Comments (use back if needed):

There are a lot of people
in Utah and the nation that
rely on coal. Even me being
ten can tell what it would
be like if there wasn't
coal. If there wasn't coal
we would have to use
solar panels which don't
provide enough electricity.
Electricity is one of the
things that humans need and
if we don't have enough
electricity our economy will
crumble. ~~Also having~~
