**Description of Proposed Action and the Purpose and Need for the Action**

The Jerusalem Fire began on August 9, 2015 in the Jerusalem Valley Area, near Soda Creek in Lake County, CA. The cause of the fire is still under investigation. The fire destroyed a total of six residence and 21 outbuildings. The fire spread rapidly, burning a total of 25,156 acres, of which, 13,164 acres were located on BLM lands. Impacts to BLM lands include areas of complete vegetation loss, unstable slopes, potentially negative effects to cultural sites, dead trees that have the potential to fall on roads/OHV trails, and damage to recreation structures and signs. The primary purpose of the proposed action is to provide post-fire rehabilitation activities within the Jerusalem Fire perimeter. The proposed action includes:

1. Repair/replace recreational structures damaged during the fire,
2. Prevent soil erosion by placing erosion control structures in areas with the potential for high levels of sediment loss or where debris flows have the potential to cause harm to the public,
3. Clean out, place new culverts, and replace culverts the burned and are no longer functional,
4. Remove hazard trees that pose a threat to public land visitors,
5. Place water bars on fire suppression lines to prevent debris flows and erosion features from being created, and
6. Close fire suppression lines that are not on off-highway vehicle trails and areas that have that the potential for unauthorized use not that vegetation is absent.

Another post-fire related project that will occur is the management and removal of non-native invasive plant species that emerge post-fire. However, this is will be addressed in a separate Environmental Assessment document that will be produced at a later date.

The project is located in the newly designated Berryessa Snow Mountain National Monument, which includes the Knoxville Recreation Area and parts of the Cache Creek Natural Area. The fire perimeter is located in three counties: Lake, Napa, and Yolo.

## **Plan Conformance**

The proposed action is in conformance with the Ukiah Resource Management Plan and Final EIS (2006).

- Section 2.10, Fire Management, Fire Rehabilitation, Stabilization & Restoration (pg 18); “Rehabilitate burned areas to mitigate adverse effects of fire on soils, water, cultural and vegetation.”
- Section 2.10, Fire Management, Fire Rehabilitation, Stabilization & Restoration Management Actions(pg. 19):  
“Native species would be used in reseeding to minimize noxious weed invasion.”

---

“Develop local or regional “Normal Fire Year Rehabilitation Plans”

“Monitor rehabilitation efforts to facilitate future planning and implementation.”

## **Compliance with the National Environmental Policy Act**

The Proposed Action is categorically excluded from further documentation under the National Environmental Policy Act (NEPA) in accordance with 516 DM, Appendix 1, 1.13. Post-fire rehabilitation activities not to exceed 4,200 acres (such as tree planting, fence replacement, habitat restoration, heritage site restoration, repair of roads and trails, and repair of damage to minor facilities such as campgrounds) to repair or improve lands unlikely to recover to a management approved condition from wildland fire damage, or to repair or replace minor facilities damaged by fire. Such activities: Shall be conducted consistent with agency and Departmental procedures and applicable land and resource management plans; Shall not include the use of herbicides or pesticides or the construction of new permanent roads or other new permanent infrastructure; and Shall be completed within three years following a wildland fire.

The application of this categorical exclusion in this situation is appropriate because there are no extraordinary circumstances potentially having effects which may significantly affect the environment. For this project, none of the exceptions apply. The extraordinary circumstances are contained in 516 DM, 2 Appendix 2.

## **Person and Agencies Consulted**

No persons or agencies were consulted in the development of the action as post-fire emergency stabilization will be conducted on BLM lands.

## **Decision and Rationale on Action**

I have decided to implement the proposed treatments listed in the Description of Proposed Action Section. These actions meet the purpose and need by providing post-fire rehabilitation on BLM lands within the Jerusalem Fire perimeter. In addition, I have reviewed the plan conformance statement and have determined that the proposed action is in conformance with the approved land use plan and that no further environmental analysis is required.

## Implementation Date

This project will be implemented upon completion of analysis, advertisement of decisions, and protest periods.

Rich Burns  
BLM Ukiah Field Office Manager

## Administrative Review or Appeal Opportunities

The decision in the Categorical Exclusion for post-fire emergency stabilization is subject to a 15-day comment period. If no comments are received, this decision will become effective upon completion of the Decision Record. If comments are received, this decision will become effective upon BLM's completion of its review and response to the comments. Any contest of this decision should state specifically which portion or element of the decision is being protested and cite the applicable CFR regulations.
