Kim Braun  
PO Box 130  
Cambridge, ID 83610

**Notice of Field Manager's Proposed Decision**

Dear Mr. Braun:

This Proposed Decision is in response to requirements set forth in a settlement agreement and your September 30, 2005 Application for Permit Renewal (grazing management proposal) for the Gambril Individual Allotment (Gambril Individual Allotment #00090 Map).

**Introduction**

This Proposed Decision addresses grazing management in the Gambril Individual Allotment and if finalized, would serve as the Decision Record for Environmental Assessment (EA) DOI-BLM-ID-B010-2010-0057-EA, which this Proposed Decision incorporates by reference. This Proposed Decision reflects previous monitoring conducted in 2002, completion of an evaluation and determination in 2007 of the applicable Idaho Standards for Rangeland Health (Standards), and site visits in 2011.

**Background**

As a result of a settlement negotiated between the U.S. Department of Justice and Western Watersheds Project to resolve litigation (WWP v. Lane, Case No. 07-cv-394-BLW) challenging the Bureau of Land Management's (BLM) use of certain categorical exclusions to satisfy National Environmental Policy Act requirements, BLM withdrew seven grazing decisions, dated September 28, 2007. A court-ordered Stipulated Settlement Agreement (SSA), dated July 17, 2009, required the BLM to analyze renewal of the grazing permits in an EA.

The Gambril Individual Allotment is located 2 miles southwest of Cambridge, Idaho. The 1,011 acre allotment includes 121 acres of BLM-administered (public) lands. Vegetation is characterized by shrub-dominated (50%), perennial grassland (28%), and exotic annuals (21%) community types (EA Section 3.1.1). The allotment provides preliminary priority habitat for greater-sage grouse (EA Section

3.2.1). The allotment was found to be meeting all applicable Standards (1, 4, and 8) in 2007, and site visits confirmed these determinations in 2011 (EA sections 3.1.1 and 3.2.1).

Livestock grazing in the Gambril Individual Allotment currently is authorized by the previous grazing permit issued December 1, 2005 (Table 1). This authorization will continue until the Proposed Decision becomes final and a new grazing permit is issued.

### **Proposed Decision**

In accordance with 43 CFR 4110.1(b), upon my review of the record of performance for Kim Braun, I have determined that he has a satisfactory record of performance for the Gambril Individual Allotment. Therefore, it is my Proposed Decision as the authorized officer to:

- Renew the grazing permit for Kim Braun for the Gambril Individual Allotment. The permit would be for a term of 10 years (03/01/2014 to 02/28/2024).
- Authorize nine AUMs of Active Use.
- Select Alternative C, as described in DOI-BLM-ID-B010-2010-0057-EA and as shown below in Table 2.

Kim Braun currently grazes livestock within the Gambril Individual Allotment pursuant to a grazing permit issued by the BLM. The terms and conditions of that grazing permit are as follows:

**From: Alternative B - Continue Current Use.**

Table 1. Mandatory Terms and Conditions for the Gambril Individual Allotment, Washington County, Idaho.

Operator Name (Number)	Livestock		Season of Use	% Public Land	AUMs		
	Num.	Kind			Active	Suspended	Permitted
Kim Braun (1101106)	50	Cattle	4/10-5/31	11%	9	0	9

**Allotment Specific Terms and Conditions**

1. Turn-out is subject to Boise District range readiness criteria.
2. Your certified actual use report is due within 15 days of completing your authorized annual grazing use.
3. Salt and/or supplement shall not be placed within (1/4) mile of the springs, streams, meadows, aspen stands, playas or water developments.
4. Changes to the scheduled use require prior approval.
5. Trailing activities must be coordinated with the BLM prior to initiation. A trailing permit or similar authorization may be required prior to crossing public lands.
6. Livestock exclosures located within your grazing allotment are closed to all domestic grazing use.
7. Range improvements must be maintained in accordance with the cooperative agreements and range improvements permits in which you are a signatory or assignee. All maintenance or range improvements within a wilderness study area require prior consultation with the authorize officer.
8. All appropriate documentation regarding base property leases, lands offered for exchange-of-use, and livestock control agreements must be approved prior to turn-out. Leases of land and/or livestock must be notarized prior to submission and be in accordance with the Boise District Policy.

9. Failure to pay the grazing bill within 15 days of the due date specified shall result in a late fee assessment of \$25.00 dollars or 10 percent of the grazing bill, whichever is greater, not to exceed 250.00 payment made later than 15 days after the due date, shall include the appropriate late fee assessment. Failure to make payment within 30 days may be a violation of 43 CFR 4140.1(B)(1) and shall result in action by the authorized officer under 43 CFR 4150.1 and 4160.1-2.

The terms and conditions of the 10-year grazing permit, in accordance with Alternative C, would be as follows:

**To: Alternative C - BLM Proposed Action**

Table 2. Mandatory Terms and Conditions for the Gambрил Individual Allotment, Washington County, Idaho.

