

**November 2016 Competitive Oil and Gas Lease Sale  
DOI-BLM-UT-G010-2016-033-EA**

**Errata Sheet**

**Section 4.2.1. Air Quality & Section 4.2.2. Cultural**

Page 56 – “Since climate change and global warming are global phenomena, for purposes of this NEPA analysis, the analysis presented above about the direct and indirect effects of GHG emissions from the proposed actions is also an analysis of the cumulative effects of the proposed actions. Consistent with CEQ guidance, the BLM has determined that this analysis “adequately addresses the cumulative impacts for climate change from the proposed action and its alternatives, and therefore a separate cumulative effects analysis for GHG emissions is not needed.” The paragraph should be moved from the last paragraph of Section 4.2.2. Cultural to Section 4.2.1. Air Quality as the last paragraph.
