CATEGORICAL EXCLUSION ENVIRONMENTAL REVIEW AND APPROVAL

A. Background

Subject Functional Code: 4130

Categorical Exclusion (CX) Number: DOI-BLM-ORWA-B060-2016-0017-CX

Date: 3/24/2016

Grazing Permit Number: 3602473

Preparer: Richard Knox

Title of Proposed Action: Livestock Grazing Permit #3602473 Renewal

Legal Description: Pueblo-Lone Mountain Allotment is located south of Fields, Oregon in the Andrews Resource Area. See attached vicinity map.

Trout Creek Mountain Allotment is located approximately 13 air miles southeast of Fields, Oregon in the Andrews Resource Area. See attached vicinity map.

Fields Basin Allotment is located approximately three air miles west of Fields, Oregon in the Andrews Resource Area. See attached vicinity map.

Orlando Fenced Federal Range (FFR) Allotment is located approximately seven air miles southeast of Fields, Oregon in the Andrews Resource Area. See attached vicinity map.

Long Hollow FFR Allotment is located approximately seven air miles northwest of Fields, Oregon in the Andrews Resource Area. See attached vicinity map.

Tule Springs Allotment is located east of Fields, Oregon in the Andrews Resource Area. See attached vicinity map.

Wiley FFR Allotment is located approximately seven air miles southeast of Fields, Oregon in the Andrews Resource Area. See attached vicinity map.

Windmill FFR Allotment is located approximately five air miles southeast of Fields, Oregon in the Andrews Resource Area. See attached vicinity map.

Dixon FFR Allotment is located approximately four air miles southeast of Fields, Oregon in the Andrews Resource Area. See attached vicinity map.

Description of Proposed Action: The Bureau of Land Management (BLM) would authorize grazing by cattle on the allotments in the table below by issuing grazing permit #3602473. This would permit livestock to graze on the allotments at the level shown in the table below for a term not to exceed 10 years.

Allotment Name	Allotment Number	Livestock Type	Livestock Number	Season of Use	% Public Land (%PL)	Active Animal Unit Months (AUM)
Pueblo-Lone Mountain	06020	Cattle	1,966	4/1-9/15	98	10,643
Trout Creek Mountain	06015	Cattle	584	4/16-9/30	94	3,032
Fields Basin	06035	Cattle	514	4/16-10/30	95	3,179
Orlando FFR	06106	Cattle	64	5/2-9/30	100	320
Long Hollow FFR	06112	Cattle	101	10/1-10/31	100	103
Tule Springs	06018	Cattle	228	11/1-2/28	100	900
Wiley FFR	06103	Cattle	3	4/1-6/30	100	9
Windmill FFR	06124	Cattle	15	9/1-9/30	100	15
Dixon FFR	06115	Cattle	22	11/1-11/30	100	22

The proposed action is a continuation of the current grazing management of the allotments, which is consistent with BLM regulatory guidance and land use plan (LUP) objectives.

Terms and conditions of the permit: see attachment.

B. Conformance with LUP

LUP Name and Date Approved/Amended: Andrews Management Unit (AMU) Resource Management Plan (RMP)/Record of Decision (ROD), approved July 2005, as amended by the Approved RMP Amendment for Greater Sage-Grouse in Oregon (GRSG ARMPA) and the ROD for the Great Basin Region including the Greater Sage-Grouse (GRSG) Sub-Regions of Idaho and Southwestern Montana, Nevada and Northeastern California, Oregon, and Utah, approved September 2015.

The proposed action is in conformance with the applicable LUP because it is specifically provided for in the following LUP decision(s): The AMU ROD/RMP identifies Pueblo-Lone Mountain, Trout Creek Mountain, Fields Basin, Orlando FFR, Long Hollow FFR, Tule Springs, Wiley FFR, Windmill FFR, and Dixon FFR Allotments as available for livestock grazing in Appendix J, pages J-24, J-19, J-38, J-51, J-57, J-22, J-48, J-68, and J-59. The RMP expectation is continued livestock grazing at current levels, unless changes are shown to be warranted through rangeland monitoring and evaluation as analyzed in a standards and guidelines (S&G) determination. This allotment was assessed and determined to be achieving all standards and conforming to guidelines; therefore, no change in livestock grazing levels is warranted.

