

Appendix A

Parcel Descriptions with Stipulations

February 2016 Lease Parcel EA

DOI-BLM-WY-R000-2015-0002-EA

The nominated parcels are listed below with the stipulations that would be applied under Alternative 3. Included are the parcels that would be recommended for deferral under Alternative 3 for reasons as identified in the EA and summarized in Appendix D – Offer and Deferral Summary. These stipulations are consistent with approved Resource Management Plans for the Cody, Lander, and Worland (Washakie and Grass Creek) Field Offices.

Cody Field Office

WY-1602-136 84.430 Acres
T.0560N, R.0970W, 06th PM, WY
 Sec. 022 TR 47E,54E;
 027 TR 47E,54E;

Big Horn County
Cody FO
Formerly Lease No.

Stipulations:
Lease Notice No. 1
Lease Notice No. 2
Lease Notice No. 3
Lease Stipulation No. 1
Lease Stipulation No. 2
Lease Stipulation No. 3

Defer All: Due to the anticipated timing of the RMP revision ROD prior to the date the sale will be held, all of the parcels located in the Bighorn Basin planning area are deferred.

WY-1602-137 159.800 Acres
T.0540N, R.1000W, 06th PM, WY

Lease Notice No. 1

Lease Notice No. 2

Lease Notice No. 3

Lease Stipulation No. 1

Lease Stipulation No. 2

Lease Stipulation No. 3

TLS Surface disturbing and disruptive activities are restricted or prohibited (1) within 1 mile of bald eagle and ferruginous hawk nests and $\frac{3}{4}$ mile of all other active raptor nests during the following time periods:

- April 1 to August 31 for northern goshawk
- April 1 to September 15 for burrowing owl
- February 1 to August 15 for bald eagles
- February 1 to July 31 for all other raptors

(2) as mapped on the Lander Field Office GIS database; (3) for the protection of active raptor and/or eagle nests.

TLS Surface-disturbing and disruptive activities are restricted or prohibited within 0.25 mile of identified mountain plover habitat (1) April 10 - July 10; (2) as mapped on the Lander GIS database; (3) for the protection of mountain plover nesting habitat.

TLS Surface disturbing and disruptive activities are restricted or prohibited (1) March 15 - June 30; (2) as mapped on the Lander Field Office GIS database; (3) to seasonally protect Greater Sage-Grouse breeding, nesting and early brood-rearing habitats from disruptive activities inside designated core areas.

TLS Surface disturbing and disruptive activities are restricted or prohibited (1) December 1 - March 14; (2) as mapped on the Lander Field Office GIS database; (3) to seasonally protect Greater Sage-Grouse winter concentration areas.

CSU Surface occupancy or use will be restricted (1) in areas identified as limited reclamation potential soils; (2) as mapped on the Lander Field Office GIS database; (3) for the protection of sensitive soil resources.

CSU Surface occupancy or use will be restricted (1) on slopes between 15 and 24 percent; (2) as mapped on the Lander Field Office

GIS database; (3) to protect areas containing slopes between 15 and 24 percent.

CSU Surface occupancy or use will be restricted (1) to no more than an average of one oil and gas or mining locations per 640 acres using the DDCT, and the cumulative value of all applicable surface disturbances, existing or future, must not exceed 5 percent of the DDCT area, as described in the Disturbance Density Calculation Tool manual (DDCT); (2) as mapped on the Lander Field Office GIS database; (3) to protect greater sage-grouse designated Core Area from habitat fragmentation and loss.

This lease does not guarantee the lessee the right to occupy the surface of the lease for the purpose of producing oil and natural gas within Greater Sage-Grouse designated Core Area. The surface occupancy restriction criteria identified in this stipulation may preclude surface occupancy and may be beyond the ability of the lessee to meet due to existing surface disturbance on Federal, State, or private lands within designated core areas, or surface disturbance created by other land users. The BLM may require the lessee or operator to enter into a unit agreement or drilling easement to facilitate the equitable development of this and surrounding leases.

CSU (1)Surface use or occupancy will be restricted within designated "very high" or "high" potential fossil yield classification areas (2) as mapped on the Lander Field Office GIS database; (3) for the protection of fossil resources.

