

MR. ZUFELT: Richard Zufelt, I do transport the fossil fuels that we use in our power plants out at the coal mines. I do support the use of coal. We need to really look and see some of the effects that's going to happen when -- if we do not make the right choices in supplying the leases. We need to continue to operate what we do for the power plants in surrounding areas. It just does not affect the yellow shirts, it affects every one of us. As far as your local Walmarts, they're going to suffer, schools will suffer, we'll suffer. I'm 100 percent for continuing leasing on the coal companies. Stepping into this room today, my favorite color now is yellow. (Applause.) In closing, I'm going to have lots of extra time left on the board there, but this young lady here in front typing all these words out, she needs a break. Go C-O-A-L! (Applause.)