C. Standards for Rangeland Health Assessment

An S&G assessment and an allotment evaluation for Pueblo-Lone Mountain, Trout Creek Mountain, Fields Basin, Orlando FFR, Long Hollow FFR, Tule Springs, Wiley FFR, Windmill FFR, and Dixon FFR Allotments were completed in 2015 and determined that the allotments are achieving standards and conforming to the guidelines (43 CFR 4180.2; Standards for Rangeland Health and Guidelines for Grazing Management for Public Lands in Oregon and Washington 1997). The following standards are currently being achieved or are not applicable:

- (1) Watershed Function- Uplands
- (2) Watershed Function- Riparian
- (3) Ecological Processes
- (4) Water Quality
- (5) Native, Threatened or Endangered (T&E), and Locally Important Species

The applicant has a satisfactory record of performance and is in substantial compliance with the terms and conditions of the existing grazing permit.

D. Other Applicable Plans/Strategies

The proposed permit renewal was also found to be in conformance with one or more of the following BLM plans or programmatic strategies:

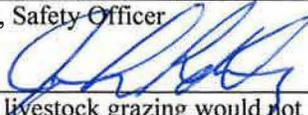

This instruction memorandum (IM) provides additional policy guidance on using this categorical exclusion (CX): **IM 2015-121, Implementing Amended Section 402(h)(1) of Federal Land Policy and Management Act (FLPMA) – Using a [CX] when Issuing a Grazing Permit or Lease.**

E. Compliance with the National Environmental Policy Act (of 1969) (NEPA)

Section 402 of FLPMA of 1976 (43 U.S.C. 1752), as amended by the “Carl Levin and Howard P. ‘Buck’ McKeon National Defense Authorization Act for Fiscal Year 2015”: section 402(c)(2), in accordance with Section 401(a) of FLPMA, authorizes permits and leases to a qualified applicant for domestic livestock grazing on public lands to be for a term of ten years, subject to terms and conditions consistent with the governing law. Section 402(h)(1), NEPA of 1969, of FLPMA states that in general – the issuance of a grazing permit or lease by the Secretary concerned may be categorically excluded from the requirement to prepare an environmental assessment (EA) or an environmental impact statement (EIS) under NEPA of 1969 (42 U.S.C. 4321, et seq.) if; 1. The issued permit or lease continues the current grazing management of the allotment; and 2. Land health assessment or evaluations have been completed in accordance with Manual Handbook H-4180-1; and 3. Based on the assessment and evaluation the authorized official concludes that the allotment (a) is meeting land health standards; or (b) is not meeting land health standards due to factors other than existing livestock grazing. The grazing permit/lease being renewed under this CX meets these requirements.

This CX review was conducted by an interdisciplinary team (IDT) which utilized all available allotment information to make a recommendation. As documented below, the IDT found that the proposed action did not trigger any of the extraordinary circumstances described in 516 Departmental Manual (DM) 2, Appendix 2.

Screening for Exceptions: The following extraordinary circumstances (516 DM 2, Appendix 2) may apply to individual actions within the categorical exceptions. The indicated specialist recommends the proposed action does *not*:

CX EXTRAORDINARY CIRCUMSTANCES DOCUMENTATION	
2.1	Have significant impacts on public health or safety.
Specialist: John Petty, Safety Officer	
Signature and Date:  4-1-16	
Rationale: Continued livestock grazing would not result in new impacts on public health or safety.	
2.2	Have significant impacts on such natural resources and unique geographic characteristics as historic or cultural resources; park, recreation or refuge lands; wilderness areas; wild or scenic rivers; national natural landmarks; sole or principal drinking water aquifers; prime farmlands; wetlands (Executive Order 11990); flood plains (Executive Order 11988); national monuments; migratory birds; and other ecologically significant or critical areas.
<u>Migratory Birds</u>	
Specialist: Andrew Daniels, Wildlife Biologist	
Signature and Date:  3-25-16	
Rationale: The proposed action to continue livestock grazing as it currently exists would not alter any of the available landscape; there would be no effect to migratory birds or their habitat.	
<u>Historic and Cultural Resources</u>	
Specialist: Scott Thomas, District Archeologist	
Signature and Date:  3-24-16	
Rationale: There would be no additional effects to cultural or historic resources associated with this proposed action.	

