meet management objectives and maintain/improve natural resource conditions on the Soda Creek Allotment. On several occasions in 2014 and 2015, the BLM also discussed the proposed actions over the phone with Mr. St. Clair.

The BLM again requested public and tribal input in February 2015 when it published the EA and draft FONSI to the BLM's public website and sent notification letters to those on the original scoping list and others who expressed interest since scoping. The BLM sent another letter to the same mailing list on March 25, 2015 to notify interested parties that the comment period had been extended until April 30, 2015. During the public review period for the EA, the BLM received 40 comment letters.

Based on comments, the BLM made several changes to the EA to clarify meaning or intent. The revised EA, public comments and BLM response are posted on the ePlanning website at: <http://tinyurl.com/Prineville-MGPREA>

## **Proposed Decision**

Based on the analysis documented in the EA and FONSI, it is the BLM's decision to implement action Alternative 3 for the Soda Creek Allotment as described in EA # DOI-BLM-ORWA-P000-2013-0006-EA. The following is a summary of management actions that will be implemented.

### **Renew Grazing Permit**

Under the authority of 43 CFR Subparts 4130.2 (a), (b), (c), and (d) (grazing permits and leases), 4130.3 (terms and conditions), and 4160.1 (proposed decisions), it is my Proposed Decision to renew grazing lease authorization number 3602382 for a period of 10 years on the Soda Creek Allotment (No. 04044), as shown in Table 2 below; with the associated terms and conditions described below. In the tables below, PPL stands for Percent Public Land in the allotment, and AUMs stands for Animal Unit Months (the amount of forage a cow and calf eat in one month).

From:

**Table 1. Current grazing lease for the Soda Creek Allotment.**

| Authorization Number | Livestock Number and Type | Grazing Period | PPL  | Active Permitted Use (AUMs) |
|----------------------|---------------------------|----------------|------|-----------------------------|
| 3602382              | 50 Cattle                 | 4/1 – 11/30    | 100% | 405                         |

To:

**Table 2. Proposed grazing lease for the Soda Creek Allotment.**

| Authorization Number | Livestock Number and Type | Grazing Period | PPL | Active Permitted Use (AUMs) |
|----------------------|---------------------------|----------------|-----|-----------------------------|
| 3602382              | 87 Cattle                 | 4/1 – 12/31    | 51% | 405                         |

The authorized grazing system will be a rest rotation and will follow the grazing schedule shown below in Table 3.

**Table 3. Grazing System (rotation repeats after Year 6)**

| Grazing Year | Grazing System (Rest Rotation) | Pasture           | SOU Begin | SOU End | AUMs |
|--------------|--------------------------------|-------------------|-----------|---------|------|
| 1            | GRZ                            | Poison            | 4/1       | 4/20    | 36   |
|              | GRZ                            | Upper PC Riparian | 4/21      | 4/30    | 4    |
|              | GRZ                            | Snake Den         | 5/1       | 5/20    | 34   |
|              | GRZ                            | Soda Creek        | 5/21      | 6/15    | 38   |
|              | GRZ                            | Wildcat           | 9/15      | 10/30   | 116  |
|              | GRZ                            | Mahogany          | 11/1      | 12/31   | 72   |
|              | RST                            | School House      |           |         | 0    |
| 2            | RST                            | Poison            |           |         | 0    |
|              | RST                            | Upper PC Riparian |           |         | 0    |
|              | GRZ                            | Snake Den         | 4/1       | 5/20    | 85   |
|              | GRZ                            | Soda Creek        | 9/15      | 10/1    | 25   |
|              | GRZ                            | Wildcat           | 5/21      | 6/15    | 66   |
|              | GRZ                            | Mahogany          | 10/11     | 12/1    | 62   |
|              | GRZ                            | School House      | 10/2      | 10/10   | 9    |

