

The Project Corridor is the area under study for the Proposed Project. This area varies in width due to topography and administrative boundaries, but generally is based on a 2-mile width. Project components including the transmission line, access roads, and construction areas would be located within the Project Corridor, to the extent possible. Some components, such as terminals and ground electrode beds, would be located just outside the corridor.

TRANSWEST EXPRESS TRANSMISSION PROJECT

LAND USE

Project Features	Administrative Features	Transportation	Hydrography
Terminal Siting Area	State Capital	Interstate	Lake/Reservoir
Potential Ground Electrode Siting Area	County Seat	US Highway	Major Rivers
Potential Ground Electrode Site	City/Town		
Potential Ground Electrode Overhead Electrical Line	State Boundary		
	County Boundary
