Comments (use back if needed):

We must now stop taking ALL

coal out of public lands.

The air and land pollution is too

much and must come to an end.

The people do not want to continue

to subsidize the coal industry.

The biggest objections to this major source of  
pollution is money for the affected communities  
→

Surely there are ways to give  
the affected communities new  
sources of income - solar industry?  
for example? - But the coal  
industry has to end - new industries  
will rise up for the affected  
communities. (it is already happening)

We will <sup>^</sup> destroy the  
land for our lives - not  
other life - but our human  
lives if we do not immediately  
stop coal production - and all  
other corollary problems arising  
from coal production