| Grazing Year | Grazing System (Rest Rotation) | Pasture           | SOU Begin | SOU End | AUMs |
|--------------|--------------------------------|-------------------|-----------|---------|------|
| 3            | GRZ                            | Poison            | 4/1       | 4/20    | 36   |
|              | GRZ                            | Upper PC Riparian | 4/21      | 4/30    | 4    |
|              | GRZ                            | Snake Den         | 5/1       | 6/1     | 55   |
|              | GRZ                            | Soda Creek        | 6/2       | 6/15    | 20   |
|              | RST                            | Wildcat           |           |         | 0    |
|              | GRZ                            | Mahogany          | 10/10     | 12/1    | 63   |
|              | GRZ                            | School House      | 10/1      | 10/9    | 9    |
| 4            | GRZ                            | Poison            | 4/21      | 6/1     | 76   |
|              | GRZ                            | Upper PC Riparian | 6/2       | 6/13    | 4    |
|              | RST                            | Snake Den         |           |         | 0    |
|              | GRZ                            | Soda Creek        | 4/1       | 4/20    | 29   |
|              | GRZ                            | Wildcat           | 9/15      | 10/30   | 116  |
|              | GRZ                            | Mahogany          | 11/1      | 12/31   | 72   |
|              | GRZ                            | School House      | 6/14      | 6/20    | 7    |
| 5            | GRZ                            | Poison            | 4/1       | 4/20    | 36   |
|              | GRZ                            | Upper PC Riparian | 4/21      | 4/30    | 4    |
|              | GRZ                            | Snake Den         | 5/1       | 6/15    | 79   |
|              | GRZ                            | Soda Creek        | 6/16      | 6/30    | 22   |
|              | GRZ                            | Wildcat           | 9/15      | 10/30   | 116  |
|              | RST                            | Mahogany          |           |         | 0    |
|              | GRZ                            | School House      | 11/1      | 11/9    | 9    |
| 6            | GRZ                            | Poison            | 5/26      | 6/15    | 38   |
|              | GRZ                            | Upper PC Riparian | 5/16      | 5/25    | 4    |
|              | GRZ                            | Snake Den         | 4/1       | 5/15    | 77   |
|              | RST                            | Soda Creek        |           |         | 0    |
|              | GRZ                            | Wildcat           | 9/15      | 10/21   | 94   |
|              | GRZ                            | Mahogany          | 11/1      | 12/31   | 72   |
|              | GRZ                            | School House      | 10/22     | 10/30   | 9    |

### Flexibility

The grazing lessee(s)/permittees will be allowed 7 days of flexibility in use periods before the scheduled pasture start and end dates (described in Table 3) to adjust for annual fluctuations in livestock numbers, changing climate conditions, and to accommodate removing livestock from

pastures, provided that total use does not exceed the authorized/licensed numbers of active preference AUMs. An annual grazing application must be submitted to the BLM for review prior to grazing use to ensure planned use is consistent with the grazing lease terms and conditions. BLM will modify the grazing period and rest periods when necessary to address resource concerns and to achieve multiple use objectives.

The terms and conditions of the permit are:

- Standard terms and conditions applicable to all permits (shown in Appendix C of the Revised EA).
- Grazing use will be in accordance with the Grazing Permit Renewal Decision for the Soda Creek Allotment.
- All riparian exclosures, including spring development exclosures, are closed to livestock use unless specifically authorized in writing.
- Lessees/permittees are required to submit actual use grazing records within 15 days of completion of the year's grazing use.
- Supplemental feeding is limited to salt, mineral, and/or protein supplements in block, granular, or liquid form. Such supplements must be placed at least one quarter mile from live waters (springs, streams), troughs, wet or dry meadows, and aspen stands.
- Lessees/permittees are required to maintain all range developments for which they have maintenance responsibilities prior to livestock turnout.
- Lessees/permittees are to provide reasonable access across private and leased lands to the BLM for the orderly management and protection of the public lands as allowed in 43 CFR 4130.3-2 (H).
- The terms and conditions of your permit may be modified if additional information indicates that revision is necessary to conform with 43 CFR 4180.