Areas of Critical Environmental Concern (ACEC)/Research Natural Areas (RNA)

Specialist: Caryn Burri, Natural Resource Specialist (NRS) (Botany)

Signature and Date:

 3/29/16

Rationale: There are three RNAs and two ACECs within the allotments of this permit: Pueblo Foothills RNA, Long Draw RNA, East Fork Trout Creek RNA, Alvord Desert ACEC, and Borax Lake ACEC. Current grazing management practices are not negatively impacting the ACECs or RNAs. No new impacts would occur to these areas with the renewal of the current grazing permit.

Wetlands/Flood Plains

Specialist: Jarod Lemos, NRS (Riparian)

Signature and Date:

 3/29/16

Rationale: The proposed action to continue livestock grazing as it currently exists within the allotments would have no new impact to wetland/flood plain resources. Monitoring of the wetland/flood plain resources over the next 1-5 years will be done to ensure that there are no new significant impacts.

Soils, Biological Soil Crust (BSC), Prime Farmlands

Specialist: Caryn Burri, NRS (Botany)

Signature and Date:

 3/29/16

Rationale: Based on current trend, impacts to soils and BSCs are not measurable under the current grazing management practices. No new impacts to soils and BSCs would result with the renewal of the existing grazing permit. There are no prime farmlands within the allotments.

Recreation/Visual Resources

Specialist: Mandy DeCoo, Recreation Specialist

Signature and Date:

 3/29/16

Rationale: No new impacts to recreation or visual resources would result from the renewal of the grazing permit as it currently exists.

Wilderness/Wild and Scenic River (WSR) Resources

Specialist: Tom Wilcox, Wilderness Specialist

Signature and Date:

 3/29/2016

Rationale: There are eight wilderness study areas (WSA) within the allotments of this permit: Rincon WSA, Hawk Mountain WSA, Pueblo Mountains WSA, Red Mountain WSA, Mahogany Ridge WSA, Willow Creek WSA, Disaster Peak WSA, and Alvord Desert WSA. There are no WSRs, lands with wilderness characteristics, or wilderness within these allotments. The current grazing management practices have not negatively impacted the WSAs; therefore, no new impacts to these special management areas would occur with the renewal of the grazing permit.

2.3 Have highly controversial environmental effects or involve unresolved conflicts concerning alternative uses of available resources (NEPA Section 102(2)(E)).

Specialist: Emily Erwin, Planning and Environmental Coordinator

Signature and Date:

 3/29/2016

Rationale: There are no highly controversial environment effects or unresolved conflicts concerning alternative uses of available resources. The permit renewal is for an existing permit within existing allotments; the standards for rangeland health have been achieved, and there will be no change from current management.

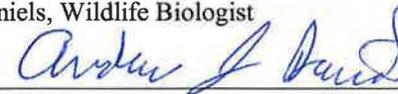

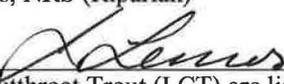

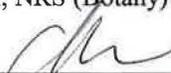

2.4 Have highly uncertain and potentially significant environmental effects or involve unique or unknown environmental risks.

Specialist: Emily Erwin, Planning and Environmental Coordinator

Signature and Date:

 3/29/2016

Rationale: There are no highly uncertain and potentially significant environmental effects, nor are unique or unknown environmental risks involved. The permit renewal is for an existing permit within existing allotments; the standards for rangeland health have been achieved, and there will be no change from current management.