Operator Name (Number)	Livestock		Season of Use	Federal Land	AUMs		
	Num.	Kind			Active	Suspended	Permitted
Kim Braun (1101106)	50	Cattle	4/10-5/31	11%	9	0	9

**Allotment Specific Terms and Conditions**

1. If range readiness is met and turnout occurs on April 10, the next year’s turnout would be deferred by two weeks after Range Readiness criteria are met to ensure plants are not grazed during early spring growth stages every year.
2. End date could occur up to two weeks later (June 14) if turnout was delayed to meet range readiness, or due to deferment, but livestock numbers, period of use (52 days), and AUMs would not be exceeded.

**Other Terms and Conditions**

1. Livestock grazing must be conducted in accordance with the Terms and Conditions described in the Final Decision dated \_\_\_\_\_.
2. Livestock turn-out would be subject to District Range Readiness Criteria.
3. Changes to the scheduled use would require prior approval by the authorized officer.
4. You are required to submit a signed and dated Actual Grazing Use Report form (BLM Form 4130-5) for each allotment you graze. The completed form(s) must be submitted to this office within 15 days from the last day of your authorized annual grazing use.
5. Salt and/or supplements shall not be placed within one-quarter (1/4)-mile of springs, streams, meadows, aspen stands, playas, special status plant populations, eligible historic properties, or water developments. Use of supplements other than the standard salt or mineral block on public land requires annual authorization by the authorized officer.
6. A crossing permit may be required prior to trailing livestock across public lands. Crossing activities must be coordinated with the BLM prior to initiation. Permittee would also notify any/all affected permittees in advance of crossing.
7. Livestock exclosures located within your grazing allotment(s) would be closed to all domestic grazing use.
8. Range improvements must be maintained in accordance with the cooperative agreement and range improvement permits in which you are a signatory or assignee. All maintenance activities which may result in ground disturbance require prior approval from the authorized officer.
9. Bird ladders that meet BLM standards must be installed and functioning on water troughs located on public lands. The permittee would inform BLM if bird ladders are needed on permanent troughs, and BLM would supply bird ladders. The permittee would be responsible for providing

bird ladders for temporary troughs. It would be the permittee's responsibility to maintain and install all bird ladders.

10. Pursuant to 43 CFR 10.4(b), you must notify the BLM Field Manager, by telephone with written confirmation, immediately upon the discovery of human remains, funerary objects, sacred objects, or objects of cultural patrimony on federal lands. Pursuant to 43 CFR 10.4(c), you must immediately stop any ongoing activities connected with such discovery and make a reasonable effort to protect the discovered remains or objects.
11. Permittees or lessees shall provide reasonable administrative access across private and leased lands to the BLM for the orderly management and protection of public lands.

### **Rationale**

To comply with the court ordered SSA, the BLM analyzed three alternatives for grazing permit renewal in the Gambriil Individual Allotment in DOI-BLM-ID-B010-2010-0057-EA: Alternative A - No Grazing for a Ten-year Term, Alternative B - Continue Current Use, and Alternative C - BLM Proposed Action. Through the allotment evaluation and determination, it was shown that all applicable Rangeland Health Standards and Livestock Management Guidelines were being met in 2007. Site visits were conducted in 2011 and confirmed that the allotment was still meeting Standards, as documented in the project record. Implementation of the proposed decision would continue to meet Standards and maintain or improve resource conditions because:

#### **Standard 1 (Watersheds)**

The standard would continue to be met with small areas of localized disturbance (EA Section 3.1.2.4). Overall, the ecological processes are functioning within a normal range of variation and vegetative cover, biological soil crust cover, and litter amount is adequate to stabilize soils and cycle water and nutrients. Adequate vegetative cover and the prevalence of soils with low or moderate erodibility would help minimize watershed impacts from livestock. Deferral of a minimum of two weeks every other year would reduce mechanical impacts because moisture levels within 4" of the soil surface would be reduced, resulting in firmer soils that would be less susceptible to damage.

#### **Standard 4 (Native Plant Communities)**

The standard would continue to be met (EA Section 3.1.2.4). Native plant diversity (number and type of species) would be maintained, based on Ecological Site Descriptions, and native herbaceous plants (bunchgrasses and forbs) and shrubs would remain vigorous and productive (capable of reproduction and recruitment). Alternate year deferral (until June 14 every other year) would result in minor long-term increases in perennial grasses and forbs when use occurs primarily outside critical growth periods. Plants would have an increased opportunity to set seed in deferred years, but use would still occur annually during the growth period. Vigor and diversity would be maintained or increase in the allotment, as the stocking rate would be a minimum of 22.1 acres/AUM. Rush skeletonweed and Scotch thistle have been recorded in the allotment. Although noxious weeds are present, they are currently not detracting from overall native plant community health.