### **Range Improvements**

Under the authority of 43 CFR Subparts 4120.3-1 (conditions for range improvements) and 3-2 (cooperative range improvement agreements), it is my Proposed Decision to implement the actions listed below, which were analyzed in Alternative 3 of the EA. Project design features described in the EA (Chapter 2) will be incorporated into the planning and implementation phases of all range improvements. Refer to the enclosed map for the approximate location of the developments.

Range Improvements will be installed in the general location, but may be moved slightly from locations shown on maps to minimize effects on visual, cultural, wildlife and other resources. The BLM will ensure the effects of any adjusted location will not exceed those analyzed in the EA.

Under alternative 3, the BLM will install 1.5 miles of new fence surrounding two spring developments and relocate two existing watering troughs outside of the fenced area. Relocated water troughs would be located away from wetland and riparian areas; a minimum of 50 feet from springs and 100 feet from streams. The lessee would be assigned maintenance

responsibility for three existing spring developments in the Wildcat, Mahogany, and Snake Den pastures (refer to attached map).

Water catchments, springs, pipelines, and trough maintenance would involve periodic inspection, repair or replacement of worn or damaged parts, repair of leaks, removing trash or silt, re-painting tanks (if they were originally painted), repair of associated fences, winterizing the facility, maintaining water flows during agreed-upon times, and maintaining wildlife escape ramps. These actions may require use of heavy equipment to dig up and/or reinstall pipeline, headbox, etc.

### **Rationale for the Proposed Decision**

Renewal of the grazing permits is in conformance with the BLM's livestock grazing regulations found in Title 43 of the Code of Federal Regulations (CFR) Section 4130.2(a) (1995) and is further necessary to meet, or make significant progress toward meeting the Standards and Guidelines for Rangeland Health, objectives in the John Day Basin ROD&RMP approved April 2015, and other pertinent multiple use objectives for the public lands.

A Rangeland Health Assessment (RHA) and Determination of the Standards was completed on the Soda Creek Allotment in 2003. The Results of Assessment (ROA) determined that the allotment was not meeting standards 1 or 3, and the allotment was not making significant progress toward achieving the standards, and that livestock was a causal factor. The assessment found that the standards failed due to continuous season long grazing with no rest for the upland grasses and shrubs. A reduction in plant, biological soil crust, and litter cover was observed which left the soil surface unprotected.

To address standards 1 and 3 failing, changes in grazing management were implemented in 2005 to improve resource conditions on the Soda Creek Allotment. It was concluded that the grazing management occurring under the 1990 Allotment Management Plan (AMP) was not improving upland plant communities and that a rest rotation grazing system would likely improve the condition of upland plant communities. Pasture fences were constructed and a rest rotation grazing system was implemented in 2006. Since the 2003 RHA, there have been other projects proposed on the Soda Creek Allotment (i.e. water developments, aspen exclosures, and juniper thinnings) to continue to make progress towards achieving the standards for rangeland health.

Vegetation utilization monitoring conducted in 2013 on the allotment concluded that the utilization that was measured was within objective use levels which are likely to maintain and improve the health and vigor of the native key bunchgrass species. Utilization of Key Species, Landscape Appearance, and Use Pattern Mapping were conducted on the allotment. Throughout most of the study sites bunchgrasses were noted to be healthy and abundant. Plant mortality was recorded as low and drought stress was not apparent. Utilization of key bunchgrass species was estimated at established study sites and random locations. Utilization readings at the established study sites were estimated in the Non- use category (0-5%) and for random sampling points utilization was estimated to be in the Slight- use category (6-20%). The use pattern map for the

allotment verified that for 2013 the estimated use on the upland pastures ranged from nonuse to slightly utilized.