<p>2.5 Establish a precedent for future action or represent a decision in principle about future actions with potentially significant environmental effects.</p> <p>Specialist: Emily Erwin, Planning and Environmental Coordinator</p> <p>Signature and Date:  3/29/2016</p> <p>Rationale: Implementation would not set precedence for future actions or represent a decision in principle about future actions with potentially significant environmental effects. The permit renewal is for an existing permit within existing allotments; the standards for rangeland health have been achieved, and there will be no change from current management.</p>
<p>2.6 Have a direct relationship to other actions with individually insignificant but cumulatively significant environmental effects.</p> <p>Specialist: Emily Erwin, Planning and Environmental Coordinator</p> <p>Signature and Date:  3/29/2016</p> <p>Rationale: Implementation does not have any known direct relationship to other actions with individually insignificant but cumulatively significant environmental effects. The permit renewal is for an existing permit within existing allotments; the standards for rangeland health have been achieved, and there will be no change from current management.</p>
<p>2.7 Have significant impacts on properties listed, or eligible for listing, on the National Register of Historic Places as determined by either the bureau or office.</p> <p>Specialist: Scott Thomas, District Archeologist</p> <p>Signature and Date:  3-24-16</p> <p>Rationale: There will be no additional effects to National Register eligible sites associated with this proposed action.</p>
<p>2.8 Have significant impacts on species listed, or proposed to be listed, on the List of Endangered or Threatened Species, or have significant impacts on designated critical habitat for these species.</p> <p><u>Endangered or Threatened Species - Fauna</u></p> <p>Specialist: Andrew Daniels, Wildlife Biologist</p> <p>Signature and Date:  3/25/16</p> <p>Rationale: There are no threatened or endangered (T&E) species in these allotments, so there would be no effect to these species as a result of the proposed action. There will be no changes occurring on the ground to alter the available habitat that is currently there. A portion of the allotment falls within priority habitat management area (PHMA) or general habitat management area (GHMA). S&Gs indicate Standard 5 is being achieved. Therefore, issuance of a new permit under the same terms and conditions would not have new impacts to sage-grouse or sage-grouse habitat.</p>
<p><u>Endangered or Threatened Species - Aquatic</u></p> <p>Specialist: Jarod Lemos, NRS (Riparian)</p> <p>Signature and Date:  3/28/16</p> <p>Rationale: Lahontan Cutthroat Trout (LCT) are listed as threatened under the Endangered Species Act (ESA) and are present as a recovery population within Van Horn Creek, which is located within the Pueblo-Lone Mountain Allotment. Current grazing management is having a positive effect on the riparian habitat along Van Horn Creek, allowing for improved woody species regeneration. Continuing the existing use does not negatively affect the threatened LCT.</p>
<p><u>Endangered or Threatened Species - Flora</u></p> <p>Specialist: Caryn Burri, NRS (Botany)</p> <p>Signature and Date:  3/29/16</p> <p>Rationale: There are no Federally designated T&E plant species within the grazing allotments of this permit. Current grazing management practices are not negatively impacting BLM-designated special status plant species. There would be no new impacts with the renewal of the current grazing permit.</p>

G. Contact Person

For additional information concerning this CX review, contact Richard Knox, Rangeland Management Specialist, BLM, Burns District Office, 28910 Highway 20 West, Hines, Oregon 97738, (541) 541-4400.

Decision: It is my proposed decision to implement the proposed action as described above (section "A" of the CX) to issue a fully processed, 10-year grazing permit for the Pueblo-Lone Mountain, Trout Creek Mountain, Fields Basin, Tule Springs, Orlando FFR, Long Hollow FFR, Wiley FFR, Windmill FFR, and Dixon FFR Allotments.

Rationale: The BLM has disclosed in the CX the relevant and applicable information available to the agency. The information in the CX is a summary of the information used to support the conclusions made in the CX. The following is the rationale I used to support my decision.

Grazing Permit: Record of Performance: Pursuant to 43 CFR 4110.1(b)(1), a grazing permit may not be renewed if the permittee seeking renewal has an unsatisfactory record of performance with respect to the previous grazing permit. Accordingly, I have reviewed your record as a grazing permit holder for the Pueblo-Lone Mountain, Trout Creek Mountain, Fields Basin, Tule Springs, Orlando FFR, Long Hollow FFR, Wiley FFR, Windmill FFR, and Dixon FFR Allotments, and have determined that you have a satisfactory record of performance relative to compliance with terms and conditions of your existing permit and are a qualified applicant for the purposes of a permit renewal.

