Comments (use back if needed):

BLM Lead the way! Be the  
moral, ethical, inspirational leaders.  
This is not us against them.  
Industry A vs. Industry B. Yes, we  
need jobs. Keep the focus on jobs,  
but jobs in new technologies as  
you provide the leadership.  
Move aggressively toward renew-  
able energy development + the jobs  
that can be created

The country is hungry for their leaders to address issues that threaten the wellbeing of the Earth, our home. We all cherish feelings of security + safety when we are in our homes.

Our Earth is our Home

BLM: protect the Planet first,

money + profits second. BLM-

you are stewards of our land-

The research has been thorough-

+ clearly supports the analysis -

the climate is warming. The impacts

can be mitigated by actions humans

can take if governments lead the

way, sooner rather than later.

BLM: make strong recommendation

to move away from coal, AND oil

+ gas