Alternative 3 will authorize a rest rotation grazing regime and incorporate additional rest during the critical growing period as compared to Alternative 1 (No Action). Deferring use during the critical growing period (i.e. critical growing stages in a plants life cycle) and providing rest for one pasture per year will provide adequate rest to the perennial bunchgrasses, improve vigor, and allow perennial grasses to produce seed. Alternative 3 was also selected because implementing the management described in the EA would maintain and make progress towards meeting rangeland health standards and multiple use objectives. Riparian resources on Dry Soda and Poison creeks will benefit from implementing the rest rotation grazing regime and deferring use during the critical growing period.

Fencing existing springs and providing water for livestock will have positive direct benefits to riparian area conditions (soils and vegetation) and water quality at the spring sources. Providing additional water sources and maintaining existing sources will improve livestock distribution across the allotment. Improved distribution results in more appropriate and even utilization levels across the allotment. Maintenance of range improvements are also a term and condition of the grazing lease and a requirement per 43 CFR 4120.3-1(c).

The no action alternative (Alternative 1) would renew the permit with the existing terms and conditions. This alternative was not selected because season long use does not provide periodic rest during the critical growing season for perennial bunchgrasses and would not make significant progress toward meeting rangeland health standards or other multiple use objectives.

Under Alternative 2, grazing permits would not be renewed. This alternative was not selected for several reasons. Removal of grazing would eliminate the direct effects of grazing to the vegetation and riparian resources. The BLM weighed this against the economic effect on the grazing permittee and the local economy. By following the grazing regime in Alternative 3 which defers grazing during the critical growing season, provides rest, and defers grazing in riparian areas on Poison and Dry Soda Creeks during summer months, the area can be grazed as one of the multiple uses of the public land while still making progress toward meeting objectives for other natural resources. Therefore, the no grazing alternative did not represent the best overall combination of actions to meet multiple use goals and was therefore not selected.

In summary, I find that Alternative 3 is the combination of actions that best meets the purpose and need for action, and minimizes effects to natural resources while providing for livestock grazing in a manner consistent with the John Day Basin RMP. Based on the analysis of potential impacts contained in the EA, the BLM has determined in the FONSI that the Multiple Grazing Permit and Lease Renewals project will not have a significant impact on the human environment within the meaning of Section 102(2) (c) of the National Environmental Policy Act of 1969 (FONSI pages 1-4). Thus, an EA is the appropriate level of analysis, and an Environmental Impact Statement (EIS) will not be prepared.

## **Compliance**

The Proposed Decision is consistent with the John Day Basin Resource Management Plan (RMP) (USDI BLM 2015):

- “Maintain forage production and livestock use at levels sufficient to provide a sustained flow of local economic benefits and to protect non-market values.” (pg. 86)
- “Maintain and restore healthy rangeland, forest, and woodland habitats with diverse species compositions appropriate for the site’s potential based on disturbance patterns and frequencies...” (pg. 28)
- “Provide sufficient forage for cattle and wildlife.” (pg. 32)
- “Maintain and restore the health of watersheds and aquatic ecosystems.” (pg. 45)
- “Maintain or improve habitats to support healthy, productive, and diverse populations and communities of native plants and animals...” (pg. 57)
- “Fence developed spring areas to exclude livestock. Use an automatic shut-off or efficiently return overflow to the source in a short-return interval.” (pg. 52)
- “Manage activities, such as livestock grazing, to ensure that woody riparian species are not arrested or retrogressed in form. Change management of woody riparian species to correct for arrested and/or retrogressed growth forms and restore their potential stature.” (pg. 54)

The RMP is available at the Prineville District (address at top of this Proposed Decision) or on the Prineville BLM website at: <http://www.blm.gov/or/districts/prineville/plans/prinevillermpp.php>

The selected action ensures compliance with Section 106 of the National Historic Preservation Act. This compliance includes consultation with the Oregon State Historic Preservation Office and interested tribes, and project design features that avoid disturbance to historic properties and paleontological resources.