Lease Stipulation No. 3

NSO No surface occupancy or use is allowed on slopes greater than 25 percent (1) as mapped on the Lander Field Office GIS database; (2) protecting areas containing slopes greater than 25 percent.

NSO No surface-disturbing activities or surface occupancy is allowed within an 0.6-mile radius of the perimeter of occupied greater sage-grouse leks in Core Area (1) as mapped on the Lander Field Office GIS database; (2) to protect occupied greater sage-grouse leks and associated seasonal habitat, life-history, or behavioral needs of greater sage-grouse in proximity to leks from habitat fragmentation and loss, and protect greater sage-grouse populations from disturbance inside designated Core Area.

TLS Surface disturbing and disruptive activities are restricted or prohibited (1) within 1 mile of bald eagle and ferruginous hawk nests and $\frac{1}{4}$ mile of all other active raptor nests during the following time periods:

- April 1 to August 31 for northern goshawk
- April 1 to September 15 for burrowing owl
- February 1 to August 15 for bald eagles
- February 1 to July 31 for all other raptors

(2) as mapped on the Lander Field Office GIS database; (3) for the protection of active raptor and/or eagle nests.

TLS Surface-disturbing and disruptive activities are restricted or prohibited within 0.25 mile of identified mountain plover habitat (1) April 10 - July 10; (2) as mapped on the Lander GIS database; (3) for the protection of mountain plover nesting habitat.

TLS Surface disturbing and disruptive activities are restricted or prohibited (1) March 15 - June 30; (2) as mapped on the Lander Field Office GIS database; (3) to seasonally protect Greater Sage-Grouse breeding, nesting and early brood-rearing habitats from disruptive activities inside designated core areas.

TLS Surface disturbing and disruptive activities are restricted or prohibited (1) December 1 - March 14; (2) as mapped on the Lander Field Office GIS database; (3) to seasonally protect Greater Sage-Grouse winter concentration areas.

CSU Surface occupancy or use will be restricted (1) in areas identified as limited reclamation potential soils; (2) as mapped on the Lander Field Office GIS database; (3) for the protection of sensitive soil resources.

CSU Surface occupancy or use will be restricted (1) on slopes between 15 and 24 percent; (2) as mapped on the Lander Field Office GIS database; (3) to protect areas containing slopes between 15 and 24 percent.

CSU Surface occupancy or use will be restricted (1) to no more than an average of one oil and gas or mining locations per 640 acres using the DDCT, and the cumulative value of all applicable surface disturbances, existing or future, must not exceed 5 percent of the DDCT area, as described in the Disturbance Density Calculation Tool manual (DDCT); (2) as mapped on the Lander Field Office GIS database; (3) to protect greater sage-grouse designated Core Area from habitat fragmentation and loss.

This lease does not guarantee the lessee the right to occupy the surface of the lease for the purpose of producing oil and natural gas within Greater Sage-Grouse designated Core Area. The surface occupancy restriction criteria identified in this stipulation may preclude surface occupancy and may be beyond the ability of the lessee to meet due to existing surface disturbance on Federal, State, or private lands within designated core areas, or surface disturbance created by other land users. The BLM may require the lessee or operator to enter into a unit agreement or drilling easement to facilitate the equitable development of this and surrounding leases.

CSU (1)Surface use or occupancy will be restricted within designated "very high" or "high" potential fossil yield classification areas (2) as mapped on the Lander Field Office GIS database; (3) for the protection of fossil resources.

(2) as mapped on the Lander Field Office GIS database; (3) for the protection of active raptor and/or eagle nests.

TLS Surface-disturbing and disruptive activities are restricted or prohibited within 0.25 mile of identified mountain plover habitat (1) April 10 - July 10; (2) as mapped on the Lander GIS database; (3) for the protection of mountain plover nesting habitat.

TLS Surface disturbing and disruptive activities are restricted or prohibited (1) March 15 - June 30; (2) as mapped on the Lander Field Office GIS database; (3) to seasonally protect Greater Sage-Grouse breeding, nesting and early brood-rearing habitats from disruptive activities inside designated core areas.

TLS Surface disturbing and disruptive activities are restricted or prohibited (1) December 1 - March 14; (2) as mapped on the Lander

Field Office GIS database; (3) to seasonally protect Greater Sage-Grouse winter concentration areas.

