Utah Bureau of Land Management

The signed CONCLUSION at the end of this worksheet is part of an interim step in the BLM's internal analysis process and does not constitute an appealable decision; however, it constitutes an administrative record to be provided as evidence in protest, appeals and legal procedures.

OFFICE: Moab Field Office

PROJECT NUMBER: MFO-Y010-2016-039R

PROPOSED ACTION TITLE: Special Recreation Permit Renewal for Mountain Sports International (Enduro Cup)

LOCATION/LEGAL DESCRIPTION: designated roads and trails in the Klondike Bluffs Mountain Bike Focus Area

APPLICANT: Ben Nelson, 1435 South State Street, SLC, Utah 84115

A. Description of the Proposed Action and Any Applicable Mitigation Measures

Ben Nelson, on behalf of Mountain Sports International, has requested renewal of a Special Recreation Permit (SRP) for operating a biking race weekend on designated roads and trails within the Moab Field Office of the BLM. The event would occur in spring, usually on the first weekend in May. All running would occur on designated roads and trails in the Klondike Bluffs area. Mountain Sports International has held an SRP with the Moab BLM for several years. Standard BLM Utah statewide as well as biking race stipulations would apply to the SRP for Mountain Sports International.

B. Land Use Plan (LUP) Conformance

LUP Name* Moab Resource Management Plan Date Approved October, 2008

*List applicable LUPs (for example, resource management plans; activity, project, management or program plans; or applicable amendments thereto).

The proposed action is in conformance with the applicable LUPs because it is specifically provided for in the following LUP decisions:

Page 97 of the Moab RMP reads as follows: "Special Recreation Permits are issued as a discretionary action as a means to: help meet management objectives, provide opportunities for economic activity, facilitate recreational use of public lands, control visitor use, protect recreational and natural resources, and provide for the health and safety of visitors." In addition, on page 98 of the Moab RMP, it states, "All SRPs will contain standard stipulations appropriate for the type of activity and may include stipulations necessary to protect lands or resources, reduce user conflicts, or minimize health and safety concerns....Issue and manage recreation permits for a wide variety of uses to enhance outdoor recreational opportunities, provide opportunities for private enterprise, manage user-group interaction, and limit the impacts to such uses upon natural and cultural resources."

The Moab Resource Management Plan (RMP), Final Environmental Impact Statement, signed October 31, 2008, identified lands with wilderness characteristics. The proposed use does not include lands with wilderness characteristics. The proposed activity would not result in any changes in the impacts that were analyzed in the FEIS for the RMP.

C. Identify the applicable National Environmental Policy Act (NEPA) documents and other related documents that cover the proposed action.

List by name and date all applicable NEPA documents that cover the proposed action.

Environmental Assessment DOI-BLM-UT-Y010-2015-0154, *Special Recreation Permit for Mountain Sports International*, covers the biking competition. This EA analyzed the exact race course with the exact aid stations and staging areas for the same company in 2015. This EA was signed on April 13, 2015.

D. NEPA Adequacy Criteria

1. Is the new proposed action a feature of, or essentially similar to, an alternative analyzed in the existing NEPA document(s)? Is the project within the same analysis area, or if the project location is different, are the geographic and resource conditions sufficiently similar to those analyzed in the existing NEPA document(s)? If there are differences, can you explain why they are not substantial?

Yes

No

Documentation of answer and explanation: The existing NEPA documents address the impacts of biking on this exact course.

2. Is the range of alternatives analyzed in the existing NEPA document(s) appropriate with respect to the new proposed action (or existing proposed action), given current environmental concerns, interests, and resource values?

Yes

No

Documentation of answer and explanation: The Environmental Assessment listed above contains analysis of the proposed action and a no action alternative. The environmental concerns, interests, resource values, and circumstances have not changed to a degree that warrants broader consideration.

3. Is existing analysis adequate in light of any new information or circumstances (such as, rangeland health standards assessment; recent endangered species listings, updated list of BLM sensitive species)? Can you reasonably conclude that new information and new circumstances would not substantially change the analysis of the new proposed action?