#### **Standard 8 (Threatened and Endangered Plants and Animals)**

The standard would continue to be met for greater sage-grouse (EA Section 3.2.2.4). Special status plants and fish are not present. Nesting and brood-rearing habitat would be maintained or improved over the 10-year period (EA Section 3.2.2.4). Deferring turnout for two or more weeks in alternate years and a low stocking rate (22.1 acres/AUM) would benefit nesting birds as utilization levels would not likely reach 40% until late in the nesting period, if at all. Deep-rooted perennial grasses and forbs

would be maintained and provide suitable brood-rearing habitat. Livestock and herding activities would cause negligible to moderate trampling and disturbance impacts on ground nesting species.

## **Conclusion**

I have determined the issuance of a grazing permit would be in conformance with the Cascade Resource Management Plan dated July 1, 1988, and that implementation of the livestock grazing management actions described in Alternative C of DOI-BLM-B010-2010-0057-EA would continue to meet Standards.

## **Authority**

The authorities under which this decision is being issued include the Taylor Grazing Act of 1934, as amended, and the Federal Land Policy and Management Act of 1976, as promulgated through Title 43 of the Code of Federal Regulations (CFR) Subpart 4100 Grazing Administration - Exclusive of Alaska.

My decision is issued under the following specific regulations:

- 4100.0-8 Land use plans. The CRMP designates the Gambрил Individual Allotment as available for livestock grazing.
- 4110.3 Changes in permitted use.
- 4130.2 Grazing permits or leases. Grazing permits may be issued to qualified applicants on lands designated as available for livestock grazing. Grazing permits shall be issued for a term of 10 years unless the authorized officer determines that a lesser term is in the best interest of sound management.
- 4130.3 Terms and conditions. Grazing permits must specify the terms and conditions that are needed to achieve desired resource conditions, including both mandatory and other terms and conditions; and
- 4180 Fundamentals of Rangeland Health and Standards and Guidelines for Grazing Administration. This Proposed Decision would result in appropriate action(s) to modify existing grazing management; modifications to the Mandatory and Other Terms and Conditions would ensure that Standards would continue to be met.

## **Right of Protest and/or Appeal**

Any applicant, permittee, lessee or other interested public may protest a Proposed Decision under Sec. 43 CFR 4160.1 and 4160.2, in person or in writing to Terry Humphrey, Four Rivers Field Office Manager, 3948 Development Avenue, Boise ID 83705, within 15 days after receipt of such decision. The protest, if filed should clearly and concisely state the reason(s) why the Proposed Decision is in error.

In accordance with 43 CFR 4160.3(a), in the absence of a protest, the Proposed Decision will become the Final Decision of the authorized officer without further notice unless otherwise provided in the Proposed Decision.

In accordance with 43 CFR 4160.3(b), upon a timely filing of a protest, after a review of protest received and other information pertinent to the case, the authorized officer shall issue a Final Decision.

Any applicant, permittee, lessee or other person whose interest is adversely affected by the final decision may file an appeal in writing in accordance with 43 CFR 4.470 and 43 CFR 4160.4. The

appeal must be filed within 30 days following receipt of the final decision or within 30 days after the date the Proposed Decision becomes final. The appeal may be accompanied by a petition for a stay of the decision in accordance with 43 CFR 4.471 pending final determination on appeal. In accordance with 43 CFR 4.401, BLM does not accept fax or email filing of a notice of appeal and petition for stay. Any notice of appeal and/or petition for stay must be sent or delivered to the office of the authorized officer by mail or personal delivery. The person/party must also serve a copy of the appeal on the Office of the Solicitor, Boise Field Solicitors Office, University Plaza, 960 Broadway Ave., Suite 400, Boise Idaho, 83706 and person(s) named [43 CFR 4.421(h)] in the *copies sent to*: section of this decision.

Should you wish to file a motion for stay, see 43 CFR 4.471 (a) and (b). In accordance with 43 CFR 4.471(c), a petition for a stay must show sufficient justification based on the following standards:

1. The relative harm to the parties if the stay is granted or denied.
2. The likelihood of the appellant's success on the merits.
3. The likelihood of immediate and irreparable harm if the stay is not granted. and
4. Whether the public interest favors granting the stay.

As noted above, the petition for stay must be filed in the office of the authorized officer and served in accordance with 43 CFR 4.471. In accordance with 43 CFR 4.401, BLM does not accept fax or email filing of a notice of appeal and petition for stay. Any notice of appeal and/or petition for stay must be sent or delivered to the office of the authorized officer by mail or personal delivery.

Any person named in the decision that receives a copy of a petition for a stay and/or an appeal, see 43 CFR 4.472(b) for procedures to follow if you wish to respond.

If you have any questions, please contact either Matt McCoy Four Rivers Assistant Field Manager at (208) 384-3343, or myself at 208-384-3430.

Sincerely,

Terry A Humphrey  
Four Rivers Field Manager