CSU Surface occupancy or use will be restricted (1) in areas identified as limited reclamation potential soils; (2) as mapped on the Lander Field Office GIS database; (3) for the protection of sensitive soil resources.

CSU Surface occupancy or use will be restricted (1) on slopes between 15 and 24 percent; (2) as mapped on the Lander Field Office GIS database; (3) to protect areas containing slopes between 15 and 24 percent.

CSU Surface occupancy or use will be restricted (1) to no more than an average of one oil and gas or mining locations per 640 acres using the DDCT, and the cumulative value of all applicable surface disturbances, existing or future, must not exceed 5 percent of the DDCT area, as described in the Disturbance Density Calculation Tool manual (DDCT); (2) as mapped on the Lander Field Office GIS database; (3) to protect greater sage-grouse designated Core Area from habitat fragmentation and loss.

This lease does not guarantee the lessee the right to occupy the surface of the lease for the purpose of producing oil and natural gas within Greater Sage-Grouse designated Core Area. The surface occupancy restriction criteria identified in this stipulation may preclude surface occupancy and may be beyond the ability of the lessee to meet due to existing surface disturbance on Federal, State, or private lands within designated core areas, or surface disturbance created by other land users. The BLM may require the lessee or operator to enter into a unit agreement or drilling easement to facilitate the equitable development of this and surrounding leases.

CSU (1)Surface use or occupancy will be restricted within designated "very high" or "high" potential fossil yield classification areas (2) as mapped on the Lander Field Office GIS database; (3) for the protection of fossil resources.

- February 1 to July 31 for all other raptors

(2) as mapped on the Lander Field Office GIS database; (3) for the protection of active raptor and/or eagle nests.

TLS Surface-disturbing and disruptive activities are restricted or prohibited within 0.25 mile of identified mountain plover habitat (1) April 10 - July 10; (2) as mapped on the Lander GIS database; (3) for the protection of mountain plover nesting habitat.

TLS Surface disturbing and disruptive activities are restricted or prohibited (1) March 15 - June 30; (2) as mapped on the Lander Field Office GIS database; (3) to seasonally protect Greater Sage-Grouse breeding, nesting and early brood-rearing habitats from disruptive activities inside designated core areas.

TLS Surface disturbing and disruptive activities are restricted or prohibited (1) December 1 - March 14; (2) as mapped on the Lander Field Office GIS database; (3) to seasonally protect Greater Sage-Grouse winter concentration areas.

CSU Surface occupancy or use will be restricted (1) in areas identified as limited reclamation potential soils; (2) as mapped on the Lander Field Office GIS database; (3) for the protection of sensitive soil resources.

CSU Surface occupancy or use will be restricted (1) to no more than an average of one oil and gas or mining locations per 640 acres using the DDCT, and the cumulative value of all applicable surface disturbances, existing or future, must not exceed 5 percent of the DDCT area, as described in the Disturbance Density Calculation Tool manual (DDCT); (2) as mapped on the Lander Field Office GIS database; (3) to protect greater sage-grouse designated Core Area from habitat fragmentation and loss.

This lease does not guarantee the lessee the right to occupy the surface of the lease for the purpose of producing oil and natural gas within Greater Sage-Grouse designated Core Area. The surface occupancy restriction criteria identified in this stipulation may preclude surface occupancy and may be beyond the ability of the lessee to meet due to existing surface disturbance on Federal, State, or private lands within designated core areas, or surface disturbance created by other land users. The BLM may require the lessee or operator to enter into a unit agreement or drilling easement to facilitate the equitable development of this and surrounding leases.

CSU (1)Surface use or occupancy will be restricted within designated "very high" or "high" potential fossil yield classification areas (2) as mapped on the Lander Field Office GIS database; (3) for the protection of fossil resources.

NSO No surface occupancy is allowed with the designated national Trails management Corridor (1) entire lease; (2) for the protection of Congressionally Designated Trails and their settings.

TLS Surface disturbing and disruptive activities are restricted or prohibited (1) within 1 mile of bald eagle and ferruginous hawk nests and $\frac{1}{4}$ mile of all other active raptor nests during the following time periods:

- April 1 to August 31 for northern goshawk
- April 1 to September 15 for burrowing owl
- February 1 to August 15 for bald eagles
- February 1 to July 31 for all other raptors

(2) as mapped on the Lander Field Office GIS database; (3) for the protection of active raptor and/or eagle nests.

