Comments (use back if needed): FOR COAL
Closing coal mines & coal fired plants is putting the cart before the horse. We have SO many things to fix before we remove one of the most available, inexpensive resources we have. Coal is not the enemy! We need inexpensive coal so we can develop industry, manufacturing and Jobs, Jobs, Jobs. Climate change people need to be realistic - how much do we all run our air conditioning? how many refrigerators and freezers does each American have? Build eco appliances that are REALLY Energy efficient!
