AM Subject
New development in the Jonah field
of Wyoming

Greetings

It would be my desire to communicate how important it is for the quick and appropriate approval of development of the proposed NPL area of the Jonah field as it means so much to the State of Wyoming as well as the many people who call this area their home. I have no doubt that the need for development of US energy sources cannot be understated and I am sure the powers that be are very much aware of that need, I am an energy industry worker as was my father up until the day he died in 2000. This industry has provided a source of stability and support for my family and many others as well as being a important part of the this Country economy and specifically the State of Wyoming. I have seen first hand how far the energy industry has come since my first involvement in early 1980 up until this time, I have no doubt that development of the proposed NPL area of Jonah will be conducted with the utmost respect and consideration for the natural resources and habitat that is so critical for the enjoyment of live in this area.

I would respectfully request that your full support and attention be paid this this very critical project of development and its approval be expedited as every stage of consideration.

Thank You for your time in reading and allowing this response.
