Benefits of the NPL Natural Gas Development Project

1114

Oil and gas development is a major contributor to economic growth in southwestern Wyoming.

NPL development would provide continued long term stable employment to residents of Sublette County and surrounding areas.

NPL development would help support sustainable communities in southwestern Wyoming.

NPL development would build efficiently upon existing Jonah infrastructure and leverage existing Jonah development technologies.

A smooth transition from Jonah to NPL would help reduce the “boom and bust” cycles of employment/unemployment seen in other areas.

More than 1,100 people are currently employed by Encana operations across Wyoming.

Stable jobs will continue to be created as a result of continued development in the area.

NPL development would provide a continued secure supply of domestic energy to Wyoming and the U.S.A.

Tax revenues from oil and gas production benefit Wyoming communities in many ways including: schools, highways, law enforcement, public facilities, family assistance, and outreach.

The Encana Community Investment Program helps strengthen Wyoming Communities through grants and other forms of financial assistance.

Encana is an industry leader in application of cutting-edge air emission reductions technologies including: natural gas powered rigs, flare-less completions technologies, and many production related emission reduction technologies.

Encana is a leader in environmental compliance and application of multiple development impact reduction strategies.