The grazing permit/lease being renewed under this CX meets the following requirements in accordance with section 402 of FLPMA of 1976 (43 U.S.C. 1752) as amended by the "Carl Levin and Howard P. 'Buck' McKeon National Defense Authorization Act for Fiscal Year 2015":

- The issued permit or lease continues the current grazing management of the allotment;
- A land health assessment and evaluation have been completed in accordance with Manual Handbook H-4180-1;
- The authorized officer concludes from the findings from the evaluation report that: a. the allotment subject to evaluation is meeting land health standards, or b. the allotment subject to evaluation is not meeting standards due to factors other than livestock grazing.

Because this proposed decision continues current grazing management; the terms and conditions will be the same between the existing and renewed grazing permits.

There will be no new impacts or effects as a result of issuance of a new permit. This proposed decision does not individually or cumulatively have a significant effect on the human environment; therefore, neither an EA nor an EIS is required (40 CFR 1508.4). Refer to the CX.

Rangeland health: A rangeland health determination was completed in 2015 and indicated all standards present were being achieved, including Standard 5 (Federal threatened and endangered species, Federal proposed, Category 1 and 2 Federal candidates, and other special status species) which includes sage-grouse.

The utilization level as measured at the end of the growing season will not exceed 60 percent on non-native seedings and 50 percent on native, herbaceous forage plants, on a pasture average basis, as stated in the Andrews RMP/ROD (page 54).

Greater Sage-Grouse: The BLM specialists noted no sage-grouse related concerns during the rangeland health assessment. In the CX, BLM determined that continuing current grazing management (the proposed action) did not have a significant effect on sage-grouse as no new impacts will result with renewal of the grazing permit.

In addition, BLM has determined that this proposed decision is in conformance with the September 2015 GRSG ARMPA.

The BLM CX considered and disclosed the potential impacts of the permit renewal on GRSG indicating there are no changes to sage-grouse or currently existing habitat. The Pueblo-Lone Mountain, Trout Creek Mountain, and Orlando FFR Allotments are in a sagebrush focal area (SFA). There are 167,598 acres of GHMA and 133,670 acres of PHMA within these three allotments. One hundred forty-one thousand three hundred twenty-eight (141,328) acres of the allotments are within the Pueblo/South Steens and Trout Creeks priority areas of conservation (PAC). Spatial data, including allotment boundaries and sage-grouse habitat, are available online¹.

This proposed decision conforms to lek buffer distances listed in Table 2-3 of the GRSG ARMPA (page 2-8) and direction to not congregate livestock during the breeding season between March 1 through June 30 (GRSG ARMPA, page 2-19). The existing fences within 1.2 miles of a lek are already marked, and the decision does not include upgrading existing primitive roads in the allotments (GRSG ARMPA, pages 2-31 and 2-32).

Grazing management monitoring typically focuses on livestock management and vegetation response. Livestock management will be monitored through use supervision, actual use reporting, and photo documentation. The BLM will follow the monitoring requirements in the management decisions for livestock grazing identified in the September 18, 2015, GRSG ARMPA (pages 2-17 to 2-21), as well as the GRSG Monitoring Framework (Appendix D), the Adaptive Management Strategy (Appendix J), the AMP dated August 1995 (Pueblo-Lone Mountain), the 1989 decision/agreement (Trout Creek Mountain), and the AMU RMP/ROD (August 2005).

Wilderness, WSAs: The BLM has appropriately disclosed and analyzed the effects of the proposed action on designated wilderness areas, WSAs, and lands with wilderness characteristics. The CX concludes no new impacts to WSAs will result with the renewal of the grazing permit. Wilderness and lands with wilderness characteristics are not present.