TLS Surface-disturbing and disruptive activities are restricted or prohibited within 0.25 mile of identified mountain plover habitat (1) April 10 - July 10; (2) as mapped on the Lander GIS database; (3) for the protection of mountain plover nesting habitat.

TLS Surface disturbing and disruptive activities are restricted or prohibited (1) March 15 - June 30; (2) as mapped on the Lander Field Office GIS database; (3) to seasonally protect Greater Sage-Grouse breeding, nesting and early brood-rearing habitats from disruptive activities inside designated core areas.

TLS Surface disturbing and disruptive activities are restricted or prohibited (1) December 1 - March 14; (2) as mapped on the Lander Field Office GIS database; (3) to seasonally protect Greater Sage-Grouse winter concentration areas.

CSU Surface occupancy or use will be restricted (1) in areas identified as limited reclamation potential soils; (2) as mapped on the Lander Field Office GIS database; (3) for the protection of sensitive soil resources.

CSU Surface occupancy or use will be restricted (1) on slopes between 15 and 24 percent; (2) as mapped on the Lander Field Office GIS database; (3) to protect areas containing slopes between 15 and 24 percent.

CSU Surface occupancy or use will be restricted (1) to no more than an average of one oil and gas or mining locations per 640 acres using the DDCT, and the cumulative value of all applicable surface disturbances, existing or future, must not exceed 5 percent of the DDCT area, as described in the Disturbance Density Calculation Tool manual (DDCT); (2) as mapped on the Lander Field Office GIS database; (3) to protect greater sage-grouse designated Core Area from habitat fragmentation and loss.

This lease does not guarantee the lessee the right to occupy the surface of the lease for the purpose of producing oil and natural gas within Greater Sage-Grouse designated Core Area. The surface occupancy restriction criteria identified in this stipulation may preclude surface occupancy and may be beyond the ability of the

lessee to meet due to existing surface disturbance on Federal, State, or private lands within designated core areas, or surface disturbance created by other land users. The BLM may require the lessee or operator to enter into a unit agreement or drilling easement to facilitate the equitable development of this and surrounding leases.

CSU (1) Surface use or occupancy will be restricted within designated "very high" or "high" potential fossil yield classification areas (2) as mapped on the Lander Field Office GIS database; (3) for the protection of fossil resources.

CSU Surface occupancy or use is restricted within designated VRM Class I and II areas (1) as mapped on the Lander Field Office GIS database; (2) for the protection of VRM Class I and II areas.

CSU Surface occupancy or use will be restricted (1) in areas identified as limited reclamation potential soils; (2) as mapped on the Lander Field Office GIS database; (3) for the protection of sensitive soil resources.

CSU Surface occupancy or use will be restricted (1) on slopes between 15 and 24 percent; (2) as mapped on the Lander Field Office GIS database; (3) to protect areas containing slopes between 15 and 24 percent.

CSU Surface occupancy or use will be restricted (1) to no more than an average of one oil and gas or mining locations per 640 acres using the DDCT, and the cumulative value of all applicable surface disturbances, existing or future, must not exceed 5 percent of the DDCT area, as described in the Disturbance Density Calculation Tool manual (DDCT); (2) as mapped on the Lander Field Office GIS database; (3) to protect greater sage-grouse designated Core Area from habitat fragmentation and loss.

This lease does not guarantee the lessee the right to occupy the surface of the lease for the purpose of producing oil and natural gas within Greater Sage-Grouse designated Core Area. The surface occupancy restriction criteria identified in this stipulation may preclude surface occupancy and may be beyond the ability of the lessee to meet due to existing surface disturbance on Federal, State, or private lands within designated core areas, or surface disturbance created by other land users. The BLM may require the lessee or operator to enter into a unit agreement or drilling easement to facilitate the equitable development of this and surrounding leases.

CSU (1)Surface use or occupancy will be restricted within designated "very high" or "high" potential fossil yield classification areas (2) as mapped on the Lander Field Office GIS database; (3) for the protection of fossil resources.

CSU Surface occupancy or use is restricted within designated VRM Class I and II areas (1) as mapped on the Lander Field Office GIS database; (2) for the protection of VRM Class I and II areas.
