

Additional Resource Analysis

The BLM will also analyze impacts to the following resources in the NEPA document for the Proposed Action and Alternatives:

- Visual resources - The Project Area is located in a Visual Resource Management (VRM) Class 4 area. The objective of this class allows for management activities which require major modification of the existing character of the landscape. The level of change to the characteristic landscape can be high.
- Public Access and Recreation Resources
- Rangeland and Grazing
- Mineral Resources
- Air Quality / Climate Change
- Land Use and Transportation
- Socioeconomics / Environmental Justice

The BLM invites you to share your concerns about potential impacts on these resources that may result from the proposed action and how you think these impacts should be addressed.

Additional issues and concerns discovered during the scoping process will be addressed in the NEPA document.