## **Authority**

Authority for the actions contained in this proposed decision is found in 43 Code of Federal Regulations (CFR) §4100.0-8, 4110.2-2, 4110.3, 4120.2, 4120.3-1, 4130.2 (a), (b), (d), and (e), 4130.3, 4130.3-1, 4130.3-2, 4130.3-3, 4130.6-2, 4130.8-1(e), 4160.1, 4160.2, 4160.3, 4160.4, 4180.1, and 4180.2. The BLM issues and renews grazing permits consistent with the 1995 grazing regulations, Title 43 CFR, Grazing Administration, Exclusive of Alaska, Subparts 4100-4190, and all other pertinent laws and regulations.

## **Protest and Appeal Opportunities**

### **Protest**

In accordance with 43 CFR §4160.2, any applicant, permittee, lessee or other interested public may protest the Proposed Decision under §4160.1 of this title, in writing to the Bureau of Land Management, Homer “Chip” Faver, Field Manager (authorized officer), Central Oregon Resource Area, 3050 N.E. Third Street, Prineville, OR 97754 within 15 days after receipt of this Proposed Decision. The protest, if filed, must clearly and concisely state the reason(s) as to why the Proposed Decision is in error. A written protest electronically transmitted (e.g., email, facsimile, or social media) will not be accepted as a protest. A written protest must be on paper.

In accordance with 43 CFR §4160.3 (b), should a timely protest be filed with the authorized officer, the authorized officer, at the conclusion to his/her review of the protest shall serve his/her final decision on the protestant and the interested public.

In accordance with 43 CFR §4160.3 (a), in the absence of a protest, the proposed decision will become the final decision of the authorized officer without further notice.

### **Appeal and Petition for Stay**

In accordance with 43 CFR §4160.3 (c) & (f), a period of 30 days following receipt of the Final Decision or 30 days after the date the Proposed Decision becomes final is provided for filing an appeal and petition for stay of the decision pending final determination on appeal.

In accordance with 43 CFR § 4160.4, any person whose interest is adversely affected by a final decision of the authorized officer may appeal the decision for the purpose of a hearing before an administrative law judge and may also petition for a stay of the decision pending final determination on appeal. Appeals and petitions for a stay of the decision shall be filed at the office of the authorized officer. Additionally the person appealing must serve a copy of their appeal and petition for stay on any person named in the decision including the name to which the decision is addressed, those listed at the end of this decision, and the Regional Solicitor, Pacific Northwest Region, U.S. Department of the Interior, 805 SW Broadway, Suite 600, Portland, Oregon 97205 within 15 days of filing the appeal and petition for stay. Appellant needs to be able to document service to any other person named in the decision and the Solicitor. A notice of appeal and/or request for stay electronically transmitted (e.g., email, facsimile, or social media) will not be accepted. A notice of appeal and/or request for stay must be on paper.

In accordance with 43 CFR 4.470, the appeal shall state the reasons, clearly and concisely, why the appellant thinks the final decision of the authorized officer is in error.

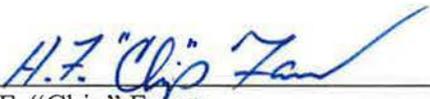

A petition for stay, if filed, must show sufficient justification based on the following standards (43 CFR 4.471(c)):

- 1) The relative harm to the parties if the stay is granted or denied;

- 2) The likelihood of the appellant's success on the merits;
- 3) The likelihood of immediate and irreparable harm if the stay is not granted; and,
- 4) Whether the public interest favors granting the stay.

The appellant requesting a stay bears the burden of proof to demonstrate that a stay should be granted.

Any person named in the decision from which an appeal is taken (other than the appellant) who wishes to file a response to the petition for a stay may file with the Hearings Division a motion to intervene in the appeal, together with the response, within 10 days after receiving the petition. Within 15 days after filing the motion to intervene and response, the person must serve copies on the appellant, the Office of the Solicitor and any other person named in the decision (43 CFR 4.472(b)).