Yes

No

Documentation of answer and explanation: The existing analysis and conclusions are adequate as there has been no new information or circumstances presented. It can be reasonably concluded that all new information and circumstances are insignificant with regard to analysis of the proposed action.

4. Are the direct, indirect, and cumulative effects that would result from implementation of the new proposed action similar (both quantitatively and qualitatively) to those analyzed in the existing NEPA document?

- Yes
 No

Documentation of answer and explanation: The direct and indirect impacts are substantially unchanged from those identified in the existing NEPA document. Site-specific impacts analyzed in the existing document are the same as those associated with the current proposed action.

5. Are the public involvement and interagency review associated with existing NEPA document(s) adequate for the current proposed action?

- Yes
 No

Documentation of answer and explanation: The public was notified of the preparation of the Environmental Assessment listed above by posting on the ENBB on February 2, 2015. This level of involvement and notification is adequate for the current proposed action.

E. Persons/Agencies/BLM Staff Consulted:

<u>Name</u>	<u>Title</u>	<u>Resource Represented</u>
Ann Marie Aubry	Hydrologist	Air quality; Water quality; Floodplains, Soils, Wetlands/Riparian
Katie Stevens	Recreation Planner	Areas of Critical Environmental Concern; Wild & Scenic Rivers, Recreation, Visual Resources
David Pals	Geologist	Geology, Wastes (hazardous or solid)
ReBecca Hunt-Foster	Paleontologist	Paleontology
David Williams	Rangeland Management Specialist	T&E Plants
Jordan Davis	Rangeland Management Specialist	Rangeland Health Standards. Vegetation, Weeds, RHS, Grazing, Woodlands
Jared Lundell	Archaeologist	Cultural Resources; Native American Religious Concerns
Pam Riddle	Wildlife Biologist	Threatened, Endangered, or Candidate Animal Species, Wildlife, Migratory Birds, Utah Sensitive Species
Jan Denney	Realty Specialist	Lands and Realty
Bill Stevens	Recreation Planner	Wilderness, Natural Areas, Lands with Wilderness Characteristics, Socioeconomics, Environmental Justice

CONCLUSION

Plan Conformance:

- This proposal conforms to the applicable land use plan.
- This proposal does not conform to the applicable land use plan

Determination of NEPA Adequacy

- Based on the review documented above, I conclude that this proposal conforms to the applicable land use plan and that the NEPA documentation fully covers the proposed action and constitutes BLM's compliance with the requirements of the NEPA.
- The existing NEPA documentation does not fully cover the proposed action. Additional NEPA documentation is needed if the project is to be further considered.

DETERMINATION OF STAFF: (Choose one of the following abbreviated options for the left column)

NP = not present in the area impacted by the proposed or alternative actions

NI = present, but not affected to a degree that detailed analysis is required

PI = present with potential for relevant impact that need to be analyzed in detail in the EA

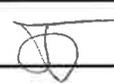

NC = (DNAs only) actions and impacts not changed from those disclosed in the existing NEPA documents cited in Section D of the DNA form. The Rationale column may include NI and NP discussions.

The following elements are not present in the Moab Field Office and have been removed from the checklist:
Farmlands (Prime or Unique), Wild Horses and Burros.

**FINDING OF NO SIGNIFICANT IMPACT
AND
DECISION RECORD**

Mountain Sports International, Inc. (Competitive Mountain Bike Event)

DOI-BLM-UT-Y010-2016-0080-DNA

FONSI: Based on the analysis of potential environmental impacts contained in the present document, I have determined that the action will not have a significant effect on the human environment and an environmental impact statement is therefore not required.

DECISION: It is my decision to renew a competitive Special Recreation Permit to Mountain Sports International, Inc. in the areas listed under the Proposed Action. This decision is contingent upon meeting all stipulations and monitoring requirements attached.

RATIONALE: The decision to reissue the Special Recreation Permit for Mountain Sports International, Inc. has been made in consideration of the environmental impacts of the proposed action. The action is in conformance with the Moab Resource Management Plan, which allows for recreation use permits for a wide variety of uses to enhance outdoor recreational opportunities, provide opportunities for private enterprise, manage user-group interaction, and limit the impacts to such uses upon natural and cultural resources.