Authority: The authorities under which this decision is being issued include the Taylor Grazing Act of 1934, as amended; FLPMA of 1976, as promulgated through 43 CFR 4100, Grazing Administration – Exclusive of Alaska; and 43 CFR 1601.0-5(b). My decision is issued under the following specific regulations:

- 4100.0-8, Land use plans: The AMU RMP/ROD designates the Pueblo-Lone Mountain, Trout Creek Mountain, Fields Basin, Tule Springs, Orlando FFR, Long Hollow FFR, Wiley FFR, Windmill FFR, and Dixon FFR Allotments available for livestock grazing, and the permit is in conformance with the LUP as defined at 43 CFR 1601.0-5(b);
- 4130.2, Grazing permits or leases: Grazing permits may be issued to qualified applicants on lands designated as available for livestock grazing. Grazing permits shall be issued for a term of 10 years unless the authorized officer determines that a lesser term is in the best interest of sound management;
- 4130.3, Terms and conditions: Grazing permits must specify the terms and conditions that are needed to achieve desired resource conditions, including both mandatory and other terms and conditions;
- 4180, Fundamentals of Rangeland Health and Standards and Guidelines for Grazing Administration: The allotment(s) covered in this decision are meeting S&Gs or, if not meeting, the causal factor is not current livestock grazing.

Protest and Appeal Procedures:

Protest: Any applicant, permittee, lessee, or other interested public may protest a proposed decision under 43 CFR 4160.1 and 4160.2, in person or in writing, to Rhonda Karges, Andrews/Steens Resource Area Field Manager, Burns District Office, 28910 Highway 20 West, Hines, Oregon 97738, within 15 days after receipt of such decision. The protest, if filed, should clearly and concisely state the reason(s) why the proposed decision is in error.

A written protest electronically transmitted (e.g., email, facsimile, or social media) will not be accepted; a written protest must be printed or typed on paper and delivered to BLM in person or by mail. A written protest must be received by the BLM no later than the end of the protest period by the ordinary close of business for the day. A

¹Spatial data is available at the following website: <http://www.blm.gov/or/energy/opportunity/final/data.php>.

protest made in person must be made to the authorizing official, or designee, by the end of the protest period by the ordinary close of business for the day.

In the absence of a protest, the proposed decision will become the final decision of the authorized officer without further notice unless otherwise provided in the proposed decision.

Appeal: Any applicant, permittee, lessee, or other person whose interest is adversely affected by the final decision may file an appeal of the decision. An appellant may also file a petition for stay of the decision pending final determination on appeal. The appeal and petition for stay must be filed in the office of the authorized officer, in person or in writing, to Rhonda Karges, Andrews/Steens Resource Area Field Manager, Burns District Office, 28910 Highway 20 West, Hines, Oregon 97738, within 30 days following receipt of the final decision.

The appeal must be in writing and shall clearly and concisely state the reasons why the appellant thinks the final decision is in error and also must comply with the provisions of 43 CFR 4.470. The appellant must also serve a copy of the appeal by certified mail on the Office of the Solicitor, U.S. Department of the Interior, 805 SW Broadway, Suite 600, Portland, Oregon 97205, and on any person(s) named in this final decision, including in the "Copies sent to" section of this final decision (43 CFR 4.470(a)).

A petition for stay, if filed, shall show sufficient justification based on the following standards (43 CFR 4.471(c)).

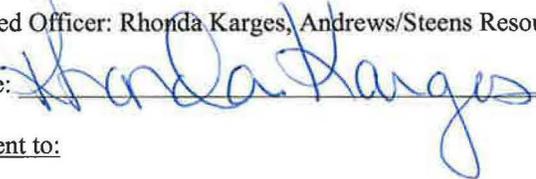

- (1) The relative harm to the parties if the stay is granted or denied;
- (2) The likelihood of the appellant's success on the merits;
- (3) The likelihood of immediate and irreparable harm if the stay is not granted; and
- (4) Whether the public interest favors granting the stay.

As noted above, the petition for stay must be filed in the office of the authorized officer. The appellant must also serve a copy of the petition for stay by certified mail on the Office of the Solicitor, U.S. Department of the Interior, and on any person(s) named in the final decision, including in the "Copies sent to" section of the final decision (43 CFR 4.471(b)).

