

Royces Electronics, LLC filed right-of-way (ROW) application UTU-91392 to authorize a communication site and access road in Castle Valley, Utah on the following public lands:

T. 25 S., R. 23 E., section 15, S1/2NE1/4, N1/2NW1/4. (Map attached)

The ROW would be 40 feet by 50 feet for the communications site and 15 feet wide by 3,410 feet long for the access road.

The communications site would consist of the following equipment:

15-foot tall tower

8' x 10' x 10' solar panel rack

2' x 2' x 8' tall equipment cabinet

2' diameter microwave dish

(see attached sample photo)

The access road would be on a designated Grand County unmaintained road. (See attached map)

Equipment for construction would be driven to the end of the designated road in 2 pickup trucks and hand carried to the communication site location. There would be no grading of the site. Natural grade would be used as much as possible and existing trees would be used for screening the site as much as possible.
