Comments on the NPL , Natural Gas
 Development.

My name is Frank Liska, I have been a resident of the state of Wyoming for 64 years and have watched the Boom and Bust cycles over this time. To help with our local economy and keep it more stable I feel the NPL needs to happen in a time frame to help everyone. The tax revenues will help keep a constant flow of money into the local communities and state.

I feel that a smooth transition from the Jonah development to the NPL would help keep the experienced work force that now exists .

Using the drilling pad will make a smaller foot print by using each pad for four wells. The smaller number of collection sites will keep traffic to a minimum throughout the NPL. This will cause less stress upon all the animals in the area and help keep dust down.

Environmentally Encana is one of the leaders in the field of compliance and application of multiple development impact reduction strategies.

Thank You for giving me the opportunity to comment.

Frank Liska

408 Washakie Dr