A notice of appeal and/or request for stay electronically transmitted (e.g., email, facsimile, or social media) will not be accepted. A notice of appeal and/or request for stay must be on paper.

Authorized Officer: Rhonda Karges, Andrews/Steens Resource Area Field Manager

Standard Terms and Conditions

1. Grazing permit or lease terms and conditions and the fees charged for grazing use are established in accordance with the provisions of the grazing regulations now or hereafter approved by the Secretary of the Interior.
2. They are subject to cancellation, in whole or in part, at any time because of:
 - a. Noncompliance by the permittee/lessee with rules and regulations.
 - b. Loss of control by the permittee/lessee of all or a part of the property upon which it is based.
 - c. A transfer of grazing preference by the permittee/lessee to another party.
 - d. A decrease in the lands administered by the Bureau of Land Management within the allotment(s) described.
 - e. Repeated willful unauthorized grazing use.
 - f. Loss of qualifications to hold a permit or lease.
3. They are subject to the terms and conditions of allotment management plans if such plans have been prepared. Allotment management plans MUST be incorporated in permits or leases when completed.
4. Those holding permits or leases MUST own or control and be responsible for the management of livestock authorized to graze.
5. The authorized officer may require counting and/or additional or special marking or tagging of the livestock authorized to graze.
6. The permittee's/lessee's grazing case file is available for public inspection as required by the Freedom of Information Act.
7. Grazing permits or leases are subject to the nondiscrimination clauses set forth in Executive Order 11246 of September 24, 1964, as amended. A copy of this order may be obtained from the authorized officer.
8. Livestock grazing use that is different from that authorized by a permit or lease MUST be applied for prior to the grazing period and MUST be filed with and approved by the authorized officer before grazing use can be made.
9. Billing notices are issued which specify fees due. Billing notices, when paid, become a part of the grazing permit or lease. Grazing use cannot be authorized during any period of delinquency in the payment of amounts due, including settlement for unauthorized use.
10. The holder of this authorization must notify the authorized officer immediately upon the discovery of human remains, funerary objects, sacred objects, or objects of cultural patrimony (cultural items), stop the activity in the area of the discovery and make a reasonable effort to protect the remains and/or cultural items.
11. Grazing fee payments are due on the date specified on the billing notice and MUST be paid in full within 15 days of the due date, except as otherwise provided in the grazing permit or lease. If payment is not made within that time frame, a late fee (the greater of \$25 or 10 percent of the amount owed but not more than \$250) will be assessed.
12. No Member of, or Delegate to, Congress or Resident Commissioner, after his/her election of appointment, or either before or after he/she has qualified, and during his/her continuance in office, and no officer, agent, or employee of the Department of the Interior, other than members of Advisory committees appointed in accordance with the Federal Advisory Committee Act (5 U.S.C. App.1) and Sections 309 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et seq.) shall be admitted to any share or part in a permit or lease, or derive any benefit to arise therefrom, and the provision of Section 3741 Revised Statute (41 U.S.C. 22), 18 U.S.C. Sections 431-433, and 43 CFR Part 7, enter into and form a part of a grazing permit or lease, so far as the same may be applicable.

THIS GRAZING PERMIT:

1. CONVEYS NO RIGHT, TITLE OR INTEREST HELD BY THE UNITED STATES IN ANY LANDS OR RESOURCES
2. IS SUBJECT TO (A) MODIFICATION, SUSPENSION OR CANCELLATION AS REQUIRED BY LAND PLANS AND APPLICABLE LAW; (B) ANNUAL REVIEW AND MODIFICATION OF TERMS AND CONDITIONS AS APPROPRIATE; AND (C) THE TAYLOR GRAZING ACT, AS AMENDED, THE FEDERAL LAND POLICY AND MANAGEMENT ACT, AS AMENDED, THE PUBLIC RANGELANDS IMPROVEMENT ACT, AND THE RULES AND REGULATIONS NOW OR HEREAFTER PROMULGATED THEREUNDER BY THE SECRETARY OF THE INTERIOR.
